As chairman of the Rules Committee, JIM has shouldered tremendous responsibility, and he has performed admirably. His leadership role has truly been a fine example for each of us.

In "The Ladder of St. Augustine," Henry Wadsworth Longfellow penned words of tribute to great men which truly typify this fine Congressman:

"The heights by great men reached and kept
Were not attained by sudden flight,
But they, while their companions slept,
Were toiling upward in the night."

We shall miss JIM DELANEY, and as long as water runs downhill, his name will be spoken in the Halls of Congress with respect and with affection.●

● Mr. McHUGH. Mr. Speaker, I am pleased to join today in paying tribute to the illustrious and dedicated service rendered in this body over many years by our colleague, Congressman JIM DELANEY of New York.

Congressman DELANEY represents the congressional district in which my parents reside and, therefore, I am not only a colleague but a kind of constituent-in-law. I am well acquainted with the affection and esteem with which he is regarded by the people he has served so well.

New York is very proud of him for his service as chairman of the House Rules Committee. In addition, he has served as dean of the New York congressional delegation at a time of particular crisis for New York City, and thus has played a very significant role in the complex efforts to assist the city.

We will remember and cherish his friendship, his unfailing sense of humor amid the hectic events of congressional life, and his exemplary service to his district, his State, and his country. I am proud to join with all his friends in Congress in wishing for him much happiness in the years to come.●

● Mr. JOHNSON of California. Mr. Speaker, as we conclude the 95th Congress I am reminded that the distinguished chairman of the House Committee on Rules will be retiring. JIM DELANEY has been an important and effective Member of this body, and I want to wish him continued good health and happiness as he leaves these Halls.

JIM has spent 34 years in this Chamber and has given nearly his entire life to public service. He is to be commended on his legislative record and his efforts in behalf of his constituents.

Throughout his career in Congress, JIM DELANEY has made important contributions to the legislation enacted by Congress. Although his accomplishments are many, JIM DELANEY is perhaps best known to the "man on the street" as the author of the "Delaney amendment" which has served unswervingly as the Government's standard for preventing the marketing of substances proven to be carcinogenic.

More recently, as chairman of the Committee on Rules, JIM has demonstrated his effectiveness in helping to move legislation swiftly through the House. His leadership has played an important role in the successful record of Congress in recent years.

As JIM leaves us, we congratulate him on a job well done and ask that he continue to share with us his wisdom and knowledge.●

● Mr. LUNDINE. Mr. Speaker, I join with my colleagues of the House and those in the New York delegation in today wishing the very best in the future to a most distinguished legislator, JIM DELANEY.

As a relatively new member of the delegation, coming to the Congress in the middle of a term, I had occasion to be particularly grateful for JIM DELANEY's counsel and example. His services as dean of the New York delegation and as chairman of the House Rules Committee have been examples of leadership and statesmanship. His service to his district won him the enviable distinction of being nominated by three political parties at once.

Mr. DELANEY will be missed by all of us who have had the opportunity to learn from his years in the Chamber and benefit from his experiences and interests. I want to wish him a pleasant, well-earned retirement.●

● Mr. MITCHELL of New York. Mr. Speaker, I am pleased to join in this special tribute to the dean of the New York congressional delegation and a dedicated New Yorker who has served his district, State, and Nation well for 34 years here in the House of Representatives.

Those of us who have been privileged to work closely with JIM DELANEY know him to be an individual concerned about people and their problems and one who has always been most anxious to help in contributing to the solution of these problems. He has led our congressional delegation during a period of transition in which we have gone from a group of individuals working independently to a cohesive team of Representatives working together for the common good. His leadership has been noted by many others but I bring it to our attention here today because I think it especially significant and, therefore, deserving of special mention.

We all wish JIM DELANEY well and hope that our paths will continue to cross often.●

● Mr. MANN. Mr. Speaker, I would like to join my colleagues in paying tribute to a distinguished fellow Member, JAMES DELANEY of New York.

The chairmanship of the House Rules Committee has culminated a 32-year career in Congress during which JIM has earned the respect of all of his colleagues.

Through the years, Chairman DELANEY has been known as a champion of consumer protection. More than 20 years ago, as chairman of the Select Committee to Investigate the Use of Chemicals in Food and Cosmetics, JIM sponsored the Delaney Act, for which he is known throughout the Nation. He has also been very active in the fields of revenue sharing, Federal funds for mass transit, and education. I had the pleasure of working with him when, as chairman of the Informal House Textile Committee, I found my colleague from New York to be a strong proponent of fair textile trade policies. Though JIM and I have not always been on the same side of every issue, I have always had the utmost respect for his intelligence and dedication.

As chairman of the Rules Committee, JIM has shown himself to be a skillful legislator, who has kept the committee moving. Jim's efficiency is tempered by a good sense of humor which has brought a light touch to many a heated meeting.

With the departure of Congressman DELANEY, Congress is losing a dedicated and well-respected Member. I wish the Congressman many happy and fruitful years in his well earned retirement.●

● Mr. BOLAND. Mr. Speaker, I take this opportunity to join with my colleagues to pay tribute to JAMES DELANEY under this special order.

JIM DELANEY has served in Congress since the New Deal days of Franklin Roosevelt. His constituents have returned him to Congress 16 times. This long term of service has also been a distinguished one. As chairman of the Rules Committee, JIM DELANEY has presided over consideration of the major bills of the 95th Congress. His chairmanship has been characterized by fairness and dedication.

In addition to his work on the Rules Committee, JIM DELANEY has been in the forefront of many important issues over the years. His drafting of a guide for the testing of new chemicals was an important step in consumer protection. This Delaney clause has been the subject of some controversy, but has surely saved many lives over the past 20 years.

Mr. Speaker, I wish JIM DELANEY the best of luck in all future endeavors. He will surely be missed here in the House of Representatives.●

● Mr. SKUBITZ. Mr. Speaker, it is with great pleasure that I join my colleagues in paying tribute to JIM DELANEY, who will be retiring at the close of the 95th Congress. JIM'S representation of New York has been in the highest tradition of public service.

Although I have not been privileged to serve on the same committees as JIM, I have had occasion to lobby him in his capacity as a member of the Appropriations Committee. He has always been fair. I have become an admirer of JIM'S dedication to hard work and constant vigilance to insure the best interest of the public is served.

I truly hate to see the career of such a fine Representative come to an end. The people of New York's Ninth District are losing an exemplary public servant.

JIM has earned a high place in the eyes of his colleagues.

I extend my sincere wish that JIM will find much happiness in retirement.●

GENERAL LEAVE

Mr. ADDABBO. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the subject of my Special Order on today, the retirement of Honorable JAMES J. DELANEY.

The SPEAKER. Is there objection to the request of the gentleman from New York?

There was no objection.

TRIBUTE TO JOHN E. MOSS

The SPEAKER. Under a previous order of the House, the gentleman from Michigan (Mr. DINGELL) is recognized for 60 minutes.

GENERAL LEAVE

Mr. DINGELL. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the subject of my Special Order on today, the retirement of my dear friend and colleague, the Honorable JOHN E. Moss.

The SPEAKER. Is there objection to the request of the gentleman from Michigan?

There was no objection.

Mr. DINGELL. Mr. Speaker, with my colleagues in the House of Representatives, I pay special tribute to one of my very best friends, the gentleman from California, JOHN E. Moss.

He is public citizen No. 1 in my book.

It is JOHN E. Moss whose gallant and pluckish, fiery and untiring determination has resulted in numerous provisions within our public laws to protect the individual rights of American citizens. JOHN'S efforts to this end have been etched in stone guiding our country and American Government. He is the author and protector of the Freedom of Information Act, one of the truly major accomplishments of a stunning congressional career.

We cannot replace JOHN who has, and I say this with great regret but full understanding, chosen to retire from the House. His record is a quarter of a century of service for the common good of the people and the Nation. We can only follow in the well-marked trail JOHN has blazed, sometimes with a blowtorch but mostly with a well-honed axe, to insure that we and others in future sessions of Congress keep the protections, that JOHN Moss has secured, intact for future generations.

JOHN has served honorably as a senior member of both the Government Operations Committee and the Interstate and Foreign Commerce Committee. It has been on the Commerce Committee, sitting side by side with JOHN for most of those 25 years, where I learned many useful rules of parliamentary procedure, along the hard knocks of the legislative process. JOHN and I were usually together on the same side of most issues and I believe it can be said we have been a most formidable team. But, honest men will differ upon occasion and when he and I differed, it was always with a great deal of exuberance while our respect for one another remained solidly intact. He has been a real "bear" in legislative combat and a fighter for his fellow Americans.

It is said in this Chamber that the Member who best knows the rules of the House can win many a legislative victory. For JOHN Moss, I can say that he has "ruled" in this House.

I honor this man and I love him—and—he and his wife, Jean, have all my affection and best wishes for the happiest of days ahead as they return to California.

Mr. ANDERSON of California. Mr. Speaker, will the gentleman yield?

Mr. DINGELL. I am delighted to yield to the gentleman from California.

Mr. ANDERSON of California. Mr. Speaker, when the 95th Congress adjourns for the last time, Washington will bid farewell to one of its most worthy public servants, Congressman JOHN E. Moss of California. The constituents of the Third District, as well as his colleagues here in the Capitol, surely will miss the presence of this active, straightforward, independent man who worked for so many years to advance the cause of individual freedom.

My first encounter with JOHN was during the time that we spent serving together in the California State Assembly, 1948–51. Although JOHN was just a young fellow and brand new to politics, he was just as bold and feisty then as he is today. He left the State Assembly in 1952, when he was elected to the House.

JOHN'S move to Washington did not cause him to forget those who sent him here. Always, he carries in his heart the knowledge that he is both servant and protector of the people. JOHN has acted upon this knowledge with foresight, diligence and unsurpassed dedication, as exemplified by his sponsorship of the Freedom of Information Act in the late 1950's. Since then, he has continued his fight for individual rights with his invaluable service as chairman of the Oversight and Investigations Subcommittee and as a member of the Government Operations Subcommittee on Government Information and Individual Rights. JOHN'S record in Congress clearly justifies his reputation as a man ahead of his time, and my personal experiences with him more than solidify that image. As chairman of the California delegation he has provided the leadership and know-how so vital both to the members of the delegation personally and to the legislative process as a whole.

For 26 years JOHN Moss has been a dedicated public servant, an awesome political fighter, and a loyal friend to those around him. He has earned the respect and admiration of his constituents and his fellow members. While I know how deserving JOHN is of a long, pleasant life of leisure in his retirement, I am also sadly aware that all of us will feel a certain loss when he is not with us at the opening of the 96th Congress. My wife, Lee, joins me in wishing all the best to JOHN and his lovely wife Jean and family.

Mr. MAGUIRE. Mr. Speaker, will the gentleman yield?

Mr. DINGELL. I yield to the gentleman from New Jersey.

Mr. MAGUIRE. Mr. Speaker, JOHN Moss surely is one of the most extraordinary Members ever to have served in this Chamber. My only regret is that I overlapped him by only 4 years. I would like to have continued to serve with him because he has taught me a lot, and taught other newer Members a great deal.

Mr. DINGELL. Including the gentleman in the well.

Mr. MAGUIRE. I am grateful to the gentleman, as I am sure JOHN Moss is, for that generous comment.

The fact of the matter is that JOHN Moss is a rigorous investigator who has great respect for facts, regardless of where they lead; who has great reverence for this institution, and who has distinguished himself time and again in his dedication to this country and what this country is all about. I join with all of my colleagues in honoring a very great man, JOHN Moss of California.

Mr. DINGELL. I thank my good friend for his comments.

Mr. DANIELSON. Mr. Speaker, will the gentleman yield?

Mr. DINGELL. I yield to the gentleman from California (Mr. DANIELSON).

Mr. DANIELSON. Mr. Speaker, I thank the gentleman for yielding. JOHN Moss, of course, is the dean of our California Democratic delegation, and he has been a tremendous help to me ever since I arrived here in the Congress a few years ago. We are going to miss him here, miss him a great deal.

I do not know of anybody who is quite as vitally interested in what goes on about the House, who takes quite so independent a point of view, as JOHN Moss, and who never hesitates to tell people where he stands on things. I really like that, myself. I think we need more of it.

I get a real pleasure out of talking with JOHN once in a while, and I told him what I remember it was that Adlai Stevenson said: "What the world needs is more ornery people."

I think he is one of the most ornery people I know, and I say that in a friendly sense.

I usually arm wrestle with him, and he usually beats me to show that he is strong as an ox. I think that epitomizes the way JOHN Moss lives. He knows what he is thinking about, he knows his business. He believes firmly in what his position is. He does not hesitate to tell anybody. You know, in this day of pablum that reaches from coast to coast, it is nice to have somebody who can tell you where he stands, and you do not have a bit of doubt, particularly when he has got the kind of ability JOHN Moss has.

I am sorry we are going to be losing him here, because we need more JOHN MOSSES. I have a hunch we will hear a lot about him.

I thank the gentleman from Michigan for giving me a chance to tell what I think of a great Congressman, and dean of our delegation.

Mr. DINGELL. I thank my friend.

● Mr. DRINAN. Mr. Speaker, I have met very few persons in my lifetime who had the integrity, the courage, and the vision possessed by Congressman JOHN EMERSON Moss.

Congressman Moss was one of my inspirations before I came to the Congress in 1971, and he has remained as one of my ideals and models.

JOHN Moss will follow the evidence and the truth wherever it may lead and will decide on the merits of the question no matter how difficult the political or personal consequences.

The American people owe a tremendous debt of gratitude to Congressman Moss as the principal author of the Freedom of Information Act. He has opened up the American Government in totally unprecedented and historic ways.

Congressman Moss has been a battler for the rights of the consumer in almost countless ways. In his work on the Commerce Committee and on the Government Operations Commitee he has been a stalwart in insisting that the executive branch of Government disclose everything that Congress needs in order to legislate responsibly and to do conscientious oversight.

The 26 years of his life which Congressman Moss has given to the Congress of the United States have brought about monumental contributions to the well-being of America.

Congressman Moss will continue to be in my mind the ideal Member of the House. I and countless others will hold him in veneration all the days of our lives. The like of him will not soon come to us again, and for that reason we stand in admiration and veneration.

Mr. BOLAND. Mr. Speaker, I take pleasure in joining with my colleagues to pay tribute to our good friend JOHN Moss.

JOHN Moss and I came to Congress in the same year. I have, therefore, had the opportunity to closely follow his career in the House. Throughout that career, JOHN Moss has been an outspoken champion of the rights of consumers and the rights of citizens to have access to their Government. He has been in the forefront on issues that have only recently come into vogue.

His service on the Government Operations Committee and the Interstate and Foreign Commerce Committee has resulted in numerous legislative achievements that have benefited all Americans. The Freedom of Information Act, which has made the records of the Federal Government more accessible to its citizens, is almost entirely the product of the efforts of JOHN Moss. In addition, the Consumer Product Safety Commission owes much of its independent stature to the persistence and dedication of JOHN Moss.

Mr. Speaker, the career of JOHN Moss has indeed been a distinguished one. He will be missed in the House of Representatives. I wish him the best of luck as he moves on to new challenges.●

● Mr. STARK. Mr. Speaker, I would like to take a few moments to salute our distinguished and respected colleague, JOHN Moss. Mr. Moss has decided to take his leave of the halls of Congress after some 24 years of hard work in this body and faithful representation of his constituents in Sacramento, Calif. JOHN Moss' absence will be sorely felt by both his congressional colleagues and by those he represents.

Throughout his career in Washington, JOHN Moss has been a man ahead of his times. Back in the 1950's—without the support of the organized public interest lobbies which we rely on today—JOHN saw the need for legislation which would give the American people access to Government information. A long and sometimes lonely battle, led by JOHN Moss, resulted in the passage of the Freedom of Information Act. Without this legislation, we would not have come so far along the road to the open and accessible Government which is so loudly demanded today. His commitment to open Government, moreover, enabled JOHN to understand the corruption of the Nixon administration as many of us were just beginning to notice that something was amiss.

Mr. Moss has always been sensitive to the needs of his constituents. This sensitivity has created a legislative answer to many of the most pressing needs of the American people. A pioneer in the consumer movement, for example, JOHN Moss' leadership was important in the creation of the Consumer Product Safety Commission.

Finally, all of us in the House know of JOHN's hard work as a member of the Commerce Committee. As chairman of the Subcommittee on Investigations, he has taken his oversight responsibilities very seriously. The importance of his thankless job of insuring that legislation is being implemented in accordance with the intent of Congress and the best interests of the American people cannot be overestimated.

We all owe JOHN Moss a heartfelt thanks and our very best wishes.●

● Mr. RUSSO. Mr. Speaker, for over a quarter of a century JOHN Moss has served with distinction and courage in the House. It is with a great sense of loss that we bid JOHN Moss farewell as he leaves the body he has served so well. JOHN has often stood alone, but he never allowed the force of numbers to still his forceful voice. He came here in 1952 breathing fire and ready for battle, and battle he did.

I doubt if he has ever been considered an ordinary man—and clearly he demonstrated his exceptional nature and just plain "grit" when he fought, almost single-handedly, for the adoption of the Freedom of Information Act, which has given many citizens a mechanism for obtaining the documents and materials that affect their lives.

He has made his mark in the Commerce Committee and it was a pleasure and education for me to serve with a Member of his skill and insight. He has helped make this country a better place and he can leave the Congress feeling the satisfaction of a job well done.●

● Mr. JOHNSON of California. Mr. Speaker, with the close of the 95th Congress will come the close of the long and distinguished career of my friend and colleague from California, JOHN Moss. We are thankful for his very generous contributions to effective Government through his service as a Member of Congress, and will indeed be sorry to see him leave this Chamber.

JOHN came to Congress over a quarter of a century ago. He has established a reputation for honesty and integrity and for leadership JOHN has never been afraid to stand up for what he believed, and because of this he has been a champion of the little man.

JOHN Moss' accomplishments as a Member of Congress are numerous. He is renown for his investigative skills and his ability to go directly to the point of an argument. He had been a valued member of the Interstate Commerce and the Government Operations Committees.

As a fellow Californian, I have also had the opportunity to observe JOHN Moss as a member of the largest State delegation, and more recently as the head of our delegation. JOHN has brought continuity to a very diverse delegation and has been effective in developing a

consensus on matters of special interest to the golden State.

Mr. Speaker, although JOHN has left his mark on Congress in many ways, I must once again commend JOHN for his hard work and long struggle to enact the Freedom of Information Act. This single piece of legislation was enacted only after unceasing efforts by JOHN Moss. Today it stands as one of the most important pieces of legislation adopted by the Congress in recent decades to protect the individual freedoms we all hold so dear.

JOHN has been a friend and counsel to me, and his departure is in many respects a sad occasion for me. I am bouyed, however, by the knowledge that he will now have the opportunity to relax and regain his health. We are going to miss his fighting spirit and his most able leadership. We know that he has made his full measure of contribution as a Member of Congress and well deserves to pass on the mantle of representing our State Capital here in the House of Representatives.

To JOHN and to his wife Jean, both Albra and I wish the very best for the future. We hope that JOHN will continue to share his suggestions and ideas with us, for he still has much to offer from which we can all benefit.●

● Mr. MARKS. Mr. Speaker, it has been my pleasure to serve the past 2 years as a member of the Interstate Subcommittee on Oversight and Investigations, chaired by the distinguished JOHN Moss. His retirement this year will represent a personal loss for me, as well as a loss to the entire Nation.

As an architect of such major pieces of legislation as the Freedom of Information Act, the Privacy Act, and the bill creating the Consumer Product Safety Commission, Congressman Moss has earned national recognition and acclaim for his great interest in the common man and strong support for consumer issues. In spite of this well-deserved stature, however, JOHN Moss continues to treat all persons, great and small, with equal respect and dignity.

As a freshman member of the minority party, I have been especially aware of the fair treatment which Chairman Moss has accorded each member of the Oversight Subcommittee. JOHN Moss has personally helped me learn about congressional operations, and has personally assisted me in getting through the difficult first term every freshman faces.

As a member of Chairman Moss' Oversight Subcommittee, I have watched first-hand his untiring dedication to consumer causes, his unflinching inquiries into potential violations of consumer interests, and his tenacity in seeing a matter through to its resolution. These qualities will be greatly missed. I wish my good colleague a happy and fulfilling retirement.●

● Mr. COLLINS of Texas. Mr. Speaker, I want to join with my colleagues from the Commerce Committee in a salute to JOHN Moss, of California. Since I probably was on the opposite side of issues with JOHN more than any member of our committee, I have learned to respect him for all of his ability. Anyone soon discovers that JOHN Moss knows the rules of the committee and the rules of Congress better than anyone. I have questioned him many times but I find that when you verify the technical precedents that he was always right.

There never was anyone in Congress who was more tenacious in standing by his position. When JOHN Moss thinks something is right, hellfire and brimstones cannot phase him in his position. His determination and aggressiveness made him very effective as the chairman of the Oversight and Investigations Subcommittee. When the record is reviewed, history will probably find that JOHN Moss did more work during the 4 years that he headed up the Oversight and Investigations Subcommittee than was accomplished in the 100 years preceding his chairmanship.

JOHN Moss is a tireless worker and I cannot imagine him in retirement. What he is going to do with all of that energy is beyond my comprehension. JOHN Moss was a positive personality who will be missed in Congress.●

● Mr. DELLUMS. Mr. Speaker, today, October 12, 1978 in this special order of the House, I would like to join in honoring the senior Member of the California delegation, Congressman JOHN E. Moss. The 26 years that JOHN Moss has served in the House of Representatives are in their longevity deserving of much respect but it is his achievements that truly stand as a monument to this colleague's career. JOHN Moss possesses the kind of political foresight that prompted him to sponsor the Freedom of Information Act way before it became popular to support the notion that citizens' should have access to such information. As a member of the Commerce Committee JOHN Moss continued his support for more "unpopular" causes, one eventually leading to the creation of the independent Consumer Product Safety Commission. As chairman of the Subcommittee on Oversight and Investigations of the Interstate and Foreign Commerce Committee he has aggressively pursued investigations into unfair practices of American corporations to protect the American consumer. It is because of these outstanding achievements, his commitment to his beliefs, and his many years of superior service to the people of California's third district that I join in honoring my friend and colleague JOHN E. Moss.●

● Mr. BROOKS. Mr. Speaker, in January 1953, I was sworn in for the first time as a Member of the U.S. Congress.

On that same day, a most able and distinguished gentleman from the State of California became a Member of the House of Representatives.

I can truly say that throughout these 26 years we have served here together, I observed no Member more dedicated to his principles, more tenacious in achieving his objectives, nor more capable in carrying out his responsibilities than JOHN Moss.

It has been my pleasure to serve as chairman of the House Government Operations Committee where Congressman Moss is one of the ranking members. He is primarily responsible for one of the most far-reaching pieces of legislation the Congress has passed in recent years, the Freedom of Information Act. Through the Freedom of Information Act, Congressman Moss has unlocked the doors of the vast Federal bureaucracy for the ordinary citizens of this country.

An unflagging defender of the rights of the consumer, Congressman Moss, as chairman of the Subcommittee on Oversight and Investigations of the Interstate and Foreign Commerce Committee, has exposed numerous examples of unsafe products or activities that have endangered millions of Americans. His success here in the Congress will inure to the benefit of the people of this country for many years.

His departure is our loss, but I wish him and his family the very best in the years to come.●

● Mr. LENT. Mr. Speaker, I thank my colleague from Michigan (Mr. DINGELL) for setting aside this time for tributes to our good friend JOHN Moss who is retiring from the House of Representatives at the conclusion of his current term. It is most appropriate that those of us who have served with him join in marking his departures from the House with this special order, for I think every Member of this body would agree that the House of Representatives just will not be the same without the presence of JOHN Moss.

Especially is that true of those, like myself, who have had the privilege of serving on the Subcommittee on Oversight and Investigation of the House Committtee on Interstate and Foreign Commerce, which JOHN has chaired with such purposeful determination and masterful authority for the past 4 years.

Anyone who has ever challenged JOHN Moss to debate knows full well the depth of knowledge which JOHN Moss has amassed; the capability of his quick wit in putting that knowledge to use; and the adroit use he makes of the intricate parliamentary rules and procedures to further his cause. Certainly, no one matches the decisiveness of JOHN Moss as a chairman. There are those—mainly Republicans—who have been heard to claim to have suffered a loss of hearing from the oft-repeated wham of his gavel.

In his career as chairman of the Subcommittee on Oversight and Investigation, JOHN Moss was tireless. His inquisitive mind continually sought new areas of investigation, which took our subcommittee into a range of probes and surveys broad enough to stagger the imagination. In just the past 2 years, during the life of the 95th Congress, the Moss subcommittee has held hearings on nearly 40 different subjects and has conducted investigations on many more.

The range of those hearings and investigations has been encyclopedic, dealing with everything from the presence of carbon tetrachloride in the drinking water of Cincinnati to the use of cadavers in research on automobile accidents. In between, the subcommittee has delved into the state of our natural gas supplies; amateur athletics; aluminum electrical wiring; nursing home abuses; the quality of surgical care; conflicts of interest in

regulatory agencies; nuclear waste disposal problems; cancer causing chemicals in the environment and in food; the trans-Alaska pipeline; solar energy systems, and a number of oversight hearings concerning regulatory agencies. It has been a full 2 years.

It would be difficult to find in the annals of the House of Representatives a member who has been as dedicated as JOHN Moss to the uncovering of matters which might be harmful to the general public. It would also be difficult to find a Member of Congress who is leaving such an imprint on the Nation as does JOHN Moss. The Freedom of Information Act, which he authored and shepherded through the Congress, is in itself a landmark accomplishment. But in addition, JOHN Moss is leaving an imprint of his philosophy on regulatory agencies which will long remain. The various investigatory actions he carried through have had a major effect in many areas, particularly in those involving health care and environmental problems.

Although I serve on the opposite side of the aisle from JOHN Moss, our differences on issues have never interfered with our friendship. I view his departure from the Congress with real regret, for the House of Representatives will miss his dedication, determination and persistence.

I am confident, however, that no matter where his retirement years may lead, JOHN Moss' brilliant mind will be constantly searching for new challenges and new opportunities to benefit our Nation. I know my colleagues join in wishing JOHN Moss the best of luck, and the best of health throughout the years to come.●

● Mr. RODINO. Mr. Speaker, I want to take this opportunity to honor a very dedicated public servant and distinguished Member of this House. Ever since JOHN Moss came to Washington in 1952 he has been a leader for the rights of individuals and has worked tirelessly to make it possible for American citizens to have greater faith in their Government. As a member of the House Committee on Interstate and Foreign Commerce and the House Committee on Government Operations, JOHN Moss has been a most vigilant public servant who protected the rights of common citizens against more powerful special interests.

JOHN Moss has always directed his efforts in the best interests of American democracy—the belief that Government should work for all the people. His authorship of the Freedom of Information Act and his leadership in establishing the Consumer Product Safety Commission are two shining examples of his perseverance and legislative effectiveness.

Mr. Speaker, JOHN Moss' intelligence and candor, and his constant voice for justice, will be sorely missed in Congress. I am proud to have served with him for 15 years and I wish him well.●

● Mr. KILDEE. Mr. Speaker, it is difficult to calculate the contributions JOHN Moss of California, has made to the ideals of our constitutional democracy.

We know that JOHN Moss has championed the causes of individual liberty at a time in our history when a great many forces in our society threaten to erode the foundations of these greatest constitutional protections.

We know that JOHN Moss has defended and strengthened the legitimate rights and interests of the Congress of the United States, improving our constitutional structure of checks and balances.

I add my voice to the many who wish him a productive, happy, healthy retirement and I know his contributions to our society will not end upon his departure from these Chambers.●

● Mr. LLOYD of California. Mr. Speaker it is not a happy occasion to say goodby to a friend and colleague on his retirement, except for the opportunity it presents to say to him what you have wanted to say many times before but never found the right moment. I would say first of all that JOHN Moss marches to a relentless drummer. His adversaries may wish that his path took him somewhere other than across theirs, but he is steadfast and unswerving toward a goal which even adversaries must admire: Good government and the greatest benefit for the most people. The Third District of California was the only special interest which had his ear—but not always his vote, since JOHN Moss includes in his definition of representation the rare qualities of independence and leadership. Congressman as super caseworker is not his idea of representative government, although a more loyal, helpful friend you will never have. His constituents, his party—and sometimes both parties—have agreed with that definition for 26 years, and the result has been a strong, respected voice in Congress on behalf of not only a half million Californians, but also of all Americans who care about individual freedom and a Government which is an extension of their needs and not the other way around.

I count myself as privileged to have worked with JOHN. As a fellow Californian, as dean of our California Democratic delegation, and as an expert, experienced coworker, he personifies for me the ideas of dedication and public service. He is a lesson which will be taught for as long as there are people who remember his work here.●

● Mr. CORMAN. Mr. Speaker, I am privileged to pay tribute to a respected friend and dean of my delegation, the Honorable JOHN Moss. I must, however, add a note of deep personal regret that JOHN is retiring from the House. He, like so many of my fellow Californians, has decided to return home, and I will miss him very much.

JOHN is completing 26 years of an outstanding congressional career. He has served with superb distinction as chairman of the Subcommittee on Consumer Protection and Finance and now as chairman of the Subcommittee on Oversight and Investigations of the Interstate and Foreign Commerce Committee. Through these assignments JOHN has championed the causes of the American consumer. He has been a vital force in protecting the public from the hazards of faulty household and garden products, flammable fabrics, and dangerous toys for children by helping to establish the Consumer Product Safety Commission. He has also fought to strengthen the terms of product warranties to guarantee recourse against defective goods and services.

On a broader basis, JOHN has challenged the oil and gas companies for price gouging and attacked the health industry for performing unnecessary surgery on the unsuspecting public. In addition, in the late fifties JOHN sponsored the Freedom of Information Act. Almost alone, he battled to force the Government to give citizens access to information their taxes paid for. In the midsixties he won the war.

JOHN has fought valiantly to give Americans a better way of life. Those who follow him will gain a great deal from the standard of performance he now leaves behind him.

It has been a rare privilege to serve here with this distinguished Californian. I wish for JOHN and his wife, Jean, who has been so devotedly at this side in all endeavors, the best of everything yet to come—years of happiness, contentment, and good health.●

● Mr. LONG of Louisiana. Mr. Speaker, as we all know, the dean of the California delegation, Congressman JOHN Moss will be retiring from service in the House of Representatives at the close of this Congress.

JOHN Moss has distinguished this legislative body for the past 26 years, and in so many ways, his membership has been crucial to the operation of this Congress. All of us here hold him in the highest esteem. As the chairman of the Subcommittee on Oversight and Investigations of the Committee on Interstate and Foreign Commerce, Mr. Moss has relentlessly sought to improve the operations of our Government through proper and effective oversight. While oversight is often described as less than glamorous, our colleague has ably demonstrated that it is absolutely essential to insure that the legislative intent of Congress is followed. If more of our colleagues would follow his example, much of the pending legislation before both Houses of Congress would be unnecessary.

We in the House are truly indebted to the distinguished gentleman from California. JOHN Moss' political courage is without equal. His leaving will create a great void in this body and he will be sorely missed.

Mr. Speaker, I offer to my colleagues the following article which recently appeared in Roll Call. I believe Congressman Moss' points are well taken and we all stand to benefit from careful consideration of his comments.

[From Roll Call, Sept. 28, 1978]

MOSS ADVISES LULL TO EVALUATE CHANGES

(By Alan Goodman)

At various times he has been denounced by his critics as "arrogant," "difficult," and "self-righteous." And these are just a few of the adjectives that retiring veteran Rep. John Moss (D-Calif) can immediately recall that have been used to describe him.

But you quickly discover once you begin to talk with this iron-willed lawmaker—and take even a passing glance at his Congressional career—that this sort of thing does not phase him. If anything, the controversy that

has surrounded Moss over the years is his badge of honor; Congress, he laments, has descended into blandness.

"The strong figures are not there any more. The important thing today is to be popular. Once there was a great desire to be right in what you did, but now the motto is 'don't make too many waves'. It reflects a reliance to too great an extent on polls and polling techniques," he said.

Some may argue that this stern view is a gross exaggeration; that there are a number of Members, particularly younger ones, who are willing to "make waves." But almost any long-time Congressional observer will also tell you that there are not too many striking, colorful figures in the Capitol any more—that this is the age of the technocrat, the "colorless."

"No one wants to be thought of as arrogant and difficult, and the other things that I have been characterized as, and that has made for a duller Congress. Whatever people may say about me, though, at least they cannot say that I am a bland fellow," said the blunt, independent Congressman.

That will and tenacity are important to this 26-year House veteran is also evident when he talks about his concerns about the institution.

"Congress needs to assert its right to know what is going on. We've had to go to court to defend our right to get information (from the executive branch), and this is important. We must establish this right more firmly so we will not be dependent upon spoon-feeding, as we have been in the past," said Moss, who long pushed for a Freedom of Information act and who has fought many a battle with industry and administration figures as chairman of the Interstate and Foreign Commerce subcommittee on oversight and investigations.

Moss believes that if Congress had shown more interest in the past in its oversight function it could not have been so easily deceived about such things as the conduct of the war in Vietnam. There seems to be a growing interest in Congress in this area, but not enough to satisfy one of its biggest champions.

"If we exercised that function more we could enormously reduce the number of laws we would have to write. It does not get the immediate attention of some of the more spectacular bills, but I think in the long run I have shown that it can get you attention if the end product is good," said the 63-year-old lawmaker.

Moss also thinks it is high time that Congress put its own house in order. He is concerned, for example, about the extent to which "reforms" have been pushed through without due consideration to their impact on the institution.

"We have had this mad rush for change, and it has intensified over the last 10 years. It has gotten to the point where every new Congress is supposed to organize and greet the future with some changes that are generally characterized as 'reforms.'

"Whether they are or are not has not really been decided, however. They have not been evaluated to determine whether they have improved the performance of Congress, or made individual Congressmen more competent or productive," he said.

These questions should be answered before Congress rushes to embrace more "reforms," he said. "Changes should be made carefully and based on an evaluation of what they have done and might be expected to do in the opinion of those who have had to work with them. Knowledge should be relied upon rather than ignorance as the basis for acting. We are talking about the reality of a functioning institution of government, not textbook political theory," said the imposing Member.

Congress should also exercise more discipline in deciding what matters it will, and can, take up, and the degree to which Members may engage in nonlegislative business, said Moss.

The "non-legislative" issue particularly provokes the subcommittee chairman, who recalls frequent instances in the past when he has been forced to wait for members of his panel to show up in order to conduct business—only to learn that they were tied up doing something else, like conducting an interview or taping a message in the recording studio (although, in fairness, sometimes they also had another committee commitment).

"When I first came here the top priority was legislative business. If there was any appointment that a Member stayed away from it was a non-legislative one. This simply is not as true today," said Moss, who is dean of the California delegation in the House.

Another "abuse" that bothers the Congressman is the way suspension calendar is being used. "Legislation—sometimes major legislation—is being rammed through under conditions allowing no proper concern for perfecting the bills. This is an abuse of the suspension calendar, and it must stop," he said.

Another internal matter of general concern to those interviewed for this series is the obsession with ethics. Moss believes that Congress efforts in this area in recent years have not made the ethics of the institution any better or improved the "standards or quality" of the individual Members. "We are applying the ethical concept of the present and the future to actions of the past, and that is very difficult to do. We have to justify now things that took place years ago when customs were very different than they are today," said Moss.

But then, a lot of things in Congress were very different in the past than they are today, and the strong-willed, opinionated Congressman thinks his institution had better sit back and evaluate all of this very carefully before it plunges into the future.●

● Mr. ROGERS. Mr. Speaker, I join each of my colleagues when I express my sense of loss for this institution, the Nation, and the Commerce Committee on which we served together, at the departure of JOHN Moss. But we join equally in wishing JOHN every success in his new endeavors.

I am proud to count JOHN as one of my friends in this House, and as a close associate as a member of the Commerce Committee. JOHN has truly left his mark on some of the major laws of this country in the fields of consumer law, health, and energy. As chairman of the Subcommittee on Oversight and Investigations, JOHN has diligently pursued the proper implementation of the laws of this Nation, and has sought to expose new areas in need of legislative remedy.

And JOHN Moss has made the phrase "freedom of information" a meaningful right for every citizen to be privy to the decisions and actions of his Government.

JOHN has never been afraid of a fight, and I know that every Cabinet Secretary has taken office with the knowledge that he or she might soon be the subject of one of JOHN'S subpenas.

JOHN Moss has become one of the respected leaders of this institution; I join in thanking him for this contribution, and in wishing him every success for the future.●

● Mr. RINALDO. Mr. Speaker, I am pleased to rise today to pay tribute to an outstanding Member of the House of Representatives.

JOHN Moss has served in Congress for 26 years and has been far more than an ordinary legislator. He has always been willing to tackle the tough issues, and he has never been afraid of a fight; we all respect him because he is tough-minded, but fair at the same time.

His practical wisdom has guided him as chairman of the Subcommittee on Oversight and Investigations, on which I also serve and where he has done an outstanding job. Over the years, he has contributed greatly to the enactment of important legislation, such as the Moss-Magnuson Act, and the legacy he leaves behind him is one of which he can truly be proud.

But while he has been legislating on some of the most important issues facing the Nation, JOHN Moss has not forgotten his district—and his constituents have never forgotten him. Only a few years ago, he was endorsed by both political parties for reelection to the House of Representatives and he was overwhelmingly reelected to Congress.

It will be a long time, Mr. Speaker, before we have such a magnetic, forceful personality as JOHN Moss. We will miss him, and I personally want to wish him every success in the future.●

● Mr. OBEY. Mr. Speaker, I hate to see JOHN Moss leave this place. He has that sense of rage about injustice, unfairness, and stupidity that any Member of Congress needs to keep him going.

He was passionate in his support for the rights of consumers. He was a passionate protector of the individual against the clophopper tendencies of the State and his passion will be greatly missed.

In all institutions, political as well as other, the color seems to be slowly leeching out as passionate conviction is replaced by briefcase mentality. It is a great loss of this country and to this institution.

The American people can be thankful that JOHN Moss spent 26 years in this House. I will miss him.●

● Mr. OTTINGER. Mr. Speaker. JOHN Moss is one of my all-time favorite Congressmen. Since I first came to Congress in 1965 he has been perhaps the most consistent and vigorous protector of the Congress, of the Constitution, and of the consumer. His understanding of the way things work, and his insistence upon their working as they should, is deep.

JOHN Moss is a fighter. For the consumer, for the governmental processes that make this democracy work, JOHN Moss is perhaps the greatest champion in all of Congress history. Of due process, too, he is a foremost supporter.

JOHN Moss has been the most active advocate of assuring that the laws enacted by the legislative branch are fairly and adequately enforced. And he knows when to admit the laws are not working, and to seek the requisite changes.

One of the characteristics I hope I can claim to share with JOHN Moss is irreverence; if there is any Member of this body who provides an example in that department and who proves that one does

not have to drop the attitude as one ages, it is JOHN Moss.

If someone starts messing around with the public interest, with governmental processes, with congressional procedure, you can count on JOHN Moss to mess with the folks that are doing the messing.

Even more unusual is that JOHN Moss is also a sufficiently masterful politician who usually wins. Agreeing with him substantively, as I almost invariably have, has been agreeable and enjoyable; winning is just sheer fun.

The 96th Congress will find itself with a substantial vacuum created by the departure of JOHN Moss from our ranks. I will miss him, and I know we all will. Worse, those new Members who will take their seats for the first time in 1979 will not have the chance to know JOHN as a colleague, and to learn from him. That is a sorrowfully lost chance.

But the years have been good, and JOHN Moss has served the people of his district and all of the American people well. He has been a giant among us; his absence next year from our ranks will be sorely missed.

My best wishes go to JOHN Moss, in spite of my selfish wish that he would still remain, in the hopes that he has a long and fruitful sojourn away from these hectic haunts. When he ever visits, he will be extremely welcome here.

JOHN Moss, it has been a tremendous privilege working with you. I join my colleagues in giving you our warmest best wishes.●

● Mr. MANN. Mr. Speaker, after almost three decades of public service—including 12 terms in the U.S. Congress—JOHN Moss has more than earned the right to be free of the pressures of public office, and to enjoy what I hope will be many years of leisure with his wife and family.

The fact that the people of the Third Congressional District of California found him worthy of their sustained trust and support over the period of 24 years is a tribute in and of itself to JOHN Moss.

If it were not for them and their faith in him, the Congress would not have had the benefit of his wisdom and experience, and the Nation would not have had the benefit of his sensitivity to the public's right to know about the actions of Government. I refer, of course, to the major role that JOHN Moss played in the enactment into law of the Freedom of Information Act—a role for which he has received national acclaim and recognition, and justifiably so.

JOHN has been equally sensitive to the statutory and constitutional rights of individuals affected by Government agencies in his oversight of the Privacy Act of 1974, which is designed to protect those rights.

All of us as citizens owe a debt of gratitude to JOHN Moss for protecting our right to know what the Government is doing, and for protecting us from Government invasion of our privacy.●

● Mr. VAN DEERLIN. Mr. Speaker, JOHN Moss may not be the most easy-going Member of Congress—as Government agencies and corporations who have come into conflict with the Oversight Subcommittee might attest—but he ranks among the highest in integrity.

As spokesman for the public against a company trying to pass off shoddy goods—like tires that come apart—he is a bloodhound never thrown off the track by soothing words. He protects the consumer not only by persistent and careful oversight of American commerce, but through the Consumer Product Safety Commission he did so much to establish.

A fighter for the rights of the individual in the world of business, he has done more than any other public figure in recent memory to prevent further encroachment by Government bureaucracies into the private lives of our citizens. The Freedom of Information Act, like JOHN Moss, is a thorn in the side of those who value a smooth-running bureaucracy above individual rights and privacy. But it is perhaps the greatest insurance that the year 1984 in the United States will find us still valuing the individual above the State.

JOHN Moss is like Harry Truman. Some saw him as brusque and rough-edged; others saw that he was just immune to the bull that many other people blandly accepted.●

● Mr. ZABLOCKI. Mr. Speaker, the adjournment of the 95th Congress brings the retirement of our friend and colleague, Representative JOHN E. Moss of the Third District of California.

Representative Moss has ably served in this House for over 24 years. Besides his many duties to his constituents, JOHN Moss has served on the House Government Operations and Commerce Committees. As chairman of three powerful subcommittees, Representative Moss has skillfully carried on his responsibilities to oversee the operations of executive branch agencies as well as to protect the statutory and constitutional rights of individuals affected by Government agencies. Perhaps his most noteworthy accomplishment is his authorship of the widely acclaimed Freedom of Information Act.

Mr. Speaker, our colleague has a distinguished background in business and legislation. After leaving his career in business and real estate, he served our country during World War II. Subsequently he was elected to the California State Assembly in 1938, and reelected every term until he ran for his U.S. seat. In 1952 he ran and won a seat in this House where he has since served. I remember the honor bestowed to JOHN Moss in 1958 when he was nominated by both the Republican and Democratic parties.

Mr. Speaker, through his committee assignments, Representative Moss had the difficult task of balancing the sometimes seemingly conflicting spheres of the Government's national security interests and the consumers' right to information and privacy. JOHN Moss did an excellent job, which will well be remembered.

Mr. Speaker, I join the many others who stand today to wish our friend, Representative JOHN E. Moss, health, happiness, and a fruitful retirement.●

● Mr. ROYBAL. Mr. Speaker, as the 95th Congress comes to a close, so do the careers of many of our colleagues in the House. Among the most notable of those Members retiring this year is the dean of the California delegation, JOHN Moss.

It is a pleasure and a privilege to add my words of praise today for a man who, during his 26 years in Congress, has represented the people of California and the Nation with steadfast and dedicated service. He has upheld the faith and trust of his constituents and worked unceasingly for the betterment of all Americans. JOHN has a long and impressive career and will be remembered as a friend of the common man and a fighter for progressive legislation.

As principal author of the Freedom of Information Act, JOHN can take pride in his persistence and determination which brought this important concept into legislative reality. Additionally, his work in overseeing the Privacy Act of 1974 has been of particular importance in protecting the statutory and constitutional rights of individuals affected by Government agencies.

As Subcommittee Chairman on Oversight and Investigation of the Interstate and Foreign Commerce Committee, JOHN has had oversight responsibility of the operations, practices, and policies of executive branch agencies and departments and all programs within the jurisdiction of the full committee. In his subcommittee work, as in all his legislative responsibilities, JOHN has demonstrated keen insight, as well as considerable foresight.

I would like to congratulate JOHN on his distinguished career and wish him a long and enjoyable retirement—filled with good health and happiness.●

● Mr. FREY. Mr. Speaker, I would like to join with all his colleagues in wishing my good friend and committee colleague, JOHN Moss, well. JOHN has served his State and his country long and well. He has been an outstanding Congressman, one who has never been afraid to fight for the principles he believes in.

In a personal way, I have liked and admired JOHN. During the times he acted as chairman of the Commerce Committee, there was no fairer chairman. He knew the rules and enforced them no matter what his personal opinions happened to be. It also was a learning process to watch JOHN use the parliamentary rules during the committee debate. Even at times when he would oppose you, after the debate he would explain what he did and why. He was courteous and friendly toward me during our 10 years of mutual service. JOHN has certainly earned a well-deserved retirement. I wish him well, and Marcia and I send our best wishes for the future.●

● Mr. DE LA GARZA. Mr. Speaker, it is a distinct pleasure for me to join in this special order for my good friend from the Third District of California, JOHN Moss.

Now, Mr. Speaker, it is not often that I am without something to say. Nevertheless, when I consider the longevity of JOHN's service in this body, and all of his sterling accomplishments, the multi-

tude of praiseworthy deeds makes it hard to know where to start.

It is not the time now to detail JOHN Moss' good works—the CONGRESSIONAL RECORD is long enough already. A catalog of JOHN'S accomplishments would fill a hefty book. I would like to make one observation, though—the California delegation has long been respected throughout the House for its clout and judiciousness, and this can be attributed directly to the diligent and conscientious work of JOHN Moss.

The Congressman from the Third District of California has certainly earned a period of rest, but that does not make it any easier for the rest of the Members to accept. For we are going to be forced to continue without JOHN'S leadership and foresight which have been like beacons, guiding us through the thickets of congressional debate.

Thank you, JOHN, for a job well done. We are all going to miss you.●

● Mr. ANNUNZIO. Mr. Speaker, I rise in tribute to Honorable JOHN E. Moss, who is retiring this year as the dean of the California congressional delegation to Congress.

JOHN Moss has given a quarter century of dedicated and devoted service to his constitutents of the Third District of California, and has compiled an outstanding record during his distinguished career. His diligent efforts as chairman of the Oversight and Investigations Subcommittee of the House Interstate and Foreign Commerce Committee have been both fruitful and beneficial to the citizens of this Nation, and indeed, these successful efforts have made America a more just and successful country.

Few men have given more of themselves to good government, or have a more compassionate understanding of human problems than has JOHN Moss as a member of the Subcommittee on Government Information and Individual Rights and the Subcommittee on Legislation and National Security, both of the House Government Operations Committee. He has been in the forefront of efforts to implement meaningful solutions and effective action on behalf of individual citizens caught in the bewildering maze of the Federal bureaucracy.

JOHN is a fine legislator and a distinguished leader, and he will be missed by both his constituents and his colleagues.

I extend to JOHN Moss my best wishes for a healthy and happy retirement.●

● Mr. SKUBITZ. Mr. Speaker, it is with a great deal of pleasure I join the many friends of JOHN Moss in paying tribute to his years of outstanding service to the people of California and the people of the Nation. The memories of my years of service with JOHN are vivid ones.

The first time I met JOHN Moss he reminded me of the first time I had an engagement with an olive. I was a high school freshman and had never seen an olive. When I tasted my first olive—I did not like it. Neither the taste nor the seed agreed with me. But, the more olives I ate the more I liked them—now they are my favorite fruit.

When I first became a member of the Interstate Commerce Committee, I was advised by some of my colleagues—that JOHN was the enemy. But the longer I served on the committee, the more I worked with him on legislation, the longer I watched him in action, the more I respected him as a legislator and as a man.

JOHN Moss is one of my very good friends. There are times we disagree—but we disagree without being disagreeable. More importantly when JOHN is for or against an issue—he can support his position, and back his point of view in a most convincing manner—it's never "just because."

I will truly miss JOHN as a colleague and a friend and I wish him the best in retirement.●

● Mr. PATTERSON of California. Mr. Speaker, it is with sincerity and sadness that I join my colleagues today in honoring our good friend and leader, JOHN Moss. As dean of the California delegation, Congressman JOHN Moss has set for us a remarkable example with his diligence, patience and, above all, his integrity.

Back in 1975 when the 94th Congress new Members converged, we found not only a leader but a valuable ally in JOHN Moss. JOHN had already been fighting many years for the causes we most cared about—openness in Government and congressional reform. JOHN Moss had led the long and successful battle for the Freedom of Information Act, and with his guidance we were able to set our sights on more openness and accountability in Congress.

In addition, every consumer in this country owes JOHN Moss special thanks. It was through his efforts that the Consumer Product Safety Commission, a truly independent body, came into existence.

JOHN Moss proved to be a man of ideas throughout his 25 years in the House. I regret his decision to retire and he will be deeply missed for many reasons. But despite his absence, JOHN will be long remembered as an independent, effective voice in Congress.●

● Mr. GOLDWATER. Mr. Speaker, this House is going to miss JOHN Moss. He is a man of great personal integrity and rare candor. He has the unique ability to challenge those around him to give their best because he demands the best.

Long before it became fashionable to talk about consumers or protect consumer rights, JOHN Moss was in the forefront—present at the beginning—of legislative endeavors to provide consumer rights.

I have often disagreed with him on a number of philosophical issues, but he has my respect and admiration. He has a keen mind, and if you're going to debate JOHN Moss, be prepared, because he is the most able of adversaries.

California is proud of JOHN Moss—proud that he is willing to stand up and be counted for principle regardless of how it may affect him politically.

He has fought in the trenches—often a lone fighter. But, many of the things that JOHN Moss fought for 20 years ago have come to pass. The presence of JOHN Moss will be felt by this House for a long time to come. I feel confident that the future will continue to find him actively involved in promoting the public interest—an interest that he always put before his own.●

STATUS OF SPECIAL STUDY ON ECONOMIC CHANGE

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Missouri (Mr. BOLLING) is recognized for 10 minutes.

Mr. BOLLING. Mr. Speaker, the special study on economic change project grew out of discussions with the majority and minority members of the Joint Economic Committee and with the leadership in the House and Senate. We prepared a prospectus at that time, about a year and a half ago, which called for a 3½-year study. It identified the nature of major changes occurring in the United States and in the world that we felt needed analysis and policy alternatives for consideration. On the basis of this description, House Congressional Resolution 248 was introduced in the House and passed overwhelmingly, and then was approved by the Senate by unanimous consent on July 18, 1977.

The underlying thesis of the study is that economic, social, political, international, and technical conditions have changed, and are still changing markedly. This suggests that conventional wisdom and established economic tools may not be equal to meeting the challenge of making sound policies in the economic sphere. The so-called laws of economics have not been repealed, but all guiding principles presuppose a certain environment of conditions, customs, and practices; and when these change, the implementation of new policies and the modes of adjustment have to change also.

There was a period of perhaps 20 or 30 years when economists could take some satisfaction in having found enough guidelines to policymaking that this Nation could achieve rapid economic growth, reasonably full employment, and minimal amounts of price inflation. The watchword became for a brief period "fine tuning" to remove the remaining small irregularities and temporary disequilibriums. But no country today seems able to provide full employment, stable prices, continued growth, and nonbeggar-thy-neighborliness in its international relations all at the same time. Perhaps we can never attain such a happy state. But the United States and several other major countries were reasonably close to such a stable and progressive macro-solution, even with other shortcomings and unfulfilled dreams of parts of their populations. Can we once again find policies to help us return to a more stable economic environment and provide work for those who need it? The task will not be easy; partly because of problems having to do with changes in institutions, attitudes, and resources.

During the months the special study has been underway, it has acquired a small staff to organize and direct the preparation of extensive background ma-

terials needed for policy analysis. They are aided by the permanent staff of the Joint Economic Committee and the Congressional Research Service. There is also cooperation with the General Accounting Office, the Office of Technology Assessment and other congressional and executive department agencies. Moreover, a considerable amount of help has come from a diverse group of individual consultants, resource people, and economic analysis groups around the country.

Almost everyone consulted can agree on most of the underlying problems. Differences begin to develop as how best to describe the issues and to arrange them in a logical framework for analysis. The view is probably reasonably close to unanimous that we must weave together again the component parts of the study to show how they all relate and interact. It does little good to solve one specific problem while ignoring the secondary and tertiary costs of the "solution." There are considerable disagreements over when this process of integration or syntheses should take place—in the beginning, middle, or end—even if theoretically we all seek the same result.

What the special study staff has done, in cooperation with the regular staff, support agencies, and many outside consultants, is develop a 10-area program of analysis as the first part of the process. We have selected an area director for each of these sections of the study, who has worked with the special study staff, the rest of the Joint Economic Committee staff, and the Congressional Research Service to develop an array of specific papers and other studies which will illuminate the basic changes, the dilemmas, and the policy alternatives in his specific area. Within the limits of time and funding, we have had to make such undertakings selective and illustrative, not exhaustive. We have sought drafts of as many of these individual papers as possible by the end of this year, so that in 1979, we can subject them to peer review, and otherwise prepare them for publication.

Let me describe the 10 major areas we are investigating. They are:

First. Human resources and demographics;

Second. Materials and energy;

Third. Research and innovation;

Fourth. "Stagflation"—persistent inflation with unemployment;

Fifth. Federal sector finances;

Sixth. State and local finances;

Seventh. Pension systems:

Eighth. Government impact;

Ninth. The international environment; and

Tenth. Discontinuities in trends.

These titles are broad, and there are inherent problems of subject overlap and duplication; or, the problems are common ones, but the emphasis and viewpoint in the area analysis may be somewhat different. Almost any explicit topic which we might select for analysis is found to have aspects which affect most if not all the 10 topics I have just listed.

To delineate these 10 areas more specifically, we developed a detailed outline after many months of meetings and discussions. The ultimate "laundry list" cut so broad a swath that we could not possibly pursue every topic to a complete analysis within the scope of this study. So in the next stage we convened informally bodies of experts and resource people who would meet with the staff to suggest priorities and to recommend qualified people to undertake those individual papers which offered the best prospects for providing a useful product.

I have already suggested a necessary further step is to integrate the results of all these studies, so that the committee does not end up just with an interesting collection of essays and reports. We recognize the necessity, and the "how to" continues to occupy our attention.

An early step has been to make sure that the 10 area directors who head the efforts in each of the 10 fields themselves meet about once a month, joining with assigned staff from the Joint Economic Committee and the Congressional Research Service. As a minimum, they discuss common problems, share issues, and develop plans to exploit data bases of common interest. This helps us identify the overlap, the gaps and arrange extra channels of communication among individual contributors. We have found this part of the process working reasonably well. The next stage will come in 1979 as the flow of draft papers comes in for review and integration.

We do not rely exclusively on commissioned papers to gather information for the study. We regard as equally important steps to involve a larger community in the issues and approaches to their understanding as well as to choices about them. At both stages, we seek objective, dispassionate understanding if possible, something with which people of many persuasions can feel comfortable as providing useful insights. We expect some papers, and some witnesses in public forums, to show advocacy of their own positions, but we hope in such cases to end up with a sufficiently wide-range of views that even those who are ready to take sides will view these total efforts as constructive and educational for all of us.

This brings us to the nature of the panel meetings which the SSEC held in May and June 1978 over a total of 13 days. This first round focused on demographic factors, then on employment and unemployment, and finally moved on to issues of prices, productivity, capital formation, and inflation. These hearings represented an introduction to the study in general, not any single area exclusively.

A summary of the content of the panel meetings is now available in committee print form. The full transcript of those meetings is in the printing process. The panel meetings were successful in highlighting the kinds of issues and central problems with which the SSEC is concerned. I commend the summary report now and the full hearings record later to the attention of the Members.

The process of conducting the SSEC program is going well, and we have been very pleased with the size of the response of individuals to contributing to the study. Especially, we are pleased that we have obtained so many high caliber and effective participants. They are indeed bringing the kinds of objective discussions and authoritative information which had been the original intent in undertaking the SSEC.

During the next year, there will be additional panel meetings, together with the flow of printed reports which make up the program. We also expect before the year is over to be well along with the integrative process, so that a comprehensive overview of the issues and their interactions will be available for thinking about policy alternatives.●

TEENAGE PREGNANCIES: GOVERNMENT OR INDIVIDUAL SOLUTION?

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Iowa (Mr. GRASSLEY) is recognized for 20 minutes.

● Mr. GRASSLEY. Mr. Speaker, earlier this year, Joseph Califano, Secretary of Health, Education, and Welfare, announced another massive Federal campaign designed to solve another growing problem in America—teenage pregnancies. Each year, 1 million teenage girls, almost all single, become pregnant. It is estimated that, from these pregnancies, there are 600,000 live births; 100,000 are terminated by miscarriages; and 300,000 end in abortions.

The costs of these problems are enormous. The Urban Institute recently figured out that in 1975, Federal-State cash welfare payments to households containing teenage mothers, or older women who first gave birth in their teens, totaled $4.65 billion. This is over half of the entire cost of the cash benefits for the aid to families with dependent children program. When one includes the price of food stamps, medical and social services, the costs skyrocket even further. The costliest effects of teenage pregnancies cannot be measured in dollars, however. Each year, teenage pregnancies usher in hundreds of thousands of mothers and children into a lifetime of dependency, anguish, and despair.

As a solution, Secretary Califano has proposed the "Adolescent Health, Services, and Pregnancy Prevention and Care Act of 1978." This new Federal crusade would expand and coordinate existing programs, such as family planning, sex education, HEW-funded research, community health centers, and maternal and child health. The price tag of this new venture is placed at $60 million. This is in addition to an increased authorization of $64 million for such programs, proposed as part of President Carter's budget for 1979. HEW has also requested an additional $337 million for expanded medicaid coverage for low-income pregnant women, as a method for dealing with the problems of teenage pregnancy.

Teenage pregnancies are a serious problem, and should be dealt with as such, but I believe that this proposed new Federal program is just not the answer we need. Today, in response to Secretary Califano's proposals, I would like to examine the factors that have allowed this problem to grow to crisis

proportions, explain why I firmly believe this predicted Federal response is sadly lacking, and propose a new emphasis to characterize our efforts in solving this problem. An emphasis that is absolutely essential if our efforts are ever to be successful.

The great American paradox is that we can have such vexing social problems in the midst of our vast technological achievements and our unprecedented high standard of living. More scientific progress has been made in the last 50 years than in the preceding 5,000. In less than a century, we have seen the discovery of the light bulb and the splitting of the atom. Only 66 years have intervened between the Wright brothers' historic flight at Kitty Hawk and Neil Armstrong's first step onto the Moon during the epic voyage of Apollo XI. We live in a truly remarkable age. We are the most educated people in the world. A well-taught freshman knows more about physics than did Newton. Despite the constant criticisms of our Nation, by world standards we have come close to producing a just society, as unprecedented sums of money have been spent to eliminate crime and social injustice. To quote economist Martin Anderson of the Hoover Institution—

> By the end of 1977 the total amount of money spent cumulatively on public welfare by the federal, state, and local governments since the war on poverty began in 1964 will be roughly $300 billion. The estimated cost of fighting World War II is $288 billion. By the end of 1977, the war on poverty will have cost us more than World War II.

As Senator S. I. HAYAKAWA recently stated in Harper's magazine:

> The unintended revolution created by mass production and consumption has come close to producing a classless society in America. Executives and working men alike drive Comets and Cadillacs, drink Coke and Schlitz and Old Grand Dad, eat Nabisco wafers and Hormel ham, and watch the Johnny Carson show.
>
> . . . . and the poor of America are not poor by world standards. Our welfare clients live far better than the working people of more than half the world.

In spite of all the efforts of our Federal Government toward creating a better society, however, we are nevertheless still faced with enormous problems. Sex education and readily available contraceptives and abortions were supposed to curb teenage pregnancy, remember? Today sex education has been broadened, and contraceptives and abortions are much easier to obtain than a decade ago, yet the National Center for Health Statistics reports that there are now more pregnant 15-year-olds and illegitimate babies than ever before. Prejudice, Government corruption, economic instability all continue virtually unabated. Why have reform efforts failed to really solve so many of our national ills? Why are additional Federal campaigns, such as the one recently proposed by Secretary Califano to help solve the problem of teenage pregnancies, bound to disappoint? Because they are based on false ideas about how positive social change is brought to pass.

For decades social planners have operated on the premise that the nature of man is basically either neutral, or that men have at heart a "pure, crystalline and well-organized native personality." In recent years we have seen all sorts of trendy human potential groups trade on this false idea. They have been joined by an advertising profession that leads us to believe our innate perfection will surface with the purchase of this or that commodity.

Thus, the idea has surfaced in Government that our problems are rooted in our environment, not ourselves. Personal responsibility has been abandoned, and we have opted for the more ego-soothing notion that the solution to our problems lies in a massive overhaul of society's institutions rather than to challenge teenagers that the direction of their lives is their individual responsibility. The locus of power for such change is Government, so it is not unlikely that the rise of our enormous Federal bureaucracy is in part responsible for the demise of individual accountability and responsibility. So, countless Federal programs have poured billions of dollars trying to improve our health, education, and welfare. They have endlessly told us how to make a better living, but have said nothing of living better.

> Many people have embraced the "I'm O.K., You're O.K." philosophy which states that if you are a well adjusted person with a good self-image you accept your neighbor and his views even though you might not embrace them as your own. If a person uses this to measure value structure there is a lack of absolutes. According to this theory it becomes gauche to conclude that teen-age pregnancies of single girls are a problem because then you are imposing your value structure on someone else. It then becomes the philosophy "I'm O.K., You're *NOT* O.K." which is considered deviant by many liberal minded psychologists. Thus all modes of conduct become relative and absolutes are not accepted. People h..ve come to believe that the choice between ways of living is just a choice between equally plausible "lifestyles".

It has been tragic that such a bankrupt philosophy of amorality has been adopted within our policymaking circles. Indeed, during the eight-page statement of Secretary Califano, announcing his new teenage pregnancy "prevention" program, never once does he state that the flood of out-of-wedlock teenage pregnancies is wrong. Oh, to be sure, the sad effects of such situations are described, priming us to accept efforts to improve the living conditions of such unfortunate individuals. But never once is the root issue, the root problem, addressed. Never once is the deplorable lack of individual moral responsibility mentioned. Those that try to interject such issues into policy discussions are bombarded with the hackneyed bromides "you are just making value judgments," or "you can't legislate morality." Well, my friends, virtually nothing is value-free, and I would rather have positive values acclaimed than negative values proclaimed. Every decision we make here in Congress involves some decision as to what is right or wrong, as well as "correct" or "incorrect." Such moral considerations are necessary, for it is only as men and women confront an honest knowledge of themselves that the first step on the road to genuine improvement is taken.

Teenagers need to be challenged to have a realistic view of their existence which would include individual responsibility to themselves, society, and their offspring. Califano's proposal to take over this responsibility by providing funding for all prenatal, maternal, and pediatric care, shifts the responsibility of the individual to the State. Radical reforms have, at times, been necessary, but reform alone is not sufficient. Reforms alone are not sufficient because society is not made up of just institutions, but of men and of women. We are not just biological machines needing the right environment to function properly. The hearts of individuals who make up society must be changed, regenerated if you will, before society as a whole can experience real change.

Today, international, national, State, and local problems can be traced to trouble within individual human hearts. For all our advancements in the 20th century, the words of Neil Armstrong serve as a needed reminder:

> Technology does not improve the quality of life, it only improves the quality of things * * * improving the quality of things that surround living can be achieved by the application of knowledge. Improving the quality of life, however, requires the application of wisdom.

Einstein himself recognized the internal nature of man's problems. He is quoted as saying:

> It is not the explosive power of atomic war that I fear, but rather the explosive power for evil in the hearts of men.

Dr. Karl Menninger states:

> I am convinced, myself, that man's fundamental problem is his human egocentricity.

Even the renowned philosopher and atheist Bertrand Russel, wrote:

> Man still has a caveman's heart. We must find a way to change the caveman's heart.

Unfortunately, such truth is little recognized or adopted in our society today. As a Washington Star editorialist recently put it:

> Madness takes many forms. Our modern madness may be the unreflective dismissal of the inescapable—and natural—need for moral judgment.

Americans today, and America's representatives need to face facts. We are inclined to blame our troubles on others, or on our environment, when we should be saying with Shakespeare's Cassius,

> The fault, dear Brutus, is not in our stars. but in ourselves.

Today the specific issue we are addressing is that of unwanted teenage pregnancies. So to some, my remarks on the need for a resurgence of individual moral responsibility, and a new emphasis recognizing such responsibility to characterize our public policy, may seem to be quite a digression from the issue at hand. But such is not the case. What remarks could be more relevant when we hear of surveys indicating that

over 40 percent of teenage pregnancies occur because either the mothers did not care if they got pregnant, or were concerned with contraceptives interfering with "pleasure" or "spontaneity"? What remarks could be more relevant when we hear lame explanations for the flood of illegitimate teenage births—excuses like "women are reaching sexual physical maturity at a younger age," or, children lack "contraceptive responsibility commensurate with their sexual maturity."

If we are ever to solve the vexing problem we are addressing today, as well as a host of other societal ills, we must place the burden of responsibility on the individual for the moral choices made. As I and my colleagues attempt to formulate policies that curb such problems let us keep that essential emphasis at the center of our thinking.

It was Alexis de Tocqueville who wrote 140 years ago, that "America is great because America is good, but that if America ceases to be good, it will cease to be great." How timely those words are. America's fundamental need is a rejection of the egocentrism that plagues us so, and a return to the Biblical absolutes of right and wrong that have served us so well in the past.

In closing, let me qoute from a recent address given by the civil rights leader, the Reverend Jesse Jackson, national president of Operation PUSH:

> More vital than the economic crisis is the spiritual and moral crisis facing us. It does not matter if the Democrats or the Republicans are holding the bucket if the bucket has a hole in the bottom . . . (for) the death of ethics is the sabotage of excellence. Without an ethical foundation, economics become unfeasible, education loses purpose; and purpose loses power. . . . If we seek new values in the nation, we will add new value to the nation. . . . But unless God builds the house, we labor in vain. . . .

As we labor to confront the tragedy of hundreds of thousands of unwanted teenage pregnancies, let us not labor in vain.●

IRS ATTACK ON SCHOOLS AND CHURCHES MUST STOP

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Maryland (Mr. BAUMAN) is recognized for 30 minutes.

Mr. BAUMAN. Mr. Speaker, on August 22 of this year, the Internal Revenue Service issued a set of proposed guidelines for the determination of the tax-exempt status of private schools. These regulations purported to address the issue of tax-exempt status for schools that conduct discriminatory policies in their student admissions. However, while they may carry a proper goal, these regulations pose an imminent danger to the freedoms still enjoyed by the American people. Because many of the schools covered by these regulations are church-related schools, the investigation into the schools involves an investigation into the sponsoring church. This necessarily includes a determination by the IRS of what constitutes an acceptable religious body and what does not. I believe there is a clear threat here to the doctrine of separation of church and state with the possibility that the Federal Government might decide what is an acceptable religious belief, and what is not.

Furthermore, the IRS regulations place the burden of proof on the school to show that they are not discriminating in their admissions, rather than require the IRS to make the case. As pointed out by several commentators on this subject, including the editors at the Washington Star newspaper, this difference in approach places an entirely new interpretation on the role and status of tax-exempt organizations of all descriptions. By requiring the institutions to make the case of their receiving tax-exempt status, we have placed the exemption in the category of a privilege to be issued at the sufferance of the bureaucrats rather than a right stemming from the church or group's role in our society.

To some, this distinction may seem obscure but it reaches to the very heart of the concept of our Government and its relationship to the people. On the one hand, we have the notion of a Government which views taxes as simply the means of gaining the revenue it needs to provide services. This Government exempts certain organizations from the obligation to pay taxes because it sees their function as being at least as important as its own. These organizations are recognized as being nonprofit and as providing a service to the community that extends beyond what the Government considers its rightful role.

Another view of Government has been coming into more frequent vogue in recent years. It holds that everything is subject of confiscation or control at any time through taxation or regulation. According to this notion, individuals and organizations are permitted to conduct their activities only so long as they act according to the tenets of the policy set down by the Government. Taxation is viewed as much an instrument of enforcement as an instrument for raising revenue. Under this idea the use of tax laws to punish nonprofit organizations behaving in a manner inconsistent with the wishes of the bureaucrats in Washington is even laudable. It makes little difference that the amount of revenue that will be raised by taxing nonprofit organizations will be miniscule. Raising revenue is not the point of this exercise. The Internal Revenue Service has been turned into the agent of the social planner and the power to tax is consciously being used as the power to destroy.

The regulations issued by IRS on August 22 of this year are dangerous in two respects. First, they presume that the schools and churches in question are guilty until proven innocent. They place the burden of proof upon the private institutions to prove that they are guilty. Second, this action puts the IRS in the role of enforcer. It sets that agency upon the mission of using strong-arm tactics on those in the private sector who do not choose to adopt Government policy. It is one thing for the Government to pass upon the behavior and practices of Government institutions and those who receive Government payments. It is an entirely different matter when the Government embarks upon a campaign of destruction against those in the private sector who chose another course.

Because I am concerned about this policy and because I believe it is of vital concern to all who serve in this body, I am inserting in the RECORD two items that illustrate the gravity of this matter. The first is an article from Human Events magazine. The second is a list of the questions recently asked of a minister in Georgia by the IRS in an effort to determine whether he and his church met Government standards for tax exemption. This list of questions will illustrate that this IRS campaign is directed as much toward harassment as toward taxing policy. I would ask my colleagues to pay particular attention to questions 13 thru 31 on this questionnaire. One can only imagine how much time it would take to answer such questions. This is clearly harassment of religious institutions by the Government. We should all view these actions with alarm and oppose them.

PROPOSED IRS REGULATIONS THREATEN PRIVATE SCHOOLS

During debate on the tuition tax credit measure on August 15, Sen. Jesse Helms (R.-N.C.) announced that, despite his belief in the basic concept of providing such tax relief for parents of private-school children, he could not support the specific language included in the Senate bill. In particular, Helms objected to a clause directing the Department of Health, Education and Welfare, among other agencies, to report on civil rights enforcement by the Internal Revenue Service and to make "suggestions . . . for enhancing" the IRS's enforcement "of public policies against racial discrimination and other forms of discrimination. . . ."

Noting that the clause was not limited to racial discrimination alone, the Tar Heel lawmaker said he feared such language could ultimately lead the IRS to impose on the private schools the same federal interference that has proved so disastrous in the public schools (see August 26 issue, page 3).

Helms observed that "it does not take too much imagination," given HEW's record in such matters to envision the agency "demanding co-ed sports programs, co-ed dormitories, the hiring of homosexual teachers, the availability of abortion counselors, and the abolition of male and female choirs, and so forth, all erected on some pretext of public policy."

It turned out that the Senate voted to delete tax credits for elementary and secondary tuition and, with them, the wording that Helms found so dangerous. Yet just one week later, on August 22, the IRS, acting on its own, proposed new regulations that, if finally adopted, could have much the same frightening consequences.

In 1970, the IRS ruled that private schools found guilty of racial discrimination would no longer be exempt from paying federal income taxes nor would they be entitled to receive tax-deductible contributions. In 1975, the agency further stipulated that, to keep their tax-exempt status, private schools must include a nondiscriminatory policy on their by-laws, must mention this policy in all of their brochures and other public-relations materials, and must publicly announce the policy at least once a year.

But under the newly proposed revenue procedure, which will remain open for written public comment through October 23, the IRS would arbitrarily presume that many schools were guilty of discrimination, even if they had been strictly adhering to the agency's existing guidelines!

Specifically, the new ruling would define any private school, including one affiliated with a church, as a "reviewable school" if it had been "formed or substantially expanded at or about the time of public school desegregation in the community served by the school," and its minority enrollment was less than 20 per cent of the percentage of minority students in the community's total school-age population. If, for example, the community had a 50 per cent population of minority students, the school would have to have at least a 10 per cent minority enrollment.

Schools which fell in this "reviewable" category would automatically be presumed racially discriminatory—i.e., guilty until proven innocent—and would lose their tax-exempt status unless they could demonstrate that they were making a "good faith" effort not to discriminate. And to prove good faith, a private school would have to meet a long list of requirements, such as providing minority scholarships, minority recruitment programs, minority hiring, increasing minority enrollment and so forth.

There are numerous problems with these regulations. To begin with, though obviously directed against so-called "segregation academies" founded to thwart integration, they would also affect many other private schools whose creation had nothing to do with the racial issue.

While the bulk of the desegregation efforts across the country have occurred in the last 15 years, it has also been during this period that many public school systems have gone into decline. Not only have the academic skills imparted in the public schools dropped precipitously during these years, but so have standards of discipline and decorum. It was also during this period that the state-supported schools dropped all references to religion, such as prayer and scripture reading.

Not surprisingly, many new private schools, particularly those in the fundamentalist Protestant "Christian School Movement," were founded during these years because parents wanted something better for their children than the public schools were offering. Yet under the new IRS regulations, these schools would be indiscriminately lumped in with the segregation academies.

As relatively new institutions, moreover, many of these schools have to struggle just to make financial ends meet. Consequently, it would be no easy task for them to provide the minority scholarships and other programs now contemplated by IRS. Yet the alternative—losing their tax-exempt status—would be equally disastrous.

The Protestant schools are not the only ones that would be hurt. According to George Reed, the general counsel of the United States Catholic Conference, the proposed new ruling is "completely unrealistic" insofar as parochial schools are concerned, including the definition of "community" as "the geographical area of the public school district within which the school is located together with any other public schcol district from which the school enrolls at least 5 per cent of its student body."

"In short," Reed noted, "the minority status of a parochial school would be determined on the basis of the public school district which in somes cases embraces a whole city. This obviously is a misleading test insofar as the parochial schools are concerned."

Obviously, in the case of church-related schools, it would be more realistic to compare the number of minority students in the school to the percentage of minority families in the area belonging to that religion, rather than to the community at large. But even this approach could prove misleading.

The fact is that not everyone is either willing or able to make the necessary economic sacrifices to pay tuition to a private school, on top of the taxes he is forced to pay to support the public schools. Indeed, the proposed regulations could make it even harder for minority students to attend private schools since, without tax-exempt status, schools would be forced to raise their tuition while donations for possible scholarships would decrease.

In the name of fighting racial discrimination, then, the proposed IRS regulations could inflict unrealistic and meddlesome standards on many schools when the only thing they are guilty of is not meeting the agency's arbitrary and prejudicial standards. This in turn would play right into the hands of the public school establishment, which would find its competition from the private sector abruptly reduced.

But the issue at stake in this controversy goes even beyond federal control of private schools. As Jack Clayton of the American Association of Christian Schools told HUMAN EVENTS: "If this precedent is allowed to stand, then every regulation that has affected the public schools will be applied not only to private schools but ultimately to churches, private charities, hospitals and on and on."

Clayton noted that historically the purpose of tax exemption for churches and other institutions was to guarantee their independence from state interference. But the premise underlying the new IRS ruling is different.

As the Washington Star explained in an editorial: "The rationale of the new IRS rules for private schools is that tax exemption reflects more than a decision by government to ignore what is none of its business; it bestows a positive benefit. Where once it was felt that tax exemption—not only of schools but of churches, museums and other charitable institutions—reflected the view that certain realms of private discretion can and should flourish without government hindrance, there is an increasing tendency to regard tax exemption as a privilege—a privilege to be enjoyed on the government's terms even if taxation was never before contemplated."

Put another way, the new regulations are based on the idea that tax exemption is a form of federal assistance. And once this concept is accepted, all private tax-exempt organizations will by definition be subject to the same maze of federal ukases that have already become customary in connection with government grants.

Sen. Helms could not have been closer to the truth when he said during the tuition tax credits debate that IRS regulations of this kind would not for long be limited to the racial issue alone. As Helms pointed out at the time, IRS Commissioner Jerome Kurtz himself acknowledged in a speech last January 9 that the agency has "almost no" statutory guidance from Congress in the area of civil rights enforcement.

Said Kurtz: "We have almost no specific statutory guidance; our authority and obligations on racial issues derive from the constitutional doctrine announced in Brown v. Board of Education in 1954, and cases enforcing and interpreting it, and from the broad national policy announced in the 1964 Civil Rights Act."

But once the IRS begins enforcing its interpretations of "broad national policy," it can only be a matter of time until it is telling the schools what they must teach in regard to such sensitive areas as the role of the sexes, birth control and so forth, just as Helms predicted.

Nor will it necessarily stop with the schools. Considering the government's "broad national policy" regarding family planning, for example, what's to stop IRS from telling Catholic hospitals that, to keep their tax exemptions, they must perform abortions? In sum, the ramifications are endless—and ominous.

The only good thing that can be said about these regulations is that they may yet be stopped. Letters opposing the proposed ruling have already begun pouring into the IRS from all parts of the country. (Readers who are interested have until October 23 to send their comments to: Commissioner of Internal Revenue, Attention: E:EO, Washington, D.C. 20224.)

In addition, a number of conservative lawmakers have expressed their disapproval to the IRS and more are expected to do the same in the near future. Given the lack of specific statutory authority in this area, some congressional sources are hopeful that the agency can be persuaded to withdraw the proposal.

Should such efforts fail, however, the IRS will have dealt yet another crippling blow to the American tradition of freedom.

IRS QUESTIONNAIRE No. I

1. Give the full name of your organization and your Employer Identification Number.

2. Give the full address of your organization.

3. Furnish the name, address and telephone number of the person to be contacted for information concerning your organization.

4. Give the date that your organization was incorporated or formed. Is it formed under the non-profit corporation act of the State of Georgia?

5. Have you ever filed an application for recognition of exemption with the Internal Revenue Service? If so, please furnish a copy of the application.

6. Submit a conformed copy of your organization's creating instruments, i.e., Articles of Incorporation, Constitution, Articles of Association.

7. Submit a conformed copy of your organization's By-Laws or other rules for its operation.

8. Does your organization file annual information returns (Form 990)?

9. Does your organization file Form 941 to report Federal Insurance Contributions Act (F.I.C.A.) taxes and income tax withholdings on employees?

10. Does your organization file Form 990–T, Exempt Organizations Business Income Tax Return?

11. Does your organization control or is it controlled by any other organization? If so, please give the name of the related organization(s) and explain the relationship.

12. Is your organization financially accountable to any other organization? If so, please explain and identify the other organization(s).

13. Does your organization have a recognized creed and form of worship? If so, please explain in detail.

14. Does your organization impose a formal code of doctrine upon its members? If so, please explain in detail.

15. Does your organization require renunciation of any or all former religious beliefs on the part of your members?

16. Does your organization have a definite and distinct ecclesiastical government? If so, please explain in detail.

17. Does your organization have a distinct religious history? If so, please explain in detail.

18. Does your organization have a complete organization of ordained ministers (or your equivalent to ministers) ministering to the needs of their congregations? If so, are these ministers (or their equivalents) ordained following prescribed courses of study? In

addition, please explain, in detail, education and experience requirements necessary to become one of your ministers and provide a copy of the Certificates of Ordination that have been issued to them.

19. Does your organization have a regular congregation or regular religious services? If so, please give frequency and average attendance. Also, state where these services are held, i.e., a church, a residence, other.

20. Please state how many members your church has to date. Further, have any applicants for membership been rejected and if so, why? Describe membership requirements and attach a current schedule of membership fees and dues.

21. Describe fully the sacerdotal functions your ministers perform and indicate whether they are licensed by the State of Georgia to perform marriages and other ministerial functions.

22. Does your organization have any Sunday Schools for the religious instruction of the young?

23. Provide a complete list of your officers and directors including a brief resume of their backgrounds, and indicate their functions and responsibilities in your organization.

24. Are meetings held by your governing body? If so, please give frequency. Also, if meetings are held, are minutes kept?

25. Describe fully whether you pay compensation or make any other payments to or for individuals who perfom services for your organization. If so, provide a schedule of the persons compensated with the amounts paid each for your most recent accounting year.

26. Please submit sample copies of any pamphlets, brochures, newspaper articles or other publications concerning your organization.

27. Provide copies of all agreements or contracts concerning the sale, use, or purchase of property by your organization.

28. Are any of your organization's properties recognized by your county tax commissioner as being exempt from local property taxes?

29. Provide a list of property owned, rented, or otherwise utilized by your organization and the purpose for which such property is used.

30. Identify those contributors who have given $500 or more during the most recent accounting year.

31. Submit a schedule of receipts and expenditures for your most recent accounting year. This schedule should clearly classify your sources of financial support and describe in detail the nature and purpose of your expenditures.

NOTE.—Since this questionnaire does not provide sufficient space to adequately answer questions asked herein requiring detailed responses, please attach necessary additional sheets making reference thereon to the question(s) being answered.

FTC INSURANCE REGULATIONS

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Texas (Mr. COLLINS) is recognized for 30 minutes.

Mr. COLLINS of Texas. Mr. Speaker, I serve as the ranking Republican member on the Subcommittee on Oversight and Investigations of the Committee on Interstate and Foreign Commerce which recently held extensive oversight hearings on "Life Insurance Marketing and Cost Disclosure." The focal point of these hearings was the on-going effort by the Federal Trade Commission to develop a Federal cost disclosure system for life insurance which would foist the Commission into business of Federal regulation of insurance, a move which I find totally without merit, unwise, and ill-conceived.

In 1945, the Congress passed the McCarran-Ferguson Act which in its declaration of policy stated:

> Congress hereby declares that the continued regulation and taxation by the several States of the business of insurance is in the public interest * * *

What the Congress was, thus, saying in 1945 was that the States were better able to and should regulate the business of insurance to the exclusion of regulation by the Federal Government and, indeed, that has certainly been the case. The life insurance industry has never been subjected to or needed Federal intervention, and I do not believe that it is now warranted. The State commissions have done an outstanding job of taking care of insurance industry problems in each respective State as well as on a coordinated national level.

Life insurance in force in the United States more than doubled in the decade ending in 1976 (to $2.34 trillion), as did the amount of life insurance per American family (to $30,000). Americans were purchasing $320 billion of life insurance annually by the end of that decade, and benefits payments were, by then, very nearly $25 billion a year. There were over 1,700 companies competing in the market place, and in 1976 new life insurance company investments in the economy had reached a record high of $175 billion. At the same time, the life insurance industry incurred taxes and fees of $4 billion on its 1976 operations.

Although our subcommittee hearings dealt primarily with the issue of life insurance, I took the occasion to ask the FTC's designated spokesman, Mr. Albert H. Kramer, Director of the FTC Bureau of Consumer Protection, if the agency had any plans to look at other aspects of the insurance industry such as property and casualty insurance cost disclosures. Mr. Kramer responded that he was not aware of any plans to look at casualty and property insurance cost disclosure. What Mr. Kramer did not tell me, however, and what I had to learn later, from other sources, is that the FTC has massive plans for far-flung activity in the insurance field. I have before me a 60-page FTC staff memorandum prepared for presentation to the FTC Commissioners in June of this year, which is devoted to the insurance industry—not just life insurance—and to a discussion of FTC jurisdiction over it. One section of this memorandum is devoted to "new initiatives according to the task force's priorities."

Another section of this FTC staff memorandum gives "an overview of the implications of McCarran-Ferguson for the FTC's jurisdiction over insurance." Still another explores "major consumer and competition insurance problems and prescribes ongoing and new initiatives that address each problem area." Among future investigations is listed an investigation of automobile insurance underwriting, and even the role private insurance companies should play if a system of national health insurance is adopted by Congress. I firmly believe that the expenditure of taxpayer dollars is unjustified and unwise.

The FTC's basic statute is the Federal Trade Commission Act which assigns to that agency two basic areas of responsibility: first, to address themselves to unfair methods of competition and second, to deal with unfair or deceptive trade practices. Leaving the question of the McCarran-Ferguson Act totally aside for the moment, I still do not see how the FTC has any basis for such a sweeping investigation. As to the question of unfair methods of competition which is the Commission's antitrust responsibility, there is no evidence of lack of competition or unfair methods of competition. On the contrary, the evidence shows that the marketplace is competitive and functioning well. As evidence of this I need to point no further than to the testimony of Mr. Kramer of the FTC before our subcommittee with respect to life insurance. Mr. Kramer said:

> In terms of the structure of the industry, I think the life insurance industry is very competitively structured.

Mr. Kramer was indeed correct in his assessment, because we now have 1,750 companies selling life insurance today. This industry in all likelihood is the most competitive in the Nation.

As for the second aspect of the FTC's jurisdiction that deals with unfair or deceptive trade practices, I again, leaving McCarran-Ferguson aside, would submit that it cannot be successfully demonstrated that unfair or deceptive trade practices are ongoing. Where is the unfairness and what is the deception?

Mr. Kramer of the FTC in his testimony before our subcommittee said that the "primary need is for information about the rate of return that purchasers of a life insurance policy will earn" as compared to other forms of investment. If the failure to provide this type of information is an unfair or deceptive trade practice, then the U.S. Government is engaged in this activity on a daily basis when it causes savings bonds to be sold. The Federal Government does not disclose that its rate of return on savings bonds is low compared to other forms of investment.

Apparently, the FTC's basic premise is that the consuming public views life insurance as an investment opportunity not unlike buying stock. I can tell you that on the basis of 25 years of experience in the life insurance industry prior to coming to Congress that people buying life insurance are not buying it for its investment potential, but they are buying it because they love their wives, families, and children.

I, therefore, believe that even without the existence of McCarran-Ferguson that the FTC's efforts in this field are totally inappropriate. When you then take into account that McCarran-Ferguson is the law of this Nation, the FTC's activities in the insurance area are totally uncalled for and immense duplication of effort which is already being exerted in the States, and an utter waste of the tax dollar. As Mr. Joel A. Shapiro, Chairman of the Committee on Federal Law and Legislation of the National Association of Life Underwriters clearly pointed out

to our committee, the States have already adopted legislation to regulate unfair and deceptive trade practices which is the only jurisdictional premise on which the FTC could hang its proverbial hat.

As to life insurance cost disclosure which was the specific subject of our hearings, the National Association of Insurance Commissions has already adopted a model life insurance solicitation regulation which has been in turn adopted by a growing number of States. The FTC's efforts in this area are clear signals to me that the agency is intent upon establishing a beachhead by means of their efforts in the life insurance cost disclosure area in order to launch additional, more massive forays into Federal regulation of the insurance industry. The FTC wants to circumvent the McCarran-Ferguson Act and get its foot in the door so that it can expand its jurisdiction, expand the size of its staff, expand its budget, and expand its jurisdiction by means of federally regulating an industry that is already being effectively regulated by the States.

Another point that I made during the course of our subcommittee's hearings on insurance and will make again here today is that I am totally amazed when I stop to consider that some Federal agency is attempting to give advice and direction in this area. The Federal Government is into the insurance business in a very big way through their annuity programs of social security, railroad, civil service, and military retirement programs all of which are in abysmal shape. Social security took in $80 billion last year but expended $88 billion; railroad retirement 4 years ago was in catastrophic shape and 4 years ago the Congress had to bail them out; civil service retirement deficiencies have been estimated to be $150 billion dollars; and in the military retirement system there are no reserves whatsoever. No, Mr. Speaker, Federal agencies are in no position to give expert advice if the performance record to date is any indication. On the contrary, I believe that we should be looking to the private sector as a role model to be emulated.

If there is an area that virtually cries out for disclosure to the American public, I believe that it is in the area of these Federal programs such as social security, railroad, military and civil service retirement. This is a subject that needs to be reviewed, and the Federal agencies and the Congress are not meeting their obligations in this regard. For instance, I am sure that the majority of the American public is not aware of the fact that if a young person were to put the same amount into private life insurance as they are required to contribute to social security that they will receive more than twice as much from that private plan than they will from social security at age 65. I suggest to the insurance commissioner from the State of Iowa, who testified before the subcommittee on behalf of the National Association of Insurance Commissioners, that the States can and must do something in this area. Every one of these Federal programs affect residents of the States, and someone or some entity much closer to the people than this remote and seemingly aloof Federal Government should undertake to provide the citizenry with this information so that the Federal Government and its officials can be held accountable.

Everyone today realizes the rate of bureaucratic expansion. The United States is presently in the midst of the most rapid and pervasive expansion of Government control over business in modern times. And now the FTC wants to add to this massive Government bureaucracy by moving in and assigning regulations to yet another industry—one that has a highly regarded history of customer satisfaction. Government today means complexity and higher costs and the FTC will be forcing recommendations on insurance consumers when they do not want them and have not asked for them. My experience in the insurance business has shown me that competition does more to keep companies alert to consumer interests than the Government could ever do. Americans do not want more Federal Government meddling especially in an area already effectively working. Agents are not going to sell a plan that does not represent value. The FTC should stay out of the insurance industry, and the Federal Government must put its own house in order before promulgating any more rules for the private sector.

THE PLIGHT OF VLADIMIR KISLIK

The SPEAKER pro tempore. Under a previous order of the House, the gentlewoman from New Jersey (Mrs. MEYNER) is recognized for 5 minutes.

● Mrs. MEYNER. Mr. Speaker, I am pleased to join in the "vigil for freedom" sponsored by the Union of Councils for Soviet Jewry on behalf of persecuted Soviet Jewish individuals and families.

I would like to bring to the attention of my colleagues today the case of Vladimir Kislik of Kiev. Three years ago, the wife and son of Mr. Kislik were allowed to emigrate to Israel, but Mr. Kislik himself was refused permission to leave because he dealt with classified information in a prior job. Because of the Kisliks' desire to have their son grow up in Israel, they accepted the offer of the Soviet Government in the hope that the separation would only be temporary.

Mr. Kislik was trained as a metallurgical engineer. However, he has been unable to obtain employment since applying for emigration. In May 1976, after speaking to his wife in Israel, his phone was disconnected. Without a job or family, Kislik sought to keep his spirits up by conducting a private seminar on problems of science and technology. He was instructed to discontinue the seminar or face imprisonment.

In 1977, he was singled out in a Kiev newspaper as an alleged agent of "foreign powers" determined to smuggle various documents on nuclear physics out of the country. Mr. Kislik bravely joined with four other Kiev Jews in a 24-hour hunger strike during the 25th International Communist Party Congress. He is now constantly surrounded and followed by an 8-man "cage" of KGB agents much like the KGB "cage" that followed Anatoly Shcharansky prior to his arrest.

Mr. Kislik's only crime was his expressed desire to emigrate to Israel to rejoin his family. In 1975, the Soviet Union, along with 34 other nations, signed the Helsinki Final Act which committed the signatories to certain principles of human rights, including the reunification of divided families, religious freedom, minority rights, and freedom of travel among countries.

It is time for the Soviet Union to live up to its promises. It is my hope that this vigil will help Vladimir Kislik and thousands of others to fulfill their dreams of freedom.●

FTC INVESTIGATION OF DEBT COLLECTORS

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Illinois (Mr. ANNUNZIO) is recognized for 5 minutes.

● Mr. ANNUNZIO. Mr. Speaker, too many of us have experienced the disappointment of initiating legislation, seeing it pass both Houses of Congress, proudly witnessing the President sign it, and watching it be scuttled by a lazy or antagonistic bureaucracy unwilling to enforce it. The protection a law affords is meaningless if it is disregarded by those responsible for assuring it achieves its purpose. I am pleased to know that this will not be the fate of a consumer protection bill which I authored this session, the Fair Debt Collection Practices Act. I applaud the recent decision of the Federal Trade Commission to conduct a full-scale investigation into compliance with this law.

Until passage of this legislation, consumers were subject to uncontrolled harassment by debt collectors concerned about nothing other than recovering money without consideration either for the facts of a case, or the feelings and rights of the people they hounded. This bill prohibits debt collectors from using tactics designed to intimidate debtors into submission. Under the act, debt collectors are prohibited from using threats of violence or profane language, contacting debtors at unusual times and places, and falsely claiming they will have the debtor arrested and jailed.

Unfortunately, another fact we in Congress have learned to live with is that passing laws to prohibit certain acts does not mean those acts will disappear overnight. Although many debt collectors have certainly made a good faith effort to curb unfair practices, others continue to violate both the letter and the spirit of the law. The Federal Trade Commission has in the past 6 months received over 1,000 complaints about abusive debt collectors. Because many people either submit to unscrupulous collectors or are unaware of the proper channels available to them for registering complaints, it is clear that this is just the tip of an iceberg.

Yet although the effort by the FTC is an admirable one, the agency cannot do it alone. Consumers must be aware of

their rights under the law, and take actions to defend these rights if they are infringed. This is the most effective method of regulating business practices. If debt collectors are made conscious of the fact that consumers know their rights, and are prepared to stand up for them, this will have as great an effect on their practices as anything the Federal Trade Commission or Congress can do. By joining forces, citizens and the Government can stop those who continue to violate the law. Only in this way can the law achieve its purpose of providing the full protection consumers need, and deserve.●

TRIBUTE TO RETIRING MEMBERS OF THE COMMITTEE ON THE DISTRICT OF COLUMBIA

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Michigan (Mr. DIGGS) is recognized for 5 minutes.

● Mr. DIGGS. Mr. Speaker, I rise today, as chairman of the Committee on the District of Columbia in the House, to pay tribute to those members of our committee who will not be returning to the House in January. These distinguished gentlemen are from both sides of the aisle: JAMES MANN, of South Carolina, CHARLES WHALEN, of Ohio, and TED RISENHOOVER, of Oklahoma.

In addition, I would like to begin with special remarks in tribute to a former, retiring member of the committee, DONALD FRASER, of Minnesota.

Mr. Speaker, before leaving the committee at the beginning of the 95th Congress to serve on the Budget Committee, DON FRASER served on the committee with dedicated distinction for 12 years commencing with the opening of the 89th Congress.

When DON became a member of the committee in 1965, I was pleased to serve with a colleague who shared many of the same goals for advancing the political and economic prerogatives of the long disenfranchised residents of the Nation's Capital. DON joined enthusiastically in the legislative efforts of a growing group of progressives on the committee. This group had a changing bipartisan membership but included U.S. Secretary of Transportation Brock Adams, of Washington, Director of the Congressional Research Service Gil Gude, of Maryland, Senator CHARLES MCC. MATHIAS, of Maryland; FRANK HORTON, of New York; BILL HUNGATE, of Missouri; ANDY JACOBS, of Indiana; Gov. Arthur Link, of North Dakota; RONALD DELLUMS, of California; AB MIKVA, of Illinois; Pete Kvros, of Maine; Ancher Nelsen, of Minnesota; and STEWART MCKINNEY, of Connecticut.

Mr. Speaker, it was this group of concerned legislators who would begin to lay the groundwork for a new era of progressive leadership of the committee. In a 10-year period, 1963–73, this group within the committee achieved the enactment of an elected school board for the Nation's Capital, an elected Delegate from the District of Columbia, the establishment of Federal City College and the Washington Technical Institute, the first land grant institutions for the District of Columbia. These institutions would later be merged into the University of the District of Columbia as a result of committee reported legislation. In addition, this group worked successfully for the authorization of a 100-mile rapid rail public transit system for the National Capital region and significantly increased Federal payments to the budget of the District of Columbia. It was an unprecedented decade of dedication in the committee to make the District of Columbia a better city and would culminate in the extension of home rule to the District of Columbia in the 93d Congress.

Mr. Speaker, DON FRASER, of course, was one of the architects of the 1973 Home Rule Charter which extended unprecedented delegated authority to an elected Mayor and City Council in the District of Columbia and brought to an end over 100 years of Presidentially appointed local governments in the Nation's Capital.

DON FRASER has long been an advocate of electing neighborhood based officials to advise the higher echelons of elected and appointed officials in urban government. As a result of this interest and Minnesota's experience, DON proposed that the new Home Rule Charter provide for the election of Advisory Neighborhood Councils to counsel the city government on decisions affecting planning, development, recreation, and the full range of city services in a particular neighborhood area. The city council later changed the names of the neighborhood councils to Advisory Neighborhood Commissions (ANC's). In addition, Congress required that the ANC concept be approved in a referendum of the voters of the District of Columbia. Such approval came in an overwhelming vote of May 7, 1974.

The first ANC elections were held on February 3, 1976. ANC Commissioners, representing 2,000 residents each, were elected from 372 single member districts comprising 36 Advisory Neighborhood Commission areas. A worthy experiment in grassroots government had become a reality in the Nation's Capital.

Mr. Speaker, DON FRASER will be missed on the committee and in the House. Missed will be his counsel and dedicated advocation for advancing the welfare of the residents of the District of Columbia. Should he remain in the National Capital area, we might all hope that his interest and counsel be available to those responsible for assuring a financially healthy, effective, representative local government in the Nation's Capital.

In summation, it is interesting to note that since 1947 (80th Congress) three progressive legislators from Minnesota, including DON FRASER, collectively have served a total of 42 years on the committee. The Nation's Capital and the House might hope for the continued committee service of progressive Minnesotans in the years ahead.

Mr. Speaker, JIM MANN came to the committee with the 93d Congress. Particularly missed will be JIM's very capable and knowledgeable legal mind. His legal expertise, beginning with the Home Rule Charter, has advanced the quality of many legislative and oversight responsibilities of the committee. His 6 years of service and 94th Congress chairmanship of the committee's Judiciary Subcommittee have immeasurably advanced justice and public safety in the Nation's Capital. In every way JIM MANN's service on the committee was representative of the new wave of moderate, progressive legislators from the South, for many years an element of constructive balance not available to the committee. The House and the Nation's Capital are hopeful that more JIM MANN's will seek to serve on the committee.

Mr. Speaker, the only negative comment appropriate to CHUCK WHALEN'S service on the committee is that his tenure was all to brief. However, since coming to the minority side of the committee, CHUCK WHALEN has contributed profoundly to the financial welfare of the Nation's Capital. His 4-year tenure on the committee's Fiscal Affairs Subcommittee has been witness to his efforts to assure that local financial obligations, some of which were imposed in prehome rule days by Congress, do not weaken the resolve of the committee and the House to preserve and advance locally elected government in the Nation's Capital.

Mindful of the history of the financial calamities of the 1870's, which in part moved the committee to recommend that the House vote to revoke elected government in the Nation's Capital, the gentleman from Ohio and the Fiscal Affairs Subcommittee have held hearings and reported legislation to improve the accounting system of the District of Columbia government and hopefully one day make the system a model for jurisdictions throughout the United States.

CHUCK WHALEN and the subcommittee also worked to assure that the Federal Government completely upgrade the physical plant of St. Elizabeths Hospital before any transfer of that facility to the District of Columbia government is even contemplated.

In addition, the subcommittee and the gentleman from Ohio contributed profoundly to legislative efforts to successfully bring forth a reformed, actuarially sound, federally supported pension system for the police, firefighters, teachers, and courts of the District of Columbia.

Mr. Speaker, these legislative achievements prevented the widely predicted insolvency, within 20 years' of the District of Columbia government.

The gentleman from Ohio also took an active interest in a comprehensive series of hearings on the impediments to and the goals for the optimum economic, functional, and aesthetic planning and development of the Nation's Capital. This oversight effort is the only comprehensive examination by Congress of how best the Nation's Capital might cope better presently with the planning and development process and how local, Federal, and congressional leaders might work together to assure for posterity an even better planned, aesthetically developed, and economically healthy Capital City.

Mr. Speaker, an interest in the cultural life of the Nation's Capital was quietly, but effectively pursued by the gentleman from Ohio during his tenure

on the committee. Sensitive to the unique political status of the District of Columbia a city with responsibilities similar to those of a State, CHUCK WHALEN worked quietly to make known the financial difficulties of many local private cultural institutions of international renown such as the Corcoran Gallery of Art, the Folger Shakespeare Library and Theatre, the Arena Stage, and the Museum of African Art. Many Members of Congress and many Federal officials were quietly educated by CHUCK about the limited ability of the District of Columbia government to provide subsidies for the operation of such local but internationally appreciated institutions in the Nation's Capital. As a result of CHUCK's efforts, concerned Members of Congress and Government officials are more receptive to the study of proposals for special Federal-District of Columbia subsidies for these and other local cultural institutions and activities in the District of Columbia. One immediate result of these efforts was the support of CHUCK and the work of the late Senator from Minnesota, Hubert H. Humphrey and numerous colleagues, to successfully enact legislation transferring the operation of the Museum of African Art to the Smithsonian Institution.

The gentleman from Ohio has been a consistent advocate of completing the 100-mile metro rapid rail transit system for the National Capital region. His support and counsel on the committee regarding this matter will be missed. So too the committee will miss his broad and enlightened encouragement of expanded cooperation among the 20 jurisdictions that comprise the National Capital region. And most profoundly missed will be his civil dissents and conscientious contributions which always brought enhanced quality to a piece of legislation, the resolution of an issue, or an oversight matter before the committee.

Fortunately, the gentleman from Ohio will not be leaving the Nation's Capital. He is remaining to assume the leadership of a new international relations citizens organization called New Directions. CHUCK will be working tirelessly to advance the goals of New Directions which are to relieve human suffering everywhere, to resolve peacefully global conflict, and bring greater levels of social justice and economic progress to all the World's citizens.

In addition, a whole new generation of leadership will be enriched by Professor WHALEN at the Catholic University of America here in the Nation's Capital.

Mr. Speaker, CHARLES WHALEN is the 40th Member of the House from Ohio to serve on the Committee on the District of Columbia since 1823. On the whole, Ohio has given the committee progressive members interested in making the Nation's Capital a pleasant, monumental, secure, and residential city for the international community, government official, visitor, and resident alike. We hope that CHARLES WHALEN's counsel and interest in District of Columbia affairs remain available to all of us and that progressive members from Ohio in the Whalen mold continue to seek membership on the District of Columbia Committee.

Mr. Speaker, TED RISENHOOVER served conscientiously on the committee's Fiscal Affairs and Judiciary Subcommittees. On the Judiciary Subcommittee, TED's counsel and experience as a member of the Oklahoma Crime Commission enhanced the subcommittee's drafting and reporting of important revisions to the District of Columbia Bail Reform Act. The revisions were intended to answer objections that the Bail Reform Act almost routinely permits the release on personal recognizance of felony suspects who often have established patterns of violent criminal behavior. The Senate, unfortunately, has usually moved to block these revisions after overwhelming House approval in the 94th and 95th Congresses.

While serving on the Judiciary Subcommittee, TED also participated in the drafting and reporting of legislation to update the congressional charter of George Washington University. The charter was first reported from the Committee on the District of Columbia in 1821.

As a ranking member of the Fiscal Affairs Subcommittee, TED participated in extensive hearings on the commuter tax and the Federal payment. TED voted in subcommittee to send legislation to the full committee authorizing the District of Columbia City Council to tax the incomes of nonresidents.

Additional, TED's Fiscal Affairs Subcommittee tenure also contributed to the successful reporting of pension reform legislation, assuring a soundly financed government for the Nation's Capital.

Mr. Speaker, the record is clear. TED RISENHOOVER's service on the District of Columbia Committee has contributed immeasurably to advancing public safety and soundly financed government in the Nation's Capital.●

LEGISLATION TO AMEND INTERNAL REVENUE CODE TO EXCLUDE $1,000 OF INTEREST FROM SAVINGS FROM GROSS INCOME OF CERTAIN TAXPAYERS

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from New York (Mr. WEISS) is recognized for 5 minutes.

● Mr. WEISS. Mr. Speaker, it is time our tax code stopped penalizing lower-middle income taxpayers for being thrifty. Last year, more than 43 million—52 percent—taxpayers earned less than $10,000. This group includes blue-collar workers, the elderly, and many young couples just getting started. In most cases, their budgets are stretched to the limit, and as inflation continues to erode their disposable income, savings become increasingly important.

By taxing the interest on savings, the Government adds to this group's economic burden. In an attempt to change this, I am, today, introducing a bill allowing individuals or families with "expanded incomes" (adjusted gross income plus the excluded half of capital gains) of less than $10,000 to exclude from taxable income up to $1,000 of savings account interest. Passage of this bill would allow lower-middle income earners to save without fear of losing any interest to taxation.

The loss in total revenue would be minimal, because this group, which earns only 19 percent of all income, cannot afford to devote large amounts of their income to savings. At the same time, however, the bill would reward those taxpayers who do make this sacrifice.

The problems of the lower-middle income earner are difficult enough without adding the burden of exposing small amounts of savings to taxation. I urge my colleagues to join me in sponsoring this bill:

H.R. 14306

A bill to amend the Internal Revenue Code of 1954 to exclude $1,000 of interest from savings from the gross income of certain taxpayers

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That (a) part III of subchapter 1 of the Internal Revenue Code of 1954 (relating to items specifically excluded from gross income) is amended by redesignating section 124 as section 125 and by inserting after section 123 the following new section:

"SEC. 124. PARTIAL EXCLUSION OF INTEREST FROM SAVINGS.

"(a) GENERAL RULE.—In the case of an individual, gross income does not include interest which (but for this section) would be includable in the gross income of such individual for the taxable year.

"(b) LIMITATIONS.—

"(1) INTEREST LIMITATION.—The amount of interest excluded under subsection (a) from the gross income of a taxpayer for the taxable year shall not exceed—

"(A) $1,000, in the case of a single individual,

"(B) $1,500, in the case of a joint return, or

"(C) $750, in the case of a married individual filing a separate return.

"(2) ADJUSTED GROSS INCOME LIMITATION.—If the modified adjusted gross income of the taxpayer for the taxable year exceeds—

"(A) $10,000, in the case of a single individual,

"(B) $15,000, in the case of a joint return, or

"(C) $7,500, in the case of a married individual filing a separate return,

the amount of interest which may be excluded under subsection (a) from the gross income of such taxpayer (determined after the application of paragraph (1)) shall be reduced by $1 for each $1 of the excess of the modified adjusted gross income of the taxpayer over the amount applicable to such taxpayer under subparagraph (A), (B), or (C).

"(c) SPECIAL RULES FOR MARRIED INDIVIDUALS.—

"(1) COMMUNITY PROPERTY.—This section shall be applied without regard to community property laws.

"(2) DETERMINATION OF STATUS.—For purposes of this section, the determination of whether an individual is married shall be made in the manner prescribed by section 143.

"(d) DEFINITIONS.—For purposes of this section—

"(1) MODIFIED ADJUSTED GROSS INCOME.—The term 'modified adjusted gross income' means adjusted gross income determined without regard to paragraph (3) of section 62.

"(2) INTEREST.—The term 'interest' means any amount (whether or not designated as interest) paid by a bank (as defined by section 581), a mutual savings bank, savings and loan association, building and loan association, cooperative bank, homestead association, credit union, or similar organiza-

tion, in respect of deposits, investment certificates, or withdrawable or repurchasable shares."

(b) The table of sections for such part III is amended by striking out the last item and inserting in lieu thereof the following:

"Sec. 124. Partial exclusion of interest from savings.

"Sec. 125. Cross references to other Acts."

SEC. 2. The amendments made by the first section of this Act shall apply to taxable years ending after the date of the enactment of this Act.●

NEWSPERSONS' PRIVILEGE ACT

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from New York (Mr. OTTINGER) is recognized for 5 minutes.

● Mr. OTTINGER. Mr. Speaker, today I am reintroducing the Newspersons' Privilege Act of 1978 with the following cosponsors: Messrs. AUCOIN, CARR, CONYERS, DELLUMS, EDWARDS of California, GILMAN, HARRINGTON, LUNDINE, MITCHELL of Maryland, OAKAR, PRICE, RICHMOND, ROSENTHAL, RYAN, STEERS, and WAXMAN.

The hour is late in the 95th Congress, as I fully realize, but the importance of the issue of protecting newspersons from having to divulge their sources or notes was heightened this week when the Supreme Court refused to consider the appeal of the New York Times and its reporter, Myron A. Farber. At this very moment, Mr. Farber, a newspaper reporter, has been sentenced to jail for carrying out his news reporting duties and seeking to keep open the channel for the free flow of information to the press.

This case and others recently have raised serious question about the willingness of our courts vigorously to uphold the free press clause of the first amendment. If this dangerous trend continues, that most essential of institutions in our free society, the press, stands in peril. We in the Congress must prepare to act with urgency. It is my hope in reintroducing the bill at this time that my colleagues will give it serious consideration during the next few months in preparation for action early in the 96th Congress.●

EXPORT TRADE ARTICLE NO. 3: COMPUTER COMPETITION

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Arkansas (Mr. ALEXANDER) is recognized for 30 minutes.

● Mr. ALEXANDER. Mr. Speaker, I wish to call the attention of my colleagues to the following article entitled, "U.S. Computer Firms Facing Foreign Threat" which was written by Thomas Love.

At a time when our exports should be increasing we find more and more countries moving into areas where the United States has always been dominant, that is, highly sophisticated areas such as nuclear and computer technology.

The article written by Mr. Love examines the foreign competition in computer sales. France, England, Japan, and Russia are all developing computer systems for export. While the United States is still No. 1, the trend is unmistakably clear that "U.S. companies won't have it as easy in the future as they have in the past." As chairman of the Export Task Force, my colleagues and I feel it imperative that U.S. exporters be allowed to peddle their wares in an open and free environment. The U.S. Government must concern itself not with hindering exports but with facilitating them. The article which appeared October 6, 1978, in the Washington Star follows:

U.S. COMPUTER FIRMS FACING FOREIGN THREAT

(By Thomas Love)

At one time a few years ago, the American computer industry was the computer industry. Now, U.S. firms are facing increasing competition and that's no longer the case.

No one in the industry seems to be willing to roll over and play dead in surrender to foreign competition, but there is an increasing awareness that U.S. companies won't have it as easy in the future as they have in the past.

Recent Department of Commerce import-export figures show the rising problem for the industry. Although exports are still far above imports, imports are scoring the more rapid gain.

During the first six months of 1978, exports rose from $1.527 billion the previous year to $1.876 billion, a 22.86 percent increase. But imports were up from $129 million to $343 million, a 165.89 percent increase.

Frank T. Cary, chairman of IBM, said, "Every year we see an increase in competition from foreign computer companies, particularly in France, Britain and Japan, where the governments provide very effective support in various ways to national manufacturers.

"All three, for example, give outright subsidies to their electronic data processing manufacturers and exercise a strong preference for the products of these national companies. The Japanese government has declared data processing an export industry and is working closely with manufacturers to bring that about.

"We respect the capability of these competitors and we consider them to be very significant competition," he concluded.

But the competition for the future comes not only from the nations Cary mentioned, but possibly from an unexpected source as well—the Soviet Union.

The U.S.S.R., in cooperation with other Eastern European countries, is developing a RYAD II computer system apparently based on the IBM 370 series—replacing the RYAD I, based on the IBM 360 series—which is expected to be produced by 1979 or 1980.

Although this computer is expected to be for use in the Soviet bloc and isn't viewed as a threat, its successors may be put into the international marketplace at attractive prices and may pose a threat to other manufacturers.

Lloyd Kaufman of the Computer and Business Machine Manufacturers Association, which represents such manufacturers as IBM, Control Data Corp. and Sperry Univac, said, "The technological lead of three to five years we used to have is no longer true.

"The commercially most developed nations—Germany, France, Japan—are on a par with the U.S. technology," he continued. "The Japanese have some very high-powered projects and are working with large-scale integrated circuits. And they're working with some government support.

"In July, France announced it is going the way of 'Japan, Inc.' with a move to more high technology with less reliance on such things as steel and textiles," he continued.

"We're trying to keep ahead, but we're not much encouraged by the federal government," he charged, referring to controls which limit exports of computer equipment. He used as an example the recent blockage of a Sperry Univac computer sale to the Soviet news agency Tass.

"Our Western allies have similar controls but this country's are more stringent," he said. "Since 1949, we have been coordinating our activities and new negotiations will be held in Paris next week to work up a list of restrictions."

James R. Fullam, a vice president of Sperry Univac, however, said, "U.S. technology is still by far well-advanced. And the U.S. software capability is demonstrably superior, although there is some respectable foreign competition, especially from Japan," he went on.

"Software" is such things as programming, compared to the computer frame itself.

This superiority in software is very important, Fullam pointed out. "It used to be—10 years ago—80 percent of computer costs was hardware. Now it's 50–50," he said.

"Our main (foreign) competition is from the Japanese who are present in the United States in American companies. Itel sells Japanese products and Amdahl has a business relationship with the Japanese," he said. Japanese financing of Amdahl activities is seen within the industry as giving them access to U.S. technology.

"We don't see too much competition from the Europeans, although there is some from Nixdorf of Germany," Fullam said.

Overseas, the major competition for American firms is from the companies of that country. For instance, in Britain the No. 1 company is ICL, a British firm, with IBM No. 2.

One reason is that most foreign countries give their national companies the government's business.

There also is little Japanese business in Europe, Fullam said.

"For the next decade, there is no question about the dominance of the United States in the world market," he predicted. "There is real action among the U.S. companies."

One thing going for American companies is their entrenched position in many places, since it is cheaper and easier to buy a new-generation system from the same company which made the system now in use.

"I don't want to minimize what the Japanese are doing," he continued. "They want to participate in the world market in computers like they do in the market in cameras, automobiles and hi-fis. We have a lot of smarts and we can keep running double time. But we'll know they're there."

One example of the Japanese drive is a new system announced last month by Hitachi which its maker billed as "the world's biggest and fastest computer"—allegedly 1.6 to 1.7 times faster than IBM's 3033 series and cheaper to rent.

But American manufacturers aren't standing still. For instance, IBM this week introduced a new "distributed processing" system—the 8100 Information System, which places computing power throughout an organization rather than at a central site.●

THE PLIGHT OF LEV GENDIN

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from New York (Mr. HANLEY) is recognized for 5 minutes.

● Mr. HANLEY. Mr. Speaker, I am most pleased today to join in the "Vigil for Freedom," sponsored by the Union of Councils for Soviet Jewry on behalf of Soviet Jewish families and individuals who are being detained in the U.S.S.R. as a result of the Soviet Government's repressive emigration policies.

In 1975, 35 nations signed the Helsinki Final Act, which committed the 35 signatory nations to pursue policies consistent with basic principles of human rights, including the reunification of divided families whose members live in

different countries, religious freedom, minority rights, and free travel between countries.

Unfortunately, the Soviet Government has disregarded the human rights provisions of the Final Act.

Today, I bring to my colleagues attention the case of Lev Gendin, a 36-year-old electronics engineer from Moscow. Immediately after applying for a visa in November 1970, he was dismissed from his job and reduced to performing various types of menial work. Under constant surveillance and harassment, Lev has served a total of 160 days in jail since 1970. Assaulted by KGB thugs, he suffered a spinal injury

In 1974, Lev Gendin was arrested in the Kishinev railway station while awaiting a train. He was given a 15-day prison sentence on a trumped-up charge of "disgraceful behavior" in a tiny solitary confinement cell, and, therefore, began a 6-day hunger strike. Soon after, he was moved to a cell where the other prisoners threatened his life daily. When his sentence was extended arbitrarily, he managed to escape while in transit between prisons. When he made his way back to Moscow where he is well known, authorities let the matter of his escape drop.

Lev's most recent visa application was again rejected, and he was warned he would be sent to Siberia rather than to Israel. Currently unemployed, the threat of being tried on a "parasitism" charge is serious. Moreover, despite the fact that he is well over military age, he was recently called for military service. Conscription would mean indefinite postponement of all future visa applications.

In Israel, Aviva Klein-Gendin is a tireless worker in the struggle to win freedom for her husband, with whom she lived for only 3 months before she alone was given a visa. She knows Lev writes to her every week, but she sometimes does not receive word from him for months. Aviva strongly believes that protests in the West are their only shield against stronger Soviet action, and their only hope of forcing his eventual release.

She says:

Our lives are in the hands of the West. If there will be enough protests, sooner or later he will be free and I will see him again and we can begin to live our lives.

We cannot ignore the plight of Lev and Aviva. Their story should strengthen our resolve to assist them and those like them, and to continue in this vigil for freedom until those who seek peace and freedom are given their human right to enjoy them.●

REVITALIZING NEIGHBORHOODS

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Wisconsin (Mr. REUSS) is recognized for 20 minutes.

● Mr. REUSS. Mr. Speaker, as we return home after this session to talk with our constituents, we will be meeting with people in their own neighborhoods. It is frequently forgotten that neighborhoods play a crucial role in ameliorating many social problems that concern us all. I hope these remarks, highlighting how neighborhoods can be a constructive force in urban life, will be useful to all Members in the weeks ahead.

In good neighborhoods people know each other, cooperate, and make life more human for each other. Where neighborliness is absent, people may be afraid to leave their homes or apartments, and life can be joyless and hard.

Viable neighborhoods make viable cities. Neighborhood decay means city decay. Jane Jacobs reminded us that the future of the city lies in the revitalization of our neighborhoods.

The Federal Government, which has spent billions on cities since the Housing Act of 1937, on balance has probably produced as much grief as improvement. Unwittingly, urban renewal, urban expressways, and mammoth high-rise public housing projects have all contributed to neighborhood stress or annihilation. As Msgr. Geno Baroni has pointed out, the combination of faulty programs and faulty social strategies has hastened the flight of population and jobs from central city neighborhoods.

History, while never repeating itself, nonetheless has its lesson. Andrew Greeley, director of the Center for the Study of American Pluralism in Chicago, recounts an urban neighborhood that was:

A ten-square block area with almost 14,000 people, an average of 39.8 inhabitants per acre—three times that of the most crowded portions of Tokyo, Calcutta, and many other Asian cities. More than three-quarters of the apartments have less than 400 square feet, 556 of them are in basements which quickly become awash with human excrement during even mild rainstorms. Garbage disposal is a chronic problem—usually it is simply dumped in the narrow passageways between buildings. The death rate is 37.2 per thousand. Desertion, juvenile delinquency, mental disorders, and prostitution have the highest rates in the city. Social disorganization in this neighborhood, according to all outside observers—even the sympathetic ones—is practically total and irredeemable.

Blacks? Latinos? Inhabitants of some Third World city? No. Poles in Chicago in 1920.

The neighborhood is still there although the manure boxes are gone, and so are the backyard buildings, the outdoor plumbing, the sweatshops over the barns, the tuberculosis, the family disorganization, the violence, and the excessive death rates.

The Poles are gone too for the most part, having moved further northwest along Milwaukee Avenue and out into the suburbs—a prosperious middle class.

Those Polish-Americans in the 1920s were characterized as alienated, disorganized, and unredeemable because of inherent social pathology. Yet time—and jobs that brought steady income—transformed the slum dwellers into prosperous citizens. Looking back, they had the good fortune to achieve their transformation before reformers could expose them to what Greeley called "dependency-producing welfare legislation."

The urban poor of the post-World War II era have not, by and large, followed the path of the Poles, or of the Italians, or of the Irish before them. They have been caught up instead in a system that entraps them in their own poverty. Too few see successes among friends and family to gain the firm conviction that they too, by working hard, might realize the American dream

Welfare programs, instead of freeing the urban newcomers so they "make it" in a fluid society, created a new phenomenon: a welfare way of life. At the same time, the blacks among the urban poor faced severe prejudice. The flight of middle class whites broke up the old neighborhoods before the new residents could develop solid neighborhoods of their own.

Here were all the ingredients for generating crime—the lack of neighborhood cohesion, the absence of hope for the future, the debilitating effects of relief, the low level of job opportunities, and poverty encircled, both geographically and culturally, by affluence.

The decline of safety, the faltering quality of schools, and the loss of property values in black or Chicano poverty areas confirm racist stereotypes among whites who forget their own up-from-poverty histories. But neither whites nor blacks nor the cities they inhabit can look to the future with optimism unless they come to grips with the dynamics of neighborhoods and the fears, legitimate and otherwise, that obstruct neighborhood rejuvenation.

Public schools, once the pride of cities and a chief mechanism for transmitting hope and ambition to each new generation, have lost momentum. Many school systems have deteriorated badly. It is easier to cite the ingredients needed for restoring schools to health than to put these into practice. Among the essentials are discipline, high standards of pupil behavior, strong parental support of and respect for their children's teachers, and dedicated teachers who insist on achievement, not mere attendance, as a criterion for passing and graduating. There is no more important neighborhood-building activity than to work cooperatively to achieve such goals

Crime and the insecurity it breeds are mortal enemies of good neighborhood. The entire criminal justice system is embroiled in controversy and some of the best informed students of crime profess that they have more questions than answers. One thing, however, is certain: the police alone cannot combat crime. Unless citizens, adults and youth, residents and business, join hands with law-enforcement officials, the arson and street crimes and white collar corruption will continue to tear up communities. The more nearly citizens become actively involved, the more chance they have of turning back the tidal wave of crime.

If the cycle of crime is to be broken, this must begin with young people. The potential criminals of tomorrow might be turned around in their formative years if they are given enough love, attention, understanding, constructive criticism, and useful activities to pursue. These are all neighborhood functions, and neither more police nor more reliance on sophisticated anticrime technology, however necessary, can substitute for the involvement of a human network of concerned and caring individuals. A neighborhood at its best is such a network.

The fear of declining property values has been a major impediment to the de-

velopment of inner city neighborhoods with a rich mixture of different racial, ethnic, and economic classes. Panic peddling and blockbusting have been generated by unscrupulous real estate agents. The syndrome of decline has been reinforced by insurance firms and lending institutions that, in essence, walked away from transitional neighborhoods. These "redlining" practices finally are being condemned by responsible business groups as well as by neighborhood interests, but it will take patience and hard work to overcome the misimpression that economically and racially mixed neighborhoods are inherently unstable.

We are beginning to rediscover the neighborhood in human as well as in brick-and-mortar terms. But part of the difficulty in coming to grips with the dynamics of growth and decline among neighborhoods is that neighborhoods differ so much from each other. They have different problems, different types of people, different institutions. A low-income, cohesive neighborhood with strong institutions and leadership has little in common with a low-income neighborhood where crime and social disintegration prevail. Fortunately, there are impressive successes from which we can learn.

Birmingham is achieving neighborhood vitality through a self-identification process for neighborhoods and communities that was begun in 1974. Citizen groups developed a whole array of neighborhood improvement programs. These ranged from increased public services in lower-income neighborhoods to flood control, from neighborhood communications devices to better street lighting. The mayor and city council accepted every recommendation of this citizen participation plan. Birmingham as a result is quietly becoming one of the Nation's leading cities in putting people-power to work.

Pittsburgh's central north side, containing 3,800 homes, seemed doomed until a group of neighborhood residents launched a block clean-up program. When they failed to get support from city hall, they convinced a local foundation and the Pittsburgh lending industry to help. From this coalition emerged the neighborhood housing services, dedicated to neighborhood upgrading. During its first 5 years, NHS promoted over 600 loans, saw home improvement lending increases by 97 percent, worked to reduce code violations from 1,200 homes, and saw real estate values climb by 60 percent. Several key elements have been credited for the success of the NHS program: it is a local program confined to specific neighborhoods. It is nongovernmental and nonbureaucratic. It is a self-help effort rather than a giveaway program.

The Hill section of St. Louis came to life as a result of a Federal Government invasion. A recessed interstate highway was about to be built through the Hill, stranding a third of its population. The community demanded the construction of overpasses to keep the community intact. While women with baby buggies obstructed bulldozers, community leaders descended upon Transportation Secretary John Volpe for a pointed discussion of the matter. Volpe relented, and the Hill did its part by raising $50,000 to partially finance the overpasses.

With the unity and momentum from victory in the highway battle, Hill residents moved into a new round of community-building. A successful Italian street festival raises funds for such projects as the planting of 10,000 trees, transforming a dump into a park, and sponsoring a summer youth program focused on improving their neighborhoods. The neighborhood formed a housing organization called Hill 2000, Inc., which contributes either 10 percent of renovation costs or $500, whichever is less, to any homeowner undertaking exterior improvements.

As a result of these citizen efforts, the Hill is now an immaculately clean and attractive community, despite a median income below $10,000. Litter is gone from the streets. The red, white, and green fireplugs bespeak the ethnic pride of its residents. Significantly, this recycling occurred without benefit of Federal aid—unless a Federal highway slicing through the neighborhood can be considered a benefit.

Unfortunately, for every successful neighborhood rebirth there are numerous examples of neighborhood decline. Much disintegration occurs despite massive inputs of aid. Via defaults, HUD became the owner of over 300,000 houses, which were part of a $4 billion rehabilitation program. An entire block of New York City was rehabilitated at a cost of over $11,000 per unit, only to be engulfed by the surrounding neighborhood. In Boston over 3,000 apartments were rehabilitated only to be foreclosed.

Taken together, the failures and successes point to the inescapable fact that neighborhood rehabilitation requires that not only the buildings but the social fabric has to be injected with new life, and that the communities own resources must be drawn on for this effort.

Unfortunately, there exist neighborhoods overwhelmingly characterized by abandonment, massive tax delinquency, and substandard dwellings. Americans do not like to admit that any problem defies solution. But the failure of existing types of aid to halt decay in these depletion areas has convinced some that limited funds should not be invested further in these locations. M. Carter McFarland, an architect of many of the Nation's housing programs, sadly concluded that:

> Improving housing is not enough to reverse the downward spiral in neighborhoods afflicted by deep social pathologies. We do not know exactly how to deal with these more fundamental causes of the slum condition. It follows that money and energy spent on housing improvement in neighborhoods significantly affected by these pathologies are likely to be wasted and to produce no permanent neighborhood improvement.

This is not to say that the people in such areas should not be helped to relocate or to improve their ability to function in other ways. A glimmer of hope comes from the earlier example of Poles and other immigrants. In more modern guise, the hope is kept alive by the examples of the Black Muslims and Puerto Rican evangelicals, who showed that even out of conditions of extreme individual and social disorganization an edifice of trust can be brought into being. The Black Muslims in prison conditions that would seem most counterproductive have produced remarkable results. This seems surprising only because we have forgotten that the early Christian Church also was a kind of underground government ministering to slaves, outcasts, and criminals in the rotting structure of the Roman Empire. The Black Muslims, like the early Christian Church, offer strong political medicine, but this may be necessary for people who have been left without self-respect, dignity, or hope.

If self-help is a key to wholesome neighborhoods, an array of Federal programs is available to encourage neighborhoods to help themselves.

A major new tool for this purpose is the Consumer Cooperative Banking Act of 1978. It provides $400 million in seed capital over the next 4 years in the form of loans to nonprofit consumer cooperatives. These organizations in turn provide millions of consumers with goods and services, including food stores, health care, optical goods, housing, pharmaceuticals, and repair service. Because most communities needing such facilities lack expertise to set up and run these cooperatives, the new law includes funding for technical assistance to promote self-help.

Other major Federal tools include:

Section 312 direct loans for housing rehabilitation.

Homesteading, which makes abandoned houses available at practically no cost to families on condition they rehabilitate them to reasonable standards.

The Urban Reinvestment Task Force, through which HUD and the Federal Home Loan Bank Board seek to bring together the city, community residents, and local financial institutions in a concentrated effort to rehabilitate and improve specific neighborhoods. Modeled after Pittsburgh's Neighborhood Housing Services, discussed above, this program relies on existing neighborhood leadership capacity and is thus best suited to neighborhoods at the early stages of the decay cycle, rather than to those characterized by heavy absentee ownership, severe vandalism, extreme poverty, and runaway abandonment.

A portion of section 8 rental assistance funds is reserved to State finance agencies and localities to support housing rehabilitation for lower-income families.

The community development block grant (CDBG) program recognizes that local governments in concert with citizens should determine their own local programs. Localities received over $3 billion under this program in fiscal year 1977. CDBG funds have been used creatively to assist many poor neighborhoods.

National endowment for the arts grants, averaging no more than $22,000 each, enable neighborhood and civil organizations to plan and design features to make their cities more attractive places in which to live and work. NEA grants involve a minimum of redtape, encourage community initiative, and are sensitive to local conditions.

Urban development action grants are designed to provide seed money to stimulate large-scale private investment in declining cities. The first grants went primarily into business districts, but subsequent grants were to be aimed increasingly at needy neighborhoods.

The Home Mortgage Disclosure Act is designed to inhibit redlining in deteriorating areas. It requires lending institutions to report where they make mortgages and gives them incentives for meeting the credit needs of the neighborhoods where their savings deposits originate.

States can encourage corporations to contribute money or technical expertise to neighborhood-based development activities by crediting these against the State corporate tax. Such State tax credit programs have recently led Secretary of Commerce Juanita Kreps to encourage firms to earmark 5 percent of their charitable contributions to neighborhood and city revitalization projects.

Cities and counties can also encourage neighborhood rehabilitation via tax encouragement. Currently owners are actually penalized for upgrading their homes—when they improve their properties, their property taxes rise. By reducing or eliminating the real estate tax on housing and other buildings, leaving the tax on land values only, rehabilitation could be made more attractive to owners and investors.

Zoning is another tool which local governments can use to improve neighborhoods. In the past, zoning has been defined so narrowly that sterile neighborhoods have resulted. Residential areas are deprived of village-type commercial or recreational facilities, and job opportunities are zoned out. Now that many industries are clean, appropriate mixed zoning would go a long way to make neighborhoods more vital and interesting, at the same time saving energy and enhancing the quality of neighborhood life.

While it is tempting to throw up one's hands in despair at the staggering problems of urban decay, we do have success models to emulate. Large-scale rehabilitation projects have succeeded in revitalizing the declining areas of some cities. A prime example of how this can be achieved through the cooperative action of local government, the Federal Government, and neighborhood residents is Baltimore, where the city's downward spiral was arrested.

If we are to be true to the vision of a multi-racial, economically diverse, vibrant city, we must make in-town living attractive to the affluent and the middle class. Their return heralds a rejuvenation of the housing stock, a necessary shot-in-the-arm to an eroding tax base, and an energetic necleus who are willing and able to "fight City Hall" when public services are inadequate.

There is growing evidence that at least parts of many of our older central cities are undergoing a revival. Many old but structurally sound buildings are being rehabilitated. Middle- and higher-income people—mostly young couples and single individuals without children—are moving into older neighborhoods formerly written off as dead or dying. This restoration is visible, for example, in the South End in Boston, Park Slope in Brooklyn, Queens Village in Philadelphia, or Adams-Morgan and Capitol Hill in Washington, and has been achieved largely without government plan, subsidy, or intervention. I have always believed that there are things the government should and should not do. Here we have a clear-cut case of something working well without government interference. We should leave well enough alone.

The return of the middle class, however, carries with it the specter of displacement of the poor from their homes. Ideally, cities would insure that decent alternative homes at affordable costs are made available to the displaced in cadence with the rehabilitation. The satellite communities of metropolitan areas and the States should assume some of this responsibility, since many of the displaced will want to live in the older and closer-insuburbs. Displacement would not be so traumatic if there were an abundance of decent housing and good neighborhoods offering viable options to poorer families.

Moreover, when rehabilitation becomes a citywide phenomenon, rather than a feature of a few select neighborhoods, there will be less pressure by the affluent on any single area. Relative stability, with a wholesome mix of income groups, should not be overlooked as a long-term goal for urban neighborhoods.

Return migration by the middle class raises the possibility of undermining the black political power that has emerged in many cities. Although these middle class families include both blacks and whites, their presence is viewed by some as a threat to the new black political power structure. This is not necessarily the case. Mayor Bradley of Los Angeles and Mayor Young of Detroit offer evidence that blacks are able to get elected even when they are a minority of the total population. And Clarence Mitchell of the NAACP testified:

> I have no apprehension about the diminution of black representation because we desegregate our society. I think then we will open the flood-gates for the enormous reservoir of talent that exists in this country without regard to race. And I would predict we will see more, not less, of minority people in all arms of the government.

The realization of the ideal that "all men are created equal" has been long in coming. Yet, in the newly redeveloping neighborhoods of many cities, we are beginning to witness large-scale voluntary integration. The young and the affluent, often white, are quietly integrating previously all-black areas. We find significant integration in a great many middle-class in-town apartments. Unaccompanied by outcry or tension, the phenomenon has occurred unheralded and almost unnoted—a true indication that we are, at long last, beginning to approach the ideal of a color-blind society.

Also, neighborhood activists are putting new meaning into the phrase "government of the people and by the people." They are agitating until their legislators respond.

Some of the most innovative bits of urban revitalization—the antiredlining campaign, urban homesteading, consumer co-ops, development banks—originated in neighborhoods and only later went national. Neighborhoods spawned organizations which did battle to preserve their communities, to block disruptive highways, to halt the bulldozing of irreplaceable architecture, to picket city halls and corporate headquarters, and to hold real estate agencies, banks and other financial institutions to higher standards of civic responsibility.

This great reservoir of citizen initiative and cooperative enterprise needs to be encouraged. Self-help and mutual assistance are still an excellent way of managing social life.●

PERSONAL EXPLANATION

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Connecticut (Mr. COTTER) is recognized for 5 minutes.

● Mr. COTTER. Mr. Speaker, although I was on Capitol Hill October 12 I was not called for the vote on the abortion language included in the fiscal year 1979 Labor-HEW appropriations bill. Had I been called, I would have voted against receding to the Senate language.●

"OUR WONDERFUL HOMELAND," A POEM BY MRS. MARJORIE CARPENTER

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from South Carolina (Mr. DAVIS) is recognized for 5 minutes.

● Mr. DAVIS. Mr. Speaker, it is with a feeling of pride and accomplishment that we are sometimes able to observe the good works of our tax dollars in a form that is obvious to all.

Recently, I was able to observe just such an accomplishment in St. George, S.C., in the dedication of a community center that will serve citizens from all over Dorchester County, including our senior citizens. At the dedication ceremony, I was privileged to hear an example of writing and elocution that so moved me that I wanted to share it with my colleagues. The author is a senior citizen and a poet who has captured the color, beauty and majesty of her homeland in a composition.

In this day of incredible technology, we sometimes lose sight of the magnificence of our land. Fortunately, there are people like Mrs. Marjorie Carpenter of Summerville, S.C., who take pen in hand to remind us.

Her poem is entitled "Our Wonderful Homeland." While it concerns the great State of South Carolina, it will serve to remind everyone of the beauty of their own home State. We are not the architects of our land, we are the caretakers. In keeping with that truth, I offer Mrs. Carpenter's poem for your thoughtful consideration.

OUR WONDERFUL HOME-LAND

We love our own South Carolina
  Our dear home-land, "The Palmetto State,"
With all her proud history,
  Whose noble people made her great.
We love every part

of this beautiful land of ours,
From the mountains to the seashore,
All the trees and all the flowers;
The palmettos and live oaks,
The loblolly and long-leafed pines,
The sweet magnolia
And the yellow jessamine vines.
The cedars, the cypress,
And all the moss draped trees,
The crepe myrtles, the maples,
And aspens that tremble in the breeze;
All the lovely gardens
That are famous worldwide
With breathtaking beauty
On every side.
The charming city of Charleston,
With so many sights to see
"America's Most Historic City"
The historians surely all agree.
And Summerville, like fairyland,
"The Flower Town in the Pines"
With camellias, wisteria, gorgeous azaleas,
Along every street that winds and winds.
The quaint old town of St. George
Where Senior Citizens really rate,
The place when people grow older
They never get out of date.
The proud old city of Columbia,
The capital of our grand old State,
No doubt on history's immortal pages
She will always be there among the great.
And all the other cities
And every little town
From the smallest, most remote,
To those of great renown,
All the hills and the rivers,
And the clear winding streams,
All the placid lakes,
Where the moonlight gleams,
Acres of tomatoes and potatoes,
Rows of corn and cotton fields white;
Bobwhites call in the morning
And mocking birds singing at night!
The magic lure of the ocean,
As the waves toss to and fro,
With a feeling of awe at its vastness
That stirs and thrills the heart so!
The shady trails to the tops of the mountains,
How inspiring to be there!
It seems like a little bit closer to heaven
On a mountain than almost anywhere!
And all the kind-hearted people
Who live in our fair land;
Who are always willing and ready,
When anyone needs a helping hand.
They'll smile when you are happy
And rejoice when you are glad.
They'll help you when you're in trouble.
And stand by you when you're sad.
We love not only South Carolina,
But all of the good old U.S.A.
"May God continue to bless her,"
We do most reverently pray.
For all the blessings
This world can give
Are surely bestowed upon
This land where we live.
We thank God for giving us
This blest land of our birth,
The United States of America!
The grandest place there is on earth●

SALT II AND U.S. NATIONAL SECURITY INTERESTS

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Wisconsin (Mr. ZABLOCKI) is recognized for 10 minutes.

● Mr. ZABLOCKI. Mr. Speaker, in appraising the many comments one hears about the strategic arms limitation talks (SALT II) negotiations expected to be about to be concluded between the United States and the Soviet Union, one must keep in mind the simple but crucial fact that U.S. national security is really the only consideration on which to judge those negotiations and their final product. As chairman of the Committee on International Relations, my chief concern for this country's national security leads me to express my full support for the administration's efforts to conclude a SALT agreement.

I take this position only after much careful thought, thorough review of the facts, and consistent with my long-standing commitment to the idea that meaningful arms control negotiations contribute to national security.

In making this evaluation, I believe SALT must be judged on its own merits and not be viewed as an expression of approval or disapproval of Soviet actions in other fields or in other areas of the world. This commitment to the negotiation process should not be interpreted to condone Soviet "adventurism" in Africa, suppression of human rights, or violations of the Helsinki Accords.

To begin this discussion, it is important to establish the facts.

The first is that the U.S.-U.S.S.R. strategic forces are presently in rough balance although structured differently. The second fact is the guaranteed destructive capability of these forces. As the President pointed out in his speech at the Naval Academy last June:

We know that neither the United States nor the Soviet Union can launch a nuclear assault on the other without suffering a devastating counterattack which could destroy the aggressor nation.

A recent study within the executive branch concludes that a surprise Soviet first strike today would destroy 48 percent of the United States, but U.S. retaliatory forces would still be able to destroy 58 percent of the Soviet Union. The study also projects the mutually assured destruction (MAD) of both sides by mid-1980's with a Soviet first strike and U.S. retaliatory forces both being able to cause almost total destruction of both countries.

In an address on August 22 to the American Legion National Convention, Secretary of Defense Harold Brown noted:

Right now, even after a Soviet surprise attack, we could deliver literally thousands of thermonuclear weapons to targets in the Soviet Union. Despite the improving Soviet offensive and defensive forces, that capability of ours is not going to decline in the future. It is going to increase.

The problem of confronting us then is a delicate and challenging one. In the final analysis we have but two basic options—either we can succumb to the status quo, or, with cautious reason and hope, we can seek relief from the peril of mutual destruction.

In the first instance, if we want only to preserve strategic balance, both sides can continue in an unrestricted competition and accumulate more nuclear weapons and increasingly sophisticated delivery systems—with no increase in security and at higher costs. According to recent estimates by the Senate Budget Committee that option would cost the American taxpayer an additional $100 billion in defense spending over the next 15 years. Burdensome as that may seem financially and ominous as it is in terms of increased terror and potential destruction, I believe we would spend whatever is necessary. Our chief SALT negotiator, Paul C. Warnke, recently observed that the United States is determined to prevent the Soviets from gaining any strategic advantage:

We've got the will and the resources to do that. I have no doubt that if there is going to be an unbridled competition, we can match them and we can outmatch them. That's one of the things that gives us a strong negotiating position.

If, on the other hand, we want to stabilize the strategic balance and eventually reverse the trend, we can and should try to reach a SALT agreement that limits and in time reduces the number of nuclear weapons. This second option goes in what I believe is the direction of commonsense and reason. Equally important, it achieves that vital dimension to which I remain unalterably committed—U.S. national security.

This commitment to the process of arms control negotiations as a means of preserving peace and achieving security is neither new nor capricious. As a matter of fact, it is exactly the course of action followed by both Republican and Democratic administrations over the last 10 years. In 1968 President Johnson began preparations for SALT which led to the SALT I agreement under President Nixon in 1972. In 1974 President Ford established a framework for equal numbers of strategic nuclear delivery vehicles embodied in the Vladivostock Accord. This, in turn, laid the basis for President Carter's present efforts to stabilize strategic forces through a SALT II agreement and set the stage for further reductions in those forces through a SALT III effort.

Consistent with the pattern established by his predecessors, President Carter's efforts in SALT II have been especially reassuring in the important respect that U.S. negotiating positions have not been the arbitrary judgement of any one individual. Rather, U.S. positions in the negotiations have been and continue to be the result of a careful and extensive blending of policy options representing a whole range of legitimate concerns and interests, the assimilation of which has been led and controlled by the President himself, with total direction and final judgment his alone.

In reference to the emerging SALT agreement there is a valid question many ask: What is in it for us? Like all legitimate questions, it deserves a clear answer. With the negotiations nearing completion, we can expect SALT II as presently envisioned to provide the following specific benefits for the United States:

It will maintain and eventually increase strategic stability by reducing the number of Soviet nuclear delivery vehicles targeted against the United States by more than 300 over the terms of the agreement;

It will hold the deployment of Soviet strategic forces well below what they could deploy in the absence of constraints;

It will protect and satisfy the vital interests of our allies;

SALT II will allow the United States to preserve military options by permitting us to continue the planned development of new weapons we may need for our future security, such as a mobile ICBM system; and

Finally, it will allow the United States to rely with adequate assurance on our independent ability to verify Soviet compliance.

The advantage of relying on our own capabilities and not on the "goodwill" of the Soviets is particularly crucial in the context of verification. Over the last 10 years, American Presidents and negotiators have been willing to reach agreements only when we were sure we could adequately verify Soviet compliance with them. We have never been willing to rely solely on Soviet assurances or "trust"—and rightfully so. Consistent with this principle, SALT II must rely instead on limits and rules that we can effectively and adequately verify ourselves by national technical means. Chief of SALT support staff of the Central Intelligence Agency, Mr. Ray McCrory, testified on this very point before the Subcommittee on International Security and Scientific Affairs this past June 7:

In point of fact, verification has played a very major role in developing the provisions of the agreement. I think I will be able to show you that some very hard negotiating has resulted in some very favorable provisions of the treaty for us, which, in fact, resolve ambiguities in the favor of the observer and therefore make us much more confident that we will be able to monitor the specific provisions to which I refer.

In addition to the issue of verification, some critics complain that SALT II does not guarantee the invulnerability of our land-based forces in the 1980's. The facts are, however, Mr. Speaker, that the failure of SALT I to ban MIRV's guaranteed that at some future time the land-based missiles of both sides would become vulnerable. Fortunately, the MIRV sublimit as already agreed to in SALT II will slow the rate of this inevitable increase in vulnerability.

Furthermore, these critics demand that the Soviets agree to massive reduction in their land-based forces which presently constitute approximately 70 percent of their nuclear arsenal. Is this demand realistic? Would the Soviets agree? Would we, Mr. Speaker, agree to a massive reduction in our air and sea-based forces which constitute approximately 70 percent of our nuclear forces? Of course not. Rather, as envisioned, SALT II preserves this formidable U.S. deterrent, slows the rate of increase in the vulnerability of our land-based forces, and preserves a range of options to respond to the potential threat of ICBM vulnerability in the future.

Mr. Speaker, there is another dimension of the SALT question that has to be thoroughly addressed—and understood. It involves the American people and where they stand on the question of SALT as it affects their security and their pocketbooks. Characteristically and consistently, they stand on the side of commonsense and reason where SALT is concerned. As reflected in public opinion polls, the percentage of Americans favoring a new SALT agreement consistent with our national security interests has risen steadily from 59 percent in 1976 to 66 percent in 1977 to an overwhelming 75 percent in 1978.

What those numbers indicate is that a vast majority of the American people properly recognize that a workable and verifiable new agreement to limit strategic nuclear weapons enhances their security and preserves their well-being.

The American people very obviously understand that failure to achieve a SALT agreement would:

Produce more offensive and destabilizing weapons dangerous to national security;

Stimulate the spread of nuclear weapons to states which do not now have them;

Increase the probability of nuclear war and potential levels of destruction; and

Increase defense spending without a corresponding increase in security.

Accordingly, Mr. Speaker, I encourage the President to continue his efforts toward completing a verifiable SALT II agreement. Because of the prospective importance of a SALT II agreement to our national security, I also urge that judgment of its terms be reserved until a final agreement is submitted by the President to Congress for consideration. To do otherwise at this time could undermine the present negotiations and our country's vital national security interests. When the agreement is submitted to the Congress, the Members, and others concerned will have full opportunity to carefully review the agreement before it can receive final approval.

And, the American people can be assured that final approval will be given only if its agreements are in the national security interests of the United States.●

THE TOXIC POLLUTANT COMPENSATION ACT

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from New York (Mr. LAFALCE) is recognized for 10 minutes.

● Mr. LAFALCE. Mr. Speaker, I am pleased to introduce today the Toxic Pollutant Compensation Act—a truly comprehensive measure designed to provide relief to all persons injured as a result of toxic pollutants in our environment.

Essentially, the bill distinguishes among three classes of victims—those victims who sustained their injuries as a result of the fault of a manufacturer, those victims who sustained their injuries in the course of their employment, and those victims who sustained their injuries as a result of a toxic pollutant, but without fault. While the bill treats each of these three classes in a somewhat different fashion, it does provide a central theme: the Environmental Protection Agency is directed to study physical injuries, and to determine which such injuries are caused by toxic pollutants. In making this determination EPA will take into account the exposure to the toxic pollutant—both as to time and place—necessary to produce the physical injury. EPA's determination will greatly expedite the compensation processes since the bill provides for the utilization of this finding in subsequent legal and/or administrative proceedings.

The measure also provides for the creation of a compensation agency. Generally, this agency will pay benefits, up to $50,000, to persons (other than employees) who have sustained injury as a result of toxic pollutants. These benefits will be available regardless whether a manufacturer is ultimately determined to be responsible for the physical injuries. However, in the event that a manufacturer is at fault, EPA will be subrogated to the rights of the injured person, and will either share in any recovery he may receive, or initiate its own action against the person at fault.

I will conclude my remarks by briefly outlining for you how this measure will affect each of the three classes of persons.

VICTIMS WHOSE INJURY WAS CAUSED AS A RESULT OF A MANUFACTURER'S FAULT

The legal system has inhibited victims seeking redress for toxic pollutant-related injuries, since, under existing law, it is either difficult to establish causation, or, by the time the injury is linked to the toxic substance, the action is barred by time. Title I of the bill provides for a Federal cause of action addressed to both of these difficulties.

It provides that an action may be maintained in either State or Federal court, which is supplementary to all existing rights. The time for bringing such an action, which is provided in the bill to be 2 years, does not begin to run until EPA determines that there is a "requisite nexus" between the physical injury complained of and the toxic substance alleged.

While the plaintiff still must show the manufacturer to be at fault to recover, his burden of proof insofar as showing causation is considerably ameliorated. He must merely show that he has in fact sustained the physical injury, that EPA has determined that the pollutant causes the injury, and that he has had a sufficient exposure to the pollutant—both as to time and place—within the guidelines determined by EPA.

I should emphasize, Mr. Speaker, that the foregoing process deals only with the question of causation of an injury, and does not bear on the question of a manufacturer's alleged negligence. That will still have to be proven in court under existing or future standards of liability. Unsuccessful plaintiffs seeking damages for negligence may still receive benefits under titles II and III of the bill, described in greater detail below, if they meet the standards set forth in those titles.

When a plaintiff does sustain his cause of action, he is entitled to damages, both special and general. Moreover, in the case where the manufacturer is found to have operated with a gross and wanton disregard for human life, exemplary (punitive) damages can be had. However, these latter damages are paid not to plaintiff, but rather to the toxic pollutant revolving fund which will be discussed below.

EMPLOYEES

Under present law, employees, like the victims described above, suffer difficulties in obtaining benefits for toxic pollutant-caused injuries sustained in the work-

place as a result of deficiencies in State workers' compensation laws. These difficulties include severe problems in establishing causation, as discussed above. Moreover, these claims if ultimately filed may be untimely, since often it was not discovered that the injury was caused by substances to which they were exposed in the workplace until long after they have left the particular job. Title II of the bill preempts State law to expand the time for filing a worker's compensation claim, and permits an employee to establish causation, both in the fashion described above. It is important to note, however, that the bill does not substantively enlarge upon the rights of these injured employees who, under present law, are not permitted to maintain a direct action against their employer who was responsible for their injuries.

VICTIMS INJURED WITHOUT FAULT

Upon occasion, despite all precautions taken by a manufacturer who is conducting his operations under the best conditions then known, physical injuries may be caused by toxic pollutants produced by such a manufacturer. This may be especially true of those substances which require 20 to 30 years of exposure before producing their deleterious effects. It was my judgment that to hold such a manufacturer liable for injuries resulting thereby would be inequitable.

Accordingly, the bill provides for a toxic pollutant compensation agency within EPA, which will pay, up to a minimum of $50,000, benefits to persons with physical injuries caused by such toxic pollutants. These benefits include medical benefits; rehabilitative services, and lost compensation. However, to obtain such benefits, EPA must have determined the requisite nexus between the physical injury complained of, and the alleged toxic substance. If the claimant can establish that he is in fact suffering the physical injury, and has had the requisite exposure, then he will be able to obtain these benefits.

The benefits are paid out of the "toxic pollutant revolving fund," which is administered by the toxic pollutant compensation agency.

TEMPORARY ASSISTANCE FOR VICTIMS WITH RECOURSE ONLY TO LEGAL SYSTEM

It was also thought appropriate to include for victims with recourse only through the legal system as eligible for benefits from the toxic pollution control agency. (Employees can generally obtain benefits through the worker's compensation system much more rapidly than litigants.) In the case of these victims, the agency will operate similarly to a State worker's compensation system: it will become subrogated to the rights of any claimant to whom it pays benefits, and may maintain an action directly against the manufacturer at fault, or alternatively, will share in any recovery the claimant may obtain under the legal system.

All amounts recovered by way of subrogation or lien will be deposited in the revolving fund, as will any exemplary damages awarded as provided above.

THE ENVIRONMENTAL PROTECTION AGENCY

The Environmental Protection Agency is given a broad grant of power to make findings and determinations with respect to physical injuries caused by alleged toxic pollutants. Its finding, termed under the act a finding of "requisite nexus" will greatly facilitate the legal and administrative burdens of all victims. The formulation of this standard is, of course, subject to due process requirements, as it may adversely affect many manufacturers. Accordingly, the bill provides for input by all manufacturers into the decisionmaking process.

In conclusion, I believe the approach put forth in this bill to be both comprehensive, yet equitable for all persons concerned. While refinements to this measure may ultimately prove appropriate, I nevertheless believe that its general approach would go a long way toward alleviating problems encountered in the burgeoning problem area of toxic pollutants.●

STATEMENT OF INTRODUCTION

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Michigan (Mr. CARR) is recognized for 5 minutes.

● Mr. CARR. Mr. Speaker, I recently introduced H.R. 14271, with my colleague from Wisconsin, BILL STEIGER, as a cosponsor. This bill is designed to provide more equitable treatment for certain recipents of child benefits under the social security system.

Present law discriminates against certain persons who receive child benefits due to a disability. As you may know, these child benefits are granted to disabled persons so long as they remain in a dependent status. In most cases, the law provides that recipients lose this dependent status, and thus their benefits, when they marry another person.

In fact, however, not all marriages make a disabled person any less dependent. For example, take the case of a blind person who receives child benefits as a result of that disability and who wishes to marry another disabled person who receives benefits under the supplemental security income program. Although a blind or otherwise disabled person does not become any less dependent by marrying a similarly disabled person, current law provides that if a child benefit recipient marries an SSI recipient, the child benefits are lost.

This in effect penalizes the couple for getting married. If they were to live together, they would receive both benefits, but if they marry, they are only eligible for a couple's SSI benefit, which is substantially smaller than the combination of their previous benefits. This creates a substantial financial disincentive toward marriage, something which is painful to those disabled persons who believe in the institution of marriage and the preservation and encouragement of strong family units.

H.R. 14271 would resolve this problem, and make the law apply equally to single recipients (who are automatically considered dependent) and married recipients whose marriage has not in fact reduced their dependency.

First, the bill adds SSI recipients to the list of persons that a disabled child benefit recipient can marry without losing that child benefit.

Second, the bill provides that the child benefit may be counted as income against only that portion of the couple's SSI benefit which is greater than the single person's benefit. Without this second provision, the child benefit recipient would keep his or her benefit, but the couple's SSI benefit would be reduced dollar-for-dollar by the amount of the child benefit, leaving the couple in the same disadvantaged position.

It is important to note, however, that the child insurance benefit can be counted as income against that portion of the couple's SSI benefit which is greater than a single person's benefit. This is necessary to prevent the law from bias in the other direction, in favor of marriage, since without this provision a married couple would be able to combine the higher couple's SSI benefit with the regular child benefit.

In sum, these two provisions of H.R. 14271 insure that the law governing child benefits and SSI benefits will not be biased for or against the institution of marriage. As it should be, that decision will be left to the individuals concerned—free from any economic incentives or disincentives emanating from Washington, at least as far as the child benefit and SSI programs are concerned.

Finally, the bill will become effective upon enactment, and will apply to all marriages on or after the date of enactment. Persons who would be covered by this legislation, but were married prior to enactment would be able to reapply for benefits and receive them if eligible, but there would not be any retroactive payment of benefits lost due to the provisions of the present law.

H.R. 14271 is one step toward reforming Federal tax and benefit policies which make it economically disadvantageous for persons to marry and thus perpetuate the family structure which is so vital to the health of our society. I regret that there is not time to consider the bill during this session of Congress, and I plan to reintroduce the measure at the beginning of the next Congress. At that time, I will work to see that it receives the prompt consideration it deserves.●

PERSONAL EXPLANATION

(Mr. MIKVA asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

● Mr. MIKVA. Mr. Speaker, last week, I had to return to the 10th Congressional District of Illinois at various times to honor some longstanding commitments. As a result, I missed several votes.

Had I been present, I would have voted "yes" on rollcall Nos. 868 and 869 which provided for the reauthorization of the Perishable Agricultural Commodities Act and the creation of the Rural Transportation Advisory Task Force. I would have voted "yes" on rollcall No. 871, the DOD amendment to the Department of Defense Appropriations Authorization Act for fiscal year 1979 to provide for congressional approval of DOD contract dispute settlements in excess of $25 million. I also would have voted "yes" on rollcall No. 872, the vote on final passage of the fiscal year 1979 Defense De-

partment authorization. However, I would have voted "no" on rollcall No. 873, the Magistrate Act of 1978, and "no" on rollcall No. 874, the Water Resources Development Act of 1978.

I would have voted "no" on rollcall No. 880—a motion to agree to waive the requirements of the Environmental Policy Act for development of certain rivers in Colorado. I would have voted "no" on rollcall No. 881, the Kindness amendment to the Financial Institutions Regulatory Act. I would have voted "yes" on rollcall Nos. 882 and 883, the Stark and Hanley amendments to the same bill.

I would have voted "yes" on rollcall No. 885 to expedite the procedures of the House in the final week of the session, and "yes" on rollcall No. 886 to provide for consideration of the Child Health Assurance Act. I would have voted "no" on rollcall No. 888, the Steiger amendment to the sugar bill adding a cost escalator to the price objectives, and I would have voted "no" on final passage of the sugar bill, rollcall No. 889. I would have voted "yes" on rollcall No. 887, passage of the conference report on the Civil Service Reform Act. And, I would have voted "no" on rollcall No. 890, the Burleson amendment to the Meat Import Act to reduce the levels of meat imports.●

STATEMENT OF REPRESENTATIVE JOHN D. DINGELL ON FILING OF THE NATURAL GAS CONFERENCE REPORT (H.R. 5289)

(Mr. DINGELL asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

Mr. DINGELL. Mr. Speaker, during the hiatus since the conference report on natural gas was filed in the Senate, a number of questions have arisen regarding the meaning of certain sections. Therefore, Representatives STAGGERS, ASHLEY, ECKHARDT, and WILSON of Texas have joined with me in preparing a comprehensive explanatory statement addressing these questions. I am placing this expression of the intent of the Managers on behalf of the House regarding the meaning of these sections in the CONGRESSIONAL RECORD as the conference report is filed in the House. It is our hope that this statement will assist Members of the House during their consideration of this most important legislation. The explanatory statement follows:

EXPLANATORY STATEMENT

DEFINITION OF NATURAL GAS

The bill defines the term "natural gas" identically to the Natural Gas Act definition in order to assure proper coordination between these related pieces of legislation. However, one aspect of the definition requires further explanation. Under the Natural Gas Act definition of "natural gas", artificial gas is not "natural gas" but a commingled stream of naturally produced gas and artificial gas is. One purpose of utilizing the Natural Gas Act definition was to prevent circumvention of the ceiling price rules by the simple expedient of commingling small quantities of artificial gas with naturally produced gas. If the definition of natural gas did not apply to such a commingled stream, a question could arise as to whether the ceiling prices of the bill applied to the sale of naturally produced gas contained in the commingled stream. Moreover if no sale of the naturally produced gas occurred prior to the commingling, a question could arise regarding the applicability of the bill at all. Furthermore, if the gas were sold in intrastate commerce, the just and reasonable standard of the Natural Gas Act would not apply, and circumvention of the bill might indeed succeed. The definition utilized in the bill prevents such a result.

One possible side effect of the use of this definition should be discussed in order that an unintended consequence not result. The use of the Natural Gas Act definition of "natural gas" assures that the bill's ceiling prices will not apply to sales of artificial natural gas not mixed with naturally produced gas. However, the question arises whether the ceiling prices will apply to the "first sale" of the mixture of artificial gas and naturally produced gas. It was not intended that the bill's ceiling prices, which are generally applicable to field sales, should be broadened to cover pipeline sales solely because the pipeline made bona fide purchases of artificial gas and commingled it with naturally produced gas purchased in the field. (The foregoing is in no way intended as a limitation upon FERC's authority under section 2(21)(A)(v).) Rather, application of the exclusion of section 2(21)(B) from the definition of the term "first sale" appears to indicate that any such unintended consequence will not arise. If a ceiling price did extend to the "first sale" of such a commingled stream, and assuming of course that no circumvention of ceiling prices is involved, FERC can deal with the matter through its flexible high-cost gas pricing authority and, to a somewhat lesser degree, through its discretionary authority to grant ceiling price adjustments under section 110. Even more directly, FERC can deal with this matter through its application of the definition of the term "first sale" so as to be consistent with the intent of the conferees.

SOUTHLAND PROVISIONS

Section 2(18)(B)(iii) establishes an exemption from the definition of the term "committed or dedicated" which is used throughout the bill. The purpose of this provision is to deal with issues raised by the Supreme Court's decision in *California* v. *Southland Royalty Co.*, decided May 31, 1978.

The potential for extension of the holding of the *Southland* case has cast a cloud of uncertainty over the question whether natural gas production is interstate or intrastate in character. This in turn may hamper financing of new natural gas wells and cause disruption of gas supplies to intrastate natural gas consumers.

This legislation is intended to substitute a uniform natural gas pricing policy for the bifurcated system of regulation under the Natural Gas Act. The legislation seeks to encourage expanded exploration for, and development of, the Nation's natural gas resources and provide reliable supplies of gas to both interstate and intrastate markets. These objectives would be frustrated if the uncertainties created by the *Southland* case were not addressed.

Section 2(18)(B)(iii), in conjunction with the provisions of titles I and VI, especially sections 104, 105, and 601(a)(1)(A), prospectively resolve the question of the status of natural gas production. These provisions are intended to remove the cloud of uncertainty which would influence future investment decisions, hamper development of the Nation's natural gas resources, and impair the continuity of natural gas supplies to intrastate markets.

Recently some question has arisen respecting the scope of the bill's language dealing with *Southland*. It has been accurately pointed out that the bill's provisions are prospective only in their application and do not directly address the question of civil penalties, criminal prosecutions, and obligations for pay back for violations of the Natural Gas Act occurring prior to date of enactment. This has raised concerns that too much uncertainty remains. These concerns are unfounded for several reasons.

First, no civil penalty authority of any form exists under the Natural Gas Act.

Second, criminal sanctions under the Natural Gas Act may only be imposed for knowing and willful violations. It is generally acknowledged that, prior to the *Southland* decision, producers did not normally regard their gas as dedicated to interstate commerce by the action of an earlier lessee whose lease had terminated. Thus, as both a practical and legal matter it is hard to conceive of instances in which the fact situations affected by an extension of the *Southland* decision could give rise to criminal penalties under the knowng and willful standard of the Natural Gas Act.

Third, the unavailability of the data respecting past dedications of gas to interstate commerce, which gives rise to the *Southland* problems, will as a practical matter also limit the ability of the Federal Energy Regulatory Commission to prove past violations of the Natural Gas Act. This very point has been conceded by FERC Chairman Curtis as confronting the Commission with "difficult policy choices in determining whether to allocate significant staff resources to search out and bring enforcement and remedial actions . . . in these cases."

Moreover, one further point should be considered. While the *Southland* provisions of this legislation prospectively immunize producers from enforcement actions brought under the Natural Gas Act based upon an extension of the principles of the *Southland* case, additional flexibility was needed respecting enforcement of past violations of requirements of the Natural Gas Act, for example in cases where the producer who had commenced deliveries of gas to interstate commerce diverted that gas to intrastate commerce. A Federal enforcement policy directed towards recovering a payback of natural gas volumes in conjectural circumstances (especially where it is clear the producer acted in good faith and without knowledge or notice that his gas might be regarded as dedicated due to the action of an earlier lessee under an expired lease) could frustrate the objectives of this bill. Producers faced with possible payback exposure would not be free to reinvest in new drilling activities the revenues derived from sales of historically intrastate gas. If this traditional financing mechanism is eliminated or seriously impaired, the supply objectives of this bill cannot hope to be achieved. Sudden supply disruptions in the intrastate market which could result from such an enforcement policy would also be inconsistent with the objectives of the legislation. With respect to past violations of the Natural Gas Act, it is appropriate that enforcement be accomplished through development of judicious enforcement policies by the Federal Energy Regulatory Commission in consideration of the objectives of the Natural Gas Policy Act. If FERC were to fail to consider the policy objectives of the Natural Gas Policy Act in its administration of related provisions of the Natural Gas Act, the Commission would not be carrying out its responsibilities under the Natural Gas Policy Act. The FERC will certainly bear these considerations in mind as it develops a policy of enforcement of the Natural Gas Act consistent with implementation of the Natural Gas Policy Act of 1978.

In addition, technical questions regarding the details of section 2(18)(B)(iii) have also arisen. Questions exist regarding the relationship between the terms "reversion" and "successor-in-interest".

The term "successor in interest" is intended to include any heir or assignee of a mineral interest of the person whose actions caused the commitment or dedication of the gas to interstate commerce. The term "successor in interest" is also intended to include a holder of a right to explore for, de-

velop, produce or sell natural gas under a farm-out arrangement with the person whose actions caused the commitment or dedication of the gas to interstate commerce.

However, as indicated on page 71 of the Statement of Managers, the term "successor in interest" excludes "any interest owner who acquires his right pursuant to the reversion or any other termination of a natural gas leasehold interest, or any subsequent grantee of such interest owner who acquires his interest after the date of such reversion or other termination." Thus the term "reversion", as utilized in section 2(18)(B)(iii) is intended to include any process by which a natural gas leasehold interest or part thereof terminates and the lessee loses the right to explore for, develop, produce or sell natural gas from the acreage formerly covered by such lease or part thereof. Such processes include termination by voluntary release, by a judicial cancellation decree, or under the provision of a lease which require termination if production is not established or if production is not maintained in paying quantities.

Thus, the successor in interest chain is intended to be broken upon reversion of the leasehold interest to the landowner. The term would then not apply to either the landowner, or a subsequent lessee who is not affiliated with the person by whose action the gas was dedicated to interstate commerce.

A technical question has arisen respecting the reason for applying the limitation "other than by means of any reversion of a leasehold interest" to the term "including any successor in interest" in the parenthetical modification of the term "person" used in section 2(18)(B)(iii). To understand the reason for this construction, it must be recognized that the "person" referred to in subclause (I) of clause (iii) is the same "person" previously referred to in clause (iii).

Therefore, if a lessee has dedicated gas to interstate commerce and a successor to the leasehold interest of that person has the right to produce natural gas on May 31, 1978, the exception set forth in clause (iii) would not apply to the definition of committed or dedicated under section 2(18)(A). However, it was not intended that a landowner who has leased mineral interests should be considered a "successor in interest" upon expiration or reversion of the leasehold. Because state property law governs the status of the reversion of any leasehold interest, the conferees provided for the exclusionary language in question to assure that the landowner would not be considered a "successor in interest" under federal law even if there were not a merger of the leasehold interest with the underlying fee interest upon termination or reversion of the leasehold. Otherwise it was considered possible that under some state law a lessor-landowner might have been deemed to be a successor to the interest of his own lessee following termination of the lease. This was not intended to be the case for purposes of federal law. Finally, the exclusionary limitation "other than by means of any reversion of a leasehold interest" applies solely to the term "including any successor in interest" and is not an exclusion of lessors, who regain the mineral interests through reversion of a mineral lease, from the term "person". Clearly, if a person reacquired mineral rights through a reversion and thereafter dedicated the gas to interstate commerce, the exception set forth in clause (iii) would be inapplicable if that person, or any successor in interest of that person, had the right to produce the gas on May 31, 1978.

Some questions have also arisen concerning the meaning of the term "sold in interstate commerce" in section 2(18)(B)(iii)(II). This clause is intended to be based on the actual sale of gas in interstate commerce. Thus a contract and a certificate of public convenience and necessity authorizing the sale of gas that may be produced from a lease do not alone constitute natural gas being "sold in interstate commerce". The question is a factual one based upon whether actual sales of natural gas in interstate commerce had commenced and were ongoing on May 31, 1978. It should also be noted that gas being sold on May 31, 1978, within the meaning of section 2(18)(B)(iii)(II), may, in certain cases, include gas which was sold before and after May 31, 1978, but not on May 31, 1978, itself. For example, if gas were contracted for interstate sale before May 31 1978, and deliveries commenced before May 31, 1978, and continued after May 31, 1978, with routine breaks in deliveries due to normal operational factors, including a break on the specific day of May 31, 1978, the gas was "being sold" in interstate commerce on May 31, 1978, although no "sale" occurred on that date.

The application of section 2(18) to natural gas subject to an option is the subject of other inquiries. Basically the resolution of this question depends upon the construction and legal effect of the "option". If the option is in the nature of a contractual obligation binding the producer to sell the gas to an interstate purchaser, it would appear that by its terms section 2(18) would apply to the gas. If not, section 2(18) might not apply. In either event, the question is largely academic since under section 601(a)(1)(B) nonprice regulation over the gas under the Natural Gas Act is terminated if the gas is new gas, high-cost gas, or produced from a new, onshore production well. In almost every case, the new gas or new, onshore production well category will apply. In such cases, the only non-price regulation which would remain applicable would be the regulatory requirements imposed under section 315. The requirements of that section are far less burdensome than the certification, rate filing, and abandonment requirements of the Natural Gas Act.

DEFINITION OF NEW LEASE

The term "new lease" when used with respect to the Outer Continental Shelf is defined as "a lease, entered into on or after April 20, 1977, of submerged acreage." The question has arisen whether a lease issued after April 20, 1977, of previously leased OCS acreage, with respect to which a prior lease has expired, can qualify as a new lease. Under the definition such a lease is a new lease. In fact the Conference Report does not include a limitation contained in the definition in the House bill which would have excluded a subsequent lease of previously leased acreage from qualifying as a new lease. The limitation of the House bill was deleted in the belief that the recently enacted revision of the OCS laws is adequate to prevent abuses. The conferees anticipated that by regulating bidder eligibility and obtaining all relevant geological and geophysical data regarding the leased acreage from the original lessee, USGS can prevent abuses arising from efforts to achieve a price advantage by returning acreage to the government as unproductive and thereafter requiring drilling rights if the acreage is substantially re-offered for lease.

Other federal statutes, including the antitrust laws, racketeering statutes, and mail fraud provisions of the criminal code, provide additional protections against collusion by potential bidders seeking to obtain a price advantage by converting old OCS leases to new lease status. One additional point should be made in connection with the definition of the term "new lease". When the Conference Report utilized the term "lease", the conferees were referring to a lease issued by the Secretary of the Interior and not a sublease or farm out under that primary lease. Only new OCS leases directly with the U.S. government were intended to qualify for new gas treatment.

SECTION 101

Questions have arisen regarding the meaning of section 101(b)(5). This rule is intended to facilitate resolution of which ceiling price may apply if more than one ceiling price rule appears applicable. Whichever ceiling price could result in the highest price is the applicable maximum lawful price. Of course this does not impose upon either the FERC or any state agency an affirmative obligation to identify which of several potential classifications should apply. It is up to the producer to apply for whatever designation he determines is most likely to be of greatest benefit to him (in most cases that will be the designation which also yields the highest price). If the state agency determines (and is not reversed by FERC) that the producer's gas satisfies the statutory requirements applicable to the category for which designation was sought, the producer may then charge up to the statutory maximum lawful price applicable to the category. It may also be possible for FERC and state agency implementing rules to permit a producer to seek and obtain more than one designation. Thus, a producer might be permitted to apply for both new, onshore production well status and new gas status. Assuming that the former will be relatively easy for the producer to demonstrate, and for the state agency to determine, satisfaction of the statutory requirements, such dual filing could permit the producer to collect the section 103 price applicable to gas produced from new, onshore production wells pending resolution of perhaps more difficult issues associated with the new gas determination. Another way in which the dual determination requests could be appropriate would be in cases in which one determination would yield a short term benefit, while another a long term advantage. Such could be the case where a new well produces new gas and also qualifies as a stripper well.

A single proceeding to determine qualification for both designations would permit the producer to obtain stripper well pricing under section 108 prior to January 1, 1985, and deregulation as new gas thereafter. In the long run a single state proceeding might present less administrative burdens than a subsequent proceeding in which a classification not previously requested is sought. However, FERC is in the best position to determine whether administrative and enforcement difficulties would be presented by applications for, and approval of, multiple designations. Therefore this issue is one which FERC will certainly address as part of its implementing regulations.

Section 101(b)(9) sets forth the relationship between the ceiling prices established under the bill and contract terms. Questions have arisen regarding the application of section 101(b)(9) to sections 104 and 105. It is especially important, in terms of the transition from the present system to the national market established under this bill, that producers be able to continue their deliveries of gas to interstate and intrastate customers. Therefore the relationship between the bill and existing contractual arrangements covered by these sections is an important one. The rule set forth in section 101(b)(9) is that the legislation establishes *ceiling* prices. Contract prices may be lower than the federal maximum lawful price. In such cases the contractual arrangement between the parties continues to govern their relationship and is not superseded by the federal ceiling prices. Thus contract prices are superseded only in those instances in which the ceiling price is less than the contract price.

The FERC is intended to play an enforcement role with respect to the ceiling prices, not with respect to enforcement of private contracts *per se*. FERC has no direct enforcement duties under section 101(b)(9) since the provision merely sets forth a rule of construction and does not, in and of itself, establish any requirements or ceiling prices. Of course, in some cases, for example under section 105, the statutory ceiling prices and con-

tract prices will coincide. In those cases FERC's enforcement responsibilities under this legislation may require an inquiry regarding the meaning of contractual provisions. This inquiry is essential if FERC is to enforce the ceiling price where that price is based upon a contract between private parties. Nevertheless, it is contemplated that FERC's implementation of the bill will be accomplished with minimal interference with contractual relationships.

In particular, enactment of this legislation does not mean that sales of gas covered by sections 104 and 105 must terminate until FERC acts to authorize continued deliveries. Nor does enactment of the legislation mean that sales under existing intrastate contracts at prices higher than that provided in section 109 ($1.45 as of April 1977) will be rolled back to this level through the operation of section 503(e) until an FERC determination is made. It is contemplated that sales subject to these sections will continue without interruption. FERC can adequately fulfill its administrative and enforcement responsibilities by mechanisms other than certification prior to commencement of deliveries.

SECTION 102

There has been some discussion whether "new reservoirs" on "old OCS leases" in the Baltimore Canyon would be deregulated under the Natural Gas Policy Act. "New reservoirs" (reservoirs discovered on or after July 27, 1976) on "old OCS leases" (leases entered into before April 20, 1977) would qualify for the new gas ceiling price under section 102(d). However, such gas would not be deregulated for pricing or non-pricing purposes.

On the other hand, "new gas", that is, gas produced from a "new lease" as defined under section 102(c), would be deregulated for pricing purposes under section 121(a)(1) as of January 1, 1985. This category of gas would also be deregulated for non-pricing purposes under section 601(a)(1)(B)(ii), effective as of the first day of the first month beginning after date of enactment.

SECTION 104

Section 104 establishes the ceiling price mechanisms applicable to natural gas dedicated to interstate commerce prior to enactment of the bill and for which a just and reasonable rate had been established under the Natural Gas Act. The applicable just and reasonable rate in effect in April 1977 is referenced as the base price to which the inflation adjustment factor is applied to yield the maximum lawful price in any future month.

The just and reasonable rate under FPC Opinion 770–A applicable to wells spudded on or after January 1, 1975, includes a $.01 escalator each calendar quarter. Moreover, technically speaking, Opinion 770–A establishes a just and reasonable rate of $1.62 per Mcf for this vintage. The $1.42 per Mcf price most commonly referred to is merely the base rate allowed under the decision discounted to its then present value. The $.01 per quarter escalator is designed to yield an average $1.62 per Mcf rate over the projected life of the average reservoir.

Accordingly, a question has arisen whether the just and reasonable rate referenced in section 104(b)(1)(A)(i) is to include the $.01 quarterly adjustment in the inflation adjustment under section 104(b)(1)(A)(ii). The answer is an emphatic NO. The conferees did not intend a double dip. The "just and reasonable rate . . . applicable . . . on April 20, 1977" is intended to incorporate by reference the $1.45 per Mcf price permitted in April 1977. This price is to be adjusted thereafter *only* pursuant to the inflation adjustment provided in section 104(b)(1)(A)(ii). (Moreover, lest there be any doubt, the conferees did *not* intend the reference to be to the $1.62 price either.) That the conferees intended to reference the $1.45 per Mcf price is supported by the construction of section 109, wherein the $1.45 price is set forth. Section 104 deals with area rates, national rates of several vintages, and special relief pricing. Therefore it was not possible or practical to specify each rate. Incorporation by reference was required. In the case of section 109, a specific rate was possible and the rate selected was the just and reasonable rate under Opinion 770–A applicable on April 20, 1977, *i.e.*, $1.45 per Mcf. This assured that these sections would be consistent with one another.

A question has arisen respecting the pricing of interstate gas, presently subject to contract, including a warranty contract, at a price lower than the just and reasonable rate presently applicable to the gas, following expiration of that contract. As the preceding paragraphs indicate, sections 104 and 106 would be applicable. Under section 101(b)(5), the section yielding the higher price would establish the maximum lawful price. If a contract is being satisfied with gas produced from wells of a vintage for which a higher just and reasonable rate has been established by the Commission, that just and reasonable rate is referenced as the basis for the maximum lawful price under section 104.

Moreover, once the existing contract no longer limits the price (see section 101(b)(9)), the producer could change and the purchaser could pay any amount up to the maximum lawful price which, under both sections 104 and 106, would be based upon the just and reasonable rate which, but for enactment of this legislation, would have been applicable. The exceptions to this rule are where the gas would qualify for price treatment as new natural gas, gas produced from a new, onshore production well, high-cost natural gas, or gas produced from a stripper well. In such cases the maximum lawful price would be established by sections 102, 103, 107 or 108, respectively.

SECTION 105

Another question has arisen relating to contract terms. Under section 105, a distinction is made for ceiling price purposes between, on the one hand, contracts under which the price paid for deliveries of gas on the date of enactment is greater than the new gas ceiling price on that date under section 102 and, on the other hand, contracts under which the price paid for deliveries of gas on the date is less than the new gas ceiling price.

The ceiling price mechanism under section 105(b)(1) is based upon "the terms of the existing contract . . . in effect on [date of enactment]". This phrase must be distinguished from the phrase "contract price" used in section 105(b)(2). The latter is date specific, referring to the price paid under the contract for gas deliveries on date of enactment. The phrase "the price under the terms of the . . . contract" used in section 105(b)(1) refers to the contract schedule of prices or contract mechanism for establishing prices over time. This schedule or mechanism is given effect with the single limitation that the price so established may not exceed the new gas ceiling price established under section 102. The contract price terms in effect on date of enactment would then be honored up to the new gas ceiling price.

The ceiling price mechanism under section 105(b)(2) is based upon the "contract price" on date of enactment. The "contract price" as used in this paragraph is defined in section 105(c) as the price paid under a contract for deliveries on that date. The annual inflation adjustment factor is applied to this base price to establish ceiling prices for future months. These ceiling prices supersede any future higher price which might be established under the contract. However, the new gas ceiling price under section 102, which is utilized as a ceiling price cap under section 105(b)(1), contains a more rapid price escalator than the annual inflation adjustment factor utilized in section 105(b)(2). Therefore, provision is made in section 105(b)(2) to switch from a ceiling price mechanism based upon the contract price on date of enactment (escalated only by the annual inflation adjustment factor) to a ceiling price mechanism based upon the new gas ceiling price, when the ceiling price under the latter mechanism exceeds the ceiling price under the former mechanism.

While on the subject of section 105, it should be noted that the limitation on the operation of indefinite price escalator clauses under section 105(b)(3) does not take effect until January 1, 1985. Neither subparagraph (A) nor subparagraph (C) of section 105(b)(3) is effective until 1985 and the limitation set forth in subparagraph (C) of section 105(b)(3) is applicable solely for purposes of subparagraph (A) of section 105(b)(3). Section 105(b)(3) was included to limit the impact of deregulation in 1985 of intrastate contracts in existence on date of enactment. The conferees were concerned that, following deregulation, the operation of indefinite price escalator clauses, in existence on May 3, 1978, and contained in certain existing intrastate contracts, could operate to increase rapidly intrastate gas prices following deregulation. Section 105(b)(3)(A) puts a lid on that escalation. Subparagraph (C) of section 105(b)(3) was included solely to prevent modification in the operation of existing intrastate contracts containing such clauses on May 3, 1978, if the modification, by amendment or otherwise, would result in prices exceeding the limitation set forth in section 105(b)(3)(A). In such cases, the modification is to be disregarded and section 105(b)(3)(A) would limit the prices which could be charged under the indefinite price escalator clause of the contract in the same manner as if the modification had not occurred. Section 105(b)(3)(C) does not limit, or authorize FERC to limit, the future use of indefinite price escalators in new contracts. Under section 105(b) indefinite price escalators contained in an existing intrastate contract on date of enactment are to be given effect, up to the limitations set forth in sections 105(b)(1) and 105(b)(2). Indefinite price escalator clauses added to existing contracts after date of enactment may not affect the application of section 105(b) since under that section it is the terms of the contract in effect on date of enactment which govern. If the indefinite price escalator clause is contained in an existing intrastate contract on date of enactment, but was not contained in the contract on May 3, 1978, the limitation of section 105(b)(3)(A) would apply after 1984 but section 105(b)(3)(C) would be inapplicable.

SECTION 106

With respect to implementation of section 106, which, like sections 104 and 105, does not require any state agency determination under section 503, it was similarly intended that FERC's implementation of the requirements of the legislation not be burdensome. In particular, it was intended that section 106 should be implemented with minimal interference in the contractual relationships which exist at the time of rollover. To the extent similar situations exist, the principles which the conferees intended should guide FERC in implementation of sections 104 and 105 were intended to be applicable to implementation of section 106 as well.

Section 106(a) broadens the definition of the term "rollover contract", only for purposes of subsection (a), to include any contract which would have been a rollover contract but for the fact that the expiration of the previous contract occurred prior to enactment. Of course the generally applicable definition of a "rollover contract" is set forth in section 2(12) and limits the phrase to contracts which succeed a contract which expires on or *after* enactment of the bill. The broadening language of section 106(a) is merely a drafting device designed to avoid an anomaly which would otherwise occur.

For example, but for the expressed applicability of section 106(a) to interstate contracts which expired before enactment, any succeeding contract entered into after enactment would be held to the $.295 per Mcf rate for flowing gas, adjusted only for inflation under section 104. Since producers would be entitled to $.54 per Mcf rate under existing FERC regulations upon negotiation of a new contract, such a result would have been anomalous.

In determining the maximum lawful price applicable to an interstate rollover contract, it might appear that a potential for a price rollback exists under section 106(a). The provisions of section 104 provide for an escalation of the just and reasonable rate with inflation. At the time of rollover, the maximum lawful price determined under section 106(a) would be the applicable just and reasonable rate at the time of rollover (assuming that rate exceeds $.54 plus inflation). If the just and reasonable rate established by the Commission has escalated at a slower rate than inflation, the initial price for the rollover contract under section 106(a) would be lower than the maximum lawful price applicable to the expiring contract under section 104.

This apparent price rollback anomaly is avoided by the road application of section 104. Section 104 is not limited to existing contracts and successors to existing contracts but is applicable to any interstate gas for which a just and reasonable rate exists. Therefore, section 104 can apply to interstate rollover contracts as well. In contrast, section 105 is limited in application to existing intrastate contracts and successors to existing intrastate contracts. Prices for rollovers of existing intrastate contracts are determined exclusively by section 106(b). Thus price determinations for interstate rollovers can be made under section 104 or section 106(a). Therefore, if, at the time of rollover, section 106(a) would result in a price rollback, section 104 remains applicable (in accordance with section 101(b)(5)) and no rollback occurs.

SECTION 108

In section 108, the term "non-associated" gas is utilized. The conferees did not anticipate that this would be a burdensome standard for FERC to apply. State agency rules of thumb in this area may, especially at the outset, prove to be of valuable assistance to FERC. For example, in Texas a gas well is defined as one which produces at least 100 Mcf of gas per barrel of condensate or crude oil. A well with a greater ratio of oil to gas is classified as an oil well and the associated gas production is denominated casinghead gas. The Statement of Managers explains that *de minimis* amounts of oil production are not intended to disqualify gas from being deemed by FERC to be non-associated gas. Thus, coordination of the federal definition of "non-associated" gas with parallel concepts embodied in existing state regulatory practices could facilitate the initial implementation of the bill. If evidence gained from experience indicates a need for modification, FERC could then depart from existing state practices as it determines appropriate.

The intention of the conferees to respect and rely upon state agency determinations in areas of their historical expertise is demonstrated by the reference in section 108(b)(3)(A)(ii) to conservation practices "recognized or approved by the state agency having jurisdiction over the production of natural gas".

Section 108 also refers to "recognized enhanced recovery techniques". It was the intent of the conferees that, in giving definition to these terms under section 501, FERC should look to state agency recognition of certain techniques as enhanced recovery techniques for guidance.

SECTION 110

With respect to section 110, it has been correctly observed that the authority to permit adjustments is discretionary. However, by authorizing discretionary adjustments the conferees did not intend to authorize a refusal to grant appropriate allowances where such refusal would be an abuse of discretion. Thus, if the function performed is not usually performed by the producer without provision being made for compensation over and above the amount paid for the gas, prevailing industry practice may guide FERC to approve ceiling price adjustments which the Commission determines appropriate and consistent with the purposes of the legislation. For example, if the producer undertakes to compress the gas to pipeline pressure, and if an allowance is customarily made by the pipeline for such compression, the conferees anticipated that FERC would consider approval of an appropriate allowance under section 110. However administrative flexibility was deemed important. Therefore it was also intended that FERC could selectively focus on the areas which appear appropriate for approval of adjustments under section 110 in such a manner that the implementation of the section would not become administratively burdensome.

SECTION 311

Section 311 authorizes sales by intrastate pipelines to interstate pipelines or local distribution companies. A question of interpretation is presented by the language of sections 311(b)(2)(C) and 311(b)(7)(B). In section 311(b)(2)(C), FERC is required to permit an adjustment to the maximum fair and equitable price permitted to be charged by the intrastate pipeline so as to increase the revenue derived from the sale to offset certain added costs incurred by the intrastate pipeline in order to make the sale. These added costs must result from an increase in the intrastate pipeline's weighted average acquisition cost of gas due to the purchase of the volumes resold in the transaction authorized under section 311. On the other hand, under section 311(b)(7)(B), FERC is required to disapprove any application for an authorization of a sale under the section if FERC determines that the sale would involve natural gas "acquired solely or primarily" for the purpose of resale under the section. The Statement of Managers, at page 107, gives an illustration of what is intended by section 311(b)(2)(C). Thus, it is intended that intrastate pipelines, which have existing contracts or negotiate contracts containing provisions either for take-or-pay volumes or for higher volumes (than are currently being taken) to be available upon demand, should be allowed to take these volumes under the terms of the contract if the terms were negotiated without regard to the possibility of disposing of the additional volumes through sales authorized under section 311(b). This is consistent with section 311(b)(7) since FERC could make a determination that these volumes were not acquired "solely or primarily" for the purpose of resale under section 311(b). Another distinction that may be useful in applying sections 311(b)(2)(C) and 311(b)(7)(B) is that section 311(b)(2)(C) deals with the price effect of increased deliveries necessary to carry out a sale under section 311(b), while section 311(b)(7)(B) deals with the purpose for contracting for gas supplies.

Section 311(b) gives FERC authority to authorize intrastate pipelines to sell natural gas to interstate pipelines and local distribution companies under certain conditions. Section 311(2)(A) provides that the selling pipeline's price shall not exceed the sum of its weighted average acquisition cost of natural gas plus two additional adjustments. In some cases, the selling intrastate pipeline company owns or controls several pipeline systems which are not interconnected and gas from these systems is not commingled. The question has arisen as to whether FERC could permit the selling company to sell gas from such separate and distinct pipeline systems at the weighted average acquisition cost of the separate system from which the gas is actually sold.

The authority of section 311 is broad and is supplemented by the general rulemaking powers vested in the Commission in section 501 of the Act. It is anticipated that this authority, in conjunction with the authority to define terms used in the legislation, will afford FERC substantial discretion with respect to the implementation of section 311 in particular cases. Therefore, FERC could make such a determination with respect to the treatment of weighted average acquisition costs.

SECTION 315

Questions have arisen respecting the implementation of section 315. This section was included principally to assure a degree of continuity of gas supplies to the interstate system despite non-price deregulation of certain categories of gas, including new gas, previously dedicated to interstate commerce. Pipeline investments and commitments to users have been predicated upon the volume of dedicated gas, not merely on the volume of presently flowing gas. It has been correctly observed that, in conjunction with the Commission's authority under sections 501 and 503, section 515 provides a mechanism to protect the security of present interstate pipeline supplies. A concern has been expressed, however, that these authorities could be used by the Federal Energy Regulatory Commission to apply non-price requirements to sales of intrastate gas to the same degree that such requirements are applied to sales of gas previously dedicated to interstate commerce. This construction would go far beyond the purpose of section 315. The non-price regulatory powers exclusively over previously dedicated gas given the Commission under section 315 were not intended to authorize the imposition of non-price conditions on sales of previously intrastate gas by applying to such sales the same non-price conditions authorized under section 315 for dedicated interstate gas. The Commission's authority to impose non-price regulatory requirements under section 315 on intrastate gas is limited to prescribing minimum contract duration under section 315(a) and requiring the filing of contracts and ancillary agreements under section 315(c). Of course, the Commission's authority over price related matters is not so limited.

Although the provisions of section 315(b) are intended to provide mechanisms to assure continuity of adequate supplies of previously dedicated gas to interstate pipelines, the provisions of section 315(b) do not apply to gas produced from the OCS which was not dedicated to interstate commerce under the Natural Gas Act prior to enactment. Of course, the Commission's authority over price related matters is not so limited. Some concern has been expressed that consequently FERC will be unable to assure continued deliveries of gas produced from the OCS. This concern is not well founded for two reasons. First, under this bill, FERC can prescribe the minimum contract duration. Second, FERC retains its transportation certification authority under section 7 of the Natural Gas Act. That authority was relied upon by both FERC and its predecessor, the FPC, to impose a wide range of conditions upon the transportation of gas in interstate commerce. This authority remains intact, a point underscored by the Statement of Managers language on page 111.

SECTION 503

A question has arisen respecting section 503(e), relating to interim collection of rates. Typographical, printing and other tech-

nical errors will be corrected in the concurrent resolution. Section 503(e)(1)(B)(ii) is intended to require the filing for a determination of eligibility within 90 days after date of enactment or, if later, before any collection is made. The seller is authorized to make initial collection of the section 109 maximum lawful price provided that the requirements of section 503(e)(1)(B) have been satisfied. The refund requirement of section 503(e)(3)(B) is intended to apply to any funds collected in excess of the maximum lawful price for which the gas qualifies.

In addition, a number of questions have arisen regarding the relationship between FERC and the state agencies to which significant responsibility is entrusted under section 503. It must be acknowledged that cooperation between the Commission and state regulatory agencies will be essential to the successful implementation of the bill. It may be anticipated that the state agencies with specialized expertise and years of practical experience in related forms of regulation can and will properly discharge their responsibilities. Unnecessary federal interference with state agencies could undermine the cooperative spirit necessary for implementation of the bill and commencement of the rationalization of the Nation's natural gas pricing policy. It is the intention of the conferees that FERC implement the bill with an awareness of this fact.

Moreover, cooperation between FERC and state regulatory agencies may greatly simplify FERC's task of implementing the bill. For example, recognition of state agency practices in applying the technical concept of true vertical depth, could minimize interference with present industry practices, avoid wasteful expenditures and facilitate attainment of the objectives of the legislation. Absolute certainty in this area is not required (and may not be possible). Substantial evidence of depth will suffice. The legislation is flexible enough to enable FERC to determine that certain evidence, although not conclusive of depth due to normal, allowable deviations from the vertical occurring during drilling is adequate for a determination under section 503 to be based upon it.

Similarly, with respect to determining whether production in commercial quantities has occurred, the implementation of the bill could be simple or very complex, depending upon the degree of federal-state cooperation. A rebuttable presumption is established under section 101(b)(2) that, if the gas was not sold, production did not occur in commercial quantities. However, this presumption could be rebutted, for example, through a showing that the gas was produced but not sold because it was used by the producer for a nonfield use, e.g., to fuel a crude oil refinery or petrochemical plant. A corollary rule, drawn from state regulatory practices could simplify determinations where the gas has been sold. The bill does not contemplate that a profitability inquiry would be required to determine whether gas was produced in commercial quantities from each of the 250,000 potential marker wells in Texas alone. Instead, at least for purposes of establishing on a prima facie basis that a well must be considered to be a marker well, state regulatory practices could be relied upon. On that basis, evidence of the sale of the gas and payment of severance tax thereon would suffice, absent evidence to the contrary, to show prior commercial production.

The legislation does not contemplate that FERC will intrude into the traditional conservation functions performed by the states. This is a matter reserved to the state agencies who, in the exercise of their historical powers, will continue to regulate such matters as drilling locations, completion techniques, production rates, etc. Of course, the Secretary of Energy is authorized under section 505 to intervene as a matter of right in state prorationing proceedings. This intervention authority, however, does not grant the Secretary any substantive powers or displace any state authority.

SECTION 504

Section 504(b) lists various types of civil enforcement actions which may be instituted by the FERC. With respect to certain of these actions, section 504(b) specifically provides that the FERC may initiate enforcement action in the U.S. District Court for the District of Columbia, among others. With respect to other enforcement actions, however, there is no specific reference to the U.S. District Court for the District of Columbia. While it is appropriate that the FERC have the specific option to initiate certain enforcement actions in the U.S. District Court for the District of Columbia, the lack of a specific reference to such court should not be construed to mean that the FERC would be *precluded* from initiating action in that forum. Subject to the normal rules of venue, the U.S. District Court for the District of Columbia may be an appropriate court for the initiation of any enforcement action.

With respect to the standard of culpability required for criminal prosecution under the Natural Gas Policy Act, a question has arisen as to the meaning of the term "willfully" in section 504(c). As noted on page 122 of the Joint Statement of Managers, it is intended that the phrase have the same meaning as in section 21 of the Natural Gas Act. Accordingly, the term "willfully" does not imply that the accused must have had a bad or evil purpose; rather, it means that the accused acted intentionally, voluntarily, or with a careless disregard or indifference to statutory obligations. Earlier debate in the Senate which seemed to imply a higher standard of culpability, such as that at page 29660 of the *Congressional Record* was directed to the intentional nature of the conduct and should be read in that context.

SECTION 506

Section 506(a)(1) contains technical errors which are intended to be corrected by concurrent resolution before the legislation is signed into law. Among other things, section 506(a)(1) does not now reflect the separate judicial review procedures established under section 503. Section 506(a)(1) should be corrected to read "(other than a final decision by the Commission under section 503(b)(1) which is reviewable under section 503(b)(4), any order assessing a civil penalty under section 504(b)(6), or any order under sections 302 or 303)." This correction is in accord with the intent expressed in the Joint Statement of Managers as pages 118–119.

The judicial review requirements of section 503(b) are intended to be distinct from the judicial review provisions set forth in section 506. Accordingly, section 503(c)(4) specifically provides that judicial review of section 503 determinations is to be available only under the provisions of section 503(b).

LEAVE OF ABSENCE

By unanimous consent, leave of absence was granted as follows:

To Mr. WHITE (at the request of Mr. WRIGHT), for today, on account of official business.

To Mr. GONZALEZ (at the request of Mr. WRIGHT), for today until 7:30 p.m., on account of illness in the family.

SPECIAL ORDERS GRANTED

By unanimous consent, permission to address the House, following the legislative program and any special orders heretofore entered, was granted to:

Mr. BOLLING, for 10 minutes today, and to include extraneous matter.

(The following Members (at the request of Mr. LIVINGSTON) to revise and extend their remarks and include extraneous material:)

Mr. GRASSLEY, for 20 minutes, today.
Mr. QUILLEN, for 5 minutes, today.
Mr. BAUMAN, for 30 minutes, today.
Mr. COLLINS of Texas, for 30 minutes, today.
Mr. GOLDWATER, for 5 minutes, today.
Mr. GREEN, for 5 minutes, today.

(The following Members (at the request of Mr. PANETTA) to revise and extend their remarks and to include extraneous material:)

Mrs. MEYNER, for 5 minutes, today.
Mr. ANNUNZIO, for 5 minutes, today.
Mr. GONZALEZ, for 5 minutes, today.
Mr. DIGGS, for 5 minutes, today.
Mr. FASCELL, for 5 minutes, today.
Mr. WEISS, for 5 minutes, today.
Mr. OTTINGER, for 5 minutes, today.
Mr. ALEXANDER, for 30 minutes, today.
Mr. HANLEY, for 5 minutes, today.
Mr. REUSS, for 20 minutes, today.
Mr. COTTER, for 5 minutes, today.
Mr. DAVIS, for 5 minutes, today.
Mr. ZABLOCKI, for 10 minutes, today.
Mr. LAFALCE, for 10 minutes, today.
Mr. CARR, for 5 minutes, today.
Mr. DAVIS, for 60 minutes, October 13.
Mr. BEVILL, for 60 minutes, October 14.

EXTENSION OF REMARKS

By unanimous consent, permission to revise and extend remarks was granted to:

Mr. DINGELL, and to include extraneous matter, notwithstanding the fact that it exceeds two pages of the RECORD and is estimated by the Public Printer to cost $1,767.50.

(The following Members (at the request of Mr. LIVINGSTON) and to include extraneous material:)

Mr. STEIGER in two instances.
Mr. ANDERSON of Illinois.
Mr. BOB WILSON in four instances.
Mr. COUGHLIN.
Mr. SYMMS.
Mr. FREY.
Mr. FINDLEY.
Mr. COLLINS of Texas in three instances.
Mr. COLEMAN.
Mr. BEARD of Tennessee.
Mr. RUDD.
Mr. MICHEL.
Mr. BROWN of Ohio in four instances.
Mr. DERWINSKI.
Mr. WINN.
Mr. DEL CLAWSON.
Mr. WAMPLER in three instances.
Mr. FRENZEL in four instances.

Ms. OAKAR.
Mr. EILBERG in three instances.
Mr. MAGUIRE in two instances.
Mr. BEVILL.

SENATE BILLS REFERRED

Bills of the Senate of the following titles were taken from the Speaker's table and, under the rule, referred as follows:

S. 2. An act to require authorizations of new budget authority for Government programs at least every 5 years, to provide for review of Government programs every 5 years, and for other purposes; to the Committees on Government Operations and Rules; and

S. 3158. An act to authorize the investigation to study the feasibility of the Santa Cruz Dam and Reservoir, Santa Cruz Irrigation District, New Mexico, and for other purposes; to the Committee on Interior and Insular Affairs.

ENROLLED BILLS AND JOINT RESOLUTION SIGNED

Mr. THOMPSON, from the Committee on House Administration, reported that that committee had examined and found truly enrolled bills and a joint resolution of the House of the following titles, which were thereupon signed by the Speaker:

H.R. 8755. An act to make specific provisions for ball or roller bearing pillow block, flange, take-up, cartridge, and hanger units in the Tariff Schedules of the United States, and for other purposes;

H.R. 10587. An act to improve the range conditions of the public rangelands;

H.R. 11035. An act to incorporate the U.S. Capitol Historical Society;

H.R. 11318. An act to amend the Small Business Act and the Small Business Investment Act of 1958;

H.R. 11445. An act to amend the Small Business Investment Act of 1958;

H.R. 11658. An act to amend title XI of the Merchant Marine Act, 1936, to permit the guarantee of obligations for financing Great Lakes vessels in an amount not exceeding 87½ per centum of the actual or depreciated actual cost of each vessel;

H.R. 12051. An act relating to the application of certain provisions of the Internal Revenue Code of 1954 to specified transactions by certain public employee retirement systems created by the State of New York or any of its political subdivisions.

H.R. 12165. An act to extend until the close of June 30, 1981, the existing suspension of duties on certain metal waste and scrap unwrought metal, and other articles of metal, and for other purposes;

H.R. 12264. An act to designate certain lands in the State of Wisconsin as wilderness;

H.R. 13167. An act to amend the Internal Revenue Code of 1954 to insure that the deduction for contributions to a black lung benefit trust be allowed for any such contributions which are made for the purpose of satisfying unfunded future liability, and for other purposes;

H.R. 13767. An act to amend the Federal Property and Administrative Services Act of 1949 to permit the recovery of replacement cost of motor vehicles and other related equipment and supplies; and

H.J. Res. 685. Joint resolution to designate October 7, 1979, the Sunday of "Fire Prevention Week" as "Firefighters' Memorial Sunday"; to designate October 14, 1978, as "National Jogging Day"; and to designate and authorize the President to proclaim, February 11, 1979, as "National Inventors' Day."

SENATE ENROLLED BILLS SIGNED

The SPEAKER announced his signature to enrolled bills of the Senate of the following titles:

S. 1185. An act to regulate interstate commerce with respect to parimutuel wagering on horseracing to maintain the stability of the horseracing industry, and for other purposes;

S. 1318. An act to permit the State of Hawaii to use the proceeds from the sale, lease, or other disposition of certain real property for any public purpose;

S. 1626. An act to clarify the status of certain legislative and judicial officers under the provisions of title 5, United States Code, relating to annual and sick leave, and for other purposes;

S. 2411. An act to amend chapter 315 of title 18, United States Code, to authorize payment of transportation expenses for persons released from custody pending their appearance to face criminal charges before that court, any division of that court, or any court of the United States in another Federal judicial district; and

S. 3373. An act to amend title 10, United States Code, to authorize the Secretary of Defense to provide transportation to the Girl Scouts of the United States of America in connection with International World Friendship Events of Troops on Foreign Soil meetings, and for other purposes.

BILLS AND A JOINT RESOLUTION PRESENTED TO THE PRESIDENT

Mr. THOMPSON, from the Committee on House Administration, reported that that committee did on October 11, 1978, present to the President, for his approval, bills and a joint resolution of the House of the following titles:

H.R. 7843. To provide for the appointment of additional district and circuit judges, and for other purposes;

H.R. 12255. To amend the Older Americans Act of 1965 to provide for improved programs for older persons, and for other purposes;

H.R. 12556. For relief of Batavia Turf Farms, Inc.;

H.R. 12932. Making appropriations for the Department of the Interior and related agencies for the fiscal year ending September 30, 1979, and for other purposes;

H.R. 13803. To terminate the authorization of the navigation project on the Columbia Slough, Oreg.; and

H.J. Res. 638. Extending the deadline for the ratification of the equal rights amendment.

THE LATE HONORABLE GOODLOE E. BYRON

Mr. LONG of Maryland. Mr. Speaker, I offer a resolution (H. Res. 1430) on the death of the Honorable GOODLOE E. BYRON.

The Clerk read the resolution as follows:

H. Res. 1430

Resolved, That the House has heard with profound sorrow of the death of the Honorable GOODLOE E. BYRON, a Representative from the State of Maryland.

Resolved, That a committee of 20 Members of the House with such Members of the Senate as may be joined be appointed to attend the funeral.

Resolved, That the Sergeant at Arms of the House be authorized and directed to take such steps as may be necessary for carrying out the provisions of these resolutions and that the necessary expenses in connection therewith be paid out of the contingent fund of the House.

Resolved, That the Clerk communicate these resolutions to the Senate and transmit a copy thereof to the family of the deceased.

The resolutions were agreed to.

The SPEAKER. The Clerk will report the remaining resolution.

The Clerk read as follows:

Resolved, That as a further mark of respect the House do now adjourn.

ADJOURNMENT

The resolution was agreed to.

Accordingly (at 12 o'clock and 56 minutes a.m.), pursuant to House Resolution 1430, the House adjourned until today, Friday, October 13, 1978, at 10 o'clock a.m.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

5119. A communication from the President of the United States, transmitting proposed supplemental appropriations for fiscal year 1979 for the General Services Administration (H. Doc. 95–399); to the Committee on Appropriations and ordered to be printed.

5120. A communication from the President of the United States, transmitting proposed supplemental appropriations for fiscal year 1979 for the Department of the Interior (H. Doc. No. 95–400); to the Committee on Appropriations and ordered to be printed.

5121. A letter from the Chairman, District of Columbia Armory Board, transmitting the annual reports and financial statements for calendar year 1977 of the District of Columbia National Guard Armory and the Robert F. Kennedy Memorial Stadium, pursuant to section 10 of Public Law 80–605 and section 10 of Public Law 85–300; to the Committee on the District of Columbia.

5122. A letter from the Executive Director, Board for International Broadcasting, transmitting a report on the Board's activities under the Government in the Sunshine Act during fiscal year 1978, pursuant to 5 U.S.C. 552b(j); to the Committee on Government Operations.

5123. A letter from the Chairman, Federal Election Commission, transmitting a copy of correspondence sent by the Commission to the Office of Management and Budget, pursuant to section 310(d)(1) of the Federal Election Campaign Act of 1971, as amended; to the Committee on House Administration.

5124. A letter from the Comptroller General of the United States transmitting a report of an expenditure of funds by the Department of the Army in violation of a restriction in the Department of Defense Appropriation Act, 1976, and subsection (a) of the Antideficiency Act, pursuant to section 312(c) of the Budget and Accounting Act, 1921, jointly, to the Committees on Government Operations, Appropriations, and Armed Services.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

By Mr. HOWARD (for himself, Mr. JACOBS, Mr. JOHNSON of California, Mr. NOLAN, Mr. JENKINS, Mr. HUBBARD, Mr. MATTOX, Mr. GEPHARDT, Mr. BAFALIS, Mr. JEFFORDS, Mr. RAILSBACK, Mr. DERWINSKI, Mr. HANLEY, Mr. DUNCAN of Oregon, Mr. LAGOMARSINO, Mr. BEVILL, Mr. RICHMOND, Mr. RANGEL, Mr. LEVITAS, Mr. DOWNEY, and Mr. O'BRIEN):

H.R. 14317. A bill to establish a congressional award program for the purpose of recognizing excellence and leadership among young people; to the Committee on Education and Labor.

By Mr. WAMPLER (for himself, Mr. GRASSLEY, and Mr. LEACH):

H.R. 14318. A bill to regulate, through the Secretary of Agriculture, the production, sale, and shipment of animal biological products, and to repeal the act of March 4, 1913; to the Committee on Agriculture.

By Mr. ASHBROOK:

H.J. Res. 1167. Joint resolution authorizing the President to proclaim the month of November 1978 as "National REACT Month"; to the Committee on Post Office and Civil Service.

By Mr. HILLIS:

H.J. Res. 1168. Joint resolution proposing as amendment to the Constitution of the United States to provide a 6-year terms for President and for Vice President and a 3-year term for Representatives and to limit the total number of years for which Senators and Representatives may serve; to the Committee on the Judiciary.

By Mr. CLEVELAND (for himself, Mr. D'AMOURS, Mr. CHAPPELL, Mr. FORSYTHE, Mr. HEFNER, Mr. MCDONALD, Mr. QUAYLE, Mr. CHARLES WILSON of Texas and Mr. YOUNG of Missouri):

H. Con. Res. 744. Concurrent resolution expressing the sense of Congress that all remaining proceedings with respect to the Seabrook Nuclear Station project should be expedited and that all licensing and permitting procedures for the construction and operation of nuclear generating stations should be reviewed and modified to improve the efficiency of such procedures; to the Committee on Interior and Insular Affairs.

By Mr. GINN:

H. Con. Res. 745. Concurrent resolution expressing the sense of Congress on the proposed revenues procedure of the Internal Revenue Service relating to private tax-exempt schools; to the Committee on Ways and Means.

By Mr. SATTERFIELD:

H. Con. Res. 746. Concurrent resolution expressing the sense of Congress with respect to the Internal Revenue Service's proposed revenue procedure on private tax-exempt schools; to the Committee on Ways and Means.

By Mr. THOMPSON:

H. Con. Res. 747. Concurrent resolution to establish a children's day care center for the employees of Capitol Hill; to the Committee on House Administration.

By Mr. HANSEN (for himself, Mr. JOHN T. MYERS, Mr. CRANE, Mr. ICHORD, Mr. DORNAN, Mr. GOODLING, Mr. BEVILL, Mr. CUNNINGHAM, Mr. GUYER, Mr. CHAPPELL, Mr. FRENZEL, Mr. BADHAM, Mr. COLLINS of Texas, Mr. ROBINSON, Mr. SYMMS, Mr. HAGEDORN, Mr. MCDONALD, Mr. EMERY, Mr. LAGOMARSINO, Mr. GOLDWATER, and Mr. HALL):

H. Con. Res. 748. Concurrent resolution to uphold the separation of powers between the executive and legislative branches of Government in the termination of treaties; to the Committee on International Relations.

By Mr. BOLLING:

H. Res. 1427. Resolution providing for the consideration en bloc of the conference reports on the bills H.R. 4018, H.R. 5146, H.R. 5037, H.R. 5289, and H.R. 5263; to the Committee on Rules.

By Mrs. SCHROEDER (for herself, Mr. UDALL, Mr. BEDELL, Mr. BRODHEAD, Mrs. BURKE of California, Mr. CARR, Mr. DELLUMS, Mr. DRINAN, Mr. EDGAR, Mr. EDWARDS of California, Mr. EILBERG, Mr. FASCELL, Mr. FISHER, Mr. Mr. FRASER, Mr. GEPHARDT, Mr. LEHMAN, Mr. MCHUGH, Mr. MARKEY, Mr. MIKVA, Mr. MITCHELL of Maryland, Mr. MOFFETT, Mr. NEAL, Mr. OTTINGER, Mr. PANETTA, and Mr. PATTISON of New York):

H. Res. 1428. Resolution to implement clause 9 of rule XLIII and clause 6(a)(3)(A) of rule XI of the Rules of the House of Representatives, relating to employment practices; jointly to the Committees on House Administration, and Rules.

By Mrs. SCHROEDER (for herself, Mr. UDALL, Mr. RANGEL, Mr. REUSS, Mr. SEIBERLING, Mr. SIMON, Mr. STEERS, Mr. TSONGAS, Mr. VENTO, and Mr. WEAVER):

H. Res. 1429. Resolution to implement clause 9 of rule XLIII and clause 6(a)(3)(A) of rule XI of the Rules of the House of Representatives, relating to employment practices; jointly, to the Committees on House Administration, and Rules.

PRIVATE BILLS AND RESOLUTIONS

Under clause 1 of rule XXII,

Mr. WALGREN introduced a bill (H.R. 14319) to waive the statute of limitations with regard to the tort claim of Eazor Express, Inc. of Pittsburgh, Pa., against the United States, which was referred to the Committee on the Judiciary.

PETITIONS, ETC.

Under clause 1 of rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

The SPEAKER presented a petition of the National Tay-Sachs and Allied Diseases Association, Inc., New York, N.Y., relative to the Genetic Diseases Act, which was referred to the Committee on Interstate and Foreign Commerce.

AMENDMENTS

Under clause 6 of rule XXIII, proposed amendments were submitted as follows:

H.R. 11274

By Mr. COUGHLIN:

—Page 10, after line 17, insert the following new section (and redesignate the succeeding sections accordingly):

SEC. 2. (a) Section 411(a)(1) of the Higher Education Act of 1965 (hereinafter in this Act referred to as the "Act") is amended by inserting before the period at the end thereof the following: ", except that the amount of such grant shall not be less than $250 for any student whose annual adjusted family income (determined in accordance with regulations prescribed by the Commissioner) does not exceed $30,000".

(b) Section 411(a)(2)(B)(ii) of the Act is amended to read as follows:

"(ii) No basic grant under this subpart shall exceed whichever is the greater of—

"(I) the difference between the expected family contribution for a student and the actual cost of attendance at the institution at which that student is in attendance, or

"(II) $250.

If with respect to any student, it is determined that the amount of a basic grant plus the amount of the expected family contribution for that student exceeds the actual cost of attendance for that year, the amount of the basic grant shall be reduced until the combination of expected family contribution and the amount of the basic grant does not exceed the actual cost of attendance, except that any reduction required by this paragraph shall not reduce the amount of any basic grant to less than $250: *Provided*, That, in the case of a single independent student with no dependents, no basic grant under this subpart shall exceed the difference between the expected family contribution for a student and the actual cost of attendance at the institution at which that student is in attendance. If with respect to such single independent student, it is determined that the basic grant shall be reduced until the combination of expected family contribution and the amount of the basic grant does not exceed the actual cost of attendance at such an institution.".

—Page 10, on line 18, insert "(1)" after "(a),".

Page 10, on line 22, insert "(I)" after "(iv)"

Page 11, insert the following after line 1:

"(II) For any academic year after academic year 1978–79 for which funds available for payments under this subpart are not sufficient to satisfy fully all entitlements under this subpart determined in accordance with subdivision (I), an assessment rate of 11.5 per centum shall be applied to such income.".

(2) Section 411(b)(3)(B)(i) of the Act is amended by inserting "determined on the basis of the assessment rate specified in subsection (a)(3)(B)(iv)(II)" immediately after "under this subpart".

—Page 15, after line 21 insert the following:

SEC. 5. (a)(1) Section 425(a)(1) of the Act is amended by striking out "$2,500" and inserting in lieu thereof "$3,000" and by striking out "$5,000" and inserting in lieu thereof "$5,500".

(2) Section 425(b)(2) of the Act is amended by striking out "$7,500" and inserting in lieu thereof "$9,000" and by striking out "$15,000" and inserting in lieu thereof "$16,500".

(3) Section 428(b)(1)(A) of the Act is amended by striking out "$2,500" and inserting in lieu thereof "$3,000" and by striking out "$5,500" and inserting in lieu thereof "$5,500".

(4) Section 428(b)(1)(B) of the Act is amended by striking out "$7,500" and inserting in lieu thereof "$9,000" and by striking out "$15,000" and inserting in lieu thereof "$16,500".

And redesignate the following sections accordingly.

—Page 16, strike line 11 through 25 and insert in lieu thereof the following:

(c)(1) Section 423(2)(B) of the Act is amended to read as follows:

"(B) For the purposes of clause (ii) of subparagraph (A), a student shall qualify for a portion of an interest payment under paragraph (1) if such student's adjusted family income at the time of execution of the note or written agreement evidencing such loan—

"(i) is less than $40,000, or

"(ii) is equal to or greater than $40,000 and the eligible institution has provided the lender with a statement evidencing a determination of need and recommending a loan in the amount of such need.

The Commissioner shall by June 30 of each year adjust the income level which determines eligibility for interest subsidies by an amount equal to the percentage increase in the Consumer Price Index as published by the Secretary of Commerce for the preceding calendar year, rounded off to the nearest $100 amount.".

—Page 20, after line 15 insert the following:

SEC. . The provisions of section 2 of this Act shall not be effective for any fiscal year in which a credit for taxes paid under section 45 of subpart A of part IV of subchapter A of chapter 1 of the Internal Revenue Code of 1954 is permitted.

H.R. 12299

By Mr. ASHBROOK:

—Page 1, beginning with line 6, strike out everything through line 2 on page 6, and renumber the remaining sections accordingly.

Strike out "the Council" each time it appears in the bill and insert in lieu thereof "the Secretary".

Page 13, lines 5 and 6, strike out "Proposed regulations shall be subject to the approval of the Council.".

Page 13, strike out lines 9, 10, and 11 and insert:

"(1) the term 'Secretary' means the Secretary of Health, Education, Welfare;".

Page 13, strike out lines 15 and 16 and renumber the remaining paragraphs of the section accordingly.

Amend the title of the bill to read as follows: "To provide grants for the assistance of victims of domestic violence and for training programs, and for other purposes."

—Page 4, line 9, strike out "five" and insert in lieu thereof "three"; in line 14 strike out "and"; in line 15 strike out "(B)" and insert in lieu thereof "(C)" and after line 14 insert:

"(B) two individuals, one of whom shall be an Attorney General of a State, and one of whom shall be a local police officer; and".

—Page 5, line 21, strike out "Council" and insert in lieu thereof "Secretary".

Page 6, line 4, strike out "make grants" and insert in lieu thereof "make recommendations to the Secretary with respect to grants made".

Page 8, line 6, strike out "Council" and insert in lieu thereof "Secretary".

Page 10, line 8, strike out "make grants" and insert in lieu thereof "make recommendations to the Secretary with respect to grants made".

Page 11, lines 16 and 24, strike out "Council" and insert in lieu thereof "Secretary".

Page 12, line 7, strike out "Council" and insert in lieu thereof "Secretary".

—Page 6, line 12, after the word "years." insert the following:

"No funds received by a sponsor agency under this section may be used for—

"(1) any administrative costs arising in connection with any program carried out by such agency under the grant or contract involved; or

"(2) the purchase or leasing of any supplies, other than materials, tools, and supplies.

—Page 6, line 5, strike out "for" and insert in lieu thereof "to provide not more than 50 percent of the cost of".

Page 6, line 12, after the word "years", insert the following:

"The non-Federal contribution to the cost of any volunteer program carried out under this title shall be in cash. The Secretary may not waive in whole or in part any matching local contribution."

—Page 6, line 5, strike out "for" and insert in lieu thereof "to provide not more than 75 percent of the cost of".

Page 6, line 12, after the word "years", insert the following:

"The non-Federal contribution to the cost of any volunteer program carried out under this title shall be in cash. The Secretary may not waive in whole or in part any matching local contribution."

—Page 6, line 5, strike out "for" and insert in lieu thereof "to provide not more than 90 percent of the cost of".

Page 6, line 12, after the word "years", insert the following:

"The non-Federal contribution to the cost of any volunteer program carried out under this title shall be in cash. The Secretary may not waive in whole or in part any matching local contribution."

—Page 10, line 19, after "(2)" insert "the grant will be used only in accordance with".

—Page 11, strike out lines 4, 5, 6, and 7 and renumber the remaining clauses of subsection (c) accordingly.

—Page 11, line 18, before the semicolon insert "prepared by a certified public accountant".

—Page 12, line 16, strike out "approved by the Council" and insert in lieu thereof "reviewed by the Council and approved by the Secretary".

—Page 13, beginning on line 5, strike out "Proposed regulations shall be subject to the approval of the Council.".

—Page 13, line 13, after "tribe" insert ", private organization organized for profit,".

—Page 14, line 12, strike out "$15,000,000" and insert in lieu thereof "$10,000,000", and insert a period after "1979" and strike out everything that follows through line 14.

—Page 14, line 15, insert the following:

(b) No funds appropriated pursuant to this Act for any fiscal year shall be available for use by the Secretary in administering the provisions of this Act.

—Page 14, line 19, strike out "20 per centum" and insert in lieu thereof "10 per centum".

—Page 14, lines 12 and 13, strike out "$15,000,000", "$20,000,000", and "$30,000,000" and insert in lieu thereof, respectively, '$5,000,000", "$7,500,000", and "$10,000,000".

—Page 14, line 4, after "Guam," insert "American Samoa, the Northern Mariana Islands, the Trust Territory of the Pacific Islands,".

—Page 14, after line 21, insert the following new section:

"DURATION OF GRANTS AND CONTRACTS

"SEC. 12. (a) Any grant or contract made by the Secretary under section—shall have a duration of not more than 1 year. The Secretary shall review each such grant or contract before its expiration and the Secretary shall have the authority to extend a grant or contract at the end of such 1-year period if the Secretary determines that such extension will further the purpose of this title.

"(b) The Secretary shall not have any authority to delegate the review of grants and contracts required in subsection (a) to any other officer or employee of the Department of Health, Education, and Welfare."

—Page 14 after line 21, insert the following new section:

"SEC. 12. The provisions of this Act are repealed effective at the close of September 30, 1979."

—Page 14, after line 21, insert the following section:

"SEC. 12. (1) The Secretary shall transmit to each House of the Congress any regulation prescribed by the Secretary.

"(2) Any regulation prescribed by the Secretary under paragraph (1) shall not be effective unless, during the first period of 60 calendar days of continuous session of the Congress after the date of transmittal to the Congress, both Houses of the Congress pass a concurrent resolution the matter after the resolving clause of which reads as follows: 'The Congress hereby approves the proposed regulation transmitted by the Secretary of Health, Education and Welfare to the Congress , 19__.'

"(B) For purposes of this paragraph—

"(i) continuity of session of the Congress

is broken only by an adjournment sine die; and

"(ii) the days on which either House is not in session because of an adjournment of more than 3 days to a day certain are excluded in the computation of the 60-day period.

—Page 14, after line 21, insert the following new section:

"POLITICAL ACTIVITIES

"SEC. 12. (a) No part of any funds appropriated to carry out this title shall be used to finance, directly or indirectly, any activity designed to influence the outcome of any election to Federal office or any voter registration activity, or to pay the salary of any officer or employee who, in his official capacity as such an officer or employee, engages in any such activity.

"(b) For purposes of this section, the terms 'election' and 'Federal office' have the meanings given them in section 301 of the Federal Election Campaign Act of 1971.

—Page 14, after line 21, insert the following new section:

"REPAYMENT OF FEDERAL FUNDS

"SEC. 12. Whenever the Secretary, after giving reasonable notice and opportunity for hearing to any sponsor agency, finds that the project for which a grant or contract was received no longer complies with the provisions of this title, or with the relevant application as approved by the Secretary, the Secretary shall notify such sponsor agency of such findings and shall require such sponsor agency to make repayments to the Secretary in amounts equal to the amount of financial assistance provided to the sponsor agency for such project under this title. The Secretary may authorize the continuance of payments with respect to any project pursuant to this title which is being carried out by such sponsor agency and which is not involved in the noncompliance.

—page 14, after line 21, insert the following new section:

"CONGRESSIONAL REVIEW OF REGULATIONS

"SEC. 12. (a) Any regulation or guideline prescribed by the Secretary under this title shall be submitted to each House of the Congress not later than 120 days before such regulation or guideline is scheduled to take effect. No such regulation or guideline may take effect unless it is approved by both Houses of the Congress in accordance with subsection (b).

"(b)(1) Any regulation or guideline prescribed by the Director under this title shall not be effective unless, during the first period of 60 calendar days of continuous session of the Congress after the date of transmittal to the Congress, both Houses of the Congress pass a concurrent resolution the matter after the resolving clause of which reads as follows: 'The Congress hereby approves the proposed transmitted by the Secretary of Health, Education, and Welfare to the Congress on , 19 .'

"(2) For purposes of this subsection—

"(A) continuity of session of the Congress is broken only by an adjournment sine die; and

"(B) the days on which either House is not in session because of an adjournment of more than 3 days to a day certain are excluded in the computation of the 60-day period.

—Page 14, after line 21, insert the following new section:

"PROHIBITION OF CERTAIN ACTIVITIES

"SEC. 12. Each sponsor agency shall provide assurances to the Secretary of Health, Education, and Welfare that no employee of such agency, and no person participating in any project under this title under the direction of such agency, while carrying out any activities under this title, shall engage in, or encourage others to engage in—

"(1) any rioting or civil disturbance;

"(2) any activity which is in violation of any outstanding injunction of any court of competent jurisdiction; or

"(3) any other illegal activity.

—Page 14, after line 21, insert the following new section:

"PROGRAM PLAN

"SEC. 12. (a) The Secretary shall prepare and publish in the Federal Register a program plan designed to implement the provisions of this title. The Secretary shall transmit such program plan to each House of the Congress for review under subsection (b) after such publication of the program plan in the Federal Register. The Secretary may not make any grants or enter into any contracts under section 12 until such program plan has taken effect in accordance with the provisions of this section.

"(b)(1) The program plan prepared by the Secretary under subsection (a) shall not be effective if, during the first period of 90 calendar days of continuous session of the Congress after the date of transmittal to the Congress, either House of the Congress adopts a resolution the matter after the resolving clause of which reads as follows: 'The proposed program plan transmitted by the Secretary of Health, Education, and Welfare to the Congress on September 1, 1979, is hereby disapproved.'

"(2) For purposes of this subsection—

"(A) continuity of session of the Congress is broken only by an adjournment sine dine; and

"(B) the days on which either House is not in session because of an adjournment of more than 3 days to a day certain are excluded in the computation of the 60-day period.

—Page 14, after line 21, insert the following new section:

REVIEW OF PERSONNEL ACTIONS

SEC. 12. (a) The United States Civil Service Commission (hereinafter in this section referred to as the "Commission") shall carry out a comprehensive review of personnel actions taken by the Secretary of Health, Education, and Welfare and by any other officer or employee of the Agency, during the 2-year period immediately before the date of the enactment of this Act. The purpose of such review shall be to determine whether any violation of Federal law relating to the competitive service occurred in connection with any such personnel action.

(b) The Commission shall report its findings to each House of the Congress as soon as practicable after completion of the review required in subsection (a).

—Page 14, after line 21, insert the following new section:

AUDIT OF PROGRAMS

SEC. 12. (a) The Comptroller General of the United States (hereinafter in this section referred to as the "Comptroller General") shall carry out a comprehensive audit of each program administered by the Department of Health, Education, and Welfare on the date of the enactment of this Act. The purpose of each such audit shall be to determine whether any recipient of grants, subgrants, contracts, subcontracts, or loans under any Act has engaged in any misuse of Federal financial assistance.

(b) The Comptroller General shall submit a report to each House of the Congress with respect to each audit carried out by the Comptroller General under subsection (a) as soon as practicable after the completion of such audit.

—Page 14, after line 21, insert the following new section:

And redesignate the following sections and references to sections accordingly:

POLITICAL ACTIVITIES

SEC. 12. Any recipient of Federal financial assistance under this Act may not use funds from any source for any purpose described in the preceding sentence during the period for which such Federal financial assistance is available for use by such recipient.

—Page 14, after line 21, insert the following new section:

"SEC. 12. If the Secretary determines that any recipient of funds under this Act has used such funds, or has permitted the use of such funds, for any activity prohibited in paragraph (1), then the Secretary shall terminate payments to such recipient under the grant or contract involved in accordance with the provisions of section.".

—Page 14, after line 21, insert the following new section:

"REDUCTION OF PAPERWORK

"SEC. 12. In order to reduce unnecessary, duplicative, or disruptive demands for information, the Secretary in consultation with other appropriate agencies and organizations, shall continually review and evaluate all requests for information made under this Act and take such action as may be necessary to reduce the paperwork required under this Act. The Secretary shall request only such information as the Secretary deems essential to carry out the purposes and provisions of this Act.".

—Page 14, after line 21, insert the following new section:

"TERMINATION OF PROJECTS

"SEC. 12. The Secretary shall not renew any contract or grant to carry out any project under this Act upon the expiration of such contract or grant if the chief executive officer of the State in which such project is being carried out, or the chief elected official or the governing body of the unit of general local government (in any case in which there is no chief elected official) of the locality in which such project is being carried out, furnishes written notice to the Secretary (before the expiration of such contract or grant) specifying that such officer, official, or governing body, as the case may be, does not concur in the renewal of such contract or grant.".

—Page 14, after line 21, insert the following new section:

SEC. 12. The Secretary shall not have any authority to employ experts or consultants, or organizations thereof, in connection with carrying out the provisions of this Act.

—Page 14, after line 21, insert the following new section:

"ANNUAL REPORTS

"SEC. 12. The Secretary shall submit a report regarding the administration of this title to the President and to the Congress as soon as practicable after the end of each fiscal year. Each such report shall—

"(1) include a detail statement of activities carried out under each grant or contract made by the Secretary during the fiscal year involved; and

"(2) list the name and address of each person receiving a grant from, or entering into a contract with, the Secretary during such fiscal year.

—Page 14, after line 21, insert the following new section:

SEC. 12. The Secretary, in awarding grants to sponsor agencies in a State for any fiscal year, shall require that 50 percent of the funds made available under such grants shall be used for programs in rural areas of such State.

H.R. 12442

By Mr. LEVITAS:

—Page 15, immediately after line 6, insert the following new section:

SEC. 9. (a) Section 9 of the Consumer Product Safety Act (15 U.S.C. 2058) is amended by adding at the end thereof the following new subsection:

"(f)(1) Notwithstanding any other provision of this or any other Act, the Commission shall, simultaneously with promulgation by the Commission of any rule under this or any other Act, transmit a copy of such rule to the President of the Senate and the Speaker of the House of Representatives. The rule shall not become effective if—

"(A) within 90 calendar days of continuous session of Congress after the date of transmittal, both Houses of Congress adopt a concurrent resolution, the matter after the resolving clause of which is as follows: 'That the Congress disapproves the rule promulgated by the Consumer Product Safety Commission dealing with the matter of , which rule was transmitted to the Congress on .', the blank spaces therein being appropriately filled; or

"(B) within 60 calendar days of continuous session of Congress after the date of transmittal, one House of Congress adopts such a concurrent resolution and such resolution is not disapproved by the other House of Congress within 30 calendar days of continuous session of Congress after it is received by such other House.

"(2) If, at the end of 60 calendar days of continuous session of Congress after the date of transmittal of a rule to the Congress pursuant to paragraph (1), no committee of either House of Congress has reported or been discharged from further consideration of a concurrent resolution disapproving the rule and neither House has adopted such a resolution, then thereafter the rule may take effect and may not be disapproved under paragraph (1)(A). If, within such 60-day period, such a committee has reported or been discharged from further consideration of such a resolution or either House has adopted such a resolution, the rule may not take effect sooner than 90 calendar days of continuous session of Congress after its transmittal to the Congress and may not take effect then if it has been disapproved under paragraph (1)(A).

"(3) For purposes of this subsection—

"(A) in determining periods of continuous session of Congress—

"(i) continuity of session is broken only by an adjournment of Congress sine die; and

"(ii) the days on which either House is not in session because of an adjournment of more than 3 days to a day certain shall be excluded in the computation of 30, 60, and 90 calendar days of continuous session of Congress; and

"(B) the term 'rule' means any rule which the Commission is authorized to promulgate under this Act and any regulation, standard, or amendment thereto which the Commission is authorized to promulgate under any other Act, but does not include any such rule, regulation, standard, or amendment thereto which the Commission for good shown determnies should in the public interest have an earlier effective date than would be possible if such rule, regulation, standard, or amendment thereto were transmitted to the Congress for review under this subsection.

"(4) Any reference to date of issuance of promulgation of a rule by the Commission in any provision of any other Act which provides a specified period of time beginning on such date during which a petition may be filed for judicial review of such rule shall be deemed to be a reference to the earliest date on which such rule may take effect under this subsection.

"(5) Congressional inaction on or rejection of a resolution of disapproval regarding any rule promulgated by the Commission shall not be deemed an expression of approval of such rule.".

(b)(1) Section 9(d)(1) of such Act (15 U.S.C. 2058(d)(1)) is amended—

(A) in the first sentence by striking out "date promulgated" and inserting in lieu thereof "earliest date on which such rule may take effect under section 9(f)"; and

(B) in the second sentence by striking out "date of promulgation" and inserting in lieu thereof "earliest date on which such rule may take effect under section 9(f)".

(2) Section 11(a) of such Act (15 U.S.C. 2060(a)) is amended by striking out "Not later than 60 days after a consumer product safety rule is promulgated by the Commission," and inserting in lieu thereof "During the 60-day period beginning on the earliest date on which a consumer product safety rule promulgated by the Commission may take effect under section 9(f),".

(c) The amendments made by this section shall apply with respect to rules promulgated after the date of enactment of this section.

—Page 15, immediately after line 6, insert the following new section:

SEC. 9. (a) The Consumer Product Safety Act is amended by adding at the end thereof the following new section:

"ECONOMIC IMPACT ANALYSIS

"SEC. 36. (a) In any notice with respect to a proposed rule which it publishes in the Federal Register, the Commission shall include a detailed statement describing the economic impact of the proposed rule. Each such statement shall include, but not be limited to, an analysis of—

"(1) the cost impact of the proposed rule on consumers, producers, and distributors of the item which would be subject to the rule;

"(2) the direct and indirect costs of compliance with the proposed rule for persons who would be required to comply with the rule;

"(3) the cost to the Commission of implementing, monitoring compliance with, and enforcing the proposed rule;

"(4) the effect of the proposed rule on employment;

"(5) the fiscal effects of any increase in unemployment which is anticipated as a result of the proposed rule;

"(6) any unavoidable adverse economic impacts that the proposed rule would cause; and

"(7) alternatives to the proposed rule which the Commission considered, including an explanation of why those alternatives were not proposed.

"(b) As used in this section, the term 'rule' means any rule which is proposed by the Commission under this Act and any standard, regulation, or amendment thereto which is proposed by the Commission under any other Act.".

(b) The table of contents contained in section 1 of the Consumer Product Safety Act is amended by inserting the following new items immediately after the item relating to section 34:

"Sec. 35. Interim cellulose insulation safety standard.

"Sec. 36. Economic impact analysis.".

H.R. 13778

By Mr. BAUCUS:

(Amendment to the Brooks amendment in the nature of a substitute.)

—Page 8, after line 9, insert the following new subsection:

(c) The Secretary shall provide a unified approach to rural family education through the coordination of programs within the Department and shall work with the Federal Interagency Committee on Education to coordinate related activities and programs of other Federal departments and agencies.

—At the end of matter proposed to be inserted by the amendment, add the following new subsection:

(c) The Secretary, through the Director of the Office created by this section, shall also provide a unified approach to rural family education through the coordination of programs within the Department and shall work with the Federal Interagency Committee on Education to coordinate related activities and programs of other Federal departments and agencies. Such Director shall perform such duties and exercise such powers as the Secretary may prescribe.

H.R. 13778

By Mr. ERLENBORN:

(Amendment in the nature of a substitute offered by Mr. BROOKS.)

—On page 1, amend the title to read: "To establish a Department of Public Education and Youth, and for other purposes."

On each of the following pages, where designated, between the words "of" and "Education" insert "Public", and after the word "Education" add "and Youth":

Page 1, line 5; page 3, line 4; page 4, line 24; page 5, line 24; page 40, line 22; page 41, line 14; page 41, line 19; page 42, line 10; page 42, line 21; page 43, line 1.

On page 1, amend the title to read: "To establish a Department of Public Education, and for other purposes."

On each of the following pages, where designated, between the words "of" and "Education" insert "Public":

Page 1, line 5; page 3, line 4; page 4, line 24; page 5, line 24; page 40, line 22; page 41, line 14; page 41, line 19; page 42, line 10; page 42, line 21; page 43, line 1.

—Page 34, line 10, insert the following new section and amend the table of contents accordingly:

"PROHIBITION OF FUNDING

"SEC. 439. No funds may be provided by the Secretary or the Department to any institution or public or private agency which provides abortion counseling or services to its employees or students either directly or through contractual arrangements, including the provision of health insurance.

—Page 36, line 3, add the following new section and redesignate the following sections accordingly:

"LIMITATIONAL ON APPROPRIATIONS

"SEC. 503. Appropriations to operate programs in the Department for any fiscal year may not be more than the amounts made available to the department in the previous fiscal year plus an amount equal to 125 per centum of the increase in the Consumer Price Index for the previous calendar year."

And amend the table of contents.

—Page 40, strike subsection (c), lines 23 through 25, and redesignate the following sections accordingly.

The amendment removes the provision of the Act which increases the government-wide pool of supergrades from 3301 to 3365 thereby requiring that the new positions in the department at the GS–16 to GS–18 levels be taken from existing resources.

—Page 44, strike lines 6 and 7 and insert the following:

"SEC. 601. The provisions of this Act shall take effect upon the enactment of legislation to codify Title 20 of the United States Code."

—Page 44, strike lines 6 and 7 and insert the following:

"SEC. 601. The provisions of this Act shall take effect on October 1 of any fiscal year in which projected revenues and outlays for the Federal government are in balance."

H.R. 14104

By Mr. JEFFORDS:

—Page 19, line 8, insert ", which shall take effect as provided in paragraph (2)," after "order".

Page 19, line 14, insert after the period the following: "The Committee shall transmit the order (bearing an identification number) to the Congress.".

Page 19, after line 14, insert the following:

"(2)(A) An order issued under paragraph (1) shall take effect at the end of the first period of 60 calendar days of continuous session of Congress after the date on which the order is transmitted to the Congress unless, between the date of transmittal and the

end of the 60-day period, either House passes a resolution stating in substance that the House does not favor such order.

"(B) For the purpose of subparagraph (A) of this paragraph—

"(i) continuity of session is broken only by an adjournment of Congress sine die; and

"(ii) the days on which either House is not in session because of an adjournment of more than 3 days to a day certain are excluded in the computation of the 60-day period.

"(C) Under provisions contained in an order, a provision of the order may be effective at a time later than the date on which the order otherwise is effective or, if both Houses of Congress have defeated a resolution of disapproval, may be effective at a time earlier than the expiration of the 60-day period required by subparagraph (A).

"(D) An order which is effective shall be printed (i) in the Statutes at Large in the same volume as the public laws and (ii) in the Federal Register.

"(E) A statute enacted, and a regulation prescribed before the effective date of an order issued under this subsection has the same effect as if the order had not been issued.

"(F) This paragraph (other than subparagraph (A)) is enacted by Congress—

"(i) as an exercise of the rulemaking power of the Senate and the House of Representatives, respectively, and as such it is deeemd a part of the rules of each House, respectively, but applicable only with respect to the procedure to be followed in that House in the case of resolutions described in subparagraph (G), and it supersedes other rules only to the extent that it is consistent therewith; and

"(ii) with full recognition of the constitutional right of either House to change the rules (so far as relating to the procedure of that House) at any time, in the same manner and to the same extent as in the case of any other rule of that House.

"(G) For the purpose of this subsection, 'resolution' means only a resolution of either House of Congress, the matter after the resolving clause of which is as follows: 'That the does not favor the order numbered transmitted to Congress by the Endangered Species Committee on , 19 , the first blank space therein being filled with the name of the resolving House and the other blank spaces therein being appropriately filled.

"(H) A resolution with respect to an order issued under paragraph (1) shall be referred to a committee (and all resolutions with respect to the same order shall be referred to the same committee) by the President of the Senate or the Speaker of the House of Representatives, as the case may be.

"(I) (i) If the committee to which a resolution with respect to an order has been referred has not reported it at the end of 45 calendar days after its introduction, it is in order to move either to discharge the committee from further consideration of the resolution or to discharge the committee from further consideration of any other resolution with respect to the order which has been referred to the committee.

"(ii) A motion to discharge may be made only by an individual favoring the resolution, is highly privileged (except that it may not be made after the committee has reported a resolution with respect to the same order), and debate thereon shall be limited to not more than 1 hour, to be divided equally between those favoring and those opposing the resolution. An amendment to the motion is not in order, and it is not in order to move to reconsider the vote by which the motion is agreed to or disagreed to.

"(iii) If the motion to discharge is agreed to or disagreed to, the motion may not be renewed, nor may another motion to discharge the committee be made with respect to any other resolution with respect to the same order.

"(iv) When the committee has reported, or has been discharged from further consideration of, a resolution with respect to an order, it is at any time thereafter in order (even though a previous motion to the same effect has been disagreed to) to move to proceed to the consideration of the resolution. The motion is highly privileged and is not debatable. The motion shall not be subject to amendment, or to a motion to postpone, or a motion to proceed to the consideration of other business. A motion to reconsider the vote by which the motion is agreed to or disagreed to shall not be in order. If a motion to proceed to the consideration of the resolution is agreed to, the resolution shall remain the unfinished business of the respective House until disposed of.

"(v) Debate on the resolution, and on all debatable motions and appeals in connection therewith, shall be limited to not more than ten hours, which shall be divided equally between individuals favoring and individuals opposing the resolution. A motion further to limit debate is in order and not debatable. An amendment to, or a motion to postpone, or a motion to proceed to the consideration of other business, or a motion to recommit the resolution is not in order. A motion to reconsider the vote by which the resolution is agreed to or disagreed to shall not be in order.

"(vi) Immediately following the conclusion of the debate on the resolution with respect to an order, and a single quorum call at the conclusion of the debate if requested in accordance with the rules of the appropriate House, the vote on final approval of the resolution shall occur.".

Page 19, line 15, strike out "(2)" and insert in lieu thereof "(3)".

S. 666

By Mr. JONES of Oklahoma:

—Page 14, after line 25 insert the following new subsection:

(e) (1) Any employee specified in paragraph (2) shall be treated in the same manner as a preference eligible under section 2108(3)(A) of title 5, United States Code, for purposes of obtaining an appointment in the competitive service. The treatment of any such employe as a preference eligible under this paragraph shall terminate—

(A) upon such employee's appointment to a position in the competitive service that is not time limited, or

(B) at the end of the five year period beginning on the date of the enactment of this Act, whichever first occurs.

(2) An employee shall be treated as a preference eligible under paragraph (1) if such employee—

(A) has been continuously employed in the Bureau of Indian Affairs, the Indian Health Service, a tribal organization (to the extent provided in section 8336(g)(2) of title 5, United States Code, as added by the first section of this Act), or any combination thereof, during the period beginning on June 17, 1974, and ending on the date of the enactment of this Act;

(B) is not entitled to preference under the Indian preference laws, or entitled to receive lands and benefits under the Alaska Native Claims Settlement Act (43 U.S.C. 1601 et seq.; 85 Stat. 688); and

(C) is unable to qualify for an annuity under section 8336(g)(1) of title 5, United States Code (as added by the first section of this Act) because of a failure to meet the requirements of subparagraph (A) of such section and will be unable for such reason to qualify for an annuity under such section at any date occurring before January 1, 1986.

Page 15, strike out line 1 and insert the following:

(f) (1) The Civil Service Commission shall promulgate regulations to carry out subsection (e) and shall provide all other

Page 15, line 14, strike out "(f)" and insert in lieu thereof "(g)".

SENATE—Friday, October 13, 1978

(Legislative day of Wednesday, October 11, 1978)

The Senate met at 9 a.m., on the expiration of the recess, and was called to order by Hon. DENNIS DECONCINI, a Senator from the State of Arizona.

Mr. DECONCINI. The Honorable ORRIN G. HATCH, a bishop in the Church of Jesus Christ of Latter-day Saints, will lead us in prayer today.

PRAYER

The Honorable ORRIN G. HATCH, a Senator from the State of Utah, offered the following prayer:

Our Father in Heaven, we pray to Thee as we begin our duties this day. We are grateful for this great land and the freedoms we have under this constitutional form of government. We are grateful to be here to have the opportunity to do what is right for this country. We pray for Thy spirit to be with us this day and to guide us that we may put our country first and to do the things that are best for the people.

Imbue us with decency, integrity, and strength that we might be able to fulfill our noble cause as Senators in the U.S. Senate. We pray for blessings on our leadership, blessing on the President of our country, on his Cabinet, and on all those who are serving the people of our Nation.

We do this in the name of Jesus Christ. Amen.

APPOINTMENT OF ACTING PRESIDENT PRO TEMPORE

The PRESIDING OFFICER. The clerk will please read a communication to the Senate from the President pro tempore (Mr. EASTLAND).

The assistant legislative clerk read the following letter:

Statements or insertions which are not spoken by the Member on the floor will be identified by the use of a "bullet" symbol, i.e., ●

U.S. SENATE,
PRESIDENT PRO TEMPORE,
Washington, D.C., October 13, 1978.

To the Senate:

Under the provisions of rule I, section 3, of the Standing Rules of the Senate, I hereby appoint the Honorable DENNIS DECONCINI, a Senator from the State of Arizona, to perform the duties of the Chair.

JAMES O. EASTLAND,
President pro tempore.

Mr. DECONCINI thereupon assumed the chair as Acting President pro tempore.

RECOGNITION OF LEADERSHIP

The ACTING PRESIDENT pro tempore. The Senator from West Virginia.

THE JOURNAL

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the Journal of the proceedings be approved to date.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

OFFERING OF PRAYER BY SENATOR HATCH

Mr. ROBERT C. BYRD. Mr. President, I compliment the distinguished Senator from Utah (Mr. HATCH) on his excellent prayer this morning in opening the Senate.

Mr. HATCH. I thank the majority leader.

LEGISLATIVE ACHIEVEMENTS—95TH CONGRESS

Mr. ROBERT C. BYRD. Mr. President, the 95th Congress faced many challenges, both domestic and international, when it convened January 4, 1977. It fully embraced its responsibility to meet these challenges and achieved solutions to some of the most complex issues of modern times.

The 95th Congress began with a newly elected President who presented us with a massive agenda at a time when the economy was faltering. Through the combined efforts of the Congress and the President, the economy made a major recovery and a comprehensive national energy program is close to enactment.

The energy package, which is a key element in the effort to stabilize the Nation's economy, consists of five components of immense complexity which seek to increase our domestic supplies of energy through fairer pricing policies, while reducing our dependence on foreign oil imports and cutting our consumption of energy through conservation and fuel efficiency. The energy package which is close to enactment embodies:

A program that will update the present antiquated natural gas policy with a system of pricing that will not gouge the American consumer but will stimulate exploration and production of domestic energy supplies;

A program that will require major industries to burn more available domestic coal instead of oil and gas;

A program that will exhort public utility companies to use pricing methods which encourage energy conservation by consumers both large and small; and

A program that will reward individuals and corporations through tax credits and incentives for conserving energy and for increasing production, exploration, and development of new energy sources.

For the past 10 months, Senate and House conferees have worked arduously to arrive at provisions which would be acceptable to Members of both Houses. The Nation owes a special debt of gratitude to Senator JACKSON who led a relentless battle to reach agreement among conferees on natural gas policy.

The Senate has now given its final approval to an overhaul of natural gas pricing policy, industrial coal conversion, mandatory and voluntary conservation, and public utility rate conservation measures. Approval of the energy taxation component will mark the culmination of the work of this Congress, as well as several previous Congresses, and will ready for enactment the first comprehensive energy policy in history which will serve the Nation into the next decade.

The Congress has long recognized the need for improved laws to deal with energy problems. Since 1969, it has enacted over 100 energy-related pieces of legislation. These laws cover subjects ranging from geothermal steam research to oil allocation authority and have led the way to the enactment this year of a national energy policy.

In this Congress alone, almost 40 energy-related bills have been enacted. The 95th Congress was not yet a month old when it sent the President the Emergency Natural Gas Act of 1977 authorizing him to allocate gas supplies to alleviate an emergency gas shortage.

By May of 1977, the Senate had passed the cornerstone of the President's energy package, the creation of a Department of Energy, through which a national energy policy would be implemented. During the fall, both Houses completed consideration of the five major energy proposals and sent them to conference. The Congress enacted strip mining legislation which had been vetoed three times by Republican Presidents. New clean water and clean air programs became law. Congress increased appropriations for continued research and development of alternative energy resources and adopted a treaty paving the way for a trans-Alaska natural gas pipeline.

During the second session, while Senate and House conferees for the major energy bills continued to seek resolutions to differing provisions of this very complex and controversial legislation, the Congress authorized loans and loan guarantees to small businesses to stimulate the marketing of solar technologies and other energy conserving products.

It required the Defense Department to incorporate solar energy systems in all new military family housing and in at least 25 of all other military facilities under design. We wrote into law an Outer Continental Shelf Act setting forth a national policy for the development of oil and gas resources offshore. This act, representing 5 years of effort by the Congress in opposition to previous administrations, strikes a needed balance between oil and gas development and potentially adverse economic, social and environmental impacts from offshore activities.

Aside from the landmark achievement in energy, the 95th Congress met the challenge of a weakened national economy by enacting during the first session the President's $21 billion economic stimulus package that cut taxes for 46 million Americans and created over a million jobs. This year, the Congress has played a leading role in combating inflation by restraining Federal spending and controlling the Federal deficit. In setting 1979 budget levels, the Congress reduced the President's budget ceiling on the future cost of the Government as he proposed in January by over $12 billion and his projected Federal budget deficit by $22 billion. In considering the 1979 appropriations for the functioning of the various operations of the Federal Government, the Congress made reductions of over $10 billion which include percentage cuts as large as 12 percent for foreign operations and almost 10 percent of the Department of Interior. The Senate has passed a $29.3 billion tax cut for Americans which is designed, in part, to offset the impact of inflation on the overburdened taxpayer by cutting 11 percent from the average tax bill.

In a desire to improve the efficiency and responsiveness of the Federal Government, the 95th Congress enacted numerous innovations. It expeditiously approved extension of the President's authority to reorganize Federal agencies and, since then, has approved six reorganization plans submitted by the President. The first overhaul of the civil service system in nearly a century has been enacted to allow greater flexibility in firing incompetent bureaucrats and in rewarding superior workers. The Congress has cleared legislation to require Federal agencies to increase their use of part-time and flexi-time employment as a means of opening up employment opportunities in the Government for the elderly, handicapped, women, and others with family responsibilities. Just yesterday, the Congress sent the President legislation requiring detailed financial disclosure of top officials not only within the legislative branch but in the executive and judicial branches of the Government. Both Houses of Congress have adopted stiff codes of ethics for its Members and employees. The Senate made wide-sweeping and very meaningful changes to its committee structure which have improved the effectiveness and efficiency of this body.

In the field of international affairs, the Senate advised and supported the President in three controversial initiatives, despite political pressures. The extensive consideration the Senate gave the Panama Canal treaties resulted in essential clarification of the American right to defend the canal and to have priority

passage through the canal in an emergency. Senate approval of the ratification of these treaties, which had been under negotiation for 14 years, was clearly in the best interest of the United States although it took extraordinary courage for many Senators to support them. The action of the Senate on these treaties will have great symbolic significance for our future relations with the developing countries of Latin America and throughout the world.

The Senate's support of the President's Mideast arms sales to Egypt, Israel, and Saudi Arabia was instrumental, I believe, in evoking the high level of cooperation displayed by Egypt at the Camp David peace effort. The lifting of the embargo on U.S. arms to Turkey as proposed by the administration was amended by the Senate to condition its lifting on Presidential certification that such action would support a solution of the Cyprus issue. This action will hopefully hasten a settlement in Cyprus and revitalize U.S.-Turkish relations while strengthening the North American Alliance, of which Turkey is an essential member.

Other major achievements of the 95th Congress must include:

A refinancing of the social security system to make it solvent into the next century for Americans living in retirement now and in the future;

An increase in the minimum wage over the next 4 years to insure low-paid workers a decent living;

An extension of the equal rights amendment ratification date until June 30, 1982;

A proposed amendment to the Constitution granting voting representation in the House and Senate to the District of Columbia;

An increase of 152 new Federal district and circuit judgeships to enable the courts to efficiently and expeditiously handle their caseloads;

Deregulation of airline rates which has already benefitted consumers by reduced airfares; and

Nuclear nonproliferation legislation which will lessen the spread of nuclear materials and technology while improving the framework for international cooperation.

The Congress enacted numerous important reauthorizations and modification of existing programs ranging from aid to education to veterans' pensions. The Senate passed other important legislation, notably a sunset bill requiring systematic review and authorization of Government spending programs at least every 10 years. This process would increase the options for allocating Federal resources to meet changing national needs and could result in enormous savings. The Senate also approved a hospital cost containment bill requiring mandatory controls on hospital cost increases if they cannot be held down by 2 percent in 1978 and 1979.

This impressive record of achievement could not have been possible without the unflagging diligence of all Members of the Senate, who have worked long and hard and can be justifiably proud of their considerable accomplishments. I take this opportunity to thank the assistant majority leader, Senator CRANSTON, for his untiring assistance throughout the past 2 years. I wish to acknowledge my gratitude to the minority leader, Mr. BAKER, and the minority whip, Mr. STEVENS, for their cooperation in expediting the work of the Senate.

A more complete listing of the achievements of the 95th Congress is contained in a report prepared by the staff of the democratic policy committee. I ask unanimous consent that that report and related material be inserted in the RECORD at the conclusion of my remarks.

There being no objection, the report was ordered to be printed in the RECORD, as follows:

ENERGY-RELATED LEGISLATION 1969–1977

(October 13, 1978)

91st Congress (1969–1970) (5):

1. Public Law 91–158, Interstate Oil Compact Commission, 2-Year Extension, S.J. Res. 54.

2. Public Law 91–173, Coal Mine Health and Safety Act of 1969, S. 2917.

3. Public Law 91–245, Oil and Gas Leases, S. 1193.

4. Public Law 91–581, Geothermal Steam Act of 1970, S. 368.

5. Public Law 91–631, National Mines and Minerals Policy Act, S. 719.

92d Congress (1971–1972) (7):

6. Public Law 92–84, Atomic Energy Commission Authorization, 1972, H.R. 9388.

7. Public Law 92–307, Temporary Operating Licenses for Nuclear Powerplants, H.R. 14655.

8. Public Law 92–314, Atomic Energy Commission Appropriations, 1973, S. 3607.

9. Public Law 92–401, Natural Gas Pipeline Safety Act of 1968, H.R. 5065.

10. Public Law 92–500, Federal Water Pollution Control Act Amendments of 1972, S. 2770.

11. Public Law 92–583, Coastal Zone Management Act of 1972, S. 3507.

12. S. Res. 45, to establish the Senate National Fuels and Energy Policy Study Group.

93d Congress (1973–1974) (43):

13. Public Law 93–28, Economic Stabilization Act Amendments of 1973; Voluntary Petroleum Allocation, S. 398.

14. Public Law 93–60, AEC Authorization, S. 1994.

15. Public Law 93–74, NASA Authorization, H.R. 7528.

16. Public Law 93–87, Federal-Aid Highway Act, S. 502.

17. Public Law 93–88, Euratom Corporation Act of 1958 Amendments, S. 1993.

18. Public Law 93–119, Oil Pollution Act Amendments, H.R. 5451.

19. Public Law 93–153, Mineral Leasing Act of 1920, Amendments, and Trans-Alaska Oil Pipeline Authorization, S. 1081.

20. Public Law 93–159, Emergency Petroleum Allocation Act of 1973, S. 1570.

21. Public Law 93–182, Emergency Daylight Saving Time Energy Conservation Act of 1973, H.R. 11324.

22. Public Law 93–208, G.I. Bill Benefits During Energy Crisis, S. 2794.

23. Public Law 93–239, Highway Speed Limit Reduction, H.R. 11372.

24. Public Law 93–245, Supplemental Appropriations; Naval Petroleum Reserves, H.R. 11576.

25. Public Law 93–248, Intervention on the High Seas Act, S. 1070.

26. Public Law 93–249, Fuel Cost Pass-Through for Truckers, S.J. Res. 185.

27. Public Law 93–275, Federal Energy Administration, H.R. 11793.

28. Public Law 93–276, AEC Authorization Act, S. 3292.

29. Public Law 93–316, NASA Authorization Act, H.R. 13998.

30. Public Law 93–319, Energy Supply and Environmental Coordination Act of 1974, H.R. 14368.

31. Public Law 93–322, Special Energy Research and Development Appropriations for 1975, H.R. 14434.

32. Public Law 93–377, AEC Omnibus Legislation of 1974, S. 3669.

33. Public Law 93–383, Housing and Community Development Act, S. 3066.

34. Public Law 93–386, Aid to Energy Affected Small Businesses, S. 3331.

35. Public Law 93–403, Natural Gas Pipeline Safety Act, as amended, Additional Appropriations, H.R. 15205.

36. Public Law 93–409, Solar Heating and Cooling Demonstration Act of 1974, H.R. 11864.

37. Public Law 93–410, Geothermal Energy Research, Development, and Demonstration Act, H.R. 14920.

38. Public Law 93–426, Defense Production Act of 1950, two-year extension, S. 3270.

39. Public Law 93–434, Emergency Daylight Saving Time Energy Conservation Act of 1973, Amendments, H.R. 16102.

40. Public Law 93–438, Energy Reorganization Act of 1974, H.R. 11510.

41. Public Law 93–454, Federal Columbia River Transmission System, S. 3362.

42. Public Law 93–473, Solar Energy Research, Development and Demonstration Act of 1974, S. 3234.

43. Public Law 93–482, Duty Free Entry of Methanol for use as Fuel, H.R. 11251.

44. Public Law 93–485, International Nuclear Cooperation Act, S. 3698.

45. Public Law 93–496, National Railroad Passenger Corporation, H.R. 15427.

46. Public Law 93–511, Emergency Petroleum Allocation Act of 1973 Extension, H.R. 16757.

47. Public Law 93–514, Nuclear Information Annual Report, S. 3802.

48. Public Law 93–522, Sequoia National Park Hydroelectric Project, H.J. Res. 444.

49. Public Law 93–577, Federal Nonnuclear Energy Research and Development Act of 1975, S. 1283.

50. Public Law 93–627, Deep Water Ports Act, H.R. 10701.

51. Public Law 93–643, Federal-Aid Highway Act Amendments of 1975—Fuel Exports to U.S.S.R., S. 3934.

52. Public Law 93–646, Export-Import Bank Act Amendments, H.R. 15977.

53. S. Res. 138, National Consumer Effort to Save Gas.

54. S. Res. 249, Oil Price Increase.

55. S. Res. 279, Washington Energy Conference.

94th Congress (1975–1976) (23):

56. Public Law 94–12, Tax Reduction Act of 1975; Repeal of Depletion Allowance, H.R. 2166.

57. Public Law 94–18, Nuclear Regulatory Commission Authorization, S. 994.

58. Public Law 94–79, Nuclear Regulatory Commission Authorization, S. 1716.

59. Public Law 94–139, TVA Bonding Authority, H.R. 9472.

60. Public Law 94–163, Energy Policy and Conservation Act, S. 622.

61. Public Law 94–180, Public Works—ERDA Appropriations 1976, H.R. 8122.

62. Public Law 94–187, ERDA Authorization 1976, H.R. 3474.

63. Public Law 94–197, Nuclear Accident Indemnity, H.R. 8631.

64. Public Law 94–227, International Petroleum Exposition, S.J. Res. 59.

65. Public Law 94–258, Naval Petroleum Reserves Production Act of 1976, H.R. 49.

66. Public Law 94–269, ERDA Supplemental Authorization, 1976, S. 3108.
67. Public Law 94–291, Nuclear Regulatory Commission Authorization, S. 3107.
68. Public Law 94–332, Federal Energy Administration Extension, S. 3625.
69. Public Law 94–355, Public Works—ERDA Appropriations, 1977, H.R. 14236.
70. Public Law 94–364, Motor Vehicle Information and Cost Savings Act, S. 1518.
71. Public Law 94–370, Coastal Zone Management Act Amendments, State grants, S. 586.
72. Public Law 94–377, Federal Coal Leasing Amendments Act, S. 391.
73. Public Law 94–385, Energy Conservation and Production, H.R. 12169.
74. Public Law 94–413, Electric and Hybrid Vehicle Research, Development and Demonstration Act of 1976, H.R. 8800.
75. Public Law 94–422, Land and Water Conservation Fund Act, S. 327.
76. Public Law 94–477, Natural Gas Pipeline Safety, H.R. 12168.
77. Public Law 94–493, Interstate Oil and Gas Compact, S.J. Res. 126.
78. Public Law 94–586, Alaskan Gas Transportation, S. 3521.

95th Congress (1977–78) (30):

79. Public Law 95–2, Natural Gas Emergency, S. 474.
80. Public Law 95–3, Urgent Power Supplemental Appropriations, H.J. Res. 227.
81. Public Law 95–36, Deepwater Ports, S. 891.
82. Public Law 95–39, ERDA Nonnuclear Authorization, 1977, S. 36.
83. Public Law 95–52, Export Control Administration, H.R. 5840.
84. Public Law 95–70, FEA Authorization, S. 1468.
85. Public Law 95–87, Stripmining Reclamation, H.R. 2.
86. Public Law 95–91, Department of Energy, S. 826.
87. Public Law 95–95, Clean Air, H.R. 6161.
88. Public Law 95–96, Public Works—Energy Research Appropriations, 1978, H.R. 7553.
89. Public Law 95–158, Alcan Pipeline, H.J. Res. 621.
90. Public Law 95–164, Mine Safety, S. 717.
91. Public Law 95–183, ERDA Nuclear Authorization, S. 1339.
92. Public Law 95–236, Radiation Exposure, S. 266.
93. Public Law 95–238, ERDA Nuclear/Nonnuclear Authorization, S. 1340.
94. Public Law 95–242, Nuclear Nonproliferation, H.R. 8638.
95. Public Law 95–279, Emergency Agricultural Act—Gasahol Program, H.R. 6782.
96. Public Law 95–297, Petroleum Marketing Practices, H.R. 130.
97. Public Law 95–315, Small Business Energy Loans, H.R. 11713.
98. Public Law 95–343, Stripmining Program Authorizations, S. 2463.
99. Public Law 95–356, Military Construction Authorization, 1979—Solar, Geothermal and Utility Systems Programs, H.R. 12602.
100. Public Law 95–372, Outer Continental Shelf, S. 9.
101. Public Law 95–424, International Development Assistance—Bilateral Assistance, H.R. 12222.
102. Public Law 95–434, National Science Foundation Authorization, H.R. 11400.
103. Public Law 95–448, Agriculture Appropriations, 1979—Energy Conservation Programs, H.R. 13125.
104. Public Law 95– , Interior Appropriations, 1979—Energy Production, Supply and Population Programs, H.R. 12932.
105. Public Law 95– , Rate Discrimination, S. 2249.
106. Public Law 95– , Nuclear Regulatory Commission Authorization—Uranium Mill Tailings, S. 2584.
107. Public Law 95– , Department of Energy—Military Authorization, H.R. 11686.
108. Public Law 95– , Coal Leasing, S. 3189.

ENERGY MEASURES, 95TH CONGRESS

(October 13, 1978)

Enacted 30:

Agricultural Appropriations, 1979—Energy Conservation Programs (H.R. 13125, P.L. 95–448)
Alcan Pipeline (H.J. Res. 621, P.L. 95–158)
Clean Air (H.R. 6161, P.L. 95–95)
Coal Leasing (S. 3189, P.L. 95–)
Deepwater Ports Extension (H.R. 6401, P.L. 95–36)
Department of Energy (S. 826, P.L. 95–91)
Department of Energy—Military Authorization (H.R. 11686, P.L. 95)
Emergency Agricultural Act—Gasohol Program (H.R. 6782, P.L. 95–279)
ERDA Nonnuclear Authorization, 1977 (S. 36, P.L. 95–39)
ERDA Nuclear Authorization (S. 1339, P.L. 95–183)
ERDA Nuclear/Nonnuclear Authorization—Civilian (S. 1340, P.L. 95–238)
Export Control—Arab Boycott (H.R. 5840, P.L. 95–52)
FEA Authorization (S. 1468, P.L. 95–70)
Interior Appropriations, 1979—Energy Production, Supply, and Regulation Programs (H.R. 12932, P.L 95–)
International Development Assistance—Bilateral Assistance for Energy Resource Development (H.R. 12222, P.L. 95–424)
Military Construction Authorization, 1979—Solar, Geothermal and Utility Systems Programs (H.R. 12602, P.L. 95–356)
Mine Safety (S. 717, P.L. 95–164)
National Science Foundation Authorization (H.R. 11400, P.L. 95–434)
Natural Gas Emergency (S. 474, P.L. 95–2)
Nuclear Nonproliferation Act (H.R. 8638, P.L. 95–242)
Outer Continental Shelf (S. 9, P.L. 95–372)
Petroleum Marketing Practices (H.R. 130, P.L. 95–297)
Public Works—Energy Research Appropriations, 1978 (H.R. 7553, P.L. 95–96)
Radiation Exposure (S. 266, P.L. 95–236)
Rate Discrimination (S. 2249, P.L. 95–)
Small Business Energy Loans (H.R. 11713, P.L. 95–315)
Strategic Petroleum Reserve Plan No. 1 (S. Res. 429—S. Agreed to disapproval resolution)
Stripmining (H.R. 2, P.L. 95–87)
Stripmining Program Authorization (S. 2463, P.L. 95–343)
Urgent Power Supplemental Appropriations, 1977 (H.J. Res. 227, P.L. 95–3)

In conference (Ten):

Coal Conversion (H.R. 5146—S. agreed to conf. rept.)
Energy Conservation (H.R. 5037—S. agreed to conf. rept.)
Energy Taxation (H.R. 5263—Conf., rept. filed)
HUD Authorization—Solar and Home Insulation Programs (S. 3084)
Natural Gas Pipeline Safety (S. 1895)
Natural Gas Pricing (H.R. 5289—S. agreed to conf. rept.)
Nuclear Regulatory Commission Authorization—Uranium Mill Tailings (S. 2584)
Public Utility Rate Reform (H.R. 4018—S. agreed to conf. rept.)
Solar Photovoltaic Energy (H.R. 12874)
Water Resource Projects—Waterway User Fee—Fuel Use Taxes (H.R. 8309 and H.R. 8533)

Passed Senate, not House (9):

Alaska Pipeline Destruction (S. 1496)
Educational Institution Energy Savings Grants (S. 701—Provisions are now in energy conservation bill)
Endangered Species—Possible exemptions for certain energy supply projects (S. 2899)
Energy Conservation Tax Credit—S. added provisions on floor (H.R. 112)
ERDA Nuclear Authorization—Civilian/Military (S. 1341)
ERDA Synthetic Fuel Loan Guarantee Program (S. 37)
Natural Gas Pipeline Safety (S. 1895)
Oil Shale Commercialization (S. 419)
Pipeline Destruction (S. 1502—Provisions contained in S. 1895)

Vetoed (2):

ERDA Nuclear/Nonnuclear—Civilian (S. 1811—Contained Clinch River—enacted as P.L. 95–238)
Public Works Energy Research Appropriations, 1979—Energy Research Projects (H.R. 12928)

SUMMARY OF LEGISLATIVE ACHIEVEMENTS, 95TH CONGRESS

AGRICULTURE

Agricultural credit: Amends the Consolidated Farm and Rural Development Act in order to improve Federal agricultural assistance programs; establishes a new economic emergency loan program for farmers and ranchers; extends eligibility for farm real estate and operating loans to family farm corporations, cooperatives and partnerships; authorizes the Secretary to make, insure or guarantee loans to farmers for meeting Federal, State or local requirements for agricultural, animal or poultry waste pollution abatement and control facilities; increases the lending limits for farm real estate and operating loans; authorizes the Secretary to make, insure or guarantee loans of up to $1 million to rural communities cut off from access to electric energy sources for the construction, acquisition and operation of power transmission facilities; establishes a special low-income farm ownership loan program for small family farmers who are unable to get credit under the act's regular programs and provides that interest rates be no higher than five percent; establishes a new economic emergency loan program through May 15, 1980, for farmers, ranchers or domestic agricultural corporations and partnerships who (1) have adequate experience and resources, (2) need such credit to maintain a viable agricultural production operation, and (3) are unable to obtain sufficient credit elsewhere due to national or areawide economic stress and limits such loans to $400,000 per borrower, interest rates to the government plus one percent, and government guarantees up to 90 percent; extends and amends the Emergency Livestock Credit Act of 1974 to enable the Secretary to make new loan guarantees through September 30, 1979; authorizes payments to agricultural producers who carry out emergency measures to control wind erosion on farmlands or to rehabilitate farmlands damaged by wind erosion on farmlands or to rehabilitate farmlands damaged by wind erosion or other natural disasters; and authorizes the Secretary to increase the target price for rice under certain conditions to compensate producers for participation in the set-aside. H.R. 11504—Public Law 95–334, approved August 4, 1978.

Agricultural exports: Authorizes the Commodity Credit Corporation (CCC) to finance export sales of U.S. agricultural commodities out of CCC and private stocks on "intermediate" credit terms (in excess of three years but not more than ten years) to develop, expand or maintain the importing nation as a foreign market on a long-term basis for the commercial sale and export of U.S. agricultural commodities; and requires the Secretary to provide "short-term" CCC financing (not to exceed three years) to ex-

porters of U.S. agricultural commodities who need to provide their customers such short-term deferred payment terms to meet sales competition from other nations or to make additional export sales and authorizes such credit for commercial sales to the People's Republic of China. S. 3447—Passed Senate September 8, 1978; Passed House amended September 25, 1978; Senate agreed to conference report October 11, 1978.

Agricultural foreign investment information: Requires all foreign nationals who hold interests in U.S. agricultural land on the effective date of this bill to submit reports to the Secretary of Agriculture detailing their nationality, type of interest held, location of the land, acreage involved, date of acquisition of the interest, purchase price or other consideration and other specified information; requires the Secretary to analyze the information and submit annual reports to the President and the Congress on the effects of such investments. S. 3384—Public Law 95-—, approved 1978.

Aquaculture policy: Establishes a National Acquaculture Council to report to the Congress biennially on the status of U.S. aquaculture and to establish within 18 months of enactment, a National Aquaculture Development Plan setting forth those actions which the Federal government should undertake to further the development of aquaculture; establishes an Interagency Aquaculture Coordinating Committee to ensure a continuing exchange of information; authorizes the use of grants or contracts to carry out various provisions of the act; and provides for an insurance program for stock, property and liability if, within the first 18 months, a need is indicated. H.R. 9370—Public Law 95-443, approved October 10, 1978.

Beef and veal imports: Stabilizes U.S. beef and veal production and prices at levels adequate to provide a fair return to domestic producers; insures U.S. consumers adequate supplies at reasonably stable prices; provides imported beef and veal reasonable access to the U.S. market; modifies the adjusted base quantity for unprocessed beef and veal by a countercyclical factor; establishes a new adjusted base quantity for processed beef and veal; permits the President to suspend or increase the quotas under certain circumstances; and provides that no more than 54 percent of the annual quota amount, or estimated annual imports in the absence of a quota, could enter the U.S. in any calendar half beginning on January 1 or July 1 of any year. H.R. 5052—Passed House July 18, 1977; Passed Senate amended May 5, 1978.

Commodity Futures Trading Commission: Extends through fiscal 1982 the authorization for the five-member Commodity Futures Trading Commission headed by a chairman who will serve at the President's pleasure; prohibits any commissioner or GS-16 or higher employee from transacting business for others with the Commission for one year after leaving the Commission; confers jurisdiction on the States to prosecute violations of the Commodity Exchange Act in Federal district courts and increases the criminal penalties for violations; exempts dealers, processors, brokers, sellers or cash commodities, nonprofit voluntary membership and general farm organizations from the registration and related recordkeeping and reporting requirements; contains new provisions on commodity option transactions and requires the Commission to issue regulations concerning the granting and offering of options on physical commodities; permits the Commission to authorize a registered futures association to perform any of the registration functions with respect to associated persons; permits the responsibility of the contract market for the conduct of an arbitration process to be delegated to certain registered futures associations; requires public disclosure of the reasons and penalties in proceedings to discipline or deny membership to any person; requires the Commission to regulate leverage transactions including those involving gold or silver bouillon on bulk coins; and contains other provisions to improve and strengthen the regulation of the nation's $1.1 trillion commodity futures industry. S. 2391—Public Law 95-405, approved September 30, 1978.

Cooperative forestry assistance: Consolidates in one statute and clarifies the authorities for existing cooperative forestry assistance programs, now contained in seven separate statutes, which are administered by the Secretary of Agriculture; establishes congressional policy on the desirability of a cooperative Federal and State effort to maintain and improve non-Federal forest lands; establishes a rural life disaster fund to assist States in dealing with rural fire emergencies; establishes programs of management assistance, planning assistance, and technology implementation for State foresters; permits States, upon development of a State forestry plan, to consolidate individual Federal cooperative forestry program grants (except for forestry incentive cost-share payments and payments from any special Treasury fund) into a single annual grant to be matched by the State; and provides that the programs are to be administered to complement the related activities of the Forest Service and other agencies of the Department of Agriculture. H.R. 11777—Public Law 95-313, approved July 1, 1978.

Emergency Agricultural Act: Amends the Food and Agricultural Act of 1977 to give the Secretary of Agriculture discretionary authority to increase the target prices for wheat, feed grains and upland cotton for the 1978 through 1981 crops whenever a set-aside program is in effect for one or more of these crops; allows the Secretary to increase the target price for any other commodity (except rice) in such amounts as he determines necessary for the effective operation of the program; increases the borrowing authority of the Commodity Credit Corporation from $14.5 to $25 billion, effective Ocotber 1, 1978; provides that the Secretary may permit the acreage set aside or diverted from the production of a commodity to be devoted to the production of any other commodity for the conversion into gasohol if the Secretary determines that such production is desirable; and provides, effective October 1, 1978, that the Secretary—during any year in which there is no set-aside or diverted acreage—may make incentive payments for production of commodities to be converted into gasohol if such production is desirable. H.R. 6782—Public Law 95-279, approved May 15, 1978.

FIFRA: Extends through fiscal 1979 the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) and authorizes therefor $54.5 million for 1978 and such sums as necessary but not to exceed $70 million for 1979; gives the States primary enforcement responsibility subject to certain conditions and broadens their ability to issue regulations to meet special local needs; authorizes a State to approve additional uses of Federally-registered pesticides for use within the State to meet special local needs; precludes EPA from disapproving a State registration on grounds that the pesticide is not essential but provides that it could suspend the authority of a State to register local-use pesticides if the State lacks adequate controls or to disapprove a registration if an imminent hazard exists; retains EPA's authority to reclaim enforcement authority in emergencies; authorizes simplified registration procedures, including provision for conditional registration under certain circumstances; and contains provisions relating to data owners' rights and compensation and limiting disclosure of trade secret information. S. 1678—Public Law 95-396, approved September 30, 1978.

Forest and rangeland renewable resources: Repeals the McSweeney-McNary Act of 1928 and replaces it with updated and expanded authority for the Secretary of Agriculture to implement and conduct programs of forest and rangeland renewable resources research; directs the Secretary to make and keep current a comprehensive survey and analysis of the forest and rangeland renewable resources; authorizes establishment of a system of experiment stations for conducting renewable resources research; expands the Secretary's authority to acquire land and to accept donated money and property for renewable resources research; and authorizes competitive grants and advances of funds to grantees and persons cooperating with the Secretary in performing research. H.R. 11778—Public Law 95-307, approved June 30, 1978.

Land and water resources conservation: Establishes a mechanism for making long-range policy to encourage the wise and orderly development of the nation's soil and water resources: requires the Secretary of Agriculture to (1) prepare an appraisal of the nation's land, water and related resources and (2) develop a national land and water conservation program setting forth the direction for future soil and water conservation efforts by the Department of Agriculture on the nation's private and non-Federal lands by December 31, 1979, and to update them each fifth year thereafter; requires that the appraisal and the program together with a detailed statement of policy for soil and water conservation activities be transmitted to Congress on the first day it convenes in 1980 and at each five-year interval thereafter; requires the President, beginning in fiscal 1982, to transmit to Congress a report stating the extent to which the programs and policies projected under the budget meet the statement of policy and to set forth reasons for requesting Congress to approve a lesser program or policy presented in the budget; requires the Secretary to submit to Congress, beginning with fiscal 1982, an annual report evaluating the program's effectiveness; and authorizes such sums as necessary to carry out the act. S. 106—Public Law 95-192, approved November 18, 1977.

Omnibus farm bill: Extends through fiscal 1981 the basic price support programs for wheat, feed grains, cotton, rice, and wool, the food stamp program, and the Food for Peace Program (Public Law 480); extends for three years the authorization for the Environmental Protection Agency to regulate pesticides; and establishes a new charter, and clearer direction for the Federal role in agricultural research; places a limitation of $40,000 on the total payments which a person may receive annually under one or more of the programs for wheat, feed grains, and upland cotton for the 1978 crops, $45,000 for the 1979 crops, and $50,000 each for the 1980 and 1981 crops instead of the present $20,000 ceiling; limits such payments for rice to $52,250 for the 1978 crops, and $50,000 each for the 1979, 1980 and 1981 crops instead of the present $55,000 limitation; sets the price support for milk at 80 percent of parity adjusted semianually but reviewed quarterly through March 31, 1979; requires the Secretary to formulate a producer storage program on original or extended price support loans for wheat and feedgrains at the same support level as provided by the 1949 Act, as amended, repayable in three to five years; authorizes the President to negotiate a system of food reserves for humanitarian food

relief and to maintain such a reserve of food commodities as a contribution of the United States to the system; expands the authority of the Secretary to acquire commodities for disposition in the event of national disasters; makes certain changes in the farm storage facility loan program; authorizes the Secretary to implement an emergency feed program to assist producers in preserving and maintaining livestock; eliminates the Food Stamp purchase requirement; limits participation to households whose incomes and other financial resources are determined to be a substantial limiting factor in permitting them to obtain a nutritionally adequate diet; eliminates automatic, categorical eligibility of welfare recipients; establishes a new program of grants for high-priority agricultural research to be awarded on the basis of competition among scientific research workers and all colleges and universities; establishes a new program of grants for facilities and instrumentation used in agricultural research; establishes a new program of education grants and fellowships to strengthen training and research programs in the food and agricultural sciences, to be awarded on the basis of competition; and makes certain improvements regarding grain inspection. S. 275—Public Law 95–113, approved September 29, 1977.

Sugar stabilization: Authorizes the President to implement the International Sugar Agreement (ISA), including authority to limit entry of sugar from non-ISA member countries or areas; establishes a price objective of 16 cents per pounds raw value for sugar beginning sugar supply year 1978 (which starts October 1, 1978) through sugar supply year 1982; continues the right to waive countervailing duties until February 15, 1979; authorizes the President to contribute up to 5,000 long tons of tin metal from the national defense stockpile to the tin buffer stock and authorizes the General Services Administrator to dispose of another 30,000 tons of surplus tin from the domestic strategic stockpile; and prohibits the use of price support payments to producers and processors of sugar cane or sugar beets while the fees and quotas are in effect;

Amends the Social Security Act to make needed improvements in the programs of supplemental security income benefits, aid to families with dependent children, child welfare service, and social services. H.R. 7200—Passed House June 14, 1977. Passed Senate amended October 12, 1978. In conference.

BUDGET

Third budget resolution, 1977: Revises the Second Budget Resolution for fiscal 1977 setting the level of revenues at $347.7 billion, outlays at $417.45 billion, new budget authority at $472.9 billion, deficit at $69.75 billion, and public debt at $718.4 billion. S. Con. Res. 10—Action completed March 3, 1977.

First budget resolution, 1978: Recommends 1978 total budget revenues of $396.3 billion, outlays of $460.95 billion, new budget authority of $503.45 billion, deficit of $64.65 million and public debt level of $784.9 billion. S. Con. Res. 19—Action completed May 17, 1977.

Second budget resolution, 1978: Revises the First Budget Resolution for fiscal 1978 setting the level of revenues at $397 billion, outlays at $458.25 billion, new budget authority at $500.1 billion, deficit at $61.25 billion, and public debt at $775.45 billion. H. Con. Res. 341—Action completed September 15, 1977.

First budget resolution, 1979: Recommends 1979 total estimated revenues of $447.9 billion, outlays of $498.8 billion, new budget authority of $568.85 billion, deficit of $50.9 billion and public debt level of $849.1 billion. S. Con. Res. 80—Action completed May 17, 1978.

Second budget resolution: Revises the First Budget Resolution for fiscal 1979 setting the level of revenues at $448.7 billion, outlays $38.8 billion and public debt at $836.0 billion. H. Con. Res. 683—Action completed September 23, 1978

CIVIL AND CRIMINAL JUSTICE

Age discrimination in employment: Raises the upper age limit of the Age Discrimination in Employment Act from 65 to 70, effective January 1, 1979; prohibits the application of a mandatory retirement age of less than 70 which is contained in a seniority system or an employee benefit plan; permits the compulsory retirement of management or highly compensated employees at the age of 65 or above if they will receive an employer-provided annual retirement benefit of at least $27,000 exclusive of social security; permits colleges and universities to maintain until July 1, 1982, compulsory retirement policies for faculty at age 65 or above with unlimited tenure; eliminates effective September 30, 1978, the upper age limitation for most Federal employees; provides that the effective date of the prohibition against mandatory retirement between the ages of 65 and 70 if such policies are contained in collective bargaining agreements which are in effect on September 1, 1977, shall be delayed until the termination of the contract or January 1, 1980. H.R. 5383—Public Law 95–256, approved April 6, 1978.

Bankruptcy reform: Modernizes the bankruptcy law by codifying a new title that will embody the substantive law of bankruptcy and makes extensive amendments to title 28, Judiciary and Judicial Procedure, that will encompass the structure of the revised bankruptcy courts; vests the power to appoint bankruptcy judges in the courts of appeals rather than in the district courts; provides that a judge shall be compensated at an annual rate of $48,500 and shall serve for a 12-year term; provides that a bankruptcy judge may be removed for incompetence, misconduct, neglect of duty and disability, as determined by the judicial council of the circuit; and calls for a three-year transition period to ensure the availability of experienced bankruptcy judges for service on the bankruptcy bench. H.R. 8200—Public Law 95– , approved 1978.

Child adoption and child abuse prevention: Extends for four years the authorizations for the Child Abuse Prevention and Treatment Act and authorizes $10.5 million for programs and projects designed to prevent, identify and treat sexual abuse of children, including programs involving the treatment of family units; authorizes $5 million to facilitate the removal of barriers to interstate adoptions and the placement of children with special needs in permanent adoptive homes; and establishes within HEW an administrative arrangement to provide an adoption information exchange system and to coordinate departmental programs as well as to carry out education and training programs. H.R. 6693—Public Law 95–266, approved April 24, 1978.

Child pornography: Makes it a Federal offense to use children under the age of 16 in the production of pornographic materials which are to be mailed or otherwise transported in interstate or foreign commerce; proscribes the interstate transportation of persons under 18 years of age for the purpose of engaging in prostitution by extending the Mann Act's provisions against female prostitution to include juvenile males; and amends the penalty provisions regarding mailing, importation, or transportation of obscene materials to increase the penalties up to ten years' imprisonment or $10,000 or, in case of a second offense, a minimum of two years and a maximum of 15 years' imprisonment and up to $15,000. S. 1585—Public Law 95–225, approved February 6, 1978.

Cigarette racketeering: Makes cigarette smuggling a Federal offense and establishes trafficking in contraband cigarettes as a racketeering offense under the Criminal code; defines "contraband cigarettes" as 60,000 or more cigarettes bearing no identification that applicable State taxes were paid; directs the Secretary of Treasury to enforce these provisions and to prescribe such rules and regulations as necessary; and imposes a fine of $100,000 and/or five years' imprisonment for dealing in contraband cigarettes and a fine of $5,000 and/or three years' imprisonment for violating any rules or regulations prescribed by the Secretary or knowingly making any false statement or misrepresentation with respect to any required recordkeeping, S. 1487—Passed Senate September 29, 1978; Passed House amended October 3, 1978; conference report filed.

Criminal code reform: Creates for the first time a systematic, consistent and comprehensive Federal criminal code to remedy the hodgepodge that now exists by replacing title 18 with a "Federal Criminal Code"; creates a Commission to establish guidelines to govern the imposition of sentences for all Federal offenses; provides for a structure of consistent penalties for conduct of a similar nature or seriousness; provides for appellate review of a sentence by appeal of the defendant if it exceeds the maximum guideline for such a crime or by the government if it is less than the minimum; provides that the maximum term of imprisonment established by the Commission shall not exceed the minimum by more than 25 percent; requires the Commission in promulgating guidelines to consider alternatives to incarceration for nonviolent first offenders; allows pretrial detention of an individual charged with a serious crime such as murder, rape, armed kidnapping, drug trafficking and armed robbery; reduces the present 79 different terms to define state of mind to four: intentional, knowing, reckless or negligent; defines offenses in terms of the underlying misconduct (e.g., kidnapping) and the particular circumstances under which the Federal government may exercise jurisdiction over the criminal conduct (e.g., transportation of the victim across a State line); provides penalties for the use of dangerous weapons by para-military groups that intend to take over a function of government by force; repeals the Smith Act of 1940 which prohibited advocacy of the overthrow of the government; makes it an offense to conspire within the U.S. to assassinate a foreign official; adds an offense for possession of an eavesdropping device with intent that it be used unlawfully; vests jurisdiction in the Federal government over any felony, such as burglary, committed for the purpose of affecting a Federal election; adds discrimination on the basis of sex to other forms of discrimination prohibited; allows Federal prosecution of assault or murder while prosecuting for a civil rights violation; applies sex offenses without discrimination to both men and women and includes forcible sodomy in the definition of rape; provides that rape by means of force, threats of imminent serious injury or kidnapping or drugs will be punishable even where the victim is married to the offender; eliminates corroboration of a victim's testimony; prohibits defense or grading distinction based upon the promiscuity of the victim and severely restricts inquiry into the prior sexual conduct of the victim; expands the offense of kidnapping to include a case in which one hold his own child for ransom, as a hostage, or with similar criminal intent;

proscribes the takeover of legitimate businesses with the proceeds of a racketeering enterprise; provides that simple possession of more than 100 grams (about one pound) of an opiate (which retails for at least $4,000) is made a more serious offense than a simple possession of other drugs; makes possession of 30 grams (about one ounce) or less of marijuana subject to prosecution by summons rather than arrest, reduces the penalties and has liberal provisions for expungement of the record of conviction; provides a mandatory sentence of at least two years for commission of violent crimes in which firearms were used; narrows existing law so that an incitement to riot may not be prosecuted unless a riot actually occurs; redefines a riot to include ten participants instead of three; and creates a consumer protection offense to allow more effective prosecution of pyramid sales schemes; strengthens the mail fraud statute and includes a consumer fraud section to assist in combatting hardcore consumer fraud; and increases fines. S. 1437—Passed Senate January 30, 1978.

Criminal diversion program: Establishes a diversion program whereby eligible persons charged with an offense which is likely to result in a conviction would waive their right to a speedy trial and enter into an agreed upon program of rehabilitation which, if successfully completed, would result in the charge being dismissed with prejudice. S. 1819—Passed Senate April 27, 1978.

Domestic violence: Provides for Federal support and stimulation of State, local and community activities to prevent domestic violence, to assist the victims of domestic violence, and to coordinate Federal programs and activities pertaining to domestic violence; and authorizes Federal formula grants to States and direct Federal grants to localities. S. 2759—Passed Senate August 1, 1978.

Equal rights amendment: Extends from March 22, 1979, to June 30, 1982, the period during which three-quarters of the State legislatures have to ratify and make valid the proposed amendment to the Constitution granting equal rights to women. H.J. Res. 638—Public Law 95– , approved 1978.

Federal rules of criminal procedure: Approves, with modifications, certain amendments to the Federal Rules of Criminal Procedures proposed by the Supreme Court on April 26, 1976, and disapproves other such amendments. H.R. 5864—Public Law 95–78, approved July 30, 1977.

Foreign intelligence surveillance: Requires a court order for electronic surveillance conducted for foreign intelligence purposes within the United States or targeted against the international communications of particular U.S. persons who are in the United States, and establishes the exclusive means by which such surveillance may be conducted; and permits emergency surveillance without a court order in limited circumstances. S. 1566—Public Law 95– , approved 1978.

Horse racing bets: Regulates interstate commerce with respect to legal interstate wagering on horse races by providing that interstate bets cannot be taken on those races within a particular State without proper compensation to the industry; establishes that the three partners in racing (tracks, horsemen and States) be in agreement on the equitable share of the off-track revenues before the off-track betting corporation may accept interstate wagers; and makes certain exemptions from these regulations. S. 1185—Public Law 95– , approved 1978.

Immigration and naturalization of adopted children: Establishes uniform procedures for admission to the United States of adopted or prospective adoptive children of U.S. citizens; allows the adoption of more than two alien children; requires that a favorable adoption home study must be performed prior to admission of an adopted child; and makes adopted children eligible for the same citizenship benefits as natural-born children. H.R. 12508—Public Law 95–417, approved October 5, 1978.

Immigration ceiling: Establishes a single worldwide ceiling of 290,000 for the admission of immigrants by combining the current, separate ceilings on immigration from the Eastern (170,000) and Western (120,000) Hemispheres; and establishes a 16-member Select Commission on Immigration and Refugee Policy to study and evaluate existing laws governing the admission of immigrants and refugees and to make recommendations to the President and Congress by September 30, 1980. H.R. 12443—Public Law 95–412, approved October 5, 1978.

Juvenile justice: Strengthens and extends for three years, the program established by the Juvenile Justice and Delinquency Prevention Act of 1974; makes changes to the formula grant program intended to clarify ambiguous language in the 1974 act, and to assist States to more effectively expand formula grant funds according to priority areas identified in the States' juvenile justice plan; requires that not more than 7.5 percent of a State's total formula grant allotment may be used to cover the costs of planning, administration, or any pre-award activities, and that any grant funds used for these purposes must be matched on a dollar-for-dollar basis from State or local funds; provides that formula grant program funds will cover 100 percent of the approved cost of any program or activity; extends eligibility for State formula grant pass-through funds to local private agencies which have previously been denied; provides that States in compliance with the deinstitutionalization requirement shall have preference for reallocated formula grant funds; provides that 25 percent of Part B funds be allocated for the special emphasis program, and expands its scope to include activities to help prevent school violence and vandalism, to promote youth advocacy, and to assist State legislatures to develop legislation to achieve State compliance with the act; prohibits the use of formula grant funds to match other LEAA funds but allows them to be so used for other Federal juvenile delinquency program grants; and authorizes funding for the extension of the Runaway Youth Act. H.R. 6111—Public Law 95–115, approved October 3, 1977.

Public safety officers group life insurance: Establishes a nationwide program of group life insurance for public safety officers that would be under the control of the Law Enforcement Assistance Administration but purchased from one or more life insurance companies; sets the amount of group life and accidental death and dismemberment insurance at the amount of the officer's salary plus $2,000, with a minimum coverage of $10,000 and a maximum of $32,000; establishes an Advisory Council on Public Safety Officers Group Life Insurance to review the administration of the program and advise the LEAA on matters of policy; and creates a fund in the Treasury known as the Public Safety Officers' Group Insurance Revolving Fund. S. 262—Passed Senate September 16, 1977.

Sex discrimination on basis of pregnancy: Amends title VII of the Civil Rights Act of 1964 to make clear that the prohibitions against sex discrimination in the act include discrimination in employment on the basis of pregnancy or pregnancy-related disabilities; provides that these provisions will take effect immediately upon enactment except that, with regard to fringe benefit plans, they are to take effect by July 1, 1980, or 180 days after enactment whichever is greater; provides that for a period of one year or until the expiration of any applicable collective bargaining agreement, employers may not reduce existing benefits as a means of coming into compliance; and provides that where employees and employers share the cost of presently existing benefits, employers are permitted to apportion the cost of any benefit required as a result of this legislation. S. 995—Passed Senate September 16, 1977; Passed House amended July 18, 1978; Senate agreed to conference report October 13, 1978.

DEFENSE

Coast Guard authorizations: Authorizes $1,262,521,000 for fiscal 1978 for the Coast Guard for the procurement of vessels and aircraft, construction and improvement of shore and offshore facilities, alteration and removal of obstructive bridges, aids to navigation, pollution abatement, administrative expenses and operating expenses; authorizes a year-end strength for active duty personnel of 39,145 and an average military student load of 5,506; includes funds for the recent presidential program of boarding and inspecting oil tankers, reactivation of Coast Guard cutters to be used as back-up vessels in the enforcement of the 200-mile Fishery Conservation Zone, enforcement of the Fishery Conservation and Management Act of 1976, and the study of oil spill containment in high seas or fast rivers; and restores funds which the Coast Guard expended as a result of the unanticipated winter storm damage. H.R. 6823—Public Law 95–61, approved July 1, 1977.

Authorizes $1,409,463,000 for fiscal 1979 for the operation and maintenance of the Coast Guard as well as acquisition, construction and improvement of vessels, aircraft and facilities, the alteration or removal of obstructive bridges and research, development, testing and evaluation; contains increased funding for the Coast Guard's law enforcement responsibilities, particularly drug patrols and fishery law enforcement and the Loran-C navigation system stations in support of NATO; authorizes an end-of-year strength for active duty personnel of 39,331 and sets at 5,445 the average military student loads; requires the Coast Guard to evaluate the adequacy of existing oilspill cleanup procedures on the Columbia River due to the increased petroleum transportation resulting from the opening of the trans-Alaskan oil pipeline; and extends the Federal programs under the Federal Boat Safety Act of 1971 through fiscal 1980 at an annual authorization of $10 million. H.R. 11465—Public Law 95–308, approved June 30, 1978.

Military construction authorizations: Authorizes $3,724,718,000 for fiscal 1978 for construction and other related authority for the military departments and the office of the Secretary of Defense within and outside the United States; contains nearly $200 million for selected projects designed to conserve energy and to control pollution at military installations; encourages utilization of solar energy where practical and economically feasible; includes $70 million for a test program which will meter energy consumed in individual military family housing units in order to establish reasonable energy consumption ceilings and to assess occupants for any consumption in excess; includes $7.3 million for construction of support facilities at Diego Garcia; establishes permanent procedures for accomplishing base realignments at military installations employing more than 500 civilian personnel; and authorizes the Secretary to enter into contracts for the purchase of fuel derived from waste products. S. 1474—Public Law 95–82, approved August 1, 1977.

Authorizes $4,128,312,000 for fiscal 1979 for construction and other related authority for the military departments, and the Office of the Secretary of Defense within and outside the United States; calls on DOD to devote increasing resources to the energy crisis; requires the incorporation of optimum solar systems in all new military family housing and in 25 percent of all new facilities placed under design; provides that solar systems will be incorporated if their cost differential can be amortized over the expected life of the facility; provides authority to develop geothermal resources on lands under military jurisdiction and to contract for the purchase of public utility services derived from energy resources other than nuclear or fossil fuel; calls for the use of recyclable waste as a source of energy; requires a report on the construction backlog for U.S. Forces in Europe supporting NATO; and redefines the term military installation for purposes of closing or realigning a base as a facility at which not less than 300 rather than 500 civilian personnel are authorized to be employed. H.R. 12602—Public Law 95-356, approved September 8, 1978.

Military procurement authorizations: Authorizes $36.1 billion for fiscal 1978 for procurement of aircraft, missiles, naval vessels, tracked combat vehicles, torpedoes and other weapons, and research, development, test and evaluation for the Armed Forces; contains funds to improve the deterrent and fighting capabilities of NATO without increasing the commitment of American ground forces; establishes a Naval Shipbuilding Commission to report on current policies and procedures; sets the endstrength for active duty personnel at 2,085,100, the average strength of the Selected Reserve at 868,900, the endstrength of civilian personnel at 1,018,600 and the average military student load at 248,894; directs the Secretary to expand the job classifications to which female members of the Armed Services may be assigned; authorizes a test educational bonus program for the Selected Reserve; requires at least one ROTC unit in each State; includes $95,250,000 for programs of the Defense Civil Preparedness Agency; provides that females who become members of the Armed Forces will incur the same six-year statutory obligation as males; extends to October 1, 1979, the President's authority to transfer by sale, credit sale or guaranty, aircraft and equipment to Israel; requires an annual accounting of all experiments and studies conducted by DOD involving human subjects; prohibits funds for advertising the Special Discharge Review Program for certain Vietnam-era individuals; reduces the authorized levels of generals and admirals to 1,073 over a three-year period beginning fiscal 1978 and provides for a like reduction in the number of civilian personnel grades GS 13-18; and provides for congressional consideration of recommended modifications in U.S. Strategic Arms Programs to facilitate negotiation or agreement in the Strategic Arms Limitation Talks. H.R. 5970—Public Law 95-79, approved July 30, 1977.

Authorizes a total of $35,235,969,000 for procurement, research and development and civil defense for fiscal 1979; includes $22,875,600,000 for procurement; authorizes $429.5 million for procurement of nine Navy F-18 fighter aircraft; $724 million for 36 F-14 (Tomcat) fighters; $145.5 million for 16 two-place TA-7D attack aircraft to modernize the National Guard forces; $12.264 billion for research and development and $209 million for payment of settlements of Naval shipbuilding claims disputes with Litton Industries and General Dynamics; supports design studies of a high performance SSBN which could complement the Trident submarine; and continued studies and exploratory development of a cruise missile carrier; sets the active duty end strength at 2,055,750, ready reserve minimum of 834,875 and a civilian personnel end strength of 1,005,500; sets the Naval reserve at 87,000; authorizes the Secretary of the Navy to assign women on certain Navy ships; establishes a ceiling for payments to physicians under CHAMPUS; extends for two years authority to provide reenlistment and enlistment bonuses to enlisted personnel in critical skills, special pay and bonuses for military health professionals, and finaicial aid to officer candidates under the Marine Corps Platoon Leaders Class program; increases and restructures the rate of special pay for sea duty; extends for two years authority for educational assistance and a reenlistment bonus for the Selected Reserve; and provides that the Commandant of the Marine Corps become a member of the Joint Chiefs of Staff. S. 3486—Public Law 95-) approved 1978.

Military unionization: Makes it unlawful for a member of the Armed Forces to join a military union or to solicit or maintain membership or for a labor organization to enroll military members, to solicit or accept dues or fees, to negotiate or bargain with the government for military members, or to represent military members in grievance proceedings; prohibits any military or civilian official of the Department of Defense from negotiating or bargaining with a purported military union or from authorizing union activities on government property; and prohibits any individual from bargaining on behalf of military members, from using military property for purposes outlawed elsewhere in the bill, or from organizing or carrying out a strike or other concerted action involving military members against the government. S. 274—Passed Senate September 16, 1977; Passed House amended September 26, 1978.

Survivors' benefits of retired military personnel: Authorizes increases in retired serviceman's family protection plan (RSFPP) annuities for the survivors of retired members who died on or before March 20, 1974; reinstates the full survivor benefit plan (SBP) payment to which the surviving spouse would otherwise be entitled subject to certain conditions; eliminates the offset of social security under the SBP where the widow or widower works; increases the guaranteed minimum annual income for certain needy widows whose husbands died prior to September 21, 1972, without being able to elect into the SBP; conforms the RSFPP law to the SBP law; provides protection to survivors of reservists who completed twenty years of Federal service and died before age 60; and provides reservists two additional options for coverage. H.R. 3702—Public Law 95-397, approved September 30, 1978.

DISASTER ASSISTANCE

Drought emergency authority: Provides temporary authorities to the Secretary of the Interior to facilitate emergency actions to mitigate the impacts of the 1976-77 drought conditions affecting irrigated lands in the western States; authorizes the Secretary to acquire water supplies by purchase from willing sellers and redistribute the water to users at negotiated prices; directs the Secretary to determine the priority of need in allocating acquired or developed water; authorizes deferment of the 1977 installment charge payments owed to the U.S. on Federal reclamation projects; requires program coordination with emergency and disaster relief operations conducted by other Federal agencies; and authorizes interest-free five-year loans to individual irrigators for construction, management and conservation activities or acquisition of water. S. 925—Public Law 95-18, approved April 7, 1977.

Removes constraints on the allocation of funds for drought assistance and permits the use of funds already appropriated for the programs authorized under Public Law 95-18 in a more effective and timely manner; and authorizes the Secretary to waive the repayment of loans made if the recipient agrees to undertake a program of water conservation. S. 1935—Public Law 95-107, approved August 17, 1977.

Drought emergency relief: Authorizes $225 million in grant and loan authority to the Economic Development Administration for assistance to States, Indian tribes or units of local government with a population of 10,000 or more for drought-related projects; specifies the permissible activities for which grants may be made; limits grants to 50 percent of the cost of any project at five-percent interest for not to exceed 40 years; and permits obligation of funds for drought impacted projects conducted by eligible applicants during fiscal 1977 if they are compatible with the purposes of the act. S. 1279—Public Law 95-31, approved May 23, 1977.

Small business disaster loans: Authorizes $50 million to the Small Business Administration to make disaster loans to relieve economic injury caused by the 1976-77 drought at a five percent rate of interest and up to 30 years; permits SBA to make loans for short term construction projects to improve water conservation practices or to rehabilitate, replace or augment water supply facilities adversely affected by the drought; and makes farms and businesses in drought-designated areas eligible for such loans. S. 1306—Passed Senate August 4, 1977; House failed to pass under suspension of the rules November 1, 1977.

ECONOMY-FINANCE

Countercyclical revenue sharing: Extends and amends title II of the Public Works Employment Act of 1976, the Intergovernmental Antirecession and Supplementary Fiscal Assistance Amendments of 1978; extends antirecession assistance and establishes a supplementary fiscal assistance program to local governments with continued high unemployment; provides that funds to be distributed will be determined quarterly based on the most recently available unemployment data and that the amount to be authorized will depend on whether subtitle A, the antirecession program, or subtitle B, the supplementary fiscal assistance program, is in effect; provides that when the national average rate of unemployment (seaonally adjusted) equals or exceeds six percent, subtitle A will be in effect and $125 million, plus an additional $30 million for each one-tenth of one percent by which that rate of unemployment exceeds six percent, will be distributed quarterly; provides that when the national unemployment rate has been less than six percent for two consecutive calendar quarters but exceeds five percent, subtitle B, the supplementary fiscal assistance program, will be in effect and $85 million will be distributed during each calendar quarter only to local governments; continues established administrative provisions in current law; and provides that local governments scheduled to receive not more than $10,000 for any calendar quarter will receive a single payment including its entitlement of general revenue sharing. H.R. 2852—Passed House May 8, 1978; Passed Senate amended September 23, 1978; Repassed Senate amended September 26, 1978.

Export administration—Arab boycott: Extends the Export Administration Act of 1969 through fiscal 1979; requires a review of the export control lists, rules and regulations issued under the act; authorizes the Secretary of Defense to recommend his disapproval of an export license application whenever he determines that the export would be detri-

mental to U.S. national security; exempts agricultural commodities purchased for export and stored in the United States from susbequent export restrictions if such storage will not have a serious domestic inflationary impact; requires a study of the national security impact of the export of technical information to restricted countries within six months of enactment and adds other reporting and notification requirements; excludes petroleum products refined in the U.S. foreign trade zones or in Guam from any quantitative limitations imposed for short supply purposes unless the Secretary of Commerce limits such exports; prohibits export of Alaskan oil except for exchanges of crude oil in similar quantity with governments of adjacent foreign states or for oil that is temporarily exported, or where the President finds that such export is in the national interest; allows a 60-legislative-day period for such action to be vetoed by either House of Congress prior to any export; provides for termination of any contract for the export of oil if U.S. petroleum suppliers are seriously threatened; seeks to prevent most forms of compliance with foreign boycotts; prohibits refusal to do business with blacklisted firms and boycotted countries pursuant to foreign boycott demands; prohibits discrimination against any U.S. person on the grounds of race, religion, sex or national origin in order to comply with a foreign boycott or furnishing of such information for enforcement purposes; requires public disclosure of requests to comply with foreign boycotts and whether foreign boycotts are being complied with; and makes these provisions applicable to all domestic concerns and persons, including intermediaries in the export process; and provides for certain exemptions. H.R. 5840—Public Law 95–52, approved June 22, 1977.

Export-Import Bank: Extends to September 30, 1978, the operating authority of the Export-Import Bank; requires the Bank to obtain the State Department's advice on whether Bank Credits are consistent with U.S. human rights policy; directs the Bank to cooperate with other U.S. government agencies in international negotiations directed toward mutual reduction of government-subsidized export financing; requires a 25-day congressional review period before the Bank may loan or guarantee any export transaction involving nuclear power, enrichment, reprocessing, research or heavy water production facilities; prohibits the Bank from approving future financial transactions involving support for exports to a country which the Secretary of State determines has violated International Atomic Energy Agency nuclear safeguards or agreements with the U.S. concerning transfers of nuclear materials or has exploded a nuclear device (except Britain, France, China and Russia) unless the President determines that it would be in the national interest, and Congress has had 25 days to review the transaction; and prohibits the Bank from supporting the export of liquid metal fast breeder nuclear reactors and nuclear fuel reprocessing plants. H.R. 6415—Public Law 95–143, approved October 26, 1977.

Financial institutions regulatory agencies: Strengthens the supervisory authority of the Federal banking agencies over financial institutions and their affiliates; empowers the regulatory agencies to issue cease-and-desist orders against individuals directly without naming the corporate financial institution; authorizes the imposition of civil penalties of up to $1,000 per day against a financial institution or individual for violating a final cease-and-desist order; authorizes the divestiture of a nonbank subsidiary of a bank holding company if the nonbank or noninsured subsidiary constitutes a serious risk to the financial safety, soundness or stability of the subsidiary bank or insured savings and loan association; requires that loans to insiders be aggregated with loans to companies they control and, when aggregated, may not exceed the lending limitations on loans to a single borrower under Federal law in the case of a national bank or applicable State law in the case of a State-chartered bank; requires approval by two-thirds of the bank's board of directors for insider loans over $25,000 with substantially the same terms as loans prevailing in the market; authorizes the removal of an officer or director of a financial institution if the individual has demonstrated a willful disregard for the safety or soundness of the institution; prohibits interlocking management and director relationships, with certain specified exceptions, among depository institutions; prohibits interlocking relationships between a depository institution having assets in excess of $1 billion and a depository institution with assets in excess of $500 million; authorizes the Federal Reserve to exempt by rule interlocking management or director relationships among financial institutions where the effect would be procompetitive; requires prior approval of the FDIC for a State-insured nonmember bank to establish a foreign branch or invest in a foreign bank; clarifies the authority of the bank regulatory agencies to examine bank service contractors; makes it a crime to forcibly assault or intimidate a financial institution regulatory official; and proscribes revolving door employment practices by the heads of the financial institutions regulatory agencies. S. 71—Passed Senate August 5, 1977.

Foreign corporate bribes and domestic disclosures: Requires companies subject to the jurisdiction of the Securities and Exchange Commission to maintain accounting standards and management control over their assets; makes it a crime for corporations to use the mail to bribe a foreign official to obtain or retain business; imposes a maximum fine of $1 million on issuers and $10,000 and five years' imprisonment on officers, directors, employees or stockholders acting on behalf of the issuer for each violation of the criminal prohibitions; requires those persons who already file reports with the SEC when they own more than five percent of the shares in a U.S. company to identify their residence, citizenship and the nature of their beneficial ownership; and requires the Commission to consolidate the various beneficial ownership reporting requirements of the Securities Exchange Act into a centralized nonduplicative system for the collection of such information, and to tabulate and make it available to regulators and the public. S. 305—Public Law 95–213, approved December 19, 1977.

International banking: Provides for Federal regulation of participation by foreign banks in domestic financial markets by establishing the principle of competitive equality under law between foreign and domestic banks; makes Federal deposit insurance available for deposits of branches of foreign banks; places monetary policy controls over the funds of branches and agencies of foreign banks; authorizes Federal regulatory agencies to examine foreign banking operations in the United States to insure the safety and soundness of the system; and authorizes foreign banks to continue to operate across State lines. H.R. 10899—Public Law 95–369, approved September 17, 1978.

New York City loan: Provides additional financial assistance to New York City over the next four years in the form of long-term Federal guarantees of up to $1.65 billion in aggregate principal through June 30, 1982, to be available on a standby basis to be used only if the city is unable to obtain sufficient credit elsewhere; provides possibility for seasonal financing up to $325 million during 1979 only under certain conditions; provides that guarantees may be made for terms of up to 15 years; and sets conditions which must be satisfied before the Secretary of the Treasury can guarantee any city-related guarantees. H.R. 12426—Public Law 95–339, approved August 8, 1978.

New York City pension funds: Extends for four years the provision in present law which permits five New York City employee pension plans to retain their tax-exempt status under the provisions of the Internal Revenue Code, even though they purchase debt obligations issued by or on behalf of the City of New York under the terms of an agreement with the city or an agency of New York State; and extends such protection to three New York State employee pension plans should they purchase such obligations. H.R. 12051—Public Law 95– , approved 1978.

Pension plan insurance: Amends the Employee Retirement Income Security Act of 1974 to defer until July 1, 1979, the date by which multiemployer pension plans must pay an annual insurance premium to the Pension Benefit Guaranty Corporation to guarantee retirement benefits in the event that a pension plan terminates with insufficient funds; and increases the premium rate payable to the Corporation by plans that are not multiemployer plans. H.R. 9378—Public Law 95–214, approved December 19, 1977.

Public debt limit extensions: Increases the temporary debt limit from $300 billion to $352 billion for the six-month period ending March 31, 1978, making a total permanent and temporary debt limit of $752 billion. H.R. 9290—Public Law 95–120, approved October 4, 1977.

Continues through July 31, 1978, the present public debt limit of $752 billion. H.R. 11518—Public Law 95–252, approved March 27, 1978.

Sets the combined permanent and temporary public debt limit at $798 billion (which is composed of the $400 billion permanent debt limit and a $398 billion temporary debt limit which expired on July 31, 1978) through March 31, 1979, and increases by $5 billion Treasury Department authority to issue long-term bonds with interest rates above 4¼ percent. H.R. 13385—Public Law 95–333, approved August 2, 1978.

Regulation Q: Extends until December 15, 1977, existing authority (Regulation Q) under the Interest Rate Control Act by which Federal financial regulatory agencies set interest rate ceilings on deposits in financial institutions under their respective jurisdictions, and extends until August 31, 1977, the Treasury Department's authority to borrow funds from the Federal Reserve System. H.R. 3365—Public Law 95–22, approved April 19, 1977.

Extends until December 15, 1978, the authority for various Federal financial regulatory agencies to establish flexible ceilings on interest rates paid by financial institutions on time and savings deposits (Regulation Q). H.R. 9710—Public Law 95–188, approved November 16, 1977.

Regulation Q—Export-Import Bank extension: Extends until December 15, 1980, the authority for various Federal financial regulatory agencies to establish flexible ceilings on interest rates paid by financial institutions on time and savings deposits (Regulation Q); extends NOW accounts to New York and New Jersey; permits the Federal Home Loan Mortgage Company to purchase secured home improvement loans; increases from $40,000 to $100,000 the limits for IRA and KEOGH accounts; contains the provisions of S. 71, the Financial Institutions Supervisory bill, as passed by the Senate; extends for five years the Export-Import Banks au-

thority to make new commitments and increases by $15 billion the limitation on the aggregate commitments that the bank may have outstanding at any one time; and contains other provisions.

H.R. 14279—Passed House October 11, 1978; Passed Senate October 12, 1978.

Securities investor protection: Amends the Securities Investor Protection Act of 1970 to remove certain limitations which impair the efficient satisfaction of customers' claims and to address certain problems which have arisen in liquidation procedures; increases from $50,000 to $100,000 the amounts available to be distributed in liquidations to each customer and increases from $20,000 to $40,000 the amount available to satisfy claims for cash; permits the customer to receive securities to the maximum extent possible instead of cash; authorizes streamlined procedures in processing claims in cases where a significant savings in time would result; delays to November 1, 1978, the effective date of section 11(a) which prohibits all exchange members from effecting transactions on exchanges for their own accounts, accounts of their associates and accounts over which they or their associates exercise investment discretion; and increases from $500,000 to $1.5 million the maximum aggregate dollar amount of securities which may be offered to the public pursuant to an exemption from the act's registration requirements in order to encourage the growth and expansion of small business. H.R. 8331—Public Law 95–283, approved May 21, 1978.

Small business amendments: Provides multiyear authorizations for the programs administered by the Small Business Administration; earmarks specific funding levels for nonleading activities for a four-year period; mandates greater emphasis on advocacy, economic research, procurement assistance, management and technical assistance, minority small business and data maagement; authorizes banks and private lenders to form a pool of any type of SBA guaranteed loans and to issue certificates of beneficial ownership in such pools; provides for the formation of local development companies and authorizes SBA loans of up to $500,000 for each small business being assisted by the company; extends through fiscal 1980, the authority of nonprofit organizations of handicapped individuals to participate in small business procurement set-asides; makes energy shortage loans available to small business injured by any type of energy shortage; exempts business concerns employing ten or fewer employees from coverage under OSHA and from required recordkeeping on occupational injuries and illnesses; authorizes a four-year pilot program for establishing small business development centers (SBIC's) to provide management and technical assistance to small businesses and authorizes SBA to make matching grants on a 50–50 basis to any qualifying entity; defines and expands the duties of the SBA Chief Counsel for Advocacy; calls for the appointment of six Associate Administrators with defined responsibilities; contains a Small Business economic policy act with declared policy objectives and calls for a report on the credit needs of small businesses; authorizes SBA to license a new category of small business concerns, Venture Capital Investment Companies (VCIC's), to provide small business concerns; and requires the President to call a White House conference on small business by June 30, 1978. H.R. 11445—Public Law 95– , approved 1978.

Authorizes a total of $1.4 billion for fiscal 1978 and $1.565 billion for fiscal 1979 for the Small Business Administration; sets levels of $2 billion for the surety bond guarantee program, $4 million for the lease guarantee program, $150 million for pollution lease guarantees, and $171 million for salaries and expenses; places ceilings for the first time on SBA lending programs except for the physical and economic injury disaster loans which are open ended authorizations; eliminates SBA's obligation to pay interest on capital appropriations to the Real Estate Lease Guarantee Revolving Fund, the Surety Bond Guarantee Revolving Fund and the Pollution Control Lease Guarantee Revolving Fund; eliminates the authority to invest temporarily idle funds except for fees from the Pollution Control Lease Guarantee Revolving Fund; requires SBA's annual report to break out the assistance provided to socially and economically disadvantaged individuals; authorizes SBA to finance residential or commercial construction or rehabilitation for sale but provides that such loans may not be used primarily for land acquisition; authorizes SBA to make displaced business loans to small concerns suffering substantial economic injury as a result of displacement by a State or local government or public service entity which exercises its right of eminent domain; authorizes SBA economic injury loans up to $100,000, upon the request of the Governor of the State, to small businesses concerns in an area affected by a natural disaster even if the extent of the damage was not sufficient for a disaster declaration by the President, Secretary of Agriculture or Administrator of SBA; lowers the interest rate on physical disaster loans from the period July 1, 1976, to October 1, 1978, for the uninsured damaged portion of a principal residence and property; authorizes SBA to certify a small business company's ability to perform a specific government contract and provides that a contract may not be withheld for any reason if SBA issues a certificate of competency; and directs that priority be given to labor surplus areas when awarding small business set-aside contracts. H.R. 692—Public Law 95–89, approved August 4, 1977.

Establishes a small business development center program within SBA to aid in the growth and development of new and existing small businesses; and authorizes SBA to make grants to a State to defray 75 percent of the cost of developing and operating a development center program to provide smaller concerns with a broad range of advice, information and assistance and to fund 100 percent of the cost of developing and operating regional centers. S. 972—Passed Senate August 5, 1977.

Increases the fiscal 1977 authorization ceilings for the following SBA financial assistance programs: Business Loan and Investment Fund $7.4 billion, Economic Opportunity Loans $525 million, and Small Business Investment Company Program from $725 million to $887.5 million; and increases the fiscal 1977 ceiling on the Surety Bond Guarantee Program $110 million. H.R. 2647—Public Law 95–14, approved March 24, 1977.

Amends the Small Business and the Small Business Investment Acts to clarify and improve the minority enterprise small business investment company (MESBIC) program, the surety bond guarantee program, the section 8(a) and subcontracting programs and related procurement assistance activities for small businesses owned and controlled by socially and economically disadvantaged individuals; authorizes MESB'C's to form as limited partnerships; requires that SBIC's and MESB'C's formed after October 1, 1979, have private paid-in capital of not less than $500,000; creates a ten-member advisory committee to encourage the placement of subcontracts with eligible minority businesses and to foster the development and training of development program to provide assistance exclusively to minority business concerns; specifies that the procurement authority under section 8(a) will be used only for helping to develop businesses owned by socially and economically disadvantaged persons and defines the concerns eligible for such contracts; distinguishes between formally advertised and negotiated procurements; requires businesses to apply for assistance under this program; provides for the establishment of goals for small business participation in Federal procurement contracts; authorizes the Federal agencies to reserve contracts for research, development, test and evaluation, contracts for architectural and engineering services, and contracts having an estimated dollar value under $10,000 for small businesses; establishes in each Federal agency having procurement powers an Office of Small and Disadvantaged Business Utilization responsible for implementing programs under sections 8 (subcontracting) and 15 (prime contracting) of the Small Business Act; directs the Administrator of the Office of Federal Procurement Policy to promulgate a single simplified procurement regulation; establishes subcontracting requirements for certain large contracts; and authorizes SBA to make loans to local development companies to finance plant construction, conversion or expansion, including land acquisition. H.R. 11318—Public Law 95– , approved 1978. (VV)

Amends the Small Business Act to insert those provisions of the Domestic Volunteer Service Act of 1973 which govern the operation of SBA's volunteer counseling programs, SCORE (Service Corps of Executives) and ACE (Active Corps of Executives); provides workmen's compensation coverage for a SCORE or ACE volunteer injured or killed while performing counseling services pursuant to a SBA agreement; reimburses volunteers for the cost of malpractice insurance; authorizes the Administrator to accept any money or property received by SBA as a gift, devise or bequest for use in carrying out the provisions of the Small Business Act; and increases the maximum amount of compensation and subsistence allowances which SBA may pay to individuals employed by contract or experts and consultants to the same level which other agencies and departments may compensate such individuals. H.R. 13418—Public Law 95– , approved 1978. (VV)

Susan B. Anthony dollar: Authorizes the minting and issuance of a new circulating dollar coin bearing the likeness of Susan B. Anthony and continues the current Eisenhower-Apollo statutory design for collectors. S. 3036—Public Law 95–447, approved October 10, 1978.

EDUCATION

Alcohol and drug abuse education: Extends through fiscal 1981 the Alcohol and Drug Abuse Education Act of 1970, as amended and authorizes therefor $10 million for 1979, $14 million for 1980, and $18 million for 1981 which shall remain available through fiscal 1981 to permit multiple year funding. H.R. 10569—Public Law 95–336, approved August 4, 1978.

Career education incentives: Provides Federal financial incentives to States, local educational agencies, and postsecondary educational institutions to develop, implement and strengthen career education programs to ensure that education will be more closely related to the work world and career preferences of individuals; authorizes $50 million for fiscal 1979, $100 million each for 1980 and 1981, $50 million for 1982 and $25 million for 1983 to State and local educational agencies to implement career education programs in elementary and secondary schools; and authorizes $15 million annually over the five-year period to postsecondary institutions, public agencies or private nonprofit entities

for postsecondary education demonstration projects having national significance or unusual promise in promoting career education at the postsecondary level. H.R. 7—Public Law 95–207, approved December 13, 1977.

Department of Education: Provides for the establishment of a cabinet-level Department of Education headed by a high-level Federal official who can assure that education receives the appropriate emphasis and be held accountable for the successes or failures of educational programs and policies at the Federal level; transfers the education functions and programs of the following agencies: the entire Education Division of HEW as well as other education functions at HEW; the child nutrition and nutrition education programs (other than women, infants and children feeding programs) from the Department of Agriculture; the operation and administration of the overseas dependent schools from the Defense Department, a transfer which will be phased in over three years; programs relating to science education from the National Science Foundation; student loan and grant programs known and the Law Enforcement and Education Program and the Law Enforcement Intern Program from the Department of Justice; and the College Housing Loan Program from the Department of Housing and Urban Development; provides for the establishment of an Intergovernmental Advisory Council to develop policies and relations relating to education; and gives statutory authority to the Federal Interagency Committee on Education as a mechanism to coordinate education policies and practices by Federal agencies. S. 991—Passed Senate September 28, 1978.

Elementary and secondary education: Extends through fiscal 1979, programs of Federal aid under the Elementary and Secondary Education Act of 1965; and extends through fiscal 1979 and Adult Education Act, Title II of the National Defense Education Act of 1958, and the carryover authority contained in section 412(b) of the General Education Provisions Act. S. 1752—Public Law 95–112, approved September 24, 1977.

Extends the Elementary and Secondary Education Act of 1965 through fiscal 1983; authorizes $3 billion for compensatory services to children in low-income areas who show need for special educational support; includes two new elements in the title I program—incentive grants to encourage the use of State funds for compensatory education programs and concentration grants to those school districts wih the highest numbers and proportions of low-income students; modifies the basic formula for distribution of title I funds to provide for the full counting of children receiving Aid to Families with Dependent Children; provides that 50 percent of funds appropriated above the fiscal 1979 level be distributed to local educational agencies on the basis of the 1975 survey of income and education; authorizes Federal funds to match State compensatory education programs at the rate of one Federal dollar to two State dollars; extends the bilingual education program, increasing authorizations for training activities, research and evaluation, and grants; extends the provisions relating to impact aid to local school systems which pays a percentage of their educational costs to compensate for the presence of Federally-owned facilites which do not pay any taxes; amends the existing tier system, to allow increased flexibility in the appropriation process; repeals the present absorption provision; adds to owned by foreign governments and international organizations local entitlement property; extends existing law relating to adult education and adds a new program of adult education for immigrants; extends existing authorizations of elementary and secondary education program for Indians through fiscal 1983; prohibits psychiatric or psychological testing or any testing or treatment the primary purpose of which is other than achievement or aptitude testing without parental consent; and extends the Indochina Refugee Children Assistance Act of 1976 through 1983. H.R. 15—Passed House July 13, 1978; Passed Senate amended August 24, 1978; Senate agreed to conference report October 12, 1978.

Handicapped education: Extends certain programs under the Education of the Handicapped Act through fiscal 1982 and provides the authority for the Bureau of Education to support model education projects for all handicapped children under section 641 of the act. H.R. 6692—Public Law 95–49, approved June 17, 1977.

Higher education grants and loans: Expands the basic educational opportunity grants program under the Higher Education Act of 1965 so that families with incomes of $25,000 (instead of the present cutoff at $13,000) and one child in college will be eligible for a basic grant which will result in eligibility of an additional 1.5 million students; removes the cap from the guaranteed student loan program and permits any qualified family or person to borrow from private lenders for education which would be amortized and repaid through the private loan market with 100 percent payment guarantees by the Federal government; increases from $237.4 million to $500 million; increases the mandatory minimum funding for the college work-study program from $237.4 million to $500 million; increases the mandatory minimum funding for the supplemental educational opportunity grant program from $130,093,000 to $370 million for fiscal 1979 and to $450 million for fiscal 1980 and thereafter; increases the authorization for initial year supplemental grants (available to first-time students) from $200 million to $250 million; and amends the State student incentive grant program to allow continued participation in that program of States which have constitutional prohibitions against participation of nonprofit institutions of higher education in State grant programs. S. 2539—Passed Senate August 16, 1978.

Vocational education: Removes the $25 million a year limit for State administrative expenses under title II of the Education Amendments of 1976 and authorizes funds under the basic State grant for this purpose with the requirement that States match any Federal funds used; requires States to set forth in their State plan the amount of Federal funds they plan to retain at the State level for administration; and gives each local recipient the option of using a percentage of Federal funds which is equal to the percentage of Federal funds in their vocational education program or to use any amount of Federal funds as long as they are matched by State appropriated funds for administrative expenses. H.R. 3437—Public Law 95–40, approved June 3, 1977.

ELECTIONS

Campaign Act amendments: Substantially reduces the number of reports required to be filed with the Federal Election Commission under the Federal Election Campaign Act of 1971; raises from $100 to $250 the threshold above which detailed information with respect to contributions and expenditures must be reported and, with respect to independent expenditures, from $100 to $250; makes changes in the law to strengthen the role of political parties in future elections; contains language to encourage a candidate to support his political party's presidential candidate by providing that the costs of listing or mentioning the name of any presidential nominee by any other candidate in his campaign material will not be considered as a contribution in-kind prohibited by the act; permits the transfer of excess campaign funds to a political party committee without limitation; authorizes $250,000 in fiscal 1978 to reimburse States for the additional costs of receiving and preserving Federal campaign reports; and the statute of limitation from three years to five years with regard to violations of the Campaign Act. S. 926—Passed Senate August 3, 1977.

Overseas citizens voting rights: Amends the Overseas Citizens Voting Rights Act of 1975 and the Federal Voting Assistance Act of 1955 to improve the administration and operation of these laws; authorizes utilization of the same ballot application provisions presently contained in the Federal Voting Assistance Act for all citizens residing overseas; and authorizes revision of the absentee registration and ballot application forms to develop a single form which could also be used by citizens residing abroad. S. 703—Public Law 95– , approved 1978.

EMPLOYMENT

CETA: Extends the authorization of sums as necessary for all titles of the Comprehensive Employment and Training Act (CETA) through fiscal 1978; extends the amendments to title VI made by the Emergency Jobs Programs Extension Act of 1976, which provide that each prime sponsor of a public service employment program may use its allocation, first, to sustain its existing number of public service job holders under the act, and shall thereafter fill any additional public service jobs with low-income persons unemployed for at least 15 weeks who have been receiving or are eligible for unemployment compensation, and also provide that 50 percent of title VI job vacancies due to attrition must meet those eligibility requirements, but the remaining 50 percent may be filled under the original title VI requirements (15 days unemployment in areas having seven percent or higher unemployment rates, and 30 days unemployment in other areas). H.R. 2992—Public Law 95–44, approved June 15, 1977.

Amends the Comprehensive Employment and Training Act of 1973 to provide improved employment and training services for economically disadvantaged persons, unemployed or underemployed persons which will result in an increase in their earned income; extends Comprehensive Employment and Training Services, Public Service Employment, National Programs, Summer Youth Program, Job Corps and the National Commission for Manpower Policy for four years; extends for two years the youth programs enacted under the Youth Employment and Demonstration Projects Act of 1977; includes strong anti-fraud and abuse provisions; prohibits the substitution of program funds for State and local revenues; authorizes the Secretary of Labor to make use of State and local agencies, especially law enforcement agencies, to monitor and enforce provisions of the Act; directs the Secretary to establish standards and procedures to assure against nepotism, political patronage, conflicts of interest, improper commingling of funds, inadequate records, kickbacks and other improprieties; adds a new program to establish transitional public service employment for the structurally unemployed and provides a new allocation formula for distributing funds for this program; establishes a ceiling of $10,000, and in high wage areas up to $12,000, on the Federal share of wages that can be paid to a public service employment job holder; limits public service emploment participation to twelve months, which may be extended for six months

in areas of high unemployment; requires that not less than two percent be allocated to Native American entitles; extends the countercyclical public service employment program and modifies the eligibility criteria for participation, wages, supplementation and project requirement; consolidates the following programs into one youth title: Job Corps, Summer Youth Programs, Youth Employment and Demonstration Programs, and the Young Adult Conservation Corps; and authorizes for two years a new private sector program to increase private sector employment opportunities for the economically disadvantaged and seeks to bring business and labor together to form private industry councils (PIC's) to assist in creating private sector jobs for the economically disadvantaged. S. 2570—Passed Senate August 25, 1978; Passed House amended September 22, 1978; Senate agreed to conference report October 13, 1978.

Emergency unemployment compensation—Federal pay raises: Extends the Emergency Unemployment Compensation Act to October 31, 1977, to provide a maximum of 13 weeks of emergency benefits (which combine with the 26 weeks of regular and 13 weeks of extended benefits for a total of 52 weeks of unemployment benefits) in States where the insured unemployment rate is five percent or more, with a phaseout under which individuals eligible before October 31, 1977, may continue to receive benefits until January 31, 1978; extends until April 30, 1977, the maximum 26-week program now in effect (which combine with 26 weeks of regular and 13 weeks oi extended benefits for a total of 65 weeks of unemployment benefits) in order to avoid terminating benefits for certain participants in that program; establishes new statutory authority and procedures for the treatment of fraud and erroneous payments and specifies certain eligibility requirements; requires certain States to recover any overpayments made to individuals; makes fraud in connection with the program a Federal crime and imposes a fine of up to $10,000 and imprisonment for up to five years; and amends present law to require an affirmative vote of the Senate and the House to make effective the President's quadrennial recommendations regarding the salary increases of Members of Congress, the Federal judiciary. Cabinet officials and other top Federal personnel. H.R. 4800—Public Law 95-19, approved April 12, 1977.

Humphrey-Hawkins full employment: Seeks to establish and translate into practical reality the right of all adult Americans able, willing, and seeking to work the full opportunity for useful paid employment; requires the President to submit an annual economic report including annual numerical goals for 5 years for employment and unemployment, production, real income and productivity; short and medium term goals at 3% adult unemployment and 4% overall unemployment within 5 years with an inflation rate goal of 3% by 1983 and 0% by 1988; and contains other provisions. H.R. 50—Passed House March 16, 1978. Passed Senate amended October 13, 1978.

Public Works Employment: Authorizes an additional $4 billion to extend the program of grants to State and local governments to provide jobs through construction in places with the most distressing levels of unemployment as originally authorized under title I of the Public Works Employment Act of 1976; provides that 65 percent of the funds be allotted on total numbers of unemployed and 35 percent on the basis of the relative severity of unemployment, with States' participation in the 35 percent allocation only if their unemployment rates exceed 6.5 percent for the most recent 12-month period; provides that no State shall receive less than three-fourths of one percent nor more than 12.5 percent; requires that 70 percent or more of the funds be spent in areas within a State having unemployment rates above the national average and 30 percent for areas with rates below the national average but above 6.5 percent; contains a 2½ percent set-aside for Indian and Alaskan Natives projects to insure a substantial fund for such projects while permitting high-unemployment non-Indian communities a competitive chance to be awarded projects in States with Indian communities; includes the transportation of water to drought-stricken areas within the term "public works project" and permits an applicant who received a grant to substitute one or more projects for the project for which the grant was made under certain conditions approved by the Administrator; requires that priority and preference be given to pending applications resulting in energy conservation; ensures that all laborers and mechanics employed on projects are paid the prevailing wage rate; and mandates, in title II, the obligation of funds for water resource projects for fiscal 1977 (with the exception of the Meramec Dam in Missouri) and states congressional intent not to uphold any prospective budget rescissions or deferrals regarding these projects. H.R. 11—Public Law 95-28, approved May 13, 1977.

Youth employment and training: Adds a new youth employment title to the Comprehensive Employment and Training Act of 1973 and authorizes such sums as necessary over a three-year period; creates a National Young Adult Conservation Corps to provide work for unemployed youths in the nation's public lands and water; establishes a variety of employment, training, and demonstration programs to explore methods of dealing with the structural unemployment problems of the Nation's youth; provides part-time employment and/or training for economically disadvantaged youths between the ages of 16 and 19 who resume or maintain attendance in secondary school to acquire a high school diploma or its equivalent; authorizes youth community conservation and improvements projects to put unemployed youths to work for a period not to exceed 12 months on the rehabilitation or improvement of public facilities, neighborhood improvements, weatherization and basic repairs to low-income housing, and conservation, maintenance or restoration of natural resources on non-Federal public lands; authorizes support for employment and training programs designed to enhance job prospects and career opportunities for young persons; specifies the wage rates to which employed youths are entitled; prohibits full-time employment of youths who have not exceeded the compulsory school attendance age; permits full-time employment when school is not in session; requires a report on the progress of the programs by March 15, 1978; disregards a youth's earnings in determining the family's eligibility to participate in Federal or Federally-assisted welfare programs; requires the Secretary of Labor to take steps to increase CETA participation by disabled veterans and Vietnam-era veterans under 35 years of age; and provides that, in filling teaching positions in public schools with financial assistance under CETA, special consideration be given to unemployed persons with State certification and teaching experience. H.R. 6138—Public Law 95-93, approved August 5, 1977.

ENERGY

Alaska pipeline (ALCAN): Approves the President's decision on an Alaska natural gas transportation system submitted to Congress on September 22, 1977, which authorizes private construction of a natural gas pipeline through Canada, and finds that any environmental impact statements prepared relative to the system and submitted with the President's decision are in compliance with the National Environmental Policy Act of 1969. H.J. Res. 621—Public Law 95-158, approved November 8, 1977.

Coal conversion: Prohibits certain new electric power plants and major fuel burning installations (MFBI's) capable of a fuel heat rate input of at least 100 million Btu's per hour or an aggregation of units which together are capable of a fuel heat rate input of 250 Btu's per hour from using natural gas or petroleum as their primary energy source except for fuel required for startup testing, flame stabilization, feedstock uses and direct-fire uses; limits the coverage of MFBI's to only backers, gas turbines internal combustion engines, and combined cycle units and specifically excludes pumps and compressors used solely in connection with the production, gathering, transmission, storage, and distribution of gases and liquids; authorizes the Secretary to prohibit by rule or order the use of oil and gas by certain new MFBI nonboilers;

Requires existing electric powerplants and MFBI's capable of using coal or other fuels with heat input rates of at least 100 million Btu's per hour, or an aggregation of coal capable units of fuel heat input rates exceeding 250 million Btu's per hour, or units which cannot use coal capable of fuel heat input rates of at least 250 Btu's per hour, to cease using natural gas as their primary energy source after January 1, 1990, and not to increase the proportional use of natural gas before that date; prohibits the use of petroleum by new MFBI's which are capable of consuming any fuel at a fuel input rate of 100 Btu's per hour or more, with temporary exemptions possible at the discretion of the Secretary;

Provides that any existing facility which uses coal after April 19, 1977, may not increase its use of petroleum unless the appropriate State certifies that such an increase is necessary for compliance with the Clean Air Act; authorizes the Administrator to order existing powerplants and MFBI's capable of using combinations of coal or other fuels with natural gas or petroleum to use minimal amounts of natural gas or petroleum; prohibits plants using petroleum as the primary energy source as of April 20, 1977, from converting to natural gas; extends coal conversion provisions of the Energy Supply and Environment Coordination Act of 1974 which allows the Administrator to order coal conversions by facilities capable of using coal prior to 1990;

Provides temporary exemptions for the use of both petroleum and natural gas to facilities: (1) if coal or fuels other than gas or petroleum are not available (up to ten years); (2) if adequate coal or other fuel transportation facilities are not available (up to five years); (3) if necessary air pollution equipment and facilities are not available (up to five years); (4) where the use of natural gas is necessary to achieve or maintain an ambient air quality standard (up to five years); (5) if existing plants need additional time to employ synthetic fuels or innovative technologies (up to ten years); or (6) if such an exemption would be in the public interest (up to five years);

Provides permanent exemptions from the petroleum and natural gas provisions to facilitates: (1) if coal and fuels other than natural gas or petroleum are not available; (2) if the cost of using coal or other fuels substantially exceeds the cost of using oil; (3) if environmental factors preclude compliance; (4) if the facility is constructed for only standby emergency operation; (5) if a cogeneration facility cannot obtain economic and other benefits if coal or other fuels are

used; or (6) at the discretion of the Secretary, if it cannot comply with the prohibition because of existing State or local law;

Provides a permanent exemption for cogeneration facilities if the benefits of cogeneration cannot otherwise be obtained; grants permanent exemption to existing powerplants and MFBI's to permit the use of certain fuel mixtures containing gas or petroleum; extends the natural gas prohibitions to existing electric powerplants with fuel heat input rates between 100 and 250 BTU's per hour which are not capable of using coal unless the facility demonstrates that it cannot convert without substantial physical modification or reduction in the rated capacity of the unit; allows a permanent exemption for the use of liquified natural gas in cases where the use of coal would cause substantial environmental harm; provides an exemption for the use of natural gas to allow MFBI's to honor certain contracts with pipelines originating in Canada.

Authorizes the Secretary to prohibit, by rule, the use of natural gas for certain boilers used for space heating; prohibits the use of decorative natural gas outdoor lights except for those used at historic sites or which are necessary for safety reasons; provides that all Federal agencies are subject to the prohibitions of the act;

Grants the President emergency authority to allocate coal, but not any fuel derivatives; authorizes the President to stay the application of the act if he finds an emergency exists due to coal shortages; sets procedures by which a peakload electric powerplant for MFBI may use gas or petroleum during an emergency;

Provides that new electric peakload powerplants are to be granted permanent exemptions from petroleum prohibitions if the facility will be operated for peakload purposes only, and from natural gas prohibitions in any area where a national ambient air quality standard has not or will not be attained; allows intermediate-load powerplants to be exempted from the petroleum prohibitions if convertible to coal derived fuels when available; mandates that permanent exemptions from petroleum prohibitions are to be granted to MFBI's if satisfactory product quality control would be jeopardized or product requirements cannot be met by the use of coal or fuels other than gas and petroleum; requires applicants seeking permanent exemptions for new electric powerplants to consider alternate sites where coal and other fuels could be used, or the possibility of purchasing electric power instead of using petroleum;

Requires existing powerplants and MFBI's to file annual compliance reports beginning January 1, 1980; allows electric utility systems using intrastate gas to submit a system compliance report rather than individual reports; empowers the Administrator to compensate any existing facility which in the absence of such compensation would otherwise be entitled to a permanent exemption; authorizes the Administrator to make direct loans and loan guarantees to facilitates for air pollution control devices necessitated by coal conversion;

Provides that a facility prevented from using natural gas under contract may sell its rights at a price to be determined, including an amount to compensate the company which transports the gas; contains provisions which allow facilities to use natural gas or petroleum in emergency situations; authorizes assistance for additional public facilities and services in regions impacted by coal production expansion; requires the Administrator to monitor coal prices and to report thereon to the Congress; and authorizes $100 million for rehabilitation of minor and branch railroad lines which transport coal and coal products. H.R. 5146—Passed House July 18, 1977; Passed Senate amended September 8, 1977; Senate agreed to conference report July 18, 1978.

Coal leasing: Authorizes the Secretary of Interior to aquire specific rights to leases for coal in Utah and Wyoming by exchanging leases of equal value covering other Federal lands; further implements the Secretary's authority to issue rights-of-way under the authority of the Federal Land Policy and Management Act of 1976 by authorizing him to sell coal, which may be removed incidental to the exercise of the right-of-way, at fair market value; authorizes the Secretary to adjust the boundaries of an existing lease by adding not more than 160 acres of land; clarifies the Secretary's authority to exchange mineral interests in Federal lands for privately owned mineral interests and to sell federally owned interests under the authority of the Federal Land Policy and Management Act; and prohibits women miners in underground mines on Federal lands. S. 3189—Public Law 95, approved 1978.

Deepwater ports: Extends through fiscal 1980 the annual $2.5 million authorization under the Deepwater Port Act of 1974 which established a licensing and regulatory program governing offshore deepwater port development beyond the territorial limits of the United States. H.R. 6401—Public Law 95-36, approved June 1, 1977.

Department of Energy: Creates a Cabinet-level Department of Energy (DOE) to permit coherent administration of the national energy policy; establishes within the Department: (1) the Energy Information Administration to gather, analyze and distribute energy data and to implement a system of mandatory reporting by major energy-producing firms of information related to the economics of energy supply; (2) the Economic Regulatory Administration to administer regulatory functions which the Secretary deems appropriate and which do not fall exclusively within the jurisdiction of the Federal Energy Regulatory Commission; (3) an Office of Inspector General to promote efficiency and prevent fraud and abuse within DOE; (4) the Office of Energy Research; and (5) the Leasing Liaison Committee, composed of an equal number of members from the DOE and the Department of Interior, to provide for cooperation and consultation between the two Departments; provides that the GAO shall audit the DOE; transfers all functions of the Federal Energy Administration, the Energy Research and Development Administration, and the Federal Power Commission, except those functions transferred to the Federal Energy Regulatory Commission; four Regional Power Marketing administrations and the power-marketing functions of the Bureau of Reclamation currently under the Department of Interior; authority under the Outer Continental Shelf Lands Act, Mineral Lands Leasing Act, Mineral Leasing Act for Acquired Lands, Geothermal Stream Act of 1970 and the Energy Policy and Conservation Act related to the leasing of energy resources onshore and offshore; functions relating to fuel supply and demand analysis currently under the Bureau of Mines; authority for development and promulgation of new building conservation standards now vested in the Secretary of HUD; Commerce Department programs to promote voluntary industrial energy conservation; jurisdiction over three naval oil reserves and three naval oil shale reserves currently administered by the Department of Defense; authority currently vested in the Interstate Commerce Commission related to the transportation of oil by pipelines; and authority to publish guidelines for the Rural Electrification Administration on the issuance of loans or loan guarantees for generation and transmission facilities; retains the responsibility for promulgation of automobile efficiency standards within the Department of Transportation, but requires the Secretary of Transportation to give the Energy Secretary 10 days in which to provide written comment on any standard prior to its implementation; leaves responsibility for policing clean air standards with the Environmental Protection Agency; continues responsibility for actual leasing of resources for the extraction of energy sources from public land in Interior, but places control over all economic terms and conditions of such leases in DOE; provides that nothing in the transfer of Federal leasing functions from Interior to DOE shall be construed as affecting Indian lands and resources or as transferring the responsibility of the Secretary of Interior concerning such lands and resources; requires Cabinet-level departments and agencies with conservation responsibilities to designate a principal conservation officer within their Department; provides that the responsibility for the promotion of vanpooling and carpooling shall be transferred to the Secretary of Transportation; creates within the Department, independent of the Secretary's control, a five-member Federal Energy Regulatory Commission with its members appointed by the President and approved by the Senate; provides that the Commission shall have sole jurisdiction over the establishment and enforcement of rates and charges for the transmission and sale of electricity and natural gas, and authority to license hydroelectric power plants; provides that either the Secretary or the Commission may propose a rule pertaining to functions within the exclusive jurisdiction of the Commission and that the Secretary can set reasonable time limits for completion of rulemaking proceeding before the Commission; provides that the Secretary shall have jurisdiction over the import and export of natural gas and electricity, emergency interconnections and curtailment priorities; provides that the Secretary shall have sole power to propose oil pricing actions, and that all such proposals must be referred immediately to the Commission which has sole power to make such final decisions on the proposal; provides that the Commission can either agree to an oil pricing proposal (in which case the Secretary may issue the rule), amend the proposal (in which case the Secretary may accept the changes and issue the final rule or reject the changes and not issue the rule), or reject the proposal (in which case the Secretary may not issue the rule); provides that during an energy crisis the President may grant the Secretary temporary exclusive pricing authority; requires the President to submit a proposed national energy policy plan by April 1, 1979, to be updated biennially thereafter and a comprehensive review of each program in the Department by January 15, 1982, for review with respect to authorizing legislation for fiscal 1983. S. 826—Public Law 95-91, approved August 4, 1977.

Department of Energy—Military: Authorizes a total of $2,976,484,000 to carry out national security programs, including scientific research and development in support of the armed services, strategic and critical materials necessary for the common defense and military applications of nuclear energy as follows: $1,237,194,000 for Weapons activities; $514,500,000 for Special Materiels Production; $104,000,000 for Intertial Confinement Fusion; $265,600,000 for Naval Reaction Development; $32,600,000 for Defense Intelligence and Arms Controls; $45,089,000 for Nuclear Materials Licensing and Safeguards; $47,151,000 for Programs Direction and Management Support related to National Security Programs; establishes certain limitations.

the testing and replacement of components of the B43 bomb and the SM-2 warhead; authorizes procurement of enhanced radiation (neutron bomb) components for the Lance Warhead and 8-inch artillery projectile; prohibits starting any projects if the current estimated costs are more than 25 percent of the amount authorized; requires a single request for appropriations for all nuclear arms scientific research; and requires that a status report on government-owned equipment, facilities and materiel be submitted with the 1980 budget request. H.R. 11686—Passed House May 17, 1978; Passed Senate amended September 30, 1978.

ERDA nonnuclear authorization—Civilian 1977: Authorizes a total of $4,946,261,000 for the Energy Research and Development Administration for fiscal 1977, of which $1,175,671,000 is for non-nuclear scientific research and programs and $3,770,590,000 for nonweapon nuclear scientific research programs; allows the Administrator to assist in the demonstration of the production of synthesis gas, methane, methanol, anhydrous ammonia and similar energy intensive products from municipal waste by entering into agreements with units of local government proposing to construct facilities for the manufacture of such products; authorizes a small grants program to promote the research, development and demonstration of energy-related systems and technologies appropriate to the needs of local communities; requires the Administrator, in consultation with EPA, to report to the Congress on the environmental monitoring, assessment and control efforts related to its various energy demonstration projects; authorizes work in biomedical and environmental research, operational safety, environmental control technology, the materials sciences, and molecular mathematical and geosciences; and prohibits ERDA from starting projects if the current estimated cost exceeds the original estimated cost by more than 25 percent. S. 36—Public Law 95-39, approved June 3, 1977.

ERDA nonnuclear authorization—Civilian, 1978: Authorizes a total of $6,161,445,000 for civilian energy research and development and plant and capital equipment for the Energy Research and Development Administration for fiscal 1978 which includes funding for R&D in fossil energy, solar energy, geothermal energy and nuclear research; and authorizes a guaranteed loan program for the conversion of biomass into desirable forms of energy and for demonstration technologies to produce alternative fuels from coal, oil shale and other domestic resources. S. 1340—Public Law 95-238, approved February 25, 1978.

ERDA nuclear authorization—Military, 1978: Authorizes $2,607,100,000 for the Energy Research and Development Administration (ERDA) for fiscal 1978 national security programs and includes funds for operating expenses for the laser fusion program, the naval reactor program, and program management and support items attributed to national security. S. 1339—Public Law 95-183, approved November 15, 1977.

Energy conservation policy: Establishes both voluntary and mandatory energy conservation programs designed to significantly reduce the rate of growth in domestic energy consumption;

Residential provisions: Requires electric and natural gas companies, pursuant to a plan filed by each governor, to (1) offer to inspect and advise each customer about the energy conservation measures appropriate to the residential building that the customer owns or occupies, (2) provide the customer with a list of installation contractors and lending institutions which have been certified under the provisions of the State plan, (3) arrange, at the request of the customer, for the installation and financing of the measure chosen and collect from the customer the associated costs on a regular utility billing cycle; prohibits any electric and natural gas utility companies from installing most energy conservation measures unless it provides these services prior to enactment, unless it broadly advertised or made substantial preparation for such service, or unless State law requires or explicitly permits a utility to do so;

Weatherization Grants for Low-Income Families: Creates a separate grant program under the Farmers Home Administration to finance weatherization of homes of the rural poor; extends through 1980 the weatherization program established under the Energy Conservation in Existing Buildings Act of 1976; provides loan insurance for energy conserving improvements and solar energy systems; authorizes Government National Mortgage Association programs of secondary financing for energy conserving improvements and solar energy systems for homes with total GNMA purchase authority of $5 billion; establishes a 5-year GNMA revolving fund of $100 million administered by the Secretary of HUD to provide loans for installation of residential solar heating and cooling equipment; establishes a loan program within HUD for energy conservation improvements to multi-family housing;

Auto and consumer products efficiency standards: Authorizes the Secretary to raise civil penalties for violation of the current energy efficiency standards for automobiles; requires disclosure to a consumer of any gas guzzler tax applicable to an automobile; extends coverage of the fuel economy labeling requirements of current law to include light trucks and vans; requires an EPA report on how well the current EPA automobile fuel economy estimates compare with the fuel economy actually obtained; requires Secretary to establish mandatory energy efficiency standards for categories of products such as refrigerators, freezers, water heaters, air-conditioners, furnaces and other home heating equipment, and clothes dryers; prohibits the promulgation of a standard if a test procedure has not been prescribed, or if the Secretary determines that such a standard would not result in signficant energy conservation or that it is not technologically feasible or economically justified; creates a 30-month period during which any State standard prescribed during that period would be automatically preempted as a means of encouraging manufacturers to aid DOE in establishing Federal standards; authorizes DOE to establish test procedures and labeling requirements that will disclose to the purchaser the relative energy efficiency of the industrial product for sale; contains provisions to encourage recycling of energy intensive materials in industries related to metals, paper, textile and rubber.

Federal energy initiatives: Requires DOE to establish life-cycle capital and operating-cost methods for all Federal buildings: provides that in leasing buildings, the Federal government must give preference to buildings with solar heating and cooling equipment or energy efficient buildings; authorizes $100 million through fiscal 1980 for development of a program to demonstrate solar heating and cooling in Federal buildings; requires each Federal agency to retrofit selected buildings so that by 1990 all Federal buildings will be retrofitted to assure their maximum possible life cycle cost-effectiveness; authorizes $98 million through September 30, 1981, for procurement of photovoltaic solar electric generation systems for use by Federal agencies;

And contains miscellaneous energy-related provisions regarding industrial efficiency reporting, State energy conservation plan funding, the establishment of an Office of Minority Economic Research and Development within DOE and several energy-related studies. H.R. 5037—Passed House July 18, 1977; Passed Senate amended September 13, 1977; Senate agreed to conference report October 9, 1978. (467)

Energy taxes: Sets forth an energy taxation policy to encourage energy conservation, expansion of domestic energy sources, and conversion to coal fuel sources by utilities and industrial installations;

Residential tax credits: Includes a refundable tax credit of 20 percent of the initial $2,000 of expenditures on home insulation and other residential energy conserving components for a maximum credit of $400; provides a refundable tax credit of up to $75 per year for persons 65 years and older for residential energy costs; entitles homeowners to a refundable tax credit for renewable energy source equipment, which includes solar, wind and geothermal energy systems of 30 percent of the first $2,000 of expenditures and 20 percent of the next $8,000 for a maximum credit of $2,200; provides, through 1982, a refundable tax credit of 25 percent of the cost of home heating oil, with a maximum annual credit of $150;

Business energy investment credit: Contains a business energy investment credit which provides an additional 15 percent refundable credit for certain alternate energy property (equipment involved in the use of a substance as a fuel or feedstock other than oil, natural gas or a derived product), and an additional 10 percent refundable credit for certain specially defined energy property (equipment which reduces energy consumption when added to an existing production or processing) during the period between April 19, 1977, and January 1, 1986; provides that charitable, educational, religious and other tax exempt organizations, as well as State and local governments, are eligible to receive the credit;

Additional incentives: Contains language which is intended to give the conferees flexibility, with respect to any new taxes which may be in the bill agreed to by the conferees, to use a portion of the revenues raised by such taxes to provide tax and other economic incentives for increased production, conservation and conversion;

Oil and gas users tax: Imposes an excise tax on the industrial and utility use of oil and natural gas of $6 per barrel by 1985 or the equivalent amount to bring gas to the same price; limits this tax to new electric powerplants and major fuel-burning installations and existing facilities which are capable of burning coal;

Energy trust fund: Provides that a portion of any funds which may be raised by new taxes in the bill be used for an energy trust fund, to finance outlays for energy production, energy conservation and energy-efficient forms of transportation;

Other tax provisions: Extends through September 30, 1985, the existing four-cent-per-gallon tax on gasoline and other motor fuels, which otherwise is scheduled to decline to 1½ cents per gallon after September 30, 1979; and removes the two-cents-per-gallon refund or credit for gasoline and other fuels for motorboat and other nonbusiness off-highway use; exempts from the four-cent gasoline tax gasoline-alcohol blends (gasahol) if such blends contain at least 10 percent ethanol and/or methanol and if the alcohol is made from agricultural or forestry products, and reduces the tax rate to three cents per gallon for gasahol containing alcohol made from other products(such as coal); contains a $300 tax credit for the purchase of electric cars for personal use; provides an exemption from income tax of employees for energy-

efficient transportation provided by employers; exempts rerefined lubricating oil from the excise tax on new oil; extends the existing 10-percent investment tax credit to business insulation; increases the rate of percentage depletion from five percent to 10 percent for peat used directly or indirectly for fuel; allows percentage depletion and expensing of intangible drilling costs for geothermal energy under rules similar to existing provisions for oil and gas; provide 10-percent depletion and expensing of intangible drilling costs and geological and geophysical costs for geopressurized methane gas; contains a $3 per barrel tax credit for production of shale oil, and a 50-cent per mcf credit for production of geopressurized methane gas and gas from other nonconventional sources; provides a permanent exemption from the minimum tax for intangible drilling costs to the extent of oil and natural gas production income; allows a tax exemption for industrial development bonds used for bioconversion facilities and for local liquefaction and gasification facilities;

Nontax provisions: Requires an annual report to the Congress by the President on the energy saving and revenue effects of the bill; and limits the President's power to impose tariffs, license fees, or quotas on crude oil imports to wartime or actual hostilities and limits his authority to adjust imports of refined petroleum products to adjustments necessary for national security, and allows a two-House veto by Congress within 30 days. H.R. 5263—Passed House July 18, 1977; Passed Senate amended October 31, 1977; In conference.

Federal Energy Administration authorization: Extends through fiscal 1978 the authorities under the Federal Energy Administration Act; includes $1.21 billion to permit 250 million barrels of crude oil to be placed in the Strategic Petroleum Reserve by the end of calendar year 1978; contains $1.8 million for the appliance labeling program under the Energy Supply and Environmental Coordination Act of 1974 and extends FEA's authority to require certain facilities which presently burn oil and gas to convert to coal; adds provisions limiting the powers of the regional counsels of FEA; establishes general procedures to be followed with respect to the use of commercial standards by the FEA; and requires the Administrator, within 120 days of enactment, to publish regulations which would require prospective FEA contractors to disclose all relevant data which could cause a possible conflict of interest in carrying out activities for FEA. S. 1468—Public Law 95-70, approved July 21, 1977.

Natural gas emergency: Authorizes the President to declare a natural gas emergency if he finds that a severe shortage exists or is imminent in the United States which would endanger the supply of natural gas for high-priority uses and the exercise of his authorities is reasonably necessary to assist in meeting requirements for such uses; gives the President authority to require: any interstate pipeline to make emergency deliveries or transport interstate natural gas to any other interstate pipeline or a local distribution company served by an interstate pipeline; any intrastate pipeline to transport interstate natural gas from one interstate pipeline to another or to any local distribution company served by an interstate pipeline; or the construction and operation by any pipeline of necessary facilities to effect deliveries or transportation; provides that these authorities shall terminate by April 30, 1977, or after the President terminates the emergency, whichever is earlier; authorizes interstate pipelines or local distribution companies to purchase supplies of natural gas for delivery before August 1, 1977, from intrastate pipelines at unregulated prices; authorizes the President to require any interstate or intrastate pipeline to transport gas and operate facilities necessary to carry out emergency purchase contracts; and imposes civil penalties of up to $25,000 a day for violations. S. 474—Public Law 95-2, approved February 2, 1977.

Natural gas pipeline safety programs: Authorizes $10.5 million for fiscal 1979 for Natural Gas Pipeline Safety Act programs of which $6 million is for the Department of Transportation's pipeline safety activities and $4.5 million is for grants-in-aid to federally certified State natural gas pipeline safety programs; and makes a Federal crime the willful or attempted destruction or injury to any interstate pipeline facility used to transport oil or gas with a maximum fine of $5,000 and/or 15 years' imprisonment. S. 1895—Passed Senate May 3, 1978; Passed House amended September 12, 1978; Senate agreed to House amendment with amendment September 29, 1978. (VV)

Natural gas pricing: Amends and extends the Natural Gas Act altering the pricing structure of domestic natural gas in order to encourage increased development, production and conservation of U.S. natural gas resources;

Pricing: Redefines what natural gas production qualifies as "new natural gas" and lengthens the period of time prior to the deregulation of most categories of natural gas; provides that all natural gas prices be allowed to escalate with inflation and, in some cases, faster than inflation, which is measured by the Gross National Product implicit price deflator converted to a monthly price adjustment factor; establishes a ceiling price for "new gas" at $1.75 per million Btu's as of April 20, 1977, which would increase at a rate equal to inflation plus .2 percent, plus 3.5 percent until April 1981 and plus four percent thereafter; provides that new natural gas onshore includes gas produced from (1) a new well 2.5 miles or more from a marker well; (2) a new well with a completion location 1,000 feet below the nearest, deepest completion location within 2.5 miles; and (3) a new reservoir onshore; provides that new natural gas offshore includes gas produced from (1) new leases; and (2) new reservoirs in old leases; excludes "behind-the-pipe" gas and "withheld" gas from onshore new gas definition; establishes a ceiling price for new, onshore production wells at $1.75 per million Btu's as of April 20, 1977, and increases at a rate equal to inflation; deregulates in 1985 that portion of this gas which was not committed or dedicated to interstate commerce on April 20, 1977; provides a special ceiling price escalator after January 1, 1985, for that which is not deregulated; establishes a ceiling price for all other natural gas which is required to be sold in interstate commerce at $1.45 as of April 20, 1977, and increases at a rate equal to inflation; establishes a ceiling price for natural gas under existing intrastate contracts at the lower of (1) the contract price, or (2) the new gas price with increase equal to inflation; establishes a ceiling for natural gas for sales under rollover contracts which are contracts that expire at the end of a fixed term; provides that interstate rollovers get the higher of (1) the applicable "just and reasonable" price under the Natural Gas Act, or (2) $.54; provides that intrastate rollovers get the higher of (1) the contract price, or (2) $1.00 to be increased at a rate equal to inflation; provides that State or Indian royalty production gets the new gas ceiling price for intrastate rollovers; deregulates certain specified categories of "high-cost" gas approximately one year after enactment and authorizes the Federal Energy Regulatory Commission (FEPC) to allow "incentive" prices for other categories of high-cost gas; grants natural gas wells producing up to 60 Mcf per day special stripper well price treatment at $2.09 as of May 1978 and increases at a rate equal to inflation plus 3.5 percent until April 1981 and 4.0 percent thereafter; eliminates ceiling price regulation as of January 1, 1985, for (1) new natural gas; (2) deep new, onshore production wells; and (3) existing intrastate contracts which are over $1.00 on December 31, 1984; deregulates certain high cost gas upon the effective date of the first incremental pricing rule; deregulates certain shallow new onshore production wells on July 1, 1987, or upon the last day that price controls are in effect if reimposed; authorizes the President or Congress to reimpose price controls for one 18-month period from July 1, 1985, until June 30, 1987; provides that either House of Congress may veto the President's imposition and that both Houses must act to reimpose price controls without the President; provides expedited procedures to assure a floor vote;

Incremental pricing: Requires FERC to develop an incremental pricing rule within 12 months for industrial boiler fuel facilities served directly or indirectly by interstate pipelines; requires FERC to amend its first rule within 18 months to broaden the application of incremental pricing to other industrial facilities which is subject to a one-House veto; requires portions of interstate pipelines' acquisition cost for natural gas to be passed through to incrementally priced industrial facilities; requires that any costs subject to passthrough be placed in a special account and requires incrementally priced industrial facilities to pay these surcharges until the price they pay for natural gas is equal to the cost of substitute fuel at the burner-tip; requires that FERC determine the cost of substitute fuel, or alternative fuel on a regional basis; provides that once an incrementally priced industrial facility reaches the alternative fuel price, the passthrough is limited to the amount necessary to keep the facility at the alternative fuel price; requires local distribution companies to pass through the surcharges to incrementally priced industrial facilities which shall be enforced by the Attorney General or the FERC; exempts residences, small commercial users, schools, hospitals and other institutions and electric utilities and certain small industrial boiler fuel facilities from the requirements of incremental pricing; exempts existing imports from incremental pricing; requires that gas produced from Prudhoe Bay, Alaska, and transported to the Lower 48 States be given rolled in pricing for both the basic wellhead price and the transportation cost;

Energy Emergency Authority: Authorizes the President to declare a natural gas emergency, based upon certain findings, under which he may authorize natural gas sales from unregulated intrastate pipelines and local distribution companies.

Curtailment: Provides that, in cases of natural gas curtailment, residential users, small users, hospitals, and similar users vital to public health and safety shall have first priority to available natural gas; users who need gas to perform essential agricultural, food processing and food-packaging purposes shall have second priority; and essential industrial process or feedstock uses for which natural gas is essential for users as determined by the Secretary; and

Contains provisions requiring the commission to report to the Congress annually on specified aspects of natural gas pricing policies. H.R. 5289—Passed House July 18, 1977;

Passed Senate amended October 4, 1977; Senate agreed to conference report September 27, 1978.

Nuclear Regulatory Commission authorizations: Authorizes $297,740,000 for fiscal 1978 for the Nuclear Regulatory Commission; includes $41,480,000 for nuclear reactor regulation, $12,130,000 for standards development, $33,050,000 for inspection and enforcement, $22,090,000 for nuclear materials safety and safeguards, $148,900,000 for regulatory research, $10,180,000 for program technical support with up to $600,000 authorized for the Fellowship Program, and $29,910,000 for program direction and administration; provides $2,700,000 for obligations related to the Clinch River Breeder Reactor Project, $2,100,000 for obligations related to the Barnwell, South Carolina, fuel reprocessing plant with provisions that the authorizations be reduced by the same amount if further construction is cancelled or deferred; requires development of a plan to resolve generic safety issues and for development of new or unproved safety systems of nuclear power plants; establishes a fellowship program to assist the committee in carrying out its duties in a timely manner; and contains conflict of interest provisions similar to those adopted for the FEA and ERDA. S. 1131—Public Law 95-209, approved December 13, 1977.

Authorizes $336,395,000 for the Nuclear Regulatory Commission for fiscal 1979 which includes: $46,880,000 for nuclear reactor regulation, $14,945,000 for standards development, $38,760,000 for inspection and enforcement, $27,240,000 for nuclear materials safety and safeguards, $166,640,000 for nuclear regulatory research, $13,480,000 for program technical support and $27,950,000 for program direction and administration; expands licensing and regulatory authority over the disposal of uranium mill tailings; requires a study on the benefits of extending Commission licensing and regulatory authority over the storage and disposal of nuclear wastes; provides a 55 percent increase in resources authorized for the waste management program; authorizes $2.5 million to implement a new program of research into improved safety systems for nuclear power plants; authorizes $225,000 for equal employment opportunity activities; establishes an internal NRC Fuel Cycle Evaluation Task Force to access progress of national and international fuel cycle evaluations; authorizes grants for a long-term storage or disposal facility for certain specified radioactive wastes; and creates an Office of Public Counsel, as an independent office within the NRC, to represent interested parties directly affected by an NRC decision before the Commission. S. 2584—Passed Senate September 18, 1978; Passed House amended October 4, 1978; Senate requested conference October 10, 1978.

Oil shale commercialization: Directs the Secretary of Energy to establish a program for the purpose of testing up to three oil shale technologies to determine their commercial, environmental and social viability; provides that the tests shall be carried out using the "GOCO" concept whereby the Federal government supplies all funds and a private corporation contracts for the construction and operation of the test facilities; provides that the test projects may be constructed on lands of the Navy Oil Shale Reserve or on unleased, unencumbered Federal lands and, if feasible, situated at a single site; authorizes the Secretary to guarantee loans on obligations issued by State and local governments in dealing with the social and economic impact of the program, with a limit on the Federal obligation of $20 million each for fiscal 1979 and 1980; provides that should the guarantees prove insufficient, the Secretary may make direct loans to State or local governments; allows the Secretary to waive repayment of such loans if the State or local government demonstrates that there will be net adverse impacts resulting from the program; establishes the Oil Shale Commercialization Test Special Fund for program related costs; authorizes $200,000 for fiscal 1979 and additional, unspecified amounts for future years; and authorizes an additional $200,000 for fiscal 1979 for planning grants for State and local governments; provides that all patents developed during the course of the program would vest in the United States and any commercially valuable product produced during the course of the program may either be used by the Secretary or sold at public auction. S. 419—Passed Senate June 27, 1978.

Outer Continental Shelf: Directs the Secretary of Interior to prepare a five-year comprehensive leasing program to facilitate environmentally-safe development of the OSC while assuring receipt of fair market value for publicly owned oil and gas resources; provides a mechanism for separation of exploration from development and production so that Federal, State and local government officials can assess the political, environmental, social and economic impact of proposed development in order to resolve any problems prior to production; contains other provisions to increase coastal States participation in OCS policy development: requires, to promote competition, the use of alternative bidding methods other than the traditional bonus bid system on at least 20 percent and no more than 60 percent of tracts offered for leasing each year; permits peridoic reviews by the Attorney General of the competitive aspects and impacts of OCS activities and decisions, including bidding; prohibits joint bidding by major oil companies except when determined necessary for exploration and development; allows leases, which are usually set for five years, to extend for 10 years when necessary because of adverse conditions; requires that at least 20 percent of offshore production of oil or gas be offered for purchase by independent refiners; grants explicit authority to the Secretary to suspend and cancel leases and to pay compensation for a cancellation, when no fault of the lessee is involved; includes provisions for promulgation and enforcement of safety and environmental regulations, collection and confidentiality of data, Federal purchase of oil and gas, limitation on employment of government employees in industry and domestic manning and U.S. documentation on OCS facilities and vessels; sets civil penalties of up to $10,000 per day for noncompliance and criminal penalties of up to $100,000 per day for deliberate violations; creates an offshore oil pollution fund to pay for clean-up costs and damage resulting from oil spills which will be financed by a producers fee of three cents per barrel; makes the operator of offshore facilities liable for removal and clean-up costs and other damages up to $35 million; establishes the liability of the operator of a vessel at $250,000 or $300 per gross ton; provides that the fund be maintained at a level not less than $100 million or more than $200 million; authorizes the establishment of a fishermen's gear compensation fund and provides that each area account within the Fund would be self-supporting by a fee not to exceed $5,000 on each lessee and permittee in an area; provides the total amount in the Fund shall not exceed $1 million and the total amount in an area account shall not exceed $100,000; amends the Coastal Zone Management Act to authorize $130 million for ten years for formula grants to coastal States; modifies the allocation formula for awarding grants for States adjacent to newly leased OCS acreage at 50 percent, oil and gas produced adjacent to a coastal State at 25 percent, and oil and gas first landed in the coast State at 25 percent; provides that no State may receive more than 37.5 percent of the total and establishes a two percent floor on the amount of funds that any State may receive which is eligible under the existing formula; and authorizes $5 million annually for administrative grants to enable States to carry out their operational and managerial responsibilities under the Federal leasing process. S. 9—Public Law 95-372, approved September 18, 1978.

Petroleum marketing practices: Prohibits a franchisor of motor fuels from terminating a franchise during the term of the franchise agreement and from failing to renew the relationship at the expiration of the franchise term unless the termination or nonrenewal is based upon certain specified grounds and is executed in accordance with the notice requirements set forth in the bill; allows, under certain circumstances, an initial trial franchise period after which a franchisor may fail to renew the trial franchise whether or not a ground exists which would justify nonrenewal of a regular franchise; places the burden of proving compliance with all statutory requirements on the franchisor; preempts State law in the subject areas in which there is Federal legislation; contains octane disclosure provisions requiring (1) the testing of automotive gasoline by refiners to determine its octane rating, (2) the certification of the octane rating of automotive gasoline by suppliers and distributors of such gasoline, and (3) the display of the octane rating of automotive gasoline by retailers at the point of sale to consumers; and requires the Environmental Protection Agency to conduct field sampling and testing of gasoline to verify octane ratings; provides that violations of the octane disclosure provisions are enforceable by the Federal Trade Commission as unfair or deceptive trade practices under the Federal Trade Commission Act. H.R. 130—Public Law 95-279, approved June 19, 1978.

Public utility rate reform: Requires State utility regulatory authorities and nonregulated municipal and cooperative utilities to examine a series of Federally recognized ratemaking standards in hearings with an opportunity for input from affected utilities and consumers to determine the relationship between these standards and the purposes of the act of conservation, efficiency in use of facilities, and equitable rates; requires each regulatory authority and nonregulated utility to consider within 3 years the applicability of the following standards to utility rates: time-of-day rates, seasonal rates, cost of service pricing, interruptible rates and loan management techniques, prohibition of declining block rates which are not cost justified, and life line rates; requires, within 2 years, each regulatory authority and nonregulated utility to consider and adopt, if appropriate, rules on: master metering, review of automatic adjustment clauses, information to consumers advertising, and termination of service; makes the provision of the Act apply to any electric utility with annual sales in excess of 500 million kilowatt hours; requires each regulatory authority and nonregulated utility to report annually to the Secretary of Energy on their actions taken pursuant to the act, and to gather and make available on request information on costs of service; grants the right of intervention to the Secretary or any ratepayer of the affected utility and to participate in a proceeding to raise the issue of the consideration of one or more of the enumerated federal standards, or of other concepts which contribute to the achievement of the purposes of the Act; allows intervenors to seek judicial review of the determination made by the regu-

latory authority or nonregulated utility in State court pursuant to applicable State appellate procedures;

Contains provisions regarding FERC authorities, with respect to cogenerators, interconnection, and "wheeling" of transmission facilities and loans to small hydroelectric facilities; authorizes the Secretary to intervene in ratemaking proceedings for gas utilities to argue on behalf of rates that would achieve the Act's purposes of conservation efficiency and equitable rates; and grants the Secretary authority to prohibit, during a natural gas emergency, any electric utility powerplant or major fuel burning installation from using natural gas; and directs the FERC to provide rules to facilitate the voluntary conversion of natural gas users to heavy fuel oils. H.R. 4018—Passed House July 18, 1977; Passed Senate amended October 6, 1977; Senate agreed to conference report October 9, 1978. (*533,466)

Radiation exposure: Extends the program of the Energy Research and Development Administration to provide financial assistance to limit radiation exposure resulting from the widespread use of sand containing mill tailings in the construction of approximately 500 public and private buildings in the Grand Junction, Colorado area. S. 266—Public Law 95-236, approved February 21, 1978.

Small business energy loans: Authorizes direct, immediate participation and guaranteed loans to certain small businesses that manufacture or market solar or other renewable energy equipment or energy conservation equipment or firms which provide professional engineering or architectural services which conserve energy or apply renewable energy measures as their main objective. H.R. 11713—Public Law 95-315, approved July 4, 1978.

Solar photovoltaic energy: Authorizes $125 million to the Department of Energy in fiscal 1979 for programs in solar photovoltaic energy technologies research and demonstration; requires the Secretary to establish procedures whereby any public or private entity may apply for Federal assistance in purchasing and installing solar photovoltaic components and systems in new or existing facilities; calls for cooperation with appropriate Federal agencies to carry out such projects and activities in Federal buildings and facilities; directs the Secretary to coordinate and monitor all systems installed under this act; and sets aside ten percent of the funds for participation of small business. H.R. 12874—Passed House June 28, 1978; Passed Senate amended October 10, 1978.

Strategic petroleum reserve plan no. 1: Disapproves Energy Action DOE No. 1 which proposes to amend the strategic petroleum reserve plan in order to authorize an expansion of the size of the reserve from 500 million barrels to one billion barrels and to provide for the storage of twenty million barrels of petroleum on the U.S. east coast. S. Res. 429—Senate agreed to disapproval resolution April 17, 1978.

ENVIRONMENT

Clean air: Extends for two additional years, the existing interim auto emission standards of 1.5 grams per mile for hydrocarbons (HC), 15 grams for carbon monoxide (CC), and 2 grams for nitrogen oxides (NOx); requires 1980 model cars to meet emission standards of .41 gram for HC, 7 grams for CO, and 2 grams for NOx; requires 1981 model cars to meet the final emission standards set by the 1970 Clean Air Act of .41 grams for HC, 3.4 grams for CO, and 1 gram for NOx; authorizes EPA to waive the 1 NOx standard to a level not to exceed 1.5 grams per mile beginning in model year 1981; authorizes EPA to grant a two-year waiver of the CO standard to seven grams; reduces warranties for emission-control devices from five years and/or 50,000 miles to two years and/or 24,000 miles; authorizes EPA and the States to issue enforcement orders extending compliance schedules for stationary sources until July 1, 1979; limits extension of compliance to not more than three years delay, except in cases of innovative technology (five years), coal conversion extensions or smelter orders; automatically subjects noncomplying sources to a penalty after July 1, 1979, equal to the cost of compliance to eliminate any economic advantage of delay; provides that areas where air quality is presently cleaner than the existing standards shall be protected by nondeterioration standards; designates the most carefully protected areas as Class I areas and other areas as Class II and III areas; provides a mechanism for States to redesignate lands from Class I to II or II to III; specifies certain areas which may not be designated as Class III; allows an Indian tribe to designate its land as Class I; defines "significant deterioration" in all clean air areas as a specified amount of additional pollution measured by increments of sulfur oxides and particulates; exempts facilities otherwise subject to the nondegradation provisions which emit less than 50 tons per year of total pollutants from the increment requirements; provides that States issue construction permits to new major emitting facilities in clean air areas requiring the use of best available control technology; requires new sources locating in Class II areas to demonstrate to the State that they will not exceed the Class II pollution increments, or adversely affect the air quality values in any nearby Class I area; allows a State Governor to waive compliance with the Class I standards if computer models show in advance that the standards would not be exceeded for 18 days annually with the right of the Secretary of Interior to object and a final decision to be made by the President within 90 days; requires new sources proposed for construction in nonattainment areas to meet a number of conditions prior to approval of construction; requires that such sources meet the lowest achievable emission rate; requires that emission reductions from existing sources more than offset the emissions from the new source; requires that existing sources use all reasonably available controls; provides that sources may only be approved after July 1, 1979, if a State implementation plan exists, the source is in compliance with its requirements, and the plan assures the attainment of the health standards within three years; makes available an extension until 1987 for States that cannot show attainment of the oxidant and carbon monoxide standards within three years; provides waiver from the source-by-source emission offset requirement available to a State under limited conditions; requires a review of the air quality criteria for existing ambient air quality standards; allows a State to temporarily suspend State implementation plan requirements where necessitated by energy or economic emergencies under specified conditions; authorizes the President to require major noncomplying industrial coal burners to utilize coal supplies that are locally and regionally available instead of importing low-sulfur Western coal if necessary to avoid local economic disruption, after taking into account the final cost to the consumer; and contains other provisions. H.R. 6161—Public Law 95-95, approved August 7, 1977.

Clean water: Authorizes $24.5 billion through 1982 in Federal grants to local municipalities for construction of sewage treatment plants; increases the flexibility of the Administrator of EPA and the States in determining the best cleanup techniques; allows the Secretary to extend for five years, until January 1, 1982, on a case-by-case basis, the deadline for communities to meet clean water standards if they have been unable so far to obtain Federal funds for construction; alters the criteria for grant allocation from the current formula based totally on need, to a new formula based on population plus partial needs; provides a four percent set-aside for grants to rural states; provides a set-aside for construction grants to encourage innovative and alternate technologies of two percent in 1979, and three percent in 1980 and 1981 to bring the rate of funding up from 75 percent to 85 percent; permits the Administrator of EPA to allow a "reasonable" time for compliance with the 1977 deadline and to set up a compliance schedule; allows EPA to grant an extension of the 1977 deadline for achieving the "best practicable technology" up to April 1, 1979, to a source whose facilities are under construction but not completed by July 1, 1977, and who in good faith has tried to meet the requirements; extends for one year, until July 1, 1984, the deadline for using the best available technology to limit discharge of conventional pollutants and 129 other pollutants to be specified by EPA; allows EPA to specify other pollutants which industry must use the best available technology to limit discharge of within three years of its designation by the EPA, but requires complete compliance no later than July 1, 1984; extends the deadline for using the best available technology for all other pollutants until 1987; increases the jurisdiction for oil spills out to 200 miles and the limits of liability for cleaning up oil spilled from tankers or oil terminals; sets liability with respect to inland oil barges at $125 per gross ton or $125,000, whichever is greater and, with respect to any other vessel, at $150 per gross ton unless the vessel carries oil or hazardous substances as cargo in which case there is a minimum liability of $250,000; authorizes the President to raise liability for onshore and offshore handling facilities up to $50 million from $8 million; modifies the controversial wetlands protection provisions by exempting such activities as farming, ranching and forestry; retains Federal control over disposal of dredge and fill materials, but allows any State to administer its own program if it has an EPA approved plan; allows some communities to use an *ad valorem* tax system or another payment scheme to charge residential users for waste treatment if the charges are in proportion to use and if the consumer is notified of his contribution to support the waste treatment facility; continues to require proportionate user charges from industry; and gives States exclusive control over the priority of projects for Federal funding so long as those priorities reflect the requirements of the act. H.R. 3199—Public Law 95-217, approved December 27, 1977.

Climate program: Directs the President to promulgate a five-year national climate program which shall include a statement of responsibilities of the Federal agencies involved and provide for program coordination; establishes a National Climate Program Office with the Department of Commerce which shall be responsible for administering the program; directs the Secretary of Commerce to establish a program of Federal/State cooperative activities in climate research and to provide research results and information to individuals concerned with agricultural production, water resources and energy use; and authorizes the Secretary to make grants of up to 50 percent of the costs in any one year for research and services provided at the State and regional level. H.R. 6669—Public Law 95-367, approved September 17, 1978.

Earthquake hazards reduction: Establishes a national earthquake hazards reduction program under the direction of the President to minimize the loss and disruption resulting from future earthquakes. S. 126—Public Law 95–124, approved October 7, 1977.

Endangered species: Extends through fiscal 1980 and authorizes a total of $16 million for the section 6 State grant-in-aid program under the Endangered Species Act of 1973, and contains language to facilitate qualification by a State for financial assistance under the program. S. 1316—Public Law 95–212, approved December 19, 1977.

Establishes an Endangered Species Interagency Committee to review Federal projects which have come into irresolvable conflict between the act's mandate to project and manage endangered and threatened species and other legitimate national goals and priorities, such as providing energy, economic development and other benefits to the American people, and to determine if the project should be completed, modified or terminated; requires that at the time a species is declared to be threatened or endangered, the appropriate habitat be designated as critical; provides that five members of the seven-member committee must vote to exempt a project from compliance with the act; authorizes the President to grant an exemption for Federally funded works for repairs which are necessary to prevent a recurrence of a natural disaster; and extends the authorization through fiscal 1981. S. 2899—Passed Senate July 19, 1978.

Authorizes $365,564,000 for fiscal 1979 for ongoing research and development programs conducted by EPA plus an additional amount of $40 million for special programs and studies; directs that the $14 million in the President's budget for pollution control technology must be spent by EPA thus prohibiting the proposed transfer of research on energy-related pollution control technologies to the Department of Energy; establishes a specific mechanism for future coordination of Federal research on ocean pollution; includes $7 million for grants to universities and similar institutions conducting research and training to support continuing programs of long-term environmental research; contains $3 million for a study of the special air quality problems of the gulf coast region; authorizes $2 million for a two-year study of the coordination of environmental research in the Federal government and the application of the results of that research to specific environmental problems; authorizes $3 million for grants to support and encourage ongoing participation by qualified groups of citizens on the effect of long-term changes in science, technology and society on the future environment and quality of life; provides $3 million to the National Bureau of Standards to carry out environmentally related programs in coordination with EPA and $2 million for development of specifications to be used in classifying materials recovered from solid waste; and authorizes $15 million for grants to demonstrate technologies to increase the availability of safe, high quality drinking water. H.R. 11302—Passed House April 27, 1978; Passed Senate amended May 26, 1978; Senate agreed to conference report September 26, 1978.

EPA authorization: Authorizes a total of $253,603,000 for the environmental research and development program conducted by the Environmental Protection Agency for fiscal 1978; directs the Administrator to coordinate EPA's programs of environmental research with those of other agencies; and requires Agency employees who perform duties pertaining to environmental research and development or who have known conflicts of interest to file statements with the Administrator concerning such interests. H.R. 5101—Public Law 95–155, approved November 8, 1977.

Fish and wildlife programs—Sea-level canal study: Improves the administration of certain fish and wildlife programs by the Departments of Interior and Commerce; expands the Cooperative Units Assistant program to authorize financial assistance to support researchers who work on projects funded by the program; provides specific authority for the Secretaries to enter into formal cooperative agreements to provide State enforcement officers with certain Federal protections and benefits while they are acting as Federal agents; authorizes the Secretary of Interior to accept gifts or bequests of real and personal property for the benefit of programs administered by the Fish and Wildlife Service; authorizes the use of volunteers in administration of the fish and wildlife progams; authorizes the Secretary of Interior to open more than 40 percent of refuge for hunting upon a published finding that this action is necessary to prevent disease; rereferences the regulation of the subsistence use of migratory birds in Alaska contained in three treaties and conventions on migratory birds with the language contained in the Soviet Convention; modifies the Eagle Protection Act to allow development of regulations permitting the taking of golden eagle nests in certain instances if they conflict with a resource development or recovery operation;

Establishes an Interoceanic Canal Study Council to conduct a review and assessment of alternate routes for the construction and operation of a new interoceanic canal across America to connect the Atlantic and Pacific Oceans, and to submit to the Congress, within one year of enactment, a report specifying the country in which the most advantageous route is located; gives Congress 60 days during which they may disapprove the plan by passage of joint resolution; requires the Secretary of State to certify that the host country is willing to participate in such a canal; establishes, upon appproval of the proposal, an International Sea-Level Canal Study Commission to assess the feasibility of a sea-level canal in the host country and to prepare an environmental impact report; and requires the Commission to submit a report of its findings and recommendations within three years. H.R. 2329—Passed House January 19, 1978; Passed Senate amended September 26, 1978; Conference report filed.

Marine mammal protection: Extends the Marine Mammal Protection Act of 1972 through fiscal 1981; authorizes grants to States of up to 50 percent of the cost of developing and implementing marine mammals management plans; authorizes grants or financial assistance to any Federal or State agency, public or private institution, or other person to undertake research in subjects which are relevant to the protection and conservation of marine mammals; and authorizes funds for the administration and enforcement of the program. H.R. 10730—Public Law 95–316, approved July 10, 1978.

Noise control: Authorizes $10.9 million for general technical assistance, regulatory and administrative responsibilities under section 19 of the Noise Control Act of 1972 and $2.1 million for research and development for fiscal 1978. S. 1511—Passed Senate May 18, 1977.

Extends the Noise Control Act through fiscal 1979 and authorizes therefore $17,812,000; includes $3 million for noise research by the Environmental Protection Agency and $4 million for provision of technical assistance by the Environmental Protection Agency and the Secretary of Transportation areawide abatement programs; requires certain airport owners and operators to submit to the Administrator and the Secretary areawide noise abatement plans respecting aircraft noise associated with airports falling within the purview of the bill; establishes criteria for the disapproval of such plan; provides that the Administrator shall monitor the implementation of approved plans; and requires annual reports to Congress on development and implementation. S. 3083.—Public Law 95– , approved 1978.

Nongame fish and wildlife conservation: Authorizes $90 million through fiscal 1981 for the Secretary of the Interior to provide grants to the States for conserving nongame fish and wildlife including habitat acquisition and modification, census taking and population monitoring, educational interpretative programs, and improved wildlife related law enforcement; and provides that the Federal share of project costs would be 90 percent in the first two years and 75 percent thereafter. S. 1140—Passed Senate May 24, 1978.

Ocean dumping: Amends the Marine Protection, Research and Sanctuaries Act of 1972 to authorize a total of $11.3 million for fiscal 1978 of which $4.8 million is for ocean dumping, $6 million for research aspects needed to support a limitation on dumping harmful materials into the ocean, and $500,000 for the designation and regulation of marine sanctuaries; and provides that the dumping into ocean waters of municipal sewage sludge which may unreasonably degrade the marine environment shall be ended as soon as possible, and in no case continue beyond December 31, 1981. H.R. 4297—Public Law 95–153, approved November 4, 1977.

Ocean pollution research: Calls upon the Administrator of the National Oceanic and Atmospheric Administration, in coordination with the Administrator of EPA, to prepare a comprehensive five-year Federal plan for environmental research and development related to marine pollution, with emphasis on the inputs, fates and effects of petroleum, sewage, sludge and other pollutants in the marine environment; requires an estimate of the adverse environmental impact caused by increased shipments of foreign oil into the U.S.; and authorizes grants and contracts for environmental research and development pertaining to marine pollution and requires that grant applications and contract bids be acted on within six months of receipt. S. 1617—Public Law 95–273, approved May 8, 1978.

Oil spill liability: Establishes a single, comprehensive, Federal statute dealing with liability and compensation for damages and cleanup costs caused by an oil spill from vessels or facilities on the navigable waters, including the inland waters, of the United States; imposes strict liability, including removal and mitigation costs, on the owner or operator of any vessel or facility discharging oil or hazardous substances in violation of the Clean Water Act; creates two funds, one for oil spill liability to pay for the removal of and damages from oil discharges (which supercedes all existing or proposed funds) and one for hazardous substances to pay claims and removal costs associated with the discharge of hazardous substances; establishes the oil liability fund with fees of up to three cents per barrel of crude oil received by refineries or terminals and provides that the fees would be suspended when the fund reached $200 million; provides that payments from the hazardous substance fund would not commence until EPA's pending litigation on its regulations (designation, removability, rate of penalty and harmful quantities) issued pursuant to the Clean Water Act is resolved; requires a study, within 18 months, by an interagency task force on a system of fees for hazardous substances and the appropriate size of the fund; preserves the power of any State to impose any additional requirements or liability with respect to discharges of oil or hazardous substances within the State; and calls upon the agencies with management and protection responsibilities over natural resources to standardize a process for assessing natural resources dam-

ages caused by both major and minor spills and to issue initial regulations within two years which will be updated and reviewed on a regular basis every two years. H.R. 6803—Passed House September 12, 1978; Passed Senate amended October 5, 1978; House agreed to Senate amendment with amendment October 12, 1978.

Safe drinking water: Extends the Safe Drinking Water Act of 1974 through fiscal 1979 and authorizes therefor a total of $71 million for 1978 and $81 million for 1979; requires EPA to submit to Congress, within 18 months of enactment, a report relating to costs of implementing the act and an analysis of the present and projected availability of an adequate and dependable supply of safe drinking water; directs the Administrator to make grants for free training to personnel of State and local agencies and those who work for public water systems; authorizes EPA to make grants to a State if it is making a diligent effort and significant progress toward primary enforcement; provides for EPA retention and reallocations to other States of 25 percent of grants if primary enforcement is not assumed by fiscal 1980; extends for an additional 270 days the current 270 day period for State submission of applications for primary enforcement responsibility for the underground drinking water sources program; requires Federal agencies to comply with all State and local requirements respecting drinking water and underground injection programs; directs EPA to avoid disrupting or duplicating existing State law when establishing regulations governing underground injection control; provides that any State or local government may bring suit in State courts to enforce any requirement of safe drinking water or the underground injection program; authorizes the Administrator to make grants to alleviate emergency drinking water situations; and authorizes the Administrator to require public waste systems to monitor for sodium and other unregulated contaminants and to notify their customers of the level in their drinking water. S. 1528—Public Law, 95–190, approved November 16, 1977.

Stripmining control and reclamation: Establishes a program for the regulation of coal surface mining activities and the reclamation of coal mined lands, under the administration of the Office of Surface Mining Reclamation and Enforcement in the Interior Department, to assure that surface coal mining operations—including exploration activities and the surface effects of underground mining—are conducted so as to prevent or minimize degradation to the environment and that such surface coal mining is not conducted where reclamation is not feasible; sets forth a series of minimum uniform requirements for all coal surface mining on both Federal and State lands which deal with (1) preplanning, (2) mining practices, and (3) post-mining reclamation; provides that these minimum Federal standards be administered and enforced by the States and by the Secretary of the Interior on public lands; authorizes funds to assist States in improving their regulatory and enforcement programs; provides for Federal enforcement of a State program if a State fails to comply with the act; authorizes $200,000 in 1978, $300,000 in 1979 and $400,000 thereafter for five years in matching funds to each State to establish a State mining and mineral resources research institute to conduct research and train mineral engineers and scientists; provides for the protection of scarce and vital water resources in the permit application requirements, reclamation standards and provisions for designation of areas unsuitable for mining; provides for a mechanism on both State and Federal lands for citizens to petition for certain areas being designated as unsuitable for surface coal mining; prohibits stripmining of lands which cannot be reclaimed under the standards of the act in national parks and recreational areas, and areas which would adversely affect such parks; prohibits stripmining 300 feet from an occupied building, 100 feet from a public road, or 500 feet from an underground mine; requires with regard to lands where the Federal government owns the coal but not the surface estate that the surface owner must give written consent to the stripmining of the Federally-owned coal deposits and where the surface and mineral estates are in private ownership, disputes shall be settled by State law; requires the Secretary of Interior to issue interim regulations for environmental standards within 90 days; requires EPA approval of air and water quality regulations; requires compliance by all new mines within six months; exempts mining operators with under 100,000 tons annual production from compliance with the interim environmental standards until January 1, 1979; bans stripmining on alluvial valley floors if it disrupts farming and the quantity and quality of the water supply except in specified circumstances; requires a coal exchange program for fee coal located in alluvial valleys; requires that applicants seeking to stripmine on prime farmland demonstrate to the State regulatory authority that they have the technological capability to restore the mined area within a reasonable time; establishes a fund to be used to reclaim abandoned mined lands which will be derived from a reclamation fee levied on every ton of coal mined at 35 cents per ton for surface mined coal and 15 cents per ton for all coal mined by underground methods or 10 percent of the value of the coal at the mine, whichever is less; requires that 50 percent of all fees be allocated to the State or Indian reservation from which it was mined; applies to lignite coal a fee of the lesser of either 10 cents per ton or two percent of the value of the coal; requires the Secretary, pending approval of a State program, to carry out a Federal enforcement program which includes inspection and enforcement actions in accordance with the act; and contains comprehensive provisions for inspections, enforcement notices and orders, administrative and judicial review, penalties and citizen participation. H.R. 2—Public Law 95–87, approved August 3, 1977.

Increases to $25 million the funding for grants to States to cover costs of enforcement programs during the interim enforcement period and costs of Federal inspections during the interim period; and increases the funding for the program of assistance to small coal mine operators (those producing 100,000 tons or less per year) to $25 million in each of fiscal 1979 and 1980. S. 2463—Public Law 95–343, approved August 11, 1978. (VV)

Toxic substances: Provides for the compensation of victims of chemical contamination incidents involving food, livestock or poultry; provides a mechanism for a State to apply for Federal grants of up to 75 percent of the amount a State pays victims injured by a chemical accident; provides that States may apply for Federal assistance for farming operations that would be hard hit by any quarantine for condemnation actions taken against their crops, livestock or poultry; permits consumers who unknowingly are exposed to the toxic chemicals through consumption of tainted food products to apply to EPA for assistance; and increases the authorization to $50 million for fiscal 1978 and $100 million for fiscal 1979. S. 1531—Passed Senate October 31, 1977.

GENERAL GOVERNMENT

Amateur sports: Expands the authority of the United States Olympic Committee to act as the coordinating body for amateur athletic activities; directs the Committee to establish and maintain provisions for the equitable resolution of disputes involving participation in the Olympic Games, the Pan American Games, world championship competition, or other competitions designated by the Committee; provides a mechanism by which formal complaints or challenges made against the authority of national governing bodies; and authorizes the Secretary of Commerce to award grants to assist the committee in the development of amateur athletics in the United States. S. 2727—Passed Senate May 8, 1978; Passed House amended September 26, 1978.

D.C. retirement reform: Establishes, with Federal financial assistance, separate retirement funds for police officers and firefighters, teachers and judges of the District of Columbia in order to liquidate the Federal share of the unfunded liability accrued by pensions granted prior to transfer to the District's Home Rule government on January 2, 1975; establishes a Retirement Board to manage the funds; provides actuarially sound management to protect the benefits of participants and beneficiaries under the plans; requires the Retirement Board to comply with reporting and disclosure requirements similar to those in the Employee Retirement Income Security Act of 1974; provides disability retirement benefits which compare with other cities; and provides the annuitant a sufficient retirement allowance while keeping pension costs at a level the District can afford. H.R. 6536—Passed House September 26, 1977; Passed Senate amended August 24, 1978; Senate agreed to conference report October 6, 1978.

Federal assistance program information: Increases the availability of information about Federal domestic assistance programs by requiring the Director of the Office of Management and Budget (OMB) to identify and provide information on specified Federal domestic assistance programs for public distribution through electronic media and a public catalog. S. 904—Public Law 95–220, approved December 28, 1977.

GAO audits: Provides that the General Accounting Office may conduct management and finanical audits of the Internal Revenue Service and the Bureau of Alcohol, Tobacco and Firearms and contains provisions to insure the confidentiality of information and imposes penalties for unauthorized disclosure. S. 213—Public Law 95–125, approved October 7, 1977.

Requires the Comptroller General to conduct audits of the Federal Reserve System (FRS), the Office of the Comptroller of the Currency (OCC), and the Federal Deposit Insurance Corporation (FDIC), which are at present the only exceptions to FAO audits; and extends to GAO employees having access to bank examination reports the penalty provisions for unlawful disclosure of information. H.R. 2176—Public Law 95–320, approved July 21, 1978.

Intelligence activities authorization: Authorizes such amounts as specified in a classified annex prepared by the Committee of Conference for intelligence activities of the United States government for fiscal 1979 including specific amounts for the Central Intelligence Agency, Defense Intelligence Agency, National Security Agency, military services, Departments of State, Treasury and Energy, Federal Bureau of Investigation and the Drug Enforcement Administration plus $12,700,000 for the Intelligence Community staff (ICS) and sets the end strength of full-time employees at 269; authorizes $43.5 million for the Central Intelligence Agency Retirement and Disability System; and requires the Attorney General to submit a one-time report describing those cases during 1979 that an alien was admitted into the United States after the Attorney General was notified by the FBI Director that the alien was excludable under certain provisions of the Immigration and Nationality Act. H.R. 12240—Public Law 95–370, approved September 17, 1978.

Justice Department authorization: Provides for the first time an authorization to carry out the activities of the Department of Justice for fiscal 1979. S. 3151—Passed Senate July 10, 1978; Passed House amended September 28, 1978; Senate agreed to conference report October 13, 1978.

Library services and construction: Extends through fiscal 1982 the authorizations in the Library Services and Construction Act for library services grants, public library construction grants, interlibrary cooperation grants and older readers services grants; directs that a portion of library services funds be reserved for urban libraries; revises the hold harmless base year date for library services to the handicapped; and provides that remodeling funds under library construction programs may be used to remove architectural barriers to the handicapped and to make library structures more energy efficient. S. 602—Public Law 95–123, approved October 7, 1977.

NASA authorizations: Authorizes $4,049,429,000 for NASA for fiscal 1978 of which $3,041,500,000 is for research and development, $160,940,000 is for the construction of facilities, and $846,989,000 is for research program and management; supports several new programs including: five space shuttle orbiters, a third generation earth resources survey spacecraft, Landsat–D, to carry an advanced scanning instrument, initiation of a Jupiter orbiter probe mission; provides continued funding of the Space Shuttle; and includes the second funding increment for a fuel efficient aircraft technology development program designed to decrease fuel consumption of commercial jet transports by 50 percent. H.R. 4088—Public Law 95–76, approved July 30, 1977.

Authorizes $4,401,600,000 for NASA for fiscal 1979 of which $3,337,600,000 is for research and development, $150,000,000 is for construction of facilities, and $914,000,000 is for research and program management; supports research and development projects currently underway and several important new starts all within the space function; provides funding for the continuing development of the Space Shuttle; supports major projects in space science and applications approved in prior years and significant efforts in earthquake and ocean condition monitoring and forecasting, and weather observation and forecasting; and supports research and development projects in all of the major classes of aeronautical vehicles. H.R. 11401—Public Law 95–401, approved September 30, 1978.

Payments-in-lieu-of-taxes for certain Federal lands: Adds to the list of lands for which Federal payments are made the following three new categories: (1) semiactive or inactive military installations; (2) national park lands acquired for donation to the Federal Government and so donated within eight years of acquisition; and (3) any unit of local government located outside the boundaries of an organized borough in Alaska which acts as the collecting and distributing agency for real property taxes. S. 74—Passed Senate May 19, 1978.

U.S. territories: Provides authorizations for the continuance of the civil government of the Trust Territory of the Pacific through fiscal 1980; authorizes $13,515,000 for the government of the Northern Marianas until the separate funding provisions of their Covenant become effective; authorizes payment of adjudicated claims and final awards made by the Micronesian Claims Commission contingent upon Japan's payment of 50 percent of these claims; authorizes $12.5 million for the rehabilitation of Eniwetok Atoll; provides compensation to the people of Rongelap and Utirik Atolls in the Marshall Islands for radiation exposure resulting from a thermonuclear detonation on Bikini Atoll; authorizes a $15 million grant to Guam for typhoon rehabilitation, upgrading and construction of public facilities, and maintenance of essential services; provides for the Secretary to assume the costs of the Guam and Virgin Islands comptrollers general; gives the district court of Guam jurisdiction to review individual claims arising from U.S. land acquisitions in Guam immediately after World War II; authorizes $25 million to enable Guam to purchase the new Medical Center of the Marianas; allows the Virgin Islands Legislature to vary the present six percent ad valorem custom duty on imports; extends to Guam and the Virgin Islands certain programs that will be extended to the Northern Marianas by the Commonwealth Covenant; and provides for the consolidation of block grants to the Virgin Islands, Guam, American Samoa, the Trust Territory of the Pacific and the Government of the Northern Marianas. H.R. 6550—Public Law 95–134, approved October 15, 1977.

Authorizes $13,868,000 for fiscal 1979 and $20 million thereafter for grants to the government of Guam for rehabilitation, upgrading and construction of public facilities; calls for an analysis of the capital infrastructure needs of Guam for the period 1985 through 1990; increases the authorization for the purchase of the Marianas Medical Center by Guam; authorizes $15 million for relocation of the people of Bikini Atoll within the Marshall Islands and to cover compensation costs for any radiological damage; authorizes $12 million for the construction of a powerplant for the Northern Mariana Islands; authorizes implementation of a food stamp program in the Northern Mariana Islands and distribution of Federally-donated foods where a food stamp program has not been implemented; authorizes $5 million to the government of the Virgin Islands to promote economic development; authorizes $52 million for construction of hospital facilities; and establishes various memorials to commemorate campaigns of the Pacific Theater of World War II. S. 2821—Public Law 95–348, approved August 18, 1978.

White House authorization: Provides permanent authority for the employment of experts and consultants, expenses, maintenance and operation of the White House Office, the Executive Residence at the White House, the executive duties and responsibilities of the Vice President, the Domestic Policy staff and the Office of Administration; and continues the present authorization of $1 million for unanticipated needs of the President and requires an annual report setting forth the amounts and purposes of such expenditures for the prior fiscal year. H.R. 11003—Passed House April 13, 1978; Passed Senate amended July 14, 1978; Senate agreed to conference report October 7, 1978.

GOVERNMENT EFFICIENCY AND REORANIZATION

Civil service reform: Makes a comprehensive reform of the civil service laws; codifies merit system principles and subjects employees who commit prohibited personnel practices to disciplinary action; provides for an independent Merit Systems Protection Board and Special Counsel to adjudicate employee appeals and protect the merit system; provides new protections for employees who disclose illegal or improper government conduct; empowers a new Office of Personnel Management to supervise personnel management in the executive branch and delegate certain personnel auhority to the agencies; establishes a new performance appraisal system and new standard for dismissal based on unacceptable performance; streamlines the processes for dismissing and disciplining Federal employees; creates a Senior Executive Service which embodies a new structure for selecting, developing and managing top-level Federal executives; provides a merit pay system for GS–13 to 15 managers, so that increases in pay are linked to the quality of the employees' performance; authorizes the Office of Personnel Management to conduct research in public management and carry out demonstration projects that test new approaches to Federal personnel administration; and creates a statutory base for the improvement of labor-management relations, including the establishment in law of the Federal Labor Relations Authoriy. S. 2640—Public Law 95– , approved 1978.

Customs procedural reform: Simplifies and reforms a number of customs procedures to expedite the processing of good and individuals; increases the personal duty exemption; imposes different penalties for fraud, negligence and gross negligence; and places a one-year limit on the time in which Customs has to liquidate a re-entry. H.R. 8419—Public Law 95–410, approved October 3, 1978.

D.C. voting representation in congress: Proposes an amendment to the Constitution, which must be ratified to be valid as part of the Constitution by three-fourths of the States within seven years, to provide representation of the District of Columbia in the U.S. House of Representatives and the Senate; permits the District to participate fully in the electoral college; and extends to the people of the District the right to participate in the ratification process of proposed amendments to the Constitution. H.J. Res. 554—Passed House March 2, 1978; Passed Senate August 22, 1978. Submitted to the States for ratification.

Ethics in Government: Establishes for the first time, a new code of financial disclosure for the executive, legislative and judicial branches of government; enacts new restrictions on post-employment activities by former high-ranking executive branch officials to prohibit "revolving door" employment; sets up a mechanism for the appointment of temporary special prosecutors in cases involving criminal activity by executive branch officials where the Justice Department has a conflict of interest; and creates a new Senate legal counsel to provide legal representation in cases where the Senate's institutional powers are in question. S. 555—Passed Senate June 27, 1977; Passed House amended September 27, 1978; Senate agreed to conference report October 9, 1978.

Federal employees flexible and compressed work schedules: Establishes a three-year experiment by the Civil Service Commission in flexible work schedules (under which there is a designated core time during which all employees must be present, and flexible time during which employees may choose their time of arrival and departure within certain limits) and compressed work schedules (under which a full-time employee works 80 hours within a schedule of less than ten work-days); allows an employee to work more than an eight hour day or 40 hour week without receiving overtime pay; permits experiments with a four-day week or other compressed work schedule in units not represented by an employee union if a majority of the employees so approve; provides for transfer of workers who would suffer a personal hardship under the experiment; and mandates the Commission to evaluate the impact of flexible and compressed work schedules on energy usage, commuter traffic patterns, utilization of mass transit, services to the public, general efficiency of government operations and impact on individuals and families. H.R. 7814—Public Law 95–390, approved September 29, 1978.

Federal employees part-time career employment: Requires the creation of a part-time career employment program in every Federal agency to promote the creation of part-time job opportunities at all civil service grade levels up to a 16; makes clear the intent to encourage permanent part-time work, rather than temporary or intermittent employment; requires the review of positions as they become open to ascertain whether they are appropriate for conversion to part-

time slots; provides that an agency shall not abolish any position occupied by an employee in order to make the duties available on a part-time basis; provides that no full-time employee can be coerced into taking a part-time position as a condition of continued employment; and changes the current method for determining personnel ceilings in each agency by requiring the counting of employees on the basis of the fractional part of the 40-hour week actually worked. H.R. 10126—Public Law 95-437, approved October 10, 1978.

Offices of Inspector and Auditor General: Creates the Offices of Inspector and Auditor General in seven executive departments (Agriculture, Commerce, Defense, HUD, Interior, Labor and Transportation) and six executive agencies (CSA, EPA, GSA, NASA, SBA and VA) to consolidate existing auditing and investigative resources to more effectively combat fraud, abuse, waste and mismanagement; provides that each Inspector and Auditor General will be appointed by the President with Senate approval; makes the head of the agency the Inspector General's immediate supervisor but prohibits him from limiting the Inspector General from undertaking and completing any audits and investigations which he or she deems necessary; provides that the Inspector General may be removed only by the President who must inform Congress of his reasons for doing so; requires semiannual reports to Congress; gives the Inspector General authority to have access to all records, reports or documents available to the agency relating to programs over which he or she has responsibility and to require, by subpena, the production of such information; and provides that the Inspector General may receive and investigate employee complaints. H.R. 8588—Public Law 95-452, approved October 12, 1978.

Presidential reorganizational authority: Extends for three years from the date of enactment the authority of the President under chapter 9, title 5, U.S.C., to submit reorganization plans to Congress proposing the reorganization of agencies in the executive branch; provides that reorganization plans may: create new agencies, transfer or consolidate the whole or part of agencies or their functions to other agencies, abolish all or part of the functions of an agency except any enforcement function or statutory program, change the name of an agency, authorize an agency official to delegate any of his functions, and provide that the head of any agency be an individual, commission or board with a fixed term not to exceed four years; requires that each plan be based upon a presidential finding that the proposed action is necessary to accomplish one or more of the purposes of the statute and specify the reduction of or increase in expenditures likely to result from the plan, as well as any anticipated improvements in the effectiveness or efficiency of the government; prohibits the use of reorganization authority to: create a new executive department, abolish an executive department or an independent regulatory agency, abolish any function mandated by Congress through statutes, increase the term of an office beyond that provided by law, create new functions not authorized by pre-existing statutes, or continue a function beyond the period authorized by law; requires the President to submit each plan to both Houses of Congress simultaneously for referral to the appropriate committees; requires that a disapproval resolution be introduced whenever a plan is submitted to assure that there will be a resolution for the Committee to act on and to report either favorably or unfavorably; provides that plans shall become law at the end of 60 calendar days of continuous session of the Congress unless either House passes a resolution of disapproval; specifies that no more than three reorganization plans may be pending in the Congress at any one time; allows the President to amend a plan within the first 30 days after submission if neither committee has ordered reported a disapproval resolution or made any other recommendations on the plan, or to withdraw a plan at any time prior to the conclusion of the 60 day period; contains parliamentary procedure for congressional floor action when considering reorganization plans; and specifies that plans may provide for the transfer or other disposition of affected records, property, and personnel, and for the transfer of unexpended appropriations if the funds will be used for their original purpose. S. 626—Public Law 95-17, approved April 6, 1977.

Sunset review: Establishes a systematic and orderly procedure for reconsideration by Congress every 10 years of its past program enactments in order to increase congressional options for allocating Federal resources to meet changing national needs and congressional accountability for past legislation; sets out a ten year schedule for the reconsideration and reauthorization of all Federal programs, according to groups by budget subfunction; requires that no new budget authority can be obligated or expended for any program not specifically reauthorized by Congress according to the termination schedule; and requires that the report accompanying any authorization bill reported out by a committee must answer certain basic questions about the legislation. S. 2—Passed Senate October 11, 1978.

HEALTH

Clinical laboratories: Extends and expands the existing program of mandatory licensure to all laboratories (except those under the jurisdiction of the Department of Defense or the Veterans' Administration) soliciting and accepting specimens for laboratory analysis; authorizes the Secretary of Health, Education, and Welfare to license those laboratories meeting quality assurance standards and to delegate this authority to States with primary enforcement responsibility to implement laboratory quality assurance programs; authorizes establishment of an Office of Clinical Laboratories to provide a uniform regulatory program for all laboratories subject to Federal jurisdiction; provides authority to exempt physicians' office laboratories under certain conditions and laboratories primarily engaged in biomedical or behavioral research; authorizes increased penalties for failure to comply with the national standards and for any fraudulent reimbursement claims under Medicare-Medicaid; and authorizes one-year experimental demonstration competitive bidding in State medicaid programs. S. 705—Passed Senate July 28, 1977.

Community mental health centers—biomedical research: Extends through fiscal 1979 the assistance programs under the Community Mental Health Centers Act; permits recovery of facilities assistance funds awarded under the Mental Retardation Facilities and Community Mental Health Centers Construction Act of 1963; authorizes the Surgeon General to make research chemicals and research animals available to appropriate public health authorities and other officials and scientists; extends authorizations to assist medical libraries for three fiscal years; authorizes the Director of the National Cancer Institute to establish and pay for centers for basic research; provides a one-year extension for the National Cancer Institute and for the National Heart, Lung and Blood Institute; extends the National Research Service Award Act for three years; authorizes Federal assistance for education, counseling and treatment projects for families of alcoholics; and encourages research on the impact of alcohol abuse and alcoholism on the family; and establishes a presidential commission for the protection of human subjects of biomedical and behavioral research. S. 2450—Passed Senate June 26, 1978.

Family planning—sudden infant death: Expands the availability of voluntary family planning services and increases research in the biomedical, contraceptive development, and behavioral fields relating to family planning and population by providing substantially increased authorizations for the services, training, research and information programs for the next five years; places new emphasis on family planning services to sexually active adolescents and to members of both sexes who want to avoid unwanted pregnancy; ensures that no services project employee is compelled to act regarding abortion or sterilization in a way that violates personal conscience; establishes, within HEW, an administrative unit to carry out the Sudden Infant Death Syndrome program and provides substantially increased authorizations for the program over the next five years to improve and expand the data collection system, provide clearinghouse activities, expand counseling and information projects, improve services in States now being served, and insure that adequate resources are made available within the National Institute of Child Health and Human Development for research into the causes and prevention of sudden infant death. S. 2522—Passed Senate June 7, 1978.

Health maintenance organizations: Authorizes $170 million for health maintenance organization (HMO) feasibility planning and initial development grants and contracts for three fiscal years; increases the maximum dollar limit for initial development project grants, contracts and loan guarantees, the aggregate dollar limit for initial operating loans and guarantees and the amount of operating loans which could be disbursed to an HMO in any one year; adds a new authority for loans and loan guarantes to assist in the costs of equipping, constructing, acquiring or renovating ambulatory care facilities for HMO's and entities intending to become HMO's; provides increased controls to prevent fraud and abuse; and imposes criminal penalties for knowingly filing false statements. S. 2534—Passed Senate July 21, 1978; Passed House amended September 25, 1978; In conference.

Health planning: Revises and extends the authorities and requirements under titles XV and XVI of the Public Health Service Act for health planning and health resources development; strengthens the certificate of need program in order to insure linkages between planning and regulatory decisions and requires that all certificate of need decisions be consistent with each State's individual health plan; extends the requirement for certificate of need review to any one piece of equipment valued over $150,000 regardless of location; and establishes a new program to encourage the voluntary discontinuance of unneeded or duplicative hospital services. S. 2410—Passed Senate July 27, 1978.

Health research: Extends for three years the authorization for the National Center for Health Services Research and the National Center for Health Statistics and establishes legislative authority and definition to the Office of Health Technology which is presently existing as an administrative entity within the Office of Assistant Secretary for Health. S. 2466—Senate rejected June 26, 1978; Reconsidered and passed Senate August 10, 1978; Passed House amended September 25, 1978; In conference.

Hospital cost containment: Authorizes standby mandatory Federal hospital cost controls effective on July 1, 1979 if the voluntary program that has been put in place by the American Hospital Association fails to cut inflation by 2 percent annually in 1978 and in 1979; and contains medicare-medicaid

administrative provisions. H.R. 5285—Passed House July 18, 1977. Passed Senate amended October 12, 1978. (486)

Medical school grants: Requires medical schools which are required, as a condition to receiving capitation grants, to accept U.S. citizens who completed at least two years of study in foreign medical schools in the 1978–79 school year and passed part I of the National Board of Medical Examiners examination to increase, by five percent, the third year enrollment for the 1978–79 school year; allows public traineeship grants to be awarded to all institutions providing graduate or specialized training in public health; gives the director of the Indian Health Service additional flexibility to recruit doctors to serve Indian populations; and requires a study to determine whether schools of medicine, nursing or osteopathy deny admission or discriminate against any applicant because of his or her views on abortion. H.R. 9418—Public Law 95–215, approved December 19, 1977.

Nurse training: Extends for two years, through fiscal 1980, the various grant and loan authorities under the Nurse Training Act; and provides that grants or contracts may be awarded to schools of medicine, osteopathy, dentistry, veterinary medicine, optometry, pharmacy, podiatry and public health if they are in serious financial distress. S. 2416—Passed Senate June 7, 1978; Passed House amended September 19, 1978; in conference.

Public health programs: Extends through fiscal 1983 the assistance programs under the Public Health Service Act which have demonstrated their ability to improve the health status of our population and to increase the access of medically underserved populations to health care services in a cost effective manner which include prevention and control of venereal disease, research and counseling information on genetic diseases, hemophilia treatment and blood separation centers, home health services, community health centers and migrant health centers: establishes a three-year program to assist hospital-affiliated primary care centers in areas where such centers will not duplicate the services provided by community and migrant health centers; establishes a Commission on National Primary Health Care Needs to develop a national strategy to assure equal access to primary health care for all individuals regardless of location or income; authorizes through fiscal 1981 programs relating to hypertension, formula grants to the States for comprehensive public health services, immunization of children against communicable diseases, rodent control and lead-based paint poisoning; establishes an Office of Physical Fitness and Sports Medicine and authorizes formula and project grants for comprehensive preventive health services; and establishes a program for developing community-based services to assist pregnant adolescents and adolescent parents. S. 2474—Passed Senate September 29, 1978.

PUBLIC HEALTH PROGRAMS—BIOMEDICAL RESEARCH: Extends through fiscal 1978, without major substantive modifications, the assistance programs under the Community Mental Retardation and Community Mental Health Centers Act and the programs under the Public Health Service Act, including biomedical research and authorizes therefor $3.357 billion; authorizes an additional $67.5 million for grants to construct and modernize public hospitals to meet life and safety codes and avoid loss of accreditation; prohibits payments under medicare and medicaid to health maintenance organizations whose memberships are made up of a majority of individuals who are recipients of such benefits; provides for equity in student loan programs, scholarship programs and payback provisions for medical students within the National Health Service Corps; increases the authorization for the maternal and child health grant programs and extends through fiscal 1980 the authority for 100 percent Federal financing of medicaid skilled nursing and intermediate care facility inspection and enforcement costs; provides that States shall not receive less than their 1976 formula grant allotments under the Comprehensive Alcohol Abuse and Alcoholism Prevention, Treatment and Rehabilitation Act; and authorizes $140 million for preventive family planning project grants and $5 million for the Sudden Infant Death Syndrome Counseling and Information Services. H.R. 4975—Public Law 95–83, approved August 1, 1977.

RENAL DISEASE: Improves the end stage renal disease program by providing incentives for the use of lower cost, medically appropriate self-dialysis as an alternative to high cost institutional dialysis; eliminates current program disincentives to the use of transplantation; implements incentive reimbursement methods to assure more cost-effective delivery of services to dialysis patients and providing for studies of alternate ways to improve the program. H.R. 8423—Public Law 95–292, approved June 13, 1978.

SACCHARIN STUDY: Provides the authority for studies on the health risks and benefits of saccharin and information respecting food additives in general and requires that the saccharin study be completed within one year of enactment and the food additives study within 15 months; delays the FDA proposed ban on the sale of saccharin and saccharin products for 18 months pending completion of the studies; and requires a specified warning label on all food products containing saccharin. S. 1750—Public Law 95–203, approved November 23, 1977.

HOUSING

Housing and community development: Amends the Housing and Community Development Act of 1974 and authorizes a total of $14,678,975,000 for housing programs through fiscal 1980; authorizes $12.4 billion for extension of the community development program of which not less than $197 million is for for low-cost housing projects, and not less than $120 million be used for housing for the elderly and handicapped; provides a dual formula method of allocation which permits communities to use either poverty or age of housing stock as the primary indicator of need; authorizes $400 million for the creation of an urban development action grant program (UDAG) to aid seriously distressed cities over the next three years; provides that priority for UDAG funds be given to impacted cities and urban counties most in need; authorizes $100 million annually for the next three years for completion and financial close-out of urban renewal projects; allows multiyear funding to small cities; permits a town or township to be deemed a city if all incorporated places within its boundaries enter into agreements with it to undertake essential community development and housing assistance activities; sets aside 25 percent of UDAG funds for cities with populations under 50,000; provides $1.2 billion in new contract authority for low-income housing programs and limits the amount of assistance to be used on existing rather than new housing; authorizes $685 million for public housing operating subsidies; permits HUD to make assisted housing payments for new or rehabilitated housing units beyond 60 days in an FHA-insured project; provides that loans for housing and related facilities for elderly and handicapped persons assisted under section 202 be made without regard to mortgage insurance limits contained in the National Housing Act; permits interest reduction subsidies for section 235 cooperatives to increase the availability of cooperative housing projects for low-income families; authorizes $60 million for policy development and research and $15 million for the urban homesteading program; extends the flood insurance program for one year, with several modifications, including a provision allowing communities which choose not to participate in the flood insurance program to continue to have access to conventional forms of financing; extends through fiscal 1978 the following mortgage credit programs authorized under the National Housing Act: insurance of financial institutions, general insurance program, housing for moderate income and displaced families, home ownership for lower income families, rental cooperative housing for lower income families, experimental financing, armed services housing, mortgage insurance for land development, and mortgage insurance for group practice facilities; extends through fiscal 1978 the authority to set FHA interest rates; increases the maximum loan amount for FHA-insured mortgages and for loans made by chartered savings and loan associations to adjust for the inflation in the costs of homes, mobile homes and home improvements; decreases the downpayment requirements for FHA-insured loans; lowers the FHA mortgage insurance premium paid by nonprofit teaching facilities hospitals; provides for the expansion of the experimental graduated payment mortgage program; amends the Government National Mortgage Association emergency tandem plan to correct problems in the program and give it greater flexibility, particularly for use in urban areas and for housing rehabilitation; establishes the Community Reinvestment Corporation which requires Federal financial regulatory agencies in the course of examining the institutions they regulate to assess each institution's performance in meeting the credit needs of its primary savings service area to the extent consistent with sound business operations; provides that regulations resulting from the act will become effective no later than 390 days after its enactment; extends through fiscal 1978 the rural housing programs under the Farmers Home Administration (FmHA) and increases by $25 million the low rent housing for domestic farm labor and low income repair loans programs; modifies the guaranteed loan program of FmHA to completely separate the guaranteed loan program, both in operation and funding, from the insured (direct) loan program; restricts the guaranteed loan program to persons with above average incomes, thereby asserting congressional intent that FmHA use the direct loan program for low- and moderate-income persons; authorizes $10 million in fiscal 1978 for the mutual and self-help housing program; provides, for the first time, special authorizations for rural housing for the handicapped; authorizes congregate housing for elderly and handicapped persons and families; requires that at least 60 percent of FmHA loans made pursuant to the single family and rental programs benefit persons of low income; requires the establishment of a research capacity within FmHA; mandates the implementation of a rural rent subsidy; expands the definition of "rural area" to include smaller communities with standard metropolitan statistical areas which have a serious lack of mortgage credit; and states explicitly that property subject to a lien by the United States or held by the FmHA is taxable by State and local jurisdictions. H.R. 6655—Public Law 95–128, approved October 12, 1977.

Authorizes $30 billion in fiscal 1979 to extend the basic housing and community development programs conducted by the Department of Housing and Urban Development and the Farmers Home Administration; authorizes a major expansion of the section 312 rehabilitation loans and the urban homesteading programs with important changes designed to increase the effectiveness of these programs; gives a higher priority to loans for lower income families; provides a

sliding scale of interest rates ranging between three percent and the Treasury's borrowing rate, based on family income in order to improve targeting of Federal subsidies; authorizes $370 million in rehabilitation loans annually in fiscal 1979 and 1980; allows cities which cannot qualify for funds on a citywide basis but which have areas of severe economic and physical distress to receive Urban Development Action Grant (UDAG) funds; authorizes funding increases for Housing Assistance Programs including programs of assistance to benefit the handicapped, to improve security in publicly-assisted projects, and to maintain financially troubled projects; extends FHA insurance and a number of other housing related programs for an additional year; establishes a new program to provide services, such as housekeeping assistance and meals, for low-income elderly and disabled individuals residing in publicly-assisted housing; extends and authorizes funding for rural housing programs and initiates a new program to assist very low income rural families to purchase and maintain their homes; establishes the Neighborhood Reinvestment Corporation Act to continue the work of the Urban Reinvestment Task Force in sponsoring neighborhood housing services programs, defined as local partnerships of residents, lending institutions and local government working to upgrade the neighborhood; and amends various housing acts in order to provide for, among other matters, increased exemptions under the Interstate Land Sales Disclosure Act, increased participation by mortgage bankers in the programs conducted by the Federal Home Loan Mortgage Corporation, and a prohibition of expenditures by HUD for the purpose of implementing their proposed reorganization of multifamily and community planning and development functions. S. 3084—Passed Senate July 20, 1978; Passed House, amended July 25, 1978; in conference.

Supplemental housing authorizations: Authorizes additional funds for housing assistance for lower income Americans in fiscal 1977; extends the riot insurance and crime insurance progarms; establishes a National Commission on Neighborhoods; increases the authorization for section 8 rental assistance by $378 million for a total of $1,228,050,000 and the operating subsidy funds for public housing projects by $19.6 million to pay for this winter's unexpectedly high heating costs; contains a $10 million increase for a total of $15 million for the HUD urban homesteading program; and increases from $500 million to $1.341 billion the ceiling for losses incurred by the Federal Housing Administration General Insurance Fund. H.R. 3843—Public Law 95–24, approved April 30, 1977.

INTERNATIONAL

Arms Control and Disarmament Agency: Authorizes a total of $16.6 million for the Arms Control and Disarmament Agency (ACDA) for fiscal 1978; creates a new position of Special Representative for Negotiations to serve as the Alternate Chairman of the U.S. SALT delegation; removes the requirement that all ACDA contracts and grants be with U.S. institutions and persons; and states the sense of Congress that adequate verification compliance with the terms of arms control agreements should be an indispensable part of any agreement. H.R. 6179—Public Law 95–108, approved August 17, 1977.

Authorizes $18,395,000 for fiscal 1979 for the Arms Control and Disarmament Agency; earmarks funds for a broad range of programs related to International Atomic Energy safeguard and related activities; and requires a study of the arms control research centers in academic institutions with a view to determining the Federal role in assisting them. H.R. 11832—Public Law 95–338, approved August 8, 1978.

Diplomatic immunity: Codifies the privileges and immunities provisions of the Vienna Convention as the sole U.S. law on the subject of diplomatic immunity; repeals a 1970 statute banning suits against diplomats and their servants, which has been construed to create full immunity for these individuals; requires foreign diplomats to carry liability insurance against risks arising from the operation of automobiles, vessels, or aircraft in the United States; and creates a substantive right of an injured or damaged party to proceed directly against the insurance company where the insured diplomat enjoys immunity from suit. H.R. 7819—Public Law 95–393, approved September 30, 1978.

International development assistance: Authorizes a total of $1.95 billion for fiscal 1979 for bilateral development assistance, international disaster assistance programs, operating expenses for the United States Agency for International Development (AID); voluntary U.S. contributions to international organizations and other development and economic assistance programs; establishes overall U.S. foreign policy goals with respect to U.S. development cooperation policy; authorizes special treatment for relatively least developed countries; revises the policy directives for AID's housing investment guaranty program; prohibits the use of funds for any form of aid to the Socialist Republic of Vietnam, Cambodia, Uganda or Cuba or to any country which allows, supports or encourages acts of terrorism; expands and improves orphanages, hostels, day care centers, school feeding programs and health, education and welfare programs which serve disadvantaged children in Asia; facilitates adoption of disadvantaged Asian children by American families; calls for a study to determine methods by which U.S. food assistance programs can be more effectively used; strengthens U.S. international health assistance by separating its authorization from that for population assistance; and establishes a permanent International Disaster Fund. H.R. 12222—Public Law 95–424, approved October 6, 1978.

International development assistance—Food for Peace: Authorizes funds for fiscal 1978 for bilateral development assistance, international disaster assistance programs, operating expenses for the United States Agency for International Development AID) and voluntary U.S. contributions to international organizations; includes $200 million for the initial U.S. contribution to the Sahel Development Program; extends the Housing Investment Guaranty Program through fiscal 1979 and authorizations for housing guaranty programs for Israel, Portugal and Lebanon; provides assistance for victims of the Italian earthquake; integrates population planning programs with U.S. health and other development assistance programs; bars funds for assistance to or reparations for Vietnam, Cambodia, Laos, or Cuba; directs the President to continue to try to obtain an accounting of MIA's; repeals various provisions of the Foreign Assistance Act prohibiting assistance to countries which furnish assistance to or trade with Cuba or Vietnam; bars funds for involuntary sterilizations; includes a separate title to strengthen the economic development and trade expansion aspects of the Food for Peace program (Public Law 480) and to clarify the humanitarian intent of the program; repeals the present exclusion from the title I sales program of those countries or exporters which trade with Cuba or North Vietnam; and removes the restriction on sales to the United Arab Republic; changes the title I sales allocation formula; increases minimum agricultural commodities to be shipped annually under title II of Public Law 480, and creates a new food for development program; and expands and refines the "grantback" authority. H.R. 6714—Public Law 95–88, approved August 3, 1977.

International emergency economic powers: Revises and delimits the President's authority to regulate international economic transactions during wars or national emergencies under section 5(b) of the Trading with the Enemy Act of 1917 with provision for continuation of existing exercises of authority. H.R. 7738—Public Law 95–223, approved December 28, 1977.

International financial institutions: Provides a total of $5.125 billion in multiyear authorizations for continued participation by the United States in six international financial institutions including the World Bank, the International Development Association and the African Development Fund; instructs U.S. representatives to vote to channel aid to projects which address the basic human needs of people in the recipient country; requires U.S. representatives to oppose all assistance to countries which engage in consistent patterns of gross violations of internationally recognized human rights or which provide refuge to airline hijackers; specifies several additional factors which U.S. representatives should consider in carrying out their duties; and requires U.S. representatives to oppose loans or assistance to expand foreign export production of palm oil, sugar or citrus crops if such production will cause injury to U.S. producers. H.R. 5262—Public Law 95–118, approved October 3, 1977.

International Monetary Fund—Bretton Woods: Amends further the Bretton Woods Agreement Act of 1945 in order to authorize U.S. participation in the Witteveen Supplementary Financing Facility of the IMF which was established to aid member countries troubled by oil and trade deficits; authorizes the Secretary of the Treasury to make resources available to the IMF in an amount not greater than the equivalent of 1,450 million special drawing rights (approximately $1.75 billion) which is approximately 17 percent of the overall initial total; instructs the U.S. Executive Director to seek to assure that a Fund decision will not undermine U.S. policy regarding comparability of treatment of public and private creditors in cases of debt rescheduling where official U.S. credits are involved; and instructs the U.S. Executive Director to oppose any Witteveen Facility loans to Cambodia, Uganda or to any nation aiding terrorists. H.R. 9214—Public Law 95–435, approved October 10, 1978.

International security assistance: Authorizes a total of $3,195,900,000 in 1978 budget authority for eight programs to finance international security programs totalling $4,579,100,000; provides $228.9 million for the military assistance program which includes funds for military aid to Greece, Portugal, Turkey and Jordan; provides $677 million to finance foreign military sales credits to 29 countries, with direct credits to Israel and Zaire, and with all loans to other countries financed through the Federal Financing Bank; states that a U.S. arms transfers restraint policy shall not impair Israel's deterrent strength or undermine the military balance in the Middle East; authorizes $1.89 billion for the security assistance program to provide economic assistance for 15 countries; provides security supporting assistance for disaster relief in Lebanon; creates an $80 million Southern Africa Special Requirements Fund to address the economic problems caused by the conflict in that region and prohibits the use of funds to aid Mozambique, Angola, Tanzania, or Zambia unless the President determines that such aid would further U.S. policy interest; provides $39 million for international narcotics control of which $12.5 million will be used for programs in Mexico; prohibits military assistance, training and credits to Ethiopia and Argentina; prohibits economic assistance to any supplier or recipient of nuclear technology or equipment unless both agreed to place the transferred equipment under multilateral auspices when available and that all nuclear activities will be placed under international safeguards; raises the FMS

credits and sales ceiling for Turkey; and requires a one-year termination of the sale of defense articles and services to any country granting sanctuary to international terrorists unless U.S. national security interests demand otherwise. H.R. 6884—Public Law 95–92, approved August 4, 1977.

Authorizes $2,817,500,000 for seven programs which constitute the fiscal 1979 international security assistance program which results in program authority of approximately $4.3 billion; includes $133.5 million for grant military assistance; authorizes military assistance advisory groups for 14 countries and further limits the activities of such groups; authorizes a foreign military sales credit program of $2,085,500,000; and cuts such funds for Paraguay on human rights grounds; creates an Economic Support Fund (ESF) in place of the Security Assistance Program to stress the economic nature of such programs and authorizes therefor $1.902 billion; provides that two-thirds of the assistance for Egypt and Israel be provided on a grant basis; urges the availability of ESF funds to Turkey for research to prevent damage from earthquakes or other natural disasters; bars aid from this fund to Mozambique, Angola, Tanzania or Zambia unless the President waives this prohibition; authorizes $30.9 million to create a new "International Peacekeeping, Basic Rights, and Related Program" account of security programs previously in Security Supporting Assistance; authorizes the President to transfer defense articles and services to South Korea in conjunction with U.S. ground troop withdrawal; substitutes for the current policy statement a legal requirement to deny security assistance to any country whose government engages in a consistent pattern of gross violations of internationally recognized human rights unless national interest of the United States to provide such assistance; sets at 790 the fiscal 1979 ceiling on military personnel assigned overseas to perform security assistance management functions; provides, effective December 31, 1978, for the lifting of U.S. sanctions against Rhodesia if the government in Salisbury has made a good faith effort to negotiate with all parties and a new government, chosen by free elections, has been installed; repeals the limited embargo on arms sales to Turkey; and requires various reports including defense requirement surveys and a review of U.S. policy toward the Soviet Union. S. 3075—Public Law 95–384, approved September 26, 1978.

Nuclear nonproliferation: Establishes a more effective framework for international cooperation to encourage development of peaceful nuclear activities to meet energy needs and to assure that export by any nation of nuclear materials and technology does not contribute to proliferation; provides for congressional review of any proposal by the President to bring foreign spent fuel to the U.S. for storage; authorizes the President, pending establishment of INFA, to make available for transfer to an international stockpile enough low-enriched uranium to produce up to 100,000 megawatt-years of power; provides that INFA fuel assurance and participation in the interim stockpile will be exclusively for nations which adhere to effective nonproliferation policies; authorizes the Department of Energy and the Nuclear Regulatory Commission to establish and operate safeguards and physical security programs for peaceful uses of nuclear energy; directs the U.S. to seek to negotiate with other nations and groups of nations to adopt general principles and procedures including common international sanctions for violation of peaceful-use obligations, and to establish international procedures to be followed should nuclear materials be stolen or diverted, or limits the authority of DOE to distribute source and special nuclear material without having to obtain an NRC license; ensures that transfers of technology which pertain to production of special nuclear material may not be made without authorization by the Secretary of DOE, unless they are already specifically authorized by an agreement of cooperation; provides for presidential consideration of export license applications which NRC does not approve and congressional review of any presidential decision to approve such an export; specifies licensing criteria to govern peaceful nuclear exports by the U.S. and certain types of conduct which would result in termination of nuclear exports from the U.S.; and directs the President to seek agreement from all nations to accept additional controls on their own peaceful nuclear activities and to require adherence to such controls by the recipients of their nuclear exports; and directs the U.S. to work with developing nations to develop a program for meeting energy needs through alternative resources consistent with economic factors and environmental protection. H.R. 8638—Public Law 95–242, approved March 10, 1978.

OPIC: Extends until September 30, 1981, the basic operating authority of the Overseas Private Investment Corporation (OPIC) through which the Government insures U.S. investment project; requires that preferential the risks of inconvertibility of local currency into dollars and expropriation loss due to war or revolution; requires maintenance of a development impact profile for each investment project; requires that preferential consideration be given to projects in less developed countries with per capita incomes of $520 or less and that activities in less developed countries with per capita incomes of $1,000 or more in 1975 dollars be restricted with certain exceptions for small business and cooperative projects and mineral and energy projects; prohibits direct underwriting of insurance jointly with private insurance companies; denies claims payments to any insured investor convicted of or engaging in bribery of a foreign official in relation to an OPIC-insured project; prohibits support of expanded production or processing of palm oil, sugar or citrus for export to the United States; and requires OPIC, in consultation with the Secretary of State, to take into account observance by a country of human rights. H.R. 9179—Public Law 95–268, approved April 24, 1978.

Panama Canal Neutrality Treaty: Establishes a permanent regime of neutrality in order that both in time of peace and in time of war the Canal shall remain secure and open to peaceful transit; provides that Panama and the U.S. agree to maintain the regime of neutrality beginning in the year 2000 which shall be maintained in order that the Canal shall remain permanently neutral and applies the same regime to any other international waterway that may be built in Panama; provides that each country shall, in accordance with their respective constitutional processes, defend the Canal against any threat to neutrality and consequently shall have the right to defend the Canal against any threat or aggression which shall not be interpreted as a right of intervention into the internal affairs of Panama or against the territorial integrity or political independence of Panama; provides that beginning in the year 2000 Panama alone shall operate the Canal and maintain all military forces and installations within Panama's territory; provides that notwithstanding these provisions, if the Canal is closed or its operation is interfered with, the U.S. and Panama may unilaterally take steps it deems necessary to reopen the Canal or restore its operation, including the use of military forces in Panama; provides that nothing in the Treaty shall preclude Panama and the U.S. from making, in accordance with their respective constitutional processes, any agreement to facilitate their responsibility to defend the Canal including an agreement for continued U.S. military presence in Panama; provides that the war and auxiliary vessels of the U.S. and Panama shall have the right to transit the Canal expeditiously; states that this expeditious transit shall include the right to go to the head of the line of vessels in order to transit the Canal rapidly in case of need or emergency; provides that such need or emergency shall be determined by the nation operating the vessel; provides before the Treaty can go into force that the U.S. and Panama must negotiate an agreement under which the American Battle Monuments Commission would administer the American Sector of the Corozal Cemetery and makes provision for the transfer of the remains of other Americans buried at Mount Hope Cemetery; prohibits economic assistance, military grant assistance, security supporting assistance, foreign military sales credits or international military education and training to Panama; and provides that all amendments, reservations, understandings, declarations and other statements incorporated by the Senate in its resolution of ratification be included in the instrument of ratification exchanged with the government of Panama. Ex. N, 95th–1st—Resolution of notification agreed to March 17, 1978.

Panama Canal Treaty: Terminates prior United States-Panama treaty relationships concerning the Canal and establishes a partnership arrangement for the operation, maintenance and defense of the Panama Canal by the United States and Panama through December 31, 1999; provides that the treaty enter into force simultaneously with the Neutrality Treaty, six months from the date of exchange of instruments of ratification; provides that exchange of the instruments of ratification shall not be effective prior to March 31, 1979, and the treaties shall not enter into force prior to October 1, 1979, unless implementing legislation has been enacted before March 31, 1979; grants to the U.S. the rights to manage, operate and maintain the canal including the right to establish and collect tolls; provides that the U.S. carry out these responsibilities through a new United States government agency, the Panama Canal Commission, which will replace the Panama Canal Company and the Canal Zone Government and which will be supervised by a board of nine members, five Americans and four Panamanians; requires the Commission to reimburse Panama $10 million semiannually for costs incurred by Panama in providing various public services in the canal operating area and in certain housing areas; requires the U.S. and Panama to agree on specific levels and quality of services to be provided by Panama for the $10 million annual payment for services which are essential to the effective functioning of the canal, to examine the cost of services every three years and to resubmit any disagreement between the United States and Panama to a binding independent audit; grants the U.S. the primary responsibility for the protection and defense of the canal for the duration of the treaty; provides that the right to intervene militarily in Panama to keep the canal open and operating shall not have as its purpose or be interpreted as a right of intervention into the internal affairs of Panama or interference with its independence or sovereign integrity; provides for the establishment of a Combined Board comprised of an equal number of senior military representatives from the two countries to facilitate planning and cooperation between the armed forces of both; provides that Panama and the U.S. study jointly the feasibility of a sea-level canal and enter into negotiations for its construction in the event that it is determined necessary; prohibits, for the duration of the treaty, construction of a canal except in accordance with the provisions of this treaty or as the U.S. and Panama may otherwise agree; prohibits the U.S. from ne-

gotiating with other countries for the right to construct an interoceanic canal on any other route during the life of the treaty; provides that the instruments of ratification to be exchanged shall include provisions whereby each party agrees to waive these two prohibitions; upon entry into force, transfers to Panama all right, title and interest which the U.S. may have in real property and nonremovable improvements located in areas not reserved for U.S. use under the treaty; provides that upon termination of the treaty, Panama will assume total responsibility for the Panama Canal which shall be turned over in operating condition free of liens and debts; provides that Panama receive payments to be derived from canal operating revenues as "a just and equitable return on the national resources which it has dedicated to" the Panama Canal as follows: (a) a share of tolls amounting to 30 cents per Panama Canal ton of shipping transiting the canal; (b) a fixed amount of $10 million per year; and (c) an additional sum up to $10 million per year if the Canal operating revenues yield a surplus over expenditures including other payments made under the treaty; provides that any accumulated unpaid balance under item (c) at the termination of the treaty shall be payable only to the extent of any operating surplus in the last year of the treaty's duration and that nothing shall be construed as obligating the U.S. to pay any unpaid balance and that no U.S. Treasury funds may be used for any of the above three payments without statutory authorization: and requires the Panama Canal Commission to reimburse the U.S. for interest on funds or other assets directly invested by the U.S. Commission or its predecessor Panama Canal Corporation. Ex. N, 95th-1st—Resolution of ratification agreed to April 18, 1978.

Peace Corps authorization: Authorizes $112,424,000 for fiscal 1979 for Peace Corps programs and an additional supplemental authorization of $3,713,000 for fiscal 1978, to cover increases in employee pay and other benefits; earmarks $1 million for contributions to the United Nations Volunteer Program and changes the limitation on contributions to two percent of the annual Peace Corps appropriations; calls upon the Peace Corps to pay particular attention to the integration of women in the national economies of developing countries; permits use of funds and expertise to assist indigenous volunteer programs by Third World Nations; extends medical malpractice protection to volunteers; expands medical coverage to Foreign Service employees stationed in the United States; and authorizes assignment of Peace Corps volunteers in refugee assistance programs. H.R. 11877—Public Law 95-331, approved August 2, 1978.

Rhodesian chrome: Amends the United Nations Participation Act of 1945 to halt the importation of Rhodesian chrome by nullifying the effect of Section 203 of the Armed Forces Appropriations Act of 1972 which permitted the importation into the United States of chromium and other strategic minerals from Rhodesia, despite mandatory U.N. sanctions against trade with that country which the United States supported by its vote in the United Nations Security Council and by Executive Order 11419; and authorizes the President to suspend the act if he determines that it would encourage negotiations and further the peaceful transfer from minority to majority rule in Rhodesia. H.R. 1746—Public Law 95-12, approved March 18, 1977.

Romanian earthquake authorization: Authorizes $20 million to the President for fiscal year 1977 for the relief and rehabilitation of refugees and other earthquake victims in Romania; and states that nothing in this act shall be interpreted as endorsing any measure undertaken by Romania which would suppress human rights as defined in the Helsinki Declaration and the United Nations Declaration on Human Rights or as constituting a commitment to provide development assistance to Romania. H.R. 5717—Public Law 95-21, approved April 18, 1977.

State Department authorizations: Authorizes $1,693,308,000 for fiscal 1978 for the operations of the State Department, including the Office of Foreign Buildings, the United States Information Agency (USIA) and the Board of International Broadcasting (which makes grants to Radio Free Europe/Radio Liberty); strengthens the ability of the Board for International Broadcasting to oversee and set broad policy direction for Radio Free Europe/Radio Liberty, Inc.; provides that any implementation of the President's policy of phased troop withdrawal from Korea should be consistent with the security interests of South Korea and the interests of the United States in Asia, notably Japan; contains provisions to encourage assistance to Americans incarcerated abroad; provides that any new Panama Canal treaty or agreement negotiated with funds appropriated under this title must protect the vital interests of the United States in the Canal Zone and in the operation, maintenance, property and defense of the Panama Canal; states the sense of Congress that Cuban policies and actions regarding use of military and paramilitary personnel beyond its borders and the Cuban government's disrespect for human rights are among elements which must be taken into account during negotiations for normalization of relations; and prohibits funds for operations or aid to Vietnam and directs the President to take all possible steps to obtain a final accounting of POWs and MIAs. H.R. 6689—Public Law 95-105, approved August 17, 1977.

Authorizes a total of $1,969,710,000 for fiscal 1979 of which $1,399,253 is for the Department of State, $420,577,000 for the International Communication Agency, and $88,180,000 for the Board of International Broadcasting; authorizes an additional $37,275,000 in supplemental funds for fiscal 1978 to pay for U.S. contributions to UNESCO which were suspended because of UNESCO's actions against Israel; earmarks $25 million for resettling refugees from the Soviet Union and Eastern Europe in Israel; bars the use of funds to implement the Panama Canal Treaties unless authorized by the Constitution or by act of Congress and for aid or reparation to Vietnam; earmarks $4 million to expand use of solar energy in buildings acquired under the Foreign Buildings Act; provides a special computation of retirement annuities for certain participants in the Foreign Service Retirement System who retire between October 1, 1978, and December 31, 1979; broadens minority business participation in State Department procurement; calls for U.S. assistance to bring about an orderly transition to majority rule and protection of minority rights in Rhodesia; makes permanent the President's authority to regulate the entry of aliens into the United States; calls for various reports including a comprehensive review of U.S. diplomatic and economic relations with Cuba; contains congressional findings on the importance of science and technology on U.S. foreign policy and calls for implementation of such a policy; states as a sense of the Congress that the UN Committee on Exercise of the Inalienable Rights of the Palestinian People and the UN Special Unit on Palestinian Rights should be terminated; calls for the Secretary to convey to all nations the concern of Congress over the destruction of marine mammals; provides a statutory mandate for the new International Communication Agency (which came into being on April 1, 1978, as a result of Reorganization Plan No. 2 which consolidated into the ICA functions previously performed by the USIA and State Department's Bureau of Education and Cultural Affairs); contains provisions to improve procedures under the Case-Zablocki Act which requires that the text of any international agreement entered into by the executive branch be submitted to Congress within sixty days. H.R. 12598—Public Law 95-426, approved October 7, 1978.

State Department supplemental authorization: Provides a supplemental authorization of $89.5 million for the Department of State for fiscal 1977 for: past due U.S. dues and assessments to UNESCO in arrears because of a congressionally imposed suspension; aid to Soviet and East European refugees not settling in Israel; and the Indochinese Refugee Program; construction of apartment units for the U.S. mission in Cairo; and requires that the text of any international agreement entered into on behalf of the United States be transmitted to the Congress within 20 days of its being signed. H.R. 5040—Public Law 95-45, approved June 15, 1977.

JUDICIARY

Judicial tenure: Establishes within the judicial branch a system as a supplement to the impeachment process for investigating and resolving allegations that the condition or conduct of members of the Federal judiciary is or has been inconsistent with the good behavior required under article III, section 1 of the Constitution; and provides that an investigation of a complaint filed against a Federal judge may result in involuntary retirement, removal or censure or dismissal of the charges while a complaint filed against a Supreme Court Justice may result in a report to the House of Representatives recommending removal, censure or dismissal of the case. S. 1423—Passed Senate September 7, 1978.

Jurors' fees, qualifications and service: Amends in its entirety the jury fee section of the Jury Selection and Service Act effective October 1, 1978; increases the attendance fee for grand and petit jurors to $30 per day and provides for enhanced attendance fees of extended service; increases the commuter travel allowance; adds a parking allowance to the travel costs payable subject to the discretionary control of the district court; provides for the establishment of a fixed subsistence allowance; authorizes convenience and comfort expenditures for jurors who are sequestered for long periods; and provides clearly defined relief for prospective jurors against employers who could discharge or threaten to discharge them by reason of jury service and imposes a civil penalty for each violation of a juror's right to perform jury duty. S. 2075—Passed Senate April 27, 1978; passed House amended October 12, 1978.

Allows more flexible treatment of rehabilitated persons, previously convicted for crimes punishable by imprisonment for more than one year, whose qualifications are being considered for jury service in Federal courts; clarifies the limited purposes for which jury selection records and papers may be disclosed and increases the maximum fine for unauthorized disclosure; defines the requirements of the public drawing for jury selection with respect to manual and automated computer data processing; and extends Federal Employees Compensation Act coverage to all persons serving as jurors in U.S. district courts. S. 2074—Passed Senate April 27, 1978.

Makes the excuse of prospective jurors from Federal jury service on the grounds of distance from the place of holding court contingent upon a showing of hardship or extreme inconvenience to be determined by the district judge on a case-by-case basis. S. 2072—Passed Senate April 27, 1978.

Omnibus judgeships: Provides for the appointment of 117 additional permanent district court judges, 35 new circuit court judges and four temporary judges; makes the creation of the new district judgeships

effective upon the President's promulgation of "standards and guidelines" for merit selection; provides that any court of appeals having more than 15 active judges, such as the fifth and ninth circuits, may create such administrative units it deems necessary; and amends existing law to require that actions brought against rail or motor carriers on claims for damage or delay to shipments be subject to a minimum jurisdictional amount of $10,000 for each bill in lading, in order to prevent abuse of the Federal judicial process by persons bringing such actions simply as a means of tolling the statute of limitations while settlement negotiations are undertaken. H.R. 7843—Public Law 95– , approved 1978.

U.S. Magistrates: Enlarges and amends the current jurisdictional provisions for U.S. magistrates in order to improve access to the Federal courts for the less advantaged; allows magistrates to finally determine civil cases, upon the consent of the parties involved; authorizes a magistrate to "conduct any or all proceedings in any jury or nonjury civil matter"; specifies appeal and review procedures available to an aggrieved party in a civil matter decided by a magistrate; requires that all magistrates must have been admitted to the practice of law for at least five years and their appointment approved by the circuit judicial council; and expands jurisdiction of magistrates to try minor criminal offenses to include all misdemeanors; S. 1613—Passed Senate July 22, 1977.

Witness fees and expenses: Revises witness fee, travel and subsistence allowances to provide a daily attendance fee, compensation for travel and overnight accommodations. S. 2049—Public Law 95– , approved 1978.

Victims of crime: Authorizes the Attorney General to make grants to States having crime victims compensation programs to cover up to 25 percent of the nonadministrative costs incurred by the State in compensating a victim of a qualifying criminal act, which is punishable under a statute of the State, and 100 percent of nonadministrative costs of a criminal act subject to exclusive Federal jurisdiction. H.R. 7010—Passed House September 30, 1977; Passed Senate amended September 11, 1978; In conference.

Black lung benefits: Modifies the definition of "pneumoconiosis" in the Federal Coal Mine Health and Safety Act to include the sequelae of the disease and respiratory and pulmonary impairment arising out of coal mine employment as presently interpreted by the Social Security Administration and the definition of "miner" to expand the coverage under the program; requires the Secretary to accept the evaluation of X-rays read by a board-certified or board-eligible radiologist without submitting them to a further reading in determining pneumoconiosis claims: requires the 'Secretary to accept an autospy report for purposes of determining the presense of pneumoconiosis and the stage of advancement; allows a miner-claimant the right to insist on a complete pulmonary examination to substantiate his claim; entitles the survivor of a miner who died before the enactment of the 1977 amendments and who was employed in the coal mines for at least 25 years prior to June 30, 1971, to benefits if the miner was disabled by pneumoconiosis at the time of death; provides that eligible survivors of approved claimants would not be required to file a new benefits claim; requires the Secretaries to review all denied or pending claims; permits the use of affidavits in determining the disability of deceased miners in the absence of other sufficient evidence; authorizes the establishment of Labor Department field offices to assist claimants with their claim filing and processing; expands the situations under which coal mine operators who acquire mines from previous operators would be required to assume liability (concurrently with the prior operator) for the payment of black-lung benefits to individuals previously employed in the mine which has a retroactive effect, applying to changes in ownership taking place on or after January 1, 1970; provides that the trust fund established under Public Law 95–227 pay benefits in cases where there is no operator, where a liable operator has failed to make payment in a timely manner, or where the miner's last coal mine employment was before January 1, 1970; creates a black lung compensation insurance fund in the Department of Labor to enable the Secretary to offer insurance to operators if such insurance is not available privately at reasonable cost; and requires the Secretary of Labor to supply each denied claimant with a written statement showing the reasons for the denial. H.R. 4544—Public Law 95–239, approved March 1, 1978. *NOTE*: (Revenue provisions are contained in H.R. 5322 which became Public Law 95–227.)

Black lung trust fund: Imposes an ad valorem tax on the sale of coal by a coal producer at the rate of 50 cents a ton on underground-mined coal and 25 cents a ton on surface-mined coal but in no event more than two percent of the sales price; establishes a Black Lung Disability Fund in the Treasury supported from tax revenues, appropriated repayable advances and investment income to pay benefits including part C benefits expended by the Secretary of Labor, repayment of advances to the fund, including interest and all expenses of operation and administration under part C; authorizes the trust fund to reimburse those operators who paid benefits to disabled coal miners under part C for claims based on pre-1970 coal mine employment; provides special rules for trust funds established by coal mine operators to satisfy their obligations under the so-called "responsible operator" provisions of the black lung benefits program; permits the coal mine operator designated as the one responsible for payment of benefits to a miner to fund its obligations in advance through contributions to a tax-exempt trust; and makes these contributions deductible, within limits, and includes safeguards to ensure that the money in the trust can be used only for the payment of these black lung benefits. H.R. 5322—Public Law 95–227, approved February 10, 1978.

Mine safety and health: Strengthens the national mine safety and health program by providing uniform administration and enforcement for the entire mining industry under a single act administered by the Department of Labor; amends the Federal Mine Safety and Health Act of 1969 (the Coal Act) to make its enforcement and administrative provisions applicable to the entire coal and noncoal mining industry; transfers the responsibility for the administration and enforcement of the mine safety and health program from the Department of the Interior to the Department of Labor; provides a streamlined mechanism for the promulgation of mandatory safety and health standards by imposing time limitations on each step of the standard-making process; establishes an independent Federal Mine Safety and Health Review Commission which is assigned all adminstrative review responsibilities and authorized to assess civil penalties; requires each operator to have a Secretary-approved safety and health training program which provides at least 40 hours of training for new underground miners, 24 hours of training for new surface miners, and eight hours of annual retraining for all miners; requires at least four inspections each year for all underground mines in their entirety, at least two inspections a year for all surface mines in their entirety, and at least one spot inspection every five working days for particularly hazardous mines; expands miners' participation in inspection by authorizing their representatives to participate in the annual inspection and any pre- or post-inspection conferences held at the mine; permits miners to request inspections in writing if they suspect a hazardous situation; requires the Secretary to notify the mine operator of any violation of the health and safety standards with a time period within which the violation must be fully abated; authorizes the inspector to issue an order closing all or a portion of a mine affected by certain violations and if a pattern of violations exists; expands the coverage of those presently protected against discriminatory actions under the Coal Act to include applicants for employment; and provides a variety of civil and criminal penalties. S. 717—Public Law 95–164, approved November 9, 1977.

Minimum wage increase: Amends the Fair Labor Standards Act of 1938 to increase the minimum wage rate to $2.65 on January 1, 1978, to $2.90 in 1979, to $3.10 in 1980, and to $3.35 in 1981; increases the minimum wage in Puerto Rico for employees at wages between $2 per hour and $2.29 by $.25 in 1978 and by $.30 in 1979 and each year thereafter until parity is reached, and for those at wages less than $2 per hour increases the minimum wage by $.20 in 1978 and by $.25 in 1979 and each suceeding year until $2.30 per hour after which it will be increased by $.30 until parity is reached; reduces from 50 percent to 45 percent in 1979 and to 40 percent in 1981 the credit against the minimum wage which an employer may credit against payment of the minimum wage to employees who receive more than $30 per month tips; provides exemption from coverage for certain employees; authorizes the Secretary of Labor, within certain guidelines to waive child labor restrictions for employment of children as hand harvest agricultural laborers paid on a piece rate basis if the Secretary finds that the use of 10- and 11-year-old children is necessary to prevent severe economic disruption of an applicant's industry; increases the small business sales test which exempts small businesses from minimum wage coverage from $250,000 to $275,000 effective July 1, 1978, to $325,000 July 1, 1980, and to $362,500 December 31, 1981; and increases from four to six the number of students an employer may hire at a special minimum wage. H.R. 3744—Public Law 95–151, approved November 1, 1977.

NATURAL RESOURCES—NATIONAL HISTORIC SITES

Bureau of Land Management authorization: Authorizes the operations of the Bureau of Land Management through 1982 which includes management of lands and resources, acquisition, construction and maintenance, payments-in-lieu of taxes, and mineral development impact loans; and authorizes the Secretary to provide impact loans to communities and governmental subdivisions that have suffered some inordinate impact as a result of energy activities in their area to be secured by anticipated funds which States would be entitled to receive as part of their royalty from minerals extracted within their States. H.R. 10787—Public Law 95–352, approved August 20, 1978.

Dam safety and inspection: Gives the Corps of Engineers the right to enter all damsites for inspection; provides for judicial priority for consideration of any subsequent proceedings and provides United States agents or contractors with liability protection for dam inspection work. S. 2444—Passed Senate June 9, 1978.

Provides permanent authority for the Secretary of the Interior to undertake actions deemed necessary to insure the safety of dams and related facilities under the jurisdiction of the Bureau of Reclamation; and authorizes up to $100 million to carry out the safety of dams program, conditioned upon the submission of a report to Congress

of the proposed works required for dam safety. S. 2820—Passed Senate July 28, 1978.

Provides Federal assistance to the States for the development and implementation of effective dam safety programs in order to protect human life and property; excludes dams in any State with an approved State dam inspection program from Federal inspection; authorizes the Corps of Engineers to distribute $15 million in each of fiscal 1979, 1980 and 1981 in dam safety funds among the States with one-third of the funds to be allocated equally among the States with approved dam safety programs and two-thirds on the basis of the number of dams in each State; limits grants to 50 percent of the State's dam safety program costs; authorizes Federal reinsurance of guarantees on any dam liability insurance in those States with an approved safety program; establishes a $20 million revolving fund to assist dam owners to make any required repairs or replacements to a dam; estabilshes a Federal Dam Safety Review Board to review existing Federal dam safety procedures and standards and the implementation of State plans and provide the corps with information it may need to withdraw approval of a State plan; requires Federal dam building agencies to consult fully with the State on the design and safety of any Federal dam built in that State and to allow State officials to join Federal inspectors on safety inspection of those dams; and authorizes funds for training State dam safety inspectors. S. 2437—Passed Senate June 9, 1978

Fishermen's protection reimbursement program: Extends until October 1, 1981, the voluntary insurance program of the Fishermen's Protective Act which provides for the reimbursement of certain losses suffered as a result of the seizure of a U.S. commercial fishing vessel by a foreign country; prohibits the import of any wildlife products of endangered species from offending nations; sets up a modified no-fault insurance program for reimbursing American fishermen for damage to their fishing gear or vessel caused by foreign or domestic vessels; and requires that the foreign fishing vessel pay for the entire cost of the program, except for administrative costs, which would be paid for by the American fishing vessels owners. H. R. 10878—Public Law 95-376, approved September 18, 1978.

Fishery conservation and management: Authorizes $30 million for fiscal 1979 to the Secretary of Commerce to provide for the conservation and management of the fishery resources of the United States; authorizes joint fishing ventures (involving U.S. and foreign fishermen) within the 200 mile fishery conservation zone except when U.S. processing capability either is or will be adequate for processing the fish harvested from the fishery; and requires an annual report on all allocations of U.S. fish to foreign nations and all tariff and nontariff trade barriers imposed by such nations on the importation from the United States of fish from its underdeveloped fisheries. H.R. 10732—Public Law 95-354, approved August 28, 1978.

Grazing fees: Establishes a 20-year schedule for increased funding for range improvements that are in addition to moneys requested by the Secretary of Interior for range, wildlife and soil and water management purposes; stipulates that at least 80 percent of the total 20 year authorization be used for on-the-ground range improvements and not more than 20 percent for administrative purposes; sets a statutory formula for changing fees for grazing of domestic livestock through 1985 on both national forests which are administered by the Forest Service and on national resource lands, which are administered by the Bureau of Land Management; incorporates the factors of cost production of livestock and price of beef and forage value; amends the Federal Land Policy and Management Act of 1976 to emphasize grazing permits and leases should be issued for 10 year period, unless determined otherwise on a case-by-case Secretary review; provides that at least $10 million per year from the grazing fee receipts or 50 percent of such receipts, whichever is greater, will go into the range betterment fund; provides for the development and implementation of experimental incentive programs for grazing permittees whose stewardship result in range improvements; requires the establishment of multiple use advisory councils as already authorized by existing laws; and provides a formula for removal of excess burros and wild horses from public lands. Public Law 95- , approved 1978.

Land and water conservation fund: Establishes as a special account the Land and Water Conservation Fund for use in acquiring the backlog of lands previously authorized for inclusion in the national park system and certain similar Federal areas and increases the authorized level of the fund. H.R. 5305—Public Law 95-42, approved June 10, 1977.

Military and other public lands conservation: Extends through fiscal 1981, the authority for carrying out conservation and rehabilitation programs on military reservations and certain public lands; authorizes funds for the Secretary of Defense to cooperate with the Secretary of the Interior and appropriate State conservation agencies in conducting fish and wildlife conser ation and public recreation programs on military lands; and authorizes the Secretaries of Agriculture and Interior to develop similar Federal-State cooperative arrangements for lands under their jurisdiction. H.R. 13745—Public Law 95-420, approved October 5, 1978.

Recreation permits: Establishes uniform and objective policies and procedures to be employed by the Forest Service in issuing and administering permits for ski areas and other commercial outdoor recreation facilities and services on national forest lands. S. 1338—Passed Senate July 13, 1977.

Redwood National Park expansion: Increases the authorized acreage of the Redwood National Park by approximately 48,000 acres to bring the total acreage to 106,000; designates an additional 30,000 acres as a "park protection zone" which the Secretary of Interior may acquire upon certain findings; authorizes $33 million for a watershed rehabilitation program; and includes provisions designed to protect persons adversely affected by the park expansion. H.R. 3813—Public Law 95-250, approved March 27, 1978.

Timber sales: Requires the Secretary of Agriculture to select the bidding method on Forest Service timber that will foster open and fair competition, insure that the Federal Government will receive the appraised value of the timber, and take into consideration the economic stability of communities whose economies are dependent on such national forest materials; requires that in oral auctions, only prospective purchasers whose written sealed bids which are equal to or in excess of the appraised value of the forest timber may participate. S. 1360—Public Law 95-233, approved February 20, 1978.

Water resources development—saline water conversion: Reinstates for fiscal 1978 the authorization for grants under the Water Resources Act of 1964 to colleges or universities in each State to carry out water resources and technology; and extends through fiscal 1978 the authorization of the Saline Water Conversion Act of 1971 including projects to demonstrate the technology of desalination. H.R. 4746—Public Law 95-84, approved August 2, 1977.

Establishes an organic act for the Department of Interior's Office of Water Research and Technology by substantially reenacting and consolidating the Water Resources Research Act of 1964 and the Saline Water Conversion Act of 1971 and expanding the authority of the Water Research and Conservation Act of 1977; authorizes funds for each of the State water institutes for water research for matching and unfocused research grants; and authorizes funds for research on the improvement of saline or other types of impaired waters. S. 2704—Public Law 95- , approved ——— —, 1978.

Waterway users fee: authorizes $421 million for construction and replacement of Locks and Dam 26 at Alton, Illinois, with a new dam and single lock; authorizes replacement of certain wildlife habitat losses due to construction of the new dam and project-related recreation development in a specified area; authorizes $12 million for development of a master plan of the Upper Mississippi River system to be submitted for congressional approval by January 1, 1982; prohibits the Secretary of the Army from undertaking any construction project on the system, except that authorized for locks and dam 26, until Congress has approved the plan; imposes a graduated excise tax on diesel and other liquid fuels used by commercial cargo vessels on specified inland waterways; exempts from the tax fuels used by tugs in moving LASH and Seabee ocean going barges carrying international cargoes; and authorizes $8 million for the Secretaries of Commerce and Transportation jointly to undertake a comprehensive study on the impact of fuel taxes on inland waterway users. H.R. 8533—Public Law 95- , approved ——— —, 1978.

SENATE

Committee reorganization: Amends the Standing Rules of the Senate to rationalize the jurisdictions of Senate committees, effective February 11, 1977, among 15 standing committees and six other special, select or joint committee; abolishes the Aeronatical and Space Sciences Committee and transfers its jurisdiction to newly created Committee on Commerce, Science and Transportation abolishes the District of Columbia Committee and the Committee on Post Office and Civil Service and transfers their jurisdictions to a newly created Committee on Governmental Affairs; transfers the jurisdiction of the former Interior Committee to an Energy and Natural Resources Committee; transfers the jurisdiction of the former Public Works Committee into a new Environment and Public Works Committee; transfers the jurisdiction of the former Labor and Public Welfare Committee to a new Human Resources Committee; continues the existence of the Special Committee on Aging with membership reduced to nine in the next Congress; continues the existence of the Select Committee on Nutrition and Human Needs until December 31, 1977, after which its jurisdiction will be transferred to the Committee on Agriculture, Nutrition and Forestry; establishes a temporary Select Committee on Indian Affairs to consider all legislation relating to Indians for the duration of the 95th Congress after which its jurisdiction will be transferred to the Human Resources Committee;

Limits the number of committee and subcommittee memberships a Senator can hold generally to two major or class "A" committees and one class "B" committee and eight subcommittees thereof; prohibits committees from establishing subunits other than subcommittees; permits the majority and minority leaders to temporarily increase the sizes of committees to ensure majority party control; allows Senators to serve on joint committees where such service is required to be from members of a committee on which such Senator serves; prohibits Rules Committee members from serving on any joint committee unless the Senate members of such committees are required by law to be from the Rules Committee; exempts mem-

bers of the Budget Committee during the 94th Congress from certain assignment limitations during the 95th Congress; continues grandfather rights for Senators who are serving on three standing committees as a result of an exemption in the Legislative Reorganization Act of 1970 to continue to do so during the 95th Congress; allows the chairmen and ranking minority members of the Post Office and Civil Service Committee and the District of Columbia Committee to serve on the Governmental Affairs Committee and two other committees of the same class, as long as their service on Governmental Affairs remains continuous; prohibits a Senator from serving as Chairman of more than one standing, select, special, or joint committee unless the jurisdiction is directly related to that of the standing committee he chairs; prohibits Senators from serving as chairman of more than one subcommittee of each standing, select, special or joint committee; limits members to two class A committee or subcommittee chairmanships and one class B committee or subcommittee chairmanship, effective at the beginning of the 96th Congress; requires that not later than July 1, 1977, the appropriate standing committees shall report legislation terminating the statutory authority of the Joint Committees on Atomic Energy, Congressional Operations and Defense Production; requires that the appropriate standing committees report recommendations not later than July 1, 1977, with respect to the Joint Committees on the Library and on Printing; allows Senators to serve on joint committees considered for termination pending their final disposition;

Provides for sequential and joint referral of bills that cross jurisdictional lines based on motions by the majority and minority leaders, instead of by unanimous consent; provides for a computerized schedule of committee meetings by the Rules Committee; permits committees to meet without special leave until the conclusion of the first two hours of a meeting of the Senate or 2:00 p.m., except for the Appropriations and Budget Committees which may meet at any time without special consent; requires that morning meetings of committees and subcommittees be scheduled for one or both of two periods, one ending at 11:00 a.m., and a second beginning at 11:00 a.m. and ending at 2:00 p.m.; provides for continuous review of the committee system by the Rules Committee in consultation with the majority and minority leaders; prohibits consideration of committee amendments to bills when the amendments are not in the jurisdiction of the committee proposing them; requires committee reports to contain an evaluation of the regulatory impact which would be incurred by individuals and businesses in carrying out the provisions of the bill; provides for the transition of staff from abolished or realigned committees to the new committees and provides for salary and tenure of committee staff during a transition period; provides that committee staff reflect the relative numbers of majority and minority members and that one-third of the committee staffing funds be allocated to the minority members for compensation of minority staff; provides that such adjustment be made over a four-year period beginning July 1, 1977, with not less than one-half being made in two years; provides for funding of increases in the expenditures of new committees resulting from this resolution; incorporates provisions of S. Res. 60 of the 94th Congress relating to individuals appointed by Senators to assist them with committee work; provides for the referral of measures according to the realigned juridsictions; and provides that legal references to old committees are to be construed as referring to their successors. S. Res. 4—Senate agreed to February 4, 1977.

Senate Ethics Code: Amends the Standing Rules of the Senate to create a Code of Official Conduct; amends S. Res. 338, the original resolution establishing the Select Committee on Ethics, to provide for additional procedures for enforcing the new Code as well as other laws and rules of the Senate; and directs other Senate committees to study certain matters related to this resolution;

Public financial disclosure: Requires Senators, candidates for the Senate, officers and employees of the Senate earning in excess of $25,000 per year to file a report listing their earned income and the sources and categories of value of their income, other than earned income, and all other interests, assets, and holdings held for the purposes of investment or income production;

Gifts: Prohibits knowingly accepting a gift or gifts having an aggregate value of over $100 during a year from any individual or organization defined as having a "direct interest in legislation";

Outside earned income: Limits outside earned income of a Senator, officer or employee earning over $35,000 to 15 percent of the person's salary; limits each honorarium to $1,000 for Senators and to $300 for officers and employees; allows Senators or staff to accept honoraria up to $25,000 if immediately donated to a tax-exempt charity;

Conflict of interest: Bars the use of one's official position to introduce or aid the progress of legislation, the principal purpose of which furthers one's own financial interest; allows Members or staff who earn over $25,000 to provide professional services for compensation if not affiliated with a firm or association and if their work is not carried out during regular Senate office hours; directs committee employees earning over $25,000 to divest themselves of any holdings which may be directly affected by the actions of the Committee for which they work unless permitted by their supervisor and the Ethics Committee; prohibits Senators from lobbying the Senate for one year after leaving the Senate; applies a similar prohibition to employees lobbying the Committee or office for which they worked;

Unofficial office account: Abolishes unofficial office accounts, those accounts defined as not including personal funds of a Member, official funds, political funds and reimbursements;

Foreign travel: Prohibits "lame duck" travel by a defeated or retiring member; prohibits receipt of counterpart funds where there has been reimbursement from another source; restricts per diem allowance to food, lodging and related expenses and places the responsibility on the person receiving the per diem to return any unused funds;

Franking privilege—radio-TV studio—Senate computer: Prohibits mass mailings and the use of the radio-TV studios within 60 days of an election; requires the use of official funds to purchase paper, to print, and prepare mass mailings under the frank; requires a Senator to register mass mailings annually for public inspection; prohibits the use of the Senate computer to store names identified as campaign workers;

Political activity by officers and employees: Restates the present ban on staff soliciting or receiving campaign contributions; allows a Senator to name one assistant each in his Washington and State office to receive and handle campaign funds;

Discriminatory employment practices: Prohibits discrimination on the basis of race, color, religion, sex, national origin or state of physical handicap in employment practices in the Senate;

Enforcement: Sets forth procedures for the Select Committee on Ethics in investigating complaints of violation of the Code and enforcing its provisions;

Further studies: Requires the Appropriations Committee to report within 120 days regarding an adjustment of official allowances; requires the Finance Committee to report within 120 days on the tax status of funds raised and expended to defray ordinary and necessary expenses of Members; directs the Rules Committee (1) to report within 120 days on the desirability of promulgating rules providing for: (a) periodic aduits by GAO of all committee and office accounts; (b) a centralized record-keeping system of accounts, allowances, expenditures and travel expenses of all committees and offices; (c) suggested accounting procedures for committee and office accounts; and (d) public disclosure and availability of information on the accounts of all committees and offices in a form which segregates the allowances and expenses of each committee and office; (2) to report within 120 days on the desirability of requiring that only official Senate funds may be used to pay for any expenses incurred by a Senator in the use of the radio-TV studios; and (3) to study laws relating to contributions made by officers or employees as well as on proposals to prohibit the misuse of official staff in election campaigns and report thereon within 180 days; requires the Governmental Affairs Committee to report (1) within 180 days regarding employee discrimination complaints and the desirability of establishing rules requiring "blind trusts" by Members, officers and employees of Senate and (2) within 120 days regarding the use of simplified form of address for franked mail; and directs the Foreign Relations Committee to report in 90 days on the problem of travel, lodging and other related expenses provided Members and staff paid for by foreign governments where it is not possible to procure transportation, lodging or other related services or to reimburse the foreign government for those purposes. S. Res. 110—Senate agreed to April 1, 1977.

SOCIAL SERVICES

Child care program extension: Extends through fiscal 1978 provisions relating to the title XX social services program which otherwise would expire September 30, 1977; adds $200 million in child care funding, and authorizes States to use part of these funds for the employment of welfare recipients in child care jobs; allows an income tax credit of 20 percent of wages paid (up to $1,000) to employers who hire welfare recipients for child care jobs; sets Federal staffing standards for preschool child care facilities; and permits certain aspects of treatment of addicts and alcoholics to be funded under the social service program; provides that Federal matching funds cannot be denied to any State because it exceeded the previous 10 percent limitation on joint payments; increases to 90 percent Federal participation in State administrative costs to implement the Indian Health Care Improvement Act; increases to July 1, 1978, the period for allowing depreciation for expenditures to rehabilitate low income rental housing; extends for two years the exclusion from income of amounts received under the Armed Forces Health Professional Scholarship Program and similar programs; protects disaster victims from having their SSI benefits reduced or terminated because they received assistance to replace damaged property; and permits employment agencies placing companion sitters to be exempt from the Internal Revenue Code requirements imposed on employers in regard to unemployment taxes. H.R. 3387—Public Law 95-171, approved November 12, 1977.

Child nutrition: Makes permanent the child care food program that currently provides meals for 676,000 children in day care centers; extends the special supplemental food program for women, infants and children (WIC) for four years; expands the nu-

trition education authority in the WIC program and provides that a minimum of one-fifth of WIC administrative funds shall be used for nutrition education; increases the authorization for food service equipment assistance for schools; and increases the level of funding of State administrative expenses under the child nutrition programs. S. 3085—Passed Senate July 21, 1978.

Domestic volunteer services (Action).—Extends for three years the authorizations for the domestic volunteer programs of the ACTION agency; makes the terms of payment for VISTA volunteer stipends consistent with those in the Peace Corps Act; provides authority to support short-term, part-time volunteers 20 hours or more per week for 26 or more consecutive weeks; allows the Director to provide stipends to full-time, full-year volunteers enrolled under programs such as the National Youth Service Demonstration Program; insures that discretionary programs are conducted in both urban and rural areas; authorizes a new Urban Neighborhood Volunteer Program to strengthen and encourage the involvement of individuals and other local entities in community revitalization and person-to-person service activities in distressed urban neighborhoods. S. 2617—Passed Senate July 21, 1978.

Economic opportunity: Extends through fiscal 1981 the authorization for antipoverty programs under the Economic Opportunity Act; changes from 60/40 to 80/20 the matching formula for the Federal share for community action programs; provides for program grants (available to community action agencies, community development corporations and other public or private nonprofit organizations and agencies) for a demonstration employment and training opportunities program, with special emphasis on youth, the structurally unemployed, single heads of households with dependent children, older workers and veterans; creates a separate title for migrant and seasonal farmworkers; and changes the formula for distribution of funds for the Headstart program to give States 100 percent of what they are eligible for based on their poverty populations and specifies the order of priority for the use of excess funds. H.R. 7577—Passed House July 26, 1978; Passed Senate amended August 2, 1978; Conference report filed.

Indian child welfare: Establishes legislative standards and an order of preference to govern the placement of Indian children in foster or adoptive care settings with first preference accorded to members of the child's extended family; provides that tribes may alter this statutory order by enacting ordinances of their own and may request transfers of placement cases from State to tribal courts; estabishes a right of tribes to receive notification of placement proceedings in State or local courts and provides a right or tribal intervention in such proceedings; provides that an Indian child, placed in adoptive or other setting may qualify for enrollment in his or her tribe of origin and for other benefits and property rights to which he or she may be entitled because of Indian status upon reaching the age of 18 and authorizes the Secretary to make grants to Indian tribes and organizations to carry out Indian family development programs. S. 1214—Passed Senate November 4, 1977.

Medicare-medicaid anti-fraud: Strengthens the capability of the government to detect, prosecute, and punish fraudulent activities under the medicare and medicaid programs; modifies the penalty provisions in existing law which relate to those persons providing services under medicare and medicaid; reclassifies misdemeanors as felonies and increases penalties to a maximum fine of $25,000 and/or five years' imprisonment; clarifies the types of financial arrangements and conduct classified as illegal; permits States to suspend the eligibility of medicaid recipients convicted of defrauding the program; requires the Secretary of HEW to suspend from participation under medicare and medicaid, for a period he deems appropriate, an individual practitioner who has been convicted of a criminal offense involving medicare or medicaid; requires health-related entities providing services under title XX of the Social Security Act, to disclose annually the identity of any person who has a five percent or more ownership interest in the entity; requires all institutional providers of services to disclose, in the application for participation or certification, the names of owners, officers, directors, agents or managing employees who have been convicted of fraud against the medicare, medicaid, or State social service grant programs; authorizes the Comptroller General to issue subpenas to obtain necessary information or a court order requiring compliance with the subpena; includes several provisions designed to clarify the nature and scope of PSRO review responsibilities; requires the Secretary to establish for each of the different types of health services institutions a uniform system for the reporting of such items as cost of operation, volume of services, rates, capital assets and bill data for use by medicare and medicaid providers to be phased in by type of provider; provides for 90 percent Federal matching funds for fiscal 1978 through 1980 subject to an annual maximum payment of one percent of medicaid expenditures in a State or $500,000, whichever is greater, for expenditures to establish and operate State medicaid fraud control units to prepare and prosecute cases of suspected fraud and abuse. H.R. 3—Public Law 95–142, approved October 25, 1977.

Older Americans: Continues until September 30, 1981, authorizations for programs under the Older Americans Act of 1965; consolidates the existing three titles into a single title for streamlining administration; establishes three priorities of (1) services associated with access, (2) in-home services, and (3) legal services, requiring that at least 50 percent of each area agency on aging allocation be directed to these three categories; establishes a separate title for grants for Indian tribes to promote the delivery of comprehensive social services, including nutritional services, to Indians aged 60 or over; authorizes a White House Conference on Aging in 1981; and mandates a study on racial and ethnic discrimination in Federal programs for the elderly to be conducted by the U.S. Commission on Civil Rights. H.R. 12255—Public Law 95– , approved 1978.

School lunch and child nutrition: Extends through September 30, 1980, the summer food service program for children; extends through September 30, 1982, the authority of the Secretary of Agriculture to purchase agricultural commodities for donation to the child nutrition programs when acquisitions under other agricultural authorities are not available; authorizes additional funds for States administrative expenses in operating the child nutrition program; revises the school breakfast program to increase the Federal maximum reimbursement for especially needy schools and requires States to establish the standards, subject to the Secretary's approval, under which schools in severe need may receive 100 percent of their operating costs; establishes a five-year entitlement nutrition education and information program under which grants (based on the rate of 50 cents for each child enrolled in schools or other educational institutions in each State) would be made to State educational agencies for the purpose of encouraging effective dissemination of scientifically valid information about food and nutrients to children participating in the school lunch and related child nutrition programs; and requires the Secretary to approve the competitive foods for sale at schools. H.R. 1139—Public Law 95–166, approved November 10, 1977.

Social security financing: Restores the social security programs of old age, survivors and disability insurance to financial soundness in both the short range and long range; reduces from 72 to 70 the age at which income earned by a social security recipient will not reduce social security benefits; and increases the earnings limitation from $3,000 to $6,000 by 1982 for those aged 65 to 70; and makes certain changes to the Aid to Families with Dependent Children (AFDC) programs; makes existing law cost-of-living increase provisions apply only to individuals who are already on the benefit rolls at the time each increase occurs; applies a new automatic adjustment mechanism to the benefit formula for new retirees using wage indexing which will avoid the present over-indexing; modifies the social security tax rate schedules to bring in additional revenue by increasing the percent paid by employer and employee each from 5.85 percent in 1977, to 6.05 percent in 1978, to 7.05 percent in 1985, to 7.65 percent in 1990 and thereafter; increases the tax for the self-employed from 7.90 percent in 1977, to 8.10 percent in 1978, to 9.90 percent in 1985, and to 10.75 percent in 1990 and thereafter; provides for three increases in the contribution and benefit base equally for employees and employers to $22,900 in 1979, $25,900 in 1980, $29,700 in 1981 and automatically thereafter; makes the tax base under the railroad retirement program and the pension insurance administered by the Pension Benefit Guaranty Corporation the same as the automatic increase provisions of present law; reduces, with certain exceptions, benefits payable under social security to dependent spouses, including surviving spouses, by the amount of any civil service retirement benefits payable to the spouse applicable only to future applicants for social security benefits for spouses; shortens from 20 to 10 years the length of time a divorced person must have been married to a worker to be eligible for the divorced persons benefits; prevents any loss of benefits for widows over 60 who remarry; reduces from 72 to 70 the age at which income earned above the earnings limitation by a social security recipient will not reduce social security benefits; increases the earnings limitation to $4,000 in 1978, $4,500 in 1979, $5,000 in 1980, $5,500 in 1981 and $6,000 in 1982; requires timely delivery of social security checks when the normal delivery day falls on a weekend or holiday; prohibits retroactive reduced benefits in cases involving entitlement before additional Federal funding of welfare costs as a means of providing fiscal relief to State and local governments for fiscal 1978; requires States to pass through to local jurisdictions the full amount of the payment but not more than 100 percent of the amount of the AFDC cash for which the local government was otherwise responsible; establishes a program of fiscal incentives as part of the AFDC quality control program to encourage States to reduce errors; allows States to acquire accurate wage data from earnings information in records maintained by the Social Security Administration and State employment security agencies; and authorizes the Secretary of HEW to establish necessary safeguards against improper disclosure of the information. H.R. 9346—Public Law 95–216, approved December 20, 1977.

Vocational rehabilitation: Extends programs established under the Rehabilitation Act of 1973 and the Development Disabilities Services and Facilities Construction Act through fiscal 1981 and establishes a comprehensive srevices program for severely handicapped individuals; continues the Hill-Burton allotment formula of funds to States; establishes programs for handicapped American Indians and other individuals in need of independent living services; increases minimum State allotments; authorizes grants to States and public nonprofit agencies and

organizations for initiating recreational activities for the handicapped; authorizes short-term training and instruction including fellowships and traineeships in psychiatric rehabilitation; expands the authority and scope of the Architectural and Transportation Barriers Compliance Board; establishes a new program entitled the "Comprehensive Services for Severely Handicapped Individuals Act of 1978" for the development and implementation of comprehensive services for the severely handicapped; establishes the Federal Council on the Handicapped to advise and assist the President and Congress on the problems and needs of the handicapped; establishes (1) a reading services program for the blind, (2) a rehabilitation services program for older blind individuals, and (3) centers for the training of interpreters for the deaf and information and referral centers and interpreter referral centers for the deaf; and establishes a National Institute of Handicapped Research to coordinate Federal efforts in rehabilitation research. H.R. 12467—Passed House May 16, 1978; Passed Senate amended September 21, 1978; Conference report filed.

TAXATION

Energy conservation tax credit: Allows, effective April 20, 1977, a tax credit of up to $400 for certain residential energy conservation and alternative energy source expenditures including passive solar systems. H.R. 112—Passed House February 2, 1978; Passed Senate amended August 23, 1978.

Tax cut, 1978: Cuts individual income taxes by $14.5 billion in 1979 by making the following changes: increases the personal tax exemption from $750 to $1,000 to replace the temporary $35 tax credit; replaces the existing tax rate schedule, which contains 25 brackets with a new schedule with only 15 wider brackets and lower rates; increases the zero bracket amount and the corresponding floor under itemized deductions, which replaces the old standard deduction, from $2,200 to $2,300 for single persons, from $3,200 to $3,400 for married couples, and from $2,200 to $3,000 for single heads of households;

Provides for additional deductions in individual income tax rates during calendar years 1980, 1981, 1982, and 1983 contingent, for each additional reduction, upon Federal spending not exceeding the inflation rate by 1 percent and outlays dropping from the present 21.5 percent of gross national product to 19.5 percent by 1983; provides a $250 educational tuition tax credit for students studying fulltime at colleges and universities;

Expands the earned income tax credit for the working poor from the present 10 percent of the first $4,000 of earnings which is phased out at $8,000 to 12 percent of the first $5,000 of earnings phased out at $11,000; simplifies the credit and makes it payable throughout the year in the employee's paycheck rather than in a lump sum as a tax refund;

Provides an additional personal exemption for permanently and totally disabled individuals who are not receiving Federal payments under disability programs; increases the tax credit for the elderly by increasing the amount of income eligible for the credit from $2,500 to $3,000 for single persons and from $3,750 to $4,500 for married couples; phases out the credit for single persons at $15,000 instead of at $7,500 and for married couples at $17,500 instead of $10,000; repeals the deduction for nonbusiness State and local gasoline taxes; doubles the present tax credit for political contributions;

Reduces the corporate tax rate from the present 48 percent to 46 percent in 1979 and to 44 percent in 1981; makes permanent the 10 percent investment tax credit for business and allows companies to use it to offset 90 percent of their other tax liability rather than the present 50 percent; allows the credit to rehabilitate existing buildings; allows companies to depreciate the first $25,000 of new machinery and equipment in three years instead of the much longer period prescribed for most categories of equipment by the IRS;

Increases the rate of the existing WIN and welfare recipient tax credit in place of extending the existing general jobs tax credit; provides a new targeted jobs credit to encourage businesses to hire needy youths and others who often have difficulty finding jobs even when the economy is prosperous;

Denies businesses a deduction for entertainment facilities, including yachts, country clubs and hunting lodges;

Cuts capital gains taxes sharply by increasing from 50 percent to 70 percent the proportion of long-term capital gains excluded from taxable income; increases from $35,000 to $100,000 the exclusion for capital gains from the sale of a principal resident of persons over 55.

Replaces the existing add-on minimum tax for individuals by an alternative tax, which individuals will pay only if it exceeds their regular income tax;

Permanently extends the employee stock ownership provisions in the investment tax credit (TRASOP):

Allows independent oil and gas producers an estimated $30 million in tax rebates on the minimum tax they were temporarily required to pay last year;

H.R. 13511—Passed House August 10, 1978; Passed Senate amended October 1, 1978; In conference.

Tax reduction and simplification: Amends the Internal Revenue Code of 1954 to extend the indivdual and business income tax reductions enacted in 1975 and to provide tax simplification as follows:

Standard deduction and tax simplification: Permanently changes the standard deduction to $2,200 for single returns and heads of households and $3,200 for joint returns; revises the tax tables to simplify tax computation for 96 percent of all taxpayers by building into the tax tables the personal exemption, the general tax credit, and the Standard deduction;

Individual and corporate tax reductions: Extends through 1978 the general tax credit of $35 per person or two percent of the first $9,000 of taxable income, whichever is larger; extends the earned income credit equal to 10 percent of the first $4,000 of earned income which is phased out as income rises from $4,000 to $8,000;

Extends through 1978 the corporate tax cuts, enacted in 1975 and subsequently extended, which reduced the tax rate on the initial $25,000 of corporate taxable income from 22 percent to 20 percent and reduced the rate on the next $25,000 from 48 to 22 percent;

Filing requirements and withholding changes: Increases the income level at which a tax return must be filed from $2,450 to $2,950 for a single person and a head of household and from $3,600 to $4,700 for a joint return; requires modification of the withholding rates to reflect the changed standard deduction;

New jobs credit: Provides a new jobs tax credit for 1977 and 1978 equal to 50 percent of the increase in each employer's wage base under the Federal Unemployment Tax Act (FUTA) above 102 percent of that wage base in the previous year; reduces the employer's deduction for wages by the amount of the credit, thereby reducing the maximum gross credit for each new employee from $2,100 to $1,806; limits the credit to no more than: (1) 50 percent of the increase in total wages paid by the employer for the year above 105 percent of total wages in the previous year; (2) 25 percent of the current year's FUTA wages; (3) $100,000 per employer; and (4) the taxpayer's tax liability with provision of carrying back cerdit for three years and carrying forward credit for seven years; provides an additional 10 percent nonincremental credit for hiring the handicapped, including handicapped veterans, who have received vocational training

Postponement of changes in 1976 act: Postpones for one year the effective date of revisions made by the Tax Reform Act of 1976 in the tax treatment of sick pay and income earned abroad; relieves individual taxpayers for periods prior to April 16, 1977, and corporations for the period prior to March 16, 1977, from additions to tax and interest arising from changes in the tax law made applicable to 1976 by the 1976 Act; relieves employers from penalties for under withholding in 1976 on remuneration which became taxable prior to January 1, 1976, as a result of the 1976 Act; lifts the exclusive use of the test in the 1976 act for business deductions for the use of the home for day care services for children, handicapped individuals and the elderly and limits such deductible expense; extends for 1976 the election to treat a State legislator's place of residence within the legislative district he represents as his tax home for purposes of determining deductions for travel and expenses;

Minimum tax on intangible drilling costs: Provides for taxable years beginning in 1977 that intangible drilling costs incurred in oil and gas production operations are to be subject to the minimum tax to the extent that these expenses exceed oil and gas production income;

Charitable contributions of conservation easements: Extends through June 13, 1981, the period during which deductions are allowable for charitable contributions of remainder interests in real property exclusively for conservation purposes as well as the period during which deductions are allowable for charitable contributions exclusively for conservation purposes of easements with respect to real property, if the easement is perpetual;

Work incentive (WIN) program: Authorizes an additional $435 million each for fiscal 1978 and 1979 for employment and supportive services for welfare recipients with no requirement for State matching funds;

Child care facilities amortization: Extends through 1981 the five-year amortization provision for expenditures relating to child care facilities for children of the taxpayer's employees;

Retirement income credit election: Allows taxpayers over age 65 to choose between the retirement income credit as it existed before the 1976 act and as revised by it for 1976 taxes only;

Accrual accounting for farm operations: Postpones until 1978 the effective date for requiring accrual accounting by any farm corporation if either (a) two families own at least 65 percent of the stock, or (b) three families own at least 50 percent of the stock and substantially all of the remaining stock is owned by employees or their families;

Gambling withholding: Modifies the 1976 requirement for withholding on gambling winnings to provide that withholding is required on proceeds of more than $1,000 from bets placed in parimutuel pools involving horses, dogs or jai alai but only if the amount of the proceeds is at least 300 times as large as the amount wagered;

Extension of countercyclical revenue sharing: Extends for six quarters, or until national unemployment drops below six percent, the current countercyclical revenue sharing legislation which expires September 30, 1977, to help State and local governments maintain services; authorizes up to $1 billion in additional funding for fiscal 1977 for a total of $2.25 billion; authorizes up to $2.25 billion for fiscal 1978; requires that the most recent data be used in the allocation formula and that the national amount be determined on the basis of tenths

of the unemployment percentage in excess of six percent rather than on half percentage points; provides that each tenth of a percentage point will generate $30 million for allocation in addition to the basic $125 million; extends the program to Guam, American Samoa, Puerto Rico and the Virgin Islands;

Other provisions: Amends the Social Security Act to clarify the law which provides for the garnishment of Federal payment for purposes of child support and alimony; and contains other provisions. H.R. 3477—Public Law 95–30, approved May 23, 1977.

Tuition tax credit: Provides a personal income tax credit for tuition and fees of undergraduate college and postsecondary vocational students effective August 1, 1978, in an amount equal to 50 percent of tuition and fees, with a maximum credit of $250 per student; provides that, in the case of a student receiving a Federal Basic Grant or Supplemental Grant, the amount of the grant is to be deducted from the prospective tax credit so as to insure a "dollar for dollar" relationship between the two forms of aid; increases the maximum credit to $500 on October 1, 1980, at which time half-time students would be eligible; insures that additional educational assistance does affect the other basic grants to recipients; and provides authorization for more funds for the Supplemental Educational Opportunity Grants College Work-Study Programs and removes the present $25,000 income ceiling on eligibility for in-school interest subsidies on guaranteed student loans. H.R. 12050—Passed House June 1, 1978; Passed Senate amended August 15, 1978; House recommitted conference report with instructions October 12, 1978.

TRANSPORTATION-COMMUNICATIONS

Aircraft insurance and reduced rates for elderly: Extends until September 30, 1982, the authority of the Secretary of Transportation to insure certain aircraft where commercial insurance is unavailable because of war or other hostilities in foreign countries and expands his authority to situations in which insurance against risks other than "war risks" (such as hijacking or terrorism) may be needed to permit continuance of air service; permits the Civil Aeronautics Board (CAB) to approve reduced rate fares to retired persons 60 years of age or over, all persons 65 years of age or over, and the handicapped on a space-available basis; requires CAB, within six months of enactment to report to Congress on the feasibility of reduced rates for persons 21 years of age or younger on a space available basis; permits airlines operating wholly within the States of California or Florida to offer through ticketing and baggage service in cooperation with interstate airlines to facilitate passenger and baggage movements and permits the adoption of joint fares and rates between intrastate airlines and CAB certificated airlines; requires airlines to give the public and the CAB 45 days of advance notice on tariff changes, air carriers to give 60 days of advance notice in changes of freight rates, and indirect carriers to give 45 days of advance notice in changes of freight rates, and requires that the CAB approve or disapprove such changes at least 15 days before the effective date of the tariff. H.R. 6010—Public Law 95–163, approved November 9, 1977.

Airline deregulation: Sets forth U.S. policy to develop an air transportation system which places increased reliance on market competition, with safeguards against unfair or predatory practice or decreases in services to smaller communities; revises current standards governing entry application for interstate and overseas scheduled air transportation to promote competition by directing the Civil Aeronautics Board (CAB) to authorize proposed air transportation entries unless it determines that such transportation is not consistent with the public convenience and necessity; establishes a graduated automatic entry program by allowing carriers to enter one new route a year for the first two years and two new routes a year thereafter without CAB approval; provides a five-year adjustment period to the automatic entry program during which carriers may place a limited number of their routes outside automatic entry and during which subsidized and smaller carriers will be protected by limiting the number of their unprotected routes; eliminates the requirement that all intercarrier agreements be submitted to the CAB for approval and the provision that once approved such provisions are immune from antitrust laws, and provides instead that CAB approval is required only if antitrust immunity is sought; eliminates CAB authority to immunize certain types of highly anticompetitive agreements and requires agreements submitted for CAB approval to meet a public interest test prior to immunization; establishes safeguards to insure that joint arrangements approved by CAB will be open to all carriers on reasonable terms; requires periodic CAB review of any agreement with anticompetitive potential; phases out over the next seven years the present section 406 subsidy program, which provides compensation for essential air services to small communities with the amount of the subsidy based on the needs of the carrier system, and introduces a new program with subsidies to be based upon the needs of the communities; guarantees for the next ten years essential air services to all communities now listed on a carrier's certificate; directs the CAB to begin reviewing the needs of new communities applying for the subsidy program one year after enactment; establishes a new class of certified air carriers, limited in size to 36-person seating capacity and 40,000 pounds certified gross takeoff weight, for the purpose of serving smaller communities; establishes a zone of pricing flexibility within which carriers are free to raise their fares (after July 1, 1979) five percent above the standard industry level in competitive markets, and lower fares (upon enactment) 35 percent below the standard industry fare level; provides that upward pricing mobility shall not apply in markets in which one air carrier has over 70 percent of the traffic; authorizes the Board to fine fares unlawful if they are predatory, even if they are within the pricing zone; contains an employee protection program to provide financial assistance to employees with four or more years in the industry who lose their jobs, suffer a reduction in wages, or are forced to relocate due to bankruptcy or a contraction of at least 15 percent in their car carrier employer; prohibits States from exercising economic regulatory control over interstate airlines, while allowing States to retain jurisdiction over intrastate airlines if those carriers obtain CAB certificates until more than 50 percent of the carrier's revenues are derived from interstate services; contains provisions throughout the bill requiring expedient action on all applications, complaints, and other matters filed before the CAB; and creates a new section of the Federal Aviation Act to insure surveillance of safety standards throughout the transitional period of reform. S. 2493—Passed Senate April 19, 1978; Passed House amended September 21, 1978; conference report filed.

Amtrak authorization: Authorizes funds for the National Railroad Passenger Corporation (Amtrak) for fiscal year 1979 for payment of operating expenses, including the Northeast corridor, and for operating and capital expenses of rail passenger service requested by the States; for payment of the costs of capital acquisitions or improvements of the basic system; and for payment of the principal amount of Federal guaranteed obligations (other than leases) of the Corporation; directs the Secretary of Transportation to submit to the Congerss by December 31, 1978, a recommendation for an Amtrak routes system based upon current and future market and population and considering, among other things, the adequacy of alternative transportation modes, the impact of frequency and fare structure alternatives, any unique advantages of rail service, and energy conservation; directs Amtrak to begin planning for implementation of the new system immediately upon its approval even though no modifications or restructuring may begin before fiscal 1980; directs the Secretary to develop economical and reliable rolling stock and equipment that will be compatible with the upgraded right-of-way in the Northeast corridor; earmarks $27 million for equipment modification or replacement for the Northeast corridor; requires that Amtrak be operated and managed as a for-profit corporation; requires the Secretary to evaluate the common stock ownership of the corporation and submit by December 31, 1978, a report on retention, retirement or conversion of the stock; mandates the development and implementation of a rail safety program; raises from 60 percent to 80 percent the Federal share for projects to convert or modernize railroad terminals; permits a State or local transportation agency whose request for Amtrak service has been refused to petition the Interstate Commerce Commission for an order directing Amtrak to comply with the request; permits Amtrak to enter into contracts to operate commuter rail passenger service; and directs Amtrak to establish schedules to attract and service the bulk mail of the postal service. S. 3040—Public Law 95–421, approved October 5, 1978.

Commuter rail operating aid: Increases the percentage of Federal contribution for the last six months of the existing commuter rail operating assistance program to 80 percent; deletes the requirement that any applicant for assistance must provide assurance to the Secretary of Transportation that the rail service will be continued after the section 17 subsidy program terminates and extends the program for two years with 50 percent Federal funding and a new authorization of $30 million annually for fiscal 1979 and 1980; and provides for a new section 18 program to provide operating assistance to rail commuter lines not eligible under section 17 of $20 million for fiscal 1979 which will be distributed under a formula to cover operating deficits of eligible commuter rail systems. H.R. 8346—Public Law 95–187, approved November 16, 1977.

ConRail stock: Authorizes the United States Railway Association to purchase an additional $1.2 billion of the Series A preferred stock of the Consolidated Rail Corporation (ConRail) to cover ConRail's projected five-year Federal funding requirements; prohibits ConRail from investing $345 million of the additional authorization until it has in effect an employee stock ownership plan and requires, within 14 months of enactment, submission of a proposed plan; authorizes $9 million for reconstruction of the railroad bridge over the Hudson River at Poughkeepsi, New York; removes the $100 million ceiling on trustee certificates; and extends from September 30, 1978, until September 30, 1979, the rail assistance program. S. 2788—Passed Senate August 1, 1978.

Highways—Mass Transit: Authorizes Federal-aid highway programs through fiscal year 1980 in title I—"Federal-Aid Highway Act of 1978"; provides for more expeditious completion of the Interstate System by establishing a firm "cutoff date" which requires that projects on the Interstate System be under construction, contract for construction or completed by September 30, 1986, and by improving the procedure for those States financing interstate construction by providing additional funds ready to move

forward on interstate projects; authorizes $175 million for each year solely for resurfacing, restoring and rehabilitation (3R) routes on the Interstate System; requires the States to maintain their completed interstate routes and meet certain minimum standards to avoid suspension of Federal aid to primary route projects; permits a State to use interstate 3R funds on its primary system provided its interstate routes comply with the minimum standards; reduces the Federal share of interstate 3R work from 90 to 70 percent; over increases authorizations for the bridge replacement program to $525 million; allows funds to be used to rehabilitate as well as replace bridges; permits up to 30 percent of the funds authorized for this program to be sued to rehabilitate or replace bridges which are not on a Federal-aid system;

Title II—"Highway Safety Act of 1978": Extends and amends the Highway Safety Act of 1966 through 1982, and sets authorization levels for highway safety research and development and grants to States which initiate innovative approaches to highway safety; reduces the areas and number of mandatory highway safety standards required under the Highway Safety Act to provide States greater flexibility in identifying their own needs and solutions to their unique safety problems; provides a program for increased enforcement of the 55 mile per hour national maximum speed limit with graduated minimum standards to measure the effectiveness of State speed limit programs; directs the Secretary of Transportation to reduce a State's apportionment of its non-interstate highway construction funds in the amount of up to five percent each year through 1983 and up to ten percent in fiscal 1984 and succeeding years if the State does not meet the minimum compliance goals for 55 mile per hour speed limit; continues the Federal share payable for highway safety programs by the Secretary of Transportation on a matching basis at the traditional level of 70 percent;

Title III—"Federal Public Transportation Act of 1978": Amends the Urban Mass Transportation Act of 1964 to provide new authorizations for the program of Federal assistance through fiscal 1982; restructures both the discretionary and formula capital grant and loan programs to include most routine bus-related capital activities within the formula program; revises the section 5 formula to provide increased operating assistance on a more equitable basis; creates a new formula assistance program for small urban and rural areas; creates a human resources program; and establishes new requirements for transportation planning and nondiscrimination activities;

Title IV—"Highway Revenue Act of 1978": Extends the Highway Trust Fund and the existing highway excise taxes for five years from September 30, 1979, through September 30, 1984; and postpones the scheduled rate reductions of the highway excise taxes allocated to the trust fund for five years. H.R. 11733—Passed House September 28, 1978; Passed Senate amended October 3, 1978; in conference. (VV)

Local rail services: Amends the Department of Transportation Act as it relates to the local rail assistance program to correct several key deficiencies which have been identified in the existing branch line rehabilitation and service continuation program; contains provisions to make the program permanent and set the Federal share of the cost at 80 percent; allows for operating subsidies on lines permitted to be abandoned by the Interstate Commerce Commission for three years; revises the formula for the allocation of funds so that the new lines eligible for rehabilitation would control the allocation of two-thirds of the available funds and those eligible only for the subsidy would control one-third of the funds; provides that no State would receive less than one percent of the annual appropriation; amends the Interstate Commerce Act to authorize the Interstate Commerce Commission to require a railroad to provide safe and adequate facilities and equipment to carry out its responsibilities as a common carrier if the railroad's capital will not be impaired and, in limited circumstances, to require an owning railroad to allow, as a condition of an abandonment, a different operator to operate over the owning railroad's tracks in order to perform certain nonrevenue services; requires ConRail to provide modified or additional commuter service if a State or local commuter authority offers an adequate subsidy; requires a report on the means of indemnifying ConRail for uninsurable losses it may incur in the operation of a commuter rail service; and requires prompt consideration by the Federal Railroad Administration for emergency railroad service loans for the Chicago, Milwaukee and St. Paul Railroad. S. 2981—Passed Senate September 23, 1978; passed House amended October 13, 1978.

Maritime authorizations: Authorizes $553,597,000 for programs of the Maritime Administration for fiscal 1978 for acquisition, construction or reconstruction of vessels and construction-differential subsidies, for payment of ship operating differential subsidies, for research and development, for the reserve fleet, for maritime training at the Merchant Marine Academy at Kings Point, N.Y., and for financial assistance to the State marine schools which includes an increased annual student subsidy; bars the payment of operating differential funds to any subsidized liner company unless its chief executive officer certifies his cooperation with the Federal Maritime Commission investigation of illegal rebating; increases from 75 to 87½ percent the amount of title XI guarantee financing available to a ferry operating solely in point-to-point transportation. S. 1019—Public Law 95–173, approved November 12, 1977.

Authorizes $496,792,000 for fiscal 1979 for certain maritime programs of the Department of Commerce and for the operating expenses of the Maritime Administration for ship construction; for operating-differential subsidies; for research and development activities; for maritime education and training expenses including funds for the U.S. Merchant Marine Academy at Kings Point, New York, State marine schools, and supplementary training; and for Maritime Administration operating S. 2553—Public Law 95–298, approved June 26, 1978.

Public Broadcasting: Extends and improves the provisions relating to long-term financing for the Corporation for Public Broadcasting; transfers to the Department of Commerce the Education Broadcasting Facilities Program now administered by HEW; continues the present system of multi-year advance authorizations for noncommercial educational and cultural radio and television programs and provides for moderate increases in the funding levels: encourages the growth and development of nonbroadcast, as well as broadcast, communications technologies to insure that public programming is available to as many citizens as possible by the most efficient and economic means: stimulates new efforts to expand opportunities for minorities and women in unemployment training and operation of public telecommunications facilities; clarifies the mission of the Corporation and reduces unnecessary overlap of its activities with other public broadcasting organizations; facilitates access to the system by independent program producers; mandates long-term planning for future needs by both the Corporation and the Department of Commerce; provides greater participation and accountability to the public by all recipients of public funds but does not permit the Government to interfere with sensitive program content or other related activities of these recipients. H.R. 12605—Passed House July 10, 1978; Passed Senate amended September 19, 1978; Conference report filed.

Tanker safety: Amends the Ports and Waterways Safety Act of 1972 to establish more stringent construction, design, equipment, repair, manning, maintenance, and operation standards for all tankers, regardless of flag, entering U.S. ports; provides clear authority both on shore and offshore, for the Secretary of Transportation to bar substandard vessels from operating in U.S. waters; authorizes the creation of a Marine Safety Information System to identify substandard vessels and disclose the true ownership of ships. S. 682—Public Law 85– , approved , 1978.

U.S. Railway Association: Authorizes $27.2 million for the adminstrative expenses of the United States Railway Association (USRA) for fiscal year 1979; permits the Secretary of Treasury to make postbankruptcy loans to the Delaware and Hudson Railroad up to December 31, 1979, in order to enable the line to continue normal service; and extends retroactively from the effective date of the Regional Rail Reorganization Act of 1973 (from 900 days to three years) a provision for establishing the value of rail properties transferred by ConRail to any State, local or regional transportation authority. H.R. 10898—Public Law 95– , approved 1978.

Amends the Regional Rail Reorganization Act of 1973 to authorize an additional $13 million making a total of $23 milion for fiscal 1978 to the United States Railway Association to cover litigation and other anticipated expenses involving the reorganization of the Northeast railroads. H.R. 4049—Public Law 95–199, approved November 23, 1977.

VETERANS

G.I. education benefits: Authorizes a 6.6 percent cost-of-living increase, effective October 1, 1977, in the education assistance allowances provided under the Vocational Rehabilitation, Veterans' Educational Assistance, Survivors' and Dependents' Educational Assistance, Correspondence Courses, On-Job Training, and Education Loans sections of the G.I. bill; establishes a program of accelerated educational assistance payments for veterans and eligible persons attending a school with yearly tuition costs in excess of $700; extends for two years the delimiting date for education benefits to certain veterans; extends the period of time that a veteran with a mental or physical disability or impairment has to utilize G.I. bill benefits; increases the work-study allowances for veteran students; and sets up a new process by which the Women's Air Force Service Pilots and similar groups may have their service recognized as active military in order that they may be eligible for veterans' benefits. H.R. 8701—Public Law 95–202, approved November 23, 1977.

Veterans' pension and survivor benefits: Provides an improved and more equitable pension program for needy wartime veterans who are disabled by reason of non-service-connected disability or who are 65 years of age or older and for the needy surviving spouses and children of wartime veterans. H.R. 10173—Passed House June 28, 1978; Passed Senate July 31, 1978; Senate agreed to conference report October 12, 1978.

Increases the rates of disability and death pension and the rates of dependency and indemnity compensation (DIC) for parents; provides a cost-of-living adjustment in the rates and annual income limitations applicable to pension for nonservice-connected disabled veterans and their surviving spouses, for surviving parents receiving dependency and indemnity compensation; provides an increase of approximately 6.5 percent in rates of disability and death pension under current law, including the additional

amount authorized for dependents; increases by approximately 6.5 percent the rates of dependency and indemnity compensation (DIC) payable to parents; increases by the same percentage the maximum income limitations applicable to pensioners and parents entitled to DIC under current law, and to beneficiaries under the protected pension law; increases by the same percentage the amount of additional pension and DIC payable to those recipients so entitled based upon aid and attendance or household status; and increases additional allowances for recipients of wartime death compensation by the same percentage based upon need for regular aid and attendance. H.R. 7345—Public Law 95-204, approved December 2, 1977.

Provides a 7.3 percent cost-of-living increase in veterans disability compensation and dependency and indemnity compensation (DIC) and other benefits payable for more severe disabilities; raises to $200 per month the special pension rate payable to Congressional Medal of Honor recipients; and calls for a report on issues relating to the adequacy, compensation awards to and health care needs of former prisoners of war. H.R. 11886—Public Law 95- , approved 1978.

Increases the maximum grants for qualified veterans to acquire specially adapted housing and the maximum loan guaranty entitlement for the purchase of a home and extends such entitlement to Vietnam veterans; makes various improvements in the VA mobile home loan program; creates a program of grants to assist States in establishing, improving, maintaining and expanding veterans' cemeteries; calls for an on-going review of the VA education default rate; and permits the Administrator to limit eligibility for education loans and to reduce the loan repayment period for certain types of loans. H R. 12028—Public Law 95- , approved 1978.

Authorizes contracts with the Republic of the Philippines for the provision of hospital care and medical services to Commonwealth Army veterans and new Philippine Scouts for service-connected disabilities; authorizes the continued maintenance of a Veterans' Administration office in the Republic of the Philippines; extends through fiscal 1979 the VA's authority to enter into special-pay agreements with physicians and dentists; and extends until September 30, 1981, the period during which certain Vietnam-era veterans may receive veterans readjustment appointments in the Federal Government. H.R. 5029—Passed House April 4, 1977; Passed Senate amended May 26, 1978.

Veterans' care in State homes: Provides a 6.6 percent increase in: cost-of-living for disabled veterans in basic compensation rates and in the rates payable for more serious disabilities; the additional allowances for spouses, children, and dependent parents paid to veterans rated 50-percent disabled or more; dependency and indemnity compensation (DIC) benefits including the additional allowances payable for dependent children and those in need of aid and attendance; benefits payable to the children of veterans whose deaths were service-connected, when there is no surviving spouse; benefits payable to surviving children who have become permanently incapable of self-support prior to the age of 18; and the annual clothing allowance paid to certain seriously disabled veterans; and extends eligibility for specially adapted housing grants to permanently and totally service-connected disabled veterans with certain specified disabilities. H.R. 1862—Public Law 95-117, approved October 3, 1977.

Consolidates the construction grant-assistance programs for State home domiciliary and hospital facilities and for State home nursing care facilities; creates new statutory authority for grants for the construction of new domiciliary facilities and the expansion of domiciliary and hospital facilities and for initial equipment in both categories; sets at 33⅓ percent the annual limit a State may receive of the total amount appropriated for the program; and includes domiciliary and hospital projects under the statutory nursing home program recapture provision. H.R. 3695—Public Law 95-62, approved July 5, 1977.

Veterans' health care improvement: Improves the quality and efficiency of health care provided to sick or disabled veterans in the Veterans' Administration health care system; clarifies the circumstances under which the VA may furnish contract hospital care and medical services in certain cases; extends and makes modifications in the Veterans' Administration special-pay program to attract physicians and dentists in certain scarce categories to agree to full-time service in the Department of Medicine and Surgery; provides for the establishment of new programs for readjustment professional counseling, preventive health care for veterans, service-connected disabilities, and expanded drug and alcohol treatment and rehabilitation programs. H.R. 5027—Passed House April 4, 1977; Passed Senate amended September 9, 1977.

Veterans' physician and dentist comparability pay: Extends until September 30, 1978, the VA's authority to enter into special pay agreements and provides for the retroactive payment of special pay to otherwise eligible physicians and dentists who are hired between October 1, 1977, and the date of enactment and who sign such agreements within 30 days of the date of enactment and conforms the pay of podiatrists and optometrists to the appropriate levels of basic pay in the physicians and dentists schedule for the period October 21, 1976, through October 8, 1977. H.R. 8175—Public Law 95-201, approved November 23, 1977.

Vietnam veterans' discharges and benefits: Denies entitlement to veterans' benefits to certain Vietnam era veterans holding clemency discharges who have become so entitled because of the presidential program pardoning draft evaders. S. 1307—Public Law 95-126, approved October 8, 1977.

U.S. FOREIGN POLICY

Mr. ROBERT C. BYRD. Mr. President, foreign policy requires a continuing evaluation of our interests. It involves responding to evolving conditions—all too often this means responding to a crisis, the threat of a crisis, or a high-tension situation.

Indeed, there sometimes appears to be a compulsion to respond, to act quickly, when, in fact, a more measured, careful response would not only suffice but would be preferable. As Victor Hugo stated, "Caution is the eldest offspring of wisdom."

CONGRESSIONAL ROLE

Because of the complexity, the swiftly moving events, the question frequently has been asked whether Congress can play an effective role in the foreign policy area.

I believe the answer to be unquestionably affirmative. And I believe that events of recent months are strong evidence of a responsible congressional role in foreign affairs.

The reactive aspect of foreign policy is clearly and properly within the domain of the Executive, although to the highest degree possible there should be consultation with the Congress.

While recognizing the Executive primacy in this area, there still remains a vast and weighty congressional responsibility in foreign affairs.

Before commenting further on the congressional role, let me turn to some of the specific elements of our foreign policy.

UNITED STATES-SOVIET RELATIONS

To speak of U.S. foreign policy is, in large measure, to speak of United States-Soviet relations. No one subject so dominates our international outlook as does our relationship with the Soviet Union. Additionally, United States-Soviet relations spill over into other areas and condition our approach to a variety of policy questions.

That our relations with the Soviets are given such importance is understandable. Our two nations are the world's greatest military powers, possessing extensive nuclear capability. In view of the catastrophic potential of this nuclear weaponry, we attach great significance to mutual agreement on restraint and limitations on nuclear arms.

I have frequently stated that I consider a good strategic arms limitation treaty to be of primordial importance. At the same time, I have stressed that it must be a good treaty—a treaty that is verifiable and fully protective of our security interests and those of our European allies.

We have been told that progress is being made toward a SALT II agreement and that Secretary Vance will visit Moscow later this month to continue the discussions.

I am hopeful that a good SALT treaty can be successfully negotiated. If and when that occurs, the treaty will receive the most thoroughgoing scrutiny when it is submitted to the Senate.

Despite our hopes for limiting the numbers and the destructive potential of nuclear weapons, we can afford to have no illusions about the Soviet Union.

The Soviets are our adversaries.

They have hundreds of strategic warheads aimed at the United States. They have undertaken a massive military buildup in Eastern and Central Europe. The Soviet-Cuban involvement in Africa remains a matter of great concern. The Soviet Government has engaged in inhumane and repressive treatment of some of its own citizens.

In past months, relations between our two nations have been generally characterized as in a deteriorating state, but more recently there have been some slight signs of an upturn.

With President Carter, I would obviously prefer cooperation with the Soviet Union, rather than confrontation. However, we should be realistic. We can hope for cooperation and seek to avoid confrontation, but, undeniably and inevitably, we are engaged in competition.

For the foreseeable future—recognizing that there can be rapid turnabouts in international affairs—that situation is unlikely to change in any significant way.

Thus our foreign policy must be conditioned by this ongoing competitive relationship. We must recognize these realities, much as we might prefer to see things differently, and much as we hope

relations will improve. The Soviet military strength cannot be dismissed. This is a major factor affecting our North Atlantic Treaty Alliance, which is one of the cornerstones of U.S. foreign policy. As George Washington pointed out:

To be prepared for war is one of the most effectual means of preserving peace.

But in recognizing these realities, we should not make the Soviet Union the sole focal point of our entire foreign policy. There are too many other important items on our international agenda. We need to act on our own initiatives, steering a course that reflects our own best interests and our desire to cooperate with other nations in building a more stable, more secure, and more prosperous world.

Let us make clear our policies, our intentions, and our principles, and act accordingly. While we must always assure that our national security interests are protected, it is time to break away from the action-reaction cycle with the Soviet Union. If the Soviets show serious signs of seeking more positive relations, then we will be prepared to respond, and in a positive vein.

I do not think it behooves us to react or respond to every Soviet move—to zig every time the Soviets zag.

We enter into negotiations on a possible SALT treaty not as a favor to the Soviet Union, but in our own interest. It is in our interest to limit the spiraling and costly strategic arms race. If a sound, fair, and verifiable agreement can be achieved, then it will be in our interest.

I do not profess to have all the answers, but I believe the same principle should apply to the much-discussed question of Soviet trade. We should act out of our own interests. The basis for our policy should be quite clear: To the extent that it serves our interests, we should allow trade with the Soviet Union.

I have long maintained that there must be strict regulations on technology transfer to the Soviet Union. I favor a firm embargo on any equipment that might have military application. The administration has recently moved to impose a more thorough review on any transfer of petroleum exploration and production equipment, and properly so.

But we would hardly be acting in our own self-interest if we were to cut off agricultural sales to the Soviet Union. Such sales represent a valuable export market of at least $6 billion annually.

Economic leverage can be an instrument of U.S. foreign policy, although we should be careful not to overestimate its value. In the case of the Soviet Union, we should recognize the limits of leverage. The Soviets would obviously like to have access to some of our more sophisticated technology, but they are not to any major extent dependent on us. Most items the Soviets seek to import are available from other sources; other Western countries and Japan have generally been quite eager to sell to the Soviets.

We should set forth our trade policy and adhere to it. Obviously, we want to retain some flexibility, and our policy should be a matter for continuing reevaluation, but not on a daily or weekly basis. We can hope that the limited trade which we do carry on with the Soviets will have a positive political effect on Soviet behavior over a period of time. But just as we should recognize the limits of leverage, so should we acknowledge that the benefits of such trade may be limited and gradual at best.

A POSITIVE ROLE

To reiterate, what I am suggesting is that we continue to move away, as much as possible, from the reactive role and move toward a more active, positive role in international affairs.

The administration and the Congress have already moved in this direction, although more remains to be done.

Most notably, President Carter, by negotiating the Camp David agreements, seized the initiative, turning what appeared to be a dead-end street into what could well be the road to peace in the Middle East. This was a remarkable breakthrough.

Congress will be called upon to support some of the following aspects of the agreement, assuming that the peace process continues to move forward.

I believe that an important factor in gaining the high level of cooperation from Egypt in the peace effort was the approval earlier this year of the sale of F–5E aircraft to Egypt. The sale took our relations with Egypt across a new threshhold; it reflects the increasing ties between our two countries. President Sadat has said that the Senate's support of the sale—voting down a resolution of disapproval—was critical.

At the same time, the Senate has reaffirmed its strong and longstanding support for the security of Israel. Israel remains the largest recipient of U.S. foreign assistance.

We also moved to help create more stable conditions in the Middle East by selling F–15 aircraft to Saudi Arabia, recognizing the mutuality of interests between the United States and Saudi Arabia. We look to the Saudis to play a more active and constructive role in the Middle East peace efforts.

I spoke earlier of the responsible congressional role in foreign policy, and I want to recall here that, as a result of congressional concerns, a number of assurances related to the Middle East arms sales—future sales and the conditions of the sales—were agreed to by the administration. Congress thus played an important role in shaping the final terms of the sales.

Another example of positive and forward-looking action by the administration and the Senate was on the Panama Canal treaties. The Senate gave extensive consideration to the treaties—37 days of debate, preceded by lengthy committee hearings. During its consideration of the treaties, the Senate amended and added to the treaties—strengthening them and meeting legitimate concerns raised by Members of the Senate. The Senate's action in approval of the treaties was, I believe, consistent with our national principles, and in the best interests of the United States, as well as our hemispheric neighbors. The treaties have great symbolic significance for our future relations with the rapidly developing countries of Latin America—countries whose destinies are closely intertwined with our own.

I want to mention one further policy issue which the Senate debated this year, and which, like the Middle East arms sales and the Panama Canal treaties, aroused strong feelings. I am referring to the lifting of the embargo on U.S. arms to Turkey. On this, as well as the other issues I have cited, a majority of Senators was willing to stand up for broader national interests, despite strong political pressures.

Here again, the Senate acted in a responsible manner; its approval of the lifting of the embargo was conditioned on Presidential certification that such action would support a solution of the Cyprus issue. The amendment which the Senate approved was designed to help spur a settlement on Cyprus and to show an evenhanded approach in the area.

On all of these major foreign policy issues, the Senate has provided the administration with the critical support it has needed. The Senate has also left its own imprint on each of these measures, reflecting the continuing high level of Senate involvement in foreign policy issues.

A salient aspect of the Turkish embargo question was its relationship to NATO. Lifting the embargo involved not only revitalizing United States-Turkish relations, but strengthening the North Atlantic Alliance, of which Turkey is an essential member.

NATO has been a primary emphasis of the Carter administration, and this is strongly supported by the Congress. At the NATO summit meeting here in May, the member countries agreed to a long-term defense program (LTDP), with greater alliance cooperation and planning. The program represents a substantial commitment to the strengthening of NATO'S deterrent and defense posture. Following the NATO summit, I had the opportunity to visit Europe for discussion with a number of key European leaders. I met with an enthusiastic reception for the renewed U.S. emphasis on European security.

WORKING TOGETHER

I have cited a number of foreign policy areas where the Congress and President Carter have successfully worked together. Yet, from time to time, suggestions are made that Congress has unduly involved itself in foreign policy and unduly restricted Presidential authority. Such suggestions surfaced during the rebel invasion of Zaire in May. In fact, the President was not impeded by any congressional restrictions in providing emergency assistance to Zaire.

Through the war powers resolution and other legislation, Congress has taken steps to safeguard the congressional role in matters of major importance. By so doing, it has not unduly inhibited Presidential action and flexibility in foreign affairs.

Obviously there is a danger that devices such as the legislative veto could be overused, and I think Congress should be careful about applying too many restrictions and conditions in specific cases. It is important to remember, however, that in almost every case where Congress has applied such restrictions, they may be waived by a Presidential de-

termination that our national security interests are involved.

I do not think there is any question but that the President retains considerable flexibility and a broad range of authority in foreign affairs. The President also has the responsibility to inform and consult with Congress. This is essential for a successful foreign policy.

The Carter administration generally deserves high marks in this category, having consulted and informed the Congress regularly on most important foreign policy matters. The White House, State Department, and the Defense Department all deserve credit and I look forward to a continuation of the prevailing good relationship.

THE INTERNATIONAL AGENDA

Although the Senate and the administration can point with considerable pride to our accomplishments in foreign affairs, a full and challenging international agenda remains.

In addition to strategic arms limitations, which I have mentioned, there is also a need for progress in limiting conventional arms transfers. This, of course, requires the cooperation of other supplier nations.

I have noted the remarkable progress made at Camp David toward peace in the Middle East. While the Camp David agreements represent a significant step, many critical problems remain unresolved. Of particular concern is the continuing civil war which has brought such devastation to Lebanon and which has implications for possible broader conflict in the region.

Still another area which calls for skillful diplomatic effort is Southern Africa. Our aim must be to encourage peaceful change and representative government, but a volatile atmosphere makes progress difficult.

There are, of course, a number of other outstanding issues, but one that I believe to be of special significance is our relationship with the People's Republic of China. There have been signs of gradually growing ties between the United States and China. We are moving toward greater cooperation in a number of areas—educational, scientific, and commercial. Recently the Senate approved legislation that would extend limited most-favored-nation status to China, making it eligible for short-term credits through the Commodity Credit Corporation.

I strongly favor this increased cooperation and movement toward normalization of relations. I believe such developments are fully consistent with our national interests, and are important for the maintenance of a stable balance of power and the preservation of world peace.

THE ECONOMIC FACTOR

Foreign policy is composed of many parts. Two of the major components are security or defense policy and economic policy. In both these areas, the Congress is playing a major role and should continue to do so.

In closing, I want to focus on economic policy because this is a matter which should be receiving great emphasis. In many respects it is the key to our international posture. It is here that we must really bear down. We must get our economic house in order if we are to carry our weight in international affairs.

International economic stability and imbalance are matters for the most serious concern. Uneven growth rates among the Western nations and Japan and the staggering debt burden of Third World countries have severely strained the international monetary system and have fueled inflation.

We cannot be complacent about the decline of the dollar and our huge trade deficit. There must be a continuing and concerted effort to fight inflation, reduce our excessive oil imports, resist protectionist pressures, and expand exports.

Some notable actions have been taken by Congress and by the administration to stem inflation and strengthen the economy. Of particular importance, I believe, is the congressional commitment to restrain spending, as evidenced in the second concurrent budget resolution, which reduced the President's January projected deficit to below $40 billion.

Another key element of the effort to deal with the problems of our economy is the energy legislation approved by the Congress this year. This movement toward a comprehensive energy program has important international consequences. Foreign leaders have viewed us as profligate in our use of energy, not only reducing the supply of oil available to their countries, but, also, contributing to our balance-of-payments problems and thus weakening the dollar by our dependence on imported oil. When I met with European leaders in July, I told them Congress would act favorably on energy legislation before adjournment. The recent congressional action on energy should send a strong and positive message to other nations.

These economic issues cannot be separated from our national security. We need a sound economic base in order to support a strong national defense and to maintain our international defense commitments.

Clearly, economic problems are likely to create international instability. We have to recognize the increasing interaction between the United States and the economies of other nations. It is important to remember that 10 million American jobs depend on our exports. More than half the wheat, soybeans, and rice grown in the United States is sold overseas. One out of every three dollars in U.S. corporate profits derives from international activities.

The economic welfare of the American people increasingly depends on a world economic system in which we need to obtain resources from abroad and to find markets for our products. The developing of Third World countries is critical in this regard. Two-thirds of our imports are raw materials that we do not or cannot readily produce. The United States now depends on developing countries for 45 percent of our oil, 85 percent of our bauxite, 93 percent of tin, 59 percent of zinc ore, and 36 percent of iron ore.

President Carter recently announced a new trade policy—featuring an increased emphasis on promoting the export of U.S. products—which should help strengthen our international economic position.

A central purpose of our economic policy must be to restore confidence in the dollar. There must be international confidence that the United States can and will control Government spending, control the budget deficit, and control our oil imports. Confidence in the dollar is vital to international economic stability. The United States sets the economic pace for the rest of the world.

Congress has taken significant steps to demonstrate to the rest of the world that we have the necessary discipline and that we are serious about cutting spending, bringing down the deficit, and establishing a solid energy policy.

These positive steps will, I believe, help restore confidence in the dollar and in our international leadership. Continued progress in this direction must be a major goal in the months ahead.

SUMMARY

Mr. President, I have discussed some of our major achievements as well as some of the challenges confronting us in foreign affairs.

Specific issues on which the Senate has acted within recent months—and acted with courage—include some landmarks in contemporary foreign policy: The Panama Canal treaties, the Middle East arms sales, lifting the Turkish embargo.

Congress is playing an active and responsible role in foreign policy, but not hindering the Executive's requisite authority in this field.

Among those challenges which face us, one of the foremost is, as I have stated, in the economic area. Strengthening our economy is a key to a successful U.S. foreign policy.

We must continue the maintenance of a strong national defense and sound international alliances, while at the same time seeking firm and fair agreements to limit the proliferation of arms. We will hope for cooperation, but we will not shrink from competition.

As I have noted, the international agenda is replete with difficult issues. No doubt there will be other unforeseen developments that will make headlines in the months ahead. But we should avoid becoming bogged down in every would-be minicrisis that surfaces. Let us chart our course and hold to it. We should, as much as possible, steer clear of a reactive policy. We need to continue to act positively and on our own initiative, reflecting our best interests and our desire to cooperate with other nations in creating a more stable, more secure, and more prosperous world. A strong foreign policy is one of the cornerstones of a strong America.

Mr. President, I thank the distinguished minority whip for his kindness in yielding some of his time to me.

RECOGNITION OF LEADERSHIP

The ACTING PRESIDENT pro tempore. The Senator from Alaska.

The Senator from Tennessee is recognized.

Mr. BAKER. Mr. President, I have no requirement for my time.

SPECIAL ORDER

The ACTING PRESIDENT pro tempore. Under the previous order, the Sen-

ator from Wisconsin (Mr. PROXMIRE) is recognized for not to exceed 5 minutes.

REMOVE RESTRICTIONS ON FEMALE PAGES

Mr. PROXMIRE. Mr. President, recently the Senate passed a measure to extend the time for ratification of the equal rights amendment. Although we differ on technical interpretations of the ERA, I know that all of my colleagues believe that women should have the same access to educational and work opportunities as men.

I wish to call attention to an unfair situation that exists here in the Senate, right under our noses. I refer to the excessive restrictions on the appointment of female pages.

The Senate resolution which first authorized the use of female pages stipulates that Senators appointing such pages must file an agreement with the Sergeant at Arms stating that the Senator:

Will be responsible for the safe transportation of the female page he appoints between the Senate and the page's place of local abode and return; and

Will assume full reponsibility for the safety, well-being, and strict supervision of such female page while such page is in her place of local abode.

The American Law Division of the Library of Congress informs me that this responsibility cannot be shifted to the parents by waiver and that a Senator would be liable for an injury that might occur while the female page is under his supervision.

Even though he may take a sincere personal interest in her well-being, a busy Senator cannot possibly oversee a female page's daily trips to and from home. Nor can he supervise her activities away from the Senate, and thus he assumes a tremendous legal risk in agreeing to serve in place of her parents.

This enormous responsibility obviously has a chilling effect on the hiring of female pages.

If you will look around this morning, you will see an overwhelming preponderance of males—not just among Senators, 98 percent of whom are male, but among the pages, who do such a fine job of helping us here in the Senate. I am informed that of approximately 20 to 25 Senate pages only 4 are female.

None of the Democratic pages in the Senate are female. The House of Representatives, which has no restrictions on the use of female pages, now has 22 young women out of a total of 56 pages.

We are not required to assume this responsibility for the young men. Why should young women be treated differently? I doubt that young men are more likely to need close supervision.

I am sure many of my colleagues would gladly appoint young women if it were not for the legal responsibility, which is virtually impossible for us to meet.

Clearly, the current system is unfair to the many young women who would enjoy and profit from the great experience of working in the U.S. Senate.

When the Senate reconvenes next year, I will introduce a resolution to eliminate the current requirements for overseeing a female page's safety and well-being and to put girl and boy pages on equal footing, which is what is done in the House.

In place of current rules I will suggest a written agreement among the Senator, the page (male or female), and the page's parents as to the Senator's responsibility for the page's transportation, lodging, and well-being.

I made the same suggestion 5 years ago, which was included in a congressional page reorganization bill which was passed by the Senate but received no action in the House.

Congress is often called "the last plantation" because of its exemption from the civil rights laws that we pass. People can point to the effective restriction on the appointment of female pages as an example of condescending and discriminatory treatment of women on the Hill. I hope that my colleagues will see fit to join in this effort to open up opportunities for female pages and remove one small but significant blot on the Senate's record of promoting equal treatment for women.

GENOCIDE: LEST WE FORGET

Mr. PROXMIRE. Mr. President, briefly on another subject, a recent Washington Post article raised a question with regard to the issue of genocide in a most ironic context. The article stated:

An Israeli produced television documentary that contains a brief account of the 1915 massacre of over a million Armenians at the hands of the Turks has caused a diplomatic brouhaha with Turkey. There are charges that the film is being suppressed at the request of the Israeli Foreign Military.

Today Israel includes a large community of Armenians who live mainly in Jerusalem. The newspaper account suggested that for diplomatic reasons, the Israeli foreign ministry might be considering the suppression of one of the worst examples of genocide in the history of the world.

How ironic, how distressing that would be, if true. Hoping that there was some explanation, some extenuating circumstance that I was not aware of, I asked the State Department if the story was true.

The U.S. State Department said that mine was not the first congressional inquiry and that a telegram had been sent to Israel seeking information about the newspaper account. Soon a telegram was sent from our Embassy in Tel Aviv to the State Department. Roughly the telegram stated:

According to Israeli media sources, no decision has been made on whether the film will be shown on Israeli TV. A decision is expected from the TV Board of Directors in 2 or 3 weeks and it will almost certainly be positive that the film will be shown. Pressure has not come from the Turkish Government, but is internally generated. The United Armenian Committee which had collaborated in making the film and provided footage reported that the showing of the documentary had been frozen rather than cancelled and expressed belief that it would eventually be shown.

Mr. President, I hope that the Israelis—victims of genocide themselves—will not succumb to pressure, either internal or external, to suppress news of other genocides.

I hope that the mass murder of the Armenians will become common knowledge through the medium of television.

Genocide is a crime that the world should know about, a crime that nations should not tolerate anywhere. It is a crime whose existence we must be constantly reminded of, lest we forget.

Mr. President, the Senate has had the opportunity to ratify the Genocide Convention, a treaty which outlaws genocide, for three decades.

Yet for 30 years we have neglected to ratify this vital human rights document.

Could it be that we avoid a moral position on this heinous crime? Have we forgotten the need to express our solidarity with 82 other nations, among them our closest allies?

Mr. President, we should not become complacent, forgetting that genocide has occurred and will continue to occur. Never again should an Adolf Hitler be able to say, as he did in 1939:

Who talks nowadays of the extermination of the Armenians?

Mr. President, we must ratify the Genocide Convention.

The ACTING PRESIDENT pro tempore. The Senator's time has expired.

Mr. BAKER. Mr. President, I would be happy, if the Senator can use it, to reclaim part of my time under the standing order.

Mr. PROXMIRE. I thank the Senator, but I have finished.

SPECIAL ORDER

The ACTING PRESIDENT pro tempore. Under the previous order, the Senator from New York (Mr. MOYNIHAN) is recognized for not to exceed 15 minutes.

THE NUNN-CHILES AMENDMENT LIMITING FEDERAL TAXES AND FEDERAL SPENDING

Mr. MOYNIHAN. I thank the Chair.

Mr. President, late Monday evening it fell to me to offer the concluding opposition comments in the short debate on the Nunn-Chiles amendment, before it was overwhelmingly adopted by the Senate. My remarks were necessarily brief, and I have sought this opportunity to explain in slightly greater depth why, in my view, this popular and imaginative proposition ought not become law this year.

It would constitute the single most important change in the American political economy since the introduction of the unified budget under President Harding. It would work an extraordinary change in our budgetary, fiscal, and economic arrangements. Yet there have been no hearings. There has been no sustained scrutiny or analysis. Most Senators knew nothing of the proposal until Monday, when a "Dear Colleague" letter dated Saturday, October 7, may have reached their desks. Yet Monday evening we were asked to vote for something we were told would sharply cut taxes in a responsible manner: by linking those cuts to Federal spending and by linking both to the performance of the economy.

It is apparent why many find this idea appealing. Tax cuts are popular, particularly at this season. A balanced budget remains a cherished goal. Limiting Fed-

eral outlays to a specific percentage of GNP is an increasingly engaging prospect, one that I along with others have been talking about for some years and which President Carter set forth as a goal in his economic message last January.

But let us consider some of the possible consequences of hastily adopting the particular measure now before us.

First, enormous actions would turn on minuscule variations in indicators such as the gross national product, total Federal outlays, and the rate of inflation. These are indispensable, if far from precise, indicators, but they have never before been asked to bear such a heavy burden of automatic policysetting. From useful planning and analytical tools, they would take on an existence of their own as independent variables on which the largest Government decisions would be dependent.

Second, the mechanical arrangements are replete with enormous "notches" and "sudden death" provisions. If the necessary conditions are not met in year 1 or year 2, for example, but not met in year 3, the full 3 years of tax cut would go into effect all at once. This could trigger an abrupt $60 billion tax reduction in 1983, a huge change that in turn could rest on expenditure decisions as small as one-tenth of 1 percent of GNP.

Third, while it is hard to conceive of willful manipulation of the gross national product itself, it is easy to imagine a large uncontrollable event, such as a protracted strike in a major industry, or, I might add, a filibuster in the U.S. Senate, eroding the rate of economic growth—or the rate of expenditure—in a given year sufficiently to cause Federal expenditures to fall short of the prescribed percentage, thus preventing a general tax reduction that would have occurred but for the disturbance.

Fourth, the provision has extraordinarily perverse economic effects. May I say the economic effects that would automatically come about are almost precisely the opposite of those which have traditionally been assumed to be normal reaction to rises and falls in economic products.

In a boom period, the GNP will grow rapidly relative to Federal outlays, making the tax cut conditions easier to meet and thereby triggering a tax cut in the middle of the boom. Conversely, in a recession the GNP will grow slowly or decline, making the tax cut conditions impossible to meet so that no tax cut will be enacted, just when one is most needed.

Consider what would have happened if we had enacted this program in 1972, at the peak of a very considerable period of economic expansion. Federal outlays as a fraction of GNP that year came to 20.9 percent. In 1975, in the trough of our worst recent recession, when conditions demanded a large increase in Federal spending to stimulate the economy, actual Federal expenditures as a percentage of GNP were 22.4 percent. Had we been operating under these constraints, Federal expenditures at this point would have been limited to 19.5 percent of GNP, which translates to $42 billion less than was in fact spent that year. To be sure, the spending "cap" could have been ignored, but then there would have been no tax cut, just at the point when one was most needed.

Fifth, because of the "notch" effect, the last few items on the appropriations schedule can swing the decision on whether there will be a tax cut or not. For example, the last $500 million in the defense budget might mean no tax cut; or the first $500 million of a welfare reform bill, or a health insurance bill, or an important urban renewal plan. The pressure against late appropriations items, and supplemental appropriations, no matter how worthy, will be tremendous.

Sixth, the conditions which must be met to trigger tax cuts are all based on projections of expenditure and forecasts of GNP and inflation. The temptation to gimmick, fudge, or otherwise use mirrors in budget accounting and GNP forecasting will be irresistible, both in the executive and legislative branches. The proposal also defeats, or at least imperils, any serious attempts to do economic and fiscal planning. For example, in planning the next year's fiscal policy there could be a huge swing in the size of the budget deficit or surplus, depending on whether the planner was forecasting a 3.0 or, say, a 3.2-percent increase in GNP, since that difference could trigger or not trigger a large tax cut—and such variations in estimates are not unusual; they are in the range of normal economic uncertainty on the part of the planners. But this problem is compounded when the planner—by which I mean any Government executive or business executive—tries to make any sense of the future.

Seventh, the private sector needs as much certainty as to forward tax rates as fiscal policy can make possible. The proposed arrangement provides just the opposite. One can envision a "futures market" in tax rates.

Eighth, the authors of the proposal assume future real annual increases in GNP of 3.6 percent. Over the past decade, actual increases have averaged 2.9 percent, but annual rates have varied from minus 1.4 percent to plus 5.7 percent. Although we are now in the 15th consecutive quarter of economic recovery from the recession of 1974–75, if our future economic growth is less than 3.6 percent, the automatic annual increases in uncontrollable Federal outlays, now 70 percent of our budget, such as social security, veterans benefits, food stamps, and unemployment compensation will place heavier and heavier pressure on the "controllable" portion of the budget.

It is entirely possible to envision a situation in which popular pressure to allow a tax cut to happen could force an unwise decision with respect to spending even on so fundamental a purpose as national defense.

I find something fundamentally disturbing about this effort to bind ourselves to arbitrary limitations in the face of manifest uncertainty about what the future may hold—and always holds. There is not, to my knowledge, another country with such an arrangement. One might find such strictures ineptly pursued in centrally planned economies, but no democracy has tried it. We have been governing this Nation for almost two centuries on the basis of the free choices of successive Congresses and Presidents. I see nothing in our past record to make us fearful of our future performance.

Mr. President, appended to my remarks is an illustrative table showing the impact which the Nunn-Chiles amendment would have had upon the Federal budget if it had been in effect in 1972. I ask unanimous consent that it be printed in the RECORD.

There being no objection, the table was ordered to be printed in the RECORD, as follows:

IMPACT ON FEDERAL BUDGET IF NUNN-CHILES WERE ADOPTED IN 1972

[Figures in billions]

Year	GNP	Federal expenditures	Percent of GNP	Federal deficit	Federal expenditures as a percent of GNP under Nunn-Chiles	"Allowable" Federal expenditures under Nunn-Chiles	Deficit under Nunn-Chiles
1972	$1,110	$232	20.9	($23.4)	20.4	$232	($23.4)
1973	1,237	247	20.0	(14.8)	20.5	254	(21.8)
1974	1,359	270	19.8	(4.7)	20.0	272	(6.7)
1975	1,454	326	22.4	(45.1)	19.5	284	(3.1)
1976	1,625	366	22.5	(66.4)	19.0	309	----------

Mr. MOYNIHAN. Mr. President, as I speak in this Chamber, I stand alone save for my distinguished friend from Hawaii—there is no one in the galleries, or almost no one, and there is likely to be no one even in the Senate offices listening. I contrast this atmosphere with the scene on Monday evening, when, by a rollicking vote of 65 to 20, the U.S. Senate agreed to a wholly untried, scarcely explicated change in our economic order of a kind not known for two or three generations; when, in full throat, we agreed to slash the budget, cut taxes, limit expenditures, and guarantee, as my County Kerry ancestors would have said, "to live content and pay no rent" in a hypothesized future beyond compare.

Few have heard my remarks, and I cannot imagine that many more will have the time, in the last 48 hours of the Congress, to read them; but I do suggest that these arrangements may have consequences wholly unlike any of those

expected. It seems to me that we are making—or contemplating—fundamental changes in the arrangements of the American political economy in an extraordinarily casual way. If we do these things in this way, I cannot imagine that the President will accept them. If the President accepts them, then I truly have lost my understanding of what constitutes responsible government in this period.

That may suggest my own aberrance, but I am not fully resigned to that explanation as yet.

Mr. President, I have completed my remarks, and I yield this abandoned field to whomsoever may desire it. I see the Senator from Tennessee has come by. I am happy to have his company.

Mr. BAKER. The Senator from Tennessee has rearrived. It seems as if he has been here all night long.

Mr. MOYNIHAN. I am sure that is very nearly the reality.

Mr. BAKER. Mr. President, what is the order of procedure this morning?

The ACTING PRESIDENT pro tempore. The Senator from West Virginia has a special order for 15 minutes. Ten minutes remain on the minority leader's time.

Mr. MATSUNAGA. Will the minority leader yield for 2 minutes to dispose of a matter which I discussed with the minority side?

Mr. BAKER. Could the Senator from Hawaii indicate to me what the matter is?

Mr. MATSUNAGA. This is with reference to the Samoan delegate.

Mr. BAKER. Mr. President, I regretfully must advise my friend from Hawaii that that item has not been fully cleared on this side; perhaps he can put the request a little later, but I cannot do it at this moment.

Mr. MATSUNAGA. I will withhold my request.

Mr. BAKER. I thank the Senator.

REORGANIZATION PLAN NO. 4 OF 1978

MR. ROBERT C. BYRD. Mr. President, on behalf of Mr. RIBICOFF, I move consideration of Senate Resolution 537, Calendar Order No. 1200, a resolution disapproving Reorganization Plan No. 4 of 1978.

The PRESIDING OFFICER. The resolution will be stated.

The assistant legislative clerk read as follows:

S. RES. 537

Resolved, That the Senate does not favor Reorganization Plan No. 4 of 1978, relating to the Employment Retirement Income Security Act of 1974, transmitted to the Congress on August 10, 1978.

The motion was agreed to and the Senate proceeded to consider the resolution.

MR. ROBERT C. BYRD. Mr. President, on behalf of Senator RIBICOFF, I have moved consideration of Senate Resolution 537, Calendar No. 1200, a resolution of disapproval regarding Reorganization Plan No. 4 of 1978. Reorganization Plan No. 4 is designed to simplify and improve the complex administrative requirements of the Employment Retirement Income Security Act of 1974. The plan will eliminate most of the current overlap and duplicative administrative effort between the two departments responsible for the enforcement of ERISA—the Treasury Department and the Labor Department.

On September 28, the Committee on Governmental Affairs unanimously, by a vote of 11 to 0, recommended that the Senate disapprove the pending resolution of disapproval regarding Reorganization Plan No. 4.

Mr. President, in accord with the recommendation of the Governmental Affairs Committee, I move that the Senate disapprove the resolution of disapproval.

The ACTING PRESIDENT pro tempore. The question is on agreeing to the motion.

The resolution (S. Res. 537) was rejected.

Mr. ROBERT C. BYRD. Mr. President, I move to reconsider the vote by which the resolution was rejected.

Mr. BAKER. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

ORDER TO INDEFINITELY POSTPONE SENATE RESOLUTION 576

BUDGET ACT WAIVER

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that Calendar Order No. 1223, Senate Resolution 576, waiving section 303(a) of the Congressional Budget Act of 1974 with respect to consideration of an amendment intended to be proposed by Mr. KENNEDY (for himself and other Senators) to H.R. 13511, be indefinitely postponed.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

CONSIDERATION OF CERTAIN ITEMS ON THE CALENDAR

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the Senate proceed to the consideration of calendar orders numbered 1237 through 1243.

Mr. BAKER. Reserving the right to object——

Mr. ROBERT C. BYRD. Mr. President, these are all relief bills.

The ACTING PRESIDENT pro tempore. Is there objection?

Mr. BAKER. There is no objection.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

LANCE INDUSTRIES, INC.

The resolution (S. Res. 545) to refer S. 3451 to the Court of Claims for the relief of Lance Industries, Inc., was considered and agreed to, as follows:

Resolved, That S. 3451 entitled "A bill for the relief of Lance Industries, Incorporated", together with all accompanying papers, is hereby referred to the Chief Commissioner of the Court of Claims pursuant to section 1492 and 2509 of title 28, United States Code, for further proceedings in accordance with applicable law.

Mr. ROBERT C. BYRD. Mr. President, I move to reconsider the vote by which the resolution was agreed to.

Mr. BAKER. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

GLADYS YAN CHAN LU

The Senate proceeded to consider the bill (S. 1112) for the relief of Gladys Yan Chan Lu, which had been reported from the Committee on the Judiciary with amendments as follows:

On page 1, beginning with line 6, strike comma;

On page 1, beginning with line 6, strike "and shall be accorded immediate relative status under section 201(b) of such Act";

So as to make the bill read:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That, in the administration of the Immigration and Nationality Act, Gladys Yan Chan Lu may be classified as a child within the meaning of section 101(b)(1)(E) of such Act, upon approval of a petition filed on her behalf by Mr. and Mrs. Kuo C. Lu, citizens of the United States, pursuant to section 204 of such Act. No natural parent, brother, or sister, or prior adoptive parent of Gladys Yan Chan Lu shall, by virtue of such relationship, be accorded any right, privilege, or status under the Immigration and Nationality Act.

The amendments were agreed to.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

Mr. ROBERT C. BYRD. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. BAKER. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

JENNET JUANITA MILLER

The bill (H.R. 1405) for the relief of Jennet Juanita Miller, was considered, ordered to a third reading, read the third time, and passed.

The title was amended so as to read:

An Act for the relief of Jennet Juanita Miller (also known as Jennet Juanita Flowers).

Mr. ROBERT C. BYRD. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. BAKER. Mr. President, I move to lay the motion on the table.

The motion to lay on the table was agreed to.

MARLENE HOLDER

The Senate proceeded to consider the bill (H.R. 2756) for the relief of Marlene Holder, which had been reported from the Committee on the Judiciary with an amendment in line 8, after "Act" strike the comma and "and the provisions of section 245(c) of the Act shall be inapplicable in this case".

The amendment was agreed to.

The amendment was ordered to be engrossed and the bill to be read a third time.

The bill was read the third time, and passed.

Mr. ROBERT C. BYRD. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. BAKER. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

MARTHA CASTRO FITZ MAURICE

The Senate proceeded to consider the bill (H.R. 3618) for the relief of Martha Castro Fitz Maurice, which had been reported from the Committee on the Judiciary with an amendment in line 4, strike "Martha Castro Maurice" and insert "Martha Castro Fitz Maurice".

The amendment was agreed to.

The amendment was ordered to be engrossed and the bill to be read a third time.

The bill was read the third time, and passed.

Mr. ROBERT C. BYRD. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. BAKER. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

RAYMOND VISHNU CLEMONS

The Senate proceeded to consider the bill (H.R. 9610) for the relief of Raymond Vishnu Clemons, which had been reported from the Committee on the Judiciary with an amendment on page 2, beginning with line 1, strike through and including line 5, and insert in lieu thereof the following:

right, privilege, or status under the Immigration and Nationality Act. Section 204(c) of the Immigration and Nationality Act, relating to the number of petitions which may be approved, shall be inapplicable in this case.

The amendment was agreed to.

The amendment was ordered to be engrossed and the bill to be read a third time.

The bill was read the third time, and passed.

Mr. ROBERT C. BYRD. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. BAKER. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

JULIO ORTIZ-MEDINA

The Senate proceeded to consider the bill (H.R. 1422) for the relief of Julio Ortiz-Medina, which had been reported from the Committee on the Judiciary with amendments as follows:

In line 3, strike "provision of section 242 (a)(31)" and insert "provisions of paragraphs (17) and (31) of section 212(a)";

In line 7, strike "this exemption" and insert "these exemptions";

In line 8, strike "a ground" and insert "grounds".

The amendments were agreed to.

The amendments were ordered to be engrossed and the bill to be read a third time.

The bill was read the third time, and passed.

Mr. ROBERT C. BYRD. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. BAKER. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

ORDER FOR PRINTING OF S. 2

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that 500 copies of S. 2, the sunset bill, be printed as passed by the Senate.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

TIME-LIMITATION AGREEMENT—H.R. 13650

ORDER OF PROCEDURE

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that when the Senate proceeds to the consideration of H.R. 13650, the Uranium Mill Tailings Radiation Control Act of 1978, that an amendment in the nature of a substitute offered jointly by the Committees on Energy and Natural Resources and Environment and Public Works be in order.

I ask unanimous consent that debate on the bill then be limited to 10 minutes, to be equally divided between Mr. HART and Mr. PAUL G. HATFIELD; that there be a time limitation of 7 minutes for each amendment, to be equally divided between the proponents and opponents; that there be a time limitation on any debatable motion, appeal, or point of order if such is submitted to the Senate, of 3½ minutes, and that the agreement be in the usual form.

Mr. BAKER. Reserving the right to object, Mr. President, and I will not object, I joined the majority leader in trying to get a time-limitation agreement on this bill.

This bill is a fairly complex measure and to make sure that we deal with it in time for the other body to deal with it, I would hope that the majority leader can schedule it for action at some appropriate window early in the day so we can dispose of it.

The ACTING PRESIDENT pro tempore. Is there objection?

Mr. BAKER. I have no objection.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

Mr. ROBERT C. BYRD. Mr. President, I hope the Senate can dispose of the matter early.

COURT ANNEXED ARBITRATION ACT OF 1978

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the Senate proceed to the consideration of Calendar Order No. 1023, S. 2253.

Mr. BAKER. Mr. President, reserving the right to object, did the majority leader ask unanimous consent to proceed?

Mr. ROBERT C. BYRD. Yes.

Mr. BAKER. Mr. President, I am sorry to have delayed the majority leader. That item is cleared.

Mr. ROBERT C. BYRD. I thank the minority leader.

The ACTING PRESIDENT pro tempore. The bill will be stated by title.

The assistant legislative clerk read as follows:

A bill (S. 2253) to amend title 28 of the United States Code to encourage prompt, informal, and inexpensive resolution of civil cases by use of arbitration in U.S. district courts and for other purposes.

There being no objection, the Senate proceeded to consider the bill which had been reported from the Committee on the Judiciary with an amendment to strike all after the enacting clause and insert the following:

That this Act may be cited as the "Court-Annexed Arbitration Act of 1978".

SEC. 2. (a) Title 28, United States Code, is amended by adding after chapter 43 the following new chapter:

"CHAPTER 44—ARBITRATION

"Sec.
"641. Authorization of arbitration.
"642. Certification of arbitrators.
"643. Compensation of arbitrators.
"644. Jurisdiction.
"645. Arbitration hearing.
"646. Arbitration award and judgment.
"647. Trial de novo.

"§ 641. Authorization of arbitration

"Each United States district court may authorize by rule the use of arbitration in accordance with the provisions of this chapter.

"§ 642. Certification of arbitrators.

"(a) Each district court is authorized to certify arbitrators to perform services in accordance with this chapter. Each certification shall be entered on record in the certifying court.

"(b) An arbitrator is subject to the provisions of sections 202 through 209 of title 18, United States Code, that apply to a special Government employee of the executive branch. A person shall not be barred from the practice of law because he is an arbitrator.

"§ 643. Compensation of arbitrators

"(a) The district court shall provide the amount of compensation, if any, that shall be paid to each arbitrator for his services for each case in which he serves.

"(b) Under regulations prescribed by the Director of the Administrative Office of the United States Courts, a district court may reimburse arbitrators for actual transportation expenses necessarily incurred by them in the performance of their duties under this chapter.

"§ 644. Jurisdiction

"(a) Notwithstanding any provision of law to the contrary and except as provided in subsections (b) and (c) of this section, a district court that authorizes arbitration under section 641 shall refer to arbitration any civil action pending before it if—

"(1) the parties consent to arbitration; or

"(2)(A) the relief sought consists only of money damages not in excess of $100,000 or such lesser amount as the district court may set, exclusive of interest and costs;

"(B) jurisdiction is based in whole or in part on section 1331, 1332, 1333, 1345, or 1346 of this title, or section 2 of the Act of March 9, 1920, as amended (46 U.S.C. 742), or section 1 of the Act of March 3, 1925, as amended (46 U.S.C. 781); and

"(C) the action is based on a negotiable instrument or contract or is for personal injury or property damage.

"(b) No referral to arbitration under this chapter shall be made—

"(1) of an action based on an alleged violation of a right secured by the Constitution of the United States;

"(2) of an action in which relief is sought from any official or employee of the United States in his individual capacity for an act performed by such official or employee acting within the outer perimeter of his official duties, whether or not the action is also

brought against such official or employee in his official capacity or the United States;

"(3) of an action by the United States—

"(A) to recover money or property illegally or improperly obtained by an employee or former employee of the United States or any agency thereof; or

"(B) based upon fraud; or

"(4) if jurisdiction is based in whole or in part on section 1343 of this title.

"(c) A district court may establish by rule procedures for excepting from arbitration, for good cause shown, individual cases that would otherwise be referred under subsection (a).

"§ 645. Arbitration hearing

"(a) Arbitrators to whom actions are referred under section 644 shall have within the territorial jurisdiction of the court the power to conduct arbitration hearings and make awards as provided in this chapter. The arbitrators shall have the power to administer oaths and affirmations.

"(b) The arbitration hearing shall begin within a time period specified by the district court, but in no event later than one hundred and fifty days from the filing of the answer or thirty days from the disposition of any motion to dismiss the complaint, motion for judgment on the pleadings, or motion for summary judgment, whichever is later.

"(c) Rule 45 of the Federal Rules of Civil Procedure, relating to subpoenas, applies to subpoenas for the attendance of witnesses and the production of documentary evidence at an arbitration hearing under this chapter.

"(d) An arbitrator may admit any evidence in an arbitration hearing which he considers relevant and trustworthy. The Federal Rules of Evidence may be used as a guide to the admissibility of evidence, except that evidence which is privileged under Rule 501 of the Federal Rules of Evidence shall not be admissible.

"§ 646. Arbitration award and judgment

"The arbitration award shall be filed with the clerk of the district court promptly after the hearing is concluded, and shall be entered as the judgment of the court after the time has expired for requesting a trial de novo pursuant to section 647 unless a party demands a trial de novo pursuant to that section. The judgment so entered shall be subject to the same provisions of law and shall have the same force and effect as a judgment of the court in a civil action, except that it shall not be subject to appeal.

"§ 647. Trial de novo

"(a) Within thirty days after the filing of the arbitration award with the court, any party may demand a trial de novo in the district court.

"(b) Upon a demand for a trial de novo, the action shall be restored to the docket of the court and treated for all purposes as if it had not been referred to arbitration, and any right of trial by jury that a party otherwise would have had is preserved.

"(c) Unless the parties have otherwise stipulated, the court shall not admit at the trial de novo any evidence that there has been an arbitration proceeding, the nature or amount of any award, or any other matter concerning the conduct of the arbitration proceeding, except that testimony given at the arbitration hearing may be used for purposes of impeachment.

"(d) If the party that demanded a trial de novo fails to obtain in the district court a judgment, exclusive of interest and costs, more favorable to him or her than the arbitration award, the court may tax against that party the costs of the arbitration proceeding as provided in section 1920, and the amount of any arbitrator's fees.".

(b) The table of chapters for title 28, United States Code, and for part III of title 28, United States Code, are each amended by inserting after the item relating to chapter 43 the following new item:

"44. Arbitration ..... 641".

SEC. 3. (a) Arbitration in accordance with chapter 44 of title 28, United States Code, as added by section 2 of this Act, shall be implemented on a test basis for a period of three years from the date of enactment of this Act in no fewer than five nor more than eight representative districts to be designated by the Chief Justice of the United States, after consultation with the Attorney General. Before designating the representative districts, the Chief Justice shall consult the regular active judges in each district under consideration and no district shall be so designated if a majority of the regular active judges in that district request that it not be so designated.

(b) The Federal Judicial Center, in consultation with the Attorney General and the Administrative Office of the United States Courts, shall transmit to the Congress, two years and six months from the date of enactment of this Act, a report on the use, effectiveness, and benefits of arbitration in the test district courts and such other districts in which cases are referred to arbitration.

SEC. 4. There is authorized to be appropriated for the fiscal year ending September 30, 1979, to the judicial branch such sums as may be necessary to be allocated by the Administrative Office of the United States Courts to Federal judicial districts and the Federal Judicial Center to carry out the purposes of this Act. The funds so appropriated shall remain available until expended, except that no such funds shall be expended for the arbitration of actions referred to arbitration subsequent to the date of repeal set forth in section 5 of this Act.

SEC. 5. Effective three years from the date of enactment of this Act, chapter 44 of title 28, United States Code, as added by section 2 of this Act, is repealed except that the provisions of that chapter shall continue to apply through final disposition of all actions in which referral to arbitration was made before the date of repeal.

SEC. 6. This Act shall take effect sixty days after the date of enactment.

● Mr. DECONCINI. Mr. President, it is with great pleasure that I initiate discussion of S. 2253, as amended, the Court-Annexed Arbitration Act of 1978. This bill was introduced by the distinguished chairman of the Judiciary Committee, Senator JAMES O. EASTLAND. After extensive hearings in the Subcommittee on Improvements in Judicial Machinery, the original concept underlying S. 2253 has been refined into what both Senator EASTLAND and I believe will constitute a major advance in the struggle to make the Federal judicial branch more responsive to the many and varied needs of the American people.

The bill contains findings that in civil litigation there are avoidable expenses and delays in many Federal district courts. The purpose of the bill is set forth as being the promotion of prompt, informal, and inexpensive resolution of disputes. The vehicle for achieving that result is arbitration.

This measure is the culmination of the highly favorable experiences with arbitration in State courts and in pilot projects now being undertaken by the Federal district courts in three jurisdictions. Presently, Arizona, California, New York, Ohio, and Pennsylvania employ arbitration at some level in their court systems. Careful attention has been given to these programs, and the results obtained by them have convinced many people that the time is ripe for a test of compulsory, nonbinding arbitration in the Federal courts. S. 2253 would provide that test.

Under the bill, a 3-year experiment would be conducted to find solutions to the mounting difficulties encountered by both jurists and litigants that arise from the growing backlog of cases now confronting the Federal courts. It is a response to the widespread concern that the effectiveness of the Federal judicial system is being weakened by the ever-increasing demands on the time of the Federal courts. This legislation employs arbitration as an alternative dispute resolution mechanism that would reduce the length and expense of litigation in many civil actions.

The use of compulsory, nonbinding arbitration should enhance the responsiveness of the judicial system to the demands of society by providing some litigants with a quasi-judicial means of resolving disputes that is speedier and less costly, but no less fair, than the existing court process. At the same time, this will enable the courts to concentrate their limited resources on those legal and constitutional issues they are uniquely qualified to resolve.

At the time of its introduction, S. 2253 contained specific regulations for the conduct of arbitration hearings. It has been concluded that, because this legislation proposes only an experiment with arbitration, it is desirable that a variety of methods of implementing arbitration in the district courts be encouraged and explored. A conference on arbitration under local rule was sponsored by the Federal Judicial Center on May 24, 1978, and was attended by the chief judge and clerk of the pilot district courts and others. There it was generally agreed that it is too early to evaluate fully the merits of the differing rules used in present arbitration systems and that future experience with the pilot programs will reveal which type of guidelines are best suited for a national system of compulsory, nonbinding arbitration.

Thus, the rigid structure of the bill as originally introduced was found to be inappropriate. The amended bill gives each district court wide discretion in such procedural matters as determining which cases should be submitted to arbitration, in establishing rules for the prearbitration period, in setting costs for arbitration proceedings, in selecting and compensating arbitrators, and in regulating the discovery stage of the arbitration process. It is hoped that this discretionary approach will result in a variety of methods of court-annexed arbitration being tested.

The bill creates a new chapter in title 28 of the United States Code that would establish a process of mandatory arbitration of specified categories of civil actions, with the right to a full district court trial de novo preserved. Under the proposal, five to eight districts shall be chosen by the Chief Justice, after consultation with the Attorney General, to try compulsory, nonbinding arbitration on a 3 year experimental basis. Any other district court may also adopt this arbitration procedure on its own. This approach was taken because it is felt that the present experience with arbitra-

tion is sufficiently extensive to warrant a comprehensive and controlled test to determine how advantageous mandatory use of arbitration would be in the Federal courts. At the same time, however, it seems premature to impose an arbitration scheme on all 94 districts without a period of experimentation and study.

The arbitration program proposed is compulsory in that all cases of specified types will be automatically referred to arbitration soon after pleadings are closed unless, upon the motion of a party, the district court judge orders that a case be excepted from arbitration. Two broad classes of cases to be arbitrated have been identified under the proposal. Generally, tort and contract actions, where the claim is exclusively for money damages of less than $100,000—or a lesser amount determined by the district court—will be required to go to arbitration.

Also, any case may be arbitrated with the consent of the parties. A few types of cases within the general tort and contract categories frequently present issues of such sensitivity or general public importance that they warrant a trial before a district court judge. Therefore, certain exceptions have been made. These cases are specifically identified and excluded from arbitration under the amended bill. For example, actions base on alleged violations of constitutional or civil rights may not be arbitrated. In addition, any case may be removed from the arbitration process at the discretion of the district court upon a showing of good cause.

Once a case has been referred to arbitration, time limits are imposed upon each step of the process in order to keep the average elapsed time from case filing to arbitration decision as brief as is reasonably possible. Litigants coming within the program are to receive a hearing not later than 150 days from the filing of the answer or 30 days from the disposition of any motion to dismiss the complaint, motion for judgment on the pleadings, or motion for summary judgment, whichever is later. Each district court may fix time limits within these boundaries by local rule. Discovery proceedings are another area where significant gains in judicial efficiency may be had. It is recognized that limited discovery may frequently be necessary so that the parties may be well enough prepared to engage in a meaningful and fair arbitration hearing. Consequently, witnesses and documents may be subpenaed under Federal Rule of Civil Procedure 45, and the district courts are given discretion to formulate rules for discovery within the 150-day time restriction. But extended discovery, frequently complained of in litigation today, will not be possible before arbitration.

After the arbitration hearing has commenced, the Federal Rules of Evidence should act as a nonbinding guide to the admissibility of evidence, with the understanding that privileged evidence may not be introduced in any event. It is intended that the relaxed rules would permit the admission of some hearsay evidence, particularly in documentary form.

The result of these streamlined procedures and enforced time limitations will be speedier dispute resolution and reduced backlogs in the courts. In California, a State which employs an arbitration program similar to that proposed by this legislation, the median time from the filing of the complaint until trial in a civil case in Los Angeles was 2½ years, while the median from the stipulation to arbitrate until filing of the award was only 60 days. Philadelphia, by raising the amount in controversy beneath which arbitration was compulscry, within 2 years reduced the backlog of its entire civil calendar from 48 months to 21 months.

Arbitration not only reduces the time required for litigation, it also lessens the expense to private litigants through diminished pretrial preparation, simplified evidentiary procedures, and elimination of certain stages in the traditional jury trial process. Reduced expenses makes it economically more feasible for parties to pursue justified claims and to present a defense to the trier of fact in relatively uncomplicated cases. In Ohio, the cost of arbitrating a case was estimated at $49; in Philadelphia, the per-case cost of arbitrators fees is $150. The salary and administrative costs for full court adjudication have been estimated at $500 to $600 per day for a trial that may last several days.

Empirical studies indicate that arbitration proceedings are generally perceived to be fair. A California survey reported that all attorneys and claim managers questioned believed that arbitration was as fair as a jury trial; three-fourths felt it was as fair as a court trial. Litigant satisfaction with arbitration has been demonstrated by the comparison of appeal rates from arbitration awards with the rate of appeal from conventional court decisions. In the California Superior Court, appeal rates from arbitration awards to trials de novo have ranged from 8 to 25 percent with most jurisdictions averaging between 11 and 13 percent, as compared with the 11 to 14 percent rate to appeal from all contested civil cases in California.

Moreover, the majority of the appeals for trials de novo settle before a trial actually takes place. Thus, in most jurisdictions only 5 to 6 percent of arbitrated cases are retried de novo. These appeal rates from judicial arbitration awards indicate that arbitrated cases produce results as satisfactory to the parties as the regular civil trial process.

There are other, less easily quantified benefits to the administration of justice. There should be substantial improvement in the quality of judicial decisionmaking with the reduced pressure afforded by a more current calendar. Producing faster, less expensive dispute resolutions should eliminate some of the protracted anxiety felt by many litigants. Faster litigation will enable litigants to end more quickly a traumatic incident and to plan their future with greater certainty, especially in personal injury cases. Factfinding accuracy will be immediately improved because dispute resolution will occur closer to the incident involved. Finally, the fairness of the settlement climate will be enhanced because high costs and court congestion would no longer be used as a bargaining tool. This consideration is of great importance in a civil justice system in which most cases are settled prior to trial.

Court-annexed arbitration also commends itself to the bar. It presents an opportunity to improve the public's image of the legal community. The success of court-annexed arbitration is largely made possible by the interest and energy of volunteer attorney arbitrators. Attorney action of this kind could make a positive impact on a public highly frustrated by the current congestion and cost of civil litigation.

Although S. 2253, as amended, proposes a compulsory program of arbitration, that program is not binding upon the litigants. The bill preserves the right of the parties to demand a full district court trial de novo in the event they are dissatisfied with the outcome of the arbitration proceeding. Where a trial de novo is demanded, the case is placed on the district court civil docket and treated in all respects as if it had never been referred to arbitration. Neither the fact of the arbitration proceeding nor the award may be admitted into evidence at the district court trial.

However, the use of testimony given at the arbitration hearing would not be precluded from use for impeachment purposes in a subsequent trial. This legislation originally contained a provision that used the taxing of court costs as a means of discouraging the parties from demanding a trial de novo. After extensive review of the constitutional and practical implications of such a provision, I am offering an amendment composed of technical corrections to remove from the bill all special restrictions on the demand for a trial de novo.

These amendments would provide that arbitration costs be assessed in the same manner as all other court costs with the understanding that if the district court finds that a demand for a trial de novo was made without good cause, the party making the demand shall in no event be awarded costs and may have costs assessed against him. The amendments do not represent a departure from the developed case law of court costs and do not substantially dilute the effectiveness of the arbitration program. Experience with arbitration indicates that most litigants will be satisfied with arbitration decisions and will not demand full district court trials; therefore, special cost provisions that serve as incentives to accept arbitration awards are not needed for the program to be effective.

During the 3 years that the statute is to be in force the Federal Judicial Center, in consultation with the Attorney General, is required to study the operation of the arbitration procedure. At the end of 2½ years the Center is required to file a report with the Congress evaluating the operation of arbitration in the test districts.

In summary, increased utilization of court-annexed arbitration would be a means of increasing public satisfaction with the administration of justice. While arbitration is not the only innovation capable of improving the administration of justice, it is a particularly desirable alternative because it is capable of attaining speed, economy, and fairness without requiring radical innovations in either substantive or procedural law. The

substantive law upon which arbitration decisions are based remains unchanged. Traditional trial procedures are retained in streamlined form; compulsory, nonbinding arbitration is not competitive with, but supplemental to, court procedure. It preserves the right to a trial de novo by jury and is ultimately subject to supervision by the courts. Court-annexed arbitration is a valid and viable alternative to conventional litigation. Its experimental use as proposed by the bill presents a little risk to litigants and provides the possibility of great improvements in our judicial system.●

Mr. ROBERT C. BYRD. Mr. President, the substitute proposed by the committee has been adopted, has it?

The ACTING PRESIDENT pro tempore. No, it has not been adopted.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the amendment in the nature of a substitute be agreed to and the bill, as thus amended, be considered as original text for the purpose of further amendment.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

UP AMENDMENT NO. 2095

(Purpose: To authorize the district court to establish rules providing for the inclusion of costs as part of an arbitration award, and to revise section 647 (b) relating to costs in cases in which a party demands a trial de novo. To make certain technical and conforming amendments)

Mr. ROBERT C. BYRD. Mr. President, I send to the desk an amendment to make technical amendments in the bill, and I ask for its immediate consideration.

The ACTING PRESIDENT pro tempore. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from West Virginia (Mr. ROBERT C. BYRD) proposes an unprinted amendment numbered 2095.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

The amendment is as follows:

On page 14, between lines 5 and 6, in the item relating to section 643, strike out "Compensation of arbitrators" and insert in lieu thereof "Arbitration fees and costs".

On page 14, line 10, strike out "641. Authorization of arbitration" and insert in lieu thereof "632. Certification of arbitrators".

On page 14, line 19, strike out "Compensation of arbitrators" and insert in lieu thereof "Arbitration fees and costs".

On page 14, line 20, strike out "provide" and insert in lieu thereof "establish and pay".

On page 15, between lines 5 and 6, insert the following new subsection:

"(c) The district court may establish by rule provisions for the inclusion of costs as provided in section 1920 as part of the arbitration award in section 646.".

On page 18, strike lines 20 through 25 and insert in lieu thereof the following:

"(d) Arbitrator's fees paid under subsection (a) of section 643 may be taxed pursuant to rule as costs in any district court judgment in which subsection (a) is invoked. In deciding upon such action, the court shall take into account whether the demand for a trial de novo was made with good cause. A good cause determination shall include a finding that the demand was not made for the purpose of unnecessarily prolonging the litigation.".

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the amendments be considered and agreed to en bloc.

The ACTING PRESIDENT pro tempore. Without objection, the amendment is considered and agreed to.

The bill is open to further amendment. If there be no further amendment to be proposed, the question is on the engrossment and the third reading of the bill.

The bill was ordered to be engrossed for a third reading, was read the third time, and passed, as amended, as follows:

S. 2253

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled.

That this Act may be cited as the "Court-Annexed Arbitration Act of 1978".

SEC. 2. (a) Title 28, United States Code, is amended by adding after chapter 43 the following new chapter:

"Chapter 44—ARBITRATION

"Sec.

"641. Authorization of arbitration.
"642. Certification of arbitrators.
"643. Arbitration fees and costs.
"644. Jurisdiction.
"645. Arbitration hearing.
"646. Arbitration award and judgment.
"647. Trial de novo.

"§ 641. Authorization of arbitration

"Each United States district court may authorize by rule the use of arbitration in accordance with the provisions of this chapter.

"§ 642. Certification of arbitrators

"(a) Each district court is authorized to certify arbitrators to perform services in accordance with this chapter. Each certification shall be entered on record in the certifying court.

"(b) An arbitrator is subject to the provisions of sections 202 through 209 of title 18, United States Code, that apply to a special Government employee of the executive branch. A person shall not be barred from the practice of law because he is an arbitrator.

"§ 643. Arbitration fees and costs

"(a) The district court shall establish and pay the amount of compensation, if any, that shall be paid to each arbitrator for his services for each case in which he serves.

"(b) Under regulations prescribed by the Director of the Administrative Office of the United States Courts, a district court may reimburse arbitrators for actual transportation expenses necessarily incurred by them in the performance of the duties under this chapter.

"(c) The district court may establish by rule provisions for the inclusion of costs as provided in section 1920 as part of the arbitration award in section 646.

"§ 644. Jurisdiction

"(a) Notwithstanding any provision of law to the contrary and except as provided in subsections (b) and (c) of this section, a district court that authorizes arbitration under section 641 shall refer to arbitration any civil action pending before it if—

"(1) the parties consent to arbitration; or

"(2)(A) the relief sought consists only of money damages not in excess of $100,000 or such lesser amount as the district court may set, exclusive of interest and costs;

"(B) jurisdiction is based in whole or in part on section 1331, 1332, 1333, 1345, or 1346 of this title, or section 2 of the Act of March 9, 1920, as amended (46 U.S.C. 742), or section 1 of the Act of March 3, 1925, as amended (46 U.S.C. 781); and

"(C) the action is based on a negotiable instrument or contract or is for personal injury or property damage.

"(b) No referral to arbitration under this chapter shall be made—

"(1) of an action based on an alleged violation of a right secured by the Constitution of the United States;

"(2) of an action in which relief is sought from any official or employee of the United States in his individual capacity for an act performed by such official or employee acting within the outer perimeter of his official duties, whether or not the action is also brought against such official or employee in his official capacity or the United States;

"(3) of an action by the United States—

"(A) to recover money or property illegally or improperly obtained by an employee or former employee of the United States or any agency thereof; or

"(B) based upon fraud; or

"(4) if jurisdiction is based in whole or in part on section 1343 of this title.

"(c) A district court may establish by rule procedures for excepting from arbitration, for good cause shown, individual cases that would otherwise be referred under subsection (a).

"§ 645. Arbitration hearing

"(a) Arbitrators to whom actions are referred under section 644 shall have within the territorial jurisdiction of the court the power to conduct arbitration hearings and make awards as provided in this chapter. The arbitrators shall have the power to administer oaths and affirmations.

"(b) The arbitration hearing shall begin within a time period specified by the district court, but in no event later than one hundred and fifty days from the filing of the answer or thirty days from the disposition of any motion to dismiss the complaint, motion for judgment on the pleadings, or motion for summary judgment, whichever is later.

"(c) Rule 45 of the Federal Rules of Civil Procedure, relating to subpoenas, applies to subpoenas for the attendance of witnesses and the production of documentary evidence at an arbitration hearing under this chapter.

"(d) An arbitrator may admit any evidence in an arbitration hearing which he considers relevant and trustworthy. The Federal Rules of Evidence may be used as a guide to the admissibility of evidence, except that evidence which is privileged under Rule 501 of the Federal Rules of Evidence shall not be admissible.

"§ 646. Arbitration award and judgment

"The arbitration award shall be filed with the clerk of the district court promptly after the hearing is concluded, and shall be entered as the judgment of the court after the time has expired for requesting a trial de novo pursuant to section 647 unless a party demands a trial de novo pursuant to that section. The judgment so entered shall be subject to the same provisions of law and shall have the same force and effect as a judgment of the court in a civil action, except that it shall not be subject to appeal.

"§ 647. Trial de novo

"(a) Within thirty days after the filing of the arbitration award with the court, any party may demand a trial de novo in the district court.

"(b) Upon a demand for a trial de novo, the action shall be restored to the docket of the court and treated for all purposes as if it had not been referred to arbitration, and any right of trial by jury that a party otherwise would have had is preserved.

"(c) Unless the parties have otherwise stipulated, the court shall not admit at the trial de novo any evidence that there has been an arbitration proceeding, the nature or amount of any award, or any other matter concerning the conduct of the arbitration proceeding, except that testimony given at

the arbitration hearing may be used for purposes of impeachment.

"(d) Arbitrator's fees paid under subsection (2) of section 643 may be taxed pursuant to rule as costs in any district court judgement in which subsection (a) is invoked. In deciding upon such action, the court shall take into account whether the demand for a trial de novo was made with good cause. A good cause determination shall include a finding that the demand was not made for the purpose of unnecessarily prolonging the litigation.".

(b) The table of chapters for title 28, United States Code, and for part III of title 28, United States Code, are each amended by inserting after the item relating to chapter 43 the following new item:

"44. Arbitration ---------- 641".

SEC. 3. (a) Arbitration in accordance with chapter 44 of title 28, United States Code, as added by section 2 of this Act, shall be implemented on a test basis for a period of three years from the date of enactment of this Act in no fewer than five nor more than eight representative districts to be designated by the Chief Justice of the United States, after consultation with the Attorney General. Before designaing the representative districts, the Chief Justice shall consult the regular active judges in each district under consideration and no district shall be so designated if a majority of the regular active judges in that district request that it not be so designated.

(b) The Federal Judicial Center, in consultation with the Attorney General and the Administrative Office of the United States Courts, shall transmit to the Congress, two years and six months from the date of enactment of this Act, a report on the use, effectiveness, and benefits of arbitration in the test district courts and such other districts in which cases are referred to arbitration.

SEC. 4. There is authorized to be appropriated for the fiscal year ending September 30, 1979, to the judicial branch such sums as may be necessary to be allocated by the Administrative Office of the United States Courts to Federal judicial districts and the Federal Judicial Center to carry out the purposes of this Act. The funds so appropriated shall remain available until expended, except that no such funds shall be expended for the arbitration of actions referred to arbitration subsequent to the date of repeal set forth in section 5 of this Act.

SEC. 5. Effective three years from the date of enactment of this Act, chapter 44 of title 28, United States Code, as added by section 2 of this Act, is repealed except that the provisions of that chapter shall continue to apply through final disposition of all actions in which referral to arbitration was made before the date of repeal.

SEC. 6. This Act shall take effect sixty days after the date of enactment.

Passed the Senate October 13 (legislative day, October 11), 1978.

Mr. ROBERT C. BYRD. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. BAKER. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the Secretary of the Senate be authorized to make technical and clerical corrections in the engrossment of S. 2253, as amended.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent to have printed in the RECORD an excerpt from the report (No. 95–1103), explaining the purposes of the measure.

There being no objection, the excerpt was ordered to be printed in the RECORD, as follows:

PURPOSE OF THE AMENDMENT

The amendment is in the nature of a substitute and its purpose is to incorporate several changes in the bill which the committee feels are necessary. Since the committee amendment is in the nature of a substitute, the perfecting changes made in the language of the bill as originally introduced will be explained in detail in the body of the report and in the sectional analysis.

PURPOSE OF THE BILL AS AMENDED

The purpose of the proposed legislation is to establish, on a 3-year experimental basis, compulsory, nonbinding arbitration as an alternative to conventional litigation in specified classes of civil action. This is done in an effort to reduce the costs associated with such litigation and to otherwise expedite the judicial process. The bill also provides guidelines by which U.S. district courts may direct arbitration proceedings held within their jurisdictions.

PRINTING OF PRAYERS OF REV. EDWARD GARDINER LATCH

Mr. ROBERT C. BYRD. Mr. President, I ask the Chair to lay before the Senate a message from the House on House Concurrent Resolution 742.

The PRESIDING OFFICER. The Chair lays before the Senate House Concurrent Resolution 742, which will be stated.

The assistant legislative clerk read as follows:

H. Con. Res. 742, providing for the printing of prayers offered by Reverend Edward Gardiner Latch during the Ninety-fourth and Ninety-fifth Congresses.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the Senate proceed to the consideration of the concurrent resolution.

The ACTING PRESIDENT pro tempore. Is there objection?

There being no objection, the Senate proceeded to consider the concurrent resolution.

The concurrent resolution (H. Con. Res. 742) was agreed to.

Mr. ROBERT C. BYRD. Mr. President, I move to reconsider the vote by which the concurrent resolution was agreed to.

Mr. BAKER. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

SERVICES FOR DRUG DEPENDENT OFFENDERS

Mr. ROBERT C. BYRD. Mr. President, I ask that the Chair lay before the Senate a message from the House of Representatives on S. 3336.

The PRESIDING OFFICER laid before the Senate the following message from the House of Representatives:

Resolved, That the bill from the Senate (S. 3336) entitled "An Act to enable the Department of Justice and the Administrative Office of the United States Courts to provide services and special supervision to drug dependent Federal offenders in an efficient and effective manner", do pass with the following amendments:

1. Page 2, lines 14 and 15, strike out "$4,006,000", and insert: $3,500,000

2. Page 2, line 16, strike out "$4,246,000", and insert: $3,645,000

3. Page 2, line 17, strike out "$4,501,140", and insert: $3,750,000

● PAUL G. HATFIELD. Mr. President, this amended bill represents a fair and workable compromise. As originally introduced by me, together with the other members of the Subcommittee on Penitentiaries and Corrections, the Senators from Arizona (Mr. DECONCINI) and Maryland (Mr. MATHIAS), S. 3336 was a bill recommended by the Department of Justice. Briefly, it would improve the quality and delivery of drug aftercare services to drug-dependent Federal probationers and parolees by transfering the contracting, monitoring and supervisory services for such programs from the Federal Bureau of Prisons to the Division of Probation through the Administrative Office of the U.S. Courts. As I stated upon introduction of the bill, substantial savings to the taxpayers will result upon this bill's enactment, since the Probation Division is much better equipped—particularly in terms of staff available—to perform this statutory function than is the Bureau. I remind my colleagues that the transfer for which funds are authorized for 3 fiscal years is already in existence by virtue of enabling legislation, that this legislation will not take effect until fiscal year 1980, and that its enactment will not affect or prejudice in any way proposed amendments to the Narcotics Addict Rehabilitation Act of 1966, as amended.

As reported from the Senate Judiciary Committee and passed by this body August 17, S. 3336 would have authorized the sums of $4,006,000, $4,246,360, and $4,501,140, for fiscal years 1980, 1981, and 1982, respectively. As originally marked up by the Subcommittee on Administrative Law and Governmental Relations of the House Judiciary Committee earlier this year, an equivalent measure would have authorized only $3,000,000 for each of those years. Under the leadership of Congressman GEORGE DANIELSON, the chairman of the subcommittee, and with the cooperation of Congressman PETER RODINO, the chairman of the full committee in the other body, we were able to reach an agreement which we believe to be mutually satisfactory. The Members of the House were able to persuade us that the program transfer could be authorized at lower figures—namely, $3,500,000 for 1980, $3,645,000 for fiscal 1981, and $3.750,000 for fiscal 1982—without prejudicing the program. Similarly, they conceded that the objectives of drug aftercare would be better served by the inclusion of a waiver of bidding procedures in letting counseling and urine surveillance contracts, as provided in the Senate-passed bill. It is our opinion that the resulting compromise is a beneficial one. A technical amendment was added on the House floor to assure that congressional action on the bill now for a future fiscal year, in relation to an existing program, would not violate the provisions of the Congressional Budget and Impoundment Control Act of 1974 and congressional budget procedures.

Mr. President, in addition to my gratitude to Senators DECONCINI and MATHIAS and Tim McPike and Ralph Oman of

their respective staffs, I would like to extend my appreciation to Bill Shattuck, Alan Coffey and Jim Lauer of the House subcommittee staff for their assistance in making this compromise possible.●

Mr. President, I move that the Senate concur in the House amendments en bloc.

The ACTING PRESIDENT pro tempore. The question is on agreeing to the motion of the Senator from West Virginia.

The motion was agreed to.

Mr. ROBERT C. BYRD. Mr. President, I move to reconsider the vote by which the House amendments were concurred in en bloc.

Mr. BAKER. I move to lay that motion on the table.

Mr. BAKER. Mr. President, I see the Senator from Hawaii is still on the floor. I take this moment to say we have been able to clear the matter inquired of earlier, so we have no objection to proceeding with its consideration.

Mr. MATSUNAGA. I thank the Senator from Tennessee.

MAILING OF LOTTERY MATERIAL

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the Judiciary Committee be discharged from further consideration of H.R. 11580, an act to provide for the sale of lottery equipment to foreign countries in which lotteries are legal, and that the Senate proceed to its immediate consideration.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

The clerk will state the bill by title.

The assistant legislative clerk read as follows:

A bill (H.R. 11580) to amend title 18 of the United States Code to make lawful certain activities concerning certain foreign and domestic legal lotteries.

The bill was considered, read the third time, and passed.

Mr. ROBERT C. BYRD. Mr. President, I move to reconsider the vote by which the bill passed.

Mr. BAKER. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

CONVEYANCE OF CERTAIN LANDS TO THE UNIVERSITY OF NEW MEXICO

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the Senate proceed to the consideration of Calendar Order No. 1216, S. 1403.

Mr. BAKER. Mr. President, reserving the right to object for just one moment.

Mr. ROBERT C. BYRD. It conveys lands to the University of New Mexico.

Mr. BAKER. We have no objection.

The Senate proceeded to consider the bill which had been reported from the Committee on Energy and Natural Resources with amendments as follows:

On page 2, beginning with line 6, strike through and including line 16, and insert in lieu thereof the following:

SEC. 2. Conveyance under this Act shall be made only (a) upon the University of New Mexico providing satisfactory assurances to the Secretary that no valid mining claims exist on the described lands, other than the patented mining claims of Doctor Arthur Montgomery; and (b) upon the condition that the described land shall be held and used by the University of New Mexico and shall not be conveyed by the university, and the minerals thereunder shall not be mined and sold in commercial quantities: *Provided*, That if the Secretary of the Interior determines that mining of the minerals contained in the described lands is necessary for the security of the United States, the University of New Mexico shall lease the lands for mining to such person as may be designated by the Secretary under the terms of a lease to be prepared by the Secretary, with any royalties to be paid to the United States. The patent conveying the lands to the University of New Mexico shall contain such provision.

On page 3, line 16, beginning with the comma, strike through and including the comma at the beginning of line 17, after "Montgomery";

So as to make the bill read:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That subject to the conditions and limitations specified in this Act, the Secretary of the Interior (hereinafter referred to as the "Secretary") is authorized and directed to convey to the University of New Mexico all right, title, and interest of the United States in the following described land comprising approximately one hundred and ten acres:

Southeast quarter of the southwest quarter; south half of the northeast quarter of the southwest quarter; southwest quarter of the southeast quarter; and the southwest quarter of the northwest quarter of the southeast quarter, section 29, township 23 north, range 11 east, New Mexico principal meridian.

SEC. 2. Conveyance under this Act shall be made only (a) upon the University of New Mexico providing satisfactory assurances to the Secretary that no valid mining claims exist on the described lands, other than the patented mining claims of Doctor Arthur Montgomery; and (b) upon the condition that the described land shall be held and used by the University of New Mexico and shall not be conveyed by the university, and the minerals thereunder shall not be mined and sold in commercial quantities: *Provided*, That if the Secretary of the Interior determines that mining of the minerals contained in the described lands is necessary for the security of the United States, the University of New Mexico shall lease the lands for mining to such person as may be designated by the Secretary under the terms of a lease to be prepared by the Secretary, with any royalties to be paid to the United States. The patent conveying the lands to the University of New Mexico shall contain such provision.

SEC. 3. No conveyance shall be made unless application for conveyance is filed by the university with the Secretary within six months of the date of approval of this Act.

SEC. 4. The Secretary may in his direction require that he be furnished a perimeter survey of the described lands. All costs of obtaining such survey and any costs of supplying the Secretary with the proof that no valid unpatented mining claims, with the exception of those held by Doctor Montgomery, exist on the property, shall be borne by the university.

SEC. 5. No conveyance shall be made under this Act until the university has shown to the satisfaction of the Secretary that all right, title, and interest of Doctor Arthur Montgomery to unpatented mining claims and the existing patented mining claim in the above described lands have been conveyed to the University of New Mexico.

Mr. ROBERT C. BYRD. I ask unanimous consent that the committee amendments be agreed to en bloc.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

The committee amendments were agreed to en bloc.

UP AMENDMENT 2096

Mr. BAKER. Mr. President, I send an amendment by the distinguished Senator from New Mexico (Mr. DOMENICI) to the desk and ask that it be stated.

The ACTING PRESIDENT pro tempore. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Tennessee (Mr. BAKER) for the Senator from New Mexico (Mr. DOMENICI) proposes an unprinted amendment numbered 2096.

On page 1, line 5, after the word "convey" insert the phrase "at fair market value".

The amendment was agreed to.

Mr. BAKER. I move to reconsider the vote by which the amendment was agreed to.

Mr. ROBERT C. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

Mr. ROBERT C. BYRD. Mr. President, I move to reconsider the vote by which the amendment was passed.

Mr. BAKER. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent to have printed in the RECORD an excerpt from the report (No. 95-7301), explaining the purposes of the measure.

There being no objection, the excerpt was ordered to be printed in the RECORD, as follows:

I. PURPOSE

The purpose of S. 1403, as reported by the committee, is to provide for the conveyance of certain lands near Dixon, New Mexico, to the University of New Mexico.

II. BACKGROUND AND NEED

S. 1403 directs the Secretary of the Interior to convey all right, title and interest of the United States in certain lands to the University of New Mexico, subject to certain conditions and limitations. The lands described in the bill comprise about 110 acres.

The 110 acres involved consist of a 20.66 acre patented mining claim held by Dr. Arthur Montgomery and several unpatented mining claims held by Dr. Montgomery. Dr. Montgomery is willing to donate his interest in these claims to the University for geologic studies if the University is able to obtain fee title to lands covered by the unpatented claims. All of the land covered by the unpatented claims may be subject to conflicting claims.

The area that would be conveyed contains lithium, beryllium, columbium, and tantalum. Although these deposits may not now be generally considered commercial, they are a potential source of these scarce and strategic materials and may be commercial at a later date. These lands are also used for grazing, hunting and some recreation, including rockhounding.

Although Dr. Montgomery could convey his 20.66 patented mining claim without the need for legislation, he and the university believe that it is essential that the entire 110 acres be under the jurisdiction of the University and not separated as to ownership. This is because the claims on the 110 acres are considered to be an integral part of the

Harding Pegmatite Mine and its uniquely interesting geological and mineralogical features.

NATIONWIDE SERVICE OF SUBPENAS

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the Committee on the Judiciary be discharged from further consideration of H.R. 12393, an act to provide for a nationwide service of subpenas in cases under the False Claims Act, and that the Senate proceed to its immediate consideration.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered. The bill will be stated by title.

The assistant legislative clerk read as follows:

A bill (H.R. 12393), an act to provide for a nationwide service of subpoenas under the False Claims Act, and for other purposes.

The Senate proceeded to consider the bill.

UP AMENDMENT 2097

(Purpose: To provide for the seizure and forfeiture of vehicles used to illegally transport persons into the United States)

Mr. ROBERT C. BYRD. On behalf of the distinguished Senator from Arizona, who now presides over the Senate, I send an amendment to the desk and ask that it be stated by the clerk.

The ACTING PRESIDENT pro tempore. The clerk will state the amendment.

The assistant legislative clerk read as follows:

The Senator from West Virginia (Mr. ROBERT C. BYRD), for Mr. DECONCINI, proposes an unprinted amendment numbered 2097:

On page 1, line 10, insert the following:

SEC. 2. Section 274 of the Immigration and Nationality Act (8 U.S.C. 1324) is amended by redesignating subsection (b) as subsection (c) and adding a new subsection (b) as follows:

"(b)(1) Any vessel, vehicle, or aircraft which is used in the commission of a violation of subsection (a) shall be subject to seizure and forfeiture, except when—

"(A) the owner, master, or other person in charge of such vessel, vehicle, or aircraft, was not, at the time of the alleged illegal act, a consenting party or privy thereto; or

"(B) the alleged illegal act occurred while such vessel, vehicle, or aircraft was in the illegal possession of any person other than the owner, as established by the criminal laws of the United States, or of any States.

"(2) The Attorney General shall, within one hundred and eighty days from the date of enactment of this Act, promulgate regulations setting forth procedures for the expeditious return to the owner, master, or other person in charge of any vessel, vehicle, or aircraft seized in violation of paragraph (1). In any such case, the owner, master, or other person in charge of such vessel, vehicle, or aircraft shall not incur any expenses, including costs of transportation, storage, damage, and attorney fees, associated with such seizure and forfeiture.

In the case of a vehicle seized and forfeited pursuant to paragraph (1) subject to a valid lien or other third-party interest, the regulations shall provide for satisfaction of the third party interest without expense to the interestholder.

"(3) Any conveyance subject to seizure under this section may be seized without a warrant if there is probable cause to believe the conveyance has been used in violation of subsection (a) and circumstances exist where a warrant is not constitutionally required.

"(4) All provisions of law relating to the seizure, forfeiture, and disposition of vessels, vehicles, and aircraft for violations of customs law shall apply to violations of the provisions of this chapter: *Provided*, That—

"(A) duties imposed on customs officers or other persons regarding the seizure of such conveyances under customs law shall apply to seizures carried out under the provisions of this section by such officers or persons authorized for that purpose by the Attorney General; and

"(B) proceedings instituted under this subsection respecting vessels shall be subject to the Supplemental Rules of Certain Admiralty and Maritime Claims.".

The ACTING PRESIDENT pro tempore. The question is on agreeing to the amendment.

The amendment was agreed to.

The bill was ordered to a third reading, read the third time, and passed.

Mr. ROBERT C. BYRD. Mr. President, I move to reconsider the vote by which the amendment was passed.

Mr. BAKER. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

RECRUITMENT AND RETENTION OF CERTAIN PHYSICIANS

Mr. ROBERT C. BYRD. Mr. President, I ask that the Chair lay before the Senate a message from the House of Representatives on S. 990.

The PRESIDING OFFICER laid before the Senate the following message from the House of Representatives:

Resolved, That the bill from the Senate (S. 990) entitled "An Act to amend title 5, United States Code, to provide special allowances to certain physicians employed by the United States in order to enhance the recruitment and retention of such physicians", do pass with the following amendments:

1. Page 4, line 14, strike out "physician, dentist, or veterinarian" and insert: physician

2. Page 5, line 5, strike out "or".

3. Page 5, line 8, strike out "and", and insert: or

4. Page 5, after line 8, insert:

"(G) section 2 of the Act of May 29, 1959 (Public Law 86–36, as amended, 50 U.S.C. 402 note), relating to the National Security Agency; and

5. Page 6, after line 10, insert:

SEC. 3. The amendments made by this Act are repealed, unless specifically extended by Act of Congress, effective on September 30, 1981.

6. Page 6, strike out line 11 and all that follows over to and including line 20, page 7.

Mr. ROBERT C. BYRD. I move that the Senate concur in the House amendments en bloc.

The motion was agreed to.

REGIONAL RAIL REORGANIZATION ACT AMENDMENTS

Mr. ROBERT C. BYRD. Mr. President, I ask that the Chair lay before the Senate a message from the House of Representatives on H.R. 5646.

The ACTING PRESIDENT pro tempore laid before the Senate the following message from the House of Representatives:

Resolved, That the House agree to the amendment of the Senate to the bill (H.R. 5646) entitled "An Act to amend the Regional Rail Reorganization Act of 1973 to require ConRail to make premium payments under certain medical and life insurance policies, to provide that ConRail shall be entitled to a loan under section 211(h) of such Act in an amount required for such premium payments, and to provide that such premium payments shall be deemed to be expenses of administration of the respective railroads in reorganization", with the following amendments:

In lieu of the matter stricken and inserted by the said amendment insert:

1. Page 3, line 11, strike out all after "graph." down to and including "of" the second time it appears in line 14, and insert: For purposes of section 211(h)(4)(A)(iii), amounts required for the payment of such premiums and benefits shall be deemed to be valid administrative claims against

2. Page 4 of the House engrossed bill, after line 5, insert:

SEC. 2. The conferring of administrative claim status on amounts paid for the insurance premiums and benefits described in the amendment made by the first section of this Act shall be effective solely for purposes of meeting the conditions set forth in section 211(h)(4)(A)(iii) of the Regional Rail Reorganization Act of 1973 with respect to which obligations of the estate of a railroad in reorganization may be paid pursuant to such section 211(h), and shall not be construed—

(1) as affecting the jurisdiction of the district court having jurisdiction over such a railroad in reorganization to determine whether such insurance premiums and benefits constitute enforceable contractual obligations of the estate of such a railroad for purposes of reimbursement under such section 211(h); or

(2) as establishing or reordering and priority which a claim against the estate of such a railroad for reimbursement for the amounts paid for such insurance premiums and benefits may or may not have under the provisions of the Bankruptcy Act or any other law.

SEC. 3. Notwithstanding any other provision of law, any corporation which, pursuant to a plan of reorganization under section 77 of the Bankruptcy Act, is the successor in interest to a railroad in reorganization shall have standing to assert, in any judicial or administrative proceeding, any claim or defense available to such railroad in reorganization with respect to whether the insurance benefits and premiums described in the amendment made by the first section of this Act constitute enforceable contractual obligations of the estate of such railroad in reorganization. For purposes of this section, the term "railroad in reorganization" has the meaning given such term in paragraph (14) of section 102 of the Regional Rail Reorganization Act of 1973.

Mr. ROBERT C. BYRD. Mr. President, I ask that the Senate concur in the House amendments to the Senate amendments en bloc.

The PRESIDING OFFICER. Without objection, it is so ordered.

NAVAJO AND HOPI INDIAN RELOCATION COMMISSION AMENDMENTS OF 1978

Mr. ROBERT C. BYRD. Mr. President, I ask that the Chair lay before the Senate a message from the House of Representatives on H.R. 11092.

The PRESIDING OFFICER laid before the Senate the following message from the House of Representatives:

Resolved, That the House agree to the amendment of the Senate to the text of the bill (H.R. 11092) entitled "An Act to increase the authorization of appropriations under the Act of December 22, 1974 (88 Stat. 1972)", with the following amendment:

In lieu of the matter proposed to be inserted by the said amendment, insert:

That this Act may be cited as the "Navajo and Hopi Indian Relocation Commission Amendments of 1978".

SEC. 2. Section 12(b) of the Act of December 22, 1974 (88 Stat. 1712, 1716) is amended by inserting before the period at the end of the sentence the following: ": *Provided*, That effective March 1, 1979, no person who is serving in an elected Federal, State, or local public office shall be eligible to serve or continue to serve as a member of the Commission".

SEC. 3. The first sentence of section 12(e) of the Act of December 22, 1974 (88 Stat. 1712, 1717) is amended by inserting before the period at the end thereof the following: ": *Provided*, That effective November 1, 1978, no such member shall be paid more than $28,000 during any fiscal year".

SEC. 4. Section 13(c)(5) is amended to read as follows:

"(5) take effect ninety days (excluding Saturdays, Sundays, and holidays, and any day on which either House is not in session) after the date of submission to the Congress pursuant to subsection (a) of this section, unless during such ninety day period one House of the Congress adopts a resolution disapproving such plan: *Provided, however*, That the Commission is authorized and directed to proceed with voluntary relocation as promptly as practicable following its first meeting.".

SEC. 5. Section 25(a)(5) of the Act of December 22, 1974 (1712, 1723) is amended by striking out "$500,000" and inserting in lieu thereof "$1,000,000".

Resolved, That the House agree to the amendment of the Senate to the title of the bill.

Mr. ROBERT C. BYRD. I ask unanimous consent that the Senate concur in the House amendment to the Senate amendment.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

WITNESS FEES AND EXPENSES

Mr. ROBERT C. BYRD. Mr. President, I ask that the Chair lay before the Senate a message from the House of Representatives on S. 2049.

The PRESIDING OFFICER laid before the Senate the following message from the House of Representatives:

Resolved, That the bill from the Senate (S. 2049) entitled "An Act to establish fees and allow per diem and mileage expenses for witnesses before United States courts", do pass with the following amendment:

Strike out all after the enacting clause, and insert:

That section 1821 of title 28, United States Code, is amended to read as follows:

"§ 1821. Per diem and mileage generally; subsistence

"(a)(1) Except as otherwise provided by law, a witness in attendance at any court of the United States, or before a United States Magistrate, or before any person authorized to take his deposition pursuant to any rule or order of a court of the United States, shall be paid the fees and allowances provided by this section.

"(2) As used in this section, the term 'court of the United States' includes, in addition to the courts listed in section 451 of this title, any court created by Act of Congress in a territory which is invested with any jurisdiction of a district court of the United States.

"(b) A witness shall be paid an attendance fee of $30 per day for each day's attendance. A witness shall also be paid the attendance fee for the time necessarily occupied in going to and returning from the place of attendance at the beginning and end of such attendance or at any time during such attendance.

"(c)(1) A witness who travels by common carrier shall be paid for the actual expenses of travel on the basis of the means of transportation reasonably utilized and the distance necessarily traveled to and from such witness's residence by the shortest practical route in going to and returning from the place of attendance. Such a witness shall utilize a common carrier at the most economical rate reasonably available. A receipt or other evidence of actual cost shall be furnished.

"(2) A travel allowance equal to the mileage allowance which the Administrator of General Services has prescribed, pursuant to section 5704 of title 5, for official travel of employees of the Federal Government shall be paid to each witness who travels by privately owned vehicle. Computation of mileage under this paragraph shall be made on the basis of a uniformed table of distances adopted by the Administrator of General Services.

"(3) Toll charges for toll roads, bridges, tunnels, and ferries, taxicab fares between places of lodging and carrier terminals, and parking fees (upon presentation of a valid parking receipt), shall be paid in full to a witness incurring such expenses.

"(4) All normal travel expenses within and outside the judicial district shall be taxable as costs pursuant to section 1920 of this title.

"(d)(1) A subsistence allowance shall be paid to a witness (other than a witness who is incarcerated) when an overnight stay is required at the place of attendance because such place is so far removed from the residence of such witness as to prohibit return thereto from day to day.

"(2) A subsistence allowance for a witness shall be paid in an amount not to exceed the maximum per diem allowance prescribed by the Administrator of General Services, pursuant to section 5702(a) of title 5, for official travel in the area of attendance by employees of the Federal Government.

"(3) A subsistence allowance for a witness attending in an area designated by the Administrator of General Services as a high-cost area shall be paid in an amount not to exceed the maximum actual subsistence allowance prescribed by the Administrator, pursuant to section 5702(c)(B) of title 5, for official travel in such area by employees of the Federal Government.

"(4) When a witness is detained pursuant to section 3149 of title 18 for want of security for his appearance, he shall be entitled for each day of detention when not in attendance at court, in addition to his subsistence, to the daily attendance fee provided by subsection (b) of this section.

"(e) An alien who has been paroled into the United States for prosecution, pursuant to section 212(d)(5) of the Immigration and Nationality Act (8 U.S.C. 1182(d)(5)), or an alien who either has admitted belonging to a class of aliens who are deportable or has been determined pursuant to section 242(b) of such Act (8 U.S.C. 1252(b)) to be deportable, shall be ineligible to receive the fees or allowances provided by this section.".

SEC. 2. The amendments made by this Act shall take effect on October 1, 1978, or on the date of enactment, whichever occurs later.

● Mr. DECONCINI. Mr. President, S. 2049, which was passed by the Senate on April 27, 1978, is an act to establish fees and allow per diem and mileage expenses for witnesses before U.S. courts.

Aside from changes of style or changes which are inconsequential there are four differences between S. 2049 as recently passed by the House and S. 2049 as passed by the Senate. First, under the Senate version a witness who uses a common carrier must travel at "the most economical rate available" to receive a travel allowance, while under the House version a witness need only travel at "the most economical rate reasonably available." Second, under the Senate version a witness would receive reimbursement for "incidental travel expenses," while under the House version a witness only receives reimbursement for a specified list of expenses, such as charges for toll bridges and taxicab fares. Third, the House version does not contain language that would authorize the Government to reimburse a witness for the use of a snowmobile, dog team, or boat in the District of Alaska. However, such language has been incorporated into the report that accompanies S. 2049 as passed by the House of Representatives. Fourth, the Senate version requires that subsistence allowances for a witness must equal the subsistence allowances that the Administrator of General Services fixes for Federal employees who travel in areas which are similar to the areas that are traveled in by the witness. The House version, however, only states that the witness allowances are "not to exceed" the allowances of the Federal employees.●

Mr. ROBERT C. BYRD. I ask unanimous consent that the Senate concur in the amendment.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

JURY SYSTEM IMPROVEMENTS ACT OF 1978

Mr. ROBERT C. BYRD. Mr. President, I ask that the Chair lay before the Senate a message from the House of Representatives on S. 2075.

The ACTING PRESIDENT pro tempore laid before the Senate the following message from the House of Representatives:

Resolved, That the bill from the Senate (S. 2075) entitled "An Act to amend the Jury Selection and Service Act of 1968, as amended, by revising the section on fees of jurors and by providing for a civil penalty and injunctive relief in the event of a discharge or threatened discharge of an employee by reason of such employee's Federal jury service", do pass with the following amendment:

Strike out all after the enacting clause, and insert:

SHORT TITLE

SECTION 1. This Act may be cited as the "Jury System Improvements Act of 1978".

EXCUSE FROM JURY SERVICE

SEC. 2. (a) Section 1863(b) of title 28, United States Code, is amended—

(1) by striking out paragraph (7); and

(2) by redesignating paragraphs (8) and (9), and all references thereto, as paragraphs (7) and (8), respectively.

(b) Section 1866(c) of title 28, United States Code, is amended by striking out "paragraph (5), (6), or (7)" and inserting in lieu thereof "paragraph (5) or (6)".

JURY SERVICE UPON RESTORATION OF CIVIL RIGHTS

SEC. 3. (a) Section 1865(b)(5) of title 28, United States Code, is amened by striking out "by pardon or amnesty".

(b) Section 1869(h) of title 28, United States Code, is amended by striking out "by pardon or amnesty."

DEFINITIONS

SEC. 4. Section 1869 of title 28, United States Code, is amended—

(1) by striking out the period at the end

of subsection (i) and inserting in lieu thereof a semicolon; and

(2) by adding at the end thereof the following new subsections:

"(j) 'undue hardship or extreme inconvenience', as a basis for excuse from immediate jury service under section 1866(c)(1) of this chapter, shall mean great distance, either in miles or traveltime, from the place of holding court, grave illness in the family or any other emergency which outweighs in immediacy and urgency the obligation to serve as a juror when summoned, or any other factor which the court determines to constitute an undue hardship or to create an extreme inconvenience to the juror; and in addition, in situations where it is anticipated that a trial or grand jury proceeding may require more than thirty days of service, the court may consider, as a further basis for temporary excuse, severe economic hardship to an employer which would result from the absence of a key employee during the period of such service;

"(K) 'publicly draw', as referred to in sections 1864 and 1866 of this chapter, shall mean a drawing which is conducted within the district after reasonable public notice and which is open to the public at large under the supervision of the clerk or jury commission, except that when a drawing is made by means of electronic data processing, 'publicly draw' shall mean a drawing which is conducted at a data processing center located in or out of the district, after reasonable public notice given in the district for which juror names are being drawn, and which is open to the public at large under such supervision of the clerk or jury commission as the Judicial Conference of the United States shall be regulation require; and

"(l) 'jury summons' shall means a summons issued by a clerk of court, jury commission, or their duly designated deputies, containing either a preprinted or stamped seal of court, and containing the name of the issuing clerk imprinted in preprinted, type, or facsimile manner on the summons or the envelopes transmitting the summons.".

FEES OF JURORS

SEC. 5. Section 1871 of title 28, United States Code, is amended to read as follows:

"§ 21871. Fees

"(a) Grand and petit jurors in district courts appearing pursuant to this chapter shall be paid the fees and allowances provided by this section. The requisite fees and allowances shall be disbursed on the certificate of the clerk of court in accordance with the procedure established by the Director of the Administrative Office of the United States Courts. Attendance fees for extended service under subsection (b) of this section shall be certified by the clerk only upon the order of a district judge.

"(b)(1) A juror shall be paid an attendance fee of $30 per day for actual attendance at the place of trial or hearing. A juror shall also be paid the attendance fee for the time necessarily occupied in going to and returning from such place at the beginning and end of such service or at any time during such service.

"(2) A petit juror required to attend more than thirty days in hearing one case may be paid, in the discretion of the trial judge, an additional fee, not exceeding $5 more than the attendance fee, for each day in excess of thirty days on which he is required to hear such case.

"(3) A grand juror required to attend more than forty-five days of actual service may be paid, in the discretion of the district judge in charge of the particular grand jury, an additional fee, not exceeding $5 more than the attendance fee, for each day in excess of forty-five days of actual service.

"(4) A grand or petit juror required to attend more than ten days of actual service may be paid, in the discretion of the judge, the appropriate fees at the end of the first ten days and at the end of every ten days of service thereafter.

"(5) Certification of additional attendance fees may be ordered by the judge to be made effective commencing on the first day of extended service, without reference to the date of such certification.

"(c)(1) A travel allowance not to exceed the maximum rate per mile that the Director of the Administrative Office of the United States Courts has prescribed pursuant to section 604(a)(7) of this title for payment to supporting court personnel in travel status using privately owned automobiles shall be paid to each juror, regardless of the mode of transportation actually employed. The prescribed rate shall be paid for the distance necessarily traveled to and from a juror's residence by the shortest practical route in going to and returning from the place of service. Actual mileage in full at the prescribed rate is payable at the beginning and at the end of a juror's term of service.

"(2) The Director shall promulgate rules regulating interim travel allowances to jurors. Distances traveled to and from court should coincide with the shortest practical route.

"(3) Toll charges for toll roads, bridges, tunnels, and ferries shall be paid in full to the juror incurring such charges. In the discretion of the court, reasonable parking fees may be paid to the juror incurring such fees upon presentation of a valid parking receipt. Parking fees shall not be included in any tabulation of mileage and allowances.

"(4) Any juror who travels to district court pursuant to summons in an area outside of the contiguous forty-eight States of the States of the United States shall be paid the travel expenses provided under this section, or actual reasonable transportation expenses subject to the discretion of the district judge or clerk of court as circumstances indicate, exercising due regard for the mode of transportation, the availability of alternative modes, and the shortest practical route between residence and court.

"(d)(1) A subsistence allowance covering meals and lodging of jurors shall be established from time to time by the Director of the Administrative Office of the United States Court pursuant to section 604(a)(7) of this title, except that such allowance shall not exceed the allowance for supporting court personnel in travel status in the same geographical area. Claims for such allowance shall not require itemization.

"(2) A subsistence allowance shall be paid to a juror when an overnight stay is required at the place of holding court, and for the time necessarily spent in traveling to and from the place of attendance if an overnight stay is required.

"(3) A subsistence allowance for jurors serving in district courts outside of the contiguous forty-eight States of the United States shall be allowed at a rate not to exceed that per diem allowance which is paid to supporting court personnel in travel status in those areas where the Director of the Administrative Office of the United States Courts has prescribed an increased per diem fee pursuant to section 604(a)(7) of this title.

"(e) During any period in which a jury is ordered to be kept together and not to separate, the actual cost of subsistence shall be paid upon the order of the court in lieu of the subsistence allowances payable under subsection (d) of this section. Such allowance for the jurors ordered to be kept separate or sequestered shall include the cost of meals, lodging, and other expenditures ordered in the discretion of the court for their convenience and comfort.

"(f) A juror who must necessarily use public transportation in traveling to and from court, the full cost of which is not met by the transportation expenses allowable under subsection (c) of this section on account of the short distance traveled in miles, may be paid, in the discretion of the court, the actual reasonable expense of such public transportation, pursuant to the methods of payment provided by this section. Jurors who are required to remain at the court beyond the normal business closing hour for deliberation or for any other reason may be transported to their homes, or to temporary lodgings where such lodgings are ordered by the court, in a manner directed by the clerk and paid from funds authorized under this section.

"(g) The Director of the Administrative Office of the United States Courts shall promulgate such regulations as may be necessary to carry out his authority under this section.".

PROTECTION OF JURORS' EMPLOYMENT

SEC. 6. (a)(1) Chapter 121 of title 28, United States Code, is amended by adding at the end thereof the following new section:

"§ 1875. Protection of jurors' employment

"(a) No employer shall discharge, threaten to discharge, intimidate, or coerce any permanent employee by reason of such employee's jury service, or the attendance or scheduled attendance in connection with such service, in any court of the United States.

"(b) Any employer who violates the provisions of this section—

"(1) shall be liable for damages for any loss of wages or other benefits suffered by an employee by reason of such violation;

"(2) may be enjoined from further violations of this section and ordered to provide other appropriate relief, including but not limited to the reinstatement of any employee discharged by reason of his jury service; and

"(3) shall be subject to a civil penalty of not more than $1,000 for each violation as to each employee.

"(c) Any individual who is reinstated to a position of employment in accordance with the provisions of this section shall be considered as having been on furlough or leave of absence during his period of jury service, shall be reinstated to his position of employment without loss of seniority, and shall be entitled to participate in insurance or other benefits offered by the employer pursuant to established rules and practices relating to employees on furlough or leave of absence in effect with the employer at teh time such individual entered upon jury service.

"(d) An individual claiming that his employer has violated the provisions of this section may make application to the district court for the district in which such employer maintains a place of business and the court shall, upon finding probable merit in such claim, appoint counsel to represent such individual in any action in the district court necessary to the resolution of such claim. Such counsel shall be compensated and necessary expenses repaid to the extent provided by section 3006A of title 18, United States Code.

"(2) In any action or proceeding under this section, the court may award a prevailing employee who brings such action by retained counsel a reasonable attorney's fee as part of the costs. The court may award a prevailing employer a reasonable attorney's fee as part of the costs if the court determines that the action is frivolous, vexatious, or brought in bad faith.".

(2) The chapter analysis of chapter 121 of title 28, United States Code, is amended by adding at the end thereof the following new item:

"1875. Protection of jurors' employment.".

(b)(1) Chapter 85 of title 28, United States Code, is amended by redesignating section 1363, and all references thereto, as section

1364, and by inserting immediately after section 1362 the following new section:

"§ 1363. Jurors' employment rights

"The district courts shall have original jurisdiction of any civil action brought for the protection of jurors' employment under section 1875 of this title.".

(2) The chapter analysis of chapter 85 of title 28, United States Code, is amended by striking out the item relating to section 1363 and inserting in lieu thereof the following:

"1363. Jurors' employment rights.
"1364. Construction of references to laws of the United States or Acts of Congress."

EFFECTIVE DATE

SEC. 7. (a) Except as provided in subsection (b) of this section, the amendments made by this Act shall apply with respect to any grand or petit juror summoned for service or actually serving on or after the date of enactment of this Act.

(b) The amendment made by section 5 of this Act shall apply with respect to any grand or petit juror serving on or after the sixtieth day following the date of enactment of this Act.

● Mr. DECONCINI. Mr. President, S. 2075, which was passed by the Senate on April 27, 1978, is an act to amend the Jury Selection and Service Act of 1968, as amended. It revises the section on fees of jurors. It also provides for a civil penalty and injunctive relief against an employer who has discharged or threatened to discharge an employee because of his Federal jury service.

Aside from changes of style and inconsequential changes, there are certain minor differences between S. 2075 as passed by the Senate and S. 2075 as recently passed by the House. First, the House version encompasses portions of two other acts that had been passed by the Senate, S. 2072 and S. 2074. S. 2072 requires a showing of hardship on an individual basis for a prospective juror who attempts to be excused from the Federal jury service on the grounds that he lives too great a distance from the location of the court. S. 2074, inter alia, extends to all jurors in U.S. district courts the protection that Federal employees enjoy under title 5, United States Code, for service-related injuries.

Second, S. 2074 establishes a fine of not more than $5,000 in addition to imprisonment for not more than 1 year, or both, for any person who unlawfully discloses the papers or records generated in the process of jury selection. The House version of S. 2075 leaves unchanged the fine for such offense at the level at which it is now fixed in 28 United States Code, Section 1867(f). That level is $1,000.

S. 2074 further requires that papers and records from obsolete master jury wheels "shall be available solely for the purpose of determining the validity of the selection of any jury." S. 2074 also establishes a punishment for unlawful disclosure of master wheel records—a fine of not more than $5,000 or imprisonment for not more than 1 year, or both. The House version of S. 2075 retains the law as it now exists in 28 United States Code, Section 1868, which provides no punishment and states simply that the records "shall be available for public inspection for the purpose of determining the validity of the selection of any jury."

Third, the House version of S. 2075 defines "undue hardship or extreme inconvenience" for purposes of exemption from jury service as, inter alia, "great distance either in miles or traveltime, from the place of holding court." The Senate version of S. 2075 does not include this language in its definition of "undue hardship or extreme inconvenience."

Fourth, the House version of S. 2075 omits title III of the Senate version of S. 2074. Title III compensates Federal jurors for service-related injuries in a manner similar to the compensation received by Federal employees under title 5, United States Code.

Fifth, the Senate version of S. 2075 states that a petit juror who is compelled to attend more than 30 days in hearing one case "shall be paid an additional fee of $5 for each day in excess" of the 30-day period. The House version of S. 2075 states that such a juror "may be paid, in the discretion of the trial judge, an additional fee, not exceeding $5 more than the attendance fee, for each day in excess" of the 30-day period. A similar difference exists between the two versions in the case of a grand juror, the House version making the payment of the enhanced attendance fee discretionary with the district judge.

Sixth, the Senate version of S. 2075 provides for a travel allowance to jurors at a rate equal to the rate established administratively for court personnel in official travel status. The House version allows jurors such allowance at a rate not to exceed the rate given the court personnel.

Seventh, the House version of S. 2075 abbreviates language in the Senate version that protects a juror from discharge or threats of discharge from his usual employment on account of his Federal jury service. Nevertheless, the two versions are virtually the same in both purpose and effect.

Eighth, the Senate version of S. 2075 subjects the employer of a threatened or discharged juror to a civil penalty of not more than $10,000 per employee, per violation. The House version makes the penalty not more than $1,000 per employee, per violation.

Ninth, the House version of S. 2075 omits language of the Senate version of S. 2075 that gives prior employment rights to the first of two jurors discharged at different times from the same position by the same employer.●

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the Senate concur in the House amendment.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

OVERSEAS CITIZENS VOTING RIGHTS ACT

Mr. ROBERT C. BYRD. Mr. President, I ask that the Chair lay before the Senate a message from the House of Representatives on S. 703.

The ACTING PRESIDENT pro tempore laid before the Senate the following message from the House of Representatives:

Resolved, That the bill from the Senate (S. 703) entitled "An Act to improve the administration and operation of the Overseas Citizens Voting Rights Act of 1975, and for other purposes", do pass with the following amendment:

Strike out all after the enacting clause, and insert: That section 2 of the Overseas Citizens Voting Rights Act of 1975 (42 U.S.C. 1973dd) is amended—

(1) by striking out "and" at the end of paragraph (2);

(2) by striking out the period at the end of paragraph (3) and inserting in lieu thereof a semicolon and "and"; and

(3) by adding at the end thereof the following new paragraph:

"(4) 'official postcard' means a postcard application for registration to vote and for an absentee ballot in the form provided in section 204(d) of the Federal Voting Assistance Act of 1955 (42 U.S.C. 1973cc–14(d)).".

SEC. 2. Section 3 of the Overseas Citizens Voting Rights Act of 1975 (42 U.S.C. 1973 dd–1) is amended by inserting before the period the following: "or, in lieu thereof, an alternative form of identification consistent with this Act and applicable State or district requirements, if a citizen does not possess a valid passport or card of identity and registration".

SEC. 3. Section 4 of the Overseas Citizens Voting Rights Act of 1975 (42 U.S.C. 1973 dd–2) is amended by adding at the end thereof the following new subsection:

"(c) In carrying out the provisions of this section, it is recommended that each State—

"(1) accept any official postcard which is duly executed by any person who meets the requirements in section 3 of this Act as a simultaneous application for registration under such State's election laws and for an absentee ballot under such State's absentee balloting laws;

"(2) if a special application is required for registration by mail, provide that the necessary forms will be sent with the absentee ballot and may be returned with it;

"(3) authorize and instruct the State or local election officials, upon receipt of any official postcard application or any other application for registration to vote or an absentee ballot, to mail immediately to the applicant a ballot, instructions for voting and returning the ballot, and a self-addressed envelope; and

"(4) provide that there be printed across the face of each envelope the words 'Official Election Balloting Material—Via Air Mail', or similar language.".

SEC. 4. The Overseas Citizens Voting Rights Act of 1975 (42 U.S.C. 1973dd et seq.) is amended—

(1) by redesignating sections 5, 6, 7, and 8 as sections 7, 8, 9, and 10, respectively; and

(2) by inserting after section 4 the following new sections:

"CURRENT ABSENTEE VOTING INFORMATION

"SEC. 5. (a) The Presidential designee under section 201 of the Federal Voting Assistance Act of 1955 (42 U.S.C. 1973cc–11) (hereinafter in this Act referred to as the 'Presidential designee') shall request, when appropriate, each State to furnish him with information on the current absentee registration and voting procedures of each State pertaining to citizens entitled to vote in Federal elections under this Act. Such information shall include election dates, officers to be elected, any provisions under such State's law requiring the removal of the name of any person from such State's voter registration roll (for whatever reason), and information related to the number of absentee voters in such State who are entitled to vote in Federal elections under this Act. Where consistent with their respective duties, appropriate departments or agencies of the Federal Government shall assist and cooperate with the Presidential designee, both in the collection of such information and in its dissemination to persons who meet the requirements in section 3 of this Act.

"(b) The Secretary of State shall publicize, in the manner best designed to reach the

persons meeting the requirements in section 3 of this Act—

"(1) the right of such persons to vote in Federal elections and the procedures available to such persons to enforce that right, as provided in this Act; and

"(2) with the assistance of the Postmaster General, the availability of expedited mail delivery of balloting material under this Act.

The Presidential designee shall notify all appropriate State and local election officials of such availability under this Act and under the Federal Voting Assistance Act of 1955 (42 U.S.C. 1973cc et seq.).

"PRINTING AND TRANSMITTING OF POSTCARDS; FREE POSTAGE; PUBLICITY

"SEC. 6. (a) The Administrator of General Services shall cause to be printed and distributed to the Department of Justice, the Department of State, and any other appropriate department or agency of the Federal Government official postcards for use in accordance with the provisions of this Act as directed by the Presidental designee. Such departments or agencies shall deliver or make available such postcards to persons meeting the requirements in section 3 of this Act not later than August 15 immediately before any general Federal election for use in such election. To the extent practicable, such postcards shall also be made available at appropriate times to such persons for use in special or primary Federal elections.

"(b)(1) The Postmaster General, the Attorney General, the Secretary of State, and the head of any other appropriate department or agency of the Federal Government shall facilitate the transmission of balloting material, including official postcards, absentee ballots, voting instructions, and envelopes for the return of such ballots, to and from persons meeting the requirements in section 3 of this Act.

"(2) Any balloting material sent from the United States to any person meeting the requirements in section 3 of this Act shall be sent by priority airmail or by the most expedited postal service available.

"(3) Any balloting material sent to the United States by any person meeting the requirements in section 3 of this Act shall be returned by priority airmail or by the most expedited service available, wherever practicable. Such material may be mailed from any Armed Forces post office in an overseas area established as provided in section 406 of title 39, United States Code, unless otherwise prohibited by any treaty or other agreement between the United States and a foreign country. In the case of ballots executed outside the United States by any person, such ballots may be segregated from other forms of mail and placed in special bags marked with special tags printed and distributed by the Postmaster General for this purpose.

"(c) Official postcards, ballots, voting instructions, and envelopes, whether transmitted individually or in bulk, shall be free of postage, including airmail postage, when sent from the United States in the United States mails.".

SEC. 5. Section 9 of the Overseas Citizens Voting Rights Act of 1975 (42 U.S.C. 1973dd–5), as so redesignated in section 4(1), is amended—

(1) by inserting "(a)" before "Nothing"; and

(2) by adding at the end thereof the following new subsection:

"(b) The exercise of any right to register or vote in Federal elections by any citizen outside the United States shall not affect the determination of his place of residence or domicile for purposes of any tax imposed under Federal, State, or local law.".

SEC. 6. The Overseas Citizens Voting Rights Act of 1975 (42 U.S.C. 1973dd et seq.), as amended in section 4, is further amended by adding at the end thereof the following new section:

"AUTHORIZATION OF APPROPRIATIONS

"SEC. 11. There are hereby authorized to be appropriated such sums as may be necessary to carry out the purposes of this Act.".

SEC. 7. Section 101 of the Federal Voting Assistance Act of 1955 (42 U.S.C. 1973cc) is amended—

(1) by inserting "(a)" before "The"; and

(2) by adding at the end thereof the following new subsection:

"(b) Each State shall enable every citizen in the following categories who is absent from the place of his voting residence to register absentee and to vote by absentee ballot in any Federal election, as defined in section 2(1) of the Overseas Citizens Voting Rights Act of 1975 (42 U.S.C. 1973dd(1)), held in his election district or precinct if he is otherwise eligible to vote in that election:

"(1) Members of the Armed Forces while in the active service, and their spouses and dependents.

"(2) Members of the Merchant Marine of the United States, and their spouses and dependents.

The rights granted in this section shall be supplemental to the voting rights presently enjoyed by these citizens under other Federal and State laws.".

SEC. 8. Section 202 of the Federal Voting Assistance Act of 1955 (42 U.S.C. 1973cc–12) is amended by inserting after "voting procedures," the following: "any provision under such State's law requiring the removal of the name of any person from such State's registration roll (for whatever reason), information related to the number of absentee voters in a State who are entitled to vote in Federal elections under this Act,".

SEC. 9. Section 203 of the Federal Voting Assistance Act of 1955 (42 U.S.C. 1973cc–13) is amended—

(1) in paragraph (1), by striking out "Council of State Governments" and inserting in lieu thereof "government of the several States"; and

(2) by striking out paragraph (3) and inserting in lieu thereof the following new paragraph:

"(3) the Postmaster General and the heads of the departments and agencies concerned to facilitate the transmission of balloting materials to and from persons to whom this Act is applicable. Any balloting material sent from the United States to such persons shall be sent by priority airmail or by the most expedited postal service available. Any balloting material sent to the United States by such persons shall be returned by priority airmail or by the most expedited service available, wherever practicable. In the case of ballots executed outside the United States by any such person, such ballots may be segregated from other forms of mail and placed in special bags marked with special tags printed and distributed for this purpose.".

SEC. 10. Section 204 of the Federal Voting Assistance Act of 1955 (42 U.S.C. 1973cc–14) is amended by adding at the end thereof the following new subsection:

"(d) Notwithstanding the provisions of subsections (a), (b), and (c), the Presidential designee shall design, for purposes of carrying out the provisions of this Act and the Overseas Citizens Voting Rights Act of 1975, a single form of postcard application for registration to vote and for an absentee ballot. The Presidential designee is empowered to promulgate such form by regulation and upon adoption of such form, subsections (a), (b), and (c) of this section shall have no effect.".

SEC. 11. (a) Section 2401(c) of title 39, United States Code, is amended—

(1) by inserting after "title" a comma and the following: "the Overseas Citizens Voting Rights Act of 1975,"; and

(2) by striking out "Act" before the period and inserting in lieu thereof "Acts".

(b) Section 3627 of title 39, United States Code, is amended by striking out "or under the Federal Voting Assistance Act of 1955" and inserting in lieu thereof "under the Federal Voting Assistance Act of 1955, or under the Overseas Citizens Voting Rights Act of 1975".

(c) Section 3626 of title 39, United States Code, is amended by adding at the end thereof the following new subsection:

"(e)(1) In the administration of this section, the rates for third-class mail matter mailed by a qualified political committee shall be the rates currently in effect under former section 4452 of this title for third-class mail matter mailed by a qualified nonprofit organization.

"(2) For purposes of this subsection—

"(A) the term 'qualified political committee' means a national or State committee of a political party, the Republican and Democratic Senatorial Campaign Committees, the Democratic National Congressional Committee, and the National Republican Congressional Committee;

"(B) the term 'national committee' means the organization which, by virtue of the bylaws of a political party, is responsible for the day-to-day operation of such political party at the national level; and

"(C) the term 'State committee' means the organization which, by virtue of the bylaws of a political party, is responsible for the day-to-day operation of such political party at the State level.".

● Mr. PELL. Mr. President, on May 9, 1977, the Senate passed S. 703, a bill to amend the Overseas Citizens Voting Rights Act of 1975 and the Federal Voting Assistance Act of 1955. The House has recently considered this measure, and on September 19, 1978, passed S. 703, with an amendment, by a vote of 327 to 78.

Although I do not agree entirely with the House amendment, I believe the House has improved on the Senate version and that the bill, as passed by the House, deserve the support of the Senate.

There have been a number of technical changes made to the Senate bill, as well as several substantive amendments. The principal changes made by the House are as follows:

In section 4 of S. 703, the Presidential designee, now the Secretary of Defense, must request certain voting information from the States for use by Federal agencies in assisting eligible voters in exercising their right to vote in Federal elections under the Overseas Citizens Voting Rights Act and the Federal Voting Assistance Act. The Senate version calls for the Presidential designee to request such information "annually or more often, when appropriate." The House bill merely says "when appropriate."

The House and Senate versions also differ on what information is to be included in the Presidential designee's requests, although the two bills agree that such information shall include election dates, officers to be elected, and any provisions under such State's voter registration roll, for whatever reason. The Senate bill requires the inclusion of other matters to be voted on, such as referenda issues, and any information relevant to Federal elections. Neither requirement is contained in the House bill. The Senate bill requires that such information include the number of absentee voters in a State, whereas the House bill asks only for the number of absentee voters in such State who are entitled to vote in Federal elections under the Overseas Citizens

Voting Rights Act and the Federal Voting Assistance Act.

There is also a difference with respect to what information is to be publicized to Americans overseas, and concerning who is to do the publicizing. The Senate bill requires the Presidential designee to publicize the right of such persons to vote in Federal elections, and the procedures available to enforce that right, as well as the availability of free postage and expedited mail delivery of balloting material. The House bill calls for the Secretary of State to perform this function, but that the availability of free postage is not to be publicized, because the House bill limits free postage only to voting related materials sent from the United States overseas. The State Department has no objection to assuming the publicizing function, which is consistent with State's current practices in assisting overseas Americans with voting. With embassies and consulates throughout the world, the State Department is ideally suited to this task.

The last section added by the House grants lower third-class bulk mail rates to "qualified political committees," such as the national and State committees of a political party, and the congressional and senatorial campaign committees of both major parties. Under the House provision, these committees would pay the lower third-class bulk mail rates now enjoyed by qualified nonprofit organizations. The lower rates, which are being phased out over the next 9 years, are estimated by the Congressional Budget Office to cost the Postal Service $2.4 million in fiscal year 1979, $4.5 million in fiscal year 1980, then dropping off to $2 million in fiscal year 1983. Although this provision is broader than that passed by the Senate last year in S. 926, I believe we should accept the House version, since it will provide a measure of relief to the financially burdened political process.

Beyond these differences, S. 703 contains important improvements in the two acts which will assist Americans residing abroad in exercising their constitutional right to vote in Federal elections. The bill amends the Federal Voting Assistance Act to require the States to provide by law for absentee registration and voting in Federal elections by members of the Armed Forces and merchant marine and their dependents; and requires the Presidential designee to design a standardized postcard to serve as a simultaneous application for registration and request for an absentee ballot.

The bill amends the Overseas Citizens Voting Rights Act in the following way: It expands coverage of the act to include U.S. citizens who do not have passports or State Department cards of identity, but who possess other acceptable forms of identification. It encourages States to accept the standardized postcard designed by the Presidential designee as a simultaneous application for registration and request for absentee ballot. It provides that election material sent abroad by the States is to be sent free of postage. It provides that the exercise of the right to register and vote under the act not affect the determination of the citizen's place of residence or domicile for the purpose of imposing any Federal, State or local tax.

The bill, as passed by the House, encourages States to instruct election officials to expedite the processing of applications and to mail out immediately ballots and voting instructions with a return envelope. It also recommends that States print standardized mailing envelopes with the words "Official Election Balloting Material—Via Air Mail," or similar language. The General Services Administrator is also required to print and distribute the official postcard to the various interested executive branch agencies. The bill further requires the Postmaster General, the Attorney General, the Secretary of State, and the heads of other agencies and departments, to facilitate the transmission of election materials by priority air mail.

Mr. President, I believe this bill will help those who administer the law on the Federal and State levels, and will assist American civilians overseas and American defense personnel away from their homes, in voting in Federal elections.

I urge my colleagues to support the House amendments.●

● Mr. GRIFFIN. Mr. President, in general I believe that the House amendments to S. 703 will better enable U.S. citizens residing abroad to exercise their constitutional right to vote. However, I do not support the House amendment to S. 703 which would entitle certain political committees to reduce third-class postage rates for political mailings.

I call attention to paragraph (c) of section 11 of S. 703, on pages 19 and 20 of the bill as printed. This provision is an attempt to extend a public financing arrangement already in effect—one which many Senators and most taxpayers do not realize exists. It is aimed at giving "qualified political committees" the same postal subsidy that is already available to labor unions and any other "nonprofit organizations" for political mailings.

Specifically, this amendment would enable the national and State committees of a political party and the Democratic and Republican senatorial and congressional campaign committees to mail any material at the nonprofit organization postage rates of 2.7 cents per letter. Currently, these organizations pay the regular third-class bulk mail rate of 8.4 cents per letter. However, if this amendment becomes law, it is estimated that the Government would be subsidizing these political committees with an additional $3 to $4 million per year.

One would think that the special 2-cent rate now available for qualified nonprofit organizations would be used only for nonpolitical mailings. However, that is not the case. Labor unions routinely use this special postage rate for blatantly political mailings. For example, I have before me a letter sent out to all Michigan UAW members. Its heading is "Election '78: 1978 Election News from the Michigan UAW Community Action Program." This letter is a statement of the Michigan UAW political endorsements for the upcoming elections. It was sent out under the 2-cent nonprofit organization postage frank.

Labor unions are not the only organizations presently entitled to this political mailing subsidy. The Postal Service regulations enable the National Right to Work Committee and Common Cause, among many others, to enjoy this same subsidy. Each of these groups is entitled to mail their matter at 2.7 cents per piece rather than 8.4 cents per piece. As a result, there is a Government subsidy of $57,000 for every million pieces of mail sent out by these organizations.

The bill before us would extend this subsidy to the most politically active committees of our political parties. These committees send out millions of pieces of mail each year—and every piece of mail sent by these committees would be subsidized by the Government.

I find it particularly ironic that the Senate would even consider extending the 2 cent postal rate to mailings by political committees, at a time when Members of Congress are tightening down on their own use of the frank. Of course, it has always been improper for a Member of Congress to mail out under the frank purely political mailings. One cannot, in a newsletter, urge the election or defeat of any candidate. Not only that, but recently, we have even prohibited ourselves from sending out mass mailings—of any sort—for a period of 60 days prior to an election. We realize that any mass mailing close to an election can have a political effect.

In light of those restrictions, I wonder—are we, through this provision of S. 703, enabling our political committees to do indirectly, what we have prohibited ourselves from doing? This provision would create a special frank for certain political committees. It would enable those political committees to send mass mailings at a vastly reduced rate. In fact, it would have the Government subsidize two-thirds of every political mailing made by these committees.

I do not believe that the Government should subsidize any political mailing. I believe existing provisions of law should be amended so as to preclude the subsidization of political mailings by labor unions and by other so-called nonprofit organizations.●

● Mr. MATHIAS. Mr. President, I am pleased to join my distinguished colleagues from Rhode Island (Mr. PELL) and Arizona (Mr. GOLDWATER) in urging the Senate to accept the House version of S. 703, a bill to amend the Overseas Citizens Voting Rights Act of 1975 and the Federal Voting Assistance Act of 1955.

After a careful review of the differences between the House and Senate versions of S. 703, I have concluded that it is appropriate for the Senate to recede to the House-passed bill. The differences between the two bills are relatively minor; and, most important, both versions contain the so-called "tax neutrality" provision, which is the key section in the Senate bill. This provision provides that the exercise of any right to register or vote in Federal elections by an American citizen overseas shall not affect the determination of his residence or domicile for purposes of any tax im-

posed by Federal, State, or local law. It would go far toward assuring that American citizens voting overseas would be free to vote absentee without fear of the imposition of State taxes solely due to their exercising their right to vote in Federal elections.

The need for a "tax neutrality" provision was made clear last year during the hearings before the Senate Rules and Administration Committee. As the hearing record on S. 703 reveals, the absence of such a provision had a substantial chilling effect on the American electorate residing overseas. The results of the 1976 election fully warrant the enactment of appropriate, corrective legislation.

This "tax neutrality" provision is similar to one contained in the Senate-passed version of the Overseas Citizens Voting Rights Act of 1974, which was dropped at the insistence of the House. At the time that Congress completed action on the 1975 bill, Senator PELL and I expressed concern over the deletion of that important provision. And, I indicated that sometime in the future Congress might well want to incorporate a "tax neutrality" provision into Federal law. I am pleased that time has come.

I am aware that during the Senate hearing, and in the House consideration of this bill, there was some debate concerning the constitutionality of the "tax neutrality" provision. I am convinced that there is ample constitutional authority to support such a provision. Support for the constitutionality of a "tax neutrality" provision can be found in several constitutional provisions, including the 24th amendment and the due process clause of the 5th and 14th amendments. My distinguished colleague from Arizona has also included in the Senate hearing a memorandum of law recognizing the broad congressional power to legislate in connection with Federal elections.

I want to express my concern, however, over a disturbing development in the administration of the Federal military and overseas absentee voting program that has arisen since the initial Senate passage of S. 703 last year. I understand that the Department of Defense has been less than enthusiastic about its role as designee charged with responsibility for administration of the 1955 act, and is apparently unhappy with the prospects of administering the 1975 act as provided for under S. 703. The Federal Election Commission has declined an invitation by the Department of Defense that the FEC take over this responsibility, and no other Government agency has stepped forward to take over this program. This issue must be resolved.

It is too late for a major review of this administrative responsibility in this election year. But, I want to emphasize that the restoration of an effective Federal voting assistance program for overseas and military absentee voters should be regarded as a high priority objective of the administration. I think the administration should give careful consideration to establishing a new, nonpartisan, independent office that could serve as the Presidential designee under the 1955 and 1975 acts (as amended by S. 703), and that could coordinate the activities of the Departments of Defense, State and Justice, the Postal Service, the General Services Administration, and other Government agencies having responsibility for carrying out the information-gathering and dissemination activities contemplated by this legislation.

I hope that the administration will be able to report to the Senate Rules and Administration Committee fairly promptly what steps it has taken to assure the effective administration of the military overseas absentee voting program under the 1955 and 1975 acts as modified by S. 703.

One of the highlights of the 94th Congress was the passage of the Overseas Citizens Voting Rights Act of 1975 (Public Law 94–203). The enactment of this legislation removed many of the impediments to the participation in Federal elections of thousands of Americans living abroad and signaled Congress intent to end the discrimination against private citizens seeking access to the Federal franchise. The experience of the 1976 Federal elections indicates, however, that passage of Public Law 94–203 was not enough. More legislation is needed to refine the existing law and to eliminate difficulties not addressed by Public Law 94–203. Congress must remove the remaining barriers to broad participation in Federal elections by Americans living abroad. S. 703 would do just that.

The adoption of the 1955 and 1975 acts has brought about significant progress in absentee voting among military and overseas voters over the last two decades. I look forward to even greater success in the years ahead.●

Mr. ROBERT C. BYRD. I ask unanimous consent that the Senate concur in the amendment of the House on S. 703.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

COURT INTERPRETERS

Mr. ROBERT C. BYRD. Mr. President, I ask that the Chair lay before the Senate a message from the House of Representatives on S. 1315.

The ACTING PRESIDENT pro tempore laid before the Senate the following message from te House of Representatives:

Resolved, That the bill from the Senate (S. 1315) entitled "An Act to provide more effectively for the use of interpreters in courts of the United States, and for other purposes", do pass with the following amendment:

Strike out all after the enacting clause, and insert: That this Act may be cited as the "Court Interpreters Act".

SEC. 2. (a) Chapter 119 of title 28, United States Code, is amended by adding at the end thereof the following new sections:

"§ 1827. Interpreters in courts of the United States

"(a) The Director of the Administrative Office of the United States Courts shall establish a program to facilitate the use of interpreters in courts of the United States.

"(b) The Director shall prescribe, determine, and certify the qualifications of persons who may serve as certified interpreters in courts of the United States in bilingual proceedings and proceedings involving the hearing impaired (whether or not also speech impaired), and in so doing, the Director shall consider the education, training and experience of those persons. The Director shall maintain a current master list of all interpreters certified by the Director and shall report annually on the frequency of requests for, and the use and effectiveness of, interpreters. The Director shall prescribe a schedule of fees for services rendered by interpreters.

"(c) Each United States district court shall maintain on file in the office of the clerk of court a list of all persons who have been certified as interpreters, including bilingual interpreters and oral or manual interpreters for the hearing impaired (whether or not also speech impaired), by the Director of the Administrative Office of the United States Courts in accordance with the certification program established pursuant to subsection (b) of this section.

"(d) The presiding judicial officer, with the assistance of the Director of the Administrative Office of the United States Courts, shall utilize the services of the most available certified interpreter, or when no certified interpreter is reasonably available, as determined by the presiding judicial officer, the services of an otherwise competent interpreter, in any criminal or civil action initiated by the United States in a United States district court (including a petition for a writ of habeas corpus initiated in the name of the United States by a relator), if the presiding judicial officer determines on such officer's own motion or on the motion of a party that such party (including a defendant in a criminal case), or a witness who may present testimony in such action—

"(1) speaks only or primarily a language other than the English language; or

"(2) suffers from a hearing impairment (whether or not suffering also from a speech impairment)

so as to inhibit such party's comprehension of the proceedings or communication with counsel or the presiding judicial officer, or so as to inhibit such witness' comprehension of questions and the presentation of such testimony.

"(e)(1) If any interpreter is unable to communicate effectively with the presiding judicial officer, the United States attorney, a party (including a defendant in a criminal case), or a witness, the presiding judicial officer shall dismiss such interpreter and obtain the services of another interpreter in accordance with this section.

"(2) In any criminal or civil action in a United States district court, if the presiding judicial officer does not appoint an interpreter under subsection (d) of this section, an individual requiring the services of an interpreter may seek assistance of the clerk of court or the Director of the Administrative Office of the United States Courts in obtaining the assistance of a certified interpreter.

"(f)(1) Any individual other than a witness who is entitled to interpretation under subsection (d) of this section may waive such interpretation in whole or in part. Such a waiver shall be effective only if approved by the presiding judicial officer and made expressly by such individual on the record after opportunity to consult with counsel and after the presiding judicial officer has explained to such individual, utilizing the services of the most available certified interpreter, or when no certified interpreter is reasonably available, as determined by the presiding judicial officer, the services of an otherwise competent interpreter, the nature and effect of the waiver.

"(2) An individual who waives under paragraph (1) of this subsection the right to an interpreter may utilize the services of a noncertified interpreter of such individual's choice whose fees, expenses, and costs shall be paid in the manner provided for the payment of such fees, expenses, and costs of an interpreter appointed under subsection (d) of this section.

"(g)(1) Except as otherwise provided in this subsection or section 1828 of this title, the salaries, fees, expenses, and costs incident to providing the services of interpreters under subsection (d) of this section shall be paid by the Director of the Administrative Office of the United States Courts from sums appropriated to the Federal judiciary.

"(2) Such salaries, fees, expenses, and costs that are incurred with respect to Government witnesses shall, unless direction is made under paragraph (3) of this subsection, be paid by the Attorney General from sums appropriated to the Department of Justice.

"(3) The presiding judicial officer may in such officer's discretion direct that all or part of such salaries, fees, expenses, and costs shall be apportioned between or among the parties or shall be taxed as costs in a civil action.

"(4) Any moneys collected under this subsection may be used to reimburse the appropriations obligated and disbursed in payment for such services.

"(h) In any action in a court of the United States where the presiding judicial officer establishes, fixes, or approves the compensation and expenses payable to an interpreter from funds appropriated to the Federal judiciary, the presiding judicial officer shall not establish, fix, or approve compensation and expenses in excess of the maximum allowable under the schedule of fees for services prescribed pursuant to subsection (b) of this section.

"(i) The term 'presiding judicial officer' as used in this section and section 1828 of this title includes a judge of a United States district court, a United States magistrate, and a referee in bankruptcy.

"(j) The term 'United States district court' as used in this section and section 1828 of this title includes any court created by Act of Congress in a territory which is invested with any jurisdiction of a district court of the United States established by section 132 of this title.

"(k) The interpretation provided by certified interpreters pursuant to this section shall be in the consecutive mode except that the presiding judicial officer, with the approval of all interested parties, may authorize a simultaneous or summary interpretation when such officer determines that such interpretation will aid in the efficient administration of justice. The presiding judicial officer on such officer's motion or on the motion of a party may order that special interpretation services as authorized in section 1828 of this title be provided if such officer determines that the provision of such services will aid in the efficient administration of justice.

§ 1828. Special interpretation services

"(a) The Director of the Administrative Office of the United States Courts shall establish a program for the provision of special interpretation services in criminal actions and in civil actions initiated by the United States (including petitions for writs of habeas corpus initiated in the name of the United States by relators) in a United States district court. The program shall provide a capacity for simultaneous interpretation services in multidefendant criminal actions and multidefendant civil actions.

"(b) Upon the request of any person in any action for which special interpretation services established pursuant to subsection (a) are not otherwise provided, the Director, with the approval of the presiding judicial officer, may make such services available to the person requesting the services on a reimbursable basis at rates established in conformity with section 501 of the Act of August 31, 1951 (ch. 376, title 5, 65 Stat. 290; 31 U.S.C. 483a), but the Director may require the prepayment of the estimated expenses of providing the services by the person requesting them.

"(c) Except as otherwise provided in this subsection, the expenses incident to providing services under subsection (a) of this section shall be paid by the Director from sums appropriated to the Federal judiciary. A presiding judicial officer, in such officer's discretion, may order that all or part of the expenses shall be apportioned between or among the parties or shall be taxed as costs in a civil action, and any moneys collected as a result of such order may be used to reimburse the appropriations obligated and disbursed in payment for such services.

"(d) Appropriations available to the Director shall be available to provide services in accordance with subsection (b) of this section, and moneys collected by the Director under that subsection may be used to reimburse the appropriations charged for such services. A presiding judicial officer, in such officer's discretion, may order that all or part of the expenses shall be apportioned between or among the parties or shall be taxed as costs in the action.".

(b) The table of sections for chapter 119 of title 28, United States Code, is amended by adding at the end thereof the following:

"1827. Interpreters in courts of the United States.

"1828. Special interpretation services.".

SEC. 3. Section 604(a) of title 28, United States Code, is amended—

(a) by striking out paragraph (10) and inserting in lieu thereof:

"(10) (A) Purchase, exchange, transfer, distribute, and assign the custody of lawbooks, equipment, supplies, and other personal property for the judicial branch of Government (except the Supreme Court unless otherwise provided pursuant to paragraph (17)); (B) provide or make available readily to each court appropriate equipment for the interpretation of proceedings in accordance with section 1828 of this title; and (C) enter into and perform contracts and other transactions upon such terms as the Director may deem appropriate as may be necessary to the conduct of the work of the judicial branch of Government (except the Supreme Court unless otherwise provided pursuant to paragraph (17)), and contracts for nonpersonal services for pretrial services agencies, for the interpretation of proceedings, and for the provision of special interpretation services pursuant to section 1828 of this title may be awarded without regard to section 3709 of the Revised Statutes of the United States (41 U.S.C. 5);";

(b) by redesignating paragraph (13) as paragraph (17); and

(c) by inserting after paragraph (12) the following new paragraphs:

"(13) Pursuant to section 1827 of this title, establish a program for the certification and utilization of interpreters in courts of the United States;

"(14) Pursuant to section 1828 of this title, establish a program for the provision of special interpretation services in courts of the United States;

"(15)(A) In those districts where the Director considers its advisable based on the need for interpreters, authorize the full-time or part-time employment by the court of certified interpreters; (B) where the Director considers it advisable based on the need for interpreters, appoint certified interpreters on a full-time or part-time basis, for services in various courts when he determines that such appointments will result in the economical provision of interpretation services; and (C) pay out of moneys appropriated for the judiciary interpreters' salaries, fees, and expenses, and other costs which may accrue in accordance with the provisions of section 1827 and 1828 of this title;

"(16) In the Director's discretion, (A) accept and utilize voluntary and uncompensated (gratuitous) services, including services as authorized by section 3102 of title 5, United States Code; and (B) accept, hold, administer, and utilize gifts and bequests of personal property for the purpose of aiding or facilitating the work of the judicial branch of Government, but gifts or bequests of money shall be covered into the Treasury;".

SEC. 4. Section 604 of title 28, United States Code, is amended further by inserting after subsection (e) the following new subsections:

"(f) The Director may make, promulgate, issue, rescind, and amend rules and regulations (including regulations prescribing standards of conduct for Administrative Office employees) as may be necessary to carry out the Director's functions, powers, duties, and authority. The Director may publish in the Federal Register such rules, regulations, and notices for the judicial branch of Government as the Director determines to be of public interest; and the Director of the Federal Register hereby is authorized to accept and shall publish such materials.

"(g)(1) When authorized to exchange personal property, the Director may exchange or sell similar items and may apply the exchange allowance or proceeds of sale in such cases in whole or in part payment for the property acquired, but any transaction carried out under the authority of this subsection shall be evidenced in writing.

"(2) The Director hereby is authorized to enter into contracts for public utility services and related terminal equipment for periods not exceeding ten years.".

SEC. 5. Section 602 of title 28, United States Code, is amended to read as follows:

§ 602. Employees

"(a) The Director shall appoint and fix the compensation of necessary employees of the Administrative Office in accordance with the provisions of chapter 51 and subchapter III of chapter 53 of title 5, relating to classification and General Schedule pay rates.

"(b) Notwithstanding any other law, the Director may appoint certified interpreters in accordance with section 604(a)(15)(B) of this title without regard to the provisions of chapter 51 and subchapter III of chapter 53 of title 5, relating to classification and General Schedule pay rates, but the compensation of any person appointed under this subsection shall not exceed the appropriate equivalent of the highest rate of pay payable for the highest grade established in the General Schedule, section 5332 of title 5.

"(c) The Director may obtain personal services as authorized by section 3109 of title 5, at rates not to exceed the appropriate equivalent of the highest rate of pay payable for the highest grade established in the General Schedule, section 5332 of title 5.

"(d) All functions of other officers and employees of the Administrative Office and all functions of organizational units of the Administrative Office are vested in the Director. The Director may delegate any of the Director's functions, powers, duties, and authority (except the authority to promulgate rules and regulations) to such officers and employees of the judicial branch of Government as the Director may designate, and subject to such terms and conditions as the Director may consider appropriate; and may authorize the successive redelegation of such functions, powers, duties, and authority as the Director may deem desirable. All official acts performed by such officers and employees shall have the same force and effect as though performed by the Director in person.".

SEC. 6. Section 603 of title 28, United States Code, is amended by striking out the second paragraph thereof.

SEC. 7. Section 1920 of title 28, United States Code, is amended by striking out the period at the end of paragraph (5) and inserting a semicolon in lieu thereof and by inserting after paragraph (5) the following new paragraph:

"(6) Compensation of court appointed experts, compensation of interpreters, and salaries, fees, expenses, and costs of special interpretation services under section 1828 of this title.".

SEC. 8. Section 5(b) of the Act of September 23, 1959 (Public Law 86-370, 73 Stat. 652), is repealed.

SEC. 9. There are authorized to be appropriated to the judicial branch of Government such sums as may be necessary to carry out the amendments made by this Act.

SEC. 10. (a) Except as provided in subsection (b), this Act shall take effect on the date of the enactment of this Act.

(b) Section 2 of this Act shall take effect ninety days after the date of the enactment of this Act.

SEC. 11. Any contracts entered into under this Act or any of the amendments made by this Act shall be limited to such extent or in such amounts as are provided in advance in appropriation Acts.

● Mr. DECONCINI. Mr. President, I am very pleased by the imminent passage of S. 1315, the "Court Interpreter's Act." I would like to extend special thanks to Congressman DON EDWARDS and Congressman FRED RICHMOND for their great interest in this bill and further thanks to Senator CHARLES MATHIAS, cosponsor of S. 1315, for all his work on this important piece of legislation.

The "Court Interpreter's Act" insured that all individuals in Federal proceedings will be provided with a certified interpreter if their primary language is not English or if they have a hearing impairment. The urgent necessity for passage of this bill is reflected in the significant number of individuals whose first language is not English, over 25 million; and the approximately 15 million individuals who suffer a hearing impairment. These figures total 40 million individuals who presently do not enjoy the full benefits of our legal system.

The passage of this bill is long overdue and will remedy a glaring inequity in our system of justice.●

Mr. ROBERT C. BYRD. I ask unanimous consent that the Senate concur in the amendment of the House.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

ORDER OF PROCEDURE

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the 1 hour on cloture not begin until Senators have completed their work—it will only take another 3 or 4 minutes—and the distinguished Senator from Hawaii has been able to clear up the matter which he has been interested in, and which has been cleared.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

QUIET COMMUNITIES ACT OF 1978

Mr. ROBERT C. BYRD. Mr. President, I ask that the Chair lay before the Senate a message from the House of Representatives on S. 3083.

The PRESIDING OFFICER laid before the Senate the following message from the House of Representatives:

Resolved, That the bill from the Senate (S. 3083) entitled "An Act to extend the authorizations for the Noise Control Act of 1972, to expand the quiet communities program, and for other purposes", do pass with the following amendments:

Strike out all after the enacting clause, and insert: That this Act may be cited as the "Quiet Communities Act of 1978".

SEC. 2. Section 14 of the Noise Control Act of 1972 is amended to read as follows:

"QUIET COMMUNITIES, RESEARCH, PUBLIC INFORMATION

"SEC. 14. To promote the development of effective State and local noise control programs, to provide an adequate Federal noise control research program designed to meet the objectives of this Act, and to otherwise carry out the policy of this Act, the Administrator shall, in cooperation with other Federal agencies and through the use of grants, contracts, and direct Federal actions—

"(a) develop and disseminate information and educational materials to all segments of the public on the public health and other effects of noise and the most effective means for noise control, through the use of materials for school curricula, volunteer organizations, radio and television programs, publication, and other means;

"(b) conduct or finance research directly or with any public or private organization or any person on the effects, measurement, and control of noise, including but not limited to—

"(1) investigation of the psychological and physiological effects of noise on humans and the effects of noise on domestic animals, wildlife, and property, and the determination of dose/response relationships suitable for use in decisionmaking, with special emphasis on the nonauditory effects of noise;

"(2) investigation, development, and demonstration of noise control technology for products subject to possible regulation under sections 6, 7, and 8 of this Act;

"(3) investigation, development, and demonstration of monitoring equipment and other technology especially suited for use by State and local noise control programs;

"(4) investigation of the economic impact of noise on property and human activities; and

"(5) investigation and demonstration of the use of economic incentives (including emission charges) in the control of noise;

"(c) administer a nationwide Quiet Communities Program which shall include, but not be limited to—

"(1) grants to States, local governments, and authorized regional planning agencies for the purpose of—

"(A) identifying and determining the nature and extent of the noise problem within the subject jurisdiction;

"(B) planning, developing, and establishing a noise control capacity in such jurisdiction, including purchasing initial equipment;

"(C) developing abatement plans for areas around major transportation facilities (including airports, highways, and rail yards) and other major stationary sources of noise, and, where appropriate, for the facility or source itself; and,

"(D) evaluating techniques for controlling noise (including institutional arrangements) and demonstratiing the best available techniques in such jurisdiction;

"(2) purchase of monitoring and other equipment for loan to State and local noise control programs to meet special needs or assist in the beginning implementation of a noise control program or project;

"(3) development and implementation of a quality assurance program for equipment and monitoring procedures of State and local noise control programs to help communities assure that their data collection activities are accurate;

"(4) conduct of studies and demonstrations to determine the resource and personnel needs of States and local governments required for the establishment and implementation of effective noise abatement and control programs; and

"(5) development of educational and training materials and programs, including national and regional workshops, to support State and local noise abatement and control programs;

except that no actions, plans or programs hereunder shall be inconsistent with existing Federal authority under this Act to regulate sources of noise in interstate commerce;

"(d) develop and implement a national noise environmental assessment program to identify trends in noise exposure and response, ambient levels, and compliance data and to determine otherwise the effectiveness of noise abatement actions through the collection of physical, social, and human response data;

"(e) establish regional technical assistance centers which use the capabilities of university and private organizations to assist State and local noise control programs;

"(f) provide technical assistance to State and local governments to facilitate their development and enforcement of noise control, including direct onsite assistance of agency or other personnel with technical expertise, and preparation of model State or local legislation for noise control; and

"(g) provide for the maximum use in programs assisted under this section of senior citizens and persons eligible for participation in programs under the Older Americans Act.".

SEC. 3. The fourth sentence of section 611(c)(1) of the Federal Aviation Act, as amended by section 7 of the Noise Control Act of 1972, is amended by striking "a reasonable time" and inserting in lieu thereof "ninety days", and by adding before the period "and a detailed analysis of and response to all documentation or other information submitted by the Environmental Protection Agency with such proposed regulations".

SEC. 4. Section 11(a) of the Noise Control Act of 1972 is amended by inserting "(1)" after "(a)" and by adding the following new paragraph:

"(2) Any person who violates paragraph (1), (3), (5), or (6) of subsection (a) of section 10 of this Act shall be subject to a civil penalty not to exceed $10,000 per day of such violation".

SEC. 5. Section 6 of the Noise Control Act of 1972 is amended by adding the following subsection:

"(f) At any time after the promulgation of regulations respecting a product under this section, a State or political subdivision thereof may petition the Administrator to revise such standard on the grounds that a more stringent standard under subsection (c) of this section is necessary to protect the public health and welfare. The Administration shall publish notice of receipt of such petition in the Federal Register and shall within ninety days of receipt of such petition respond by (1) publication of proposed revised regulations in accordance with subsection (c)(3) of this section, or (2) publication in the Federal Register of a decision not to publish such proposed revised regulations at that time, together with a detailed explanation for such decision.".

SEC. 6. Section 19 of the Noise Control Act of 1972 is amended to read as follows:

"AUTHORIZATION OF APPROPRIATIONS

"SEC. 19. There are authorized to be appropriated to carry out this Act (other than for research and development) $15,000,000 for the fiscal year ending September 30, 1979.".

SEC. 7. (a) Section 1002(a)(4) of the Solid Waste Disposal Act is amended by deleting the hyphen between the words "solid" and "waste" in the last line.

(b) Section 1004 of the Solid Waste Disposal Act is amended by—

(1) revising paragraph (8) by striking out everything after "improvement of land";

(2) reviewing paragraph (10) by striking out "disposal" and inserting in lieu thereof "management";

(3) by revising paragraph (29) to read as follows:

"(29) The term 'solid waste management facility' includes—

"(A) any resource recovery system or component thereof,

"(B) any system, program, or facility for resource conservation, and

"(C) any facility for the collection, source separation, storage, transportation, transfer, processing, treatment or disposal of solid wastes, including hazardous wastes, whether such facility is associated with facilities generating such wastes or otherwise.".

(c) Section 1008(a)(3) of the Solid Waste Disposal Act is amended by striking out "title IV" and inserting in lieu thereof "subtitle D".

(d) Section 1008(b) of the Solid Waste Disposal Act is amended by striking ", pursuant to this section" and by inserting after "suggested guidelines" each time it appears the phrase "or proposed regulations under this Act".

(e) Section 2003 of the Solid Waste Disposal Act is amended by inserting "Federal agencies," after "to provide".

(f) Section 3002 of the Solid Waste Disposal Act is amended by—

(1) revising paragraph (5) by striking out the semicolon after "subtitle" and substituting a comma, and by striking out "and" and inserting in lieu thereof "or pursuant to title I of the Marine Protection, Research and Sanctuaries Act (86 Stat. 1052); and"; and

(2) revising paragraph (6) by adding a close parenthesis after "subtitle" the first time it appears.

(g) Section 3003 of the Solid Waste Disposal Act is amended by—

(1) revising subsection (a)(4) by striking out the period after "subtitle" and substituting a comma, and by adding at the end thereof "or pursuant to title I of the Marine Protection, Research, and Sanctuaries Act (86 Stat. 1052).."; and

(2) revising subsection (b) by striking out "subtitle" after "the regulations promulgated by the Administrator under this" and inserting in lieu thereof "section".

(h) Section 3005(a) of the Solid Waste Disposal Act is amended by inserting "treatment, storage, or" after "and upon and after such date the".

(i) Section 3006(c) of the Solid Waste Disposal Act is amended by—

(1) striking out "required for" wherever it appears in the subsection and inserting in lieu thereof "of"; and

(2) inserting the word "may" immediately after "3005," and before "submit".

(j) Section 3007(a)(1) of the Solid Waste Disposal Act is amended by striking out "or disposed of" and inserting in lieu thereof "disposed of, or transported from".

(k) Section 3008 of the Solid Waste Disposal Act is amended by—

(1) revising subsection (d)(1) to read as follows:

"(1) transports any hazardous waste identified or listed under this subtitle to a facility which does not have a permit under section 3005 (or 3006 in the case of a State program), or pursuant to title I of the Marine Protection, Research, and Sanctuaries Act (86 Stat. 1052),."; and

(2) revising subsection (d)(2) to read as follows:

"(2) treats, stores, or disposes of any hazardous waste identified or listed under this subtitle without having obtained a permit under section 3005 (or 3006 in the case of a State program) or pursuant to title I of the Marine Protection, Research and Sanctuaries Act (86 Stat. 1052)."

(l) Section 4007(C) of the Solid Waste Disposal Act is amended by redesignating subsection "(C)" as "(c)".

(m) Section 6001 of the Solid Waste Disposal Act is amended by inserting "or management" between "disposal" and "of solid waste".

(n) Section 6002 of the Solid Waste Disposal Act is amended by—

(1) deleting "(A)" after "(1)" in subsection (c) and changing "(B)" and "(C)" to "(2)" and "(3)", respectively; and changing "(i)", "(ii)", and "(iii)" to "(A)", "(B)", and "(C)", respectively;

(2) in subsection (c)(3) as redesignated, striking "Contracting" and inserting in lieu thereof "After the date specified in any applicable guidelines prepared pursuant to subsection (e) of this section, contracting"; and

(3) inserting in the second sentence of subsection (e) after "containing such materials" the phrase "and with respect to certification by vendors of the percentage of recovered materials used,".

(o) Section 6004 of the Solid Waste Disposal Act is amended by—

(1) revising subsection (a)(1)(A) by striking out "disposal" and inserting in lieu thereof "management";

(2) revising subsection (a)(1)(B) by striking out "disposal" and inserting in lieu thereof "management"; and

(3) revising subsection (b) by striking out "Secretary" and inserting in lieu thereof "Administrator".

(p) Section 7002 of the Solid Waste Disposal Act is amended by—

(1) revising subsection (c) by striking out "section 212" and inserting in lieu thereof "subtitle C"; and

(2) revising subsection (e) by striking out "requiring" and inserting in lieu thereof "require".

(q) Section 7003 of the Solid Waste Disposal Act is amended by striking out "for" before "contributing to the alleged disposal".

(r) Section 7007 of the Solid Waste Disposal Act is amended by—

(1) revising subsection (b)(1)(A) by striking out "disposal" and inserting "management"; and by striking out "resources" and inserting "resource";

(2) revising subsection (b)(1)(B) by striking out "disposal" and inserting "management"; and

(3) revising subsection (c)(3) by striking out "disposal" and inserting "management" in lieu thereof.

(s) Section 8001(a) of the Solid Waste Disposal Act is amended by—

(1) revising paragraph (2) by striking out "disposal" and inserting "management" in lieu thereof; and

(2) revising paragraph (13) by inserting "treatment," after "for purpose of".

(t) Section 8002 of the Solid Waste Disposal Act is amended by—

(1) revising paragraph (1) of subsection (g) by inserting a comma between "shale" and "liquefaction";

(2) revising paragraph (1) of subsection (j) by inserting "the Secretary of Energy, the Chairman of the Council of Economic Advisors," before "and a representative of the Office of Management and Budget,";

(3) revising paragraph (2) of subsection (j) by striking "(2)(D)" and inserting "(1)(D)" in lieu thereof;

(4) revising paragraph (3) of subsection (j) by striking "(2)(D)" and inserting "(1)" in lieu thereof; and

(5) revising subsection (l) by striking out "required under subsection (a), (h), (i) and (j)" and inserting in lieu thereof "required under subsections (a), (h), and (i)".

(u) Section 8003(a)(3) of the Solid Waste Disposal Act is amended by striking out "discarded materials" and inserting "solid waste" in lieu thereof.

(v) Section 8004(a)(1) of the Solid Waste Disposal Act is amended by striking out "discarded material" and inserting "solid waste" in lieu thereof.

SEC. 8. (a) The Secretary of Transportation and the Administrator of the Environmental Protection Agency shall jointly study the aircraft noise effects from an airport on communities located in a State other than the State in which the airport is located. The criteria to be used in selecting the airport to be studied shall include:

(1) the airport shall be operated by a State, a unit of general purpose local government of a State, or a special purpose entity constituted for the purpose of operating an airport, and

(2) the airport shall have a point on the airport boundary within one nautical mile from a State boundary, and

(3) the airport shall have had in excess of sixty thousand scheduled air carrier departures during the preceding calendar year.

(b) The study shall be conducted in cooperation with the airport operator, appropriate Federal, State, and local officials, and the appropriate metropolitan planning organization.

(c) The Secretary and the Administrator shall prepare and submit to Congress a report within nine months of the conclusion of the study, but no later than twenty-four months after enactment of this section.

Amend the title so as to read: "An Act to extend provisions of the Noise Control Act of 1972 for one year, and for other purposes.".

● Mr. CULVER. Mr. President, on July 19, 1978 the Senate passed S. 3083, the Quiet Communities Act.

It reauthorized the Noise Control Act of 1972 for 2 years and directs a change in focus for the Environmental Protection Agency (EPA) from setting national standards on noise sources to undertaking a comprehensive program of research, technical assistance, and discretionary grants in support of noise control programs at the state and local levels. This legislation is based on testimony taken at the first comprehensive oversight hearings by the Senate Resources Protection Subcommittee on the Noise Control Act in several years.

Comparable legislation was considered by the Subcommittee on Transportation and Commerce of the House Committee on Interstate and Foreign Commerce. The subcommittee is chaired by Mr. ROONEY, the distinguished Congressman from Pennsylvania. Under his able leadership a bill was approved by the committee in May and passed by the House on October 10, 1978.

The House adopted the basic provisions of S. 3083 after making three changes. These changes do not affect the programs established in the act and are acceptable to the Senate Committee on Environment and Public Works.

Briefly, the proposed amendments by the House reduce the authorization to 1 year, through fiscal year 1979; mandate a study by EPA and the Department of Transportation of airport noise which affects communities located in another State; and reiterate that no actions or plans developed under the act shall be inconsistent with existing Federal authority to regulate sources of noise in interstate commerce.

The Senate and House versions of the bill each contain technical amendments to the Resource Conservation and Recovery Act, Public Law 94–580. Those changes have been developed to correct certain errors in the drafting of the original legislation during the close of the 94th Congress 2 years ago.

Mr. President, the Quiet Communities Act should provide a real boost to States and local communities interested in controlling excessive noise. It is clear that Federal, State, and local governments must work together in a complementary way to reduce unwanted noise.

Mr. President, I commend our colleagues in the House for their action on

this bill, and I urge my fellow Senators to support S. 3083 as amended by the House.●

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the amendments of the House be agreed to en bloc.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

The amendments were agreed to en bloc.

WILLIAM L. SPRINGER BUILDING

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the Committee on Environment and Public Works be discharged from further consideration of H.R. 7305.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the Senate proceed to the immediate consideration of H.R. 7305.

The PRESIDING OFFICER. Without objection, it is so ordered.

The ACTING PRESIDENT pro tempore. The bill will be stated by title.

The assistant legislative clerk read as follows:

A bill (H.R. 7305) to designate a certain Federal building in Champaign, Illinois, the "William L. Springer Building".

The Senate proceeded to consider the bill.

UP AMENDMENT 2098

Mr. ROBERT C. BYRD. Mr. President, I send to the desk an amendment and ask that it be stated.

The ACTING PRESIDENT pro tempore. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from West Virginia (Mr. ROBERT C. BYRD) proposes an unprinted amendment numbered 2098:

On page 1, line 3, insert the following: after "that"

"(a)," and after line 8 insert the following: "(b) This act shall become effective on April 12, 1979.".

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from West Virginia.

The amendment (UP No. 2098) was agreed to.

The amendment was ordered to be engrossed and the bill to be read a third time.

The bill was read the third time, and passed.

Mr. ROBERT C. BYRD. Mr. President, I move to reconsider the vote by which the bill was passed, and I move to lay that motion on the table.

The motion to lay on the table was agreed to.

FEDERAL LIFE AND HEALTH BENEFITS

Mr. ROBERT C. BYRD. Mr. President, I ask that the Chair lay before the Senate a message from the House of Representatives on H.R. 4319.

The PRESIDING OFFICER laid before the Senate the following message from the House of Representatives:

Resolved, That the House agree to the amendment of the Senate to the bill (H.R. 4319) entitled "An Act to amend subchapter III of chapter 83 of title 5, United States Code, to provide that employees who retire after 5 years of service, in certain instances, may be eligible to retain their life and health insurance benefits, and for other purposes", with the following amendment:

In lieu of the matter proposed to be inserted by the said amendment, insert:

That (a) section 8706 of title 5, United States Code, is amended—

(1) by striking out subsections (b) and (c) and inserting in lieu thereof the following new subsection:

"(b)(1) If on the date the insurance would otherwise stop the employee retires on an immediate annuity and has been insured under this chapter throughout—

"(A) the 5 years of service immediately preceding such date, or

"(B) the full period or periods of service during which the employee was entitled to be insured, if less than 5 years,

life insurance only may be continued, without cost to the employee, under conditions determined by the Commission.

"(2) If on the date the insurance would otherwise stop the employee is receiving compensation under subchapter I of chapter 81 of this title because of disease or injury to the employee and has been insured under this chapter throughout—

"(A) the 5 years of service immediately preceding such date, or

"(B) the full period or periods of service during which the employee was entitled to be insured, if less than 5 years,

life insurance only may be continued, without cost to the employee, under conditions determined by the Commission, during the period the employee is receiving compensation for work injuries and is held by the Secretary of Labor or his delegate to be unable to return to duty.

"(3) The amount of life insurance continued under paragraph (1) or paragraph (2) of this subsection shall be reduced by 2 percent at the end of each full calendar month after the date the employee becomes 65 years of age and is retired or is receiving such compensation for disease or injury. The Commission shall prescribe minimum amounts, not less than 25 percent of the amount of life insurance in force before the first reduction, to which the insurance may be reduced.";

(2) by redesignating subsections (d) through (f) as subsections (c) through (e), respectively; and

(3) by striking out "(a)–(c)" in subsection (d), as redesignated by paragraph (2), and inserting in lieu thereof "(a) and (b)".

(b) Section 8705(a) of title 5, United States Code, is amended by striking out "or (c)".

(c) Section 8714a of title 5, United States Code, is amended—

(1) by striking out "8706(d)" in subsection (c)(1) and inserting in lieu thereof "8706(c)";

(2) by amending subsection (c)(2) to read as follows:

"(2)(A) In the case of any employee who retires on an immediate annuity and has been insured under this section throughout—

"(i) the 5 years of service immediately preceding the date of such retirement, or

"(ii) the full period or periods of service during which the employee was entitled to be insured, if less than 5 years,

the amount of optional life insurance only which has been in force throughout such period may be continued, under conditions determined by the Commission.

"(B) In the case of any employee who becomes entitled to receive compensation under subchapter I of chapter 81 of this title because of disease or injury to the employee and has been insured under this section throughout—

"(i) the 5 years of service immediately preceding the date such employee becomes entitled to such compensation, or

"(ii) the full period or periods of service during which the employee was entitled to be insured, if less than 5 years,

the amount of optional life insurance only which has been in force throughout such period may be continued, under conditions determined by the Commission, during the period the employee is receiving such compensation for disease or injury and is held by the Secretary of Labor or his delegate to be unable to return to duty.

"(C) The amount of optional life insurance continued under subparagraph (A) or subparagraph (B) of this paragraph shall be subject to the same monthly reductions as required for regular life insurance under section 8706(b)(3) of this title."; and

(3) by striking out "or 8706(c)" in subsection (d).

SEC. 2. Section 8901(3)(A) of title 5, United States Code, is amended by striking out "12" and inserting in lieu thereof "5".

SEC. 3. The amendments made by this Act shall take effect on the date of the enactment of this Act.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the amendment be concurred in.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

H.R. 13892—TO AMEND TITLE 28 OF THE UNITED STATES CODE

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the Chair lay before the Senate a message from the House of Representatives on H.R. 13892.

The ACTING PRESIDENT pro tempore laid before the Senate H.R. 13892, an act to amend title 28 of the United States Code to provide that the requirement that each U.S. attorney and U.S. marshal reside in the district for which he is appointed shall not apply to an individual appointed to such a position for the Northern Mariana Islands if such individual is at the same time serving in the same capacity in another district.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the bill be considered as having been read the first and second times and that the Senate proceed to its immediate consideration.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

The bill was considered, ordered to a third reading, read the third time, and passed.

Mr. ROBERT C. BYRD. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. BAKER. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

H.R. 13650—AN ACT TO AUTHORIZE THE SECRETARY OF ENERGY TO ENTER INTO COOPERATIVE AGREEMENTS WITH CERTAIN STATES

Mr. ROBERT C. BYRD. Mr. President, I ask that the Chair lay before the Senate a message from the House on H.R. 13650.

The ACTING PRESIDENT pro tempore. Laid before the Senate H.R. 13650, an act to authorize the Secretary of Energy to enter into cooperative agreements with certain States respecting

residual radioactive material at existing sites, to provide for the regulation of uranium mill tailings under the Atomic Energy Act of 1954, and for other purposes.

The Senate proceeded to consider the bill.

UP AMENDMENT NO. 2099

Mr. GARN. Mr. President, I send to the desk an amendment in the nature of a substitute——

Mr. ABOUREZK. Mr. President, may we know what that is?

Mr. BAKER. The uranium mill tailings bill.

Mr. GARN. Mr. President, I send to the desk an amendment in the nature of a substitute to the text of H.R. 13650 and ask for its immediate consideration.

The ACTING PRESIDENT pro tempore. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Utah (Mr. GARN) proposes an unprinted amendment numbered 2099.

Mr. GARN. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

Strike out all after the enacting clause and insert in lieu thereof the following:

SHORT TITLE AND TABLE OF CONTENTS

SECTION 1. This Act may be cited as the "Uranium Mill Tailings Radiation Control Act of 1978".

TABLE OF CONTENTS

Sec. 1. Short title and table of contents.
Sec. 2. Findings and purposes.
TITLE I—REMEDIAL ACTION PROGRAM
Sec. 101. Definitions.
Sec. 102. Designation of processing sites.
Sec. 103. State cooperative agreements.
Sec. 104. Acquisition and disposition of land and materials.
Sec. 105. Indian tribe cooperative agreements.
Sec. 106. Acquisition of lands by Secretary.
Sec. 107. Financial assistance.
Sec. 108. Remedial action.
Sec. 109. Rules.
Sec. 110. Enforcement.
Sec. 111. Public participation.
Sec. 112. Termination; authorization.
Sec. 113. Limitation.
Sec. 114. Reports to Congress.
Sec. 115. Active operations; liability for remedial action.
TITLE II—URANIUM MILL TAILINGS LICENSING AND REGULATIONS
Sec. 201. Definition.
Sec. 202. Custody of disposal site.
Sec. 203. Authority to establish certain requirements.
Sec. 204. Cooperation with States.
Sec. 205. Authorities of Commission respecting certain byproduct material.
Sec. 206. Authority of Environmental Protection Agency respecting certain byproduct material.
Sec. 207. Authorization of appropriations for grants.
Sec. 208. Effective date.
Sec. 209. Consolidation of licenses and procedures.
TITLE III—STUDY AND DESIGNATION OF TWO MILL TAILINGS SITES IN NEW MEXICO
Sec. 301. Study.
Sec. 302. Designation by Secretary.

FINDINGS AND PURPOSES

SEC. 2 (a) The Congress finds that uranium mill tailings located at active and inactive mill operations may pose a potential and significant radiation health hazard to the public, and that the protection of the public health, safety, and welfare and the regulation of interstate commerce require that every reasonable effort be made to provide for the stabilization, disposal, and control in a safe and environmentally sound manner of such tailings in order to prevent or minimize radon diffusion into the environment and to prevent or minimize other environmental hazards from such tailings.

(b) The purposes of this Act are to provide—

(1) in cooperation with the interested States, Indian tribes, and the persons who own or control inactive mill tailings sites, a program of assessment and remedial action at such sites, including, where appropriate, the reprocessing of tailings to extract residual uranium and other mineral values where practicable, in order to stabilize and control such tailings in a safe and environmentally sound manner and to minimize or eliminate radiation health hazards to the public, and

(2) a program to regulate mill tailings during uranium or thorium ore processing at active mill operations and after termination of such operations in order to stabilize and control such tailings in a safe and environmentally sound manner and to minimize or eliminate radiation health hazards to the public.

TITLE I—REMEDIAL ACTION PROGRAM

DEFINITIONS

SEC. 101. For purposes of this title—

(1) The term "Secretary" means the Secretary of Energy.

(2) The term "Commission" means the Nuclear Regulatory Commission.

(3) The term "Administrator" means the Administrator of the Environmental Protection Agency.

(4) The term "Indian tribe" means any tribe, band, clan, group, pueblo, or community of Indians recognized as eligible for services provided by the Secretary of the Interior to Indians.

(5) The term "person" means any individual, association, partnership, corporation, firm, joint venture, trust, government entity, and any other entity, except that such term does not include any Indian or Indian tribe.

(6) The term "processing site" means—

(A) any site, including the mill, containing residual radioactive materials at which all or substantially all of the uranium was produced for sale to any Federal agency prior to January 1, 1971 under a contract with any Federal agency, except in the case of a site at or near Slick Rock, Colorado, unless—

(i) such site was owned or controlled as of January 1, 1978, or is thereafter owned or controlled, by any Federal agency, or

(ii) a license (issued by the Commission or its predecessor agency under the Atomic Energy Act of 1954 or by a State as permitted under section 274 of such Act) for the production at such site of any uranium or thorium product derived from ores is in effect on January 1, 1978, or is issued or renewed after such date; and

(B) any other real property or improvement thereon which—

(i) is in the vicinity of such site, and

(ii) is determined by the Secretary, in consultation with the Commission, to be contaminated with residual radioactive materials derived from such site.

Any ownership or control of an area by a Federal agency which is acquired pursuant to a cooperative agreement under this title shall not be treated as ownership or control by such agency for purposes of subparagraph (A)(i). A license for the production of any uranium product from residual radioactive materials shall not be treated as a license for production from ores within the meaning of subparagraph (A)(ii) if such production is in accordance with section 108(b).

(7) The term "residual radioactive material" means—

(A) waste (which the Secretary determines to be radioactive) in the form of tailings resulting from the processing of ore for the extraction of uranium and other valuable constituents of the ores; and

(B) other waste (which the Secretary determines to be radioactive) at a processing site which relate to such processing, including any residual stock of unprocessed ores or low-grade materials.

(8) The term "tailings" means the remaining portion of a metal-bearing ore after some or all of such metal, such as uranium, has been extracted.

(9) The term "Federal agency" includes any executive agency as defined in section 105 of title 5 of the United States Code.

(10) The term "United States" means the 48 contiguous States and Alaska, Hawaii, Puerto Rico, the District of Columbia, and the territories and possessions of the United States.

DESIGNATION OF PROCESSING SITES

SEC. 102. (a)(1). As soon as practicable, but no later than one year after enactment of this Act, the Secretary shall designate processing sites at or near the following:

Salt Lake City, Utah.
Green River, Utah.
Mexican Hat, Utah.
Durango, Colorado.
Grand Junction, Colorado.
Rifle, Colorado (two sites).
Gunnison, Colorado.
Naturita, Colorado.
Maybell, Colorado.
Slick Rock, Colorado (two sites).
Shiprock, New Mexico.
Ambrosia Lake, New Mexico.
Riverton, Wyoming.
Converse County, Wyoming.
Lakeview, Oregon.
Falls City, Texas.
Tuba City, Arizona.
Monument Valley, Arizona.
Lowman, Idaho.
Cannonsburg, Pennsylvania.

Subject to the provisions of this title, the Secretary shall complete remedial action at the above listed sites before his authority terminates under this title. The Secretary shall within one year of the date of enactment of this Act also designate all other processing sites within the United States which he determines require remedial action to carry out the purposes of this title. In making such designation, the Secretary shall consult with the Administrator, the Commission, and the affected States, and in the case of Indian lands, the appropriate Indian tribe and the Secretary of the Interior.

(2) As part of his designation under this subsection, the Secretary, in consultation with the Commission, shall determine the boundaries of each such site.

(3) No site or structure with respect to which remedial action is authorized under Public Law 92-314 in Grand Junction, Colorado, may be designated by the Secretary as a processing site under this section.

(b) Within one year from the date of the enactment of this Act, the Secretary shall assess the potential health hazard to the public from the residual radioactive materials at designated processing sites. Based upon such assessment, the Secretary shall, within such one year period, establish priorities for carrying out remedial action at each such site. In establishing such priorities, the Secretary shall rely primarily on the advice of the Administrator.

(c) Within thirty days after making designations of processing sites and establishing the priorities for such sites under this section, the Secretary shall notify the Governor of

each affected State, and, where appropriate, the Indian tribes and the Secretary of the Interior.

(d) The designations made, and priorities established, by the Secretary under this section shall be final and not be subject to judicial review.

(e)(1) The designation of processing sites within one year after enactment under this section shall include, to the maximum extent practicable, the areas referred to in section 101(6)(B).

(2) Notwithstanding the one year limitation contained in this section, the Secretary may, after such one year period, include any area described in section 101(6)(B) as part of a processing site designated under this section if he determines such inclusion to be appropriate to carry out the purposes of this title.

STATE COOPERATIVE AGREEMENTS

SEC. 103. (a) After notifying a State of the designation referred to in section 102 of this title, the Secretary subject to section 113, is authorized to enter into cooperative agreements with such State to perform remedial actions at each designated processing site in such State (other than a site located on Indian lands referred to in section 105). The Secretary shall, to the greatest extent practicable, enter into such agreements and carry out such remedial actions in accordance with the priorities established by him under section 102. The Secretary shall commence preparations for cooperative agreements with respect to each designated processing site as promptly as practicable following the designation of each site.

(b) Each cooperative agreement under this section shall contain such terms and conditions as the Secretary deems appropriate and consistent with the purposes of this Act, including, but not limited to, a limitation on the use of Federal assistance to those costs which are directly required to complete the remedial action selected pursuant to Section 108.

(c)(1) Except where the State is required to acquire the processing site as provided in subsection (a) of section 104, each cooperative agreement with a State under section 103 shall provide that the State shall obtain, in a form prescribed by the Secretary, written consent from any person holding any record interest in the designated processing site for the Secretary or any person designated by him to perform remedial action at such site.

(2) Such written consent shall include a waiver by each such person on behalf of himself, his heirs, successors, and assigns—

(A) releasing the United States of any liability or claim thereof by such person, his heirs, successors, and assigns concerning such remedial action, and

(B) holding the United States harmless against any claim by such person on behalf of himself, his heirs, successors, or assigns arising out of the performance of any such remedial action.

(d) Each cooperative agreement under this section shall require the State to assure that the Secretary, the Commission, and the Administrator and their authorized representatives have a permanent right of entry at any time to inspect the processing site and the site provided pursuant to section 104(b)(1) in furtherance of the provisions of this title and to carry out such agreement and enforce this Act and any rules prescribed under this Act. Such right of entry under this section or section 106 into an area described in section 101(6)(B) shall terminate on completion of the remedial action, as determined by the Secretary.

(e) Each agreement under this section shall take effect only upon the concurrence of the Commission with the terms and conditions thereof.

(f) The Secretary may, in any cooperative agreement entered into under this section or section 105, provide for reimbursement of the actual costs, as determincd by the Secretary, of any remedial action performed with respect to so much of a designated processing site as is described in section 101(6)(B). Such reimbursement shall be made only to a property owner of record at the time such remedial action was undertaken and only with respect to costs incurred by such property owner. No such reimbursement may be made unless—

(1) such remedial action was completed prior to enactment of this Act, and unless the application for such reimbursement was filed by such owner within one year after an agreement under this section or section 105 is approved by the Secretary and the Commission, and

(2) the Secretary is satisfied that such action adequately achieves the purposes of this Act with respect to the site concerned and is consistent with the standards established by the Administrator pursuant to section 275(a) of the Atomic Energy Act of 1954.

ACQUISITION AND DISPOSITION OF LANDS AND MATERIALS

SEC. 104. (a) Each cooperative agreement under section 103 shall require the State, where determined appropriate by the Secretary with the concurrence of the Commission, to acquire any designated processing site, including where appropriate any interest therein. In determining whether to require the State to acquire a designated processing site or interest therein, consideration shall be given to the prevention of windfall profits.

(b)(1) If the Secretary with the concurrence of the Commission determines that removal of residual radioactive material from a processing site is appropriate, the cooperative agreement shall provide that the State shall acquire land (including, where appropriate, any interest therein) to be used as a site for the permanent disposition and stabilization of such residual radioactive materials in a safe and environmentally sound manner.

(2) Acquisition by the State shall not be required under this subsection if a site located on land controlled by the Secretary or made available by the Secretary of the Interior pursuant to section 106(a)(2) is designated by the Secretary, with the concurrence of the Commission, for such disposition and stabilization.

(c) No State shall be required under subsection (a) or (b) to acquire any real property or improvement outside the boundaries of—

(1) that portion of the processing site which is described in section 101(6)(A), and

(2) the site used for disposition of the residual radioactive materials.

(d) In the case of each processing site designated under this title other than a site designated on Indian land, the State shall take such action as may be necessary, and pursuant to regulations of the Secretary under this subsection, to assure that any person who purchases such a processing site after the removal of radioactive materials from such site shall be notified in an appropriate manner prior to such purchase, of the nature and extent of residual radioactive materials removed from the site, including notice of the date when such action took place, and the condition of such site after such action. If the State is the owner of such site, if State shall so notify any prospective purchaser before entering into a contract, option, or other arrangements to sell or otherwise dispose of such site. The Secretary shall issue appropriate rules and regulations to require notice in the local land records of the residual radioactive materials which were located at any processing site and notice of the nature and extent of residual radioactive materials removed from the site, including notice of the date when such action took place.

(e)(1) The terms and conditions of any cooperative agreement with a State under section 103 shall provide that in the case of any lands or interests therein acquired by the State pursuant to subsection (a), the State with the concurrence of the Secretary and the Commission, may—

(A) sell such lands and interests,

(B) permanently retain such land and interests in lands (or donate such lands and interests therein to another governmental entity within such State) for permanent use by such State or entity solely for park, recreational, or other public purposes, or

(C) transfer such lands and interests to the United States as provided in subsection (f).

No lands may be sold under subparagraph (A) without the consent of the Secretary and the Commission. No site may be sold under subparagraph (A) or retained under subparagraph (B) if such site is used for the disposition of residual radioactive materials.

(2) Before offering for sale any lands and interests therein which comprise a processing site, the State shall offer to sell such lands and interests at their fair market value to the person from whom the State acquired them.

(f)(1) Each agreement under section 103 shall provide that title to—

(A) the residual radioactive materials subject to the agreement, and

(B) any lands and interests therein which have been acquired by the State, under subsection (a) or (b), for the disposition of such materials,

shall be transferred by the State to the Secretary when the Secretary (with the concurrence of the Commission) determines that remedial action is completed in accordance with the requirements imposed pursuant to this title. No payment shall be made in connection with the transfer of such property from funds appropriated for purposes of this Act other than payments for any administrative and legal costs incurred in carrying out such transfer.

(2) Custody of any property transferred to the United States under this subsection shall be assumed by the Secretary of such Federal agency as the President may designate. Notwithstanding any other provision of law, upon completion of the remedial action program authorized by this title, such property and minerals shall be maintained pursuant to a license issued by the Commission in such manner as will protect the public health, safety, and the environment. The Commission may, pursuant to such license or by rule or order, require the Secretary or other Federal agency having custody of such property and minerals to undertake such monitoring, maintenance, and emergency measures necessary to protect public health and safety and other actions as the Commission deems necessary to comply with the standards of Section 275(a) of the Atomic Energy Act of 1954. The Secretary or such other Federal agency is authorized to carry out maintenance, monitoring and emergency measures under this subsection, but shall take no other action pursuant to such license, rule or order with respect to such property and minerals unless expressly authorized by Congress after the date of enactment of this Act. The United States shall not transfer title to property or interest therein acquired under this subsection to any person or State, except as provided in subsection (h).

(g) Each agreement under section 103 which permits any sale described in subsection (e)(1)(A) shall provide for the prompt reimbursement to the Secretary from the proceeds of such sale. Such reimbursement shall be in an amount equal to the lesser of—

(1) that portion of the fair market value

of the lands or interests therein which bears the same ratio to such fair market value as the Federal share of the costs of acquisition by the State to such lands or interest therein bears to the total cost of such acquisition, or

(2) the total amount paid by the Secretary with respect to such acquisition.

The fair market value of such lands or interest shall be determined by the Secretary as of the date of the sale by the State. Any amounts received by the Secretary under this title shall be deposited in the Treasury of the United States as miscellaneous receipts.

(h) No provision of any agreement under section 103 shall prohibit the Secretary of the Interior, with the concurrence of the Secretary of Energy and the Commission, from disposing of any subsurface mineral rights by sale or lease (in accordance with laws of the United States applicable to the sale, lease, or other disposal of such rights) which are associated with land on which residual radioactive materials are disposed and which are transferred to the United States as required under this section if the Secretary of the Interior takes such action as the Commission deems necessary pursuant to a license issued by the Commission to assure that the residual radioactive materials will not be disturbed by reason of any activity carried on following such disposition. If any such materials are disturbed by any such activity, the Secretary of the Interior shall insure, prior to the disposition of the minerals, that such materials will be restored to a safe and environmentally sound condition as determined by the Commission, and that the costs of such restoration will be borne by the person acquiring such rights from the Secretary of the Interior or from his successor or assign.

INDIAN TRIBE COOPERATIVE AGREEMENTS

SEC. 105. (a) After notifying the Indian tribe of the designation pursuant to section 102 of this title, the Secretary, in consultation with the Secretary of the Interior, is authorized to enter into a cooperative agreement, subject to section 113, with any Indian tribe to perform remedial action at a designated processing site located on land of such Indian tribe. The Secretary shall, to the greatest extent practicable, enter into such agreements and carry out such remedial actions in accordance with the priorities established by him under section 102. In performing any remedial action under this section and carrying out any continued monitoring or maintenance respecting residual radioactive materials associated with any site subject to a cooperative agreement under this section, the Secretary shall make full use of any qualified members of Indian tribes resident in the vicinity of any such site. Each such agreement shall contain such terms and conditions as the Secretary deems appropriate and consistent with the purposes of this Act. Such terms and conditions shall require the following:

(1) The Indian tribe and any person holding any interest in such land shall execute a waiver (A) releasing the United States of any liability or claim thereof by such tribe or person concerning such remedial action and (B) holding the United States harmless against any claim arising out of the performance of any such remedial action.

(2) The remedial action shall be selected and performed in accordance with section 108 by the Secretary or such person as he may designate.

(3) The Secretary, the Commission, and the Administrator and their authorized representatives shall have a permanent right of entry at any time to inspect such processing site in furtherance of the provisions of this title, to carry out such agreement, and to enforce any rules prescribed under this Act. Each agreement under this section shall take effect only upon concurrence of the Commission with the terms and conditions thereof.

(b) When the Secretary with the concurrence of the Commission determines removal of residual radioactive materials from a processing site on lands described in subsection (a) to be appropriate, he shall provide, consistent with other applicable provisions of law, a site or sites for the permanent disposition and stabilization in a safe and environmentally sound manner of such residual radioactive materials. Such materials shall be transferred to the Secretary (without payment therefor by the Secretary) and permanently retained and maintained by the Secretary under the conditions established in a license issued by the Commission, subject to section 104(f)(2) and (h).

ACQUISITION OF LAND BY SECRETARY

SEC. 106. Where necessary or appropriate in order to consolidate in a safe and environmentally sound manner the location of residual radioactive materials which are removed from processing sites under cooperative agreements under this title, or where otherwise necessary for the permanent disposition and stabilization of such materials in such manner—

(1) The Secretary may acquire land and interests in land for such purposes by purchase, donation, or under any other authority of law or

(2) the Secretary of the Interior may make available public lands administered by him for such purposes in accordance with other applicable provisions of law.

Prior to acquisition of land under paragraph (1) or (2) of this subsection in any State, the Secretary shall consult with the Governor of such State. No lands may be acquired under such paragraph (1) or (2) in any State in which there is no (1) processing site designated under this title or (2) active uranium mill operation, unless the Secretary has obtained the consent of the Governor of such State. No lands controlled by any Federal agency may be transferred to the Secretary to carry out the purposes of this Act without the concurrence of the chief administrative officer of such agency.

FINANCIAL ASSISTANCE

SEC. 107. (a) In the case of any designated processing site for which an agreement is executed with any State for remedial action at such site, the Secretary shall pay 90 per centum of the actual cost of such remedial action, including the actual costs of acquiring such site (and any interest therein) or any disposition site (and any interest therein) pursuant to section 103 of this title, and the State shall pay the remainder of such costs from non-Federal funds.

The Secretary shall not pay the administrative costs incurred by any State to develop, prepare, and carry out any cooperative agreement executed with such State under this title, except the proportionate share of the administrative costs associated with the acquisition of lands and interests therein acquired by the State pursuant to this title.

(b) In the case of any designated processing site located on Indian lands, the Secretary shall pay the entire cost of such remedial action.

(c) In addition to the 75 per centum authorized to be paid under title II of Public Law 92-314 to the State for carrying out a cooperative arrangement for remedial action under section 202 of such Act, there is authorized to be paid to the State from the amounts made available under this Act, 15 per centum of the total cost of the remedial actions taken or to be taken under such section 202.

REMEDIAL ACTION

SEC. 108. (a)(1) The Secretary or such person as he may designate shall select and perform remedial actions at designated processing sites and disposal sites in accordance with the general standards prescribed by the Administrator pursuant to section 275 a. of the Atomic Energy Act of 1954. The State shall participate fully in the selection and performance of a remedial action for which it pays part of the cost. Such remedial action shall be selected and performed with the concurrence of the Commission and in consultation, as appropriate, with the Indian tribe and the Secretary of the Interior.

(2) The Secretary shall use technology in performing such remedial action as will insure compliance with the general standards promulgated by the Administrator under section 275 a. of the Atomic Energy Act of 1954 and will assure the safe and environmentally sound stabilization of residual radioactive materials, consistent with existing law. No such remedial action may be undertaken under this section before the promulgation by the Administrator of such standards.

(b) Prior to undertaking any remedial action at a designated site pursuant to this Title, the Secretary shall request expressions of interest from private parties regarding the remilling of the residual radioactive materials at the site and, upon receipt of any expression of interest, the Secretary shall evaluate among other things the mineral concentration of the residual radioactive materials at each designated processing site to determine whether, as a part of any remedial action program, recovery of such minerals is practicable. The Secretary, with the concurrence of the Commission, may permit the recovery of such minerals, under such terms and conditions as he may prescribe to carry out the purposes of this Title. No such recovery shall be permitted unless such recovery is consistent with remedial action. Any person permitted by the Secretary to recover such mineral shall pay to the Secretary a share of the net profits derived from such recovery, as determined by the Secretary. Such share shall not exceed the total amount paid by the Secretary for carrying out remedial action at such designated site. The person recovering such minerals shall bear all costs of such recovery. Any person carrying out mineral recovery activities under this paragraph shall be required to obtain any necessary license under the Atomic Energy Act of 1954 or under State law as permitted under section 274 of such Act.

RULES

SEC. 109. The Secretary may prescribe such rules consistent with the purposes of this Act as he deems appropriate pursuant to title V of the Department of Energy Organization Act.

ENFORCEMENT

SEC. 110. (a)(1) Any person who violates any provision of this title or any cooperative agreement entered into pursuant to this title or any rule prescribed under this Act concerning any designated processing site, disposition site, or remedial action shall be subject to an assessment by the Secretary of a civil penalty of not more than $1.000 per day per violation. Such assessment shall be made by order after notice and an opportunity for a public hearing, pursuant to section 554 of title 5, United States Code.

(2) Any person against whom a penalty is assessed under this section may, within sixty calendar days after the date of the order of the Secretary assessing such penalty, institute an action in the United States court of appeals for the appropriate judicial circuit for judicial review of such order in accordance with chapter 7 of title 5, United States Code. The court shall have jurisdiction to enter a judgment affirming, modifying, or setting aside in whole or in part, the order of the Secretary, or the court may remand the proceeding to the Secretary for such further action as the court may direct.

(3) If any person fails to pay an assessment of a civil penalty after it has become a final and unappealable order, the Secretary

shall institute an action to recover the amount of such penalty in any appropriate district court of the United States. In such action, the validity and appropriateness of such final assessment order or judgment shall not be subject to review. Section 402(d) of the Department of Energy Organization Act shall not apply with respect to the functions of the Secretary under this section.

(4) No civil penalty may be assessed against the United States or any State or political subdivision of a State or any official or employee of the foregoing.

(5) Nothing in this section shall prevent the Secretary from enforcing any provision of this title or any cooperative agreement or any such rule by injunction or other equitable remedy.

(b) Subsection (a) shall not apply to any licensing requirement under the Atomic Energy Act of 1954. Such licensing requirements shall be enforced by the Commission as provided in such Act.

PUBLIC PARTICIPATION

SEC. 111. In carrying out the provisions of this title, including the designation of processing sites, establishing priorities for such sites, the selection of remedial actions, and the execution of cooperative agreements, the Secretary, the Administrator, and the Commission shall encourage public participation and, where appropriate, the Secretary shall hold public hearings relative to such matters in the States where processing sites and disposal sites are located.

TERMINATION; AUTHORIZATION

SEC. 112. (a) The authority of the Secretary to perform remedial action under this title shall terminate on the date seven years after the date of promulgation by the Administrator of general standards applicable to such remedial action unless such termination date is specifically extended by an Act of Congress enacted after the date of enactment of this Act.

(b) The amounts authorized to be appropriated to carry out the purposes of this title by the Secretary, the Administrator, the Commission, and the Secretary of the Interior shall not exceed such amounts as are established in annual authorization Acts for fiscal year 1979 and each fiscal year thereafter applicable to the Department of Energy. Any sums appropriated for the purposes of this title shall be available until expended.

LIMITATION

SEC. 113. The authority under this title to enter into contracts or other obligations requiring the United States to make outlays may be exercised only to the extent provided in advance in annual authorization and appropriation Acts.

REPORTS TO CONGRESS

SEC. 114. (a) Beginning on January 1, 1980, and each year thereafter until January 1, 1986, the Secretary shall submit a report to the Congress with respect to the status of the actions required to be taken by the Secretary, the Commission, the Secretary of the Interior, the Administrator, and the States and Indian tribes under this Act and any amendments to other laws made by this Act. Each report shall—

(1) include data on the actual and estimated costs of the program authorized by this title;

(2) describe the extent of participation by the States and Indian tribes in this program;

(3) evaluate the effectiveness of remedial actions, and describe any problems associated with the performance of such actions; and

(4) contain such other information as may be appropriate.

Such report shall be prepared in consultation with the Commission, the Secretary of the Interior, and the Administrator and shall contain their separate views, comments, and recommendations, if any. The Commission shall submit to the Secretary and Congress such portion of the report under this subsection as relates to the authorities of the Commission under title II of this Act.

(b) Not later than July 1, 1979, the Secretary shall provide a report to the Congress which identifies all sites located on public or acquired lands of the United States containing residual radioactive materials and other radioactive waste (other than waste resulting from the production of electric energy) and specifies which Federal agency has jurisdiction over such sites. The report shall include the identity of property and other structures in the vicinity of such site that are contaminated or may be contaminated by such materials and the actions planned or taken to remove such materials. The report shall describe in what manner such sites are adequately stabilized and otherwise controlled to prevent radon diffusion from such sites into the environment and other environmental harm. If any site is not so stabilized or controlled, the report shall describe the remedial actions planned for such site and the time frame for performing such actions. In preparing the reports under this section, the Secretary shall avoid duplication of previous or ongoing studies and shall utilize all information available from other departments and agencies of the United States respecting the subject matter of such report. Such agencies shall cooperate with the Secretary in the preparation of such report and furnish such information as available to them and necessary for such report.

(c) Not later than January 1, 1980, the Administrator, in consultation with the Commission, shall provide a report to the Congress which identifies the location and potential health, safety, and environmental hazards of uranium mine wastes together with recommendations, if any, for a program to eliminate these hazards.

(d) Copies of the reports required by this section to be submitted to the Congress shall be separately submitted to the Committees on Interior and Insular Affairs and on Interstate and Foreign Commerce of the House of Representatives and the Committee on Energy and Natural Resources of the Senate.

(e) The Commission, in cooperation with the Secretary, shall ensure that any relevant information, other than trade secrets and other proprietary information otherwise exempted from mandatory disclosure under any other provision of law, obtained from the conduct of each of the remedial actions authorized by this Title and the subsequent perpetual care of those residual radioactive materials is documented systematically, and made publicly available conveniently for use.

ACTIVE OPERATIONS; LIABILITY FOR REMEDIAL ACTION

SEC. 115. (a) No amount may be expended under this title with respect to any site licensed by the Commission under the Atomic Energy Act of 1954 or by a State as permitted under section 274 of such Act at which production of any uranium product from ores (other than from residual radioactive materials) takes place.

(b) In the case of each processing site designated under this title, the Attorney General shall conduct a study to determine the identity and legal responsibility which any person (other than the United States, a State, or Indian tribe) who owned or operated or controlled (as determined by the Attorney General) such site before the date of the enactment of this Act may have under any law or rule of law for reclamation or other remedial action with respect to such site. The Attorney General shall publish the results of such study, and provide copies thereof to the Congress, as promptly as practicable following the date of the enactment of this Act. The Attorney General, based on such study, shall, to the extent he deems it appropriate and in the public interest, take such action under any provision of law in effect when uranium was produced at such site to require payment by such person of all or any part of the costs incurred by the United States for such remedial action for which he determines such person is liable.

TITLE II—URANIUM MILL TAILINGS LICENSING AND REGULATION DEFINTION

SEC. 201. Section 11 e. of the Atomic Energy Act of 1954, as amended, is amended to read as follows:

"e. The term 'byproduct material' means (1) any radioactive material (except special nuclear material) yielded in or made radioactive by exposure to the radiation incident to the process of producing or utilizing special nuclear material, and (2) the tailings or wastes produced by the extraction or concentration of uranium or thorium from any ore processed primarily for its source material content.".

CUSTODY OF DISPOSAL SITE

SEC. 202. (a) Chapter 8 of the Atomic Energy Act of 1954, as amended, is amended by adding the following new section at the end thereof:

"SEC. 83. OWNERSHIP AND CUSTODY OF CERTAIN BYPRODUCT MATERIAL AND DISPOSAL SITES.—

"a. Any license issued or renewed after the effective date of this section under section 62 or section 81 for any activity which results in the production of any byproduct material as defined in section 11 e. (2) shall contain such terms and conditions as the Commission determines to be necessary to assure that, prior to termination of such license—

"(1) the licensee will comply with decontamination, decommissioning, and reclamation standards prescribed by the Commission for sites (A) at which ores were processed primarily for their source material content or (B) at which such byproduct material is deposited, and

"(2) ownership of any byproduct material defined in section 11 e. (2) which resulted from such licensed activity shall be transferred to the United States, or at the option of the affected State, to the State. Any license in effect on the date of the enactment of this section shall either contain such terms and conditions on renewal thereof after the effective date of this section, or shall comply with paragraphs (1) and (2) such terms and conditions upon the termination of such license, whichever first occurs.

"b. (1) The Commission shall require by rule, regulation, or order, in accordance with the requirements of section 181 of this Act, that title to land on which byproduct material is disposed be transferred to the United States, or at the option of the affected State, to the State, at the time of termination of any license for the generation or possession of such material unless the Commission determines in accordance with the requirements of section 181 of this Act that such transfer of title is not necessary or desirable to protect health or minimize danger to life or property in connection with the disposal of such byproduct material. Any such rule, regulation, or order shall specify standards for the transfer of title to such land, and to such material disposed of on the land, to the State or the United States, including:

(A) standards to minimize the need for future remedial work; (B) standards to minimize the cost, including the cost to the State or the United States, for any long-term maintenance and monitoring; and (C) standards to permit the reservation of rights by the transferor to the future reprocessing of byproduct material, as defined in section 11 e. (2) of this Act, and to the future use of the surface or subsurface estate, consistent with any standards or requirements promulgated

by the Commission which are applicable to the generation, possession of transfer of byproduct material, as so defined.

"(2) If transfer to the United States of title to such byproduct material and such land is required in accordance with paragraph (1) of this subsection, the Secretary of Energy or the Federal agency designated by the President under subsection c. shall, following the Commission's determination of compliance under subsection d., assume title and custody of the byproduct material and land transferred as provided in this subsection. Such officer or instrumentality shall maintain such material and land in such manner as will protect the public health and safety and the environment. Such custody may be transferred to another officer or instrumentality of the United States only upon approval of the President upon his determination that such officer or instrumentality meets the requirements of subsection c.

"(3) The Commission, may, pursuant to a license, or by rule or order, require the Secretary or other Federal agency having custody of such property and materials to undertake such monitoring, maintenance, and emergency measures as are necessary to protect the public health and safety and such other actions as the Commission deems necessary to comply with the standards promulgated pursuant to section 84 of this Act. The Secretary or such other Federal agency is authorized to carry out maintenance, monitoring, and emergency measures but shall take no other action pursuant to such license, rule, or order, with respect to such property and materials unless expressly authorized by Congress after the date of enactment of this Act.

"(4) The transfer of title to land or materials to a State or the United States pursuant to this subsection shall not relieve any licensee of liability for any fraudulent or negligent acts done prior to such transfer.

"(5) Material and land transferred to the United States in accordance with this subsection shall be transferred without cost to the United States (other than administrative and legal costs incurred in carrying out such transfer). The United States shall not transfer title to material or property acquired under this subsection to any person, unless such transfer is in the same manner as provided under section 104(h) of the Uranium Mill Tailings Radiation Control Act of 1978.

"(6) The provisions of this subsection respecting transfer of title and custody to land shall not apply in the case of lands held in trust by the United States for any Indian tribe or lands owned by such Indian tribe subject to a restriction against alienation imposed by the United States. In the case of such lands which are used for the disposal of byproduct material as defined in section 11 e. (2), the licensee shall be required to enter into such arrangements with the Commission as may be appropriate to assure the long-term maintenance and monitoring of such lands by the United States

"c. If transfer to the United States of title to such byproduct material and such land is required in accordance with subsection b., the Secretary of Energy or such Federal agency as the President shall designate shall have custody of such property or material. The President shall not designate the Commission for such purposes.

"d. Upon termination of any license to which this section applies, the Commission shall determine whether or not the licensee has complied with all applicable standards and requirements under such license.".

(b) This section shall be effective three years after the enactment of this Act.

(c) The table of contents for chapter 8 of the Atomic Energy Act of 1954, as amended, is amended by inserting the following new item after the item relating to section 82:

"Sec. 83. Ownership and custody of certain byproduct material and disposal sites.".

AUTHORITY TO ESTABLISH CERTAIN REQUIREMENTS

Sec. 203. Section 161 of the Atomic Energy Act of 1954, as amended, is amended by adding the following new subsection at the end thereof:

"x. establish by rule, regulation, or order, after public notice, and in accordance with the requirements of Section 181 of this Act, such standards and instructions as the Commission may deem necessary or desirable to ensure—

"(1) that an adequate bond, surety, or other financial arrangement (as determined by the Commission) will be provided, before termination of any license for byproduct material as defined in section 11 e. (2), by a license to permit the completion of all requirements established by the Commission for the decontamination, decommissioning, and reclamation of sites, structures, and equipment used in conjunction with byproduct material as so defined, and

"(2) that—

"(A) in the case of such license issued or renewed after the date of the enactment of this subsection, to the maximum extent practicable, the need for long term maintenance and monitoring of such sites, structures and equipment after termination of such license will be minimized; and

"(B) in the case of each license for such material (whether in effect on the date of the enactment of this section or issued or renewed thereafter), if the Commission determines that any such long-term maintenance and monitoring is necessary, the licensee, before termination of any license for byproduct material as defined in section 11 e. (2), will make available such bonding, surety, or other financial arrangements as may be necessary to assure such long-term maintenance and monitoring.".

* * * * *

subsection shall take into account, as determined by the Commission, so as to avoid unnecessary duplication and expense, performance bonds or other financial arrangements which are required by other federal agencies or state agencies and/or other local governing bodies for such decommissioning, decontamination and reclamation and long-term maintenance and monitoring, except that nothing in this paragraph shall be construted to require that the Commission accept such bonds or arrangements if the Commission determines that such bonds or arrangements are not adequate to carry out subparagraphs (1) and (2) of this subsection.".

COOPERATION WITH STATES

Sec. 204. (a) Section 274 b. of the Atomic Energy Act of 1954, as amended, is amended by adding "as defined in section 11 e. (1)" after the words "byproduct materials" in paragraph (1); by renumbering paragraphs (2) and (3) as paragraphs (3) and (4); and by inserting the following new paragraph immediately after paragraph (1):

"(2) byproduct materials as defined in section 11 e. (2);".

(b) Section 274 d. (2) of such Act is amended by inserting the following before the word "compatible": "in accordance with the requirements of subsection o. and in all other respects".

(c) Section 274 n. of such Act is amended by adding the following new sentence at the end thereof: "As used in this section, the term 'agreement' includes any amendment to any agreement.".

(d) Section 274 j. of such Act is amended—

(1) by inserting "all or part of" after "suspend";

(2) by inserting "(1)" after "finds that"; and

(3) by adding at the end before the period the following: ", or (2) the State has not complied with one or more of the requirements of this section. The Commission shall periodically review such agreements and actions taken by the States under the agreements to ensure compliance with the provisions of this section".

(e) (1) Section 274 of such Act is amended by adding the following new subsection at the end thereof:

"o. In the licensing and regulation of byproduct material as defined in section 11 e. (2) of this Act or of any activity which results in the production of byproduct material as so defined under an agreement entered into pursuant to subsection b., a State shall require—

"(1) compliance with the requirements of subsection b. of section 83 (respecting ownership of byproduct material and land), and

"(2) compliance with standards which shall be adopted by the State for the protection of the public health, safety, and the environment from radiation hazards associated with such material which are equivalent, to the extent practicable, or more stringent than, standards adopted and enforced by the Commission for the same purpose, including requirements and standards, promulgated by the Commission and the Administrator of the Environmental Protection Agency pursuant to sections 83, 84, and 275, and

"(3) procedures which—

(A) in the case of licenses, provide procedures under State law which include

(i) an opportunity, after public notice, for written comments and a public hearing, with a transcript, and

(ii) a written determination which is based upon findings included in such determination and upon the evidence presented during the public comment period and which is subject to judicial review;

(B) in the case of rulemaking, provide an opportunity for public participation through written comments or a public hearing and which provide for judicial review of the rule;

"(C) require for each license which has a significant impact on the human environment a written analysis, which shall be available to the public before the commencement of any such proceedings, of the impact of such license, including any activities conducted pursuant thereto, on the environment, which analysis shall include—

"(i) an assessment of the radiological and nonradiological impacts to the public health of the activities to be conducted pursuant to such license;

(ii) an assessment of any impact on any waterway and groundwater resulting from such activities;

(iii) consideration of alternatives, including alternative sites and engineering methods, to the activities to be conducted pursuant to such license; and

(iv) consideration of the long-term impacts, including decommissioning, decontamination, and reclamation impacts, associated with activities to be conducted pursuant to such license, including the management of any byproduct material as defined by section 11e(2); and

"(D) prohibit any major construction activity with respect to such material prior to complying with the provisions of subparagraph (C).

If any State under such agreement imposes upon any licensee any requirement for the payment of funds to such State for the reclamation or long-term maintenance and monitoring of such material, and if transfer to the United States of such material is required in accordance with section 83 b. of this Act, such agreement shall be amended by the Commission to provide that such State shall transfer to the United States upon termination of the license issued to such licensee the total amount collected by such State from such licensee for such purpose. If such payments are required, they must be

sufficient to ensure compliance with the standards established by the Commission pursuant to section 161 x. of this Act. No State shall be required under paragraph (3) to conduct proceedings concerning any license or regulation which would duplicate proceedings conducted by the Commission.".

(f) Section 274 c. of such Act is amended by inserting the following new sentence after paragraph (4) thereof: "The Commission shall also retain authority under any such agreement to make a determination that all applicable standards and requirements have been met prior to termination of a license for byproduct material as defined in section 11 e. (2).".

(g) Nothing in any amendment made by this section shall preclude any State from exercising any other authority as permitted under the Atomic Energy Act of 1954 respecting any byproduct material defined in section 11 e. (2) of the Atomic Energy Act of 1954.

(h) (1) On or before the date three years after the date of the enactment of this Act, notwithstanding any amendment made by this title, any State may exercise any authority under State law respecting byproduct material, as defined in section 11 e. (2) of the Atomic Energy Act of 1954, in the same manner, and to the same extent, as permitted before the enactment of this Act.

(2) An agreement entered into with any State as permitted under section 274 of the Atomic Energy Act of 1954 with respect to byproduct material as defined in section 11 e. (2) may be entered into at any time after the date of the enactment of this Act but no such agreement may take effect before the date three years after the date of the enactment of this Act.

AUTHORITIES OF COMMISSION RESPECTING CERTAIN BYPRODUCT MATERIAL

SEC. 205. (a) Chapter 8 of the Atomic Energy Act of 1954, as amended, is amended by adding the following new section at the end thereof:

"SEC. 84. AUTHORITIES OF COMMISSION RESPECTING CERTAIN BYPRODUCT MATERIAL.—

"a. The Commission shall insure that the management of any byproduct material as defined in section 11 e. (2) is carried out in such manner as—

"(1) the Commission deems appropriate to protect the public health and safety and the environment, from radiological and nonradiological hazards associated with the processing and with the possession and transfer of such material,

"(2) conforms with applicable general standards promulgated by the Administrator of the Environmental Protection Agency under section 275, and

"(3) conforms to general requirements established by the Commission, with the concurrence of the Administrator, which are to the maximum extent practicable at least comparable to requirements applicable to the possession, transfer, and disposal of similar hazardous material regulated by the Administrator under the Solid Waste Disposal Act, as amended.

(b) Notwithstanding any other provision of law, following termination of any license issued for the generation or disposal of byproduct material as defined in section 11 e. (2), ownership of any such material or of land on which such material has been disposed shall be maintained pursuant to a license issued by the Commission pursuant to this section in such manner as will protect the public health, safety and the environment.

"b. In carrying out its authority under this section, the Commission is authorized to—

"(1) by rule, regulation, or order require persons, officers, or instrumentalities exempted from licensing under section 81 of this Act to conduct monitoring, perform remedial work, and to comply with such other measures as it may deem necessary or desirable to protect health or to minimize danger to life or property, and in connection with the disposal or storage of such byproduct material; and

"(2) make such studies and inspections and to conduct such monitoring as may be necessary.

Any violation by any person other than the United States or any officer or employee of the United States of any rule, regulation, or order or licensee's provision of the Commission established under this section or section 83 shall be subject to a civil penalty in the same manner and in the same amount as violations subject to a civil penalty under section 234. Nothing in this section affects any authority of the Commission under any other provision of this Act.".

(b) The first sentence of Section 81 of the Atomic Energy Act of 1954, as amended, to read as follows: "No person may transfer or receive in interstate commerce, manufacture, produce, transfer, acquire, own, possess, import, or export any byproduct material, except to the extent authorized by this section, section 82 or section 84.

(c) The table of contents for such chapter 8 is amended by inserting the following new item relating to section 83:

"Sec. 84. Authorities of Commission respecting certain byproduct material.".

AUTHORITY OF ENVIRONMENTAL PROTECTION AGENCY RESPECTING CERTAIN BYPRODUCT MATERIAL

SEC. 206. (a) Chapter 19 of the Atomic Energy Act of 1954, as amended, is amended by inserting after section 274 the following new section:

"SEC. 275. HEALTH AND ENVIRONMENTAL STANDARDS FOR URANIUM MILL TAILINGS.—

"a. As soon as practicable, but not later than one year after the date of enactment of this section, the Administrator of the Environmental Protection Agency (hereinafter referred to in this section as the 'Administrator') shall, by rule, promulgate standards of general application (including standards applicable to licenses under section 104(h)) of the Uranium Mill Tailings Radiation Control Act of 1978) for the protection of the public health, safety, and the environment from radiological and nonradiological hazards associated with residual radioactive materials (as defined in section 101 of the Uranium Mill Tailings Radiation Control Act of 1978) located at inactive uranium mill tailings sites and depository sites for such materials selected by the Secretary of Energy, pursuant to title I of the Uranium Mill Tailings Radiation Control Act of 1978. Standards promulgated pursuant to this subsection shall, to the maximum extent practicable, be consistent with the requirements of the Solid Waste Disposal Act, as amended. The Administrator may periodically revise any standard promulgated pursuant to this subsection.

"(b) (1) As soon as practicable, but not later than eighteen months after the enactment of this section, the Administrator shall, by rule, promulgate standards of general application for the protection of the public health, safety, and the environment from radiological and nonradiological hazards associated with the processing and with the possession, transfer, and disposal of byproduct material, as defined in section 11 e. (2) of this Act at sites at which ores are processed primarily for their source material content, or which are used for the disposal of such byproduct material.

"(2) Such generally applicable standards promulgated pursuant to this subsection for nonradiological hazards shall provide for the protection of human health and the environment consistent with the standards required under subtitle C of the Solid Waste Disposal Act, as amended, which are applicable to such hazards: *Provided however*, That no permit issued by the Administrator is required under this Act or the Solid Waste Disposal Act, as amended, for the processing, possession, transfer, or disposal of byproduct material, as defined in section 11 e. (2) of this Act. The administrator may periodically revise any standard or criterion promulgated pursuant to this subsection.

Within three years after such revision of any such standard, the Commission and any State permitted to exercise authority under section 274 b. (2) shall apply such revised standard in the case of any license for byproduct material as defined in section 11e (2) of any revision thereof.

"c. (1) Before the promulgation of any rule pursuant to this section, the Administrator shall publish the proposed rule in the Federal Register, together with a statement of the research, analysis, and other available information in support of such proposed rule, and provide a period of public comment of at least thirty days for written comments thereon and an opportunity, after such comment period and after public notice, for any interested person to present oral data, views, and arguments at a public hearing. There shall be a transcript of any such hearing. The Administrator shall consult with the Commission and the Secretary of Energy before promulgation of any such rule.

"(2) Judicial review of any rule promulgated under this section may be obtained by any interested person only upon such person filing a petition for review within sixty days after such promulgation in the United States court of appeals for the Federal judicial circuit in which such person resides or has his principal place of business. A copy of the petition shall be forthwith transmitted by the clerk of court to the Administrator. The Administrator thereupon shall file in the court the written submissions to, and transcript of, the written or oral proceedings on which such rule was based as provided in section 2112 of title 28, United States Code. The court shall have jurisdiction to review the rule in accordance with chapter 7 of title 5, United States Code, and to grant appropriate relief as provided in such chapter. The judgment of the court affirming, modifying, or setting aside, in whole or in part, any such rule shall be final, subject to judicial review by the Supreme Court of the United States upon certiorari or certification as provided in section 1254 of title 28, United States Code.

"(3) Any rule promulgated under this section shall not take effect earlier than sixty calendar days after such promulgation.

"d. Implementation and enforcement of the standards promulgated pursuant to subsection b. of this section shall be the responsibility of the Commission in the conduct of its licensing activities under this Act. States exercising authority pursuant to section 274 b. (2) of this Act shall implement and enforce such standards in accordance with subsection o. of such section.

"e. Nothing in this Act applicable to byproduct material as defined in section 11 e. (2) of this Act shall affect the authority of the Administrator under the Clean Air Act of 1970, as amended, or the Federal Water Pollution Control Act, as amended.".

(b) The table of contents for chapter 19 of the Atomic Energy Act is amended by inserting the following new item after the item relating to section 274:

"Sec. 275. Health and environmental standards for uranium mill tailings."

AUTHORIZATION OF APPROPRIATION FOR GRANTS

SEC. 207. There is hereby authorized to be appropriated for fiscal year 1980 to the Nuclear Regulatory Commission not to exceed $500,000 to be used for making grants to States which have entered into agreements with the Commission under section 274 of

the Atomic Energy Act of 1954, as amended, to aid in the development of State regulatory programs under such section which implement the provisions of this Act.

EFFECTIVE DATE

SEC. 208. Except as otherwise provided in this title the amendments made by this title shall take effect on the date of the enactment of this Act.

CONSOLIDATION OF LICENSES AND PROCEDURES

SEC. 209. The Nuclear Regulatory Commission shall consolidate, to the maximum extent practicable, licenses and licensing procedures under amendments made by this title with licenses and licensing procedures under other authorities contained in the Atomic Energy Act of 1954, as amended.

TITLE III—STUDY AND DESIGNATION OF TWO MILL TAILINGS SITES IN NEW MEXICO

STUDY

SEC. 301. The Commission, in consultation with the Attorney General and the Attorney General of the State of New Mexico, shall conduct a study to determine the extent and adequacy of the authority of the Commission and the State of New Mexico to require, under the Atomic Energy Act of 1954 (as amended by title II of this Act) or under State authority as permitted under section 274 of such Act or under other provision of law, the owners of the following active uranium mill sites to undertake appropriate action to regulate and control all residual radioactive materials at such sites to protect public health, safety, and the environment: the former Homestake-New Mexico Partners site near Milan, New Mexico, and the Anaconda carbonate process tailings site near Bluewater, New Mexico. Such study shall be completed and a report thereof submitted to the Congress and to the Secretary within one year after enactment of this Act, together with such recommendations as may be appropriate. If the Commission determines that such authority is not adequate to regulate and control such materials at such sites in the manner provided in the first sentence of this section, the Commission shall include in the report a statement of the basis for such determination. Nothing in this Act shall be construed to prevent or delay action by a State as permitted under section 274 of the Atomic Energy Act of 1954 or under any other provision of law or by the Commission to regulate such residual radioactive materials at such sites prior to completion of such study.

DESIGNATION BY SECRETARY

SEC. 302. (a) Within ninety days from the date of his receipt of the report and recommendations submitted by the Commission under section 301, notwithstanding the limitations contained in section 101(6)(A) and in section 115(a), if the Commission determines, based on such study, that such sites cannot be regulated and controlled by the State or the Commission in the manner described in section 301, the Secretary may designate either or both of the sites referred to in section 301 as a processing site for purposes of title I. Following such designation, the Secretary may enter into cooperative agreements with the New Mexico to perform remedial action pursuant to such title concerning only the residual radioactive materials at such site resulting from uranium produced for sale to a Federal agency prior to January 1, 1971, under contract with such agency. Any such designation shall be submitted by the Secretary, together with his estimate of the cost of carrying out such remedial action at the designated site, to the Committee on Interior and Insular Affairs and the Committee on Interstate and Foreign Commerce of the House of Representatives and to the Committee on Energy and Nautral Resources of the Senate.

(b)(1) No designation under subsection (a) shall take effect before the expiration of one hundred and twenty calendar days (not including any day in which either House of Congress is not in session because of an adjournment of more than three calendar days to a day certain or an adjournment sine die) after receipt by such Committees of such designation.

(c) Except as otherwise specifically provided in subsection (a), any remedial action under title I with respect to any sites designated under this title shall be subject to the provisions of title I (including the authorization of appropriations referred to in section 112(b)).

Mr. GARN. Mr. President, I ask unanimous consent that statements by Senators HASKELL and DOMENICI be printed in the RECORD.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

STATEMENT BY MR. HASKELL

Today the Senate will consider the Residual Radioactive Materials Act of 1978, S. 3078. I am pleased with the expeditious manner in which this legislation was considered by the Committee on Energy and Natural Resources. In spite of the press of legislation during these last few weeks of the Congress, my Subcommittee on Energy Production and Supply was able to hold hearings on this bill. The full Energy Committee found time in the midst of a very heavy workload to consider the bill late last month, and we have had sufficient time to discuss a final version with the House of Representatives. Those familiar with the usual pace of the legislative process will recognize the effort involved in consideration of this bill. It is an effort for which I thank my fellow Members of the Committee on Energy and Natural Resources for their assistance. I think they realize, as I stated at the first hearing on this measure, that the people living adjacent to these uranium mill tailings piles, as well as those who live in homes where tailings have been used as construction material, demand action now. We have met that demand.

The bill reported by the Committee incorporates several changes which improve the remedial action program. Provision is made for public participation during the program. The Secretary of Energy is to prepare a study of other radioactive sites in the United States and to supply the Congress with a report on such sites. We will then be sure that something is being done to deal with all of these hazards. In addition, the Environmental Protection Agency is to study the potential health, safety and environmental hazards of wastes at uranium mines. The Attorney General is to examine the question of the liability of present and former owners of uranium mill sites and, if he determines that it is appropriate, to seek recovery of all or part of the costs of the remedial action program. These studies, in sum, will provide us with a much clearer picture of both the dangers which still exist and an answer to the question of who is responsible for remedying the problem. Finally, the States' share of the cost of the remedial action program is reduced from 25% to 10%. This will insure that the program is carried out much more rapidly.

I urge the Senate to adopt this important legislation. I ask that my name be added as a cosponsor of this legislation.

STATEMENT BY MR. DOMENICI

The major purpose of this legislation is to insure that the potential hazards of residual radioactive materials, a result of poor Federal regulatory practices of the past, will be dealt with in conformance with current scientific standards.

These tailings piles contain the waste resulting from uranium production contracts under the national uranium development and procurement program which emerged in the late 1940's and ran until the mid 1960's.

Our principal intent is to eliminate any potential health risks emanating from these sites. Another important aspect of this Federal/State cooperative program provides for the extraction of residual valuable minerals under controlled conditions.

This bill provides for immediate remedial action for two sites in New Mexico; at Shiprock and Ambrosia Lake. It further provides for a study to determine whether the State has adequate authority to require remedial action on the remaining two sites in New Mexico or whether they are to be included with the previously designated abandoned sites. These two orphan sites are near Milan and Bluewater.

This legislation enjoys broad bipartisan support and reflects the concern of both Houses of Congress and recognizes a compassionate federal responsibility for this problem.

The fact that its primary intent is remedial and that this remedial process will be initiated immediately buttresses the emphasis on action and not fixing responsibility.

For these reasons I recommend my colleagues vote in favor of this measure.

● Mr. HANSEN. Mr. President, I rise in strong support of the Residual Radioactive Materials Act of 1978. S. 3078. The Energy and Natural Resources Committee is proposing an amendment in the nature of a substitute to the committee-reported version of S. 3078. The committee amendment is a modification of the House-passed companion legislation, H.R. 13650, the Uranium Mill Tailings Radiation Control Act of 1978. The modifications to H.R. 13650 contained in the committee amendment reflect many of the policy decisions adopted in the Energy Committee's consideration of this legislation.

Very briefly, Mr. President, this legislation is the outgrowth of congressional concern originally manifested in Public Law 92–314, which authorized the old Atomic Energy Commission to conduct remedial action cleanup operations in Grand Junction, Colo. At the time of our consideration of that legislation in the 92d Congress, the Federal Government became convinced that the use of uranium mill tailings in the construction of many buildings and facilities in Grand Junction, Colo., after the mill tailings had accumulated from our Nation's nuclear weapons program, constituted a serious health hazard to the inhabitants of that Colorado town. Consequently, the Atomic Energy Commission was directed in 1974 to review other possible sites where similar mill tailings accumulations might also constitute a threat to public health and safety. Over the past 3 years, the Commission and its successors, first, the Energy Research and Development Administration, and then, the Department of Energy, have reviewed systematically all of the known, significant accumulations of uranium mill tailings resulting from the nuclear weapons program. This same concern also has been the subject of several very detailed reports by the General Accounting Office and by the various State and university organizations in the affected States.

All of the aforementioned activity resulted in the administration's conclusion at the beginning of this year that these mill tailings sites did constitute a

serious public health and safety hazard which should be the subject of Federal remedial action as soon as possible. The hearings before the Energy and Natural Resources Committee, as well as the two House committees of jurisdiction, the Interior and Insular Affairs Committee and the Interstate and Foreign Commerce Committee, verified the accuracy of the studies that had been done and the conclusions which have been drawn by the administration and others who have evaluated this problem. On that basis, the administration submitted S. 3078 which was introduced by Senator JACKSON by request. Similar legislation had been introduced by Senator GARN and a number of bipartison cosponsors, including Senators HATCH, DECONCINI, MCCLURE, DOMENICI, LAXALT, HANSEN, WALLOP, and SCHMITT, in S. 3008, and later by Senator HART and a number of bipartisan cosponsors, including Senators DOMENICI, GARN, HATCH, and LAXALT, in S. 3253. All of these bills reflect the basic judgment that the mill tailings located at sites now inactive do constitute a serious threat to public health and safety that should be the subject of remedial action to stabilize the mill tailings in order to protect public health and safety and the environment. These various bills addressing this fundamental concern adopted somewhat different schemes for achieving that consensus result, but basically all of the introduced bills proposed action now to initiate the required remedial action.

Mr. President, the committee report discusses at some length the issue of the possible liabilities of the various parties associated with these inactive mill tailings, including the Federal Government, the mill operators, the States, and the other interested parties. It is the conclusion of the Energy and Natural Resources Committee, as it was of the two House committees and the full House in reviewing the liability issue, that a Federal assistance program, with cost-sharing and in cooperation with the States, was the appropriate approach to deal with this problem. That approach is adopted in the legislation before us today. I believe that a balanced, equitable, and well-reasoned approach has resulted from the considerations by these respective committees over the past year, in the form of the committee substitute amendment which is before us today.

Mr. President, I am pleased to report to the Senate that the committee substitute amendment has been worked out in close coordination with the House committees of jurisdiction and also with our Senate Committee on Environment and Public Works, which has jurisdiction over the regulation of uranium mill operations, to develop what I sincerely hope will be an acceptable bill for both the Senate and the House. I particularly want to commend the House committee chairman and the ranking minority members and their staffs for their support in our joint efforts to reach an acceptable consensus position on this bill, as represented by the committee substitute amendment. I also want to note at this time the excellent congressional support which we have received from officials of the respective States which will be involved in this program and the representatives of the uranium milling industry in the American Mining Congress and the American Nuclear Energy Council who have supported these activities. I believe that it is a significant achievement for this Congress and, indeed, for the American people when our two legislative bodies and the administration and the States and industry can fashion an agreement such as this dealing with public health and safety in a reasonable and responsible way.

One issue on which the Senate Energy and Natural Resources Committee felt particularly strongly in fashioning S. 3078, as reported by the committee, was the question of relative equities associated with mill tailings at the sites of active uranium milling operations. As a result of its concern regarding the issue, the committee in the reported bill directed the Secretary to conduct a study reviewing the respective responsibilities which might exist as between the Federal Government, the States, and the industrial operators for the uranium mill tailings generated in our nuclear weapons program over the past 30 years, which now are located at these active sites. Many members of the committee felt very strongly that there is an element of artificiality limiting Federal assistance only to remedial action for mill tailings located at inactive sites while placing a full financial burden on operators of active sites to complete remedial actions for those tailings which also result from nuclear weapons programs. Consequently, this was an important item in the discussions with the other body.

Mr. President, in an effort to move this legislation to enactment, we have agreed with the representatives of the House to remove the statutory study from this legislation, because of certain concerns and objections developed during the House consideration of the companion bill. At the same time, however, we continue to be concerned about the equity issue at active sites, and accordingly, by nonstatutory action will request the Secretary of Energy and the Comptroller General of the United States to quickly and thoroughly review all of the relevant considerations and prepare a formal report for the committee and the Congress. In this way, the committee will preserve this considerable issue without any prejudice to the enactment or the implementation of the remedial action program contained in this bill.

Mr. President, there are several elements of the legislative history of this measure which need to be clarified for the future implementation of this program. Section 5(a) of S. 3078, as reported by the Senate Committee on Energy and Natural Resources, provided for State "review and concurrence", also with the Nuclear Regulatory Commission's concurrence, on the remedial actions selected for each individual site. Section 108(a)(1) of title I of the committee substitute amendment provides that—

> Remedial action shall be selected and performed with the concurrence of the Commission (NRC) and in consultation with the State. . . .

While the committee substitute amendment statutorily modifies the State concurrence requirement of S. 3078, as reported, and substitutes a consultation requirement, the intent of the Energy and Natural Resources Committee and, indeed, the Senate, is that this statutorily required consultation will involve the fullest possible participation by each of the respective States in the selection of the remedial action for each site. Even though the State is not given an effective statutory veto over the selection of the remedial action, the Secretary of Energy and the NRC should coordinate closely with the appropriate State officials at every step of the remedial action selection and implementation process. Since the remedial actions in many cases will involve significant construction activity in populated areas, it is most important that the States and the local officials in those population centers fully agree with and support the actions proposed by the remedial action and its subsequent implementation. Also, State and local officials have a legitimate and proper concern and role in the remedial action at a processing site and the ultimate stabilization of uranium mill tailings at the ultimate disposal site for the protection of the local public health and safety and the local environment. These same officials also have a very strong and appropriate interest in the effectiveness of the remedial action and the long-term stabilization of these uranium mill tailings to avoid any further threat to the local public health and safety or the local environment. For these and other obvious reasons, the committee and the Senate clearly intend and expect that the Secretary of Energy and the NRC within the context of the statutory consultation requirement will proceed for an effective, orderly, and systematic participation of State and local officials throughout the initial planning, selection, and implementation of the remedial action. Further, the committee substitute amendment includes the requirement in section 111 that there be public participation and the holding of public hearings in the State where remedial actions will occur. S. 3078, as reported by the Senate Committee on Energy and Natural Resources, included the same requirement.

The committee substitute amendment, in section 115, requires the Attorney General of the United States to review the potential liabilities of the various parties for any of the Federal costs which will be incurred in the conduct of this program. It is the intent of the committee that section 115 shall not be construed to create any new cause of action as a result of the enactment of this legislation. Any liability which should be established under section 115 must exclusively and conclusively rest on existing law other than this bill. Additionally, the committee does not intend by enactment of section 115 to encourage the Attorney General to embark on a major, new litigation effort unnecessarily. The Attorney General should seek settlement or bring suit only where the facts in an individual situation clearly establish a

failure to meet an affirmative burden under existing law directly related to the past stabilization of the mill tailings.

I urge the support of all Members for the passage of this legislation.●

● Mr. JACKSON. Mr. President, I rise in support of the bill S. 3078 and the committee amendment which will be proposed.

This amendment is being proposed by the Senate Committee on Energy and Natural Resources and the Committee on Environment and Public Works jointly.●

● Mr. HART. Mr. President, the amendment we are offering has been drafted by the Senate Committee on Energy and Natural Resources and the Committee on Environment and Public Works. It is my understanding that both of these committees fully support the provisions under their respective jurisdictions.

For my own part, there are provisions in both provisions of this package which I believe could be improved. However, the amendment we are offering represents the collective judgment of our two committees and is the best compromise that could be worked out in the time available.

This amendment addresses two separate but related issues. The first issue concerns remedial action clean up of abandoned uranium mill tailings. The provision to deal with this problem was drafted by the Energy and Natural Resources Committee. The second issue concerns the regulatory and licensing authority of the Federal Government and the States over currently active and future uranium milling activities. The provision concerning this issue was drafted by the Senate Committee on Environment and Public Works. I would like to take a few minutes to explain the rationale behind the Environment Committee's provision, and its relation to the rest of the amendment we are offering.

Mr. President, under present law, the Nuclear Regulatory Commission has the authority and responsibility to regulate uranium milling and milling operations, and the Commission is currently exercising that authority over 11 active sites. An additional 14 sites are regulated by individual States. Under the authority of the Atomic Energy Act, these States developed approved regulatory programs and assumed regulatory responsibility from the NRC.

Although the NRC licenses active uranium mining and milling activities, existing law does not permit the Commission to regulate the disposal of mill tailings once milling and mining operations cease and the operating license expires. It is this authority to regulate tailings after milling operations cease. that we propose be given to the NRC.

Mr. President, it is imperative that uranium mill tailings be carefully regulated. They are just as radioactive as the original uranium ore from which they came. In fact, if tailings are not properly controlled, they can be more dangerous than radioactive wastes generated by powerplants and nuclear weapons programs.

Furthermore, although uranium mill tailings wastes are not as radioactive as high-level wastes generated by nuclear powerplants or military weapons programs, these wastes remain radioactive for thousands of years. Thus, the potential long-term danger to the public health and safety is far greater. People need not come into direct contact with tailings to be exposed to this radioactive hazard, because the radiation from tailings escapes and travels in the form of radioactive radon gas—which can cause leukemia and other forms of cancer.

Because there has been no proper authority for controlling this threat to public health, tailings at abandoned mining and milling sites have been left exposed dangerously near several populated areas. In Grand Junction, Colo., and Salt Lake City, Utah, for example, uranium mill tailings have been left unattended near schools, homes, and offices. People living in and around some of these sites are being exposed to radiation levels considerably higher than the levels permitted inside uranium mines.

The Colorado Department of Health has conducted a study of leukemia rates in areas of the State where people are exposed to mill tailings. The results are only preliminary, but the evidence collected to date indicates that the incidence of leukemia in these areas is almost double that in other parts of Colorado. Although the direct connection to radon gas from these tailings has not yet been proved this high incidence of leukemia is alarming.

Furthermore, the General Accounting Office concluded in a report issued just last month that radiation from the five worst abandoned tailings sites may cause as many as 1,000 cases of cancer in the next century. And, if these tailings are not properly disposed, that trend will continue for hundreds of thousands of years, resulting in millions of cases of cancer.

Authorization to deal with this serious threat to public health is contained in the provisions of this amendment, which was drafted by the Senate Committee on Energy and Natural Resources.

Mr. President, the total effect of this amendment is to correct past mistakes and to provide assurance that these costly mistakes will not be repeated in the future. Enactment of this legislation is an essential step toward solving this Nation's nuclear waste dilemma, and it is a step which must be taken now. I urge my colleagues, support.●

● Mr. WALLOP. Mr. President, I would like to address a question to Senator HART relating to the new section 83b of the Atomic Energy Act, as provided under this act, which vests the Commission or an agreement State with authority to require land to be transferred to the United States. Such transfer could occur upon termination of a license for the generation or possession of tailings or waste as defined in section 11e of the Atomic Energy Act, as amended by this act. It is my understanding that so-called solution mining projects, in which uranium is brought to the surface by means of a fluid solution and is extracted with the remaining material pumped back below the surface, would not generally be considered for transfer status under the new section 83b.

Mr. HART. Mr. WALLOP, your statement is correct. Contrasted with conventional mining and milling methods which cause significant surface disturbance and require extensive reclamation, solution mining techniques allow for the recovery of relatively small and widely scattered deposits of uranium with minimal disturbance of the land and provide for waste materials to be reinjected into the original locations below the land surface from which the uranium was removed. Therefore, the necessity of transferring surface and subsurface title may not exist where uranium mining and extraction is limited to solution techniques.●

● Mr. RANDOLPH. Mr. President, the issue before us today, uranium mill tailings disposal, has been carefully considered by the Committee on Environment and Public Works in connection with our overall review of the issue of nuclear waste disposal. I have seen no indication of a proven technology or definitive long-term plan for the disposal of reactor wastes.

Similarly, the hazardous wastes from uranium mills present a long-ignored threat to the health and safety of our citizens. Although these mill tailings are far less toxic than spent fuel or high level waste, they persist for long periods of time. Their lower level of activity has led to complacency on the part of those that have used them, even as construction materials.

The regulatory gaps which have allowed this situation to occur were addressed in a committee amendment to the authorization bill for the Nuclear Regulatory Commission, recently passed by the Senate. The provision we are proposing as title II, in combination with the remedial action proposal of the Committee on Energy and Natural Resources, is very similar to that to which the Senate previously agreed. By combining these two, we can have a complete legislative package. Assuming favorable action by the other body, the parallel provision can be dropped from the Nuclear Regulatory Commission bill.

The proposed amendment provides that any remedial action other than maintenance, monitoring, or emergency measures can be undertaken by the Department of Energy pursuant to a Commission license or order only after authorization by the Congress. This does not limit the Department's ability to perform work for which a previous licensee is liable, where recovery of any Federal expenditures will be sought from the licensee. It is intended only to limit the Department's undertaking of further major remedial actions at Federal expense to instances with congressional authorization.

I support this amendment as a worthwhile extension of Nuclear Regulatory Commission authority over the mill tailings disposal aspect of the fuel cycle. I regret, however, that we deal first with

the least troublesome radioactive waste problem, one for which in fact adequate regulatory authority already exists under subtitle "C" of the Solid Waste Disposal Act.

I am concerned that in mandating the Commission to control mill tailings disposal through its permitting powers, we achieve at least the degree of control which would result under subtitle "C" of the Solid Waste Disposal Act. Uranium mill tailings certainly are a hazardous waste under that subtitle, which I authored, for their radioactive and nonradioactive characteristics. While it may be preferable to integrate regulation of such wastes with the permitting of other aspects of the fuel cycle such as the ore processing, the environmental protections of subtitle "C" must not be lost or reduced.

I have insisted that the amendment contain provisions assuring a continued role for the Administrator of the Environmental Protection Agency establishing generally applicable standards for mill tailings disposal, following the provisions of subtitle "C," and requiring that the specific management requirements set by the Nuclear Regulatory Commission are at least as stringent as requirements which apply to similar hazardous wastes under the Solid Waste Disposal Act.

The section-by-section analysis which comprises the legislative history for the committee amendment to S. 2584 attempted to further define the relative roles of the Nuclear Regulatory Commission and the Administrator of the Environmental Protection Agency in regulating uranium mill tailings disposal. That analysis notes that the generally applicable standards and criteria for which the Administrator is responsible are to prescribe general standards of performance, not specific management requirements and not site specific.

Such general standards of performance may include standards for the placement and location of disposal sites—including demographic or geological criteria or water flow restrictions—requirements that disposal sites be reclaimed so they do not need continuing maintenance or meet minimum maintenance requirements; general requirements that sites be designed and managed to prevent any contact of the tailings by human or animal life and that use of disposal sites be restricted to avoid disturbing integrity of the tailings stabilization; provisions for ground and surface water monitoring; and general performance standards for stabilization of tailings in various circumstances. Limitations on environmental exposure or emissions or other introduction of radioactive or any other constituents of mill tailings in the air or ground or surface waters, are also within the authority of the Administrator under new section 275. In setting generally applicable standards and criteria the Administrator will take into account the degree to which human health and the environment are already adequately protected by Commission requirements established under new section 84, and require whatever else is necessary for the protection of human health and the environment.

Standards and requirements under the amendment will be implemented and enforced by the Commission through its permitting process. Consequently, no Environmental Protection Agency permit could be required under these provisions or the Solid Waste Disposal Act. This does not affect, of course, any permits which may be required under the Federal Water Pollution Control Act or other environmental laws. The Environmental Protection Agency is not directly involved in implementation or enforcement for particular disposal sites, but the Agency is expected to conduct active oversight to assure the standards and criteria and the law are being followed. Some means by which this may be done are comments on proposed permits or the required environmental impact statements on proposed permits under section 309 of the Clean Air Act.●

Mr. HEINZ. Mr. President, I would like to explain in greater detail the special problems of the site covered by this legislation which is in Pennsylvania.

The Canonsburg, Pa., site is, I believe, one of the only sites of the 22 listed in the bill that is currently occupied by both structures and people. The site, which has not been used as a uranium recovery facility since 1957, is now an industrial park containing 14 small businesses employing 150 people.

It is important to note that these firms located on the site only after its owner received assurances from the Atomic Energy Commission in 1966 that—

No hazard to health and safety is involved as a result of AEC licensed activities.

This action by the AEC effectively gave the Canonsburg site a clean bill of health and directly led to the use of the site for other purposes.

Despite these AEC assurances, recent studies performed for the Department of Energy at the site indicate that radiation levels exceed both background and guideline levels. The study further suggested that remedial action is deemed necessary on all structures and throughout the three yard areas at the Canonsburg site.

The recent Ford, Bacon and Davis Utah, Inc. study of Canonsburg analyzed five different remedial action plans ranging from covering the entire site with at least 2 feet of "clean" topsoil to demolishing the existing structures and shipping the debris to one of several alternative disposal sites, either nearby or in the Western United States. The cost of these alternatives ranges from $571,000 for the first to over $55,000,000 for the most expensive of the others.

It is important to note in this study that every alternative examined involves closing down the buildings on the site permanently and ending all activity there, thus dispossesing the occupants and forcing them to relocate. The study specifically concluded that decontaminating the buildings and making them fit for further use would be more expensive than demolition and disposal.

I believe that this is a reasonable study, but I am concerned that proper provision be made for those displaced occupants. In the case of unoccupied sites there is obviously no problem. In the case of sites like Canonsburg, however, the situation is more complicated, and the bill is unclear with regard to what costs would be reimbursed in those circumstances when site occupants are required by the Department of Energy and others participating in the formulation of a remedial action plan to vacate. Of particular importance in the Canonsburg case are the moving and relocation expenses of the businesses occupying the site. The site owner, having been compensated for his property, will be in a position to obtain an alternative location should he desire to do so.

Similarly, the business tenants will have to find new buildings to rent, hopefully at rates comparable to what they are paying now. What also remains to be covered for the site occupants, however, are the expenses of moving and relocating that will be incurred. In that regard I am pleased to note that the managers of the bill have made clear that the direct costs referred to in section 103 of the bill would include relocation expenses for the occupants of the site in those cases where the Department of Energy and those others involved in the cooperative arrangement have determined that vacating the site is the best alternative.

I would further point out that some of the businesses on the Canonsburg site are operated by tenants rather than the owner of the property. If the site were to be demolished, both tenants and owner would have to move. The bill makes clear that in that circumstance, payment for relocation expenses would be made to all site occupants who were relocating, including both the owner of the property and the tenants.

Mr. President, the problems of these sites are difficult to resolve and potentially quite serious. I am pleased that the committee has been able to work out a good bill at this late date in the session, and with the clarification made by the bill's managers, I am pleased to support it.

Mr. President, I would like to ask the distinguished floor manager a question with respect to his interpretation on section 103(b) of the substitute bill. Is it your understanding that the phrase "costs which are directly required to complete the remedial action selected pursuant to section 108" is intended to include relocation expenses for the occupants of a site in those cases where such relocation is a necessary part of the remedial action to be taken at such site?

Mr. HANSEN. That is my understanding.

Mr. CHURCH. Mr. President, I rise in support of the bill H.R. 13650, the Residual Radioactive Materials Act of 1978. This bill addresses the problem of uranium mill tailings piles which must be cleaned up as soon as practicable, so as to protect the health of the citizens who may be exposed.

While I support the bill as reported by the Senate Energy Committee, I must

express one reservation concerning the substitute amendment which will be proposed by the chief sponsors of this legislation. My reservation has to do with the cost sharing formula which has been adopted in the substitute version. The Energy Committee reported a bill which provided for 100 percent Federal funding of the clean up of these uranium mill tailings piles.

However, in an effort to reach a version of this bill which the House will be able to accept quickly in the waning days of this session, the sponsors have agreed to a reduction of the 100 percent Federal funding to only a 90 percent Federal share. As I will explain more fully later on, I feel that over the years this problem has evolved into totally a Federal responsibility. I believe that requiring the States to assume even this 10 percent of the cost of clean up is inequitable.

However, the need to begin to clean up these sites is clear, and we must begin as soon as possible. With the Congress drawing to a close we have only this opportunity to act to protect the citizens who may be exposed. Therefore, I will withhold my objection to the proposed cost-sharing formula at this time. The Senate should revisit this inequitable situation next year.

When we look at the history of the uranium milling for defense purposes, it becomes clear why anything less than 100 percent Federal funding for cleaning up wastes from such milling would be inequitable. These abandoned uranium mill tailing piles were created under a contract solely for National defense purposes. Some of the sites were cleaned up to the standards prevailing at the time, while others were not. The piles are now abandoned, and the original contractors are either unable or unwilling to clean these piles. With further understanding about nuclear energy, we have learned more about the potential health hazards associated with these "orphan" mill tailing piles.

It now becomes imperative that these piles be cleaned up to a safer level.

But who is to blame for this lack of knowledge and inadequate clean-up? As between the States and the Federal Government the answer is obvious.

During the operation of these milling plants, the State government was not allowed to regulate these plants which were operating for defense purposes solely. In addition very little research work into the health effects of these tailings was done by the Federal Government until after the completion of these contracts. Therefore the States could not have had the access or the information necessary to regulate the creation of these wastes or the control of these piles.

It can be readily seen that the States were not even involved and the Federal Government is the one who should assume the entire cost of the immediate clear-up.

Some have argued that the States have received substantial benefits from having had the industries in the State. But this argument overlooks the point that the presence of these industries required the States to provide services. I believe an accounting will show that the taxes paid by the industry and the workers would not even equal these expenditures by the State. Therefore there were no excess State revenues to provide the funds demanded in this bill.

As part of the question of who should pay and how much, the Senate has included an amendment which would require an investigation of the responsibility of the owners of the sites.

The committee added an amendment to require that the Attorney General conduct a study to determine whether any Federal interest has been adversely affected by the original or any subsequent owner of any site designated under this act. The Attorney General is directed to consider existing statutes, standards set by contract with the Federal Government—where applicable to the owner—regulations in effect at the time, and other law which is applicable to the owner or the processing sites. The purpose of the study is to determine if by contract or law existing at the time there was a responsibility that was not fulfilled at that time.

The committee notes that this is a special and urgent situation which requires that the remedy, that is, clean-up of the uranium mill tailing piles, be initiated before the liability will be determined. The committee feels that the first priority is to accomplish the clean-up of these piles as quickly as possible; the public health and safety is the first consideration.

However if the Attorney General determines that he has sufficient cause to believe that a party has not met a responsibility incumbent at the time of ownership which adversely affects a Federal interest, the Attorney General shall take action as may be appropriate. Such action shall seek to require the party to pay all or any part of the costs incurred by the United States for the remedial action at the particular site.

In conclusion, I wish to discuss one further addition to the committee amendment, which was urged by the House. This is the concept that the Secretary shall set priorities to complete the cleanup of those piles which present the greatest level of health hazard. This is appropriate and the way that the Secretary should proceed in this program. However, we do not want a well-intentioned priority list to turn into an unconscionable, bureaucratic nightmare. In approaching the cleanup of these sites, the Secretary should, as the legislation directs him, immediately start preparations for negotiations with all of the States involved. Federal-State committees should be set up, and the negotiation agreements for the 22 listed sites must be immediately started.

However, in following his priority list, the Secretary should not allow a roadblock in one State to prohibit his efforts further down the list. If other States are ready to proceed, unresolved barriers in States with a higher priority should not stop him. States that are ready to proceed should be allowed to go forward. The resources of the Secretary should be fully applied at all times. In fact, there is no other way that the Secretary can complete all 22 of the listed sites, as he is directed to do, within the time allotted in the bill.

Finally, I urge my colleagues to pass this bill. This is a problem which has long been ignored and must be addressed. With our burdensome agenda in the Congress, this may be the only chance we have to do something.

● Mr. WALLOP. Mr. President, I am pleased to support the amendment offered by my distinguished colleague from Colorado, the chairman of the Nuclear Regulation Subcommittee. This amendment to title II of the bill would establish new licensing and related regulatory authority for the Nuclear Regulatory Commission and for the States under the agreement State program for the disposal of uranium mill tailings. Mr. President, I believe that this amendment represents a reasonable accommodation between the provision adopted by the Senate as an amendment to the NRC fiscal year 1979 authorization bill on August 25 and the legislation passed by the other body last week. Together with the provisions in title I which address the problem of abandoned mill tailings at certain inactive sites, this legislation represents a reasoned and comprehensive approach for assuring the safe and proper disposal of these materials.

The amendment would require the development of Federal standards to govern the disposal of uranium mill tailings. Those standards would guide the Nuclear Regulatory Commission in its licensing of uranium milling operations. The amendment would also preserve the opportunity of the States through the agreement State program to license and regulate uranium mills. The agreement States would be required to follow at a minimum any Federal substantive standards. In addition, public participation and environmental review goals would be established for the agreement States, although the States would be given the flexibility to determine the specific means to meet those goals. For example, the agreement State would be required to prepare a written environmental analysis addressing such factors as the radiological impacts of the activity, the impact on ground water, the long-term impact on the public health and the environment, and alternative sites and engineering methods. The manner in which these and other factors would be addressed in the analysis, however, would be left to the determination of the States and the provision is drafted so as to avoid any requirement that the States mirror Federal procedures. In order to assist the agreement States in meeting these new and important responsibilities, the amendment provides an authorization of $500,000 beginning in fiscal year 1980 for assistance to the agreement States.

The amendment also carefully addresses the ultimate disposal of uranium mill tailings. One question which occurred here is the need for Goverment ownership of mill tailings disposal sites. The amendment provides a detailed mechanism for determining whether Government ownership is necessary or

desirable to protect health or minimize danger to life or property. If the Commission determines that such ownership is needed, it must prescribe standards to assure that all stabilization requirements are met, to minimize the need for future remedial work, to minimize the cost for long-term maintenance and monitoring, and to permit the future use of the land and the tailings consistent with all applicable NRC requirements. Also, the affected State would have the option of assuming ownership in lieu of the Federal Government. This approach insures that the transfer of lands to Government ownership will only be required after a thorough consideration of the issue by the appropriate regulatory authorities and on the basis of an adequate public record. Furthermore, the amendment insures that the future use of these lands will not be unnecessarily restricted beyond any requirements needed to protect the public health and safety.

Mr. President, I support the amendment and I urge its adoption.●

● Mr. JACKSON. Mr. President. I rise in support of the bill H.R. 13650 and the committee amendment which will be proposed.

This amendment is being proposed by the Senate Committee on Energy and Natural Resources and the Committee on Environment and Public Works jointly. This amendment was also negotiated with the House Committee on Interstate and Foreign Commerce and the Committee on Interior and Insular Affairs. All four committees have worked very hard to reach a single text which will be acceptable to all parties.

We hope on the Senate side that we have succeeded, and the House will adopt this agreed upon amendment.

As in any negotiation between the Houses, there are many differences resulting in substantial give and take. One question I wish to have answered relates to the comingling of tailings from Federal defense contracts. The proposed committee amendment addresses the situation of abandoned tailings piles from defense contracts, and active operations for commercial purposes. Not addressed herein is the problem of comingled tailings from defense related operations and commercial operations.

The version of S. 3078 as reported from the Energy Committee contained a requirement that the Secretary of Energy study this problem and report back to the Congress next year. The House for various reasons has opposed this study as a part of the bill. However, I plan to request just such a study from the Secretary of Energy and the General Accounting Office. I feel that these questions must be adddressed. I am happy to report that Congressman DINGELL has already sent a letter to the Secretary asking for just such a report, therefore expressing the interest of both Houses.●

Mr. GARN. Mr. President, I move the adoption of the amendment.

The ACTING PRESIDENT pro tempore. The question is on agreeing to the amendment of the Senator from Utah.

The amendment (UP No. 2099) was agreed to.

Mr. GARN. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. HART. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

The ACTING PRESIDENT pro tempore. If there are no further amendments, the question is on the engrossment of the amendment and third reading of the bill.

The amendment was ordered to be engrossed and the bill to be read the third time.

The bill was read the third time, and passed.

Mr. ROBERT C. BYRD. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. GARN. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. BAKER. Mr. President, I thank the majority leader.

ORDER TO HOLD BILL AT DESK

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that at such time as it is received, H.R. 6237 be held at the desk pending further disposition. This has to do with the Civil Air Patrol.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

THE CALENDAR

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the Senate proceed to the immediate consideration of Calendar Order No. 1219, H.R. 12349.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

DuNOIR BASIN ADDITION, WASHAKIE WILDERNESS

The Senate proceeded to consider the bill (H.R. 12349) to provide for the DuNoir Basin Addition to the Washakie Wilderness, which had been reported from the Committee on Energy and Natural Resources with amendments as follows:

On page 1, line 6, strike "thirty four thousand five hundred" and insert "eleven thousand one hundred";

On page 1, line 7, after "depicted" insert "as wilderness";

On page 1, line 8, strike "DuNoir Basin," and insert Proposed—";

On page 1, line 9, strike "Additions Proposed", dated June" and insert "Addition" dated September 26, 1978";

On page 2, line 1, strike "in, and deemed a part of";

On page 2, line 8, strike "such" and insert "the";

On page 2, line 11, strike "such" and insert "the";

On page 2, line 11, strike "Such" and insert "The";

On page 2, beginning with line 15, strike through and including line 21, and insert in lieu thereof the following:

SEC. 3. Within the area depicted as the Special Management Unit on the map entitled "Proposed—Washakie Wilderness Addition" and dated September 26, 1978, which is on file and available for public inspection in the Office of the Chief, Forest Service, Department of Agriculture, any roads that may be constructed for the purpose of timber harvesting shall be closed at the completion of timber harvesting operations.

SEC. 4. Section 5 of the Revised Statutes, title 86, page 792 (Public Law 92-476) is repealed.

SEC. 5. No moneys shall be expended for development or maintenance of this area prior to fiscal year 1980 in excess of those that would have been expended for the area had it remained in management to preserve its wilderness character under Public Law 92-476.

Mr. President, I ask unanimous consent that the amendments be considered en bloc.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

The amendments were agreed to.

The amendments were ordered to be engrossed and the bill to be read a third time.

The bill was read the third time, and passed.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent to have printed in the RECORD an excerpt from the report (No. 95-1305), explaining the purposes of the measure.

There being no objection, the excerpt was ordered to be printed in the RECORD, as follows:

PURPOSE

H.R. 12349 as amended would designate approximately 11,000 acres of the DuNoir Basin Special Management Unit in Wyoming's Shoshone National Forest as an addition to the existing Washakie Wilderness, and return approximately 17,700 acres of that unit to multiple use management.

BACKGROUND AND NEED

Through the enactment of Public Law 92-476 designating the Washakie Wilderness, the Congress directed the Secretary of Agriculture to study a 28,800-acre special management unit of the DuNoir Basin to determine the highest and best public use of the area.

The Draft Environmental Impact Statement identified a preferred alternative of an 11,100-acre wilderness with the remaining 17,700 acres available for other uses. The Department completed its review and recommended that the entire 28,800 acres be included in wilderness. The area lies adjacent to the existing Teton Wilderness and the Washakie Wilderness, and is 30 miles from Teton Park. There are oil and gas leases in the area near the Special Management Unit, and approximately 1.5 million board feet of marketable timber in the unit itself. Approximately 11,000 acres of the unit was cut for ties in the 1920's and some evidence of the harvesting operations remain.

The paramount values in the management unit are the wildlife values. The Unit has at times provided habitat for bighorn sheep, mountain lion, mule deer, moose and bear. There is a resident population of elk numbering approximately 300, and another herd in excess of 1,000 migrate through the unit on an annual basis. The maintenance of wildlife values and timber harvesting are not necessarily conflicting management objectives. However, the unfettered access to the area by recreational users following timbering operations might prove detrimental to the elk. Preservation of the wildlife values, however, can be maintained under a less stringent management than wilderness classification. The closure of roads at completion of timbering operations would allow multiple use of the area while preserving its wildlife values.

Mr. ROBERT C. BYRD. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. BAKER. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

SIMPLIFIED RETIREMENT PLANS

Mr. ROBERT C. BYRD. Mr. President, I send to the desk a concurrent resolution (S. Con. Res. 113) which has been cleared and ask unanimous consent for its immediate consideration.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

The resolution will be stated by title.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent the reading by title be dispensed with, and I shall explain it.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

Mr. ROBERT C. BYRD. Mr. President, this resolution, if agreed to by the Senate and the House of Representatives, would permit the conferees on H.R. 13511 to consider a provision, section 152 (relating to simplified retirement plans), which was agreed to by the Finance Committee but inadvertently omitted from the printed version of the committee amendment.

The resolution (S. Con. Res. 113) was read, considered by unanimous consent, and agreed to, as follows:

S. CON. RES. 113

Resolved by the Senate (the House of Representatives concurring), That, due to an inadvertent omission in the Senate reported version of H.R. 13511, entitled "An Act to amend the Internal Revenue Code of 1954 to reduce income taxes, and for other purposes", in resolving the difference between the Senate and the House on such bill, it shall be deemed that the Senate agreed to the following section 152, and the conferees are authorized to consider the same:

SEC. 152. SIMPLIFIED EMPLOYEE PENSIONS.

(a) Increase in Maximum Limitation Under Section 408 to $7,500.—Section 408 (relating to individual retirement account) is amended by redesignating subsection (j) as subsection (m) and by inserting after subsection (i) the following new subsection:

"(j) Increase in Maximum Limitations for Simplified Employee Pensions.—In the case of a simplified employee pension, this section shall be applied by substituting '$7,500' for '$1,500' in the following provisions:

"(1) paragraph (1) of subsection (9),

"(2) paragraph (2) of subsection (b), and

"(3) paragraph (5) of subsection (b)."

(b) Simplified Employee Pension Defined.—Section 408 is amended by inserting after subsection (j) the following new subsection:

"(k) Simplified Employee Pension Defined.—

"(1) In general.—For purposes of this title, the term 'simplified employee pension' means an individual retirement account or individual retirement annuity with respect to which the requirements of paragraphs (2), (3), (4), and (5) of this subsection are met.

"(2) Participation requirements.—This paragraph is satisfied with respect to a simplified employee pension for a calendar year only if for such year the employer contributes to the simplified employee pension of each employee who—

"(A) has attained age 25, and

"(B) has performed service for the employer during at least 3 of the immediately preceding 5 calendar years.

"(3) Contributions may not discriminate in favor of the highly compensated, etc.—

"(A) In general.—The requirements of this paragraph are met with respect to a simplified employee pension for a calendar year if for such year the contributions made by the employer to simplified employee pensions for his employees do not discriminate in favor of any employee who is—

"(i) an officer,

"(ii) a shareholder,

"(iii) a self-employed individual, or

"(iv) highly compensated.

"(B) Special rules.—For purposes of subparagraph (A)—

"(i) there shall be excluded from consideration employees described in subparagraph (A) or (C) of section 410(b)(2), and

"(ii) an individual shall be considered a shareholder if he owns (with the application of section 318) more than 10 percent of the value of the stock of the employer.

"(C) Contributions must bear a uniform relationship to total compensation.—For purposes of subparagraph (A), employer contributions to simplified employee pensions shall be considered discriminatory unless contributions thereto bear a uniform relationship to the total compensation (not in excess of the first $100,000) of each employee maintaining a simplified employee pension.

"(D) Treatment of certain contributions and taxes.—Except as provided in this subparagraph, employer contributions do not meet the requirements of this paragraph unless such contributions meet the requirements of this paragraph without taking into account contributions or benefits under chapter 2 (relating to tax on self-employment income), chapter 21 (relating to Federal Insurance Contribution Act), title II of the Social Security Act, or any other Federal or State law. Taxes paid under section 3111 (relating to tax on employers) with respect to an employee may, for purposes of this paragraph, be taken into account as a contribution by the employer to an employee's simplified employee pension. If contributions are made to the simplified employee pension of an owner-employee, the preceding sentence shall not apply unless taxes paid by all such owner-employees under chapter 2, and the taxes which would be payable under chapter 2 by such owner-employees but for paragraphs (4) and (5) of section 1402(c), are taken into account as contributions by the employer on behalf of such owner-employees.

"(4) Withdrawals must be permitted. A simplified employee pension meets the requirements of this paragraph only if—

"(A) employer contributions thereto are not conditioned on the retention in such pension of any portion of the amount contributed, and

"(B) there is no prohibition imposed by the employer on withdrawals from the simplified employee pension.

"(5) Contributions must be made under written allocation formula.—The requirements of this paragraph are met with respect to a simplified employee pension only if employer contributions to such pension are determined under a definite written allocation formula which specifies—

"(A) the requirements which an employee must satisfy to share in an allocation, and

"(B) the manner in which the amount allocated is computed.

"(6) Definitions.—For purposes of this subsection and subsection (2)—

"(A) Employee, employer, or owner-employee.—The terms 'employee', 'employer', and 'owner-employee' shall have the respective meanings given such terms by section 401(c).

"(B) Compensation.—The term "compensation' means, in the case of an employee within the meaning of section 401(c)(1), earned income within the meaning of section 401(c)(2).

"(l) Simplified Employer Reports.—An employer who makes a contribution on behalf of an employee to a simplified employee pension shall provide such simplified reports with respect to such contributions as the Secretary may require by regulations. The reports required by this subsection shall be filed at such time and in such manner, and information with respect to such contributions shall be furnished to the employee at such time and in such manner, as may be required by regulations."

(c) Maximum Deduction Under Section 219.—Subsection (b) of section 219 (relating to maximum deduction in the case of retirement savings) is amended by adding at the end thereof the following new paragraph:

"(7) Simplified employee pensions.—In the case of an employer contribution on behalf of the employee to a simplified employee pension, the limitation under paragraph (1) shall be the lesser of—

"(A) 15 percent of compensation includible in the employee's gross income for the taxable year (determined without regard to the employer contribution to the simplified employee pension), or

"(B) the sum of—

"(i) the amount contributed by the employer to the simplified employee pension and included in gross income (but not in excess of $7,500), and

"(ii) $1,500, reduced (but not below zero) by the amount described in clause (i).

In the case of an employee who is an officer, shareholder, or owner-employee described in section 408(k)(3), the amount referred to in subparagraph (B) shall be reduced by the amount of tax taken into account with respect to such individual under subparagraph (D) of section 408(k)(3)."

(d) Employees of Enterprises Under Common Control.—Subsections (b) and (c) of section 414 are each amended by inserting "408(k)," after "401,".

(e) Simplified Employee Pension May Be Taken Into Account in Determining Whether Employer Meets Certain Other Nondiscrimination Provisions.—Paragraph (5) of section 401(a) is amended by adding at the end thereof the following new sentence: "For purposes of determining whether one or more plans of an employer satisfy the requirements of paragraph (4) and of section 410(b), an employer may take into account all simplified employee pensions to which only the employer contributes."

(f) Employer Deductions.—Section 404 (relating to deduction for contributions of employer to certain plans) is amended by adding at the end thereof the following new subsection:

"(h) Simplified Employee Pensions.—For purposes of this section, a contribution paid by an employer to a simplified employee pension shall be treated as a contribution paid by the employer to a profit-sharing plan."

(g) Amendments to Secton 415.—Section 415 (relating to limitations on benefits and contributions under certain plans) is amended—

(1) by redesignating subparagraphs (E) and (F) of subsection (a)(2) and subparagraphs (F) and (G) and by inserting after subparagraph (D) the following new subparagraph:

"(E) a simplified employee pension.";

(2) by inserting "408(k)," after "408(b),"in the material immediately following subparagraph (G) of section 415(b)(2);

(3) by inserting "any simplified employee pension," after "section 408(b)," in section 415(e)(5); and

(4) by striking out "or" in section 415(k)(1)(F), by redesignating subparagraph (G) of section 415(k)(1) as subparagraph (H), and by inserting after section 415(k)(1)(F) the following new subparagraph:

"(G) a simplified employee pension, or".

(h) Effective Date.—The amendments made by this section shall apply to taxable years beginning after December 31, 1978.

Mr. ROBERT C. BYRD. Mr. President, I move to reconsider the vote by which the resolution was agreed to.

Mr. BAKER. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

TIME AGREEMENT ON CLOTURE MOTION DEBATE

Mr. ROBERT C. BYRD. Mr. President, I thank the distinguished Senator from Hawaii (Mr. MATSUNAGA) for his characteristic courtesy and patience.

Mr. President, I ask that the 1 hour under the cloture rule not begin running until the Senator has been able to dispose of the amendment, which has been cleared.

Mr. BAKER. Reserving the right to object, I wonder if the majority leader would consider setting a time for the cloture vote by unanimous consent at 11 o'clock.

I think there is no problem on this side by abbreviating it a few minutes, and that would be the practical effect of that request.

Mr. ROBERT C. BYRD. That was done on yesterday, 11.

Mr. BAKER. Was the request the Senator just made that the hour begin running at the conclusion of the proceedings by the Senator from Hawaii——

Mr. ROBERT C. BYRD. That would not interfere with the order on yesterday that the vote occur at 11.

Mr. BAKER. So the vote would still be at 11?

Mr. ROBERT C. BYRD. Yes.

Mr. BAKER. I thank the Senator.

Mr. BROOKE. If the Senator will yield for a question, as I understand it, the cloture vote would take place at 11 on Humphrey-Hawkins?

Mr. ROBERT C. BYRD. Yes.

Mr. BROOKE. The hour prior is to be used for debate

Mr. ROBERT C. BYRD. Yes.

If I have not, I ask unanimous consent that the time preceding the cloture vote be divided between the two leaders or their designees.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

LAND HOLDINGS BY CERTAIN RELIGIOUS CORPORATIONS

Mr. MATSUNAGA. Mr. President, I ask that the Chair lay before the Senate a message from the House of Representatives on S. 3371.

The PRESIDING OFFICER laid before the Senate the following message from the House of Representatives:

Resolved, That the bill from the Senate (S. 3371) entitled "An Act to repeal certain provisions of law establishing limits on the amount of land certain religious corporations may hold in any Territory of the United States", do pass with the following amendment:

Page 2, after line 9, insert:

Sec. 3. Subsection 3(b) of the Act entitled "An Act to provide that the Territory of American Samoa be represented by a nonvoting Delegate to the United States House of Representatives, and for other purposes" is hereby amended to read as follows: "(b) owe allegiance to the United States;".

Mr. MATSUNAGA. Mr. President, I ask unanimous consent that the Senate concur in the amendment of the House.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

TERRITORY OF AMERICAN SAMOA NONVOTING DELEGATE

Mr. MATSUNAGA. Mr. President, I ask unanimous consent that the Committee on Environment and Natural Resources be discharged from further consideration of H.R. 13702, a measure to provide for the territory of American Samoa to be represented by a nonvoting delegate to the U.S. House of Representatives, and for other purposes, and that the Senate proceed to the immediate consideration of said measure.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

The bill will be stated by title.

The assistant legislative clerk read as follows:

A bill (H.R. 13702) to provide that the Territory of American Samoa be represented by a non-voting Delegate to the United States House of Representatives, and for other purposes.

The Senate proceeded to consider the bill.

Mr. MATSUNAGA. Mr. President, I ask unanimous consent the bill be read twice, and I ask for third reading.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

The bill was read the third time.

Mr. MATSUNAGA. Mr. President, I rise in support of H.R. 13702, a bill which would provide for direct representation of the people of American Samoa in the U.S. Congress by a nonvoting delegate similar to the delegates who now represent Guam, the Virgin Islands, Puerto Rico, and the District of Columbia. This measure was passed earlier this month by the House of Representatives as a noncontroversial measure under the Suspension Calendar.

Mr. President, American Samoa is an unincorporated territory of the United States which is composed of seven islands totaling approximately 76 square miles, and is situated 2,600 miles southwest of the State of Hawaii. The resident population of the territory is about 30,000, with an additional number of Samoans, between 40,000 and 50,000, living in Hawaii and on the west coast. Under the Immigration and Nationality Act, American Samoans are classified as American nationals, not U.S. citizens, although a significant number have become American citizens through the military service or emigration to the States.

The first visit of officials of the United States to the Samoan Islands was by a scientific expedition led by Navy Lt. Charles Wilkes in 1839. In 1871, another U.S. naval officer, Cmdr. Richard Meade, was assigned to make the second American visit to the islands. Meade's visit later resulted in a formal agreement drawn between High Chief Mauga, leader of the Pago Pago Bay area, and the United States for "the exclusive privilege of establishing in the said harbor of Pago Pago, island of Tutuila, a naval station", in exchange for the protection of the islands against foreign powers. Although President Grant approved the proposed agreement, it was never ratified by the Senate.

In the years following Meade's visit, the United States took considerable interest in Samoa, primarily because of the Pago Pago harbor area, which was considered by naval experts to be among the finest in the South Pacific. During the latter part of the 19th century, the Samoan Islands became an international issue which involved the United States, Germany, and Great Britain. After many years of negotiations, U.S. jurisdiction over American Samoa was recognized by the Treaty of Berlin, which was ratified by the Congress in 1900, and sovereignty was acquired by the Cession of Tutuila (1900) and Manu'a (1904), which were finally ratified by the Congress in 1929.

By Executive order in February 1900, President McKinley assigned the administration of the Territory of American Samoa to the Department of the Navy. In June 1951, President Truman, by means of another Executive order, transferred the administration of Samoa to the Secretary of the Interior.

In recent years, Mr. President, the people of American Samoa have made significant progress toward the goals of greater self-government and closer ties with the United States. Since 1963, by local initiatives, the Samoan people subjected themselves to an income tax similar to that adopted by the Territory of Guam, by selective usage of the U.S. Internal Revenue Code. In 1966, the Samoan people participated in a territory-wide plebiscite whereby the majority of the voters accepted the current Revised Territorial Constitution of American Samoa, which was approved by the Secretary of the Interior in 1967. In 1969, the local government established a joint budget review committee, which comprised both members of the administration and the legislature, to provide more input by Samoan leaders into the budgetary process. In 1970, the Samoan people held, for the first time, a territory-wide election of a delegate at large to serve as their government's special representative to Washington. And, most recently, the first popularly elected Governor of the Territory of American Samoa took office.

Mr. President, these accomplishments represent significant steps forward in the development of greater participation by the people of American Samoa in the conduct of their local affairs.

However, Mr. President, an important problem, vital to the future growth of American Samoa, remains unaddressed today. That problem is that American Samoa is the only U.S. territory with a significant population that does not have official representation in the Congress.

The elected Delegate at Large of American Samoa has no official standing in the Congress, as was the case with Guam and the Virgin Islands prior to 1972. Therefore, the territory has long looked to Hawaii's congressional delegation and other interested Members of Congress for support and assistance in national affairs affecting American Samoa. In view of the rapidly changing economic and political conditions both in the United States and in the Pacific Basin, I strongly believe that we must now provide American Samoa with direct representation in the Congress. A nonvoting delegate from American Samoa would more effectively represent and interpret the needs and interests of the territory before Congress and the many agencies of the Federal Government. Furthermore, an official delegate to the Congress would provide the people of American Samoa with representation responsible to them, and not to some other constituency.

As a Senator from Hawaii, the Pacific neighbor of American Samoa, and as one who has long been sensitive to the needs and aspirations of the Samoan people, I know very well the good character of these Pacific island people. They are extremely proud to be part of the United States and have, over the years, made many significant contributions to our Nation. During the three-quarters of a century that the American flag has flown over American Samoa, the territory has stood in the South Pacific as a stalwart representative of the United States and the principles of freedom and democracy which make our Nation great. In my judgment, we can only strengthen the bonds of friendship and cooperation between the American Samoa and the United States by providing the people of the territory with representation in the Congress.

The enactment of this bill to provide American Samoa with a nonvoting delegate will be an important signal of our continuing commitment to the well-being of the people of that territory. I, therefore, strongly urge my colleagues to give favorable consideration to this important legislation.

Mr. President, on behalf of the Energy and Natural Resources Committee, I would like to discuss four issues involved in H.R. 13702, as passed by the House.

First, this measure requires that a candidate for the office of delegate be a citizen of the United States for at least 7 years. This requirement is derived from the legislation providing for nonvoting delegates from Guam and the Virgin Island. The situation in American Samoa, however, is not similar to that of these territories where citizenship had been extended, but more akin to the situation of Puerto Rico and the Philippines where the residents were classified as U.S. nationals. At the time Congress passed legislation providing for a nonvoting representative from Puerto Rico and two from the Phillipines, the residents of those areas were U.S. nationals, not citizens, and the enabling acts required only that the candidate for office "owe allegiance to the United States." The requirement for Puerto Rico was changed when citizenship was extended, but not before.

Mr. President, the committee has received copies of a resolution from the Samoan legislature and from the office of the delegate at large of American Samoa raising the issue of the citizenship requirement. For me, and believe for the other members of the committee, the language in the House-passed bill limiting the office of delegate to U.S. citizens is unacceptable.

However, the committee does not intend to offer an amendment to the House bill to delete the requirement of citizenship. Because of the lateness of this session of Congress, the committee is accepting the House bill and recommends that it be passed without amendment. We take this action with the understanding that the House will take immediate action on another measure to add language which will modify H.R. 13702 to permit American nationals, as well as U.S. citizens, to hold the office of delegate.

Second, H.R. 13702 provides that the candidate be an inhabitant of American Samoa. On the surface, this would appear to be nothing more than a residency requirement; but due to the recent problems with the definition of residency for the Washington representative of the Commonwealth of the Northern Mariana Islands, the term "inhabitant" has an element of imprecision. The House report on H.R. 13702 addresses this problem by noting several situations, such as military service, which should not disqualify a candidate. The very fact that such an explanation is needed demonstrates why a better definition should be adopted. To that end, I would like to make clear on behalf of the committee that the word "inhabitant" means only that the candidate "be eligible to vote for Members of the House of Representatives of the legislature of American Samoa." That phrase is consistent with the definition used by the House for the word "inhabitant." The committee believes that that interpretation will avoid the unfortunate experience with the Northern Marianas.

Mr. President, the third and fourth issues are related. The House-passed bill provides for a 2-year term for the Samoan delegate and provides only a 50 percent clerk-hire allowance. In the past, especially in the cases of Puerto Rico and the Philippines, the Congress recognized that the nonvoting delegate was the territory's representative and has varied the term of office. The Resident Commissioner from Puerto Rico has a 4-year term, and the two Resident Commissioners from the Philippines had 3-year terms of office. The present delegate from Samoa has a 4-year term in accordance with Samoan law; and the committee would prefer to recognize the wishes of the Samoan people for a 4-year term.

With respect to the clerk-hire provision, this is an issue with which we have had substantial recent experience. The legislation for the Guam and Virgin Islands delegates originally provided for 60 percent clerk-hire allowances. That was found to be totally inadequate, and less than one Congress later, we had to increase the allowance to 100 percent. There is a good chance that the 50 percent clerk-hire allowance provided in the House bill will prove inadequate, and the next Congress may have to act to raise the limit.

Again, Mr. President, in an effort to expedite the consideration of this legislation, I do not intend to offer any amendments. The questions raised by the committee with respect to the definition of the word inhabitant, the term of office of the delegate, and the proposed clerk-hire allowance must await resolution at a later time. With respect to the citizenship limitation in the House bill, House amendment to a Senate bill, S. 3371, has already been concurred with by the Senate so as to permit American nationals to hold the office of delegate.

Mr. President, I strongly urge passage of H.R. 13702.

The ACTING PRESIDENT pro tempore. The bill having been read the third time, the question is, Shall it pass?

The bill (H.R. 13702) was read the third time, and passed.

Mr. ROBERT C. BYRD. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. MATSUNAGA. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

ORDER OF BUSINESS

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent to proceed for 2 minutes.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

MINERAL LEASING ACT AMENDMENTS

Mr. ROBERT C. BYRD. Mr. President, I ask that the Chair lay before the Senate a message from the House of Representatives on S. 3189.

The PRESIDING OFFICER laid before the Senate the following message from the House of Representatives:

Resolved, That the bill from the Senate (S. 3189) entitled "An Act to further amend the Mineral Leasing Act of 1920 (30 U.S.C. 201 (a)), to authorize the Secretary of the Interior to exchange Federal coal leases and to encourage recovery of certain coal deposits, and for other purposes", do pass with the following amendment:

Strike out all after the enacting clause, and insert: That (a) notwithstanding any provision of law to the contrary and notwithstanding the provisions of section 2(a)(1) of the Mineral Leasing Act of 1920, as amended (30 U.S.C. 201(a)(1)), the Secretary of the Interior is authorized to issue leases for coal on other Federal lands in the State of Utah to the lease applicant named in preference right lease applications serial numbers U1362, U1363, U1375, U5233, U5234, U5235, U5236, and U5237 upon surrender and relinquishment by the applicant of such preference right lease applications and all right to lease the lands covered by such applications, such surrender and relinquishment to be made in exchange for the lease or leases to be issued by the Secretary.

(b) Nothwithstanding any provision of law to the contrary and notwithstanding the provisions of section 2(a)(1) of the Mineral Leasing Act of 1920, as amended (30 U.S.C. 201(a)(1)), the Secretary of the Interior is authorized to issue leases for coal on other Federal lands in the State of Wyoming to the owner or owners of Federal coal leases serial numbers W0313666, W0111833, W073289, W0312311, and W0313668, B025369, W0256663, W5035, W0321794 covering lands in the State of Wyoming upon the surrender and relinquishment of such leases or portions thereof.

(c) The leases to be issued by the Secretary pursuant to the authority granted by subsections (a) and (b) of this Act and the leases or portions thereof or rights to leases to be exchanged therefor shall be of equal value. If such leases or portions thereof or rights to leases are not of equal value, the Secretary is authorized to receive, or pay out of funds available for that purpose, cash in an amount up to 25 per centum of the value of the coal lease or leases to be issued by the Secretary in order to equalize the value of the lease or lease rights to be exchanged.

(d) Any exchange lease issued by the Secretary under the authority of this Act shall contain the same terms and conditions as those leases surrendered, or in case of a surrendered lease right, the same terms and conditions as those to which the lease applicant would be entitled.

(e) This subsection does not require or obligate the Secretary to take any action or to make any commitment to a lessee or lease applicant with respect to issuance, administration, or development of any lease.

SEC. 2. Section 2(a)(1) of the Mineral Leasing Act of 1920, as amended (30 U.S.C. 201(a)(1)), is further amended by striking the period at the end of the first sentence and inserting in lieu thereof the following: ": *Provided*, That notwithstanding the competitive bidding requirement of this section, the Secretary may, subject to such conditions which he deems appropriate, negotiate the sale at fair market value of coal the removal of which is necessary and incidental to the exercise of a right-of-way permit issued pursuant to title V of the Federal Land Policy and Management Act of 1976.".

SEC. 3. Section 3 of the Mineral Leasing Act of 1920, as amended (30 U.S.C. 203), is further amended by adding after the word "contiguous", the words "or cornering", and by deleting the period at the end of the second sentence thereof and adding the following clause: "except that nothing in this section shall require the Secretary to apply the production or mining plan requirements of section 2(d)(2) and 7(c) of this Act (30 U.S.C. 201(d)(2) and 207(c)). The minimum royalty provisions of section 7(a) of this Act (30 U.S.C. 207(a)) shall not apply to any lands covered by this modified lease prior to a modification until the term of the original lease or extension thereof which became effective prior to the effective date of this Act has expired.".

SEC. 4. Section 37 of the Mineral Leasing Act of 1920 (30 U.S.C. 193) is further amended by the addition of the words "except as provided in sections 206 and 209 of the Federal Land Policy and Management Act of 1976 (90 Stat. 2756, 2757–8), and" after "only in the form and manner provided in this Act," and before the word "except".

SEC. 5. Section 30 of the Mineral Leasing Act of 1920, as amended (30 U.S.C. 187) is further amended by striking the word "boy" and inserting in lieu thereof "child" and by striking the phrase "or the employment of any girl or woman, without regard to age,".

SEC. 6. (a) The Secretary of the Interior is authorized and directed within nine months of the date of enactment of this Act to evaluate and review the scenic, recreational, fish and wildlife, cultural, historic, and other public values of the reservoir in Johnson County, Wyoming, known as Lake DeSmet and the adjoining and adjacent coal properties. The Secretary's review and evaluation shall be for the purpose of determining whether the Lake DeSmet property shall be acquired for public use and enjoyment by exchange for Federal coal lands.

(b) If the Secretary determines that the Lake DeSmet property shall be acquired, he is authorized, with the agreement of the owners of the property, to acquire the Lake DeSmet property by exchanging Federal coal lands, interests in Federal coal lands, or Federal coal leases.

(c) The exchange authorized by this section shall be for equal value. To the extent, if any, the value of the lands or interests exchanged are not equal the difference may be adjusted by the payment of money so long as the payment does not exceed 25 per centum of the total value of the lands or interests transferred out of Federal ownership. In determining the value of the Lake DeSmet property, the Secretary is authorized and directed to include the fair market value of the property, considering the acquisition cost of the lands, the value of the coal deposits, water rights and water resource developments, and capital and other appropriate improvements. The exchange of such properties shall be carried out expeditiously in accordance with the provisions of this section and other Federal land exchange authority to the extent such authority is applicable and consistent with this section.

(d) The Secretary is authorized to transfer any property acquired pursuant to this section (1) to the appropriate agency in the Department of the Interior for management and administration, or (2) to the State of Wyoming for recreational purposes and fish and wildlife management. Any conveyance to the State of Wyoming shall contain a reservation of all minerals to the United States and shall provide that, if the State ceases to use the property conveyed for fish propagation and wildlife management, title to such property shall revert to the United States.

SEC. 7. Effective October 1, 1979, there are authorized to be appropriated to the Secretary such sums as are necessary to carry out the purposes of this Act.

SEC. 8. The title of the Federal Coal Leasing Amendments Act of 1975 (Public Law 94–377) is hereby changed to the Federal Coal Leasing Amendments Act of 1976.

Mr. JACKSON. I would like to point out, Mr. President, that while the exchanges authorized by the House amendment to S. 3189 are specific to individual leaseholders, the exchanges authorized are not, according to the Department of the Interior, inconsistent with the standards governing the general exchange authority contained in S. 3189, as passed by the Senate.

The principle in the Senate bill, which is supported by the administration, would restrict the use of exchange authority to those circumstances in which the Secretary seeks to resolve environmental problems which could not be prevented through enforcement of the Surface Mining Control and Reclamation Act of 1977 or other environmental laws. By accepting the House amendment, the Senate would agree with the House to delete the general exchange authority but would not, in approving the authority for exchange of specific leases, be doing violence to the principles contained in the Senate version.

I agree with the administration that the value of these amendments as tools for the Secretary of the Interior in managing Federal coal resources is great enough that the amendments should not be lost in a conflict over exchange authority, when, as I have noted, the treatment of exchange in the House bill does not do violence to the concept of exchange authority adapted by the Senate. In short, I believe that the general authority to exchange as outlined in the Senate legislation makes for better resource management than the piecemeal or case-by-case approach contained in the House amendment, but that the failure of the House to adequately deal with the exchange issue should not be allowed to be an obstacle to passage of this important legislation.

Mr. HANSEN. Mr. President, I move that the Senate concur in the amendment of the House.

The ACTING PRESIDENT pro tempore. The question is on agreeing to the motion.

The motion was agreed to.

EXECUTIVE SESSION

Mr. ROBERT C. BYRD. Mr. President I ask unanimous consent that the Senate go into executive session for 1 minute only, for the consideration of two nominations, and then immediately return to legislative session.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

Mr. BAKER. Mr. President, reserving the right to object—and I will not object—these items have been cleared on our calendar. I express my appreciation to the majority leader for agreeing to take up the nominations at this time. One is a nomination to the Board of Directors of the Tennessee Valley Authority.

The Senate proceeded to the consideration of executive business.

The ACTING PRESIDENT pro tempore. The nominations will be stated.

TENNESSEE VALLEY AUTHORITY

The assistant legislative clerk read the nomination of Richard Merrell Freeman, of Illinois, to be a member of the Tennessee Valley Authority.

The ACTING PRESIDENT pro tempore. Without objection, the nomination is considered and confirmed.

Mr. BAKER. Mr. President, I will support the confirmation of Mr. Richard Freeman to serve on the TVA Board of Directors. The Environment and Public Works Committee has held 3 days of public hearings on the nomination and has covered a great many subjects of interest to the TVA and the people of my State. We even heard from the present Chairman of the Board in an effort to resolve once and for all the nature and extent of the relationship that exists between David and Dick Freeman.

Although I am not entirely pleased with some of his answers to my questions regarding issues before the TVA Board,

on balance, I believe the necessity for a quorum is more important than the adequacy of his answers. Moreover, I am impressed with Mr. Richard Freeman's integrity and intelligence.

For that reason, Mr. President, I will vote to confirm the nomination of Mr. Richard Freeman. Also, I would urge the President to send up the nomination of the third Director to the TVA Board without further delay.

Mr. ROBERT C. BYRD. Mr. President, I move to reconsider the vote by which the nomination was confirmed.

Mr. BAKER. I move to lay that motion on the table.

CALIFORNIA DEBRIS COMMISSION

The assistant legislative clerk read the nomination of Col. John Miley Adsit to be a member of the California Debris Commission.

The ACTING PRESIDENT pro tempore. Without objection, the nomination is considered and confirmed.

Mr. ROBERT C. BYRD. Mr. President, I move to reconsider the vote by which the nomination was confirmed.

Mr. BAKER. I move to lay that motion on the table.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the President of the United States be immediately notified of the confirmation of the nominations.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

LEGISLATIVE SESSION

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the Senate return to legislative session.

There being no objection, the Senate resumed the consideration of legislative business.

ORDER OF BUSINESS

Mr. ROBERT C. BYRD. Mr. President, what is before the Senate?

The ACTING PRESIDENT pro tempore. There is no pending business before the Senate other than the 1 hour debate preceding the vote on the cloture motion at 11 o'clock.

Mr. ROBERT C. BYRD. Which has now been reduced to 45 minutes. Am I correct?

The ACTING PRESIDENT pro tempore. The Senator is correct.

The Chair thanks the Senator for his generous remarks this morning with respect to the Chair.

Mr. ROBERT C. BYRD. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER (Mr. LEAHY). The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. BROOKE. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

FULL EMPLOYMENT AND BALANCED GROWTH ACT OF 1978

The Senate resumed the consideration of the bill (H.R. 50).

Mr. BROOKE. Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER (Mr. PAUL G. HATFIELD). The Senator will state it.

Mr. BROOKE. As I understand the parliamentary situation at the present time, we are now in an hour of controlled time of debate on the Humphrey-Hawkins bill, prior to a cloture vote which will take place at 11 a.m. Is that not correct?

The PRESIDING OFFICER. The Senator is correct.

Mr. BROOKE. Mr. President, on the Humphrey-Hawkins bill is an amendment, submitted by the Senator from Massachusetts, which has to do with nondiscrimination against the elderly, women, minorities, and the handicapped in the U.S. Senate. Is that not correct?

The PRESIDING OFFICER. The Senator is correct.

Mr. BROOKE. Mr. President, as I said when I submitted that amendment, I am strongly committed to having the Senate obey the law which the Senate has passed, which would prohibit discrimination against women, the elderly, minorities, and the handicapped in the Senate and in Congress.

I said at the time that I introduced the amendment, and I feel just as strongly now if not more, time has long passed when we should have passed this legislation which was introduced really at the beginning of this Congress and which has been the subject of much study, hearings, and ultimately legislation in the form of a mechanism for providing for nondiscrimination against women, the elderly, minorities, and the handicapped in employment in the Senate and equal pay for those that I have named, promotional opportunities, and all that goes with it.

Mr. President, I also said at the time of the introduction of that amendment that I am committed to the passage of the Humphrey-Hawkins bill. I am a cosponsor, an original cosponsor of the Humphrey-Hawkins bill. I feel very strongly that it should be the law of this land, that we need it, and that it should be passed. It was the subject of lengthy hearings before my committee, the Banking, Housing, and Urban Affairs Committee, as it was before the Human Resources Committee.

At some time after this bill was introduced there was a meeting with the President in an effort to get Presidential support for the legislation, and as a price for that Presidential support, in my opinion the Humphrey-Hawkins bill was somewhat emasculated if not emasculated.

Since that time there have been attempts made to further weaken what was the original intent of Senator Hubert Humphrey, Congressman GUS HAWKINS, and those of us who joined as cosponsors of the Humphrey-Hawkins bills.

Even at this very moment negotiations are going on between the proponents and the opponents of that bill. The distinguished majority leader, together with the distinguished minority leader, has attempted to have sessions that would hopefully result in a time agreement so that the Humphrey-Hawkins bill could be brought up and acted upon by the Senate.

Mr. ROBERT C. BYRD. Mr. President, will the Senator yield?

Mr. BROOKE. I am very pleased to yield.

Mr. ROBERT C. BYRD. Mr. President, I thank the distinguished Senator for yielding.

Mr. President, I have been asked by members of the ad hoc committee to delay the cloture vote until 12 noon today. I have not asked the minority leader, but I now clear it with him, and he can reserve the right to object.

UNANIMOUS-CONSENT AGREEMENT

I ask unanimous consent that the debate on cloture end at 11 a.m., and that the cloture vote occur at 12 noon. This will allow the Senate in the meantime during the intervening hour to get on with other business.

Mr. BAKER. Mr. President, reserving the right to object, and I shall not object, I am delighted to hear the majority leader make that request. I have just received word from the Republican members of the ad hoc committee that they feel they are making good progress and that such a request is likely to produce a good result. So I am pleased not only not to object but to concur in the request.

Mr. ROBERT C. BYRD. I thank the minority leader.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BROOKE. Mr. President, I am encouraged by the words of the distinguished minority leader that the ad hoc committee believes that it is making some progress in its negotiations. And certainly I hope and pray that those negotiations are successful, even though I must be candid and express my view that I do not hold out much hope for any strengthened Humphrey-Hawkins bill, but I interpret the minority leader's remarks to mean that at least there is some hope that a bill may be agreed upon that can be passed by the Senate before this Congress adjourns sine die.

Mr. BAKER. Mr. President, will the Senator yield to me?

Mr. BROOKE. I yield.

Mr. BAKER. Mr. President, I thank the Senator from Massachusetts.

I know of the extraordinary effort that he has put into this legislation and the justifiable pride he feels in his contribution to it. No one here has stated more eloquently than he the need for full employment and the formulation of public policy that would establish that objective.

I am happy to report to the Senator from Massachusetts that in the ad hoc committee, and by the way the ad hoc committee is made up of those who support Humphrey-Hawkins in its original configuration and those who do not, progress is being made and they felt that their progress this morning did in fact

justify the postponement of the cloture vote by an hour. I cannot tell the Senator from Massachusetts the nature of the progress. I rather suspect that we are now involved in those negotiations with questions of inflation goals as well as unemployment goals. But the distinguished majority leader is on the floor, I see, and he and I elected not to participate in those conversations so that the committee would have the fullest opportunity to explore their differences and the potential for agreement.

I have a feeling that we may get an agreement, and I think that is a good thing, because I think the establishment of a policy that brings consensus to this body on a controversial issue of such importance would be good for the country as well as good for the Senate.

So I take this opportunity to express my appreciation to the Senator from Massachusetts for his heroic efforts in this field and to express to him my optimism that we may yet see some measure that is generally suitable to the mood and temper of the Senate and to the country to follow on after his efforts.

Mr. BROOKE. Mr. President, I thank my distinguished minority leader for his words of enlightenment and encouragement, and I further express my appreciation to him for his leadership together with the leadership of the majority leader in keeping these negotiations going.

I know that at many times during this rather lengthy period negotiations threatened to be terminated and thus there would have been no possibility in this session of Congress, or in this Congress, more correctly, for passage of Humphrey-Hawkins.

Because the Senator from Tennessee has said that I personally feel so strongly about Humphrey-Hawkins, I express my deep appreciation to him and to the majority leader for keeping the negotiations going even though, as they have both said, and I think rightfully so, they were not participating in the deliberations of the ad hoc committee. They obviously cannot do that and run the Senate as well in these waning days of this Congress.

Mr. ROBERT C. BYRD. Mr. President, will the Senator yield?

Mr. BROOKE. I yield.

Mr. ROBERT C. BYRD. I wish to thank him for his kind and generous remarks.

Mr. BROOKE. I thank the majority leader.

However, Mr. President, I was torn between two issues of paramount concern to me and I think really to Congress. One was Humphrey-Hawkins, which would establish a goal of unemployment which certainly we need that is significant. Even significant, though, there are no programs now in that Humphrey-Hawkins bill, which would establish such a goal. It is mostly symbolic, if not all symbolic, and even though it is I still believe that there is a place for symbolism and a benefit to be derived from symbolism.

Thus, I am torn between Humphrey-Hawkins and the commitment to equality of opportunity for all in employment in the U.S. Senate.

Here we have mandated the equal opportunity in employment throughout the Government, throughout the business sector, the private sector of our economy, and yet at the same time we exempted ourselves from the equal employment or Equal Pay Act of 1973; we had exempted ourselves from title VII of the Civil Rights Act of 1964. It seemed to me to be an act of hyprocrisy for the Senate of the United States to establish one standard for the rest of the Nation and another standard for itself.

It was for that reason that I introduced an amendment to Humphrey-Hawkins which would provide for the establishment of a mechanism to insure that the U.S. Senate did not discriminate in the hiring, in the promotion, and pay of women, minorities, the elderly, and the handicapped.

We have evidence to prove that that is what is happening in the U.S. Senate today, 1978, as we wind up the 95th Congress.

Mr. President, there are those around who are suggesting that by my introduction of the amendment against nondiscrimination of the elderly, the women, the handicapped, and the minorities, that I thereby might jeopardize the vote on cloture on Humphrey-Hawkins.

Some are saying that, because the amendment is on the bill that, thereby, they cannot vote for cloture for Humphrey-Hawkins and, in effect, they are saying that if the amendment is on the bill at the time the cloture vote is taken that they cannot vote for cloture because of their opposition to this amendment.

Mr. President, I never question the motives of my colleagues. I have some serious doubts, however, as to the legitimacy, the wisdom, of such a specious argument as that. But we have to deal with realities, Mr. President, and the realities are that we need to get 60 votes in the Senate for cloture on Humphrey-Hawkins in order for this bill to be passed.

I, for one, would never, as I said at the time I introduced the amendment, stand in the way of the passage of the Humphrey-Hawkins bill. So it is a very difficult decision for me to make. It is a difficult decision for me, because I do not believe that, though I strongly support both of these measures, it is an either/or situation or should be an either/or situation. It should not be a choice between whether we should have full employment in this country or whether the employees who happen to be employees of the U.S. Senate or nonemployees who want to work for the U.S. Senate who happen to be women or elderly or members of a minority group or handicapped can be employed and given an equal opportunity.

It should not be a choice between the two. Both of them are very worthy causes. Both are, in my opinion, essential pieces of legislation. There should be no question about either.

But Members of the Senate, of course, disagree in some respect, and I think it is being used perhaps as an instrument in order to deny the Senate its opportunity to vote up or down on Humphrey-Hawkins; namely, by voting against cloture.

Mr. President, I have made my decision. It has been a painful one; it is a difficult one. But I am buttressed by the fact that there will be opportunities again, and I shall seek those opportunities and wait for those opportunities to give the Senate the opportunity to vote on both the Humphrey-Hawkins bill and the amendment that I introduced for nondiscrimination of personnel in the U.S. Senate.

My decision, which I have described as painful and tragic, is a matter of chronological priority. Thus, Mr. President, I ask unanimous consent that I may be allowed to withdraw my amendment to the Humphrey-Hawkins bill.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BROOKE. Having withdrawn my amendment with all the reluctance that I can muster, Mr. President, I want to again assure the Chair and the Senate, but mostly I want to assure women and elderly and minorities and handicapped, that our battle to make the Senate of the United States come in line with the rest of the country and give full equal employment opportunities, with all that that means to those who would work in the Senate, is by no means terminated, and that we will continue to fight in Congress in order to bring that about through the amendment that I have just reluctantly withdrawn from this bill and from this bill only.

Mr. President, I yield the floor.

Mr. GOLDWATER. Mr. President, I just wanted to explain my position on the Humphrey-Hawkins bill. There is nothing new about this legislation. The first time I heard it discussed was when I was in college 50 years ago. In fact, it was one of the first premises on which the socialized economy suggested by the Soviets was based. But they saw the dangers in it even with a government-controlled economy.

My objection to it are not in the symbolism of establishing a goal for unemployment or a goal for inflation or for balancing budgets. My objection, Mr. President, is that when we fail to hit the goal of employment—and, mind you, it it going to be in there, and this year, if we pass the Humphrey-Hawkins bill, what we are doing is hanging a skeleton in a handy closet so that in the years after this we can put meat on it, the organs in it, to give it the muscle that it has to have if it ever has a chance of working, and I do not think it has that chance.

When we do not meet the employment goals, then the Government steps in, and the Government begins to regulate jobs, begins to regulate prices, begins to regulate wages and taxes, and we go through periods such as we have already gone through, where something might be manufactured in Boston, Mass., but we find that Boston, Mass., is an area of great surplus production, but we find

some community in Texas that is not, so the Government has the power to transfer that business to Texas.

I know this sounds foolish, but I want to remind my colleagues that we have been through all of this once before, and fortunately we got out of it. In my opinion, you cannot have a successful operation of a piece of legislation like the Humphrey-Hawkins bill without absolute domination of the economy by the Federal Government.

Now, if everything works, and we set a goal of 4 percent for unemployment and we hit it, fine and dandy. But I raise the question, why 4 percent?—4.5 percent was the goal that was set way back in 1946. I asked the authors of this legislation, "How did you arrive at that figure?" They sort of smiled and said, "Almost by flipping a nickel."

To begin with, we do not get honest figures about our unemployment in this country. The labor statistics are probably the most juggled statistics I have ever run into. They always remind me of a book I once had, "How To Lie With Statistics."

You cannot employ people unless they are 16 years old, but in spite of that, people under 16 are counted in the unemployment figures. You are not supposed to hire people over 65, but in spite of that they are counted. So when we look at the unemployment figures submitted to us by the Department of Labor, Mr. President, I feel certain they are not honest—or, to put it an easier way, they are not true.

I would much rather see the figures come to us divided. I admit there are a lot of black people in this country unemployed, and if we want to set a goal, let us take the groups that are not well employed, like the blacks in some cases, my Indians in some cases, in some cases Puerto Ricans and the Mexican-Americans——

The PRESIDING OFFICER. All of the time of the minority has expired.

Mr. GOLDWATER. Of what?

The PRESIDING OFFICER. Of the minority.

Mr. GOLDWATER. I knew I was a minority, but I did not know I was that much of one.

The PRESIDING OFFICER. Who yields time?

Mr. GOLDWATER. The minority is out of it.

Mr. ROBERT C. BYRD. Mr. President, I yield time to the Senator from Hawaii (Mr. INOUYE) to call up a conference report.

FOREIGN ASSISTANCE APPROPRIATIONS, 1979—CONFERENCE REPORT

Mr. INOUYE. Mr. President, I submit a report to the committee of conference on H.R. 12931 and ask for its immediate consideration.

The PRESIDING OFFICER. Until the papers can be retrieved, the conference report cannot be called up.

Mr. INOUYE. Mr. President, I suggest the absence of a quorum.

Mr. ROBERT C. BYRD. Mr. President, will the Senator not suggest the absence of a quorum, please?

Mr. INOUYE. I withdraw that.

Mr. ROBERT C. BYRD. I would just request that the Senator hold the floor until the papers can be found and the conference report can be disposed of.

The PRESIDING OFFICER. The report will be stated.

The legislative clerk read as follows:

The committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H.R. 12931) making appropriations for Foreign Assistance and related programs for the fiscal year ending September 30, 1979, and for other purposes, having met, after full and free conference, have agreed to recommend and do recommend to their respective Houses this report, signed by a majority of the conferees.

The PRESIDING OFFICER. Without objection, the Senate will proceed to the consideration of the conference report.

(The conference report will be printed in the proceedings of the House of Representatives.)

Mr. INOUYE. Mr. President, this conference report provides the details of the compromise agreement reached between the managers on the part of the House and the managers on the part of the Senate. I can say, without hesitation or qualification, that it is a good compromise, a fair compromise, and one which I believe the Senate should support.

The Senate went into conference with a bill totaling $9,203,806,072; we came out of the long, tough negotiating session with the House with a bill totaling $9,135,031,984, a difference of only $68,774,124. Because our positions were sound, because the Senate managers were steadfast in their support, we were able to persuade the House conferees in many instances and many Senate initiatives emerged unscathed. To be sure, we found it necessary to recede or to accept House amendments on some items, but that is the nature of compromise. In all, the Senate did quite well in maintaining its position.

Mr. President, as I noted when I introduced the committee version of this bill into the Senate, this is not a "normal" foreign aid bill; it has a significant difference and that is, it provides funding for U.S. participation in the Supplementary Financing Facility—the so-called Witteveen Facility—of the International Monetary Fund. Under this bill, the United States is making a $1.8 billion investment in international monetary stability. And, with the current plight of the dollar, I believe we all have an interest in restoring and preserving international monetary stability.

Mr. President, the conference report recommends the appropriation of $9,203,806,072 for fiscal year 1979 funding of foreign assistance and related programs. This amount is $2,371,158,948 more than was appropriated last year for foreign assistance and related programs, but it is also $1,252,728,971 less than the amount requested by the President.

Mr. President, we are now well into fiscal year 1979. With each day that passes there is a costly delay—a postponement of management decisions, a loss of momentum in the timing and execution of programs, and the deferral of necessary personnel actions. This bill was considered at length before it was sent to conference; the Senate conferees responsibly discharged their duties and through hard negotiations obtained a good conference agreement. I now ask the Senate to affirm the work of its conferees and to approve the conference report on H.R. 12931.

Mr. President, I move that the conference report be agreed to.

Mr. ROBERT C. BYRD. Mr. President, has the distinguished Senator from Hawaii finished?

Mr. INOUYE. Yes.

Mr. ROBERT C. BYRD. Mr. President, I suggest the absence of a quorum until the Senator from Pennsylvania (Mr. SCHWEIKER) can get here. He was detained at a committee meeting, and is on his way.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. SCHWEIKER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. SCHWEIKER. Mr. President, the conference report on foreign assistance appropriations represents a hard fought compromise ironed out by the Senate and House conferees. The conference held on September 27 went from 2 in the afternoon until 10:30 that night. It was a good conference, with all of the various issues being discussed in some detail.

Mr. President, as the distinguished Senator from Hawaii (Mr. INOUYE) has stated the conference agreement calls for a total appropriation of $9,135,031,948. This agreement is $68.8 million below the amount approved by the Senate when it passed its version of the foreign assistance appropriations bill on September 22. The conference agreement is $1,252,729,000 below the administration's request. This represents a reduction below the request of over 12 percent. The recommendation should surely place the administration on notice, as I stated in my remarks when the Senate first considered this legislation, that so long as important domestic programs are held down so too must our foreign aid be held down.

Mr. President, even though this recommendation for foreign aid represents a severe cut in the administration's request, it is, I believe, one of the best foreign aid bills to come out of Congress in several years. The United States will continue to be very generous in exercising its responsibilities to the developing countries of the world under this legislation. Much of the funds in this legislation do provide needed assistance to the poor and starving people of the world. The United States need not take a back seat to anyone in this effort.

AID TO SYRIA

Mr. President, one of the many difficult issues the conference dealt with was aid to Syria. This particular item consumed a great deal of time in the conference. The House of Representatives, by floor amendment and before Camp David, had cut out the $90 million in security-supporting assistance requested by the administration. The Senate included the full amount. This was a particularly difficult issue, because all of us were concerned over recent actions by the Syrian Government in Lebanon. I think it could be safely said that had we considered the aid for Syria as an unrelated item, the House position would have prevailed. However, due to the recent breakthroughs at Camp David and the delicate negotiations for peace in the Middle East which continue even today in Washington, the conferees felt it was necessary at this time to provide the Syrian aid. In doing so, however, the conferees recommend that this funding be used only if the President believes that their use will serve the process of peace in the Middle East.

U.S. REFUGEE PROGRAM

Mr. President, another difficult issue the conferees struggled with is the overall status and management of the U.S. refugee assistance program. The issue was not funding, but rather the overall direction, management and administration, or lack of it, of the U.S. refugee effort. Under the leadership of the Senator from Hawaii, it was agreed that our refugee program should be consolidated, rather than continuing the present mishmash of programs operated through several different, overlapping, competing, and duplicating programs. The conference report calls for the consolidation of these programs, which is a badly needed reform. The controversy over this proposition centered around which agency or department might be the best one to handle this reorganized effort. The House conferees, and I agreed with them, felt that the Agency for International Development could more properly and efficiently administer this program. The Senate report, reflecting our distinguished chairman's views, called for the consolidation to be under the Office of Migration and Refugee Assistance at the Department of State. The chairman at the conference, however, indicated that he could live with whatever agency the administration determined would be best, and his main concern was to secure the reform of the program, with which I strongly concur. The conference report directs that the administration present its plan to consolidate overseas refugee programs managed, budgeted, and justified by AID, though if it should decide that AID was not equipped to do so it could prepare an alternate plan. Mr. President, this was an issue that held up the filing of the report, because of the differing recollections of the conference action. However, as is entirely proper, and usual, the conferees themselves came to an agreement regarding this language.

INTERNATIONAL FINANCIAL INSTITUTIONS

Mr. President, one of the major items that has concerned Congress lately has been the size and way in which commitments have been made by the United States to fund our share in the International financial institutions. Past practice was for the administration to present its commitment to us, or fait accompli, and then demanding that that commitment be filled. Over the last year and a half we have been able to change that system. Last year, through an amendment offered by the chairman (Senator INOUYE), and cosponsored by me on authorizing legislation for the IFI's, the law now states that any commitments made for funding these institutions are made expressly subject to the appropriation of funds. In addition, on this legislation we are now considering, the House accepted my amendment which states the sense of the Congress regarding specific percentage shares for future U.S. funding of these institutions.

This makes it clear we will not consider any percentage contributions which exceed the levels stated in this bill, which we regard as proper for these institutions.

Both of these amendments go a long way toward reforming the method by which we commit funds for the IFI's.

WITTEVEEN FACILITY

Mr. President, the House accepted the amendment offered by the Senate appropriating full funding for the so-called Witteven facility of the International Monetary Fund. This Witteven facility of the International Monetary Fund. This represents the final action of an effort I initiated on the authorizing legislation which requires that our participation in this IMF facility be wholly subject to the appropriation of funds.

HIGH 1-YEAR RETIREMENT

Mr. President, the only item in the bill that was taken back to the House in true disagreement was a provision the Senate Committee added which attempts to overturn an action by the House/Senate conference committee on the State Department authorizing legislation which provided that foreign service personnel otherwise eligible for retirement could base their annuity on their high year of salary, rather than the high 3 years which is the practice in all other Federal departments and agencies as well as the Congress. It should be pointed out that this high-year provision was enacted into law without either House specifically voting on the issue. The Senate provision was an atttempt to correct this outrageous action. I know of no private retirement plan, and I tried to find one, that provides an annuity based on a high 1-year principal. The House sent over a bill not too long ago which would have provided such a high 1-year retirement for Members of Congress, a provision which our committee rightly defeated. So, Mr. President, I compliment the chairman for his efforts on this issue and I strongly support him. I might add that the President, himself, has indicated that he strongly opposes the high 1-year retirement provision.

Mr. President, before concluding my remarks I wish to express again my appreciation to the senior Senator from Hawaii for his outstanding cooperation and consideration throughout the deliberations of this legislation. I recommend that the Senate approve this conference report.

MARKETING OF PERISHABLE AGRICULTURAL COMMODITIES

Mr. TALMADGE. Mr. President, I ask that the Chair lay before the Senate a message from the House of Representatives on S. 976.

The PRESIDING OFFICER laid before the Senate the following message from the House of Representatives:

Resolved, That the bill from the Senate (S. 976) entitled "An Act to amend the Perishable Agricultural Commodities Act, 1930, relating to practices in the marketing of perishable agricultural commodities", do pass with the following amendments:

Strike out all after the enacting clause, and insert: That section 3(b) of the Perishable Agricultural Commodities Act (7 U.S.C. 499c(b)) is amended (1) in the second sentence by inserting immediately before the period at the end thereof, the phrase "and to be furnished thereafter"; and (2) in the third sentence by striking out "$100" and inserting in lieu thereof "$150 plus $50 for each branch or additional business location as defined by the Secretary. Total annual fees for any applicant shall not exceed $1,000 in the aggregate.".

SEC. 2. (a) Section 1 of such Act (7 U.S.C. 499a) is amended by adding in subsection (6)(C) thereof after the word "commodity" the phrase "other than potatoes".

(b) The amendment made by subsection (a) of this section shall become effective on the date of enactment of this Act. However, such amendment shall not apply to any person, who on the day before such date of enactment was buying potatoes for processing only within the State where such potatoes were grown, for such additional period of time, not to extend later than January 1, 1982, as the Secretary may upon application prescribe, if the Secretary finds that compliance with such amendment on its effective date would cause undue hardship to such person or would otherwise not advance the public interest.

SEC. 3. (a) Section 1 of such Act (7 U.S.C. 499a) is further amended by striking from subsection (6)(B) the figure "$100,000" and inserting in lieu thereof the figure "$150,000"; and by striking from subsection (7) the figure "100,000" and inserting in lieu thereof the figure "$150,000".

(b) The amendments made by this section shall become effective beginning with calendar year 1979.

SEC. 4. Section 13 of such Act (7 U.S.C. 499m) is amended by renumbering subsections (b) through (e) as subsections (c) through (f) and by adding a new subsection (b) as follows:

"(b) The Secretary or his duly authorized agents, in order to insure that the prompt payment provision of section 2(4) of the Act is being complied with, shall from time to time inspect the accounts, records, and memoranda of any commission merchant, dealer, or broker determined in a formal disciplinary proceeding pursuant to section 6(b) of the Act to have violated such provision. The Secretary may also require that any such commission merchant, dealer, or

broker furnish, maintain, and from time to time adjust a surety bond in form and amount satisfactory to the Secretary as assurance that such commission merchant's, dealer's, or broker's business will be conducted in accordance with this Act and that such commission merchant, dealer, or broker will pay all reparation awards, subject to its right of appeal under section 7(c): *Provided, however,* That if such surety bond is furnished, maintained, and adjusted as required by the Secretary, the Secretary shall not thereafter inspect the accounts, records, and memoranda, of such commission merchant, dealer, or broker pursuant to this subsection more than once a year. If any such commission merchant, dealer, or broker refuses to permit such inspection or fails or refuses to furnish, maintain, or adjust such surety bond, the Secretary may publish the facts and circumstances and/or, by order suspend the license of the offender until permission to make such inspection is given or such surety bond is furnished, maintained, or adjusted.".

Amend the title so as to read: "An Act to amend the Perishable Agricultural Commodities Act.".

UP AMENDMENT 2100

Mr. TALMADGE. Mr. President, I move that the Senate concur in the amendments of the House of Representatives with the following amendment which I send to the desk.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Georgia (Mr. TALMADGE) proposes an unprinted amendment numbered 2100.

Mr. TALMADGE. I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

In lieu of the language proposed to be inserted by the House amendment, insert the following:

SECTION 1. (a) Effective January 1, 1979, section 1 of the Perishable Agricultural Commodities Act, 1930 (7 U.S.C. 499a), is amended by—

(1) in subsection (6), striking out "$100,000" and inserting in lieu thereof "$200,000"; and

(2) in subsection (7), striking out "$100,000" and inserting in lieu thereof "$200,000".

(b) Section 1 of the Perishable Agricultural Commodities Act, 1930, is further amended by inserting in subsection (6) immediately after "(C) no person buying any commodity" the following: "other than potatoes", except that no person buying potatoes for processing solely within the State where grown shall be deemed or considered to be a dealer under subsection (6) of section 1, as amended by this subsection, until January 1, 1982.

SEC. 2. Section 3(b) of the Perishable Agricultural Commodities Act, 1930 (7 U.S.C. 499c(b)), is amended by—

(1) inserting immediately before the period at the end of the second sentence the following: "and to be furnished thereafter";

(2) striking out "$100" in the third sentence and inserting in lieu thereof the following: "$150, plus $50 for each branch or additional business facility operated by the applicant in excess of nine such facilities, as determined by the Secretary. Total annual fees for any applicant shall not exceed $1,000 in the aggregate";

(3) inserting immediately after "referred to above:" in the fourth sentence the following: "*Provided,* That the amount of money accumulated and on hand in the special fund at the end of any fiscal year shall not exceed 25 percent of the projected budget for the next following fiscal year:"; and

(4) inserting "*further*" immediately after "*Provided*" in the fourth sentence.

SEC. 3. Section 13 of the Perishable Agricultural Commodities Act, 1930 (7 U.S.C. 499m), is amended by renumbering subsections (b) through (e) as subsections (c) through (f) and adding a new subsection (b) as follows:

"(b) The Secretary or the Secretary's duly authorized agents, in order to insure that the prompt payment provision of section 2 (4) of this Act is being complied with, shall from time to time inspect the accounts, records, and memoranda of any commission merchant, dealer, or broker determined in a formal disciplinary proceeding under section 6(b) of this Act to have violated such provision. The Secretary may also require that any such commission merchant, dealer, or broker furnish, maintain, and from time to time adjust a surety bond in form and amount satisfactory to the Secretary as assurance that such commission merchant's, dealer's, or broker's business will be conducted in accordance with this Act and that such commission merchant, dealer, or broker will pay all reparation awards, subject to its right of appeal under section 7(c) of this Act: *Provided,* That if such surety bond is furnished, maintained, and adjusted as required by the Secretary, the Secretary shall not thereafter inspect the accounts, records, and memoranda of such commission merchant, dealer, or broker under this subsection more than once a year. If any such commission merchant, dealer, or broker refuses to permit such inspection or fails or refuses to furnish, maintain, or adjust such surety bond, the Secretary may publish the facts and circumstances and, by order, suspend the license of the offender until permission to make such inspection is given or such surety bond is furnished, maintained, or adjusted.".

SEC. 4. Section 3(b) of the Farm Labor Contractor Registration Act of 1963 (7 U.S.C. 2042(b)) is amended by—

(1) striking out "or" at the end of paragraph (8), striking out the period at the end of paragraph (9) and inserting in lieu thereof a semicolon and "or"; and

(2) adding at the end thereof a new paragraph (10) as follows:

"(10) any person who would be required to register solely because the person is engaged in any such activity solely for the purpose of supplying full-time students or other persons whose principal occupation is not farmwork to detassel and rogue hybrid seed corn or sorghum for seed and to engage in other incidental farmwork for a period not to exceed four weeks in any calendar year: *Provided,* That such students or other persons are not required by the circumstances of such activity to be away from their permanent place of residence overnight: *Provided further,* That such students or other persons, if under 18 years of age, are not engaged in providing transportation in vehicles caused to be operated by the contractor.".

Mr. TALMADGE. Mr. President, this amendment to the House amendment retains and restates important features of the original Senate bill to amend the Perishable Agricultural Commodities Act (PACA), but does make significant concessions to the concerns of the House Members.

The Perishable Agricultural Commodities Act is basically sound. Our most important concern in developing this legislation was to modify the license fee structure under PACA to respond to the changing economic conditions of the Nation. However, the Senate bill also contains provisions that respond to problems unrelated to the fee structure under PACA that are plaguing agriculture at this time. First is the amendment to the Farm Labor Contractor Registration Act of 1963 to exempt students on farms during the summer who work detasseling seed corn, and second is the extension of PACA to intra-State potato processors beginning January 1, 1982.

Let me briefly not the provisions of our amendment and the reasons for these provisions.

Both the Senate and the House provide for a $50 fee per outlet for additional outlets owned by a licensee, with a $1,000 limitation on the total fee. The House provision would impose this on all additional outlets, whereas the original Senate proposal would exempt the first 20 additional outlets from this additional fee.

As a compromise we are suggesting that we reduce the number of outlets exempted from the $50 fee to nine. Any firm that has from one to nine additional outlets will only be subject to the original license fee.

PACA now provides an exemption from its licensing requirements to retailers and frozen food brokers whose sales of the products that would be subject to PACA do not exceed $100,000. The Senate proposed raising this figure to $200,000 and the House proposed a $150,000 exemption. The reason the Senate chose the higher level was that the prices of fruits and vegetables have more than doubled since the $100,000 level was imposed. Therefore we are attempting to get back to where we started. The lower level in effect pushes the license requirement onto smaller and smaller businesses. This is not the purpose of PACA.

PACA does not now cover intra-State processing plants. There have been recent problems with intra-State potato processing plants and this has stimulated significant interest in extending the provisions of PACA to potato processors.

The Senate amendment would require licensing of these processors, but postpone the requirement until January 1, 1982, in line with the views of the Senators who are most closely acquainted with the factual situation. We feel we must honor this knowledge and concern for their States.

I would like to point out that the Department of Agriculture is going to be looking over the shoulder of the plants involved to determine whether or not they should be licensed in 1982. This will encourage them to be more responsive.

The desire of the House to move more quickly to extend PACA to potato processors is understandable. In this case, I believe it would complicate matters for the growers, who are the very people we are trying to protect.

Our other change is a technical change to the corn detasseling provision in the Senate bill to cover the associated operation of rogueing. This is part and parcel of the same field process.

Mr. President, I urge the Senate to return S. 976 to the House with the Senate amendment to the House amendments.

I ask unanimous consent that there be printed at this point in the RECORD a summary of S. 976, with the Senate amendment to the House amendment.

There being no objection, the summary was ordered to be printed in the RECORD, as follows:

SUMMARY OF S. 976

S. 976, with the *Senate* amendment to the *House* amendments, would amend the Perishable Agricultural Commodities Act, 1930, (PACA), to—

(1) Increase from $100,000 to $200,000 the value of fresh and frozen fruits and vegetables that retailers may purchase, and the value of transactions frozen food brokers may negotiate, annually before they become subject to PACA license requirements, effective January 1, 1979 (sec. 1(a));

(2) Make intrastate potato processors subject to licensing under PACA as "dealers" (except that no person buying potatoes for processing solely within the State where grown would be deemed to be a dealer until January 1, 1982) (sec. 1(b));

(3) Authorize the Secretary of Agriculture to require applicants for licenses under PACA to furnish information in addition to that contained in their applications (sec. 2(1));

(4) Increase the maximum annual license fee from $100 to $150, plus $50 for each branch or additional business facility in excess of 9, up to a total of $1,000 (sec. 2(2));

(5) Limit the amount of money that could be accumulated and held in the special fund for the administration of PACA at the end of each fiscal year to not more than 25 percent of the projected PACA budget for the next fiscal year (sec. 2(3)); and

(6) Require the Secretary from time to time to inspect the records of any commission merchant, dealer, or broker determined in the formal disciplinary proceeding under section 6(b) of PACA to have violated the prompt payment provision of section 2(4) of PACA. The Secretary would be authorized to require these persons to furnish surety bonds. If the Secretary requires that a surety bond be furnished, the Secretary could not thereafter inspect the records of the person more than once a year. The Secretary would be authorized to enforce this provision by publishing the facts and circumstances and suspending the license of any commission merchant, dealer, or broker who falls or refuses to permit inspection of its records, or to furnish, maintain, or adjust the required bond. (Sec. 3.)

The bill, with the Senate amendment, would also amend the Farm Labor Contractor Registration Act of 1963 by amending the definition of "farm labor contractor" as that term is used in the 1963 Act. The bill would exclude from the definition persons who supply full-time students or other persons whose principal occupation is not farmwork to detassel and rogue hybrid seed corn or sorghum for seed and to engage in other incidental farmwork for less than 4 weeks per year. (Sec. 4.)

Mr. TALMADGE. Mr. President, I move adoption of the amendment.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment was agreed to.

Mr. TALMADGE. I move to reconsider the vote by which the motion was agreed to.

Mr. SCHWEIKER. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

FOREIGN ASSISTANCE APPROPRIATIONS, 1979—CONFERENCE REPORT

The Senate continued with consideration of the conference report.

Mr. INOUYE. Mr. President, I move that the conference report be agreed to.

Mr. MELCHER. No, Mr. President.

Mr. President, before we move on the motion of the Senator from Hawaii, I point out to the Senate that section 611 was included in H.R. 12931, the act making appropriations for foreign assistance and related programs for fiscal year ending September 30, 1979, and for other purposes, as passed by the Senate. Section 611 was a limitation on the funds appropriated for Zambia under the economic support fund to purchases of materials and equipment for food production and shall not be made available until the State Department provides assurances to Congress that Zambia is meeting the conditions of the International Monetary Fund concerning Zambia's payments deficit, which is a condition of the International Monetary Fund loan of $322,600,000 to Zambia in March of 1979.

Mr. President, the language in section 611 was self-explanatory and went to the very heart of making certain that the loan of about one-third of a billion dollars from the International Monetary Fund would be treated in a businesslike way. And the reason for that, Mr. President, was that Zambia, with its Government-owned copper mines, continues to produce copper and sell it at less than the cost of production. Selling their copper on the world market, further depressed the copper prices for everyone, while, at the same time, digging themselves a deeper pit for their own national economy, and becoming more deficient in funds not only to operate their copper mines, but to operate the country. The very purpose of the loan from the International Monetary Fund was to correct the very tragic condition of this country which, without the loan of one-third of a billion dollars last March, would be bankrupt—absolutely bankrupt.

It is time that Government-owned copper mines in Zambia react to the real world price condition on copper. Some restraint has to be placed on the continuing flood of copper on the world market, further depressing or, at least, holding down a gradual return to a price for copper throughout the world that will permit mining ventures in various countries to be successful economically. Our country is involved, since we are heavy importers of Zambian copper, and because of that and other copper imports, our country's privately owned copper companies have had to cut back drastically on their own production, therefore requiring that American workers be laid off their jobs.

Section 611, in H.R. 12931, when it passed the Senate, was an effort on the part of the United States to take a position that before funds were made available for Zambia out of the economic support funds in the bill, certain conditions would have to be met by Zambia. However, that section was stricken from the bill. In lieu of that, the conferees agreed in the report accompanying this conference report that the conferees are of the opinion that the funds appropriated for Zambia under the economic support funds should be limited in use to the purchase of materials and equipment for food production.

Furthermore, the conferees believe that such funds should be made available to Zambia after the State Department is assured that Zambia is meeting the conditions of the standby agreement with the International Monetary Fund.

I ask the distinguished Senator from Hawaii just what influence or, to use the vernacular, what clout that language in the conference report has with Zambia, the State Department, or the International Monetary Fund.

Mr. INOUYE. The clout, as far as the nation of Zambia is concerned, may be limited.

The clout relating to the State Department will be an effective one, if I may assure my good friend.

I can assure the Senator, as chairman of the subcommittee, that I will insist that the statement set forth in the conference report be adhered to and followed by the State Department.

Mr. MELCHER. I thank the Senator for his response because, having become aware of the strength of the Senator from Hawaii, I believe he will have quite a bit of clout with the State Department, and I appreciate that very much.

Now, Mr. President, when we passed H.R. 12931 in the Senate, the Senate adopted some restrictive language on funds that would be available for Nicaragua for economic assistance.

I would like to inquire of the distinguished Senator from Hawaii, what is the outcome of that in the conference report we have before us, because the restrictive language we imposed on economic aid for Nicaragua was not contained in the bill as it passed the House.

Mr. INOUYE. Mr. President, I shall be pleased to respond.

First, as far as the military assistance is concerned, this was completely wiped out.

On economic assistance, there were two major items. One, the Peace Corps, approximately $1.1 million set aside for that.

The other was an item of some $4 million representing small loans to small farmers. This program is administered directly by AID officials.

At the time this bill originally came to the Senate floor, the people of Nicaragua were in open revolt. Nonetheless, the State Department strongly requested that these items not be deleted, in the hope that they could, in calmer times, be used to help the poor. At that time we were told that these programs would be

set aside temporarily and not be activated until the situation in Nicaragua would permit their use in assisting the poor directly.

Mr. MELCHER. May I further inquire of the distinguished Senator if it is his impression that none of the $4 million in loans to small farmers in Nicaragua, which would be handled under AID, will be used as long as Somoza is the ruler in Nicaragua?

Mr. INOUYE. There are continuing programs which are financed with prior year funds. They will wind down. I will, however, seek assurances from the appropriate officials in our Government that the intent of the Senate, as it was expressed in section 611 as it passed the Senate, will be carried out.

Mr. MELCHER. I thank the distinguished Senator.

Mr. President, I want to briefly state that I think it is extremely important that the programs of this nature for Nicaragua, the so-called assistance to small farmers, not be implemented during the time that Somoza remains as dictator of Nicaragua.

I believe, Mr. President, that we have arrived at a time in our lives in this Western Hemisphere when the United States must firmly establish for all of the people of Central America and South America a position of not collaborating with dictators which have taken unto themselves the ruling of a country, as Somoza has with Nicaragua, to the detriment of the people of that country.

It has become increasingly clear, at least to me, and I would hope to many others in this country, that the resistance to Somoza in Nicaragua by a broad cross section of the people in various walks of life, whether they are the poor farmers or the better class of farmers, or the middle-class merchant, the business people of Nicaragua, that Somoza has been propped up mainly by the United States.

His complete control of the National Guard in Nicaragua, which has been equipped with American military equipment, and whose officers, for the large part, have been indoctrinated through training here in the United States by American armed forces, has become the very image of the United States in that country. That is an image of bank-rolling and backing of the Somoza oppressive government, a government first and last for Somoza and his cronies at the expense of the freedom and rights of the people of Nicaragua. They know without us Somoza has no guns to kill them, no economic power or resource to crush their ambitions for a free and just government of their choosing in their own government.

By propping up Somoza, by providing military equipment for the national guard of Nicaragua, which is controlled by Somoza, by training substantial numbers of officers in the Nicaraguan national guard here in the United States, we have become, unfortunately, identified as one and the same with Somoza, as far as the great majority of the people of Nicaragua are concerned.

I find it a foolish, self-defeating, tragic policy when the United States has become embroiled within a country, not in a democratic fashion, working for the good of the people of that country, but actually aiding and abetting Somoza and his national guard, and the Government completely controlled by him in Nicaragua.

To the extent that Congress can enunciate a policy shift through this foreign aid appropriation bill by withholding the $4 million in economic funds until the time has come when Somoza steps aside or is voted out of office in a free election in Nicaragua, we will be starting back along the path that I believe we have to tread to create the image in Central America of our being a Government and a people that is for the ordinary people of Nicaragua and other countries who desire freedom and the opportunity to express themselves in their own country as to the manner in which they are to be governed.

It is a mockery of all we hold dear in our country, in our democratic form of Government, when we assist a small Central American neighbor by upholding and perpetuating the outrageous form of government that Somoza has forced upon the people of Nicaragua. What we have done in supporting Somoza's misrule is to use our strength for oppression in Nicaragua. We must change now to support not Somoza but support the people of Nicaragua.

I thank the distinguished Senator from Hawaii for his response. I am sure he will do all he can to make sure that the State Department adheres to the admonitions that have been cited in this conference report regarding this $4 million of economic assistance for small farmers in Nicaragua. Unless it is carried out diligently and with great care, the money will flow from the U.S. Treasury only to aid those farmers who are sympathetic to and in support of Somoza. I am sure that the handling of those funds, to whatever extent Somoza could control them, would be only for his friends. On that basis, it would be a tragedy with respect to accomplishing freedom for the Nicaraguan people under Somoza.

Mr. INOUYE. Mr. President, I most respectfully assure my colleague that I personally will monitor this program, to make certain that the intent of the Senate is fully carried out.

Mr. MELCHER. I thank the distinguished Senator.

When a sufficient number of Senators are in the Chamber, I will ask for the yeas and nays on this conference report.

Mr. INOUYE. Mr. President, I believe the Senator from North Dakota wishes to be recognized.

The PRESIDING OFFICER. The Senator from North Dakota.

Mr. YOUNG. Mr. President, I commend the distinguished Senator from Hawaii (Mr. INOUYE), the chairman of this subcommittee, and the ranking minority member, the distinguished Senator from Pennsylvania (Mr. SCHWEIKER) for the excellent job they have done in handling this job. They cut more than $1 billion from a $10 billion bill.

It is still the biggest pork barrel bill that Congress has ever passed. It is loaded with pork barrel projects.

While President Carter was proposing to eliminate many water projects which millions of Americans wanted, especially in the West, he was advocating that Congress appropriate huge sums of money for public works projects all over the world.

Congress cut the President's foreign aid appropriations budget request of more than $10 billion to $9.1 billion. Even this represents a 35-percent increase over last year's appropriation.

President Carter's original budget calls for an 11 percent decrease in public works projects in the United States, but at the same time urges a 54-percent increase for the International Development Association and a 70-percent increase for the Inter-American Development Bank. Both institutions fund substantial public works projects all over the world.

In most of these foreign projects in which other countries have participated, the United States still pays about 30 percent of their cost. Many of these foreign public works projects help needy people; many of them can be justified. I cannot help but feel, however, that our first obligation for public works projects of this kind must be to American citizens.

One of the huge foreign projects in which we are involved is the reclamation-type project in Pakistan, the total cost of which is $1.2 billion. There are many other huge projects all over the world in which we are paying either the total cost or at least a major portion of the cost.

Mr. President, I will have to vote against this huge pork-barrel program. It is one we cannot afford. If we have this kind of money to spend, we should help our own people first.

THE UNITED STATES AND INTERNATIONAL DEVELOPMENT: CHALLENGE AND OPPORTUNITY FOR THE 96TH CONGRESS

Mrs. HUMPHREY. Mr. President, I would like to take this opportunity to make a few observations about U.S. foreign aid and the role of the United States in the international development process in the years ahead. It is an area about which Hubert cared most deeply and about which I care deeply as well. I believe very strongly that a priority item on the agenda of the next Congress should be the U.S. foreign assistance program. As Hubert and many others recognized, the time has come for a careful and critical examination of all phases of our foreign aid program.

The United States now stands on the threshold of the most comprehensive reassessment and reorganization of its foreign aid program since 1961.

U.S. foreign assistance programs presently operate under the Foreign Assistance Act of 1961, which has been amended and modified on numerous occasions since that time in an effort to reflect changing world conditions and a wide variety of congressional concerns. This legislation no longer contains the clear policy direction and the proper organizational structure to deal effectively with the complexity of our relations with the developing countries. Too often, the whole topic of foreign aid has been approached in a policy vacuum, involving theoretical discussions of purported resource needs of developing countries

and possible aid levels, without regard to American political realities and without regard to the question of why we should have a foreign aid program in the first place.

Legislation recently sent to the President, the International Development and Food Assistance Act of 1978, directs him to institute a strengthened and improved system of coordination of U.S. economic policies toward developing nations. The legislation also urges that the President consider a proposal Hubert Humphrey put forth late last year: The establishment of a new agency, the International Development Cooperation Administration, with considerably broader scope and responsibilities than the current Agency for International Development. This new agency would serve as the primary organization within the U.S. Government with responsibility for coordination of international development-related activities and, I hope, for careful consideration of international development as an integral part of U.S. foreign policy. This expanded and more powerful agency is to contain within its organizational framework the maximum possible range of U.S. Government offices and programs related to international development.

A report to the Congress on the implementation of these provisions is required to be submitted by the executive branch by February 1, 1979. Thus, in approximately 3 months' time, the Congress will review the President's proposals to reorganize and restructure our foreign assistance programs.

The fundamental premise underlying this proposal is that the complex process of international development—a process involving United States and Third World interests alike—should be addressed in a coordinated and consistent fashion by an agency authorized to deal with the entire range of economic questions involving our relations with the developing nations. The vast array of global economic questions that are bound to arise in the 1980's and beyond cannot be effectively addressed by an agency principally authorized to allocate foreign aid—a mere fraction of the total resource flow between developed and developing countries. International development can best be promoted not by foreign aid per se—important as this element is—but by coordinated and well-conceived international economic policy.

Under these circumstances, therefore, it might be useful to examine the elements of a successful international development program in the context of current U.S. relations with the Third World and past development experience. It seems abundantly clear that socioeconomic and political forces governing our relations with the Third World have changed dramatically since 1961. An efficient and effective development program must be adapted to the changing times as well.

CURRENT U.S. RELATIONS WITH THE THIRD WORLD

Here in the United States, we probably have the best appreciation of the humanitarian purpose of foreign aid: to provide help for natural disasters, famines, victims of wars, and to help fight the ravages of disease and malnutrition. In addition, we can readily appreciate the humanitarian interest in more developmental aspects of foreign aid to help the great majority of poor people in the Third World attain, through their own efforts, improved incomes and educational opportunities, healthier families, and the ability to contribute to the prosperity and development of their own countries. The instinctive sympathy of the American people for the less fortunate and our traditional sense of fair play was reflected in 1973 in the "New Directions" reforms of our foreign assistance legislation.

However, I believe it is of crucial importance to stress that humanitarian considerations are not the only reason why the United States should provide aid to developing nations. There are two significant reasons for increased and continuing U.S. involvement in the international development effort, not as widely or as well understood as they might be, which, it seems to me, complement the humanitarian purposes of our aid program: First, we live in an increasingly interdependent world; and second, the countries of the Third World are organizing to meet their many economic needs and they are insisting on an increased voice in their own economic destiny.

First. As the events of the past decade or two, but in particular the oil crisis, have brought home to us in the most unmistakable way, we live in an interdependent world. The size and complexity of the U.S. economy, and of the world, make it impossible for any country, even the United States, to go it alone. I think we all realize that our prosperity, indeed, the basic needs and comforts of our daily lives, are heavily dependent on the outside world. I wonder if we all realize the extent to which we are dependent on the developing countries as important markets for our goods and services, as the sources for much needed imports, and as places of mutually advantageous private investment.

In 1977, developing countries bought $42 billion (35 percent) of total U.S. exports. Forty percent of all U.S. exports of manufactured goods were bought by developing countries. We sell more manufactured goods to the developing countries than to Western Europe, Japan, and the Communist countries combined. The developing countries bought half or more of U.S. exports of industrial machinery, aircraft and motor vehicles, as well as 50 percent of our wheat exports, 60 percent of our cotton exports, and 70 percent of our rice exports.

Also in 1977, $34 billion or 22½ percent of total U.S. imports came from developing countries, in addition to $31 billion of oil imports from OPEC countries. We depend on these countries for all of our coffee, cocoa, and other tropical products, for over 50 percent of our own food imports, and over 25 percent of our raw materials, including the large bulk of our needs for bauxite, tin, and natural rubber.

Twenty percent of U.S. private direct investment overseas, or some $29 billion, was located in developing countries at the end of 1976, representing 47 percent of U.S. earnings from private foreign direct investment. The developing countries also account for substantial earnings from other forms of U.S. investment abroad and from the provision of services, such as construction and engineering, shipping, insurance and others.

Increasing development and prosperity in developing countries will inevitabliy mean greater production, jobs and incomes in developing countries, resulting in increased availability of goods and lower inflationary pressures. For example, during the 1975–76 recession, the willingness of the developing countries to maintain high import levels of goods and services from developed countries by drawing down foreign exchange reserves and increased borrowing had a perceptible impact on business trends in the advanced countries, as if increased demand had been stimulated within those countries themselves. The increased availability of goods, the sharp increases in demand for goods and services from America and the rest of the developed world, and the increased trade and prosperity arising from such greater demand can only result in benefits to all the countries in the world, advanced and developing alike, including the United States.

Second. Related to the question of global interdependence is the second key reason as to why the United States should provide aid to developing countries. As the majority of developing countries approach their third decade of political independence they are determined to increase their independence in the economic realm as well. The governments of these countries are becoming more aware of their problems, their strengths and their weaknesses, and they are becoming increasingly conscious of the need to develop their own resources on terms more favorable to them and their people and to obtain a fair price of those resources. They are also concerned about price inflation for the goods and services they obtain from advanced countries with which the prices they obtain for their own products have failed to keep pace. The oil crisis, and the sharp increases in the prices of fertilizer, food grains, coffee, gold, and other key commodities have made the entire world much more aware of the need for revamping the world's economic system so that all countries—the developed and the developing—can have an equitable share in that system, can feel that they have a stake in it, and will work towards strengthening and preserving it.

As we have come to learn in the recent past, a natural calamity can destroy a coffee crop in Brazil and cause a foreign exchange crisis there while it also leads to a quadrupling of the price of our breakfast coffee. Yet the inconvenience to us may mean disaster in a country heavily dependent on one or two crops for its income. The whole meaning of the North-South dialog and the formulation of what is called the New International Economic Order, with its call for a stronger voice for the raw material producer nations of the Third World, is a manifestation of this new awareness and spirit. An equitable world economic

system must also provide for orderly and fair exploitation of the resource wealth of the oceans, the sea bed and of other areas that are the common heritage of all the inhabitants of the planet Earth.

Within this complex picture, what is the significant and possible role for foreign aid and an international development agency?

It must be recognized that foreign aid constitutes only a small fraction of the total resource flow from the advanced countries to the Third World. The oil crisis of 1973 provided an especially vivid illustration of the fact that private economic transactions; for example, trade, private investment, technology, transfers, credit facilities, and so forth, have a far greater impact on economic growth and development in the Third World than foreign aid. In 1975, for example, private U.S. economic transactions with developing countries amounted to approximately $11.6 billion compared to $4.9 billion in aid (which included almost $1 billion of supporting assistance to the Middle Eastern countries).

It is for this reason that Senator Hubert Humphrey proposed the creation of a new, more powerful agency to coordinate the full range of our economic policies toward developing countries and to insure that such policies, as well as the various mechanisms through which U.S. aid is channeled—the Agency for International Development, the Peace Corps, Public Law 480, the international financial institutions, and the United Nations and other international agencies—do not work at cross purposes. This new agency would serve to insure that international development concerns are given full and adequate consideration in U.S. foreign and domestic policymaking.

The establishment of such an agency would represent an effort to establish a more comprehensive development strategy that addresses the needs of both the low-income and middle-income developing countries, with tools and measures that are appropriate to each situation. For middle-income countries, where concessional aid terms may not be appropriate, a better system for providing them with the assistance they need—access to world capital markets, availability of new technology, the means to provide sufficient employment, and better incomes and needed services for their poor, more and more of whom have been seeking their livelihood elsewhere, in particular in the United States.

PAST AID EXPERIENCE

The proposal to establish a new international development agency springs from the recognition that foreign aid is but one of many tools available to promote international development. Nevertheless it is an important and valuable element of any international development effort.

How can we insure that the aid we do provide is used most effectively and efficiently?

I will confine myself to a few general observations about our aid giving experience over the years. Elementary as they are, we have yet to identify ways to integrate the lessons of our past aid giving experience into current policy.

First. From the turmoil of the Vietnam experience and in other places in the world we have learned that an influx of U.S. resources, however well intentioned, cannot, by itself, promote progress and development in Third World countries in the absence of honest and enlightened leadership genuinely committed to such goals. The United States should stand ready to provide resources, guidance and, on occasion, leadership, where appropriate, but the mere provision of resources, even in increased amounts, cannot create for others a replica of the modern society we have attempted to create here at home. Only developing nations can do this for themselves. Ways should be sought out to promote self-reliance and self-help among indigenous peoples in all of our international development efforts.

Second. From our aid giving experience in the fifties and sixties we have learned that an exclusive focus on the use of our aid to accelerate economic growth rates failed to produce the significant impact on the lives of the great majority of the people that we had hoped for. The pursuit of rapid economic growth, as measured through favorable economic indicators, to the exclusion of other considerations, in most cases was producing development for the rich and continued deprivation for the poor.

We know now that development is not a mysterious process of providing resources and watching the economic indicators rise. Some of the biggest increases in GNP have occurred in oil rich states, which have not yet, however, been able to provide the benefit of the newly found riches to their people. In the case of countries that do not have billions of oil dollars or other sources of great riches, they must count on the resources they do have or can develop. For the most part, that means human skills, currently available or ones that can be developed right among their own people. Development cannot occur unless it involves widespread participation in the development process—the planning, as well as the programs and the benefits—by the people themselves. Development is not just a matter of resource transfers and economic indicators, but a question of improving people's lives over the short and long run.

Third. Time and time again as a result of sudden coups d'etat or threatened changes of government in countries that receive our aid, we have been confronted with an agonizing choice. Depending upon our perception of the new regime, shall we continue or discontinue aid—even if that aid has been recently programed to benefit the poor majority—because such assistance symbolizes U.S. support for the incumbent government?

Some mechanism should be established to distinguish between aid that is provided purely for political purposes and aid that is donated primarily for humanitarian reasons. Along these lines, consideration might be given to allocating a specific amount of aid through nongovernmental organizations, so as to avoid the question as to whether or not such assistance represents governmental support. The Inter-American Foundation has been providing assistance solely in this way since its establishment by Congress in 1969 and its success has been widely recognized in the development community.

Fourth. We have also learned much from the few development "success stories" scattered about the globe. These countries, while continuing to confront a wide array of economic and political difficulties, do nevertheless dramatically illustrate the importance of broad-based-participatory development strategies and offer convincing evidence that international development is not an impossible dream.

Taiwan is an example of one of the few developing countries that has made virtually unparalleled strides in agriculture. Over the past 30 years, Taiwan has had one of the highest increases in yields per acre in food grain production in the world, achieving almost total self-sufficiency in food (at present about 85 percent self-sufficient, aiming at 90 percent in 1981) despite the limited amount of arable land on the island (25 percent).

How was this achieved? In short, a land reform program initiated in the late forties provided a small plot to almost every family head on the island thereby creating an employed, small farmer class. Under the land reform program, a widespread pyramidal network of agricultural extension institutions increased the small farmer's participation in the agricultural development strategy. The results command attention. Taiwan is among the few developing countries in the world where the trend toward greater equalization of income is significant. According to World Bank data, in 1961, the poorest 20 percent of the population received 4.4 percent of the national income while the richest 20 percent received 51.8 percent. In 1972, by contrast, the poorest 20 percent of the population received 8.8 percent of the national income while the share of the richest 20 percent of the population had been reduced to 37.2 percent.

Like Taiwan, Egypt is another example of a developing country that has attempted to bring their small farmers into the modern economy. Egypt has broken up the large estates and, like Taiwan, has assisted small farmers in obtaining land and has organized agricultural extension programs, credit, marketing, and cooperative programs to which the small farmers have access. According to the United Nations Food and Agricultural Organization, per acre yield in Egypt of foodgrains is approximately 3,800 pounds, slightly higher than U.S. yields of 3,100 pounds per acre. Except for Taiwan, output of food grain per acre is the highest of any developing country. Even more importantly, the incomes of small farmers in Egypt have doubled in the last two decades.

In a similar vein, the country of Sri Lanka and the state of Kerala in India, while criticized for their inattention to the question of economic growth, have made great progress in meeting the needs of their people—in health, nutrition, and education. The poor in both Sri Lanka and Kerala are markedly better off than the poor in other developing countries.

All of these countries are not without their problems, but they are examples where significant progress has been made. Their strategies should be closely studied by developed and developing countries alike if we wish to achieve similar results elsewhere.

In recognition of many of the points raised above, Congress in 1973 undertook a serious effort to reform our bilateral aid program to promote development on the basis of growth with equity. Under this approach, aid was to be planned and administered in accordance with a strategy emphasizing four key concepts: Participation in self-help efforts, community and rural development, small scale production, and appropriate technology. Five years have elapsed since the initial 1973 redirection of foreign aid, yet far greater efforts are needed to create programs, mechanisms, and institutions to implement these concepts more effectively and comprehensively. This, I believe, should be a major task of any newly reorganized foreign assistance program.

In sum, we have before us a rare opportunity to reshape and redirect U.S. policy toward the developing world in a way that enhances the interests of the developed and the developing world alike. The economic realities that presently govern our relations with the Third World are vastly different and more complex than those of the early 1960's. We know now that the process of international development is no longer a priority concern solely of the underdeveloped countries of the globe. In an interdependent world, our jobs, our livelihood, our lifestyles—our very economic security—can all be affected by events thousands of miles away. For this reason, international development is—or should be—a concern of all citizens of the international community.

America is at its best when it brings together peoples and nations to solve the many global problems we face. We know that there are solutions to the most seemingly intractable problems of this planet—hunger, poverty, disease, and unemployment. The task before us now is to mobilize our best talent, our best skills, our best resources to solve these problems. I am confident that we can meet this challenge.

● Mr. HATCH. Mr. President, I am concerned about a particular item contained in the final version of H.R. 12931, the foreign aid assistance appropriation bill. At the time of the consideration of this bill I amended the bill to include funding for international relief organizations in Rhodesia. The amount that was appropriated for this relief was $5 million. I am concerned that the conference report will leave a loophole for those who oppose this relief, for what reason I cannot fathom for it is a humanitarian effort, and permit them to fund only a small portion of this amount. At the time of the amendment, the intention was clear that the full amount, $5 million, would be made available. To clear up this matter I would like to ask the floor manager of the bill a question.

Mr. President, with respect to amendment 32 in the bill, can the distinguished Chairman, Senator INOUYE, assure me that adding in the conference report "not more than" in front of the $5 million earmarked for refugee relief in Rhodesia accepted by the Senate September 22, 1978, represents only a procedural change and that it is the committee's intention that the full $5 million be available for the purpose.

Mr. INOUYE. Yes.●

Mr. HATCH. Mr. President, I would like to take a few moments to clear up a problem that may arise. During consideration of the foreign aid appropriation bill, H.R. 12931, I entered an amendment that would provide $5 million in refugee relief aid to be administered by international relief organizations. In the conference report three words were placed before the amount of money. These words, "not more than" are usually done as a matter of procedure. However, it has come to my attention that there may be an effort to use this language to prevent the full funding of the intention of the amendment. For this reason, I would like to pose a question to the manager of the bill.

Mr. President, with respect to amendment 32 in the bill, can the distinguished chairman, Senator INOUYE, assure us that adding in the conference report "not more than" in front of the $5 million earmarked for refugee relief in Rhodesia accepted by the Senate September 22, 1978 (CONGRESSIONAL RECORD, September 22, 1978, page S15813), represents only a procedural change (to avoid a possible point of order) and that it is the committee's intention that the full $5 million be available for the purpose?

Mr. INOUYE. Yes.

Mr. President, I move that the conference report be agreed to.

Mr. MELCHER. Mr. President, I ask for the yeas and nays on the conference report.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. The question is on agreeing to the conference report. On this question the yeas and nays have been ordered, and the clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. ABOUREZK. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. INOUYE. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

The question is on agreeing to the conference report. On this question the yeas and nays have been ordered, and the clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. CRANSTON. I announce that the Senator from Alabama (Mrs. ALLEN), the Senator from Colorado (Mr. HASKELL), the Senator from Louisiana (Mr. LONG) and the Senator from North Carolina (Mr. MORGAN), are necessarily absent.

Mr. STEVENS. I announce that the Senator from New Mexico (Mr. DOMENICI), the Senator from Pennsylvania (Mr. HEINZ), the Senator from Idaho (Mr. MCCLURE), the Senator from Virginia (Mr. SCOTT), and the Senator from Texas (Mr. TOWER) are necessarily absent.

The VICE PRESIDENT. Have all Senators voted?

The result was announced—yeas 60, nays 31, as follows:

[Rollcall Vote No. 490 Leg.]

YEAS—60

Anderson	Griffin	Metzenbaum
Baker	Hart	Moynihan
Bayh	Hatfield, Paul G.	Muskie
Bellmon	Hathaway	Packwood
Bentsen	Hayakawa	Pearson
Biden	Hodges	Pell
Brooke	Huddleston	Percy
Bumpers	Humphrey	Ribicoff
Case	Inouye	Riegle
Chafee	Jackson	Sarbanes
Chiles	Javits	Sasser
Church	Johnston	Schweiker
Clark	Kennedy	Sparkman
Cranston	Leahy	Stafford
Culver	Lugar	Stevens
Danforth	Magnuson	Stevenson

Ford	McGovern	Williams
Glenn	McIntyre	
Gravel		

NAYS—31

Abourezk	Goldwater	Randolph
Bartlett	Hansen	Roth
Burdick	Hatch	Schmitt
Byrd, Harry F., Jr.	Hatfield, Mark O.	Stennis
Byrd, Robert C.	Helms	Talmadge
Cannon	Hollings	Thurmond
Curtis	Laxalt	Wallop
DeConcini	Melcher	Young
Dole	Nelson	Zorinsky
Eastland	Nunn	
Garn	Proxmire	

NOT VOTING—9

Allen	Heinz	Morgan
Domenici	Long	Scott
Haskell	McClure	Tower

So the conference report was agreed to.

Mr. INOUYE. Mr. President, I move to reconsider the vote by which the conference report was agreed to.

Mr. ROBERT C. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

The VICE PRESIDENT. The clerk will report the amendments in disagreement.

The legislative clerk read as follows:

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 16 to the aforesaid bill, and concur therein with an amendment as follows:

In lieu of the sum named in said amendment, insert: $1,000,000

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 40 to the aforesaid bill, and concur therein with an amendment as follows:

In lieu of the sum named in said amendment, insert: $210,375,000

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 45 to the aforesaid bill, and concur therein with an amendment as follows:

In lieu of the sum named in said amendment, insert: $28,755,000.

Resolved, That the House recede from its

disagreement to the amendment of the Senate numbered 94 to the aforesaid bill, and concur therein with an amendment as follows:

Restore the matter stricken by said amendment, amended to read as follows:

SEC. 608. None of the funds appropriated or made available pursuant to this Act for direct foreign assistance and none of the funds otherwise made available pursuant to this Act to the Export-Import Bank and the Overseas Private Investment Corporation shall be obligated or expended to finance any loan, any assistance or any other financial commitments for establishing or expanding production of any commodity for export by any country other than the United States, if the commodity is likely to be in surplus on world markets at the time the resulting productive capacity is expected to become operative and if the assistance will cause substantial injury to United States producers of the same, similar or competing commodity: *Provided*, That such prohibition shall not apply to the Export-Import Bank if in the judgment of its Board of Directors the benefits to industry and employment in the United States are likely to outweigh the injury to United States producers of the same, similar or competing commodity.

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 96 to the aforesaid bill, and concur therein with an amendment as follows:

In lieu of the section number named in said amendment, insert: 610

Resolved, That the House insist on its disagreement to the amendment of the Senate numbered 63 to the aforesaid bill.

Mr. INOUYE. Mr. President, I move that the Senate concur in the amendments of the House to the amendments of the Senate numbered 16, 40, 45, 94, and 96.

The VICE PRESIDENT. The question is on agreeing to the motion of the Senator from Hawaii.

The motion was agreed to.

Mr. INOUYE. Mr. President, I move that the Senate recede from its amendment numbered 63.

The VICE PRESIDENT. The question is on agreeing to the motion of the Senator from Hawaii.

The motion was agreed to.

FULL EMPLOYMENT AND BALANCED GROWTH ACT OF 1978

The Senate continued with the consideration of the bill (H.R. 50).

Mr. ROBERT C. BYRD. Mr. President, may I have the attention of all Senators.

The distinguished Senators who have served on the ad hoc committee appointed by the distinguished minority leader and myself have met often, have met long, and have done their job well.

They have presented to me a unanimous-consent agreement which I shall propound, it representing a consensus among those ad hoc committee members as to what they feel would be a workable, reasonable time agreement on the Humphrey-Hawkins bill.

If the agreement is entered into, I would then ask unanimous consent that the cloture motion be vitiated, that the vote on the cloture motion be vitiated, and that the Senate proceed immediately to the consideration of the Humphrey-Hawkins bill.

The proposed agreement is as follows:

Mr. President, I ask unanimous consent that there be 4 hours on the bill, calendar order No. 1169, H.R. 50, to be equally divided between and controlled by Mr. NELSON and Mr. JAVITS;

Provided further, that there be 2 hours on the inflation goal amendment, the time to be equally divided in accordance with the usual form; 2 hours on the GNP share amendment, the time to be equally divided in accordance with the usual form; and 1 hour on the "may-shall" amendment (whether Congress shall or whether Congress may take a position on the goals proposed by the President);

Provided, that these three amendments be the first amendments in order, but not necessarily in the order that I have enumerated them;

Ordered further, that there be half hour on any amendment to any of those three amendments, and on any other amendment;

Provided further, that there be 15 minutes on any debatable motion, appeal, or point of order, if such is submitted to the Senate;

Provided further, that no tabling motion would be in order on any of the three main amendments that I have specified, or on any amendment to any of the three main amendments;

Provided further, that the agreement be in the usual form, to preclude nongermane amendments and also as to the division and control of time.

Provided further, that if the agreement is entered into, the vote on the cloture motion will be vitiated and the Senate will immediately proceed to the consideration of calendar order No. 1169, H.R. 50.

Mr. BAKER. Mr. President, reserving the right to object, and I will not object, the majority leader correctly states that for the last 3 days Senators on both sides of the aisle constituting an ad hoc committee appointed by him and by me have been trying to work out the details of such a proposed agreement as presented by the majority leader.

Before withdrawing my reservation, I might point out two or three relevant factors.

The first is that I believe there is general agreement that this is the best way to proceed. There is not, nor has there ever been as far as I am concerned, any effort to prevent the Senate from considering this measure. On the other hand, there are deep feelings and strong emotions that surround this issue, particularly in the form submitted to us by the House of Representatives.

What has been presented by the majority leader, I believe, is a careful design for the Senate's determination of the issues remaining in controversy, and a method by which the Senate can work its will in an orderly way I believe that this arrangement brings us to the place where we are likely to produce legislation this is generally acceptable to Members on both sides of the aisle.

I would hasten to add, however, that nothing in this agreement suggests that there is any obligation on the part of any Senator to support this measure after these issues are finally determined by the Senate.

I very much hope that this unanimous-consent request which is suggested by the majority leader—and I join him in making the request—will be agreed to. I very much hope that the substitute which is being submitted now in lieu of H.R. 50 will be favorably considered. I personally feel that I can support that substitute, assuming that the remaining issues are resolved satisfactorily.

I hope whatever we do, we will do by a substantial majority, so that there will be a firm consensus on the Senate's position on these issues.

Mr. BROOKE. Mr. President, will the Senator yield?

Mr. BAKER. I will in a moment.

Mr. President, this is a good request. I would like now, if I may, to yield to the Senator from Massachusetts for his question.

Mr. BROOKE. Just a brief question, and I thank the distinguished minority leader for yielding.

I do not believe the minority leader was on the floor at the time, and many Senators were not on the floor as well, but the amendment that I had put on the Humphrey-Hawkins bill I withdrew earlier this morning.

I think the Senate ought to be well aware and the majority and minority leaders should be well aware that I asked unanimous consent that the amendment pertaining to nondiscrimination against employees in the U.S. Senate be withdrawn, and it was withdrawn by unanimous consent.

Mr. BAKER. Mr. President, I thank the Senator from Massachusetts. I know how keenly he feels about that issue, and I know what a sacrifice it was for him to relinquish the procedural position on the matter. But I express to him my personal appreciation for doing it, because otherwise we could not have reached this point, and it would not have been possible to present a substitute leadership proposal.

Mr. BROOKE. I thank the minority leader. It was a very difficult decision for me to make, but I think Humphrey-Hawkins is such an important piece of legislation that I had to make that choice, and it was my choice to withraw that amendment so it would in no way impede Humphrey-Hawkins, and give every Senator an opportunity to vote for cloture, and hopefully to accept the compromise that the ad hoc committee has been working on for such a long period of time.

Mr. JAVITS. and Mr. YOUNG addressed the Chair.

Mr. BAKER. I yield to the ranking minority member of the committee.

Mr. JAVITS. Mr. President, I am pleased to yield to the Senator from North Dakota.

Mr. BAKER. I yield to the distinguished Senator from North Dakota.

Mr. YOUNG. Mr. President, I wonder if the leaders would agree to interrupt——

Mr ROBERT C. BYRD. Mr. President, could we have order?

The VICE PRESIDENT. The Senate will be in order.

Mr. YOUNG. I wonder if the leadership would interrupt the consideration of the Humphrey-Hawkins bill to take up appropriation bills and matters such as that. We have been going 12 to 16 hours a day. We had to pass our farm bill at 12 o'clock last night. I would rather wait until later in the evening to take up this, when I could go home. If we take it up now, I would hope we could interrupt it to get rid of our appropriations.

Mr. ROBERT C. BYRD. Mr. President, in answer to the Senator from North Dakota, the ranking Republican member on the Appropriations Committee, that has been our practice in the past. If appropriations bills are urgent, we try to clear with the managers of the bill and proceed with the appropriations bills, and we would like to do that in this instance.

Mr. YOUNG. If that means I would have to stay around until 12 or 1 o'clock at night to take up conference reports on appropriations bills, I would have to object.

Mr. ROBERT C. BYRD. The Senator has my assurance that that will be done.

Mr. BAKER. I yield to the Senator from New York.

Mr. JAVITS. Mr. President, I hope very much the Senate will agree to this. I would like to pay my tribute to the Members on the Republican side, who thoroughly disagree with Humphrey-Hawkins, and who yet have made this whole arrangement possible. There has been an extraordinary degree to statesmanship, and also an extraordinary demonstration of fidelity to the mission of the Senate. I know those Senators will feel free to vote against anything they please with respect to what we are doing, and they should; but the mere fact that we can be where we are is attributable heavily to them, and I think they are entitled to a major part of the credit for enabling this matter to be acted on.

Mr. President, in connection with the unanimous consent request, this bill is a joint product of the Human Resources Committee, of which I am the ranking member, and of the Banking Committee, where Senator BROOKE is the ranking member. So I think it should be understood that half my time will be available to him.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent, until this request is agreed to, that the vote on the cloture motion be temporarily upheld. Otherwise, we will have to vote in 1 minute on cloture.

The PRESIDING OFFICER. Is there objection?

Mr. HARRY F. BYRD, JR. Mr. President, reserving the right to object on the original unanimous consent request, what is the time limitation on the bill itself?

Mr. ROBERT C. BYRD. Four hours.

Mr. HARRY F. BYRD, JR. And what is the time limit on each amendment?

Mr. ROBERT C. BYRD. Two hours on certain amendments.

Mr. HARRY F. BYRD, JR. Leaving out the three principal amendments, what is the time limitation on other amendments?

Mr. ROBERT C. BYRD. One-half hour.

Mr. BAKER. Mr. President, reserving the right to object, I believe the Senator from North Dakota still has a reservation.

Mr. YOUNG. I have entered an objection.

Mr. ROBERT C. BYRD. Mr. President, I hope the Senator will not object. I know his concern, and I ask that he let me rephrase the agreement, and I will attempt to take care of his concern.

Mr. RANDOLPH. Mr. President, the Senate is not in order.

The VICE PRESIDENT. The Senate will be in order. The majority leader has the floor.

Mr. ROBERT C. BYRD. Mr. President, the Senate never is in order when we are trying to get a very difficult time agreement. It is most difficult to get these very controversial time agreements. I hope Senators will listen.

The VICE PRESIDENT. The Senator from West Virginia has the floor.

Mr. SCHMITT. Will the Senator yield?

Mr. ROBERT C. BYRD. May I modify the agreement and then Senators may reserve the right to object.

I modify the agreement in two ways. There is a substitute which may be offered by the distinguished Senator from Tennessee (Mr. BAKER) and myself, which will be called the leadership substitute. I will have to include in the request that that be the first amendment to be offered; that it be agreed to and considered as original text for the purpose of further amendments, and that no point of order be thereby waived.

May I say that the Humphrey-Hawkins bill can be set aside at any time for the consideration of an appropriations bill or appropriations conference report.

Mr. YOUNG. With that understanding, I withdraw my objection.

Mr. BAKER. Mr. President, reserving the right to object, I think it is important to make a couple of other points before we proceed to final consideration of the unanimous-consent request.

The first is, as I indicated at the beginning of my statement on a reservation, that this request represents the composite good faith effort of dedicated Senators on both sides of the aisle, and on both sides of the question. We have arrived at the so-called leadership substitute with great difficulty.

What we see here is a substitute that is vastly different from H.R. 50, and it is indeed different from S. 50. In my view, it is a significant improvement over those situations. I think most of the provisions opposed by Members in opposition to Humphrey-Hawkins have been eliminated or otherwise taken account of.

The three principal amendments identified by the majority leader are, in effect, a statement by the ad hoc committee on both sides that they were unable to resolve those issues among themselves, and those issues will be submitted to the Senate for its consideration. I think that is clear from the nature of the request, but I wanted to emphasize it for the purpose of clarity.

There is one other point, Mr. President, which should also be understood. I indicated earlier that by agreeing to this time limitation, no one is predetermining their vote on the bill as it may finally be enacted by the Senate. Each Senator is reserving the right to vote for or against it.

I very much hope that it is also understood, however, that if the leadership substitute is materially or significantly changed, it will greatly jeopardize the level of support it is likely to receive. As a matter of fact, I believe that if there are significant changes in the substitute, other than the determination of the issues spelled out in the unanimous-consent request, it is very unlikely that the bill will pass.

By the same token, Mr. President, I would also point out, as we all know, that this bill, presumably, will go to conference. If it goes to conference and returns with significant and material changes, I believe there is no likelihood that that conference report would be agreed to by the Senate at this time in the session.

This is not a threat; it is simply a statement of fact, Mr. President, that a great deal of effort, a huge amount of effort, has gone into trying to work out the difficulties in this bill to make it acceptable to the greatest number of people. I think we are at that point.

There is no absolute unanimity on the subject, and there remains opposition to the substitute. But I think we have reached the place where we can present this matter in an orderly way if we understand that any significant change in the substitute would destroy its chances for passage, in my judgment, and certainly would jeopardize the chances for the adoption of the conference report.

Mr. SCHMITT. Mr. President, reserving the right to object——

The VICE PRESIDENT. The Senator from New Mexico.

Mr. SCHMITT. Mr. President, I will reserve the right to object but will not object. I merely want to thank the ad hoc committee for their courtesy and diligence in considering several of the items of which I was one of the principal advocates along with my bipartisan colleagues on the Banking Committee which reported on S. 50. We felt very strongly about some of these provisions. We still feel strongly about them. I think the ad hoc committee has done an admirable job considering them and working out an agreeable arrangement by which we can deal with those particularly tough issues here on the floor in the Senate as Senators should. I again thank the Members for it, congratulate the leadership for instituting the ad hoc group, and seeing this matter now presented to the Senate.

The VICE PRESIDENT. The Senator from North Carolina.

Mr. HELMS. Reserving the right to object, and I do not intend to object, I think the unanimous-consent agreement is fine provided we can have an agreement that at the end of all of this scenario there will be no effort to substitute the House-passed bill. If we can write that into the unanimous-consent agreement, the Senator from North Carolina would have no objection. I do not want to spend 6 or 8 hours, I say to my friend from West Virginia, wrangling on this

floor only to be rolled in the last inning of the game.

Mr. ROBERT C. BYRD. Mr. President, nobody is going to be rolled in any inning of the game. There are no tricks in this bag. I do not think anybody intends to proceed in the manner which the Senator described.

Mr. HELMS. Will the Senator include that in the unanimous-consent agreement?

Mr. JAVITS. Will the Senator yield for a procedural point?

Mr. ROBERT C. BYRD. Yes.

Mr. JAVITS. I am sure Senator HELMS would not want to preclude the usual technique of substituting the Senate text for the House text so we can go to conference.

Mr. HELMS. No. The Senator knows what I am talking about.

If the leader will include that, there will be no objection from me.

Mr. ROBERT C. BYRD. I would oppose that if there is such an effort made.

Mr. BAKER. Do I understand that if there is an amendment offered which will substitute H.R. 50 after the Senate has proceeded with its consideration, that the Senator would oppose that?

Mr. ROBERT C. BYRD. Absolutely. There are Members of this side of the aisle who have worked hours and hours in trying to work out a substitute, with the minority leader joining me in the substitute. I am not going to go through all this scenario and then go against the consensus of the Senators who have spent hours on it. I have not spent hours on it but they have spent hours on it. I would oppose that. I do not think we need to include that in the agreement. I would oppose it and so would others. I assume Members who worked on the ad hoc committee would oppose that approach.

The VICE PRESIDENT. The Chair might observe that amending the substitute of the House text would entirely be out of order.

Mr. SARBANES. Will the Senator yield?

Mr. ROBERT C. BYRD. Yes.

Mr. SARBANES. I would assure the Senator from North Carolina that the matter he just raised comes as entirely new matter to me. There is no intention, there is no plan reserved for the last inning of the ball game, to act that way.

Mr. HELMS. If the Senator will yield, I have the assurance of my friends from West Virginia, Maryland, the State of New York, and the minority leader. With that assurance of how they feel about it, I will not object.

Mr. ROBERT C. BYRD. The Senator can be assured that a point of order would be made against such an amendment.

I have to include one other proviso, that being that the amendment by Mr. Brooke and the amendment by Mr. Nelson be withdrawn .

Mr. PROXMIRE. I have an amendment to the amendment by Mr. NELSON. I will withdraw that.

Mr. ROBERT C. BYRD. And the amendment by Mr. PROXMIRE be withdrawn.

The VICE PRESIDENT. Without objection, it is so ordered.

Mr. HARRY F. BYRD, JR. Reserving the right to object——

Mr. DOLE. Reserving the right to object——

The VICE PRESIDENT. The Senator from Virginia.

Mr. HARRY F. BYRD, JR. Reserving the right to object, may I ask the majority leader the time limitation on the bill and on amendments offered to the bill?

Mr. ROBERT C. BYRD. Yes. The time limitation on the bill would be 4 hours. The time limitation on certain specified amendments would be 2 hours on the inflation goal, 2 hours on the GNP share amendment, 1 hour on the "may-shall" amendment, and 30 minutes on any other amendment.

Mr. HARRY F. BYRD, JR. I have an amendment, Mr. President, which I believe will not take longer than 30 minutes. I would like to ask the Senator for 1 hour.

Mr. ROBERT C. BYRD. Will the Senator indicate what his amendment would do?

Mr. HARRY F. BYRD, JR. It has been printed. It would eliminate from the unemployment figures those who have been unemployed less than 5 weeks.

Mr. ROBERT C. BYRD. Is that amendment germane? I assume it would be.

Would the Senator want 1 hour equally divided?

Mr. HARRY F. BYRD, JR. One hour, equally divided.

Mr. ROBERT C. BYRD. I include that, Mr. President.

Mr. DOLE. Reserving the right to object, and I shall not object, I only said what the distinguished majority leader has said; it was a lot of work and I think it has all been a good-faith effort on the part of the Members of this body on both sides of the aisle. As I understand, the time would be equally divided and the time would be controlled by the distinguished Senator from Wisconsin and the distinguished Senator from New York. I am not suggesting that they both have the same view, but I guess that any of us who participated in the ad hoc committee, who may have a little different view from the Senator from New York and the Senator from Wisconsin, would have some share of that time.

Mr. JAVITS. Without any question, I shall be scrupulous about giving ourselves the least time.

Mr. BAKER. If the Senator will yield to me, I have been in this situation before and I know firsthand that the Senator from New York will be scrupulous in his fairness.

The Senator from Kansas is completely right, however. It is important, and I am sure the Senator from New York understands that and will appreciate that, that he in particular, and others who participated in the efforts of the ad hoc committee, have a first claim on the available time to speak on this matter.

Mr. JAVITS. Without any question.

The VICE PRESIDENT. Is there objection? The Chair hears none. It is so ordered.

Mr. ROBERT C. BYRD. Mr. President, will the Chair recognize me?

The VICE PRESIDENT. The cloture motion is vitiated.

The Senator from West Virginia is recognized.

Mr. ROBERT C. BYRD. If the Chair would have the clerk state the title, then I want to offer on behalf of Mr. BAKER and myself a substitute.

The VICE PRESIDENT. The bill will be stated by title.

The legislative clerk read as follows:

A bill (H.R. 50) to translate into practical reality the right of all Americans who are able, willing, and seeking to work to full opportunity for useful paid employment at fair rates of compensation; to assert the responsibility of the Federal Government to use all practicable programs and policies to promote full employment, production, and real income, balanced growth, adequate productivity growth, proper attention to national priorities, and reasonable price stability; to require the President each year to set forth explicit short-term and medium-term economic goals; to achieve a better integration of general and structural economic policies; and to improve the coordination of economic policymaking within the Federal Government.

Mr. ROBERT C. BYRD. Mr. President, I thank all Senators for their cooperation and patience in helping secure this amendment, at least for an agreement, particularly those on the ad hoc committee.

UP AMENDMENT NO. 2101

I send to the desk on behalf of Mr. BAKER and myself a substitute amendment. I ask that the title of it be stated by the clerk.

The VICE PRESIDENT. The clerk will state the amendment by title.

The legislative clerk read as follows:

The Senator from West Virginia (Mr. ROBERT C. BYRD) and the Senator from Tennessee (Mr. BAKER) propose an unprinted amendment numbered 2101.

Mr. ROBERT C. BYRD. I ask unanimous consent that further reading of the amendment be dispensed with.

The VICE PRESIDENT. Without objection, it is so ordered.

The amendment is as follows:

Strike out all after the enacting clause and insert in lieu thereof the following:

SECTION 1. This Act and the following table of contents may be cited as the "Full Employment and Balanced Growth Act of 1978".

TABLE OF CONTENTS

Sec. 1. Short title; table of contents.
Sec. 2. General findings.
Sec. 3. Report.
Sec. 4. National Employment Conference.
TITLE I—ESTABLISHMENT OF GOALS AND GENERAL ECONOMIC POLICIES
Sec. 101. Statement of purpose.
Sec. 102. Declaration of policy.
Sec. 103. Economic Report of the President and short-term economic goals and policies.
Sec. 104. Full employment and balanced growth; medium-term economic goals and policies.
Sec. 105. Provisions applicable to short-term and medium-term goals.
Sec. 106. National priority policies and programs required for full employment and balanced growth.
Sec. 107. The President's budget.
Sec. 108. Monetary policy.
Sec. 109. Overcoming inflation.

Sec. 110. Council of Economic Advisers.
Sec. 111. Advisory Board or Boards.

TITLE II—STRUCTURAL POLICIES AND PROGRAMS INCLUDING TREATMENT OF RESOURCE RESTRAINTS

Sec. 201. Statement of purpose.
Sec. 202. Countercyclical employment policies.
Sec. 203. Coordination with State and local government and private sector economic activity.
Sec. 204. Regional and structural employment policies.
Sec. 205. Youth employment policies.
Sec. 206. Job training, counseling, and reservoirs of employment projects.
Sec. 207. Capital formation—private and public.

TITLE III—POLICIES AND PROCEDURES FOR CONGRESSIONAL REVIEW

Sec. 301. Statement of purpose.
Sec. 302. Committee review.
Sec. 303. Review of Economic Report as part of the Budget process.
Sec. 304. Modification of goals; congressional review.
Sec. 305. Exercise of rulemaking powers.

TITLE IV—GENERAL PROVISIONS

Sec. 401. Nondiscrimination.
Sec. 402. Labor standards.
Sec. 403. Authorizations.

GENERAL FINDINGS

SEC. 2. (a) The Congress finds that the Nation has suffered substantial unemployment and underemployment, idleness of other productive resources, high rates of inflation, and inadequate productivity growth, over prolonged periods of time, imposing numerous economic and social costs on the Nation. Such costs include the following:

(1) The Nation is deprived of the full supply of goods and services, the full utilization of labor and capital resources, and the related increases in economic well-being that would occur under conditions of genuine full employment, production, and real income, balanced growth, a balanced Federal budget, and the effective control of inflation.

(2) The output of goods and services is insufficient to meet pressing national priorities.

(3) Workers are deprived of the job security, income, skill development, and productivity necessary to maintain and advance their standards of living.

(4) Business and industry are deprived of the production, sales, capital flow, and proproductivity necessary to maintain adequate profits, undertake new investment, create jobs, compete internationally, and contribute to meeting society's economic needs. These problems are especially acute for smaller businesses. Variations in the business cycle and low-level operations of the economy are far more damaging to smaller businesses than to larger business concerns because smaller businesses have fewer available resources, and less access to resources, to withstand nationwide economic adversity. A decline in small business enterprises contributes to unemployment by reducing employment opportunities and contributes to inflation by reducing competition.

(5) Unemployment exposes many families to social, psychological, and physiological costs, including disruption of family life, loss of individual dignity and self-respect, and the aggravation of physical and psychological illnesses, alcoholism and drug abuse, crime, and social conflicts.

(6) Federal, State, and local government budgets are undermined by deficits due to shortfalls in tax revenues and in increases in expenditures for unemployment compensation, public assistance, and other recession-related services in the areas of criminal justice, alcoholism and drug abuse, and physical and mental health.

(b) The Congress further finds that:

(1) High unemployment may contribute to inflation by diminishing labor training and skills, underutilizing capital resources, reducing the rate of productivity advance, increasing unit labor costs, and reducing the general supply of goods and services.

(2) Aggregate monetary and fiscal policies alone have been unable to achieve full employment and production, increased real income, balanced growth, a balanced Federal budget, adequate productivity growth, proper attention to national priorities, achievement of an improved trade balance, and reasonable price stability, and therefore must be supplimented by other measures designed to serve these ends.

(3) Attainment of these objectives should be facilitated by setting explicit short-term and medium-term economic goals, and by improved coordination among the President, the Congress, and the Board of Governors of of the Federal Reserve System.

(4) Increasing job opportunities and full employment would greatly contribute to the elimination of discrimination based upon sex. age, race, color, religion, national origin, handicap, or other improper factors.

(c) The Congress further finds that an effective policy to promote full employment and production, increased real income, balanced growth, a balanced Federal budget, adequate productivity growth, proper attention to national priorities, achievement of an improved trade balance, and reasonable price stability should (1) be based on the development of explicit economic goals and policies involving the President, the Congress, and the Board of Governors of the Federal Reserve System, with maximum reliance on the resources and ingenuity of the private sector of the economy, (2) include programs specifically designed to reduce high unemployment due to recessions, and to reduce structural unemployment within regional areas and among particular labor force groups, and (3) give proper attention to the role of increased exports and improvement in the international competitiveness of agriculture, business, and industry in providing productive employment opportunities and achieving an improved trade balance.

(d) The Congress further finds that full employment and production, increased real income, balanced growth, a balanced Federal budget, adequate productivity growth, proper attention to national priorities, achievement of an improved trade balance through increased exports and improvement in the international competitiveness of agriculture, business, and industry, and reasonable price stability are important national requirements and will promote the economic security and well-being of all citizens of the Nation.

(e) The Congress further finds that the United States is part of an interdependent world trading and monetary system and that attainment of the requirements specified in subsection (d) is dependent upon policies promoting a free and fair international trading system and a sound and stable international monetary system.

REPORT

SEC. 3. Not later than one year after the date of enactment of this Act, the Committee on Human Resources of the Senate and the Committee on Education and Labor of the House of Representatives each shall conduct a study and submit a report, including findings and recommendations, to the Committee on Rules and Administration of the Senate and the Committee on Rules of the House, respectively, on the subject of establishing a full employment goal in connection with the provisions of this Act.

NATIONAL EMPLOYMENT CONFERENCE

SEC. 4. (a) A national Employment Conference may be convened in the District of Columbia within a reasonable period of time after the date of enactment of the Full Employment and Balanced Growth Act of 1978. Responsibility for the organization and implementation of this conference shall rest with the President or the appropriate department or agency of the federal government, and the conference shall bring together leaders of small and larger business, labor, government, and all other interested parties.

(b) The subject of the conference shall be employment, with particular attention to structural unemployment and the plight of disadvantaged youth. The conference shall also focus on issues such as implementation of adequate and effective incentives for private sector employers to hire the hard-core unemployed. Special attention shall be given to the creation of jobs through the use of targeted employment tax credits, wage vouchers, and other incentives to private sector businesses.

TITLE I—ESTABLISHMENT OF GOALS AND GENERAL ECONOMIC POLICIES

STATEMENT OF PURPOSE

SEC. 101. It is the purpose of this title—

(1) to declare the general policies of this Act;

(2) to provide an open process under which economic goals and policies are proposed, reviewed, and established;

(3) to provide for yearly review of national economic policies to ensure their consistency with these goals to the maximum extent possible; and

(4) to strengthen and supplement the purposes and policies of the Employment Act of 1946.

DECLARATION OF POLICY

SEC. 102. Section 2 of the Employment Act of 1946 is amended to read as follows:

"SEC. 2. (a) The Congress hereby declares that it is the continuing policy and responsibility of the Federal Government to use all practicable means, consistent with its needs and obligations and other essential national policies, and wtih the assistance and cooperation of both small and larger businesses, agriculture, labor, and State and local governments, to coordinate and utilize all its plans, functions, and resources for the purpose of creating and maintaining, in a manner calculated to foster and promote free competitive enterprise and the general welfare, conditions which promote useful employment opportunities, including self-employment, for those able, willing, and seeking to work, and promote full employment and production, increased real income, balanced growth, a balanced Federal budget, adequate productivity growth, proper attention to national priorities, achievement of an improved trade balance through increased exports and improvement in the international competitiveness of agriculture, business, and industry, and reasonable price stability as provided in section 5(b) of this Act.

"(b) The Congress further declares and establishes as a national goal the fulfillment of the right to full opportunities for useful paid employment at fair rates of compensation of all individuals able, willing, and seeking to work.

"(c) The Congress further declares that inflation is a major national problem requiring improved government policies relating to food, energy, improved and coordinated fiscal and monetary management, the reform of outmoded rules and regulations of the Federal Government, the correction of structural defects in the economy that prevent or seriously impede competition in private markets, and other measures to reduce the rate of inflation.

"(d) The Congress further declares that it is the purpose of the Full Employment and Balanced Growth Act of 1978 to improve the coordination and integration of the policies and programs of the Federal Government toward achievement of the objectives of such Act through better management, increased

efficiency, and attention to long-range as well as short-range problems and to balancing the Federal budget.

"(e) The Congress further declares that, although it is the purpose under the Full Employment and Balanced Growth Act of 1978 to seek diligently and to encourage the voluntary cooperation of the private sector in helping to achieve the objectives of such Act, no provisions of such Act or this Act shall be used, with respect to any portion of the private sector of the economy, to provide for Federal Government control of production, employment, allocation of resources, or wages and prices, except to the extent authorized under other Federal laws.

"(f) The Congress further declares that it is the purpose of the Full Employment and Balanced Growth Act of 1978 to maximize and place primary emphasis upon the expansion of private employment, and all programs and policies under such Act shall be in accord with such purpose. Toward this end, the effort to expand jobs to the full employment level shall be in this order of priority to the extent consistent with balanced growth—

"(1) expansion of conventional private jobs through improved use of general economic and structural policies, including measures to encourage private sector investment and capital formation;

"(2) expansion of private employment through Federal assistance in connection with the priority programs in such Act;

"(3) expansion of public employment other than through the provisions of section 206 of such Act, and

"(4) when recommended by the President under section 206 of such Act and subject to the limitations in such section, the creation of employment through the methods set forth in such section.

"(g) The Congress further declares that trade deficits are a major national problem requiring a strong national export policy including improved Government policies relating to the promotion, facilitation, and financing of commercial and agricultural exports, Government policies designed to reduce foreign barriers to exports through international negotiation and agreement, Federal support for research, development, and diffusion of new technologies to promote innovation in agriculture, business, and industry, the elimination or modification of Government rules or regulations that burden or disadvantage exports and the national and international competitiveness of agriculture, business, and industry, the reexamination of antitrust laws and policies when necessary to enable agriculture, business, and industry to meet foreign competition in the United States and abroad, and the achievement of a free and fair international trading system and a sound and stable international monetary order.

"(h) The Congress further declares that it is the purpose of the Full Employment and Balanced Growth Act of 1978 to achieve a balanced Federal budget consistent with the achievement of the medium-term goals specified in section 4.

"(i) The Congress further declares that it is the continuing policy and responsibility of the Federal Government, in cooperation with State and local governments, to use all practical means consistent with other essential considerations of national policy to provide sufficient incentives to assure meeting the investment needs of private enterprise, including the needs of small and medium sized businesses, in order to increase the production of goods, the provision of services, employment, the opportunity for profit, the payment of taxes, and to reduce and control inflation. To the extent it is reasonably possible to do so, private enterprise investments in depressed urban and rural areas should be promoted to reduce the high levels of unemployment that exists there."

ECONOMIC REPORT OF THE PRESIDENT AND SHORT-TERM ECONOMIC GOALS AND POLICIES

SEC. 103. (a) The heading preceding section 3 and section 3(a) of the Employment Act of 1946 are amended to read as follows:

"ECONOMIC REPORT OF THE PRESIDENT AND SHORT-TERM ECONOMIC GOALS AND POLICIES

"SEC. 3. (a) The President shall transmit to the Congress during the first twenty days of each regular session, with copies transmitted to the Governor of each State and to other appropriate State and local officials, an economic report (hereinafter in this Act referred to as the 'Economic Report') together with the annual report of the Council of Economic Advisers submitted in accord with section 11(c) of this Act, setting forth—

"(1) the current and foreseeable trends in the levels of employment, unemployment, production, capital formation, real income, Federal budget outlays and receipts, productivity, international trade and payments, and prices, and a review and analysis of recent domestic and international developments affecting economic trends in the Nation;

"(2)(A) annual numerical goals for employment and unemployment, production, real income, productivity, and prices for the calendar year in which the Economic Report is transmitted and for the following calendar year, designated as short-term goals, which shall be consistent with achieving as rapidly as feasible the goals of full employment and production, increased real income, balanced growth, a balanced Federal budget, adequate productivity growth, price stability, achievement of an improved trade balance, and proper attention to national priorities; and

"(B) annual numerical goals as specified in subparagraph (A) for the three successive calendar years, designated as medium term goals;

"(3) employment objectives for certain significant subgroups of the labor force, including youth, women, minorities, handicapped persons, veterans, and middle-aged and older persons; and

"(4) a program for carrying out the policy declared in section 2, together with such recommendations for legislation as the President may deem necessary or desirable.".

(b) Section 3 of the Employment Act of 1946 is amended by adding the following:

"(d) For the purposes of the Full Employment and Balanced Growth Act of 1978, the percentage rate of unemployment as a percentage of the civilian labor force as set forth by the Bureau of Labor Statistics in the Department of Labor as computed under the procedures in effect as of the date of enactment of this Act.

"(e) For the purpose of the Full Employment and Balanced Growth Act of 1978, the terms 'inflation', 'prices', and 'reasonable price stability' refer to the rate of change or level of the consumer price index as set forth by the Bureau of Labor Statistics, United States Department of Labor.".

FULL EMPLOYMENT AND BALANCED GROWTH: MEDIUM-TERM ECONOMIC GOALS AND POLICIES

SEC. 104. The Employment Act of 1946 is amended by redesignating sections 4 and 5 as sections 10 and 11, respectively, and by inserting a new section 4 as follows:

"FULL EMPLOYMENT AND BALANCED GROWTH: MEDIUM-TERM ECONOMIC GOALS AND POLICIES

"Sec. 4. (a) In each Economic Report after enactment of the Full Employment and Balanced Growth Act of 1978, the President shall incorporate (as part of the five-year numerical goals in each Economic Report) medium-term annual numerical goals specified in section 3(a)(2)(B), and in each President's Budget submitted immediately prior thereto, the President shall incorporate the programs and policies the President deems necessary to achieve such medium-term goals and a balanced Federal budget and to achieve reasonable price stability as rapidly as feasible as provided for in section 5(b) of this Act.

"(b) The medium-term goals in the first three Economic Reports and, subject to the provisions of subsection (d), in each Economic Report thereafter shall include (as part of the five-year goals in each Economic Report) interim numerical goals for—

"(1) reducing the rate of unemployment, as set forth pursuant to section 3(d) of this Act, to not more than 3 per centum among individuals aged twenty and over and 4 per centum among individuals aged sixteen and over within a period not extending beyond the fifth calendar year after the first such Economic Report; and

"(2) reducing the rate of inflation, as set forth pursuant to section 3(e) of this Act, to not more than 3 per centum with a period not extending beyond the fifth calendar year after the first Economic Report: *Provided*, That policies and programs for reducing the rate of inflation shall be designed so as not to impede achievement of the goals and timetables specified in clause (1) of this subsection for the reduction of unemployment.

For purposes of this subsection, the first Economic Report shall be the Report issued in the first calendar year after enactment of the Full Employment and Balanced Growth Act of 1978.

"(c)(1) Upon achievement of the 3 and 4 per centum goals specified in subsection (b)(1), each succeeding Economic Report shall have the goal of achieving as soon as practicable and maintaining thereafter full employment and a balanced budget.

"(2) Upon achievement of the 3 per centum goal specified in subsection (b)(2), each succeeding Economic Report shall have the goal of achieving by 1988 a rate of inflation of zero per centum: *Provided*, That policies and programs for reducing the rate of inflation shall be designed so as not to impede achievement of the goals and timetables specified in clause (1) of this subsection for the reduction of unemployment.

"(d) In the second Economic Report after enactment of the Full Employment and Balanced Growth Act of 1978, the President shall review the numerical goals and timetables for the reduction of unemployment and inflation, and the goal of balancing the Federal budget; report to the Congress on the degree of progress being made, the programs and policies being used, and any obstacles to achieving such goals and timetables; and, if necessary, propose corrective economic measures toward achievement of such goals and timetables: *Provided*, That beginning with the second Report and in any subsequent Reports, if the President finds it necessary, the President may recommend modification of the timetable or timetables for the achievement of the goals provided for in subsection (b) and the annual numerical goals to make them consistent with the modified timetable or timetables, and the Congress may take such action as it deems appropriate consistent with title III of the Full Employment and Balanced Growth Act of 1978.

"(e) If, after achievement of the 3 and 4 per centum goals specified in subsection (b), the unemployment rate for a year as set forth pursuant to section 3(d) of this Act is more than 3 per centum among individuals aged twenty and over or more than 4 per centum among individuals aged sixteen and over, the next Economic Report after such rate is set forth and each succeeding Economic Report shall include (as part of the five-year goals in each Economic Report) the interim numerical goal of reducing unemployment to not more than the levels specified in subsection (b)(1) as soon as practicable but not later than the fifth calendar year after the first such Economic Report, counting, as the first calendar

year the year in which such Economic Report is issued: *Provided*, That, if the President finds it necessary, the President may, under the authority provided in subsection (d), recommend modification of the timetable provided for in this subsection for the reduction of unemployment, and for the purposes of section 304 of the Full Employment and Balanced Growth Act of 1978, such recommendation by the President shall be treated as a recommendation made under subsection (d) of this section.

"(f)(1) In taking action to reduce unemployment in accord with the numerical goals and timetable established under section (b), every effort shall be made to reduce those differences between the rate of unemployment among youth, women minorities, handicapped persons, veterans, middle-aged and older persons and other labor force groups and the overall rate of unemployment which are caused by any improper factors with the ultimate objective of removing such differentials to the extent possible.

"(2) Insofar as the differences specified in the preceding paragraph are due to lack of training and skills, occupational practices, and other relevant factors, the Secretary of Labor shall—

"(A) take such action as practicable to achieve the objectives of this subsection;

"(B) make studies, develop information, and make recommendations toward remedying these differences in rates of unemployment, and include these in the annual Employment and Training Report of the President required under section 705(a) of the Comprehensive Employment and Training Act of 1973 (hereinafter in this Act referred to as 'CETA'); and

"(C) make recommendations, as deemed necessary. to the Congress related to the objectives of this paragraph.

"(g)(1) The term 'middle-aged and older persons' as used in this section includes any individual forty-five years of age or older.

"(2) For purposes of this subsection, the term 'veteran' shall mean the same as defined in section 2011(1) or (2)(A) of title 38, United States Code.

PROVISIONS APPLICABLE TO SHORT-TERM AND MEDIUM-TERM GOALS

SEC. 105. The Employment Act of 1946 is amended by adding a new section 5 as follows:

"PROVISIONS APPLICABLE TO SHORT-TERM AND MEDIUM-TERM GOALS

"SEC. 5. (a) To aid in determining the short-term and medium-term goals for employment, production, real income, and prices, analysis shall be presented in the Economic Report with respect to major aspects of the appropriate composition or structure of each goal, and as to the appropriate apportionment of total national production among its major components (private investment, consumer expenditures, and public outlays) as affected by relative income flows and other factors, in order to promote balanced growth and a balanced Federal budget, reduce cyclical disturbances, and achieve the other purposes of this Act and the Full Employment and Balanced Growth Act of 1978."

"(b) In choosing means to achieve the goal for the reduction of unemployment and choosing means to achieve the goal of reasonable price stability, those means which are mutually reinforcing shall be used to the extent practicable.".

NATIONAL PRIORITY POLICIES AND PROGRAMS REQUIRED FOR FULL EMPLOYMENT AND BALANCED GROWTH

SEC. 106. The Employment Act of 1946 is amended by adding a new section 6 as follows:

"NATIONAL PRIORITY POLICIES AND PROGRAMS REQUIRED FOR FULL EMPLOYMENT AND BALANCED GROWTH

"SEC. 6 To contribute to the achievement of the goals under the Full Employment and Balanced Growth Act of 1978, the President's Budget for each fiscal year beginning after the date of enactment of the Full Employment and Balanced Growth Act of 1978 shall include priority policies and programs, which shall include, to the extent deemed appropriate by the President, consideration of the following—

"(A) development of energy sources and supplies, transportation, and environmental improvement;

"(B) proper atention to the problems and needs of smaller businesses including (i) the availability of investment capital, management and technical expertise, and technology and labor needs, (ii) analysis of economic and social trends which may affect smaller businesses, (iii) government policies and programs (including agency regulations and excessive paperwork requirements) that may create undue hardship for or reduce the competitiveness of smaller bssinesses, and (iv) other policies and programs to remove barriers to competition and to strengthen and promote the creation and growth of smaller businesses;

"(C) development of a comprehensive national agricultural policy that assures—

"(i) production levels adequate to meet the nutritional needs of all Americans and respond to rising food requirements throughout the world;

"(ii) farm and ranch income at full parity levels that will improve opportunities for farm families, encourage production, provide for essential capital investment in farming, and provide for farm prices at full parity in the market place;

"(iii) renewed commitment to the protection and conservation of rural land and water through support for improved conservation practices and research, and attention to agricultural land use in the formulation of plans for energy, water and mineral resources, transportation, and commercial, industrial, and residential development; and

"(iv) support for programs and public services designed to respond to the unique economic and social conditions of rural communities;

"(D) proper attention to the relationship between Federal programs and policies and the problems and needs of urban areas, including inner cities and the employment problems of their residents, especially youths;

"(E) proper attention to the quality and quantity of health care, education and training programs, child care and other human services, and housing, essential to a full employment economy and to moving toward their availability for all individuals at costs within their means;

"(F) policies concerning Federal aid to State and local governments, especially for public investment and unemployment related costs;

"(G) national defense and other needed international programs;

"(H) proper attention to the relationship between Federal grants, contracts, and procurement and the closure of military bases and other Federal facilities and the distribution of jobs and income among different regions of the Nation, and among urban, suburban, and rural areas;

"(I) Proper attention to balancing the Federal budget;

"(J) proper attention to the dislocation of jobs caused by Federal laws, regulations, and policies;

"(K) policies and programs designed to increase exports and improve the international competitive position of agriculture, business, and industry, including measures to promote a free and fair international trading system, a sound and stable international monetary system and innovation in agriculture, business, and industry; and

"(L) such other priority policies and programs as the President deems appropriate.".

THE PRESIDENT'S BUDGET

SEC. 107. The Employment Act of 1946 is amended by inserting a new section 7 as follows:

"THE PRESIDENT'S BUDGET

"SEC. 7. (a) The President's Budget shall recommend levels of outlays and receipts which shall be consistent with the short-term economic goals of section 3(a)(2)(A).

"(b) The President's Budget shall provide five-year projections of outlays and receipts consistent with the medium-term goals of section 4(b).

"(c) The principal elements in the President's Budget shall be set forth briefly in each Economic Report, toward the end of making clear the relationship between the President's Budget and the goals and policies set forth in such Economic Report. Both the expenditure and revenue elements of the President's Budget shall be developed to promote the purposes, policies, and goals of the Full Employment and Balanced Growth Act of 1978. The size of the President's expenditure and revenue proposals, and the relationships between such proposals, shall be determined in a manner which gives cosideration to the needs of the economy and the people in the priority areas set forth in section 6, and the relationship between the President's expenditure and revenue proposals shall be guided accordingly.".

MONETARY POLICY

SEC. 108. (a) Section 2A of the Federal Reserve Act is amended by striking out the second and third sentences and inserting in lieu thereof the following: "In furtherance of the purposes of the Full Employment and Balanced Growth Act of 1978, the Board of Governors of the Federal Reserve System shall transmit to the Congress, not later than February 20 and July 20 of each year, independent written reports setting forth (1) a review and analysis of recent developments affecting economic trends in the Nation; (2) the objectives and plans of the Board of Governors and the Federal Open Market Committee with respect to the ranges of growth or diminution of the monetary and credit aggregates for the calendar year during which the report is transmitted, taking account of past and prospective developments in employment, unemployment, production, investment, real income, productivity, international trade and payments, and prices; and (3) the relationship of the aforesaid objectives and plans to the short-term goals set forth in the most recent Economic Report of the President pursuant to section 3(a)(2)(A) of the Employment Act of 1946 and to any short-term goals approved by the Congress. In addition, as a part of its report on July 20 of each year, the Board of Governors shall include a statement of its objectives and plans with respect to the ranges of growth or diminution of the monetary and credit aggregates for the calendar year following the year in which the report is submitted. The reports required under the two preceding sentences shall be transmitted to the Congress and shall be referred in the Senate to the Committee on Banking, Housing, and Urban Affairs, and in the House of Representatives to the Committee on Banking, Finance and Urban Affairs. The Board shall consult with each such Committee on the reports and, thereafter, each such Committee on the reports and, thereafter, each such Committee shall submit to its respective body a report to the Federal Reserve's in-

tended policies. Nothing in this Act shall be interpreted to require that the objectives and plans with respect to the ranges of growth or diminution of the monetary and credit aggregates disclosed in the reports submitted under this section be achieved if the Board of Governors and the Federal Open Market Committee determine that they cannot or should not be achieved because of changing conditions: *Provided,* That in the subsequent consultations with, and reports to, the aforesaid Committees of the Congress pursuant to this section, the Board of Governors shall include an explanation of the reasons for any revisions to or deviations from such objectives and plans.".

(b) The amendment made by subsection (a) takes effective on January 1, 1979.

OVERCOMING INFLATION

SEC. 109. The Employment Act of 1946 is amended by inserting a new section 8 as follows:

"OVERCOMING INFLATION

"SEC. 9. (a) The Congress hereby determines that the objective of achieving reasonable price stability as soon as feasible, as set forth in section 3(a)(3) and section 4(a), shall be pursued by the methods and subject to the requirements of section 5(b).

"(b) The Congress finds that sole dependence upon fiscal or monetary policies or both to combat inflation can exacerbate both inflation and unemployment. The Congress finds that the coordinated use of fiscal and monetary policies in conjunction with specific targeted policies are necessary to combat inflation.

"(c) The President shall initiate specific policies to reduce the rate of inflation, including recommendations to the Congress where necessary, and include recommendations within the Economic Report and the President's budget to the extent practicable. Structural policies to reduce the rate of inflation may include—

"(1) an effective information system to monitor and analyze inflationary trends in individual economic sectors, so that the President and Congress can be alerted to developing inflation problems especially those caused by bottlenecks inhibiting the flow of goods and services;

"(2) programs and policies for alleviating shortages of goods, services, labor, and capital, with practicular emphasis on food, energy, and critical industrial materials to aid in stabilizing prices;

"(3) the establishment of stockpiles of agricultural commodities and other critical materials to help stabilize prices, meet emergency needs, and promote adequate income to producers;

"(4) encouragement to labor and management to increase productivity within the national framework of full employment through voluntary arrangements in industries and economic sectors;

"(5) recommendations to increase competition in the private sector and to improve the economic climate for the creation and growth of smaller businesses, including recommendations to strengthen and enforce the antitrust laws, the patent laws, and the internal revenue laws and regulations;

"(6) removal of proper modification of such Government restrictions and regulations as add unnecessarily to inflationary costs;

"(7) increasing exports and improving the international competitive position of agriculture, business, and industry;

"(8) such other administrative actions and recommendations for legislation as the President deems desirable, to promote reasonable price stability.".

COUNCIL OF ECONOMIC ADVISERS

SEC. 110. (a) Section 10 of the Employment Act of 1946 (as redesignated by section 104 of this Act) is amended—

(1) in the second sentence of subsection (a), by inserting "full" immediately after "promote";

(2) in subsection (c)(4), by inserting "including small and larger business" immediately after "enterprise" and by inserting "full" immediately after "maintain";

(3) in subsection (e)(1), by inserting immediately before the semicolon a comma and the following: "and shall consult with the board or boards established under section 9"; and

(4) in subsection (e), by inserting after paragraph (2) the following:

In its work under this Act and the Full Employment and Balanced Growth Act of 1978, the Council is authorized and directed to seek and obtain the cooperation of the various executive and independent agencies in the development of specialized studies essential to its responsibilities.".

ADVISORY BOARD OR BOARDS

SEC. 111. (a) The Employment Act of 1946 is amended by inserting a new section 9 as follows:

"ADVISORY BOARD OR BOARDS

"SEC. 10. (a) An advisory board or boards (including regional advisory boards) may be established as the President deems appropriate, to advise and consult periodically with one or more of the following: The President, the Council of Economic Advisers, and such other departments and agencies of the executive branch of the Federal Government as the President shall determine.

"(b) Such advisory board or boards shall include appropriate representation of labor, small and larger businesses and industries, agriculture, consumers, State and local officials, and the public at large, and shall advise and consult with respect to matters related to this Act, the Full Employment and Balanced Growth Act of 1978, and other appropriate matters related to national economic programs and policies. The President shall, in accordance with applicable processions of law, take the steps necessary to provide appropriate compensation to the members of such advisory board or boards.".

TITLE II—STRUCTURAL ECONOMIC POLICIES AND PROGRAMS, INCLUDING TREATMENT OF RESOURCE RESTRAINTS

STATEMENT OF PURPOSE

SEC. 201. The Congress recognizes that general economic policies alone have been unable to achieve the goals set forth in this Act related to full employment, production, and real income, balanced growth, adequate growth in productivity, proper attention to national priorities, achievement of an improved trade balance through increased exports and improvement in the international competitiveness of agriculture, business, and industry, and achievement of reasonable price stability as provided for in section 5(b) of the Employment Act of 1946. It is, therefore, the purpose of this title to require the President to initiate, as the President deems appropriate, with recommendations to the Congress where necessary, supplementary programs and policies to the extent that the President finds such action necessary to help achieve these goals, including the goals and timetable for the reduction of unemployment. Insofar as feasible without undue delay, any policies and programs so recommended shall be included in the Economic Report.

COUNTERCYCLICAL EMPLOYMENT POLICIES

SEC. 202. (a) Any countercyclical efforts undertaken to aid in achieving the purposes of section 201 shall consider for inclusion the following programmatic entities:

(1) accelerated public works, including the development of standby public work projects;

(2) public service employment;

(3) State and local grant programs;

(4) the levels and duration of unemployment insurance;

(5) skill training in both the private and public sectors, both as a general remedy and as a supplement to unemployment insurance;

(6) youth employment programs as specified in section 205;

(7) community development programs to provide employment in activities of value to the States, local communities (including rural areas), and the Nation;

(8) Federal procurement programs which are targeted on labor surplus areas; and

(9) augmentation of other employment and training programs which would help to reduce high levels of unemployment arising from cyclical causes.

(b) In any countercyclical efforts undertaken, the President shall consider a triggering mechanism which will implement the program during a period of rising unemployment and phase out the program when unemployment is appropriately reduced, and incorporate effective means to facilitate individuals assisted under programs developed pursuant to this section to return promptly to regular private and public employment as the economy recovers.

COORDINATION WITH STATE AND LOCAL GOVERNMENT AND PRIVATE SECTOR ECONOMIC ACTIVITY

SEC. 203. (a) As an integral part of any counteryclical employment policies undertaken in accord with section 202, the President shall, to the extent the President deems necessary, set forth programs and policies, including recommended legislation where needed, to coordinate economic action among the Federal Government, regions, States, and localities, and the private sector to promote achievement of the purposes of this Act and the Employment Act of 1946 and an economic environment in which State and local governments and private sector economic activity and employment will prosper. In considering programs and policies related to the private sector, full consideration shall be given to promoting the growth and well-being of small businesses and employment training programs through private sector incentives.

(b) In any efforts under this section, the President shall endeavor to meet criteria that establish programs which are funded to take account of the fiscal needs and budget conditions of the respective States and localities and their own efforts, with special attention to the rate of unemployment in such States and localities.

REGIONAL AND STRUCTURAL EMPLOYMENT POLICIES

SEC. 204. (a) To the extent deemed appropriate by the President in fulfillment of the purposes of section 201, the President shall recommend legislation to the Congress if necessary, regional and structural employment policies and programs.

(b) In formulating the regional components of any such programs, the President shall encourage to the extent the President deems necessary, new private sector production and employment to locate within depressed localities and regions with substantial unemployment and to aid in stabilizing their economic base. To the extent feasible, such policies and programs shall foster the establishment and growth of smaller businesses in such localities and regions. Any regional employment proposal of the President shall also include an analysis of the extent to which Federal tax, expenditure (including procurement of goods and services), defense, transportation, energy, natural resources and employment policies have influenced the movement of people, jobs, and small and larger business and industries from chronic high unemployment regions and areas, and proposals designed to correct Federal policies that have an adverse economic impact upon such regions and areas.

YOUTH EMPLOYMENT POLICIES

SEC. 205. (a) The Congress finds and declares—

(1) That serious unemployment and economic disadvantage of a unique nature exist among youths even under generally favorable economic conditions;

(2) that this group constitutes a substantial portion of the Nation's unemployment, and that this significantly contributes to crime, alcoholism and drug abuse; and other social and economic problems; and

(3) that many youths have special employment needs and problems which, if not promptly addressed, will substantially contribute to more severe unemployment problems in the long run.

(b) To the extent deemed necessary in fulfillment of the purposes of this Act, the President shall improve and expand existing youth employment programs, recommending legislation where required. In formulating any such program, the President shall—

(1) include provisions designed to fully coordinate youth employment activities with other employment and training programs:

(2) develop a smoother transition from school to work;

(3) prepare disadvantaged and other youths with employability handicaps for regular self-sustaining employment;

(4) develop realistic methods for combining training with work; and

(5) develop provisions designed to attract structurally unemployed youth into productive full-time employment through incentives to private and independent sector businesses;

JOB TRAINING, COUNSELING AND RESERVOIRS OF EMPLOYMENT PROJECTS

SEC. 206. (a) Further to promote achievement of full employment under this Act and the Employment Act of 1946, the President, through the Secretary of Labor, shall develop policies and procedures and, as necessary, recommend programs for providing employment opportunities to individuals aged 16 and over in the civilian labor force who are able, willing, and seeking to work but who, despite serious efforts to obtain employment, remain unemployed.

(b) In meeting the responsibilities under subsection (a), the Secretary of Labor shall, as appropriate, fully utilize the authority provided under CETA and other relevant provisions of law to—

(1) assure the availability of counseling, training, and other support activities necessary to prepare persons willing and seeking work for employment (including use of section 110 of CETA when necessary);

(2) refer persons able, willing, and seeking to work to job opportunities in the private and public sectors through the existing public employment placement facilities and through the United States Employment Service of the Department of Labor, including job opportunities in any positions created under programs established pursuant to sections 202, 204, and 205 of this Act; and

(3) encourage flexi-time and part-time jobs for persons who are able, willing, and seeking employment but who are unable to work a standard workweek.

(c)(1) To the extent that individuals aged sixteen and over and able, willing, and seeking to work are not and in the judgment of the President cannot be provided with private job opportunities or job opportunities under other programs and actions in existence, in accord with the goals and timetables set forth in the Employment Act of 1946, the President shall, as may be authorized by law, establish reservoirs of public employment and private nonprofit employment projects, to be approved by the Secretary of Labor, through expansion of CETA and other existing employment and training projects or through such new programs as are determined necessary by the President or through both such projects and such programs.

(2) New programs as may be authorized by law after the date of enactment of this Act referred to in paragraph (c)(1)—

(A) shall not be put into operation earlier than two years after the enactment of this Act, nor without a finding by the President, transmitted to the Congress, that other means of employment are not yielding enough jobs to be consistent with attainment of the goals and timetables for the reduction of unemployment set forth in the Employment Act of 1946;

(B) shall be designed so that no workers from private employment are drawn into the reservoir projects thereunder;

(C) shall be useful and productive jobs;

(D) shall be mainly in the lower ranges of skills and pay, and toward this end the number of reservoir jobs under such new programs shall, to the extent practicable, be maximized in relationship to the appropriations provided for such jobs;

(E) shall be targeted on areas of high unemployment and on individuals who are structurally unemployed;

(F) shall be phased in by the President as necessary, in conjunction with the employment goals under section 3(a)(2) and 4(b) of the Employment Act of 1946.

(d) The Secretary, in carrying out the provisions of this section, shall establish regulations providing for—

(1) an initial determination of the job seeker's ability to be employed at certain types and duration of work, so that such individual may be appropirately referred to jobs, training, counseling, and other supportive services;

(2) compliance with the nondiscrimination provisions of this Act in accordance with section 401;

(3) appropriate eligibility criteria to determine the order of priority of access of any person to any new programs under subsection (c) as may be authorized by law including but not necessarily limited to (A) household income, duration of unemployment (not less than five weeks), and the number of people economically dependent upon such person; and (B) denial of access to any person refusing to accept or hold a job except for good cause, as determined by the Secretary of Labor, including refusal to accept or hold a job subject to reference under subsection (b) paragraph (2), in order to seek a reservoir project job under subsection (c); and

(4) such administrative appeal procedures as may be appropriate to review the initial determination of the abilities of persons willing, able, and seeking to work under paragraph (1) of this subsection and the employment need and eligibility under paragraph (3) of this subsection.

CAPITAL FORMATION—PRIVATE AND PUBLIC

SEC. 207. (a) The Congress finds that—

(1) promotion of full employment and balanced growth is in itself a principal avenue to high and sustained rates of capital formation;

(2) high rates of capital formation are necessary to ensure adequate rates of capacity expansion and productivity growth, compliance with governmental health, safety and environmental standards, and the replacement of obsolete production.

(3) the ability of our economy to compete successfully in international markets, the development of new technology, improved working conditions, expanding job opportunities, and an increasing standard of living depend on the availability of adequate capital at reasonable cost to commerce and industry;

(4) an important goal of national policy shall be to remove obstacles to the free flow of resources into new investment, particularly those obstacles that hinder the creation and growth of smaller businesses because general national programs and policies to aid and stimulate private enterprise are not sufficient to deal with the special problems and needs of smaller businesses; and

(5) while private business firms are, and should continue to be, the major source of investment, the investment activities of the Federal, State, and local governments play an important role in affecting the level of output, employment, and productivity and in achieving other national purposes.

(b) The Economic Report shall include an Investment Policy Report which shall, as appropriate, (1) review and assess existing Federal government programs and policies which affect business investment decisions, including, but not limited to, the relevant aspects of the tax code, Federal expenditure policy, Federal regulatory policy, international trade policy, and Federal support for research, development, and diffusion of new technologies; (2) provide an assessment of the levels of investment capital available, required by, and applied to small, medium and large business entities; (3) provide an analysis of current and foreseeable trends in the level of investment capital available to such entities; and (4) provide a description of programs and proposals for carrying out the policy set forth in section 102(1). In addition, the Economic Report shall include an assessment of the effect of the overall economic policy environment and the rate of inflation on business investment. The President shall recommend in the President's Budget, as appropriate, new programs or modifications to improve existing programs concerned with private capital formation. The President shall also transmit to the Congress as part of the President's Budget such other recommendations as the President may deem necessary or desirable to achieve the policy as set forth in section 102(1). The Investment Policy Report, when transmitted to the Congress, shall be referred to the Joint Economic Committee.

(c) The Economic Report referred to in subsection (b) shall review and assess Federal policies and programs which directly, or through grants-in-aid to State and local governments, or indirectly through other means, affect the adequacy, composition and effectiveness of public investments, as a means of achieving the goals of this Act and the Employment Act of 1946. The President shall recommend, as appropriate, new programs and policies or modifications to improve existing Federal programs affecting public investment.

TITLE III—POLICIES AND PROCEDURES FOR CONGRESSIONAL REVIEW

STATEMENT OF PURPOSE

SEC. 301. (a) The purposes of this title are to establish procedures for congressional review and action with respect to the Economic Report of the President (hereafter in this title referred to as the "Economic Report"), the report of the Board of Governors of the Federal Reserve System, and the other policies and provisions of this Act and the Employment Act of 1946.

(b) The Congress shall initiate or develop such legislation as it deems necessary to implement proposals and objectives pursuant to this Act and the Employment Act of 1946 after such modification in such proposals as it deems desirable. Nothing in this title shall be construed to prevent the Congress or any of its commodities from considering or initiating at any time legislative action in furtherance of the goals and purposes of this act.

COMMITTEE REVIEW

SEC. 302. (a) In conjunction with its review of the Economic Report, and the holding of hearings on the Economic Report under the Employment Act of 1946, the Joint Economic Committee shall review and

analyze the short-term and medium-term goals set forth in the Economic Report pursuant to sections 3(a)(2) and 4(b) of the Employment Act of 1946 (as amended by sections 103 and 104 of this Act).

(b) The Joint Economic Committee shall hold hearings on the Economic Report for the purpose of receiving testimony from Members of the Congress, and such appropriate representatives of Federal departments and agencies, the general public, and interested groups as the joint committee deems advisable. The joint committee shall also consider the comments and views on the Economic Report which are received from State and local officials.

(c) Within thirty days after receipt by the Congress of the Economic Report, each standing committee of the Senate and the House of Representatives, each other committee of the Senate and the House of Representatives which has legislative jurisdiction, and each joint committee of the Congress may submit to the Joint Economic Committee, for use by the Joint Economic Committee in conducting its review and analysis under subsection (a), a report containing the views and recommendations of the submitting committee with respect to aspects of the Economic Report which relate to its jurisdiction.

(d) On or before March 15 of each year, a majority of the members of the Joint Economic Committee shall submit a report to the Committees on the Budget of the Senate and the House of Representatives. Such report shall include findings, recommendations, and any appropriate analyses with respect and in direct comparison to each of the short-term and medium-term goals set forth in the Economic Report.

REVIEW OF ECONOMIC REPORT AS PART OF CONGRESSIONAL BUDGET PROCESS

SEC. 303. (a) Section 301(c) of the Congressional Budget Act of 1974 is amended—

(1) by inserting after the first sentence the following new sentences: "Each of the recommendations as to short-term and medium-term goals set forth in the report submitted by the members of the Joint Economic Committee under subsection (c) may be considered by the Committee on the Budget of each House as part of its consideration of such concurrent resolution, and its report may reflect its views thereon, and on how the estimates of revenues and levels of budget authority and outlays set forth in such concurrent resolution are designed to achieve any goals it is recommending"; and

(2) by inserting "also" after "shall" in the last sentence.

(b) Section 305(a) of such Act is amended—

(1) by inserting before the period at the end of the first sentence of paragraph (2) a comma and "plus such additional hours of debate as are consumed pursuant to paragraph (3)";

(2) by redesignating paragraphs (3) through (6) as paragraphs (6) through (9) respectively; and

(3) by inserting after paragraph (2) the following new paragraphs:

"(3) Following the presentation of opening statements on the first concurrent resolution on the budget for a fiscal year by the chairman and ranking minority member of the Committee on the Budget of the House, there shall be a period of up to four hours for debate on economic goals and policies.

"(4) Only if a concurrent resolution on the budget reported by the Committee on the Budget of the House sets forth the economic goals (as described in sections 3(a)(2) and 4(b) of the Full Employment Act of 1946) which the estimates, amounts, and levels (as described in section 301(a)) set forth in such resolution are designed to achieve, shall it be in order to offer to such resolution an amendment relating to such goals, and such amendment shall be in order only if it also proposes to alter such estimates, amounts, and levels in germane fashion in order to be consistent with the goals proposed in such amendment.".

(c) Section 305(b) of such Act is amended—

(1) by redesignating paragraphs (3) and (4) as paragraphs (6) and (7), respectively; and

(2) by inserting after paragraph (2) the following new paragraphs:

"(3) Following the presentation of opening statements on the first concurrent resolution on the budget for a fiscal year by the chairman and ranking minority member of the Commitee on the Budget of the Senate, there shall be a period of up to four hours for debate on economic goals and policies.

"(4) Only if a concurrent resolution on the budget reported by the Committee on the Budget of the Senate sets forth the economic goals (as described in sections 3(a)(2) and 4(b) of the Employment Act of 1946), which the estimates, amounts, and levels (as described in section 301(a)) set forth in such resolution are designed to achieve, shall it be in order to offer to such resolution an amendment relating to such goals, and such amendment shall be in order only if it also proposes to alter such estimates, amounts, and levels in germane fashion in order to be consistent with the goals proposed in such amendment.".

MODIFICATION OF TIMETABLE FOR ACHIEVING UNEMPLOYMENT GOALS

SEC. 304 (a) Section 301(a) of the Congressional Budget Act of 1974 is amended—

(1) by striking out "and" at the end of paragraph (5); and

(2) by renumbering paragraph (6) as (7) and inserting after paragraph (5) the following new paragraph:

"(6) if required by subsection (e), the calendar year in which, in the opinion of the Congress, the goals for reducing unemployment set forth in section 4(b) of the Employment Act of 1946 should be achieved; and".

(b) Section 301 of such Act is amended by adding at the end thereof the following new subsection:

"(e) ACHIEVEMENT OF GOALS FOR REDUCING UNEMPLOYMENT.—

"(1) If, pursuant to section 4(c) of the Employment Act of 1946, as amended, the President recommends in the Economic Report that the goals for reducing unemployment set for in section 4(b) of such Act be achieved in a year after the close of the five-year period prescribed by such subsection, the first concurrent resolution on the budget for the fiscal year beginning after the date on which such Economic Report is received by the Congress shall set forth the year in which, in the opinion of the Congress, such goals can be achieved.

"(2) After the Congress has expressed its opinion pursuant to paragraph (1) as to the year in which the goals for reducing unemployment set forth in section 4(b) of the Employment Act of 1946, as amended, can be achieved, if, pursuant to section 4(e) of such Act, the President recommends in the Economic Report that such goals be achieved in a year which is different from the year in which the Congress has expressed its opinion that such goals should be achieved, either in its action pursuant to paragraph (1) or its most recent action pursuant to this paragraph, the first concurrent resolution on the budget for the fiscal year beginning after the date on which such Economic Report is received by the Congress may set forth the year in which, in the opinion of the Congress, such goals can be achived.

"(3) It shall be in order to amend the provision of such resolution setting forth such year only if the amendment thereto also proposes to alter the estimates, amounts, and levels (as described in section 301(a)) set forth in such resolution in germane fashion in order to be consistent with the economic goals (as described in section 3(a)(2) and 4(b) of the Employment Act of 1946) which such amendment proposes can be achieved by the year specified in such amendment.".

EXERCISE OF RULEMAKING POWERS

"SEC. 305. (a) The provisions of this title and the amendments made by such provisions are enacted by the Congress—

(1) as an exercise of the rulemaking power of the House of Representatives and the Senate, respectively, and as such they shall be considered as part of the rules of each House, respectively, or of that House to which they specifically apply, and such rules shall supersede other rules only to the extent that they are inconsistent therewith; and

(2) with full recognition of the constitutional right of either House to change such rules (so far as relating to such House), at any time, in the same manner and to the same extent as in the case of any other rule of such House.

TITLE IV—GENERAL PROVISIONS

NONDISCRIMINATION

SEC. 401. (a) No person in the United States shall on the ground of sex, age, race, color, religion, national origin or handicap be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any program or activity funded pursuant to the implementation of this Act, including membership in any structure created by this Act.

(b) Whenever the Secretary of Labor determines that a recipient of funds made available pursuant to this Act has failed to comply with subsection (a), or an applicable regulation, the Secretary shall notify the recipient of the noncompliance and shall request such recipient to secure compliance. If within a reasonable period of time, not to exceed sixty days, the recipient fails or refuses to secure compliance, the Secretary of Labor may—

(1) refer the matter to the Attorney General with a recommendation that an appropriate civil action be instituted;

(2) exercise the powers and functions provided by title VI of the Civil Rights Act of 1964 (42 U.S.C. 2000d et seq.); or

(3) take such other action as may be provided by law.

(c) When a matter is referred to the Attorney General pursuant to subsection (b), or whenever the Attorney General has reason to believe that a recipient is engaged in a pattern or practice in violation of the provisions of this section, the Attorney General may bring a civil action in the appropriate United States district court for any and all appropriate relief.

(d) To assist and evaluate the enforcement of this section, and the broader equal employment opportunity policies of this Act, the Secretary of Labor shall include, in the annual Employment and Training Report of the President provided under section 705(a) of CETA, a detailed analysis of the extent to which the enforcement of this section achieves positive results in both the quantity and quality of jobs, and for employment opportunities generally.

LABOR STANDARDS

SEC. 402. (a) Any new program enacted and funded pursuant to the implementation of this Act shall, subject to any limitations on maximum annual compensation as may be provided in the law authorizing such programs, provide that persons employed are paid equal wages for equal work, and that such policies and programs create a net increase in employment through work that would not otherwise be done or are essential to fulfill national priority purposes.

(b) Any person employed in any reservoir

project enacted and funded pursuant to the implementation of section 206(c)(1), or in any other job created pursuant to implementation of this Act, shall, subject to any limitations on maximum annual compensation as may be provided in the law authorizing such programs, be paid not less than the pay received by others performing the same type of work for the same employer, and in no case less than the minimum wage under the Fair Labor Standards Act of 1938. No person employed in any reservoir project enacted and funded pursuant to implementation of section 206(c)(1) shall perform work of the type to which the Davis-Bacon Act (40 U.S.C. 276a—276a-5) applies, except as otherwise may be specifically authorized by law.

(c) Any recommendation by the President for legislation to implement any program enacted pursuant to the provisions of this Act, requiring the use of funds under this Act, and submitted pursuant to the requirements of this Act, shall contain appropriate wage provisions based upon existing wage standard legislation.

Mr. HARRY F. BYRD, JR. Mr. President, does the Senator yield for a question?

Mr. ROBERT C. BYRD. Mr. President, I yield the floor and ask Mr. Proxmire or someone to come to this desk.

The PRESIDING OFFICER (Mr. RIEGLE). Without objection, the amendment is agreed to as original text.

Mr. HARRY F. BYRD, JR. I would like somebody to yield for a question.

Are printed texts of the amendment available as sent to the desk?

Mr. NELSON. I did not hear the Senator.

Mr. HARRY F. BYRD, JR. I ask the Senator from Wisconsin, the Senator from West Virginia sent to the desk an amendment, new legislation in the form of an amendment introduced by himself and the Republican leader. Are there copies of that available where we can see what we are voting on?

Mr. NELSON. There are copies—yes, here is one. We just reached the understanding on the final form this morning, so we do not have enough for everybody at the moment.

Mr. HARRY F. BYRD, JR. This is a multitude of pages that we need to digest now to determine whether this is a good bill or a bad bill.

Mr. NELSON. Let me say to the distinguished Senator from Virginia—let me use a figure, 95 or 98 percent of what is in there is an amalgam of what was approved by the Banking Committee and what was approved by the Committee on Human Resources. We took some Banking Committee language, we took some Human Resources Committee language, but all of it was approved, I believe, by one committee or the other in the course of——

Mr. PROXMIRE. If the Senator will yield, also, this has been available in printed form.

Mr. NELSON. Mr. President, may we have order in the Senate?

The PRESIDING OFFICER. Let me ask, please, that those standing find seats and that other conversations cease so this very important discussion can be heard by everyone in the Chamber.

Mr. NELSON. Mr. President, there is a continual undercurrent of conversation. Maybe if we asked all of the staff to leave, then we would find out that it is the Senators who are causing all the noise and we could ask them to leave, too.

Mr. PROXMIRE. If the Senator will yield, I was simply saying that the basic amendment that was filed by the majority and minority leaders was available—98 percent of it—available, printed and distributed 2 weeks ago.

Mr. NELSON. That was introduced last Saturday and printed.

Mr. PROXMIRE. And was introduced, as the Senator says, last Saturday and printed, so that has been available for 6 weeks. There were modifications that were agreed on by several Republicans and Democrats working together which have been put in here, which we shall be happy to call to the Senator's attention. They affect about three pages of this very voluminous document.

Mr. HARRY F. BYRD, JR. If the Senator from Wisconsin will yield, as I understand it, this is an amalgamation of two bills, one that came out of the Human Resources Committee, one that came out of the Banking Committee. As I understand those two bills, they were substantially different, one from the other.

Mr. NELSON. Not really all that different, but I would like to emphasize what the senior Senator from Wisconsin said: Almost all of the language in this proposal introduced by the leadership today was available 2 weeks ago and is in the language of the amendment that the Senator from Wisconsin introduced last Saturday.

The Human Resources Committee and the Banking Committee were really dealing, basically, with the same bill. The Banking Committee made a number of modifications, mainly within their jurisdiction, which were incorporated in the bill that was introduced last Saturday. So all of that has been available and hearings on it.

What was done today was to take the three controversial or what appeared to be, as far as we could tell, the three most controversial questions. One was the issue that was put in the Banking Committee bill of a 3-percent inflation goal to be achieved by 1983; the question of "shall" or "may" involving the Budget Committee on the review of the unemployment figure by the President; and the question of whether or not there should be a spending, GNP percentage spending, limitation.

Those three items ended up being the big controversy. This bill was introduced with the inflation goal in it, the GNP won out, the word "shall" instead of "may." The agreement is to have a time limitation and a vote on those. Those who want to strike out the inflation goal will move to strike it or modify it. We shall have a vote at the end of the time, and the process has been worked.

Those who want a GNP limitation in, a percentage, will have the burden of moving to add it to the bill. At the end, we shall vote and that settles that question.

Then someone who does not like the word "shall" that is in there will move to strike it. That will settle that question. Then we move to the bill.

Almost all of which, as the senior Senator from Wisconsin said, has been printed and available for quite some time.

Several Senators addressed the Chair.

Mr. CRANSTON. Mr. President, I am pleased to rise in support of the pending measure—the Humphrey-Hawkins Full Employment and Balanced Growth Act of 1978. This measure—which has been substantially revised since it was first put before us several years ago—is, in my opinion, a good one that we can and should all support.

As a member—I believe the only member—of all three of the committees which had contact with this legislation in the Senate —the Human Resources Committee, the Banking, Housing, and Urban Affairs Committee, and the Budget Committee as well as the ad hoc committee that has been working on it in this final phase, I am extremely pleased that we have been able, as a body, to consider this very important legislative item prior to the adjournment of the 95th Congress. As a member of the ad hoc committee, which led the final efforts to fashion the means of obtaining a time agreement that allowed us to take up the measure today, I am delighted by the spirit of cooperation and support for this measure that has generally pervaded this Chamber during the consideration of this landmark bill.

Mr. President, by enacting the Full Employment and Balanced Growth Act, we are making a commitment to all Americans. We are saying, "every American has the right to an opportunity for useful paid employment." After more than three decades, enactment of this measure will complete the commitment that was anticipated by the Employment Act of 1946.

Mr. President, I should point out that when earlier versions of the Humphrey-Hawkins bill were being considered, I had deep reservations about the wisdom of the approach. However, a major breakthrough occurred when the President and the sponsors were able to reach agreement on a revised version which I was pleased to cosponsor and support.

This bill now before us upon this evening, as oposed to earlier versions, makes clear that the Federal Government is not the "employer of last resort." It places strong and primary emphasis on the health of the private sector as the primary means by which to achieve full employment and seek to achieve rates of 3 percent adult unemployment and 4 percent overall unemployment by 1983. Only after maximum efforts to stimulate expansion in a freely operating private sector would the Federal Government consider public sector initiatives.

The real heart of Humphrey-Hawkins is the structure it establishes for the President and the Congress to work together to consider and formulate means of achieving full employment and balanced growth. This structure, which is heavily tied into the already functioning budget process, will allow us to consider in an orderly fashion, where we are, where we are going, and how we can get there.

Mr. President, enactment of this bill

will clearly not be a miracle cure for all the ills that afflict our Nation. It will do nothing in and of itself in terms of helping us reach the goals we are setting forth in the statute. It will take continued hard work and efforts by the Congress, the President, the private sector, business, and labor. It is not a panacea, but it is a step in the right direction.

Mr. President, I have worked hard, as have many of my colleagues, including particularly the most distinguished majority leader (Mr. BYRD) and the very able floor manager (Mr. NELSON), in order to make sure that the Humphrey-Hawkins Full Employment and Balanced Growth Act is fully considered on its merits and carefully developed in the Senate—as our dear friend and beloved colleague, the late Hubert H. Humphrey, would have wanted. In tribute to him, and in recognition of the rights of all Americans to have an opportunity to work, we now—finally—have pending before us a measure that will provide us with a reasonable and workable means of striving toward full employment and balanced growth.

It was a rare privilege to work on this measure once with Senator Hubert Humphrey, and now with Senator MURIEL HUMPHREY, and with my good friend from my own California, GUS HAWKINS, and all the others, in and out of Congress, who have dedicated so much to this cause.

Mr. President, I urge the Senate to approve the Humphrey-Hawkins Full Employment and Balanced Growth Act of 1978.

ORDER OF BUSINESS

Mr. ROBERT C. BYRD. If the Senator will yield just very briefly, I have some Senators on the floor and I would like to handle two other matters quickly. One is a conference report on the Department of Justice authorization.

I ask that the Senate proceed to that conference report for not to exceed 2 minutes and that the time not be charged against anyone on this bill.

Mr. PROXMIRE. Would the Senator permit me to reserve my right to the floor?

Mr. ROBERT C. BYRD. Yes, please do.

Mr. PROXMIRE. I thank the Senator.

DEPARTMENT OF JUSTICE AUTHORIZATIONS, 1979—CONFERENCE REPORT

Mr. ROBERT C. BYRD. Mr. President, I submit a report of the committee of conference on S. 3151 and ask for its immediate consideration.

The PRESIDING OFFICER. The report will be stated.

The legislative clerk read as follows:

The committee of conference on the disagreeing votes of the two Houses on the amendments of the House to the bill (S. 3151) to authorize appropriations for the purpose of carrying out the activities of the Department of Justice for fiscal year 1979, and for other purposes, having met, after full and free conference, have agreed to recommend and do recommend to their respective Houses this report, signed by a majority of the conference.

The PRESIDING OFFICER. Without objection, the Senate will proceed to the consideration of the conference report.

(The conference report will be printed in the proceedings of the House of Representatives.)

Mr. PAUL G. HATFIELD. Mr. President, the conferees agreed to a substitute amendment which is set forth in the report. Under this bill, as amended, the Justice Department is authorized for appropriation of funds for fiscal year 1979. Basically, Mr. President, the House agreed to some additional authorization provided in the Senate bill for the Criminal Division, the Civil Rights Division and the Antitrust Division. Also, the conferees agreed to an additional $25 million dollars authorization to permit the hiring of additional assistant U.S. attorneys and deputy marshals required to handle increased court work once the new judges are appointed later in this fiscal year. The Senate conferees agreed to authorize an additional appropriation for the Immigration and Naturalization Service, as explained in the House report on this bill.

The Senator from South Dakota (Mr. ABOUREZK) requested the FBI to write him a letter, concerning FBI undercover operations.

Mr. ABOUREZK. Mr. President, the Justice authorization bill contains new authority for the FBI to engage in undercover operations. In order to assess the impact of this authority, I asked the Director to confirm his commitment to inform fully the appropriate committees of Congress concerning the implementation of this authority I ask unanimous consent that the letter from FBI Director Webster concerning the Justice Department authorization report be printed in the RECORD.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

OCTOBER 13, 1978.

Hon. EDWARD M. KENNEDY,
U.S. Senate, Washington, D.C.

DEAR TED: As you know the Senate will today consider the Department of Justice Authorization Bill. The Senate and House conferees have agreed to language that will allow the FBI to continue vital undercover operations. It is my understanding that the Conference Report may not contain language providing for reports to the Senate and House Judiciary Committees, and Senate and House Intelligence Committees regarding these undercover operations.

I want to reconfirm to you my commitment to make appropriate reports to these Committees concerning undercover investigative operations approved under the provisions of this Authorization Bill. I am committed to the principle of congressional oversight for the FBI.

I appreciate the efforts of you and your staff in helping to secure these necessary amendments.

Sincerely yours,

WILLIAM H. WEBSTER,
Director.

Mr. THURMOND. Mr. President, I rise in support of the conference report on S. 3151, the Department of Justice Appropriation Authorization Act for fiscal year 1979. This report is the combination of months of oversight review and consideration of the many functions of the Department of Justice by the House and Senate Judiciary Committees. Comprehensive hearings were held by the full Senate Judiciary Committee this spring. Similar hearings were also held in the House. This authorization bill, of course, marks the first time in which many functions of the Justice Department have been separately authorized, including the Federal Bureau of Investigation, the Litigation Divisions, the Community Relations Service, and the Immigration and Naturalization Service. In fact, only the Drug Enforcement Administration and the Law Enforcement Assistance Administration have been separately authorized in the past. Now, for the first time, the entire Justice Department has funding authority.

In general, Mr. President, the authorization bill follows very closely amounts already appropriated for the Justice Department in the State, Commerce, Justice appropriations bill which is now at the President's desk for signing into law. The authorization figures are not lavish by any standard. They represent, at most, only modest increases to perform the essential functions of the Justice Department. There are only three areas where there are significant increases over the appropriations bill. First, for U.S. attorneys and marshals, a $25 million increase has been authorized to accommodate the increased workload to be anticipated as a result of congressional passage of the Omnibus Judgeship Act. This new law now awaiting the President's signature, authorizes 152 new Federal judgeships, most of them at the district court level. These new judgeship positions will directly impact the work of the U.S. attorneys and U.S. marshals offices and so authority has been granted to allow for this expansion.

A second item is an increase for the Immigration and Naturalization Service. $299,350,000 appropriated has been increased in the authorization to a level of $320,722,000 as provided for by the House. The Senate conferees agreed with the House that the major offices of the Immigration Service are now literally swamped with work and that much more needs to be done in attempting to stem the flow of illegal aliens entering the United States. These additional funds, if appropriated, will help deal with these most urgent problems.

A third increase occurred in general legal activities where a total of $95,481,000 was approved by the conferees. This is less than the $98,081,000 provided in the Senate, but significantly higher than the $89,884,000 allowed by the House and $90,550,000 approved in the Appropriations Act. The two increases approved by the conference are in the Civil Rights Division and in the Criminal Division to handle sharply increased workloads.

The conferees also approved language which would authorize the Federal Bureau of Investigation to provide funding for its undercover "sting" operations. These activities have been unusually successful. This new authority authorizes the FBI to enter into leasing arrangements and establish bank accounts

to support these operations. This is authority which is already exercised by the Law Enforcement Assistance Administration in its support of Federal, State, and local "sting" activities, but now the Bureau has separate authority. It is expected that the new authority granted to the FBI will not result in any significant overlap with already existing "sting" programs. It is expected also that appropriate steps will be taken to coordinate the various "sting" activities where possible.

The Federal Bureau of Prisons has been authorized to submit a plan which would assure the closure of the U.S. penitentiary at McNeil Island, Wash. on or before January 1, 1982. Mr. President, I am particularly interested in this proviso since McNeil Island is an institution well over 100 years old. It has been seriously overcrowed and is in dire need of replacement. In addition, the Department also can negotiate with the Department of Defense to identify and develop plans for suitable Defense Department military installations surplus to the Department of Defense's needs that might be utilized by the Bureau of Prisons to deal with its severe overcrowding problems. Two such sites have already been identified and this authority will insure continuing negotiations.

The authorization also contains the authority for the sum of $2.6 million to be appropriated for the planning and site acquisition during the current fiscal year for the construction of a Federal detention center in Los Angeles County. Although this item was not sought by the administration, it is strongly endorsed by the California congressional delegation and there appears to be very real needs that such a facility could meet.

Also authorized is an increase in the number of supergrades available to the Department for senior attorney positions. There was a net increase of 13. I understand, as one of the conferees, that we agreed that these positions shall be used only for senior attorneys and not for administrative positions. I also understand that none of the supergrade positions currently utilized, from whatever source for attorney positions, will be eliminated or transferred for two other positions.

Mr. President, I want to extend my sincere thanks and appreciation to the members of the Senate and House Judiciary Committees and their staffs who worked so long and hard to bring this measure to its fruition. Particularly, the distinguished senior Senator from Mississippi, Mr. EASTLAND, and the distinguished senior Senator from Massachusetts Mr. KENNEDY, spent many hours studying the justifications in great detail.

Mr. GLENN. Mr. President, I support S. 3151, the Justice Department authorization conference report. I am particularly pleased that the conferees agreed to the provision jointly sponsored by my colleague from Ohio, Congressman SEIBERLING and myself relating to fighting the growing arson-for-profit epidemic.

The provision that I refer to is essentially S. 1882, the Arson Control Assistance Act of 1977, a bill that I introduced in July of 1977 that requires the FBI to classify arson as a major crime for the purpose of the FBI uniform crime reports.

Murder, forcible rape, robbery, assault, burglary, larceny, and auto theft are so classified and arson is not, even though human and property losses from arson often exceed those of these other major crimes. The quarterly FBI crime reports have become social indicators for the American public. They tell us what crimes are on the increase or decline, what pattern criminal activity is taking and so on they help mobilize the public. They help inform us as to what our crime-fighting priorities should be and how to deploy our resources. Since 1928, despite changes in circumstances, the development of newer, more sophisticated crime, no additions have been made to the major crime category in the UCR.

Consequently, arson does not appear on the list of crimes reported quarterly. It is no wonder then that our several sets of hearings in the Governmental Affairs Committee, the GAO, and others have found that the Federal law enforcement effort is totally uncoordinated with respect to arson fighting, assigns it a low priority and is totally lacking in statistical information with respect to arson.

I have been fighting to correct this and S. 3151 is a significant victory. Adding arson to the major crimes list will encourage greater deployment of arson specialists by local police. It will encourage greater cooperation by fire and police forces. This new statistical standard for arson will also stimulate development of more modern and uniform methods of crime reporting procedure with respect to arson. Most of all, providing the American public with accurate information on arson which now is commonly referred to as the "easiest and fastest growing crime" will help mobilize the public as to the need to assign high priority to efforts to combat it.

Mr. President, S. 3151 culminates a lengthy effort over the 95th Congress that I have undertaken on this issue. I ask unanimous consent to have printed in the RECORD a copy of my August 21, 1977 letter to Attorney General Bell along with a list of other activities in the arson fighting area. I am now working on a more comprehensive anti-arson measure that hopefully will complement this new direction and new priority that the conferees on S. 3151 have given the fight against arson. I commend my colleagues for their effort and urge that the report be adopted.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

AUGUST 21, 1978.

Hon. GRIFFIN B. BELL,
Attorney General, Department of Justice, Washington, D.C.

DEAR MR. ATTORNEY GENERAL: I am writing to strongly urge you to take immediate action to encourage the reclassification of arson as a major crime for the purpose of the FBI's Uniform Crime Reports.

As you are undoubtedly aware, arson is now the nation's fastest growing crime. The crime of arson is responsible for an estimated 1,000 deaths and 10,000 injuries annually. Insurance losses now exceed $3 billion per year. In New York's South Bronx alone 30,000 buildings have been destroyed by arson; these are roughly 3,000 fires per year, 8 per day, and 250 per month. In Ohio, arson has increased by at least 50% over the last two years. These devastating patterns are costing every homeowner and businessman in increased insurance premiums. Arson is also severely hurting the American taxpayer in that it undermines all federal community development and neighborhood revitalization efforts.

The quarterly FBI Crime Reports have become social indicators for the American public. They tell Americans what part 1 crimes are on the increase or decline, what pattern criminal activity is taking and so on. They help mobilize public opinion. They help us determine our crime-fighting priorities and the deployment of our anti-crime resources. Given GAO reports documenting the lack of arson data, rivalry between police and firemen and an overall inadequate uncoordinated federal effort, reclassification of arson is a logical first step to take in mounting an effective attack on what is becoming popularly known as "the easiest crime."

The "official" reasons given for categorizing arson with crimes such as vagrancy, curfew violations and public intoxication are unacceptable. There are supposedly four criteria for inclusion of an offense as a major crime: seriousness, high frequency of occurrence, the existence of uniform local reporting procedures, and the likelihood of the crime being reported to the police. It is clear that the crime of arson satisfies the first two criteria. With regard to the third, proper federal direction and coordination could solve any procedural discrepancies which now exist. As for the fourth, the likelihood of arson "reporting" is in large part predicated on the existence of an effective local arson investigative effort which would be made more likely nationally if arson were given major crime status.

I chaired two days of hearings last December on the arson problem and found the FBI's testimony on this matter unconvincing. Aside from the points mentioned, I also seriously question the overall procedure employed to categorize major crimes. In order to reclassify a crime as "major" an affirmative vote of the International Association of Chiefs of Police is required. It is tragic to note that not a single crime has been added to the major crimes list in 50 years by the police chiefs association despite the development of newer, more sophisticated crimes, changes in frequency and so on. This country has changed greatly since 1928, yet we're still logging crimes under Prohibition-era rules. This is a shocking, misleading practice that lulls the public into believing crime rates are going down even as their cities burn and their insurance rates soar. At a time when the government should be working to build confidence, FBI crime statistics become increasingly suspect. A criminal could steal a car in New York and drive it to New Jersey, and his crime would be noted in the FBI charts. But let that same criminal torch a house or business—causing untold property damage and ruined lives—and his crime of arson will never make the charts. That's a ridiculous situation. We'll never be able to mount an effective anti-arson effort until arson is categorized as a major crime.

The present obsolete procedure invites charges that the FBI and the police chiefs have a vested interest in *not* fully reporting a crime that has grown so tremendously and for which only nine persons are arrested, two convicted and 0.7 incarcerated per every 100 fires characterized as incendiary or suspicious. We have heard charges that if the full extent of arson appeared in the crime reports, the recent pictures of a "stable" or de-

creasing crime rate would be demolished. If these charges are true, this is disgraceful. I urge you to take all possible steps to develop a new, more comprehensive procedure for the collection of national crime statistics as well as immediately taking steps to reclassify arson under current procedures.

I hope that you will act quickly on these recommendations. These changes would provide us with a data base and increased awareness of this serious crime and would undoubtedly have the effect of stimulating law enforcement efforts in combating this crime. I am attaching a list of recent Senate legislative initiatives in this area to demonstrate the strong support that exists in the Senate for such a change. I intend to further explore the issue in some depth in our upcoming hearings on arson in the Permanent Subcommittee on Investigations.

Best regards.

Sincerely,

JOHN GLENN,
U.S. Senator.

Mr. PAUL G. HATFIELD. Mr. President, I move that the Senate agree to the conference report.

The PRESIDING OFFICER. The question is on agreeing to the conference report.

The conference report was agreed to.

Mr. PAUL G. HATFIELD. Mr. President, I move to reconsider the vote by which the conference report was agreed to.

Mr. ROBERT C. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. PROXMIRE. Mr. President, I am still reserving my right to the floor.

The PRESIDING OFFICER. The Senator reserves his right to the floor.

ORDER OF BUSINESS

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent to proceed for not to exceed 1 minute on another matter, the time not to be charged against either side, without prejudice to the Senator from Wisconsin (Mr. PROXMIRE).

The PRESIDING OFFICER. Without objection, it is so ordered.

PAYMENT OF LOSSES FROM TRIS BAN

Mr. ROBERT C. BYRD. Mr. President, I ask that the Chair lay before the Senate a message from the House of Representatives on S. 1503.

The PRESIDING OFFICER laid before the Senate the following message from the House of Representatives:

Resolved, That the bill from the Senate (S. 1503) entitled "An Act to provide for the payment of losses incurred as a result of the ban on the use of the chemical Tris in apparel, fabric, yarn, or fiber, and for other purposes", do pass with the following amendment:

Strike out all after the enacting clause, and insert:

That (a) the Court of Claims shall have jurisdiction to hear, determine, and render judgment upon any claim for losses sustained by any producer, manufacturer, distributor, or retailer of children's sleepwear, or by any producer, converter, manufacturer, distributor, or retailer of fabric, yarn, or fiber contained in or intended for use in children's sleepwear, as a result of the actions taken by the United States under the Federal Hazardous Substances Act on April 8, 1977, and thereafter relating to apparel, fabric, yarn, or fiber containing Tris (2,3-dibromopropyl) phosphate: *Provided, however,* That such children's sleepwear and such fabric, yarn, or fiber contained in or intended for use in children's sleepwear was subject to the requirements of or for use in compliance with the mandatory Federal flammability standard, FF3–71, or FF5–74, at the time of its manufacture.

(b)(1) In determining the validity of any claim under this Act and the amount of the losses sustained for which such a claim is brought, the court shall consider the following factors:

(A) The degree to which reasonable alternatives to Tris (2,3-dibromopropyl) phosphate existed at the time the Federal Government established the applicable mandatory Federal flammability standard referred to in subsection (a).

(B) Whether it would have been feasible, or reasonable, for the claimant to have tested Tris (2,3-dibromopropyl) phosphate for chronic hazards at the time the Federal Government established such flammability standard.

(C) The degree to which the Federal Government, prior to establishing such flammability standard, tested Tris (2,3-dibromopropyl) phosphate for toxicity, or other health hazards, and disseminated the results of these tests.

(D) The degree of good faith demonstrated by a claimant in seeking to comply fully with such Federal flammability standard.

(E) The extent to which a claimant may have relied in good faith on assurances from suppliers that the products containing Tris (2,3-dibromopropyl) phosphate was safe.

(F) The degree to which a claimant acted reasonably in using Tris (2,3-dibromopropyl) phosphate for the time period that such substance was used.

(G) The degree to which a claimant, in good faith, complied with actions taken by the United States under the Federal Hazardous Substances Act on April 8, 1977.

(2) In determining the amount of the losses for which a claim is brought under this Act, the amount of such losses shall not include lost profits, proceeds from distress sales, attorney's fees, or interest on any such loss resulting to any producer, converter, manufacturer, distributor, or retailer of such children's sleepwear, or to any producer or manufacturer of fabric, yarn, or fiber.

(c)(1) The measure of losses for producers or manufacturers of children's sleepwear shall be the cost of producing or manufacturing the sleepwear garment plus the cost of the fabric, yarn, or fiber used for such production or manufacture, held in stock on the date of enactment of this Act, less the fair market value, if any, of the sleepwear garment or the fabric, yarn, or fiber.

If the sleepwear garment or the fabric, yarn, or fiber has been resold after April 8, 1977, but prior to such date of enactment, then the measure of losses shall be the cost of producing or manufacturing the sleepwear garment plus the cost of the fabric, yarn, or fiber less the proceeds from any such sale.

(2) The measure of losses for producers, converters, or manufacturers of fabric, yarn, or fiber shall be the cost of producing, converting, or manufacturing the fabric, yarn, or fiber plus the cost of the raw materials used for such production, converting, or manufacture, held in stock on the date of enactment of this Act, less the fair market value, if any, of the fabric, yarn, or fiber.

If the fabric, yarn, or fiber had been resold after April 8, 1977, but prior to such date of enactment, then the measure of losses shall be the cost of producing, converting, or manufacturing the fabric, yarn, or fiber plus the cost of the raw materials used for such production, converting, or manufacture less the proceeds from any such sale.

(3) The measure of losses for distributors and retailers shall be the distributor's or the retailer's purchase price for goods referred to in paragraphs (1) and (2) of this subsection, held in stock on the date of enactment of this Act, less the fair market value, if any, of such goods and less the amount of any reimbursement received.

(4) In addition to the losses determined under paragraphs (1), (2), and (3) of this subsection, a claimant may also be compensated for unreimbursed costs of transportation paid for the return of such sleepwear garments, fabric, yarn, or fiber.

(d) No claim under this Act may be brought as a class action nor may any claim under this Act be brought by two or more parties unless damages are claimed to be jointly recoverable or are disputed among the parties claimant.

(e) Upon payment of any claim under this Act, by court judgment or by settlement, the United States shall be subrogated to the claimant's rights to recover losses; or assert a claim against any person or organization relating to the subject matter of the claim paid by the United States. The claimant shall execute and deliver instruments and papers and take whatever steps are necessary to secure such rights in the United States in order to be entitled to the entry of a judgment by the Court and payment under this Act, and the failure of the claimant to perform such acts or take such steps shall constitute cause to deny the entry of such judgment and payment. The failure of the claimant to perform such acts or to take such steps shall not limit or adversely affect the right of the United States, to act as subrogee or assignee to the full extent of its payments under this Act. Any purported limitation on the right of the United States to act as assignee or to become subrogated to the rights of a claimant shall be without any effect, to the extent that the United States has made payments under the Act.

(f) Any claim under this Act shall be barred unless commenced within two years after the date of enactment of this Act.

Mr. THURMOND. Mr. President, I rise in support of S. 1503, a bill to provide for the payments of losses incurred as a result of the ban on the use of the chemical Tris in apparel, fabric, yarn, or fiber.

This legislation passed the Senate on January 20, 1978, and was sent to the House. It now returns from the House with amendments. I urge the Senate to concur in the House amendments and approve the bill.

Mr. President, this legislation would give to the Federal Court of Claims jurisdiction to render judgment upon any claim for losses sustained by any producer, processor, or manufacturer of children's sleepwear. The cause of those losses was the ban of Tris by the United States under the Federal Hazardous Substances Act on April 8, 1977. As a result of this ban, the actual losses that were incurred by manufacturers, processors and retailers is estimated to be more than $50 million, although some estimates run even higher.

Mr. President, by way of background, under the authority of the Flammable Fabrics Act, the Department of Commerce issued regulations in 1971 and again in 1974, imposing stringent standards of flammability of children's sleepwear. Nothwithstanding the expressed reservations of industry representatives

regarding potential health hazards, the sudden imposition of those standards necessitated the rapid development and use of flame-retardant chemicals. Tris became the most widely used of such flame-retardants.

However, a new test for mutagenicity was developed in 1976 and indicated that Tris might be toxic. Accordingly, the Consumer Product Safety Commission on April 7, 1977, banned the sale of all children's wearing apparel containing Tris and has ordered the producers of such wearing apparel to "repurchase" it from retailers and consumers.

This legislation would simply confer jurisdiction on the U.S. Court of Claims, to determine the dollar value and render judgment for losses sustained by producers, processors, manufacturers, distributors, or dealers, or other persons, as a result of actions taken by the Federal Government under the Hazardous Substances Act relating to the ban on apparel, fabric, yarn or fiber containing Tris. Lost profits would not be included. There would be a 2-year statute of limitations as provided in the Tort Claims Act. Other protections have been added by both the Senate and House to insure that no one will profit from this legislation.

Unless financial institutions and suppliers are reassured at an early date that apparel manufacturers will be able to meet the repurchase obligation, many more such firms will be forced out of business. This legislation can prevent that from happening.

Mr. President, the inequity involved here is readily apparent. Confidence in Government regulation must be restored in the American business community. I hope and believe that this proposal is one way to reinstill such confidence, and ask my colleagues for their support.

The following Senators are original cosponsors of this bill: Mr. HOLLINGS from South Carolina, Mr. EASTLAND from Mississippi, Mr. HELMS from North Carolina and Mr. TALMADGE from Georgia.

I urge my colleagues to adopt S. 1503, thereby clearing the measure for the President.

● Mr. KENNEDY. Mr. President, with the passage of S. 1503 the Congress takes an important step in rectifying a wrong done to the Nation's clothing manufacturers. This legislation would permit the court of claims to entertain jurisdiction over claims arising out of the manufacture of children's sleepwear containing the chemical Tris. I vigorously supported S. 1503 in the Senate Judiciary Committee and am gratified to learn that the House has similarly acted in providing the possibility of relief to local manufacturers. Although the House bill differs in some respects from the Senate-passed version I see no reason or need for a Senate-House conference; in providing new requirements that petitioners demonstrate loss from the use of Tris, the House bill is an improvement over its Senate counterpart. I therefore join with Senator THURMOND and others in urging Senate adoption of the House bill in its entirety.

The Senate bill was simply an indemnity bill; it permitted a cause of action in the court of claims. The House bill, however, is more of an adversarial bill; it requires that petitioners in the court of claims demonstrate that they acted reasonably in using Tris, that they made reasonable efforts to follow Government directives and guidelines concerning Tris and that they suffered loss as a result. The House bill in effect shifts the burden to the petitioner, where it belongs. In so doing it prevents the possibility of windfall gains for certain manufacturers who did not in fact rely wholly on Government declarations as to the value of Tris.

Mr. President, it is important to point out what S. 1503 does not do. The bill does not allow automatic recovery to those manufacturers who used Tris in the manufacture of sleepwear. It simply permits judicial resolution of the circumstances of each case.

Nor should the bill be viewed as a precedent for other manufacturers who have used other carcinogens (for example saccharin, cyclamates, red dye No. 2) to similarly sue in the court of claims. The Tris situation is unique; by all accounts it is clear that the manufacturers who suffered loss relied completely on Government regulations endorsing the safety and utility of Tris. For that reason I vigorously support this legislation and urge its enactment into law.●

Mr. President, I further ask unanimous consent that the Senate concur in the House amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. THURMOND. Mr. President, I move to reconsider the vote by which the concurrence in the House amendment was agreed to.

Mr. PROXMIRE. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

FULL EMPLOYMENT AND BALANCED GROWTH ACT OF 1978

The Senate continued with the consideration of the bill (H.R. 50).

UP AMENDMENT NO. 2102

(Purpose: To make the reduction of the rates of Federal outlays to the GNP a national economic goal)

Mr. PROXMIRE. Mr. President, I send an amendment to the desk and ask that it be stated.

THE PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from Wisconsin (Mr. PROXMIRE), for himself, Mr. THURMOND, and Mr. GRIFFIN, proposes an unprinted amendment numbered 2102 to amendment No. 2101.

Mr. PROXMIRE. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

At the end of section 2 of the Employment Act of 1946, as amended by section 102, insert the following:

"(—) The Congress further declares that it is the purpose of the Full Employment and Balanced Growth Act of 1978 to rely principally on the private sector to lead the expansion of economic activity and to create new jobs for a growing labor force. Toward this end, the Congress further declares and establishes as a national goal the gradual reduction of the share of an expanding gross national product accounted for by Federal outlays."

In section 3(a)(2)(A) of the Employment Act of 1946, as amended by section 103, after "balanced growth," insert "the reduction of the share of on expanding gross national product accounted for by Federal outlays,".

At the end of section 4(b) of the Employment Act of 1946, as amended by section 104, strike out "and" at the end of the next to last numbered clause and insert "and" at the end of the last clause after the semicolon, and insert immediately below the last clause and above the last sentence the following new clause:

"(3) reducing the share of an expanding gross national product accounted for by Federal outlays to 21 per centum or less in the fiscal year 1981 and 20 per centum or less in the fiscal year 1983 and thereafter: *Provided*, That policies and programs for balancing the budget and for reducing the share accounted for by Federal outlays of an expanding gross national product shall be consistent with the goals and timetables specified in clause (1) of this subsection for the reduction of unemployment in accord with the purpose of encouraging the full use of productive resources.

and insert at the end of subsection (c) the following new paragraph:

"(3) Upon achievement of the 20 per centum goal specified in subsection (b)(A), each succeeeding Economic Report shall have the goal of maintaining the share of an expanding gross national product accounted for by Federal outlays at 20 per centum or less consistent with meeting national needs and priorities, *Provided:* That policies and programs for balancing the Federal budget and for constraining the share accounted for by Federal outlays of an expanding gross national product shall be consistent with the goals and timetables for the reduction of unemployment in accord with the purpose of the Full Employment and Balanced Growth Act of 1978."

Mr. PROXMIRE. Mr. President, this is one of the amendments on which 2 hours is provided, as I understand it, is that correct? This is the so-called GNP or spending amendment.

The PRESIDING OFFICER. The Chair advises that the Senator is correct.

Mr. PROXMIRE. Mr. President, I yield myself such time as I may require.

Mr. President, what this does is to limit the Federal spending in 1981 so it will be reduced to 21 percent of the gross national product, and in 1983 so it will be 20 percent of the gross national product.

So I think all Senators should realize that these are conservative figures, No. 1; and they should also recognize the fact that we have introduced a new element.

Mr. ROBERT C. BYRD. Will the Senator yield?

Mr. PROXMIRE. I yield.

Mr. ROBERT C. BYRD. I am sorry to interrupt.

Mr. President, I ask unanimous consent that the Humphrey-Hawkins bill, H.R. 50, everybody knows what H.R. 50 is, considered as, and is, the unfinished business.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. ROBERT C. BYRD. I thank the Senator for yielding.

The PRESIDING OFFICER. The Senator from Wisconsin.

Mr. PROXMIRE. Mr. President, this amendment provides for a limitation on Federal outlays as a percentage of gross national product.

Now, almost exactly the same amendment, a very similar amendment, was passed by the Senate overwhelmingly 2 or 3 nights ago on the tax bill. That was the Nunn amendment.

The House instructed their conferees to vote for it, by a 2 to 1 margin.

This is a more moderate amendment than that was, as I will point out shortly.

Mr. President, I want to point out that this amendment provides that these spending restrictions will apply in an expanding gross national product.

I will read that part in the amendment. It says:

The Congress further declares and establishes as a national goal the gradual reduction of the share of an expanding gross national product accounted for by Federal outlays.

Further down in the amendment it provides:

The Employment Act of 1946, as amended by section 103, after "balanced growth," insert "the reduction of the share of an expanding gross national product."

Mr. President, the reason I stress expanding is that it would be economically counterproductive to provide a reduction in spending if we were in a recession, and the hold-down on spending I have suggested here recognizes the fact that we should apply that limitation on spending in such a way as to not impede our progress toward reducing unemployment.

Mr. President, the past 20 years has been a gradual and continued shift in the share of economic activities accounted for between private and public sector. I think few people realize that as recently as the late 1960's, only 18 percent of our GNP was accounted for by Federal spending.

The fact is that throughout the decade of the 1960's it was far below what it is now.

For instance, in 1959 it was 19.5 percent, 1960 it was 18.5 percent. 1961, it was 19.2 percent. In 1962, it was 19.5 percent. In 1963, it was 19.3 percent; and 19.2 percent; and so on. As recently as 1974 it was 19.8 percent.

So what I am talking about is a real figure, I would get down to 21 percent in 3 years, in 1981.

Furthermore, Mr. President, this is precisely what President Carter has indicated in his target.

He says we should get Federal spending as a proportion of the GNP to 21 percent by 1981.

Furthermore, he says we can get it down to 19.1 percent, which is substantially below what I am proposing here as a goal, by 1983.

So on the basis of our historic experience, on the basis of the assertion by President Carter, this is a moderate, limited goal.

Mr. President, if inflation is to be restrained, the Congress just has to find the discipline to reduce expenditures.

If spending is brought under better control, the Federal Government will become less prominent as a borrower in the credit markets, and that would have two beneficial effects. First, more credit would become available to other sectors of the economy, such as housing and business. Second, the Federal Reserve would have an easier time controlling the growth of money and credit.

I point out, Mr. President, that the present chairman of the Federal Reserve Board has urged that we adopt this kind of amendment. In a recent statement, he said that he thought we could reduce the shares well within the goals specified in this amendment.

People might say, "Well, we offered a similar amendment on the tax bill. Why do we have to have it on the Humphrey-Hawkins bill?"

After all, the purpose of the Humphrey-Hawkins bill is to commit this country to a job for every American, eventually, and to a very low level of unemployment. This is precisely why we need a balanced economic policy.

This is not simply an unemployment bill, although that is the highest priority, and it should have the highest priority. This is the most important economic policy statement that Congress will have made since 1946, when we adopted the Employment Act of 1946.

We should recognize that we have experienced in the past 5 or 6 years an inflation such as this country had not suffered in peacetime before. Even in 1946, when inflation was a far less urgent issue, we specified in that Employment Act that there should be price stability as well as maximum employment and minimum unemployment. So it was a symmetrical act.

Now I am saying, as we amend the Employment Act of 1946 and provide for the kind of economic policy we should follow over the next 5 years, that we should recognize that inflation continues to be a vital issue, and all indications are that the overwhelming majority of American people say it is the No. 1 issue facing this country.

I got a questionnaire back from 10,000 Wisconsin constituents which indicated that they thought inflation was the No. 1 issue; 91 percent said they thought it was the No. 1 issue. The second issue, incidentally, was crime; and unemployment was far down the line—a tiny percentage of those who thought inflation was No. 1.

Obviously, if we are going to combat inflation, we have to do our best to hold down Government spending.

As I say, this is an amendment that allows the President the flexibility to recommend modifications of the goal timetable for reducing outlays as a percentage of GNP, in the same manner he can recommend modification of the employment goal timetable.

Mr. President, this amendment was offered in the Senate Banking, Housing, and Urban Affairs Committee, and it was adopted by a majority of the committee, a bipartisan majority. I think it is an amendment which is realistic. It is an amendment which is based on our historic experience. It is an amendment which squares right on with what President Carter states are his goals. It is an amendment which has been affirmed, in effect, by the Senate as recently as 3 or 4 days ago. It is an amendment which certainly should be considered at a time when we are changing the fundamental economic policy of this country by modifying the most important provision we have in the law with respect to economic policy—to wit, the Employment Act of 1946—and it would do so in a way that does not walk away from the inflation standards we established in 1946, but maintains them on the same basis. That is what this amendment does.

It is to provide that we will achieve a low level of unemployment, which I support enthusiastically. But then to ignore the effect of Federal spending, which is going to have a disrupting effect in the private sector, I think is wrong.

One other point occurs to me, and I call it to the attention of the Presiding Officer, the Senator from Michigan (Mr. RIEGLE). He said that the great genius of this bill is that it is one that asks the private sector to do the job. We have taken the public sector out of it, and I think that is right. The private sector must do the job.

I say to the distinguished Presiding Officer that this amendment would assure that the responsibility would be in the private sector. We modestly, moderately, gently reduce the share of the Federal Government in the GNP in an expanding economy and leave the responsibility where it belongs—in the private sector.

Mr. HARRY F. BYRD, JR. Mr. President, will the Senator yield?

Mr. PROXMIRE. I yield

Mr. HARRY F. BYRD, JR. How does the legislation before the Senate accomplish the objective of having the unemployment rate reduced by the private sector? What is in this bill that does that?

Mr. PROXMIRE. What is in the bill that does that is, in the first place, that it sets the goal. In the second place, it calls on the President to come forward in his economic report annually with policies that will achieve the goal.

We have taken out of the bill the fact that the Government is the employer of last resort. If the President is to do this, he has to do it with a tax policy that would encourage and stimulate activity in the private sector. In my judgment, he can do that as easily and effectively with a stimulated tax policy.

We also provide that the Federal Reserve Board's monetary policy shall be keyed to achieve the objectives of this measure. Obviously, a monetary policy that stimulates the economy through moderating insurance rates and making credit easier is going to stimulate the private sector, as distinguished from the public sector.

The act does not specify specific policies and call for appropriations and that kind of thing. It sets broad, general goals, and it calls on the President and Congress to try to adopt policies—as I say, particularly tax policies and monegoals.

tary policies—that will achieve those

Mr. HARRY F. BYRD, JR. The Pres-

ident has been opposed to tax policies that would accomplish that result.

Mr. PROXMIRE. I do not think so. I think President Carter has been very interested in reducing taxes, although we may dispute that.

Whether this President does or not, what this amendment does is to call on the President to achieve a low level of unemployment. Obviously, he can only achieve that in an expanding economy.

Mr. HARRY F. BYRD, JR. He can achieve it by advocating more Government programs, and that is what is going to happen.

Mr. PROXMIRE. That may happen, and that is one reason why this amendment would be a salutary amendment. It would prevent simply trying to solve the problem by having the Federal Government employ more people.

Mr. HARRY F. BYRD, JR. I support the amendment. I am sure it is a sound amendment. I am not sure the bill is a sound bill. I think this will do exactly what Congress and this Government have been doing the last 30 years—try to settle all our problems by spending more money; and the more we do that, the worse off we all are.

Mr. PROXMIRE. I am delighted that the Senator makes that point, because that is precisely what this amendment is addressed to. Without this amendment, I think the Senator might have a very strong point. With the amendment, however, at least it provides the limitation which would encourage the President to concentrate on expanding the economy in the private sector.

Mr. HARRY F. BYRD, JR. I support the amendment. My impression of the bill is this: Less than a half-hour ago, I queried both Senators from Wisconsin with regard to this bill, and I was informed that this bill is virtually the same as the two bills—one which came from the Human Resources Committee and one which came from the Banking Committee—and this bill is sort of an amalgamation of the two.

When the majority leader introduced the bill we are working on now, he said it is vastly different from the other two bills.

Mr. PROXMIRE. Let me try to reconcile those two apparently disparate views.

The amendment is similar so far as most of what it says is concerned. But on the important issues, the fundamental issues, such as the inflation issue and the monetary policy issue, both of which are vital and central, this bill did modify the Human Resources Committee bill.

Mr. HARRY F. BYRD, JR. I do not know who is right or who is wrong. All I know is that the majority leader said that this is vastly different from either S. 50 or H.R. 50.

Mr. PROXMIRE. I believe the majority leader was referring to the House bill, H.R. 50.

Mr. HARRY F. BYRD, JR. He said it was vastly different from the legislation that previously had been before the Senate, that had been considered by the Senate.

We have very little time to consider a bill of this magnitude. The text of the bill is not even available yet. One of the members of the ad hoc committee gave the Senator from Virginia the text, and I understand it is now being xeroxed. So eventually we will have some xerox copies here, less than 24 hours before we adjourn sine die.

Mr. PROXMIRE. I appreciate the observations of the Senator from Virginia, but I do have a limited amount of time, and I will have to reserve the remainder of my time.

Mr. President, I ask unanimous consent that the names of Senator NUNN and Senator BELLMON be added as cosponsors of my amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. PROXMIRE. They sponsored a similar amendment the other night, and they wanted to sponsor this one.

Mr. President, I reserve the remainder of my time and yield the floor.

The PRESIDING OFFICER. Who yields time?

Mr. MUSKIE addressed the Chair.

Mr. PROXMIRE. Who yields time to the Senator from Maine?

Mr. NELSON. Mr. President, how much time do we have on our side?

The PRESIDING OFFICER. The time has been divided. There is 1 hour to each side.

Mr. NELSON. How much time does the Senator from Maine desire?

Mr. MUSKIE. Ten minutes.

Mr. NELSON. I yield 10 minutes to the Senator from Maine.

The PRESIDING OFFICER. The Senator from Maine is recognized for 10 minutes.

Mr. MUSKIE. Mr. President, I have not seen the language of this amendment so I hope I do not find myself guilty of misstating it, but as I understand it what it does are these things:

One, it establishes a national goal of gradual reduction in the share of gross national product accounted for by Government outlays. That goal has been the stated objective of the Senate Budget Committee for all of the years that the Budget Committee has been in existence, and our most recent statement of that objective was 19.9 percent by 1983. But may I suggest, Mr. President, that it is one thing to state that as the objective of a process that we have in place and another thing to try in 1978 to pinpoint the precise date when you can achieve a precise share, for reasons that I will try to get into.

I have these same reservations about trying to pick the precise date when we can achieve a precise numerical inflation rate or the precise date when we can achieve a precise unemployment rate.

I will never forget the first year that the budget process was in existence. We were created in August 1974. The new President, President Ford, at that time assembled an economic conference and he declared that in the next fiscal year we were to achieve a balanced budget. In the fiscal year just ended we had come very close to achieving a balanced budget. So he declared in August or September of that year we would achieve a balanced budget in the next fiscal year. So come January what had happened? The bottom had fallen out of the economy and the unemployment rate was flirting with 10 percent. Within a period of months the Nation's GNP had declined sharply. Inflation, of course, was out of control with the rest of it.

Mr. PROXMIRE. Mr. President, will the Senator yield on that point?

Mr. MUSKIE. I wish to finish and then I will yield. I wish to finish my point.

So within a matter of less than 6 months the President's optimistic guesses as to what would happen just went out the window. They were no longer relevant and he was projecting not a balanced budget for the next fiscal year but a budget deficit of $50 billion. With that kind of drop of GNP the Government share of GNP rose precipitately to something like 23 percent.

Then I have this year's experience in mind. In January of this year the President projected a budget deficit of $60 billion, outlays of $500 billion, and budget authority of about $570 billion. This was just a few months ago.

So that was his recommendation in light of his assumptions about the performance of the economy of this year and next year. So what happened? Congress has just completed the Second Budget Resolution in which the deficit has been reduced to $38.8 billion, in which outlays have been cut by $12.7 billion, and in which budget authority has been cut by $12.5 billion. The unemployment rate has dropped below what we projected in January. So the picture is rosier than we expected just a few months ago. So now we are in the process of predicting not a few months ahead but a few years ahead as to precisely what we expect to achieve by a certain date.

Second, this amendment requires the President each year to set 5-year goals for the share of GNP accounted for by Government outlays. The amendment specifies that those goals should be 21 percent or less by 1981, 20 percent or less by 1983 and thereafter. That 20 percent compares with a Budget Committee projection for 1983 of 19.9 percent, and we also projected figures for 1979, 1980, 1981, and 1982.

So we have 5-year projections in this year's Senate Budget Committee report, and they are not inconsistent with those that the amendment of the distinguished Senator from Wisconsin, I gather, would mandate by law.

Now, what troubles me about putting these fixed numbers in the budget resolution, and we would have to if we disagreed because of changes in economic conditions, we whould have to put fixed numbers here; then those numbers would be subject to debate in the Chamber. What would be the response? I can just hear it because I have been presiding over this process for 4 years. Senators will be competing with each other to add a number to the budget resolution that was the most politically attractive one they could get, whether or not it made economic sense at all in the economic climate of the day in which that number would be subject to debate in the Chamber.

It is argued that this amendment is consistent with the administration's

position. The President has set a goal of reducing the Federal share of GNP to 21 percent by 1981. The President has not set any other GNP share goals. The sponsors of this amendment derive the 20 percent goal for 1983 from the President's budget by calculating the share based on out-year estimates for outlays and GNP, but those outlay estimates are current services, not policy base budget estimates. The GNP figures are assumptions not forecasts. Therefore, the 20 percent share calculated by the sponsors is not an administration forecast of where the economy is likely to be or where the administration would like it to be.

In short, the administration has no goal of a 20-percent GNP share by 1983, and has the same reservations about stating a formal goal in the statute this far in advance that I have, and I have the same commitment——

Mr. PROXMIRE. Mr. President, will the Senator yield?

Mr. MUSKIE. I have the same commitment to that goal and to that trend in budget-making that the Senator from Wisconsin has.

I share the goal of 4 percent unemployment. I share the goal of 3 percent to 0 inflation, but I have had to live with the reality of trying to accommodate what we do with the Federal budget to changing pictures of the state of the economy.

I have rarely found an economist who boasts about his forecasts of a year ago. But they are always certain about what is going to happen a year ahead of us, and that is what I find difficulty with in all of these proposals to put the specific numbers and specific years into a piece of legislation.

I had the same difficulty with the Nunn-Bellmon-Roth-Chiles amendment to the tax bill. To pretend, after the experience I have had that you can, in effect, write a congressional budget resolution for 4 or 5 years in advance is simply unreal, and it raises expectations that can only lead to further distrust of Government if the expectations are not met.

Mr. PROXMIRE. Mr. President, will the Senator yield?

Mr. MUSKIE. We have a process for achieving exactly what this amendment and the other amendments are talking about, and we have made it clear that those are the trends we are seeking to achieve.

But when you tie our hands and put us on the defensive, when economic circumstances over which we have no control arise, then I have serious questions about that.

Yes, I yield to the Senator.

The PRESIDING OFFICER (Mr. ABOUREZK). The time of the Senator from Maine has expired.

Mr. PROXMIRE. I yield myself 5 minutes.

The PRESIDING OFFICER. The Sentor from Wisconsin.

Mr. PROXMIRE. The Senator knows how highly I respect him and how much I admire the remarkable job he has done in the Budget Committee, and I would vote against my own amendment if it tied his hands and if he convinced me that it did, and I would do so. But I think this is a very flexible amendment.

In the first place, the Banking Committee, in acting on this amendment, said the following:

> The Banking Committee recognized in adopting this amendment to reduce Federal outlays as a percentage of GNP that the goal would have to be flexible, especially in cases of national emergency or other type of cataclysmic event. It was agreed that if the goal becomes counterproductive such as might happen during the time of a national emergency then it certainly would not and should not be followed.

Here is what we have done to write that into the language of the statute. We provide—if the Senator has a copy of the amendment——

Mr. MUSKIE. I do not have it.

Mr. PROXMIRE. I apologize. I thought the Senator had that in his hands. On page 2, halfway down, subsection 3, we say:

> Reducing the share of an expanding gross national product accounted for by Federal outlays to 21 per centum or less in the fiscal year 1981 and 20 per centum or less in the fiscal year 1983 and thereafter: *Provided*, That policies and programs for balancing the budget and for reducing the share accounted for by Federal outlays of an expanding gross national product shall be consistent with the goals and timetables specified in clause (1) of this subsection for the reduction of unemployment in accord with the purpose of encouraging the full use of productive resources.

That makes the reduction of spending as a percentage of GNP subordinate to the unemployment goal.

Furthermore, we provide in the bill itself that the President can change the timetables, and there is no veto on the part of the Congress, if he thinks he is unrealistic.

So we accommodate to the fact that we know this is an economy in which we can go into a recession, we know it would be counterproductive to try to achieve this, the objective in this amendment, in the event of a recession, if it cannot be done or if they tried to do it and it would be very damaging and greatly increase unemployment.

We subordinate that to the unemployment objective which is the fundamental purpose of the Humphrey-Hawkins bill and, furthermore, I might say to my good friend from Maine that any objection here would lie also to an objection to our trying to achieve the inflation goal and the unemployment goal by 1983. They also are specific, only the unemployment goal is given priority, and I think should be.

Mr. MUSKIE. Was that a question?

Mr. PROXMIRE. On my time I was making a statement, and I was responding to my good friend from Maine.

Mr. MUSKIE. I take it the Senator would like me to respond to that?

Mr. PROXMIRE. All right, go ahead.

Mr. President, will the Senator from Wisconsin (Mr. NELSON) yield the time?

Mr. MUSKIE. I do not want to use up all the Senator's time.

Mr. NELSON. No. What time does the Senator want?

Mr. PROXMIRE. I reserve the remainder of my time.

Mr. MUSKIE. Why does not the Senator reserve the remainder of his time, and if he has time to give me later, some more time toward the end of the debate on this amendment, I will be glad to respond to the Senator from Wisconsin's amendment. But half an hour is a short time.

Mr. NELSON. The Senator from Wisconsin has 50 minutes. The distinguished Senator from New York would desire time. Will the distinguished Senator from Maryland desire some time out of the 50 minutes?

Mr. SARBANES. At some point.

Mr. NELSON. Would the distinguished Senator from Minnesota desire some time?

Mrs. HUMPHREY. No.

Mr. NELSON. I yield 5 minutes to the distinguished Senator from Michigan (Mr. RIEGLE).

Mr. RIEGLE. I thank the Senator for yielding.

Let me direct a question to my friend, the Senator from Wisconsin, the author of the amendment, if I could just have his attention.

When the Senator says "expanding gross national product" the thing that troubles me is that it is not very precise. What do we mean by expanding—to what extent? What if the gross national product year to year is greater, say, by $100 million or one-tenth of 1 percent or some very small fractional amount but, in fact, the economy in reality is essentially standing still? How does the Senator define "expanding"?

Mr. PROXMIRE. Well, it is obviously up to the judgment of the President.

The Senator from Michigan makes a very good point. You can have an expanding economy, as we have had in past years, where it has expanded 2 percent or 3 percent or less than 3 percent, I should say, and unemployment has increased.

Obviously, when you have that kind of a situation it would be wrong not to permit the Federal Government to meet the needs of the unemployed, and you cannot do that with a declining share of the gross national product.

But I would point out to the Senator that in most of the past 30 years, we have had periods of expansion of better than 3 percent, often at better than 4 percent, and during those periods the amendment would have full force.

Mr. RIEGLE. Would the Senator have any objection to saying that? Would the Senator have any objection to saying expanding at a rate of 3 percent or more so that we do not get caught in this bind where we actually have——

Mr. PROXMIRE. I respect very much the Senator from Michigan, and that certainly is my intent, but I think if I tried to put in 3 percent or 2.5 percent, 4 per-

cent—I think we are making history now, and as the author of the amendment I would certainly feel we should recognize that you can have a growth recession. We have had it in the past, we have had stagnation. What I am talking about here is an economy that expands at a rate which is sufficent to keep unemployment level or reduce it.

Mr. RIEGLE. Is the Senator talking in terms of real expansion, in other words, better than inflation? The Senator is just not talking here about——

Mr. PROXMIRE. Oh, absolutely real terms, no question about it. Yes, indeed.

Mr. RIEGLE. What if we said—if the figure of 3 percent is what you really basically have in mind or something greater than that, what if we said "strongly expanded?"

Mr. PROXMIRE. Well, I think it is best under these circumstances to leave it up to the President of the United States. I thing it is clear that the President would understand that in a year like 1960 or 1961 when we had 2.3, 2.5, certainly in a year like 1970 when we had a declining real gross national product, we would need not apply this.

Mr. RIEGLE. Just in terms of the legislative history when it is fair to say that the intent that the Senator has here would be of real growth, something on the order of 3 percent or greater when the Senator says "expanding economy?" Is that a fair summary?

Mr. PROXMIRE. The Senator is correct.

Mr. RIEGLE. If I may, let me just quickly ask one other question. I notice at the end of the Senator's amendment he says in the last three lines, "shall be consistent with the goals and timetables for the reduction of unemployment in accord with purposes" of the remainder of this act.

Now that is different language, I might say, than we find on page 120 of the bill where we say in that area where we are talking about the inflation rate, we use as a conditioner, we use this language "shall be designed so as not to impede achievement" of the goals and timetables specified earlier on. That makes a reference, of course, to the unemployment goal.

I am wondering if the Senator would not be just satisfied with using that language which would keep us consistent and substitute it so that at the end of the Senator's amendment we would be saying, "shall be designed so as not to impede achievement of the goals," rather than to say "shall be consistent with."?

Do you have any problem with that change? I would agree that is a minor change, but I think it is important in terms of making clear the primacy of the unemployment goal here.

Mr. PROXMIRE. Well, I appreciate the Senator's suggestion. The Senator from Michigan has given this matter a great deal of attention, and I will be delighted to consider it, and may modify my amendment a little later. The yeas and nays have not been ordered, so I am free to do so. But I would like to have staff get into that, and find out what the total implications are, and why we put in "consistent with" instead of the language the Senator from Michigan suggests.

What he suggests certainly reflects my intentions, but there may be a reason why we did modify this language.

Mr. RIEGLE. I appreciate that. I think it is important that we stick with the language we were using earlier on. I do not think we should use two sets of language to make the same points, and I thought perhaps we could use that earlier language I suggested.

The PRESIDING OFFICER. The Senator from Michigan's 5 minutes have expired.

Mr. PROXMIRE. Mr. President, I yield the Senator from Indiana 10 minutes of my time on the bill.

(Mr. JOHNSTON assumed the chair.)

Mr. LUGAR. I thank the Senator from Wisconsin.

Mr. President, the amendment offered by the Senator from Wisconsin is one of three goals that we have been considering during the recent deliberations on the Humphrey-Hawkins bill. The three goals are those of reducing unemployment, limiting Federal spending, and limiting inflation in our country.

I make this point, Mr. President, because as the Humphrey-Hawkins legislation began its evolution, its basic thrust was clearly to reduce unemployment. This remains the basic, underlying thought of this legislation. I do not think this oversimplifies the matter; I think many of my colleagues will agree that this remains our basic aim.

The legislation we are taking a look at today aims at zero unemployment in our country—zero in the sense that ideally every individual man and woman, would find work in this country, that everyone who is looking for work will find a job.

Our goal ought not to be 3 percent unemployment or 4 percent, or 5 or 6 percent; it ought to be zero percent unemployment, with everyone who is voluntarily looking for work finding it.

Why, then, would we vote explicit goals such as 3 percent or 4 percent at this point? Because we recognize that there are, in our economy, a good many men and women who are not voluntarily looking for work from day to day. Sometimes economists call this fictional unemployment; others call it voluntary unemployment. Economists estimate that at least 3 percent of our population is in this category; and the basic thrust of the Humphrey-Hawkins legislation has been to recognize that, after subtracting the 3 to 4 percent, we are looking for conditions in which every American can be employed.

Why state it at 3 percent or 4 percent? And why put a year on the process at all? Why not legislate that we are for zero percent unemployment as soon as practicable or feasible, or when it works out best? Some have said that the Full Employment Act of 1949 gives a mandate in that direction, and that that ought to be good enough for us. Essentially, Mr. President, we are debating today whether we should be explicit about our goals. Many of us believe we should be specific. But, there are two other aspects to this question.

First, we must deal with the level of Federal spending that will help to bring about conditions of full employment. Second, we must help to bring about these conditions in such a way that inflation will not erode the value of the wages of men and women who do obtain jobs. All of these goals must be considered together, or we are indeed involved in a hoax. In a country in which full employment is sought, but inflation is rampant and Federal spending is out of bounds, the odds of obtaining full employment are nil. One can have the goal, but one will not attain it.

Mr. President, the spending situation we are looking at in this amendment is one that is important to consider carefully, because there are strong emotions about this. I am aware, Mr. President, that there are many well-meaning people in this country, who are opposed to explicit limits on Federal spending. I have heard this sentiment expressed by members of organized labor unions as well as by the leadership of the unions. I have heard from members of the Black Caucus as well as black citizens not affiliated with any group, who say simply that they are afraid of spending limitations. They are afraid that in some way limitations will frustrate potential programs for social good in the future, and specifically that limitations on Federal spending will threaten the creation of new jobs. They are frightened that the unemployment goal will be undermined by an explicit spending limitation.

Mr. President, it is possible to understand the fears of these people without agreeing with them about the causes or the remedies of unemployment. At this point, we need limits on Federal spending precisely in order to encourage a dynamic economy in which the gross national product grows, and grows quickly. It is a percentage of that growth that must provide the margin for additional social programs. If we do not have growth, then we are going to be strapped, Mr. President, with regard to all of the real or implied promises we make here. So it is important to say that we are today undertaking a package which we believe will lead to a stronger economy for our country, which will sustain more jobs, higher wages, real value, lower inflation, and higher productivity. These are not contradictory goals; they are all necessary and mutually supporting goals.

Mr. President, either we define these goals clearly and specifically, or we allow them to remain vague hopes, little likely to be attained because little well understood. If we are serious about looking at our economy on a coordinated basis, and most of us are who support this legislation, then we ought to have well-defined goals.

We ought not to approach these important aspects of the health of our

economy in an ad hoc fashion, one bill at a time, one day at a time. It is the entire thrust, the coordination, the leadership possibilities in this comprehensive legislation which are appealing. In my judgment, Mr. President, if we have goals that the President must adhere to, we will have something in this bill.

Therefore, I support the amendment proposed by the Senator from Wisconsin (Mr. PROXMIRE) and hope that we shall retain explicit goals in this legislation.

The PRESIDING OFFICER. Who yields time?

Mr. PROXMIRE. Mr. President, I yield 10 minutes to the Senator from Utah.

Mr. HATCH. Before I get into the amendment I want to pay my respects to Senator PROXMIRE and the members of the Banking Committee for coming up with what I think is a very good amendment to this House bill; also, for the work that Senator PROXMIRE, Senator WILLIAMS, Senator NELSON, and others have done to try to reach a good resolution of this bill and getting a final vote so that the folks who have anguished so much over this bill may have the opportunity of having it if a majority of the Senators in the Chamber feel so on this particular bill.

I will be very grieved, after working as hard as we have worked to make this an acceptable bill to both sides, if the Proxmire amendment is not passed.

There is no question that it is an important amendment.

The amendment would establish a national goal of gradual reduction in the share of gross national product accounted for by Government outlays. It would require the President each year to set 5-year goals for the share of GNP accounted for by Government outlays, and it specifies that the goals for the gross national product share would be: No. 1, 21 percent or less by 1981; No. 2, 20 percent or less by 1983, and thereafter. I think this amendment fits all of the guidelines laid down by our President, Jimmy Carter, and the administration's position, because the President has set a goal of reducing the Federal share of GNP to 21 percent by 1981. That is precisely the goal here.

I can say this, that I have not seen any other gross national product share goals. As a matter of fact, it is my understanding that the sponsors of this amendment derived the 20-percent goal for 1983 from the President's budget by calculating the share based on one year estimates for outlays in gross national product. The outlay estimates are current services, not policy-based budget estimates. The gross national product figures are assumptions, not forecasts. Therefore, the 20-percent share calculated by the sponsors is not an administration forecast of where the economy is likely to be or where the administration would like it to be.

Therefore, I think we can all say that, assertions to the contrary notwithstanding, the administration has no goal of a 20-percent GNP share by 1983 and does not support formal or informal establishment of such a goal.

I do think this: I agree with the distinguished Senator from Indiana, and I would like to associate myself with his remarks. What we need in order to solve our inflation and other problems, including unemployment, is a dynamic, not a static, economy. There are those who subscribe to the Keynesian theory of economics, and it does work during the period of tight money and no inflation. But these theories of spending our way to prosperity, spending our way out of a slump, and deficit financing, do not seem to work during these periods of runaway inflation and loose money which are afflicting us today and buffeting us between stagnation and inflation.

Therefore, many of the Keynesianists believe, and they project in almost all economic projections, on the basis of a static economy, and I think all administration economists are guilty of this.

We have programs which will have to lead us to a dynamic economy where we can outproduce inflation. I think that is the only way we will solve these problems.

This goal recognizes, it seems to me, that if we will put the incentives in the private sector where they belong and strive for a dynamic economy, the 21 percent of the gross national product by 1981 would be a whopping amount of dough, and 20 percent by 1983 and thereafter in a dynamic economy would be more than adequate to solve the problems of the Federal Government.

So I support this amendment and thank the distinguished Senator, the chairman of the Banking Committee, and others, who have worked so hard to come up with what I think is a very important amendment. I hope the Senate will support it here today.

The PRESIDING OFFICER. The Senator from Wisconsin.

Mr. NELSON. I yield 10 minutes to the distinguished Senator from New York (Mr. MOYNIHAN).

The PRESIDING OFFICER. The Senator from New York.

Mr. MOYNIHAN. I thank the Senator for yielding.

Mr. President, it has never been my experience to rise in the Senate at a time when it seems so clear that a profound choice of directions is being taken in American government.

It is part of the retrospective ratification of most events in one's own mind that most things that happen seem natural, as if they were inevitable and were going to happen all along. I suggest that what may happen today was not going to happen all along. We approach the moment of final enactment of the symbol of commitment to the goals of common provision which were set forth by Franklin D. Roosevelt, and which were almost enacted in the Employment Act of 1946, about which there is considerable literature already. (That bill was originally called the Full Employment Act of 1946, but committed the Nation to seeking goals rather than actually establishing them.) Then for a good generation of politics the notion persisted, how could we bring about the political consensus that would finally implement what almost happened in 1946?

It emerged, at the end of a great rising crescendo in the Congress of political activism and of social commitment, in the Humphrey-Hawkins bill. And yet I see before us the possibility, at just this culminating moment when the Humphrey-Hawkins bill might be adopted, to see that bill transmuted into the very opposite of the purposes for which it is intended.

I mean no jest, and obviously it is a statement of respect for all involved, that in the lobbies this is already being referred to as the Humphrey-Hawkins-Hatch bill.

The essence of it is that this document, which is meant to assert a commitment to fulfilling the goals of full employment and a decent provision, should have at its heart two profoundly constrictive proposals, the first of which is the one I am discussing just now.

May I first say, as one shall have to say continuously in these debates, that I do not think the Federal proportion or the public sector of the GNP should indefinitely expand.

Four years ago, I was a member of a commission which then Governor Rockefeller established, called the Commission on Critical Choices for Americans, and was asked to write a paper on the quality of life. I said it seemed to me there were two critical choices Americans had to face concerning the quality of life for the years ahead. The first was how much government did we want; the second was how much growth did we want.

I said that for almost a generation we have consistently opted for more government and less growth and that, clearly, there would come a time when that would be a very self-defeating pattern.

We must recognize the ceiling effects which are already encountering—and I have, more than once on this floor, referred to the fact that the President, in his Economic Report, for the first time this year, spoke of holding the Federal sector to a limited proportion of GNP. He suggested that we reduce it to 21 percent from the present figure. That is one thing. But to build this into legislational which nominally has the purpose of expanding of social commitments to Americans who need them most, seems to me to be a travesty that verges on the perverse. What a symbol—to have taken the bill that was to culminate in an era of expanding social concern in America and to transform it into the beginning of the long march away from those commitments.

I should like to make one point about the Federal budget as a proportion of gross national product. It has grown somewhat over the postwar period, but not much—and certainly not so much as some would have us believe. In 1958, the Federal outlays were 18-plus percent of gross national product. Last year it was 22-plus percent. In a full political gener-

ation, from the time of Eisenhower to the time of Carter, we have added 4.1 percentage points to that proportion. This can hardly be called a wild increase in growth.

What does that represent? Does that represent expanding government? First of all, it does not represent an expansion of defense spending at all. In terms of constant dollars, our proportion of defense expenditures today is almost exactly what it was in 1958. The great fourfold increase in our expenditure has come in transfer payments, principally those to individuals.

The proportion of GNP of the Federal Government outlays largely reflects the the growing service component of the American economy.

I should like to repeat that in the hope that, somewhere, it might be recorded that such a thing was said during this debate.

Over the past 30 years, what has most characterized the American economy is a huge increase in what might be called its service component, and a steady decline in older sectors of production: mining, manufacturing, agriculture, et cetera. The number of white collar workers long ago surpassed that of the blue collar workers. We scarcely can remember a time—not 40 years ago—when there were more than a million coal miners in America. There are now about a quarter of a million. The whole realm of service has grown because its growth is economically sound. It was a sector of the modern economy that was waiting for technology and that has expanded—the computer and the electric typewriter being only the most recent examples and symbols.

I should like to say that the expansion of public outlays in the Federal budget as a proportion of GNP in part simply parallels the expansion of the service sector and the information sectors of the private economy. It lags it, in actual fact, but the Federal Government provides the same kinds of services, the software kinds of services, we associate with that phenomenon in the private sector.

To see that expansion as a symbol of how Government is getting too big or going wrong is not to understand the sources of growth in the modern economy.

Now, mind you, what I have said is subject to an analysis of the actual components the growth in the Federal sector is made up of, but I think you will find it is made up in considerable portion of that kind of service function, which contributes significantly to economic growth. If we artificially restrain and restrict this sector, as we did the other night in the Nunn-Chiles amendment, and as we are as likely as not to do this afternoon in Senator PROXMIRE's amendment, then, far from being a bill to expand growth, this will be a bill for decline; far from being a bill for full employment, it will be a bill for creating a permanent condition of the underutilization of our work force and our capital plant.

Mr. President, these are strange times. I thank the Senators for their courteous attention.

Mr. JAVITS. Mr. President, I yield myself 10 minutes in opposition to the amendment.

No one knows better than I how popular is this idea. When one speaks of the proposition 13 concept, this is what it is: fixing numerical limits on the theory that by some legerdemain, if the limit is fixed, it will just be self-executing.

Nothing could be farther from the truth. A numerical limit like this is just as likely to be a noose around our necks. The mere fact that this is a bill for planning, essentially, all the way, what it will do is make us break the very ideas which we are undertaking to carry through in good faith. It is really self-defeating in terms of our purpose, because there is no way that we can predict our own situation so that it is compatible with what we here outline.

I say that because the committee which offered this idea itself says that. In their report on this bill, the Banking Committee says—this is Full Employment and Balanced Growth Act of 1977, Committee on Banking, S. 50. It is their report, which was issued when they reported that bill, which is the essence of what we are debating. On page 105, they say:

It was agreed that if the goal—

That is this goal as to the percentage of GNP in Federal expenditures:

It was agreed that if the goal becomes counterproductive such as might happen during the time of a national emergency then it certainly would not and should not be followed.

They say that themselves.

Next point: They say themselves, in defining what is a balanced Federal budget—and by the way, those commitments are here, too: A balanced Federal budget and a reduction of inflation to 3 percent by 1983 and to zero percent by 1988. That will take more than this limitation on what you spend on the gross national product, except that in the interim, until 1983 or until 1988, you have the flexibility to deal with whatever faces you; whereas, if you tie this around your neck, you are bound to violate it if there is any difficulty.

Let me read to the Senate what the committee itself says about what they mean by a balanced Federal budget. At page 104 of the same report:

Moreover, flexibility is given to the President to modify the balanced budget goal if it becomes a matter of necessity to do so. The Banking Committee recognized that a balanced budget may be counterproductive at times; for example, during periods of recession or at times of national emergency, such as when there is a need for new and expanded military expenditures. The Banking Committee agreed that in times of national emergency, such as wars or other events, there may be good reason for the balanced budget goal to be set aside temporarily.

That is a much more religiously held doctrine, the balanced budget.

Finally, Mr. President, the Congressional Budget Office picked this up right away. In a letter to GUS HAWKINS, the HAWKINS of this particular bill, the Humphrey-Hawkins bill, dated August 21, 1978, it deals with this very situation.

This is what the Budget Office under Robert A. Levine, Deputy Director, said in the letter to HAWKINS:

As you requested, we analyzed the economic impact if federal spending had been held at approximately 20 percent of GNP during the last recession.

This last recession, as we know, concentrated itself in the year 1974 and began in November 1973 when we fell off a precipice, according to all the economic figures, literally, just 1 month, down we went, as if we had fallen off a cliff.

He went on to say:

Federal spending as a percent of actual GNP increased from 20.4 percent for fiscal year 1974 to 22.9 percent in 1976. (Federal spending as a percent of potential GNP increased from approximately 20.1 percent in fiscal year 1974 to 21.3 percent in 1976.)

There was a 5 percent increase. That is our econometric simulation, the CBO:

The simulations—which assume no other compensating change in spending or tax rates—suggest that real GNP would have been from 7 to 19 percent lower by the end of 1976, the level of employment 3.1 to 7.4 million lower, and the unemployment rate 2.4 to 5.7 percentage points higher.

We would have had an unemployment rate on that basis of something like 15 percent at the height of the recession:

The price level would have been from 1.0 to 2.3 percent lower by the end of 1976.

There would have been less inflation, but look at the cost, Mr. President.

Now, we decided that is where we quit. In other words, if we are not going to have an enormous unemployment in this country, even if it does get some abatement of the inflation rate.

So if we had 20-percent limitation we could not have met the recession without cataclysmic social upheavals in this country.

The author of the amendment himself realizes that. He is not blind. So he puts in a lot of caveats. He says that we are going to limit our expenditures to 20 percent of the gross national product, beginning in 1983, provided that it is consistent—now, hear this—provided that it is consistent with the goals and timetables specified in clause 1 of this subsection for reduction of unemployment in accord with the purposes of increasing the full use of productive resources, and so forth.

That is as wide open as a barn door, Mr. President, because of the other commitments which are undertaken in respect of this particular bill.

If we are going to leave it that wide open, why not include in there war and recession, though we would assume that under unemployment recession is subsumed. But why not say it? And if we say it, why have it when we know we cannot do it if anything untoward arises?

Mr. President, the history of humankind is that the best kind of discipline is not engendered by an inflexible man-

date. We have got mandates in here about inflation, that has a relationship to the productive facility of the country, to the state of the world, to our own productivity, and to many other factors.

Good. I am all for it, and I will be for it, and we have got a balanced budget objective.

All of that is fine. But to put this around our neck respecting a percentage of expenditures to GNP, it is going to tax who?

Mr. President, it is going to tax the poor, the old, the lame, and the blind. We know, when it comes to that kind of cutting, who gets cut.

Mr. President, it seems to me contrary to the morality of what we are trying to do in this planning concept to make that promise to the American people and to ourselves for the reasons which I have stated.

For those reasons, Mr. President, I hope very much the amendment will be defeated.

It is not going to add anything, not going to make us more virtuous than we are, but will give us something to tie around our necks. But come any untoward event, we are going to have to break. We have plenty of restrictions, restraints, and objectives, completely consistent with what we want to do, without this particular limitation.

Mr. President, I yield 5 minutes on the bill.

Mr. PROXMIRE. Mr. President, it is my understanding the Senator from New York will yield 5 minutes and I will yield 5 minutes to the Senator from Kansas.

The PRESIDING OFFICER. The Senator from Kansas.

Mr. DOLE. Mr. President, I think it is fair to say at the outset that there probably are many of our colleagues who never believed they would deal with this issue in this session of the Congress.

Some may have hoped they would not deal with it in this session of the Congress and some probably were hoping we might have dealt with it many months ago.

But the point is that after several days of discussion, and I think very fair negotiations by men of good will and the distinguished Senator from Minnesota (Mrs. HUMPHREY), we were able to at least put together a compromise that if properly dealt with on the floor of the Senate could mean passage of this legislation with a very substantial bipartisan margin.

I do not know of anyone who is opposed to the unemployment goals, or the other goals, contained in the legislation.

There are strong feelings with reference to inflation. There are very strong feelings with reference to percentage GNP.

There are some of us who feel we have added some language that might at least recognize the input of American agriculture by suggesting a laudable market will be full parity for farmers in the marketplace.

So I think we can look at the legislation and suggest that there is a great deal of good that can come from it.

We understand that some may look at it as symbolic. That is not this Senator's view, that it is only symbolic.

Some may look at it as totally partisan legislation.

It is not this Senator's view that it is partisan legislation. But a lot of legislation has been considered over the years that would guarantee a job, at fair rates of compensation, for every person seeking work.

No doubt about it—the thrust of this legislation deals with unemployment and the unemployment rates. So we are considering this legislation in the spirit of compromise, a compromise which many of us believe will stick. However, whether or not it sticks depends upon the disposition of certain amendments. I do not think it is any secret that if one side won all three points and the other side lost all three points, there probably would not be any legislation.

The Senator from Kansas is not certain of that case, but it seems to me that that is probably a fair assumption.

Under the unanimous-consent agreement, amendments could be offered, with 30-minute time limitations on any amendment; and, of course, amendments and amendments and amendments could be offered, until such time as the majority leader might decide that enough time has been spent on the matter.

But that is not the desire off the so-called ad hoc committee. It is not the desire of anyone in this body.

We have an opportunity here to pass meaningful legislation. I suggest to those who have opposed the legislation that they look at some of the changes that have been made—changes by the Banking Committee, under the able leadership of its chairman, Senator PROXMIRE; the help and assistance of Senator BROOKE, Senator GARN, Senator SCHMITT, and others.

I say to those businessmen who have been writing letters for the past couple of years, saying, "Vote against Humphrey-Hawkins," that if they have read it, they should read it again. Changes have been made, changes that address some of the concerns of all Americans—not just men and women in business—concerns about a Federal balanced budget, concern about the rate of inflation, concern about Federal expenditures and their relationship to the gross national product, concern about fair farm prices.

Properly so, the emphasis is on the unemployment rate, particularly the unemployment rate for young Americans. This legislation does not create a new agency. It does not create any new programs. It does not add to the bureaucracy. But it provides, in effect, a mechanism whereby we might be able, as we look down the road, to help stimulate the economy and stimulate the private sector, stimulate jobs, and try to achieve some of the things we hope can be accomplished.

There is no doubt that if this measure passes, we have to thank those who have worked long and hard, and we have to pay tribute to our late friend and distinguished colleague Hubert Humphrey for his endless contributions, and to Representative HAWKINS for his efforts and his interest and his concern—also for his willingness in the last few days to listen to compromise and to understand some of the real problems perceived not only by Republicans but also by some others who hold a different view with reference to the legislation.

I do not think anybody wants to kill the legislation. That never was a serious threat. I think some of us felt some changes were necessary.

So I hope we will debate, as we are debating, expressing our points of view as we are, supporting amendments such as the amendment of the distinguished Senator from Wisconsin, which I think makes a great deal of sense. But I also understand—to be very candid about it—that maybe the Senator should lose and we should win the next one, and then we should decide the "may or shall" question, and that might determine the fate of the legislation.

Perhaps that is the reason why the distinguished chairman of the Budget Committee, Senator MUSKIE, and Senator JAVITS and others have proposed an amendment to the amendment of the Senator from Wisconsin, in an effort to clarify in their view of what the amendment might do.

I am speaking at this time just to indicate that I hope the agreement we have sort of put together will hold; that by 6 o'clock we will have passed the Humphrey-Hawkins bill in a form that will be acceptable to 80 percent of the membership, or more.

I would think that on our side of the aisle—if anyone really cares what I think—if we keep some of the provisions with reference to inflation, with reference to agriculture, with reference to action by Congress, whether it is "may" or "shall," and some recognition of the relationship between expenditures and the gross national product in an expanding economy, Republicans would consider very seriously voting for it, in large numbers. We do not have too large a number, but we are making progress—slowly.

It seems to me that if all these amendments remain in the bill—an amendment by the distinguished Senator from Illinois; an amendment by the distinguished Senator from Tennessee, the minority leader, Senator BAKER; and other amendments offered by Republicans as well as many good suggestions by Democrats—we have put together a fairly sensible piece of bipartisan legislation, which should win unanimous support of all Members of the Senate.

I yield back the remainder of my time.

Mr. SARBANES. I yield myself 3 minutes.

Mr. President, I think I would be remiss at this point if I did not state for the RECORD the constructive contribution which the distinguished Senator from Kansas has made to the consideration of this legislation.

I expect that the Senator from Kansas and I are going to differ on the substance of amendments that we are going to consider on the floor of the Senate in the course of this afternoon. Of course, the consent agreement that was entered into preserved that possibility and that option for all Senators. I do want to say that I think the Senator from Kansas played an important role in helping to fashion terms of consideration which preserve that option to every Member of the Senate.

I do not want to overpersonalize this issue, but I know of the close ties and strong friendship between the Senator from Kansas and our former colleague from Minnesota, Senator Humphrey, even though on many issues they were on opposing sides. In recognition of that, I do want to acknowledge the effort the Senator from Kansas has put forth in trying to shape the consideration of this legislation.

Also, Mr. President, I would like to speak for a moment on the substance of the amendment offered by the Senator from Wisconsin, the chairman of the Banking Committee.

We considered it in the Banking Committee. I opposed it there; I oppose it now.

I think it would be a bad mistake for Congress to write into legislation specific percentage shares of GNP in terms of public outlays. I have no quarrel with the objective of trying to hold public outlays to the lowest level that is consistent with meeting our national needs and objectives. What those needs and objectives are is dependent in part on what the condition of the economy is. They depend in part on other fundamental decisions we may make about programs for our people.

It is important to underscore that if this legislation is read carefully, it represents a very strong reaffirmation and commitment by the Senate of the importance of the private sector in the functioning of our economic system. Even without this amendment, the other language in this legislation, on which there is general agreement, clearly represents a very strong reaffirmation of the important role which the private sector is to play.

The PRESIDING OFFICER. The Senator's 3 minutes have expired.

Mr. SARBANES. I yield myself an additional 3 minutes.

So those who have had concerns about the legislation, and who perceived earlier drafts of it as in some ways undercutting or casting doubt on the important role of the private sector in our economy, I think should be greatly reassured by the legislation that is before us.

I have an additional strong objection to this amendment, because I think that in a very fundamental way it tends to render the Budget Committee irrelevant.

One of the major responsibilities we gave to the Budget Committee in the Budget Act was to focus on just this question. I submit to the Senate that if there is any committee of this body which has discharged its responsibilities in an effective way it is the Budget Committee, in terms of the process it has established over the past 4 years, in terms of the judgments it has made in exercising that process, and in terms of the discipline and the consistency that it has brought to Federal fiscal policy.

The Budget Committee is in the posture of receiving the recommendations from all of the authorizing committees, and the chairman of the Banking Committee knows as well as I do that we have on occasion sent to them authorizations which they were not prepared to accept fully in the budget resolution, because these authorizations went beyond what they thought was reasonable after they had balanced all of the requests received from all different directions.

They hold the vantage point for making those judgments. They have the recommendations of every authorizing committee with their respective judgments as to what should be done, and they then engage in the process of weighing these judgments, making determinations as to our economic conditions, what the level of Federal expenditures should be, projecting revenue levels, and giving us a budget that makes sense.

Until very recently we never had this in the Congress. We spent years here enacting 13 separate appropriation bills that have no relationship to one another and there was no requirement that Members make hard decisions on priorities, and build on the premise that if they were going to spend more on housing they could not spent as much on health or if they are going to spend more on——

The PRESIDING OFFICER. The Senator's 3 minutes have expired.

Mr. SARBANES. I yield myself additional time.

Of if they were going to spend more on defense they would not be able to do more for the environment, or for energy resources, or for something.

The Budget Committee has brought all of that together and they have that responsibility, and they have exercised it well. Most people do not appreciate that in the 4 years of their operation the Budget Committee in every one of the second concurrent resolutions has arrived at a figure less than the budget submitted by the President to Congress at the beginning of that year for the next fiscal year. I believe I am correct. If I could have his attention for a second, perhaps the chairman of the Budget Committee could respond to the point I am making? I believe, is it not correct, that in each of the 4 years since the Budget Committee began functioning under the Budget Act the second concurrent resolution setting the levels of Federal spending the committee has finally recommended to Congress and which we have adopted, has set a total level of Federal spending below the levels contained in the budgets submitted by the President or the executive branch at the beginning of the congressional consideration of the budget?

Mr. MUSKIE. I believe that to be true, yes.

Mr. SARBANES. I think that is an extraordinary accomplishment. I think it reflects the point that I have been trying to make about the skill with which the Budget Committee has been carrying out its responsibilities. I do not think we should place the committee in the rigid mold which this amendment would do by specifying a specific percentage share of GNP for public outlays. I have no quarrel with the objective of the lowest share when that meets our needs, our priorities, and our policies.

But to place the specific numbers in legislation is misleading: it may in fact be an inaccurate guide; under some circumstances it may be too high, rather than too low; and under other circumstances too low rather than too high. But the one thing it would insure is that if this amendment setting out specific figures is adopted, then the range of decisionmaking open to the Budget Committee—in its deliberations; in receiving all the recommendations from the authorizing committee, including the committee of which the author of the amendment is the chairman; in making judgments on them dealing with the budget resolution—will have been very severely restricted.

The committee may in fact reach a decision that corresponds with or is even less than these figures, but we should not now bind the hands of the Budget Committee so that they do have the range of choice which I think is essential to them in carrying out their job, which they have been doing in an extraordinarily successful way.

Mr. MUSKIE. Mr. President, will the Senator yield?

Mr. SARBANES. I yield to the Senator.

Mr. MUSKIE. The argument may be made that these are simply goals established in the law, not self-enforcing. May I add there is nothing in the amendment that makes them reviewable either. These numbers are just put into the law, if we put them in in 1978, and it would take an amendment of the law to change them.

The argument is made that the Budget Committee can change them simply by issuing its budget resolution. What that puts us in the position of doing or what that would put us in the position of doing is to violate, not in any criminal sense, but violate a policy that is written into law, and no one likes to do that.

There are many, many circumstances, I am sure, that would suggest higher priorities in a given year than the priority suggested in this amendment. A recession, for example, which automatically makes outlays a higher percentage of GNP, because GNP drops, because Goverment outlays expand, because of the needs of unemployment and other needs such as a recession automatically sends the GNP share up. I think it reached a peak of 23 percent in the recent recession.

In addition, Congress must constantly consider new needs and priorities that

may emerge. National health insurance, for example, is very much in the public dialog at the moment. I do not think it is possible to consider putting national health insurance into place in this year's budget or next year's budget given the state of the budget.

But if Congress should decide, with the support of a President, that a program of national health insurance is indeed a high public priority, that would represent an enormous additional investment of public resources and affect this GNP share number.

If we are going to put a number into law, with an open understanding that it is not going to mean anything, that is one thing. But if we are going to put numbers in the law with the intent that they shall be a strong influence, if not a binding influence upon budgetary policy for the years into the future, then we may well exclude many such options that the public interest may require us to consider in 1980, 1981, 1982, 1983, or some year in the future.

Congress' function is to consider emerging public needs as well as those which we now serve.

So the GNP share to me is a tool, a budgetary tool. It is a useful budgetary tool. It is one we have tried to emphasize very heavily, we in the Budget Committee, to the Senate as we present our budgets. We have said explicitly that our objective is to reduce the GNP share of Federal outlays, pointing toward 19.9 percent in 1893, and that is our intent.

But our intent may well have to be modified if circumstances such as those two that I have mentioned should arise, and we ought not to put the Budget Committee in a defensive position when that happens.

If you put these numbers in the law, you should not at the same time say to us, "Well, disregard them when, in your judgment, you need to." If that is what you are doing, then why put the numbers in?

Mr. RIEGLE. Mr. President, will the Senator yield?

Mr. MUSKIE. If you want the numbers to be binding, then you really tie our hands in a way that might be against the public interest.

Mr. MOYNIHAN. Mr. President, will the Senator yield for just a quick observation?

Mr. MUSKIE. I yield.

Mr. MOYNIHAN. I spoke earlier, when the Senator was unable to be on the floor, about the growth of Federal outlays as a percentage of GNP over the last generation. There has been a very small growth: from about 18 percent in 1958, to about 22 percent today. In this period our true GNP has quintupled, and the American economy has been transformed from a basically blue collar, manufacturing economy to a white collar information economy. This is sometimes also called a service economy.

But it would be wrong to imagine that such a service economy, reflects a mere increase in consumption as against production. Rather, it reflects technological revolution and a change in the character of production—symbolized by the computer and the electric typewriter, if you will.

Finally, the industrial revolution came to office work, and office work grew in size and importance. This because it was economically desirable for office work to grow. General Motors may one day find itself with more white collar workers than blue collar workers, because it makes more money that way. GM may not have reached that point, but many other industrial companies have reached the same point.

What we call the public sector falls largely into what I am here defining as the service sector, and the service sector of the public sector has grown in parallel to the growth of the service sector in the private economy. When we talk about GNP, when we talk about unemployment, when we talk about inflation rates, what do we talk about except the product of economic services which Government provides to the Nation? Who tells us how many people are working, where they are working, what they are making, how much money they made last year, and how much they expect to make this year? Who tells us the level of our gross national product, who produces the highly technical amalgam of thousands of calculations done in the Department of Commerce, provided as a service to anybody who wants to use it, as a priceless asset in making estimates of whether you should make more cars next year or fewer cars next year, whether you should buy zinc, or sell gold? These are all services—but who would deny that they are economically productive? Of course, there is such a thing as an increase in the public sector which is not productive, and which represents consumption—even wasteful consumption.

But there are other aspects of the growth of the public sector which are integral to an expanding economy, and if we say we will not expand those services, then we are saying we will let the economy itself decline. Such cuts in Government expenditures would have just the opposite effect on levels of employment and the use of productive capacity that this bill is supposed to have. This is why I very much support the Senator's amendment.

But could I ask the Senator, who is so knowledgeable about these matters: Does he accept the point that the public sector, that Federal Government expenditures, increase out of the same causes that have brought about increases in the service sector of the private economy?

Mr. MUSKIE. That is correct. They are a reflection of the needs of our total economy. Now, to a certain extent—and this is what prompts this amendment, the Proxmire amendment—they also reflect Government waste.

Mr. MOYNIHAN. That is right.

Mr. MUSKIE. But they also may reflect private waste.

Mr. MOYNIHAN. But that requires you to discriminate between useful and nonuseful information. But merely to say no more increase is foolish. For example, I was Assistant Secretary of Labor under President Kennedy when we doubled the size of the panel that produces the monthly report of our unemployment index. Did we spend more money? Yes. We doubled the public sector with respect to unemployment data; we got quadruple the information. Today nobody would dream of saying, "Go back to the old unreliable information that we used to get with a fourth of the present staff."

Mr. MUSKIE. The Senator makes a good point.

Mr. MOYNIHAN. I thank the Senator.

Mr. RIEGLE. Mr. President, will the Senator yield to me?

Mr. MUSKIE. I yield.

Mr. RIEGLE. I appreciate the Senator from Maine yielding. I want to associate myself with the thrust of his remarks and the remarks of the Senator from Maryland (Mr. SARBANES) and say not only does the Budget Committee have an opportunity year by year to exercise its responsibilities to weigh these questions and make judgments, but the Senate as a whole has an opportunity to act upon your recommendations, so there are really two steps to the process.

We rely on the specialists who are on the Budget Committee but, in turn, we all have an opportunity to be a part of ratifying or modifying in some way the judgments that you reach.

I think it is also important to point out the reason in the past why we have not set a fixed percentage is because we cannot see the future. The chairman of the Appropriations Committee, Senator MAGNUSON, said to me just a few moments ago that over the last 17 years, the percentage of GNP allocated to Federal spending has worked within a range of about 18 percent to something close to 23 percent, but that range has been a relatively constant range. But all kinds of different factors arise that have caused us to move back and forth within that range.

So to try to predict ahead of time where we need to be in that range for some future year really violates commonsense. That is not the way we have behaved in the past, and I do not think that is the way we can behave now. There are just too many factors, and the way we are tied into the world scene, to the extent that we are, there are factors beyond our control like an oil embargo, a war breaking out in another part of the world that might not directly involve the United States but have an impact that no one can possibly begin to foresee even 2 months ahead of time, let alone 4 or 5 years ahead of time.

So I would hope we would retain for ourselves the right to make these adjustments, these decisions, year by year as we go along. It seems to me we are in a much stronger position if we do that.

Mr. MUSKIE. The Senator is exactly on point, and I am in total agreement with his analysis.

Does the floor manager of the bill wish to pick up his time?

Mr. NELSON. Did the Senator want more time?

Mr. MUSKIE. No, I do not need more time. At the appropriate time I will have an amendment subsequently to offer. I am not quite ready.

Mr. NELSON. Does the distinguished Senator from Wisconsin wish to speak further?

Mr. PROXMIRE. May I say to my colleague that I do have more. I understand the Senator from Maine has an amendment to offer that he cannot offer until all time has expired on this amendment. So I would like to wind up if I could. If the Senator from Wisconsin, my colleague from Wisconsin, has other requests for time, I will wait. I do not have any request so far as I know at the moment.

Mr. NELSON. There are no pending requests with me for time. Has the distinguished Senator from Maine used all the time he desires on this amendment, the pending amendment?

Mr. MUSKIE. Yes, indeed. I have 30 minutes that I do not expect to use anyway on my amendment, so I do not need any more time at this point.

Mr. NELSON. We do not have anybody on this side who needs any more time. I may speak for 3 minutes at the end.

Mr. PROXMIRE. Why does not the Senator go ahead.

Mr. KENNEDY. Mr. President, will the Senator yield 2 or 3 minutes on the bill?

Mr. NELSON. We have time on the amendment.

The PRESIDING OFFICER. Fifteen minutes remain.

Mr. KENNEDY, Maybe 7 minutes.

Mr. NELSON. Make it eight.

Mr. KENNEDY. I thank the distinguished Senator.

The PRESIDING OFFICER. The Senator from Massachusetts.

Mr. KENNEDY. Mr. President, I rise at this time in full support of the legislation which is before us. I support the legislation and the Muskie amendment to modify the Federal share of GNP goal.

Mr. President, all of us in this body know that Senator Hubert Humphrey was a forward-looking, forward-thinking, visionary man. I think he understood one of the most basic and fundamental tenets of our democratic society: that we need a sound economy for the great range of programs which concerned him so deeply; that we were not going to be able to look after the needs of the elderly, or to educate the young, or to provide decent health for the people of this Nation, or to have the type of national security which this country requires; that we could not extend the arm of friendship and humanitarian concern abroad, or exert leadership to the world, unless we are going to have a sound economy.

He brought to bear his full energies in focusing on the importance of bringing together the monetary and fiscal policy of this Nation, and recognized, as a skilled legislator, the extraordinary importance and impact on the economy of the role of the legislature.

Those of us who had the good fortune of serving with and listening to Senator Humphrey on the Joint Economic Committee, as he chaired those hearings day after day, and wrestled with the macroeconomic issues know how deeply he cared about and thought about the thrust of this type of legislation. He knew how we had to exert discipline, so that the executive branch together with the Federal Reserve, and the mechanism which has been selected by Congress, the budget process, could insure that we were going to create a wide range of economic options for the people of this Nation; and that at the top of his priorities were the issue of jobs and the issue of inflation.

I understand that it was not just what happened in a local community that determined whether a factory would close or expand, that it was not going to just be private or State action that would make the decision, as important as private and State action are but that Federal economic policy that would mean the difference between whether people were actually going to be employed or unemployed in so many sectors of our economy; and to make that difference would require the kind of foresight and discipline that this legislation requires and the kind of goals that it sets.

I think that the development of this legislation was the incarnation of Senator Humphrey's leadership and concern about these issues.

I had the good fortune to be a sponsor of this legislation when it was initially introduced, and have closely followed its progress in our Human Resources Committee. I welcome the opportunity for the Senate to address itself to this legislation. I think it is a matter of considerable importance, and all of us are mindful, I think, that the extraordinary service of Senator Humphrey to this body and to this Nation in so many different areas has continued and will continue through successful implementation of this legislation.

So I welcome the opportunity to be one of those who support this legislation, and I believe deeply in it. We can reach the goals that have been set for us. In the early part of the 1960's, when we saw a reduction from about 7.1 percent unemployment to some 3.5 percent unemployment, with virtual price stability—at one point a 2-percent average increase in the Consumer Price Index for some 4 years. We can have economic growth, full employment, and price stability; and I think our best prospect of achieving these goals will be through the implementation of this legislation. I think this is a sound program, and I add my voice in support of it.

Finally, Mr. President, I want to underscore what the Senator from Maine has said mentioned on the issue of the relationship between the Federal share of the GNP and our other goals.

The PRESIDING OFFICER (Mr. CHILES). The Senator's 8 minutes have expired.

Mr. KENNEDY. One more minute.

Mr. NELSON. I yield the Senator 1 minute.

Mr. KENNEDY. We discussed and debated this measure at some length the other evening, when none of the amendments were before us. I think we are interested in permitting Congress to exercise its full responsibility for the development of our economy and meeting all our other national goals. We cannot preclude the flexibility which is essential to meeting all our responsibilities and in fulfilling the constitutional process. This body has the responsibility to redouble our efforts if unemployment should begin to ascend; we have a responsibility in a broad range of social and economic areas which we must be able to meet if necessary—Congress cannot tie its hands for the future, it must be sensitive to ongoing developments as it chooses, each year, the mix of programs and policies which make our people strong and our Nation strong.

Mr. President, a more formal statement follows and I ask that it be printed immediately following these remarks.

There being no objection, the speech was ordered to be printed in the RECORD, as follows:

STATEMENT BY SENATOR KENNEDY

The full employment and balanced growth act has come to the Senate in its own right. Now, for the sake of our economy and for the sake of our workers, we must enact it. I strongly urge my colleagues to adopt the Humphrey-Hawkins Act.

The Humphrey-Hawkins Act is not a magic cure-all, nor was it ever intended to be. But it is an act which provides the framework within which this country can provide jobs to those who need them, lower the deficit and hold the line against inflation. We are putting some direction in our economic policy, establishing goals for it and establishing a procedure by which we can measure how well we are achieving those goals. We are taking account in a cohesive, explicit way of the fact that the Federal Government is a major factor in the economic arena. It has the responsibility to direct its policies to meeting the need for a strong economy, one which keeps our people at work. This must be the aim of the President, it must be the aim of the Federal Reserve Board and it must be the aim of Congress.

Mr. President, the number one issue in the land—the first priority on the agenda of economic justice—is providing jobs for American workers. We are a great nation and much of the greatness has been due to the sacrifices, the struggles and the courage of our working men and women. If we are to turn this nation back on its historic path, we must provide every American with the will to work an opportunity to work.

For, full employment is the key to achieving so many of our goals. It is, of course, an end in itself, for it is the luck and genius of this country that people want to work and would prefer working to getting a dole. Full employment is the key to a better economy: for we then reap the bounty of productive hands and minds. And full employment saves us the billions of dollars that we otherwise disgorge on welfare and unemployment compensation and gain for us the billions which otherwise never materialize because of lowered tax revenues.

The bill offered today sets a goal of a 4 percent unemployment rate within five years after enactment. It also sets a goal for controlling inflation. It requires the president to submit an annual economic report to show how Federal policies are being set to meet these goals, it requires a report on the plans of the Federal Reserve Board and it requires congressional review aimed at meeting these goals.

I believe that we can meet the goal of full employment while reducing and controlling inflation. Both the unemployment and inflation problems can be conquered. We need not ravage the worker to keep down the inflation rate. We can have an unemployment rate which is lower than our current rate and we can have an inflation rate which is lower than our current inflation rate.

In the sixties, the economic policies of Presidents Kennedy and Johnson brought the unemployment rate down from 6.7 percent to 3.6 percent, while the Consumer Price Index averaged just 2.4 percent a year, dropping as low as 1.2 percent.

I believe that we can meet the goal of full employment without incurring huge deficits. For, in the long run it is unemployment itself which leads to the deficit—the combination of support disbursements, lower productivity and lower contributions to the Federal Treasury. A stable economy with low unemployment is the surest way to move us away from huge deficits.

So, I think that there is little question but that the mechanisms and goals in the Humphrey-Hawkins bill should be enacted into law. For many years, we in Congress have tried to provide the tools to combat unemployment. In the last few years several of my colleagues and I have sponsored major pieces of legislation aimed at reducing the shamefully high unemployment rate. We have just reauthorized the CETA job programs, and have passed youth employment programs and public works projects. We have proposed tax reform and tax reductions. But the unemployment rate remains too high. We need to undertake a full scale attack on this problem.

Mr. President, a strong, full employment economy is the greatest social program America has ever had. Only with a strong economy can we provide better education for our children, decent housing for our families, dignity for our elderly and quality health care for all Americans.

The Senate must pass Humphrey-Hawkins. It is time for this country to coordinate its policies in the service of a strong, full employment economy.

Mr. KENNEDY. I thank the Senator from Wisconsin for the opportunity to speak.

Mr. NELSON. Mr. President, I yield myself 3 minutes.

Since there does not seem to be any request on this side for additional time, I will be prepared shortly to yield back the remainder of my time.

In opposition to the amendment, I should like to say that I oppose it for a number of reasons that have been stated on this floor by the distinguished Senator from New York and the distinguished Senator from Maine in particular, in the remarks they made, but for another reason also.

I do not believe it is a necessary part of this legislation, even for those who believe the concept is correct, as many do, including, of course, the author.

My objection at this point is that if it becomes part of this legislation, I do not think there will be a Humphrey-Hawkins bill that will pass, and, as important as this item is in the minds of those who advocate it—and I am not advocating that it is an unimportant matter; it is an important matter, and there is legitimate dispute as to whether we should have this rigidity in the Humphrey-Hawkins proposal. But that has been fairly and openly debated here.

My concern is that it will, in my judgment, mean that we cannot get the Humphrey-Hawkins bill passed this year. My judgment might be wrong, of course, but that is what my best judgment is, and for that reason I oppose the amendment.

Is my senior colleague from Wisconsin prepared to yield back the remainder of his time?

Mr. PROXMIRE. No, I want to speak after the Senator finishes, to wind up.

Mr. NELSON. Go ahead.

Mr. PROXMIRE. First, Mr. President, I ask unanimous consent that the name of the Senator from Utah (Mr. GARN) be added as a cosponsor of the amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. PROXMIRE. Second, Mr. President, I sent to the desk a modification of the amendment. It is a modification suggested by the Senator from Michigan (Mr. RIEGLE). It is one which I am happy to accept. I have given it to the minority and majority managers of the bill, and they find it acceptable. I will read it, very briefly.

This is a proviso which indicates that the limitation on Federal spending would be modified under certain circumstances, one of the circumstances being:

That policies and programs for balancing the Federal budget and for constraining the share accounted for by the Federal outlays of an expanding gross national product shall be designed so as not to impede achievement of the goals and timetables specified in clause (1) of subsection (b) for the reduction of unemployment.

I am happy to ask unanimous consent that that modification, which occurs in subparagraph (3) in two places, be accepted.

The PRESIDING OFFICER. Without objection, the amendment is so modified.

The amendment, as modified, is as follows:

on page 116k, after subsection i insert the following:

"( ) The Congress further declares that it is the purpose of the Full Employment and Balanced Growth Act of 1978 to rely principally on the private sector to lead the expansion of economic activity and to create new jobs for a growing labor force. Toward this end, the Congress further declares and establishes as a national goal the gradual reduction of the share of an expanding gross national product accounted for by Federal outlays.".

On page 118, the first line, after "balanced growth," insert "the reduction of the share counted for by Federal outlays,".

On page 120 strike out "and" at the end of clause (1). On page 120A change the "." the first time it appears to ";" and insert "and" after the semicolon, and insert immediately thereafter the following new clause:

"(3) reducing the share of an expanding gross national product accounted for by Federal outlays to 21 per centum or less in the fiscal year 1981 and 20 per centum or less in the fiscal year 1983 and thereafter: *Provided*, That policies and programs for balancing the budget and for reducing the share accounted for by Federal outlays of an expanding gross national product shall be designed so as not to impede the achievement of the goals and timetables specified in clause (1) of this subsection for the reduction of unemployment."

On page 120A insert at the end of subsection (c) the following new paragraph:

"(3) Upon achievement of the 20 per centum goal specified in subsection (b)(A), each succeeding Economic Report shall have the goal of maintaining the share of an expanding gross national product accounted for by Federal outlays at 20 per centum or less consistent with meeting national needs and priorities, *Provided:* That policies and programs for balancing the Federal budget and for constraining the share accounted for by Federal outlays of an expanding gross national product shall be designed so as not to impede achievement of the goals and timetables specified in clause (1) of subsection (b) for the reduction of unemployment."

Mr. PROXMIRE. Now, Mr. President, I have listened to some of the most eloquent Members of the Senate, men who have always been able to persuade me on almost anything, Senators MUSKIE, NELSON, JAVITS, KENNEDY, RIEGLE, and others, and they are normally most persuasive.

They are usually enormously persuasive. But I must say, having listened to them today, I do not think they have really come to grips with what this amendment does and does not do.

In the first place, what this bill is all about is the specification of numerical goals. That is why we have it. We already have, in the Employment Act of 1946, a commitment by this country to have maximum employment, minimum unemployment, and stable purchasing power. What we are doing here is we found in the past they did not mean very much. It was rhetoric. Now we are making it specific.

Mr. President, we are told we can set a goal for unemployment, but we cannot set a goal for something we have complete control over and that is Federal spending, Federal outlays. How ironic can you get? We have goals for housing, We cannot control what happens in the private sector on housing. We have a goal for it. You say we cannot have a goal for Federal spending? Ridiculous. This is the one area where we do have control.

Mr. President, as we pointed out, this is not rigid. As I pointed out in my amendment here, and it is clear in the overall amendment, in the event of a recession, in the event the economy is not expanding, then it is clear that we do not expect to be able to reduce the Federal expenditures as a percentage of the gross national product. We make that clear.

Mr. NUNN. Will the Senator yield for a friendly question?

Mr. PROXMIRE. Yes, indeed.

Mr. NUNN. What percent does the Senator have in terms of reduction each year?

Mr. PROXMIRE. As the Senator knows, the last figure we have firm is for fiscal 1978. The Government spending was 22.6 percent over the gross

national product. We provide that by 1981 it would be 21 percent and by 1983 it would be 20 percent. That is above the figure that President Carter said he thinks we should move to. It is above the figure that the Budget Committee indicates for their projections. So it is a moderately limited goal. It is a realistic goal.

Mr. NUNN. The Senator from Georgia completely agrees with the Senator from Wisconsin. It is a goal that, in the year 1983, is within five-tenths of a percent of what we had set in the so-called Nunn-Chiles-Roth-Bellmon amendment, which also provided for tax relief along that line. We have done a considerable amount of analysis on that. The goal is a realistic goal that the Senator is setting, a meaningful goal, an important goal. I just want to commend the Senator for his amendment. I wholeheartedly support it.

Mr. PROXMIRE. I thank the Senator from Georgia. I might point out that his amendment not only passed the Senate overwhelmingly, but it has been confirmed in the House by instructions to the conferees on the House bill to accept the amendment by a 2 to 1 vote.

My good friend from New York (Mr. JAVITS), certainly one of the most intelligent and thoughtful Members has said that, "The history of human kind knows that discipline is not engendered by mandates."

I could not disagree more. That is what it is engendered by, whether it is a mandate to yourself that you will achieve certain goals, whether it is a mandate we impose on ourselves as Senators, and impose on the House and the Senate both, and on the President of the United States that we are going to move in the direction of slowing down the Federal growth in the economy.

Mr. President, just look at the statistics. The fact is that throughout the decade from 1959 to 1967, there was no year in which the share of the Federal spending as a percent of gross national product was as high as 21 percent. It was below that during every single year.

During that period, we had declining unemployment. We moved down, as a matter of fact, in 1964 to 3.8 percent unemployment, 3.6 in 1965, and 3.5 in 1966. And we had a growth, a steady growth, of the economy at the same time.

Well, Mr. President, we have had a growth, a steady growth, year after year, not only in the size of our Federal spending but in the percentage it represents of our whole economy of the gross national product. As I pointed out, it was 22.6 last year, a steady increase. We hope it will be a little less this year, but in spite of the fact we had big increases in the gross national product, big growth in the economy, even still the immense growth in Federal spending overwhelmed that.

Now, Mr. President, finally, I ask my colleagues to recognize the fact that it is not inconsistent to argue that we should provide more jobs, stimulate the economy overall, while at the same time reducing Federal spending. As a matter of fact, any businessman will tell you, and many economists will tell you, that a real drag on the economy is the excess of Federal spending.

Reducing Federal spending can stimulate the private sector in many ways. For one thing, it reduces the national debt, it reduces the deficit, it reduces the amount of borrowing, and it tends to reduce interest rates. It means that taxes can be reduced because there is less Federal spending. And it means that we can get the kind of permanent jobs, efficient jobs, in the private sector that are much more permanent, much more satisfying, than to create jobs in the public sector.

Mr. President, I hope that for all these reasons this moderate amendment, one which is very similar to the amendment which the Senate has already favorably acted upon just a few days ago, and one that is closely related to this bill because after all this is a bill which provides for the basic economic policies that this country is expected to follow over the next 5 years, the most significant change in our economic policy program in 32 years—I hope under these circumstances that this amendment, which is preeminently an amendment which would emphasize the private sector, can be accepted.

Mr. PERCY. Will the Senator yield?

Mr. PROXMIRE. I am happy to yield to my friend from Illinois.

Mr. PERCY. Mr. President, I would like to ask a few questions of the Senator to make legislative history. They may be somewhat redundant and overlapping with other statements which have already been made by the distinguished Senator, but I would like in chronological order to mention a few things to have in one place his response to the concerns that have been expressed by some of our colleagues.

The first question would be, would the Proxmire amendment lock us in, in case of recession, when it was determined that expanded Federal spending would be required to get the economy moving upward again? Does the Senator see that in any way it puts us in a straitjacket, that it would bind our hands, or impede our ability to respond rapidly to a declining economic situation that might temporarily require increased spending to stimulate the economy?

Mr. PROXMIRE. No, indeed. As the Senator knows this goal can be altered by the President. He is free to alter it.

Furthermore, we say, and say very clearly, that a national goal is the gradual reduction of the Federal share of an expanding gross national product. I have made it clear that if we move into a recession and the economy is not expanding, then we cannot expect the President to reduce the Federal spending as a proportion of the gross national product.

Furthermore, we indicate the policies to be followed to achieve this shall be designed so as not to impede the achievement of goals and timetables with the reduction of unemployment. That is given primacy and priority. He has to work within that limitation. This is still fundamentally a full employment bill. That is the priority established clearly in my amendment.

Mr. PERCY. Second, it is a perfectly obvious question related to times of war and national emergency: Does the Senator feel that there are adequate sections throughout the Humphrey-Hawkins bill to provide all the flexibility that we need so that in time of war or national emergency we are not any way bound by a goal which obviously would not be in the national interests?

Mr. PROXMIRE. Absolutely. I agree wholeheartedly with that. There is no question that in the event of a military emergency, it would be impossible for any President of the United States to greatly expand our spending, which we had in the Vietnam war, the Korean war, and particularly in World War II. There is no way to avoid that. That is perfectly clear.

Mr. JAVITS. Will the Senator yield on my time, because it bears on this particular matter?

Mr. PERCY. Surely.

Mr. JAVITS. For me, this debate is not a forensic exercise for scoring debating points. I think it is a basic, essential outline of potential purpose and design in this planning effort, so I want to clarify this particular point.

I am the most disturbed about the fact that with the limitation, if we are going to be honest about it, it is going to come out of the backs of those who need our help as a Federal Government because of defense. What the Senator says about war, and that is what I would like to ask him—I know what he is going to answer, but we are going to have it clear on the record because it is helpful to our country, whatever happens on the debating points, as I say.

The modern way of war is not going to be decided by war. It is going to be decided like moves on a chessboard. They can eliminate us in 30 seconds; we can eliminate them in 1 minute, so they have us and we are going to do what they want. We are not going to have to put it to the test, in my opinion. I may not be here when it happens.

What I would like the Senator to address himself to, and as I say, I know what he is going to say: It is not only in war, but where the exigencies of our national situation require and enhance defense expenditures, I hope that that balance, even if he carries, will be maintained.

(Mr. MELCHER assumed the chair).

Mr. PROXMIRE. The Senator could not be more correct. May I say to the Senator we have a President of the United States who indicates that he expects to increase not only the dollar spending but the real spending on defense over the next few years and he has projected his share of Federal spending in relation to the gross national product at a lower rate than I have in these goals.

Mr. JAVITS. I hope the Senator will forgive me, because this is so important: If we get into that kind of jam, it just is not going to come out of the backs of those who look to the Federal Government for various types of assistance and relief; but also, if we have to go over 20 percent, it is going to be because we wish to do honestly by them—what I call the

young, the lame, the halt, the blind, the old—and enhance national defense needs dictated by the international situation.

Mr. PROXMIRE. The Senator is correct.

Mr. JAVITS. I thank my colleagues.

Mr. PERCY. Senator JAVITS has gotten into the area that was the subject of my third question.

Mr. JAVITS. I am so sorry.

Mr. PERCY. I appreciate very much an amplification of the second point on war because of the careful thought the Senator from New York has given to this problem of waging war in a world in which we never really wage war, but we go to war by a gradual process, many times.

The unequivocal answer, as I hear it from the Senator from Wisconsin, is that there is no way his amendment would bind the U.S. Government in times of national emergency or war.

Mr. PROXMIRE. The Senator from Illinois is correct.

Mr. PERCY. The third question would simply require an amplification of the response made to remarks by Senator JAVITS. He said that programs for the disadvantaged, in his judgment, would be be the first to be cut by the Proxmire amendment if the Proxmire amendment were enacted. I should like my distinguished colleague to respond in that regard. It is true that the programs for the disadvantaged would be a matter of high priority for cutting in the event that we approach too closely these overall goals of Federal revenue against GNP?

Mr. PROXMIRE. Of course, this is a decision that Congress and the President will have to make, but I am convinced, and I am sure the Senator from Illinois is, too, that there is enormous waste. There are areas where we can cut down. That is why the President and the Budget Committee projected our ability to reduce the share of Federal spending with respect to the gross national product.

I agree wholeheartedly that when we make those value judgments on the basis of the clear record of Republicans and Democrats in the past, we have, and should have, great consideration for the poor and disadvantged.

Mr. PERCY. I share that opinion. This morning, some of us, including Senator Javits, were over with the President when he signed the civil service reform bill. I tend to think that, out of the $46 billion being spent on our civil service personnel, the waste is enormous. The opportunity for getting a greater cost-effectiveness for the taxpayers' dollars spent is great now. As of this moment, every department head, every agency head has the ability to merit-fire as well as merit-hire, so long as there is substantial evidence that a person is not performing in according with reasonable standards. We should be able to wring billions of dollars of waste out of that expenditure.

In addition, I think we have further hope for savings with the passage of sunset legislation, and great credit should go to Senators MUSKIE, ROTH, and others who worked on that bill. The Senate has also passed regulatory reform, S. 600, which I introduced with the cosponsorship of Senators BYRD and RIBICOFF, among others, to wring out of our regulatory process the billions and billions of dollars that are now entailed because Government regulation adds a tremendous increment of cost.

The Government Accountability Act which we adopted just a few days ago in the Senate should provide the basis for cutting out programs that are not working any more. There is no adequate mechanism for cutting them out of the Federal expenditure now. Once the President is able to list the priority of programs—rates those that are excellent and those that are unsatisfactory—we shall have the potential for reducing tremendously and dramatically Federal expenditures.

To establish goals in the bill that have already proven to be consistent with the 5-year projection made by the Budget Committee, I think is offering a goal that is not unachievable. It simply reinforces what the Budget Committee has taken upon itself to say: this is a logical projection of Federal revenue and expenditure that can be achieved in, as Humphrey-Hawkins says, an expanding economy.

Mr. PROXMIRE. I cannot thank the Senator from Illinois enough. What he has done is show how reasonable and realistic this amendment is. He has shown that we can provide for our military needs, we can provide for our social needs, and we can do so within reasonable limitations.

He has indicated very clearly some specific areas where we can make these substantial savings.

Mr. MAGNUSON. Will the Senator from Illinois yield?

Mr. PROXMIRE. I have the floor and I am yielding to the Senator from Illinois.

Mr. MAGNUSON. Will the Senator from Illinois yield to me?

Mr. PERCY. Yes, I am very happy to yield.

Mr. MAGNUSON. The Senator from Illinois has suggested there is no way to cut out Federal programs. Of course, there is a way to cut them out. We do not have to appropriate the money for them. But I do not get much help from Senators when we cut back on programs.

We are going to have about $112 billion in appropriations for defense, despite all the pressures in the Appropriations Committee to meet social needs. Believe me, it has been some job, has it not?

Mr. PROXMIRE. Yes, indeed.

Mr. MAGNUSON. Sure, we can reduce spending, and if you leave it to the Senator from Wisconsin and me to make the decision, we would make cuts. But every time we suggest that we cut something out, Senators come down in droves to the Appropriations Committee downstairs, crying, "Oh, this is a good program, we cannot do it."

What we have had to do is go along and chip and chip at them until we get them down. We have them down this year. I think we have one of the finest records in the Appropriations Committee this year of any year in the past 15 or 16 years.

Mr. PROXMIRE. I could not agree with the Senator more. He has done a superb job on that committee.

Mr. PERCY. I thank my colleague and I thank Senator MAGNUSON for his interjection at that point, which is very valuable indeed.

Mr. President, the next question relates to the Budget Committee itself, because the Senator from Illinois has tried in every way possible to be supportive of this process we worked so hard to achieve.

The immense respect the Senator from Illinois has for the Senator from Maine (Mr. MUSKIE), who has been chairman of that committee, and the Senator from Oklahoma (Mr. BELLMON), is great, indeed. It is a tremendous partnership. Here, for one of the rare times, we see Senator BELLMON and Senator MUSKIE taking opposite positions on a particular amendment affecting the budget. But maybe it does not affect the budget process.

My question is, Is there anything in the Senator from Wisconsin's amendment that in any way undercuts the budget process, diminishes its authority and responsibility? Or does he consider it consistent with the objectives and goals pointed out by the Budget Committee on page 27 of the second concurrent resolution of the budget, the report of the Committee on the Budget?

Mr. PROXMIRE. As the Senator from Maine said so well and so clearly earlier today, any time we set goals, in unemployment, inflation, or Federal spending, it does have, obviously, an effect, and it may have a difficult effect in the Budget Committee.

But I think we have done our very best to provide as much flexibility as we can. We want to do everything we can to avoid anything that would in any way—what the Senator from Maine and the Senator from Oklahoma and others have done, a superb job as well as the remarkable——

The PRESIDING OFFICER (Mr. CHILES). All the time of the Senator from Wisconsin (Mr. PROXMIRE) has expired.

Mr. PERCY. Could I ask the Senator from Wisconsin if it is possible to ask a question, or could my distinguished colleague from New York take 5 or 10 minutes of time from the bill?

Mr. JAVITS. We do not have that much. I will give the Senator 5 minutes.

Mr. NELSON. I have some time left on the amendment.

The PRESIDING OFFICER. The Senator from Wisconsin has 4 minutes left.

Mr. MAGNUSON. Will the Senator yield for a further question?

The PRESIDING OFFICER. Who yields time?

Mr. JAVITS. Five minutes on the bill.

Mr. PERCY. Five minutes on the bill.

Mr. MAGNUSON. Just one question.

As the Senator from Illinois knows, the Budget Committee, I think, has done a good job, and I go along with them.

But we are way under the budget in expenditures. We are way under the congressional budget and we are way under the President's budget. But not all of us hear the bottom line. Every time we get the outgo close to the ingo down here nobody can rest. The minute we get close

to it, it is like a game of tag, "Oh, these fellows cut expenditures, they are down now, they are manageable, way under budget, this is the time to cut the input." And we never catch up with the fellows that want all these.

If we did have a tax bill this year, we would be close to a balanced budget. Does the Senator know that? We would be close to it.

The theory, as I understand, particularly on this side of the aisle, on the other side of the aisle, that if we cut taxes, because we are cutting down, that more will come in.

I hope that is true, and maybe we finally will put these two things together.

But I do not want anyone to imply that the real fault lies always with the expenditures, and then people vote for entitlements, uncontrollables, that have to be appropriated for.

Maybe if we stopped doing that——

Mr. PERCY. Perhaps some other time we can continue this discussion. I have 3 minutes now.

Mr. MAGNUSON. I will yield the Senator some time on my time.

Mr. President, I would like to say that I am satisfied the Senator from Wisconsin is not trying to put us in a straightjacket; There would be flexibility, and the legislative history we have developed shows that.

No one could question his closeness to people. No one is closer to people than the Senator from Wisconsin. The Senator from Wisconsin has been endorsed by every labor union, to the best of my knowledge, for many years. So his devotion to labor and the working person cannot be subject to question.

What I think he is concerned with is what we are doing to the working people of this country by constantly increasing the percentage of the GNP taken up by Federal expenditures. Will we be starting to go the way of Britain?

The Senator from Illinois feels that the focus of this bill must be kept on the unemployed. This is the whole essence of Humphrey-Hawkins—jobs—work, not welfare.

The Senator from Illinois can remember back vividly to the days of the depression when my own father, day after day, week after week, month after month was looking for work, along with 17 million other people.

I can never forget his despair, his despondency, his feelings of inadequacy and helplessness. This is what the Humphrey-Hawkins bill is designed to eradicate. I would never support any amendment that would weaken this central fabric of the bill.

But it is terribly important we balance out this focus with our concern for the inflation threat which George Meany has already said is even a greater threat to the working people of this country than unemployment.

Second, this focus must be balanced with our concern that we do not undermine the strength of our country by suddenly adding to the Federal load.

As a member of the Republican side of the coalition that has helped work out this bill and get it to the floor today for a vote, I wish to commend my distinguished colleagues: Senators LUGAR, DOLE, HATCH, and BAKER, who have found a way to accommodate themselves and their own particular views to see that this bill did get on the floor, with a time agreement for a vote, in the short time remaining to us in the session.

It is almost a miracle that by tonight we will vote on the Humphrey-Hawkins bill without the possibility of a filibuster. They have subordinated their own concerns to let the Senate have an up-or-down vote on this important legislation.

One of the bases on which they did it, and we did it as Republicans, was to see we do have a goal in the bill for the Federal expenditure as part of GNP, and we have a goal for inflation, the equal enemy of poor people, along with unemployment.

For those reasons, I find myself compelled to support the existing amendment.

The PRESIDING OFFICER. The Senator's time has expired.

Mr. NELSON. Mr. President, I would like to address just one comment to my good friend from Illinois on the amendment.

I know that the Senator from Illinois and my senior colleague from Wisconsin want a Humphrey-Hawkins bill.

But if this amendment is adopted, it endangers seriously the chance of any bill, because it will be, in my judgment, strongly opposed by some of the most important proponents.

So, adoption of the amendment, I think, will defeat the goal that we all seek together.

I wish, though this is an important issue, and we will deal with it on the floor of the Senate, and have a week ago, that we would not seriously, if not fatally, diminish the chance of passing this bill by adding this amendment.

Mr. PERCY. Will the distinguished Senator yield 1 minute?

Mr. NELSON. Yes.

Mr. PERCY. I think the key to the whole matter is the Senator from Wisconsin's words "wrongly opposed," that this amendment is wrongly opposed by those who perceive it to be something different.

The whole purpose we have had in this colloquy is to explain to them that their perception of this amendment is wrong.

It is no straitjacket. It does not bind anyone. It does not undercut the budgetary committee and the budget process.

It is simply a symbol and a goal, already affirmed by the Budget Committee. But it will make us work harder to get out the fat, to get out the inefficiency, to get out the bureaucracy, that does not contribute to the national welfare and well-being, that does not contribute to the unemployed, that really takes money away from the impoverished, poor, handicapped, and others in need.

I say this to my friends in the business community: They had best look at what we have now. Humphrey-Hawkins has been opposed vigorously.

Senator Humphrey and Representative HAWKINS said the the public—and stood alongside them as they answered questions—"We fully support it, to bring down unemployment, but consistent with bringing down inflation." They said Hubert Humphrey would have supported the inflation aspects that have been built into this measure.

So the business community had best now look at this bill in its final draft form, with the Proxmire amendment, with the inflation amendment, with the work done by Senator HATCH, Senator LUGAR, and others who have worked intimately with us, to see and understand that this bill is now something we can all unite on.

We could get the NAM support, but we should have the support on the other side, of Common Cause and the labor unions, who realize they cannot have the original version of Humphrey-Hawkins. Those days are gone forever.

If we are to get a Humphrey-Hawkins bill, it has to be a balanced bill. It never would happen were it not for the willingness of my distinguished colleagues on this side of the aisle to say that we will look at certain provisions and build in certain provisions.

This can be a bill on which we can build a national consensus and balance out all those things that can give us a vigorous, strong economy.

The PRESIDING OFFICER. The time of the Senator has expired.

Mr. NELSON. I yield myself 2 minutes on the bill.

I wish to make clear that I do not know of anyone, in the years I have been here, who has fought more vigorously, more effectively, for balanced budgets and control of inflation than has Senator PROXMIRE. There is nobody here who has put in more time on these concerns. I have the highest respect for him.

I recognize that there are arguments on both sides of the aisle as to the merits—by the Senator from Maryland, my colleague from Wisconsin, the Senator from Illinois, and the Senator from Indiana. All I am saying is that we have 24 hours and we are done with this session, and we have come a long, long way.

I think the first hearings I held on Humphrey-Hawkins legislation were 3 or 4 years ago, and we have come a long way since that time. For several days now, we have had a very cooperative, fruitful, and mutually respectful effort involving people from this side of the aisle and people from the other side of the aisle. The Senator from Illinois has participated in this process.

I am just saying that in my political judgment, if we introduce this factor into the bill at this time, it makes it most difficult—if not, I fear, impossible—to pass it. That is my concern.

We can deal with this other question by amendments in future years, if it seems necessary, or by bills on the floor of the Senate, through the budget process—there are a variety of ways.

What I am pleading for is that we do not adopt something that may make it almost impossible to get the support of those we need in order to get it back from the House on a unanimous-consent agreement. If the proponents of this legislation oppose it in the House, it never will come back.

The PRESIDING OFFICER. The time of the Senator has expired.

Mr. NELSON. I yield myself 1 additional minute.

Whereas you would have had your victory on this point, you have destroyed the whole bill and our chance. That is why I am pleading with the rest, at least: Do not vote for this modification, as important as you believe it to be.

I do not denigrate in any way the importance of the issue. I repeat that nobody has done more in this issue than has Senator PROXMIRE—on balanced budgets and inflation—and I am not critical of his efforts. I am making a political assertion on a political issue that is very delicate. This is the issue I am talking to, not the merits on both sides.

Senator MUSKIE and Senator PROXMIRE have studied this issue in greater depth than I have. I do not feel qualified to discuss it with any authority, but I feel I have some qualification because I have been involved in the Humphrey-Hawkins legislation for the past 3 or 4 years. I have conducted hearings on it and have discussed it. I feel that I have some qualification for making a judgment on what the political situation is, and I think this Federal spending amendment is a very dangerous modification to make.

Mr. President, has all time expired?

The PRESIDING OFFICER. The time has expired on the amendment.

Mr. BELLMON. Mr. President, this amendment is similar to a provision of the coalition amendment to the Finance Committee tax bill H.R. 13511, passed overwhelmingly only 2 days ago. In fact, both the House and Senate have given 2-to-1 mandates for such a provision. Despite the fact that this provision is somewhat weaker than the restraint imposed in the coalition amendment—for example a 19.5 percent ratio of expenditure to GNP in 1983 rather than the 20 percent in this amendment—I believe it is a necessary and proper addition to this bill.

The Congress, reflecting the demands of the voters, has indicated its insistance upon a reduced Federal sector. The second budget resolution in its 5-year projections this year provides a 1983 proportion of expenditures to GNP of 19.9 percent. It is a feasible and responsible goal. In 1958 the proportion was 18.7 percent, in 1968 21.5 percent and 23.2 percent in 1978. The budget resolution this Congress has adopted promises a reduction to 21.5 percent in 1979—so the direction is proper. We have found in our budget process that planning especially long-range planning, is the key to a well-functioning budget process; 20 percent is only a return to the average proportion of the last decade. It is not a radical goal or idle wishful thinking.

The amendment to the tax bill which the coalition introduced would:

First. Hold outlays to no more than a 1-percentage point rate of growth above the Nation's rate of inflation;

Second. Reduce the relative size of the Federal sector to 19.5 percent in successive steps by 1983 from its present 21.5-percent level, and

Third. Provide a balanced budget by fiscal year 1982.

Thus, Mr. President, I am not only concerned about the share of Federal Government spending in GNP, but also bringing the budget into balance. Nevertheless, I am told by economists that inflation alone could balance the budget by shoving taxpayers into higher and higher tax brackets. Balance could be at 20, 25, 30, or even 50 percent of GNP—depending upon the rate of inflation. I feel strongly, Mr. President, that balance at the cost of an increased Federal sector is not what Congress or the American people want.

When I was Governor of Oklahoma, we, like many other States, passed a law requiring our budget—except for capital improvement items—to be balanced each year. It worked. I came to Washington 10 years ago hopeful that we could do the same here. I was, and still am, convinced that constant yearly deficits erode fiscal discipline and promise inefficient and inflationary Government activities. Similarly, they force the Federal Reserve System into the dilemma of having to expand the Nation's money supply with its inflationary consequences.

The budget has been balanced only twice in the last 20 years—1960 and 1969. Cumulative deficits total $311.7 billion over that time period while surpluses amount to only $3.5 billion. Whether or not the deficit was needed on a yearly basis at the time, it is inflationary for the Treasury and Federal Reserve to have to refinance such staggering amounts of debt.

Mr. President, I would point out that the converse of a growing Federal sector is a shrinking private sector. In these times when inflationary pressures are rampant and when more and more knowledgeable people are pointing their fingers at the Federal sector as a prime culprit, it impels us to send a clear message to the American people that we are working to expand the private sector.

UP AMENDMENT NO. 2103

(Purpose: To establish the appropriate share of an expanding gross national product accounted for by Federal outlays)

Mr. MUSKIE. Mr. President, I call up my amendment, on behalf of myself, Mr. NELSON, Mr. JAVITS, and others.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from Maine (Mr. MUSKIE) for himself, Mr. NELSON, Mr. JAVITS, and others, proposes an unprinted amendment numbered 2103.

Mr. MUSKIE. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

In lieu of the matter proposed to be inserted on page 116A, insert at the appropriate point the following new subsection:

"(j) The Congress further declares that it is the purpose of the Full Employment and Balanced Growth Act of 1978 to rely principally on the private sector for expansion of economic activity and creation of new jobs for a growing labor force. Toward this end, it is the purpose of this Act to encourage the adoption of fiscal policies that would establish the share of the gross national product accounted for by Federal outlays at the lowest level consistent with national needs and priorities.".

In lieu of the matter proposed to be inserted on page 118 insert: "fiscal policies that would establish the share of an expanding gross national product accounted for by Federal outlays at the lowest level consistent with national needs and priorities, and strike all the remaining language."

Mr. MUSKIE. Mr. President, for the past few days, I have had to live on the floor, listening to Senator after Senator complaining about the rigidities of the budget process. Some of those arguments have been very emotional, very vigorous, to the point that I wondered whether or not the budget process could survive if the Senate were asked to vote today on its discontinuance.

Yet, here we are, considering proposals to fix public policy in place which will limit the options which the Budget Committee can consider for presentation to the Senate.

The Budget Committee does consider itself bound by law, if that law means anything.

I have listened with a great deal of interest to the colloquy between Senator PROXMIRE and Senator PERCY. In effect, they have tried, by colloquy, to amend the Proxmire amendment to a meaningless piece of rhetoric. If all the questions raised by the Senator from Illinois with the Senator from Wisconsin are indeed an accurate interpretation of the Proxmire language, then, in effect, the Proxmire language does not mean anything more than I think it should mean—a pious wish.

I said earlier this afternoon that either those numbers in the Proxmire amendment mean something or they do not. If they mean something, they can limit our options severely at a time when we might regard those limitations with great regret. If they are meaningless—if all those options are open to us, whatever those numbers—then why do we need it?

We have the same numbers in the report of the Senate Budget Committee this year, and I ask unanimous consent that the table on page 27 of the Senate Budget Committee report be printed at this point in the Record.

There being no objection, the table was ordered to be printed in the RECORD, as follows:

A 5-YR PROJECTION OF THE FISCAL YEAR 1979 BUDGET

[In billions of dollars]

	Fiscal year—				
	1979	1980	1981	1982	1983
Outlays	487.5	536	575	623	669
Revenues	448.7	500	572	649	726
Fiscal policy changes projected for later years (tax reductions or spending increases, cumulative)		8	27	39	54
Surplus (+) or deficit (−)	−38.8	−44	−30	−13	+3
Outlays/GNP (percent)	21.6	21.5	20.9	20.5	19.9

Mr. MUSKIE. Mr. President. those numbers are better than the Proxmire numbers, and they represent a commitment by the Budget Committee. But they are based on the assumption that moderate expansion will continue without break through 1983, and that there will be a resurgence in the private sector beyond what is now evident in those later years. The Proxmire amendment makes no such qualifications. This is the path we intend to follow, if economic circumstances permit. If they do not, then the budget process gives us the flexibility to respond to the changes and circumstances.

If the Proxmire amendment means what it does by those numbers, it deprives us of that flexibility. If it does not, as a result of the colloquy between the Senator from Illinois and the Senator from Wisconsin, we do not need it. It is as simple as that.

My amendment reads very simply. It says this:

The Congress further declares that it is the purpose of the Full Employment and Balanced Growth Act of 1978 to rely principally on the private sector for expansion of economic activity and creation of new jobs for a growing labor force. Toward this end, it is the purpose of this Act to encourage the adoption of fiscal policies that would establish the share of the gross national product accounted for by Federal outlays at the lowest level consistent with national needs and priorities.

Mr. President, I submit that the Budget Committee has followed that kind of policy from the beginning. In our first year, at the bottom of the recession, outlays as a share of gross national product were 22.4 percent, if one did not include the off budget agencies, and 23 percent, if one included off-budget agencies, of which the biggest is the Federal Financing Bank, which is under the jurisdiction of the committee chaired by the Senator from Wisconsin.

His amendment does not tell us whether his numbers include the Federal Financing Bank or not. But in any case, from a high of 22.4 percent we have steadily reduced the outlay share of GNP until in fiscal 1978 it is 22 percent, in the fiscal 1979 budget it will be 21.6 percent, and I have already put in the record our target for 1983 of 19.9 percent. That would mean a reduction from 22.4 percent in fiscal 1975 to 19.9 percent in fiscal 1983.

Surely, that record that we have been writing and that commitment we have been making is as solid an assurance as this Senate can give on the economic future of the country in the next 5 years, without the Proxmire amendment and especially if the Proxmire amendment admits of the kind of flexibility that he assured Senator PERCY and admitted of. I read the Proxmire amendment, and I do not see any such kind of flexibility. Now he can argue that there is no enforcement mechanism and that is true, except that as chairman of the Budget Committee when something is written into law that seems definite the enforcement mechanism is my conscience. He admits of no flexibility there. He admits to no flexibility to the President. There is no review mechanism there. There is no authority for the President to change those numbers. Those numbers are in the amendment with now the one flexibility that he has written in with respect to meeting the unemployment goal of the Humphrey-Hawkins bill.

So, Mr. President, I submit my amendment, as chairman of the Budget Committee, with our record of commitment to precisely the goals of the Proxmire amendment, but with the advantage that the Budget Committee and the Senate as a whole by adopting this substitute has the flexibility to meet that great range of unanticipated exigencies, emergencies, and needs that the government of a country and an economy as complex as ours has. To try to write a 5-year economic plan for this economy into fixed law, either it is fixed or not—I am not sure what Senator PROXMIRE intends at this point—but in a fixed law, and that is what those numbers look like to me. makes no commonsense at all especially when we have a process in place that clearly on the the record is moving us toward the same objective, the same goals, with the added advantage of flexibility to change course when the national interest requires that we change course.

Mr. ROBERT C. BYRD. Mr. President, will the Senator yield?

Mr. MUSKIE. I yield to the majority leader.

Mr. ROBERT C. BYRD. I thank the distinguished Senator from Maine.

ORDER FOR RETURN OF PAPERS ON H.R. 12929

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the Secretary of the Senate be authorized to request the House of Representatives to return the papers on H.R. 12929.

The PRESIDING OFFICER. Without objection, it is so ordered.

FULL EMPLOYMENT AND BALANCED GROWTH ACT OF 1978

The Senate continued with the consideration of H.R. 50.

Mr. MUSKIE. Mr. President, I reserve the remainder of my time.

Mr. PROXMIRE. Mr. President, will the Senator from New York yield?

Mr. JAVITS. We yield time in opposition to the Senator from Wisconsin.

Mr. PROXMIRE. Mr. President, I thank my good friend from New York.

Mr. President, obviously a vote for the Muskie amendment is a vote against the amendment that I have put up. It is a vote for providing a specific goal for inducing a goal that we point out is moderate, limited, and well within what the President and Budget Committee both indicated we can do by 1981 and 1983.

Furthermore, it is a vote against a specific limit on spending that means anything.

Read the language of the Muskie amendment. The first sentence is exactly the same and puts the emphasis on that the same as it was in my amendment. After that it says:

Toward this end, it is the purpose of this Act to encourage the adoption of fiscal policies that would establish the share of the gross national product accounted for by Federal outlays at the lowest level consistent with national needs and priorities.

That is nice. We all would like to do that. We have been saying that for years. We have been saying it in the Chamber. The Presidents say that all the time. But it does not mean anything unless there is a specific goal one can measure it against. I do not mean a region.

Mr. MUSKIE. Mr. President, will the Senator yield on my time?

Mr. PROXMIRE. I yield on the Senator's time.

Mr. MUSKIE. It is backed by more than that. It is backed by our 4 years of budget process that laid out these goals and stuck to them.

Mr. PROXMIRE. All right.

Mr. MUSKIE. And stuck to them. That is the record and the support behind the langage I have introduced.

Mr. PROXMIRE. Now, Mr. President, I wish to come to that.

This reminds me of the old story about the boxer who is getting clubbed all around the ring. He is bloody, bowed, and knocked down four or five times and staggers to his corner and his manager says:

"He didn't lay a glove on you." And the boxer turns to the manager and said "Keep an eye on the referee because somebody is beating the dickens out of me."

I tell that story because look what happened. The Budget Committee has done a good job under all the circumstances. As I said over and over again, I have great admiration for them. But up until 1975 when we authorized the Budget Committee spending in any peacetime year had not been above 20.5 percent and most of the time it was well below that.

Since then, in 1965 it was 22.4 percent; in 1976, 22.5 percent; and in 1977, it went down a little bit to 21.9 percent; and in 1978 it was 22.6 percent.

Of course, this year we do not know as yet but it is roughly the same level.

I say that unless we do something specific and definite, unless we set standards against which we can measure their performance, we can always say we are fiscally responsible, we are trying to hold down spending and we aim to hold down spending and are going to try our best to do it. Unless one measures it some way, unless one has a standard against which he can say the President and Congress is not doing a good job or is doing a good job, it simply will not mean very much.

Mr. President, under those circumstances, I do hope Senators will recognize what they are doing when they vote on the Muskie amendment. They are voting in favor of providing a goal for unemployment, a goal for inflation, but the one area over which we really have control, Federal outlays, the one area which is our responsibility, not the responsibility of the economy as a whole or what happens over in Europe or what happens with respect to oil or what happens with climbing food prices, but our responsibility, the Federal outlays, they say:

No, we cannot do it. No, we cannot do it. We cannot accept that because it is too rigid.

Mr. President, if there is any area where we should set goals and where those goals will be effective, where they will be useful, where we can measure our performance against the standard we have set, it is in this area.

Mr. President, I reserve the remainder of my time.

Mr. MUSKIE. Mr. President, I wish to take note on this occasion that if my information is correct, Senator PROXMIRE's vote on my amendment will be his 6,000th consecutive vote, which means 12 years without missing a vote. I think that is a remarkable record. It is too bad that his 6,000th vote is going to be the wrong one.

[Laughter.]

But, nevertheless, I had not realized that his record had climbed to such astronomical proportions.

I would say this in tribute to him, that every one of those 6,000 votes has been a reflection of his own intellectual ability, his commitment to the public interest, and his own conscience. I cannot remember a Senator who has been more conscientious not only to meeting the schedule of the Senate but also to the issues which confront him.

I could not resist using my amendment as a chance to congratulate him on that.

Mr. DOLE. Mr. President, will the Senator yield?

Mr. MUSKIE. I yield.

Mr. DOLE. I think it would be a tragedy if he did not win the 6,000th vote.

Mr. PROXMIRE. I cannot thank the Senator enough. What the Senator from Maine could really do if he really means, and I am sure he means the affection, to show his affection is to vote against his own amendment. That would be marvelous and he would show he really recognizes the 6,000 consecutive vote.

Incidentally, I beat the record of his distinguished former colleague, Margaret Chase Smith, and so there is a Maine element in here, too. But let us really put the icing on the cake.

Mr. MUSKIE. The real trouble is I do not want to break my record of never having been wrong.

Mr. SARBANES. Mr. President, will the Senator yield?

Mr. MUSKIE. I yield.

Mr. SARBANES. I think it is very important in view of the colloquy that has just taken place that on the next vote the Senator from Wisconsin lose, because we would then prove that we have the ability in the Senate to separate the substance of an issue on which we may disagree very strongly from the profound respect which we have for a particular individual and for his role in this body. Therefore, the best way to prove in this instance the enormous affection and respect we have for the Senator from Wisconsin and this incredible 6,000-vote record, is to defeat him on the amendment and demonstrate our affection and respect for him as an individual. We would not want anyone to think that our judgment on the substance of this amendment was influenced by our ability to respect one of our colleagues as an individual.

Mr. NELSON. Mr. President, on that very thoughtful note, I am prepared to yield back the remainder of my time.

The PRESIDING OFFICER. Is all time yielded back?

Mr. PROXMIRE. I yield back my time. I ask for the yeas and nays.

The PRESIDING OFFICER. All time is yielded back. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Maine. The clerk will call the roll.

(Mr. ZORINSKY assumed the Chair.)

Mr. CRANSTON. I announce that the Senator from South Dakota (Mr. ABOUREZK), the Senator from Alabama (Mrs. ALLEN) the Senator from Colorado (Mr. HASKELL), and the Senator from Kentucky (Mr. HUDDLESTON) are necessarily absent.

Mr. STEVENS. I announce that the Senator from New Mexico (Mr. DOMENICI), the Senator from Pennsylvania (Mr. HEINZ), the Senator from Idaho (Mr. MCCLURE), the Senator from New Mexico (Mr. SCHMITT), the Senator from Virginia (Mr. SCOTT), and the Senator from Texas (Mr. TOWER) are necessarily absent.

The PRESIDING OFFICER. Have all the Senators voted?

The result was announced—yeas 56, nays 34, as follows:

[Rollcall Vote No. 491 Leg.]

YEAS—56

Anderson	Gravel	Melcher
Bayh	Hart	Metzenbaum
Bentsen	Hatfield, Paul G.	Moynihan
Brooke	Hathaway	Muskie
Bumpers	Hodges	Nelson
Burdick	Humphrey	Pearson
Byrd, Robert C.	Inouye	Pell
Cannon	Jackson	Randolph
Case	Javits	Ribicoff
Church	Johnston	Riegle
Clark	Kennedy	Sarbanes
Cranston	Leahy	Sasser
Culver	Long	Sparkman
DeConcini	Magnuson	Stafford
Durkin	Mathias	Stennis
Eagleton	Matsunaga	Stevenson
Eastland	McGovern	Talmadge
Ford	McIntyre	Weicker
Glenn		Williams

NAYS—34

Baker	Goldwater	Nunn
Bartlett	Griffin	Packwood
Bellmon	Hansen	Percy
Biden	Hatch	Proxmire
Byrd, Harry F., Jr.	Hatfield, Mark O.	Roth
Chafee	Hayakawa	Schweiker
Chiles	Helms	Stevens
Curtis	Hollings	Stone
Danforth	Laxalt	Thurmond
Dole	Lugar	Wallop
Garn	Morgan	Young
		Zorinsky

NOT VOTING—10

Abourezk	Heinz	Scott
Allen	Huddleston	Tower
Domenici	McClure	
Haskell	Schmitt	

So the amendment (UP No. 2103) was agreed to.

Mr. JAVITS. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. NELSON. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. JAVITS. Mr. President, I yield to the majority leader.

Mr. ROBERT C. BYRD. Mr. President, I have two very important technical matters I need to take a minute or two on. On Tuesday evening——

The PRESIDING OFFICER. Will the Senator from West Virgina suspend? The Senate is not in order. Will Senators please clear the well, so that the Senator from West Virginia may be heard? Senators will please take their conversations to the cloakrooms, or please be seated. The Senate will be in order.

When the Senate comes to order, we can proceed. Until then, we will suspend.

Mr. JAVITS. Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. JAVITS. Mr. President, is action now in order on the amendment of the Senator from Wisconsin, as amended by the Senator from Maine?

The PRESIDING OFFICER. That is the pending question.

Mr. JAVITS. Will the Chair put the question?

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Wisconsin, as amended.

The amendment, as amended, was agreed to.

Mr. JAVITS. Mr. President, I move to reconsider the vote by which the amendment, as amended, was agreed to.

Mr. SARBANES. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. JAVITS. Mr. President, I yield to the majority leader.

Mr. ROBERT C. BYRD. Mr. President, by inadvertency, the word "may" was written into the substitute on page 156. It should have been the word "shall."

I ask unanimous consent that that word may be changed to "shall."

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

UP AMENDMENT NO. 2104

Mr. BELLMON. Mr. President, I have an amendment at the desk, amendment No. 2104. I ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Oklahoma (Mr. BELLMON), for himself and Mr. CHILES, proposes an unprinted amendment numbered 2104.

Mr. BELLMON. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 155, line 13, strike "shall" and insert in lieu thereof "may".

On Page 156, line 4, strike "shall" and insert in lieu thereof "may".

Mr. BELLMON. Mr. President, this amendment is very simply to change the word "shall" on page 155, line 13, to "may." On page 156, line 4, the same change is made, the world "shall" is stricken and the word "may" is inserted.

Mr. NELSON. Mr. President, may we have order? I wish to say that although

this involes only one word, it is an important word with important consequences within the bill. I believe the Members who are here and who wish to understand the issue would like to be able to hear about it. I would hope Senators would listen to the Senator from Oklahoma.

The PRESIDING OFFICER. The Senator from Wisconsin is correct. The Senate is not in order. Will the Senators please retire to the cloakrooms for private conversations? Those Senators remaining in the Chamber will please give their undivided attention to the Senator from Oklahoma.

The Senator from Oklahoma.

Mr. BELLMON. I thank the Chair, and I thank my friend from Wisconsin.

Mr. President, the effect of this amendment is to leave the exercise of the authority provided in section 304 to the discretion of Congress rather than making it mandatory. We are changing the word "shall" to "may" so that some discretion can be used rather than being forced to take an action which the Congress may not wish to take.

As it presently stands, section 304 of the compromise says that, in the event that the President recommends in his economic report that the unemployment goal established in section 4 cannot be achieved, until after the 5-year period in the bill, the Budget Committee shall—and that is the word we are concerned about—include in the first concurrent resolution on the budget the year in which the goal can be attained—in the estimation of the Budget Committee. The proposed amendment would change that "shall" to "may."

Mr. President, making this provision mandatory would inevitably lead to a situation where we would all be confronted with having to vote on whether full employment should be achieved in, say, 1984 or 1988.

To me, this is a ridiculous situation. We all want full employment as quickly as we can get it. Forcing the Senate and individual Members to vote on a year 5 years in the future or 7 years in the future really does not make any sense. Such a vote could not conceivably be based upon factual alternatives.

Members of the Senate, whether we like to face it or not, are all politicians. We are not university economists, and a vote in the Senate for either choice would not necessarily bear the slightest relation to the real ability of the Congress or the country to effect the desired outcome.

Given such a choice, which of us, if we thought only of political considerations, could risk a vote for any year other than the earliest year that is offered?

It is like the argument we had earlier about whether or not we really need to debate what is a proper level of unemployment. We are all in favor of the lowest unemployment we can get, and we are all in favor of getting there just as quickly as we can. So this requirement which would touch off such a debate would produce, in my opinion, a very unhealthy and almost meaningless confrontation.

But that is not all. Another provision of this act—which, ironically enough, was intended to protect the budget process from this kind of political gymnastics—would require that any proposed revisions of goals also include the changes in the actual budget numbers necessary to achieve those goals.

Mr. President, it takes little imagination to conceive of the lunacy that would inevitably result as politically-motivated amendments to goals would also force revisions of the numerical totals included in the resolution. If the issue at hand was going on record as having to chose between 1984 and 1988 as the proper time when our Nation should achieve full employment, who are we to let something so trivial as mere numbers prevent us from opting for the earlier date? Why not just slash $3, $5 or $10 billion from the national defense function, for example, and shift it to the employment function? After all, the Budget Committee would have spent a whole year in balancing questions of all national priorities in order to determine functional numbers that reflect carefully calculated budget choices, on the basis not only of their judgment but also on recommendations made by every standing committee of the Senate, and the President as well.

The numbers in the budget resolution, and the goals that those numbers reflect, are not tools to be manipulated only to suit our political whims. This is not to say, of course, that they are to be carved in stone and never altered by this body. But proposed changes should reflect serious consideration of the economic, social and budgetary consequences, as well as the political ones.

Mr. President, we should adopt this amendment. If we do not adopt this amendment, the result could be the total subversion of our congressional budget process. And I would remind my colleagues that this process belongs to the whole Congress, not just the Budget Committee. It is our sole means of systematically reviewing and ordering national goals and national priorities. It is one sole means of coordinating the vast range of Federal programs and policies with those goals and priorities. If we of our own volition, in an irresponsible sacrifice to unbashedly selfish political concerns, destroy that process, then this Congress will have suffered a shameful, humiliating loss.

So, Mr. President, my reason for joining with the distinguished Senator from Florida in offering this amendment is to avoid a meaningless debate that would turn strictly on political considerations and not upon facts, and which I believe would do great damage to the budget process, which seems to have been making some progress through the action of the Congress this year.

I strongly urge the adoption of this amendment.

I am happy to yield to the Senator from Florida.

Mr. CHILES. I thank the distinguished Senator from Oklahoma.

Mr. President, I am delighted to have this opportunity to associate myself with the remarks of the Senator from Oklahoma. We are cosponsors of this amendment. I believe the thrust of what we are trying to do in this amendment, in changing the world "shall" to "may," is to recognize that under these provisions it is the President who is called upon to meet the unemployment goals.

It is the President that is called upon, if he decides that he cannot meet those goals in the requisite period of time, to submit that in a message to the Congress and say that he cannot meet those goals within that period of time. That message will come to the Budget Committee and it should be up to the Budget Committee to determine how they want to handle that change that he has made; how they wish to respond to it. To make the word "shall," to say that the Budget Committee "shall," really is to take away the flexibility of the Budget Committee and of Congress to determine how they should handle that.

Certainly, giving us the right to be able to respond and to make any comments is fine, but I do not think we should carve that in stone and make that a requirement that we must. Again, I think it takes some of the flexibility and some of the authority, even, away from the President, because this is supposed to be a planning device.

This is supposed to be goals that we are setting. We are not tying a veto in, or we should not be tying in a veto. The President should feel free, if he feels he cannot make those goals within that period of time, we want him to be able to feel free, and he should, to tell the Congress that he cannot, to tell the American people that he cannot. But if we are locking in a device that appears that we are building a confrontation—that if he says he cannot make it, then the Budget Committee is going to come down and castigate him as to why he says he cannot make this—we are then locking this into stone. We are moving away from some kind of planning device. We are perhaps going to require more, perhaps the President will start fudging more, that in effect he is making it, so we can change some of the terms.

We do not want that at all. What this is supposed to be is a means by which we are supposed to get information out and have the American people understand what we are trying to do. We are going to have the President and Congress working in this regard. If we are going to do that, if we are going to have that kind of meeting of the minds, then I do not think we want to lock in this confrontation device by putting the word "shall" in. I think we would be much better off if we had that "may," rather than "shall."

I thank the Senator from Oklahoma for yielding to me. I yield the floor.

Mr. RIEGLE. Mr. President, will the Senator yield to me?

Mr. JAVITS. Mr. President, I am going to claim the time in opposition. I am happy to yield.

Mr. RIEGLE. If the Senator from New York wants to go next, that is all right with me. I want to speak in opposition, too.

Mr. JAVITS. How much time does the Senator want?

Mr. RIEGLE. Five minutes.

Mr. JAVITS. I yield.

Mr. RIEGLE. I want to direct my comments to the Senator from Florida who just spoke, and the Senator from Oklahoma, who is the sponsor of the amendment. I am astonished that the Budget Committee would not want to accept this responsibility. In effect, by going from "shall" to "may," the Budget Committee is really walking away from the opportunity to make an independent judgment on this number. In effect, it is rubberstamping by not acting, by electing to deal ourselves out. It is, in effect, rubber stamping ahead of time whatever the President might choose to do.

Let me say to my friend from Oklahoma, in his opening statement, he commented to the effect, if I understood him correctly, of concern about whether Congress would withstand political pressure and whether we have enough character to be able to make a dispassionate judgment on what year we would try to meet the unemployment goal. The suggestion was there that, somehow or other, the President would be in a stronger position or more independent or more able to withstand that pressure to make that judgment. I want to say I reject that proposition.

I do not see any reason to believe that Congress would somehow be more susceptible to political pressures in pulling that percentage in closer than the President of the United States would be. As a matter of fact, I think we have just as much character and just as much independence of mind and ability to address that question as the President does. If we are going to argue to the contrary, why do we even need a budget process? Why not just let the President do that as well? Why are we even in the act if, in effect, we are not here to render our own independent judgment?

I think we are capable of making a kind of measured, reasoned decision as to whether or not changing the target year for the unemployment goal make sense. The President is not always going to be right.

I must say, I am very troubled about deciding now to take ourselves out of that process and to say, whatever he does we are satisfied with, that we are going to rubberstamp it, because we are not even going to deal with it, we are just going to cede that responsibility totally.

We do not do it in other areas. We do not do it in the budget area, or in terms of national spending priorities. Once we set this goal, as we are doing here, it troubles me very much to think that we are, in effect, going to walk away from the responsibility of being part of that decision to change that goal if it is to be changed.

I might say further there is a reason why 1983 was picked rather than 1982 or 1981 or 1980. There was implicit in selecting 1983, in the judgment of the two committees of jurisdiction, that that gives us sufficient time to take steps to work ourselves toward an unemployment goal of 3 percent for adults at that particular time. We think that is reasonable. That reflects a judgment. We might have said some other year. We might have said 1980. We did not say that, we said 1983. That is an effort to set a goal, looking forward, that we think can be met.

If we are going to give the President at the outset the ability to move that goal down the line some years in the future without even participating in it, we are, in effect, walking away today from the very judgment we are putting down on paper. That just does not make sense to me.

I think it runs counter to everything I have heard about the budgetary process, because the people on the Budget Committee, who, I think, have done excellent work, normally have stepped up to responsibility, not walked away from it. It seems to me that anything as significant as changing this goal that we have established, is something the Congress ought to bear equal responsibility for, along with the President. The only way we can do that is to tie ourselves into that process now.

That is why committing ourselves to participate in that decision, to look at it, crosscheck, whoever is President, the judgment of that President with our own judgment, is the only responsible way to go.

I hope that, thinking about this, the sponsor of the amendment might see that side of the argument.

Mr. BELLMON. Mr. President, before I respond, I ask unanimous consent that the distinguished Senator from Maine (Mr. MUSKIE) be added as a cosponsor.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BELLMON. Mr. President, the Senator from Michigan makes a good point. We in Congress, certainly those in the Budget Committee, do have a responsibility shared with the President in this area of setting goals. We try to do that.

The argument I was making was that when we are talking about something far into the future which does not relate directly to the budget resolution, which does not relate directly to the numbers which make up the resolution, to me, it would be an almost irresistible political temptation to vote for the most promising of the various proposals before us.

Not many of us are going to want to go home and say that we are not optimistic about the future, that we are going to have a difficult time getting to the level of unemployment that has been set in the act within the shortest time possible.

Maybe I am not as politically stalwart as others, but I would think when we are talking about something as nebulous as this kind of propcsition, you may as well go head and vote for the most promising, the most optimistic proposition. Then if it turned out better, or turned out that you were not right by the time they finally arrived, not too many would remember.

To me, this whole thing is intended, the purpose of the bill is to give us some guidelines. Those guidelines are not going to be binding anyway, so we may just as well go ahead and use the word "may" instead of "shall". On the last vote, the vote of government spending as a percentage of GNP, it was won by those who favored flexibility rather than those who wanted a fixed number. The Senator from Michigan was one of those who voted for flexibility. Here we are trying to keep this same policy by giving us flexibility by changing the word "shall" to "may." I really feel this is an important change in the bill and will not do violence to the objective of those who authorized this legislation.

Mr. JAVITS addressed the Chair.

The PRESIDING OFFICER. The Senator from New York.

Mr. JAVITS. Mr. President, I yield myself 5 minutes from the time in opposition.

Mr. President, I hope Members will listen to this discussion carefully. I think it is well worthy of it.

The difference between "may" and "shall," in my judgment, is the whole difference between the Budget Committee, as I conceived it, and I was one of those originators, and it now seems to be conceived from this amendment by my colleague.

The question before the Senate is this, shall we, the Senate, be the final word, or shall the Budget Committee be the final word?

That is the issue. Because if the word "may" remains, then if the committee chooses to bring the question of timetables for achievement of numerical goals for unemployment to the floor, then we are the arbiters, but if they choose not to, then the President's word is final.

May I repeat that, because that is the essence of this controversy, if the Budget Committee chooses to bring this question of timetables to the floor when the President fixes it, then it becomes our opportunity. We can make it, we can unmake it. But if they choose not to, that is the end of it. There is no appeal. The President's word on the question of objective, which we hope will counter the general thrust of the Federal Government's Establishment, is final.

My concept of the Budget Committee was that we expected it to do an excellent staff job, but not to run the Senate. We have the final word. As a matter of fact, the Senate voted overwhelmingly that way the other night upon Senator LONG'S issue, precisely that way. We felt that in the final analysis, we have the last word. This would deprive us of the last word. So I think it is very important. The numerical goal and timetable here is the ball game.

What is this Humphrey-Hawkins bill all about? It is how much we are willing to accept in the way of unemployment in order to plan our Federal Government operations.

There are no authorizations in this bill for programs. I went through it with a fine tooth comb myself and saw that every one was eliminated. There are no authorizations for appropriations except the irrelevant cost of running this particular operation, which is not great.

So that is all out of it. It is essentially a planning bill, a bill of concept and intention.

Here, we would be deprived with this one little word, which can be very important, of our opportunity to run it.

By the way, there is no doubt about the fact that we are very proud of Sen-

ator MUSKIE and Senator BELLMON and what they have done with the Budget Committee. I do not want a single word of what I say to intrude in that. I think they have done a great job. Almost every time I have had a close question, I have backed them. There is no doubt about that.

But I am coming now to this particular purpose, which people like myself have had such a hand in crafting, and let us remember the word "shall" is in here. We had a group, a real blend of the Senate, we had people considered liberal, we had people considered conservative, we had people considered moderate, who finally got together on this, and the word "shall" is in the bill. What the amendment proposes is to change it. So let us remember that.

One last point. I have copied the words. I hope Senator BELLMON will correct me if I am wrong, but he said, "an irresistible political temptation." That is, it would be an irresistible political temptation to take a lower goal sooner, even though it may not be economically sound.

Mr. President, it used to be said around here that it was an irresistible political temptation to vote all kinds of appropriations, for all kinds of groups. But now, the irresistible political temptation is to hold things down and to put a very sound roof on them.

So, the irresistible political temptation is what the people elected us to deal with here.

One might call it an irresistible political temptation and another man might call it a way in which to save the Union.

In short, we were sent here in order to take the responsibility and have the brains to do what we are supposed to do.

If we are going to assume that the way to resist temptation is to put things beyond our power, we ought to be recalled by every one of our constituents. We would simply be forfeiting our responsibility to the President of the United States.

The whole concept of Humphrey-Hawkins is that the Congress and the President will fix the goals and timetables of the Nation, not the President alone, not the Congress alone.

Therefore, I believe, Mr. President, really deeply, and this is a very serious one, that this will vitiate everything we are trying to do, not only in this measure, but the whole concept of the Budget Committee and how it operates. We are the final one, in the Senate.

Again, I repeat, as I began, if we write the word "may," it means it is up to the committee whether they will give us a crack at it or not, or just let it lie where it is with the President's decision.

Mr. President, that is what I do not want, and I deeply believe the Senate should not want.

Mr. CASE. Will the Senator yield?

Mr. JAVITS. I yield.

Mr. CASE. Mr. President, I want to say that I have never heard a better speech on this floor. If the Senator from New York did nothing else all year than make that speech, his presence would have been justified.

He has done many things more than make that speech. But it was a magnificent summation, analysis, of a point which seems to me essential and points up exactly what the function of the Senate and of the Congress must be in this instance.

Mr. JAVITS. I thank my colleague.

Mr. MUSKIE. Will the Senator yield?

Mr. BELLMON. How much time does the Senator request?

Mr. MUSKIE. Five minutes.

Mr. BELLMON. Mr. President, I yield whatever time the Senator wishes.

The PRESIDING OFFICER. The Senator from Maine.

Mr. MUSKIE. Mr. President, the fact is that I come down in between the Senator from Oklahoma and the Senator from New York. Having participated in administering the Budget Act for 5 years, I do not see any difference in practice between "shall" and "may."

I agreed to cosponsor this amendment with my good friend from Oklahoma, and with others who have cosponsored it, because they are sensitive to what they perceive is a difference.

Now, one looks at any one of our Senate Budget Committee reports and one finds heavy emphasis, especially the opening chapters on fiscal policy, on the economy, on the relationship between the budget and full employment, on economic objectives and assumptions, on unemployment rates, on inflation, and the impact of this on revenues.

We view our committee, and always have, not as simply a bookkeeping committee to add up the numbers on the budget, but as an economic force, as the Congress economic voice.

In view of that, and the role of the Senate in other matters, it is the same. We have never tried to conceal the economic assumptions upon which the budget is based.

But some of our Members are sensitive about putting numbers on the face of the budget resolution, especially when we are asked to consider not just an unemployment number, but an inflation number, an outlay GNP ratio number. Putting all those numbers on the face of the budget resolution posed for most of us the specter of Senators voting for the most politically attractive number, whether it made economic sense or not, and whether all those numbers related to each other in a real way in terms of the economic circumstances of that particular year.

I repeat that I was willing to work with either "shall" or "may." But I do not expect the performance of the Budget Committee to be any less sensitive to the fact that we are the servants of the full Senate and not the dictators of the full Senate.

I expect that practice to continue, and I know that Senator BELLMON and Senator CHILES expect that practice to continue. So I have no difficulty with either word.

I think that if the President acts to suspend whatever numbers he is given authority to act on under this bill, the Budget Committee will exercise its responsibility to evaluate the President's action and to submit its evaluation to the Senate. I do not have any doubt about that at all.

The word "may" is insisted upon for the same reason we objected to the Proxmire amendment—that it excludes the possibility that unforeseen circumstances, unanticipated circumstances may suggest a change in the way in which we react to the President's action or a change in the way we react to the numbers.

For that reason, I join Senator BELLMON on this amendment and strongly urge the Senate to support the amendment, with the assurance that I back up, with whatever credibility I have, that we will not try to isolate the Senate from our own views or from the action of the President or from the change in the numbers that are contained in the resolution. We just want full freedom to do so in ways that are consistent with economic realities in which our decision will remain. That is all there is to it.

To some extent, I regard it as a matter of semantics rather than reality, but I know how seriously Senator JAVITS feels about it. I do not denigrate at all what he has said, but I try to put my view in some kind of context that I hope is understandable.

Mr. JAVITS. Mr. President, I yield to the Senator from Kansas.

Mr. DOLE. Mr. President, I hope we will not spend much more time on this amendment. I think it has been pretty well explored.

Some of us would like to pass the bill. I am not suggesting that it might fall on one word, but it seems to me that we are not conferring any additional power on the Budget Committee. On the contrary, by the use of the word "shall," we sort of preclude action by anybody else. We do not lose any options in Congress by the word "may." A simple resolution, a joint resolution—we have all the options we need.

Getting back to the spirit of what we hope will be a successful day, this was discussed in the Budget Committee, and the vote was 13 to 3 to support the use of the word "may." I would guess that had a vote been taken in our coalition group, it would have been "may," but we deferred to the distinguished Senator from California (Mr. CRANSTON), who felt strongly about the use of the words.

I think we might be able to dispose of it on a voice vote. In any event, I do not believe we do any violence by removing the word "shall" and inserting the word "may" in the two places suggested.

Mr. JAVITS. Mr. President I yield 2 minutes to the Senator from Michigan.

Mr. RIEGLE. I thank the Senator for yielding.

Mr. President, I emphasize again the fact that I have great confidence in the Budget Committee, and that is why I would like to repose this responsibility very directly in the Budget Committee.

In terms of responding to political pressure, I have more confidence in the Budget Committee resisting those temptations than I do in looking back at the

history of the four Presidencies I have seen in the time I have been in Congress.

As to the worry about someone who is going to set this number doing it in a political fashion and for political reasons, I think that may actually apply more to people in the White House than people here, especially since we are talking about a 1983 goal. There is going to be a 1984 Presidential election, and I would rather have the collective judgment of Republicans and Democrats in the Senate, on the Budget Committee, looking at something as important as changing that unemployment goal, which is the whole purpose of this bill, than I would in setting up a situation in which, in effect, we can sidestep that responsibility and hand it over to whoever is President. I would like us to lock it in.

I have much more confidence in the Budget Committee's ability to do that job, if it understands that that is part of its job, and I think it should be. Quite frankly, I think we violate the partnership idea if we do not see that that is done.

If we allow a President to shift that goal and we make it elective as to whether or not the Budget Committee participates, I think we are walking away from the most important part of our responsibility, to see that these goals are met.

So, frankly, I think it is a contradiction, because everything I have seen on the floor of the Senate in the last few days has been for the Budget Committee to reach for and accept responsibility; and this is the first occasion I have seen in which he Budget Committee has had an opportunity to have an important responsibility that it seems to be walking away from. I have to say that I am surprised at it. As one who supports the Budget Committee, it does not make good sense to me.

Mr. JAVITS. I yield myself 2 minutes, and then I will yield to the Senator from Oklahoma.

Mr. President, I took down the words of Senator MUSKIE, whom I regard with the greatest affection and respect. He said:

> We are the servants of the Senate, not the dictators of the Senate.

I say to the Senator that there is a difference, if he will forgive me, in these two words in that statement, for this reason: If the word "may" appears, then you may simply decide not to do anything about what the President says. If the word "shall" appears, as Senator RIEGLE says, you have to do something about it. Then the Senate is able to do something about it.

It seems to me, therefore, that instead of leaving that question to chance, personal volition, whoever happens to be chairman of the Budget Committee, whoever happens to be the ranking minority member—I am sure Senator MUSKIE and Senator BELLMON feel exactly the same—if we keep the word "shall," we are mandating what I understood was going to be our function when I served on the first organization meeting of the Budget Committee: to wit, we would do superbly well the staff function for the Senate, but we would not make the final decision. I do not see how you can get away from that.

I am a lawyer, as I think everyone knows, and the word "may" means you may or you may not. The word "shall" means that is your duty; you will report it to the Senate. I think that is especially so in a matter such as this.

I repeat: The matter of irreversible political temptation was mentioned earlier. What are we here for? We might as well give up everything to the President, if we are not going to test ourselves on irreversible political temptation and working to try to discipline ourselves by not giving ourselves the power of decision. Why were we sent here—to be vote computers?

Mr. President, it seems to me that this is the key to the exercise in which we are engaged; and with the greatest respect for both men, who are marvelous servants of the people and great Senators, I deeply feel that this amendment should be rejected.

Mr. MUSKIE. Mr. President, will the Senator yield?

Mr. JAVITS. I yield.

Mr. MUSKIE. Mr. President, I cannot conceive of the Budget Committee not exercising a responsibility that the committee and, for too long, no one outside the committee was willing to concede was a committee responsibility, and that is responsibility for economic policy. I cannot conceive, whichever word is used, that the committee would not aggressively assert its view of what economic policy should be, not only in the abstract, but also with respect to goals that Congress lays down in policy at any time.

I think the word "may" would be honored with a positive response from the committee in every conceivable instances I can anticipate.

Perhaps I cannot be as candid on the floor as I would be if I were talking to the Senate outside, but I assure him that he is going to get the same result in either case.

The Senator will say—and I know how good a lawyer he is, because I have had the privilege of working with him on some important legislation—that it is better to nail it down. I suggest that in this instance we can anticipate the same result, that the practice will nail it down and that there is nothing to fear from it.

I am not asking the Senator to give me a blank check or anything such as that, but I give him that assurance.

He and I do not really disagree. I think the Budget Committee has a positive responsibility, whether or not the law says so, to advise the Senate on this point. If for no other reason than that I like the committees I chair to be something, I would assert that. I know that the Senator knows that.

Beyond that, I suppose I cannot be more definite. I hope I have conveyed something to the Senator.

Mr. JAVITS. Mr. President, I say to the Senator that I feel about this, without protracting the debate, like I feel about life. We live every day as if we were going to live forever. We have to legislate every bill as if it were a bill for the ages.

That is why I argued as I did.

I thank my colleague. I am prepared to yield back my time.

Mr. BELLMON. I yield back the remainder of my time.

Mr. JAVITS. Mr. President, I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. All time having been yielded back, the question is on agreeing to the amendment of the Senator from Oklahoma. The yeas and nays have been ordered.

Mr. JAVITS. Mr. President, does the Senator want a voice vote?

Mr. NELSON. I have no preference.

Mr. JAVITS. Mr. President, I ask unanimous consent that the request for the yeas and nays may be vacated.

The PRESIDING OFFICER. Is there objection?

Mr. GOLDWATER. I object, Mr. President.

Mr. JAVITS. All right.

The PRESIDING OFFICER. Objection is heard.

The question is on agreeing to the amendment of the Senator from Oklahoma.

On this question the yeas and nays have been ordered and the clerk will call the roll.

The legislative clerk called the roll.

Mr. CRANSTON. I announce that the Senator from Alabama (Mrs. ALLEN), the Senator from Colorado (Mr. HASKELL), and the Senator from Kentucky (Mr. HUDDLESTON) are necessarily absent.

Mr. STEVENS. I announce that the Senator from New Mexico (Mr. DOMENICI), the Senator from Pennsylvania (Mr. HEINZ), the Senator from Idaho (Mr. MCCLURE), the Senator from New Mexico (Mr. SCHMITT), the Senator from Virginia (Mr. SCOTT), the Senator from Texas (Mr. TOWER), and the Senator from North Dakota (Mr. YOUNG) are necessarily absent.

Mr. GOLDWATER. Regular order, Mr. President.

The PRESIDING OFFICER (Mr. MELCHER). Have all Senators in the Chamber voted?

The result was announced—yeas 50, nays 40, as follows:

[Rollcall Vote No. 492 Leg.]

YEAS—50

Baker	Ford	Morgan
Bartlett	Garn	Moynihan
Bellmon	Goldwater	Muskie
Bentsen	Gravel	Nunn
Biden	Griffin	Packwood
Brooke	Hansen	Pearson
Bumpers	Hart	Percy
Burdick	Hatch	Proxmire
Byrd, Harry F., Jr.	Hathaway	Roth
Cannon	Hayakawa	Sasser
Chafee	Helms	Stennis
Chiles	Hollings	Stevens
Curtis	Inouye	Stone
Dole	Johnston	Talmadge
Eagleton	Laxalt	Thurmond
Eastland	Lugar	Weicker
	Metzenbaum	Zorinsky

NAYS—40

Abourezk	Hatfield,	Nelson
Anderson	Paul G.	Pell
Bayh	Hodges	Randolph
Byrd, Robert C.	Humphrey	Ribicoff
Case	Jackson	Riegle
Church	Javits	Sarbanes
Clark	Kennedy	Schweiker
Cranston	Leahy	Sparkman
Culver	Long	Stafford
Danforth	Magnuson	Stevenson
DeConcini	Mathias	Wallop
Durkin	Matsunaga	Williams
Glenn	McGovern	
Hatfield,	McIntyre	
Mark O.	Melcher	

NOT VOTING—10

Allen	Huddleston	Tower
Domenici	McClure	Young
Haskell	Schmitt	
Heinz	Scott	

So the amendment (UP No. 2104) was agreed to.

Mr. BAKER. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. CRANSTON. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

ANOTHER MILESTONE IS REACHED

Mr. ROBERT C. BYRD. Mr. President, the Senate has just passed another milestone. Senator WILLIAM PROXMIRE of Wisconsin has answered his 6,000th—6,001—consecutive rollcall vote in this body. He not only completed 6,000, but he is one vote on his way to the 7,000th.

I add that not only is the accomplishment of this feat noteworthy; it is characteristic of the career of one of the most dedicated public servants in the Senate. I congratulate Senator PROXMIRE on achieving this record today, and I thank him for his conscientious attention to all his duties among us.

Senator PROXMIRE was elected to the Senate in 1957. Over the 21 years that he has represented the citizens of Wisconsin in Congress, WILLIAM PROXMIRE has forged a solid legislative record as a champion of pragmatism, thrift, and service by the Federal Government. In election after election, he has won the increasing support of the voters of Wisconsin, as they have expressed their appreciation to him for the caliber of his representation and leadership in the Senate. Moreover, his tenacity and dedication to principle have won him wide admiration and respect throughout this Nation.

A native of Illinois, Senator PROXMIRE adopted Wisconsin as his home State after earning academic degrees at Yale and Harvard, and following a valuable career in the U.S. Army during World War II. He subsequently worked as a reporter and political analyst for a Madison newspaper, and was elected to the State assembly in 1950.

Senator PROXMIRE is widely known for his personal commitment to physical fitness and for presenting the Golden Fleece Awards. But he is winning added respect among his colleagues and the citizens of this Nation for the meticulous skill that he has brought to his chairmanship of the Committee on Banking, Housing, and Urban Affairs. He exemplifies a devotion to duty in the attention that he gives to issues great and small. Further, he realizes that, too often, otherwise good programs fail because of a lack of attention given to determining the details of their implementation. No one knows how much money and frustration Senator PROXMIRE has saved the citizens of this country through the exercise of his keen powers of analysis and the application of his broad practical experience in the fulfillment of his Senate duties.

Mr. President, it has been a pleasure for me to serve in the Senate with Senator PROXMIRE during the past two decades.

And I thank the people of the beautiful State of Wisconsin for sharing two of their finest resources with us by sending WILLIAM PROXMIRE and GAYLORD NELSON to represent them in the Senate.

This record of 6,001 rollcalls is an all-time record. Even though we may live to see the millennium it will never be equaled, in my judgment.

Mr. PROXMIRE. Mr. President, will the Senator yield?

Mr. ROBERT C. BYRD. I wish to finish my statement.

[Laughter.]

Mr. PROXMIRE. Be my guest.

Mr. ROBERT C. BYRD. Yes, I yield.

Mr. PROXMIRE. May I say the last part of the Senator's speech was magnificent, one of the best speeches I heard in many, many years. The first part of the speech, however, I must say did not measure up to the last.

FULL EMPLOYMENT AND BALANCED GROWTH ACT OF 1978

The Senate continued with the consideration of H.R. 50.

Mrs. HUMPHREY obtained the floor.

Mr. ROBERT C. BYRD. Mr. President, will the distinguished Senator from Minnesota yield me 2 minutes?

Mrs. HUMPHREY. I yield to the Senator from West Virginia.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that there be a 2-minute time limitation on the CETA conference report, which I am about to submit.

The PRESIDING OFFICER. Without objection, it is so ordered.

COMPREHENSIVE EMPLOYMENT AND TRAINING ACT AMENDMENTS OF 1978—CONFERENCE REPORT

Mr. ROBERT C. BYRD. Mr. President, I submit a report of the committee of conference on S. 2570 and ask for its immediate consideration.

The PRESIDING OFFICER. The report will be stated.

The legislative clerk read as follows:

The committee of conference on the disagreeing votes of the two Houses on the amendments of the House to the bill (S. 2570) to amend the Comprehensive Employment and Training Act of 1973 to provide improved employment and training services, to extend the authorization, and for other purposes, having met, after full and free conference, have agreed to recommend and do recommend to their respective Houses this report, signed by all of the conferees.

The PRESIDING OFFICER. Without objection, the Senate will proceed to the consideration of the conference report.

(The conference report is printed in the House proceedings of the RECORD of October 11, 1978.)

Mr. NELSON. Mr. President, the conference was handled by the Senator from New Jersey (Mr. WILLIAMS) and the Senator from New York (Mr. JAVITS). If Senator JAVITS wishes to make a comment, I yield to him.

Mr. JAVITS. Mr. President, I urge my colleagues to give their strong support to the conference report on the Comprehensive Employment and Training Act.

The bill the Senate conferees bring back from the conference is in its concept essentially as the bill passed by the Senate on August 25. Considerable changes are to be effected in the CETA program as a result of the conference agreement. In general, eligibility for participation in CETA programs—both job and training positions—will be limited to those who are economically disadvantaged and who are the long term unemployed. In both titles II and VI, special consideration will be afforded for those who are on public assistance.

Most importantly, the conferees have agreed to establish in title II, part D, a new targeted employment program, called "Transitional Employment Opportunities for the Economically Disadvantaged." This new program will be targeted on the hardest to employ and upon those areas of our country which suffer most severely from the problem of endemic structural unemployment; $3 billion is the authorized level in fiscal year 1979 for the new part D program which will, for the first time, couple training and employability development with public job positions. This is why the emphasis is placed upon transitional employment opportunities. The intent is that the structurally unemployed are to be moved from unemployment to unsubsidized employment as a result of their participation in this title II–D program.

The CETA bill that I introduced in January of this year provided for the same clear distinction between employment programs for the structurally unemployed and those for the cyclically unemployed as does the agreement we bring back from the conference. We estimate that some 325,000 transitional employment opportunities will be available as a result of the $3 billion authorization provided in the bill for part D. It has been my feeling for some time that the key to solving the unemployment problems of the economically disadvantaged was through the provision of a job program that was coupled with needed training, so that instead of make-work for the poor we would have work-study; work-training that would move the unemployed to economic independence and human dignity.

The conference agreement for title VI would provide for a countercyclical pub-

lic service employment program which would provide employment positions for those unemployed during periods of less than full employment. Senate conferees agreed to the trigger provision included in the House bill which would trigger up and down the authorized number of public service job slots as the national unemployment rate rises and falls. Under the conference agreement, Federal jobs will be authorized for 20 percent of the unemployed above 4 percent unemployment.

At my urging the conferees agreed to change the trigger rate if the unemployment rate exceeds 7 percent. Thus, jobs would be authorized for 25 percent of the unemployed above 4 percent unemployment when the unemployment rate exceeds 7 percent. On this basis, at 5 percent unemployment, 200,000 jobs would be authorized; at 6 percent, 400,000 jobs; at 7 percent, 600,000 jobs. At 7½ percent unemployment, 875,000 jobs and, at 8 percent, 1 million jobs. The conferees recognized, therefore, that the 20 percent target was adequate when the unemployment rate was under 7 percent. Above 7 percent we are in an entirely different and very severe labor market situation, and this justifies a higher standard: one which authorizes public service jobs for 25 percent of the unemployment above 4 percent.

The decision by the conference will insure that a number of public service jobs are available for the unemployed when they are needed most, to wit: During periods of serious economic distress.

I might add at this point, Mr. President, that the conference agreement respecting the distinction between the title II transitional employment program and the title VI countercyclical employment program was based upon a compromise package that I put forward during the conference. Under the provisions of that compromise package title II–D remains essentially as in the Senate bill, except that minimum percentage amounts are mandated for training in fiscal years 1979 through 1982 and that we provide that not more than 60 percent of the total appropriation for title II can be used for title II–D purposes.

With respect to the title VI program, the conferees agreed in principle with the House provisions, except that eligibility would be for those unemployed 10 of the last 12 weeks or on welfare, which was in the Senate bill, and that special consideration would be provided for public assistance recipients, which was also in the Senate bill.

Mr. President I wish to discuss briefly the formula on money authorizations which was agreed to by the conferees on the basis of a proposal which was put forward with the Senator from Wisconsin (Mr. NELSON). The conferees agreed that for title II, parts A, B, and C—the training component—in fiscal year 1979, funds will be allocated on the basis of the formula for the training part included in the Senate bill, to wit: 50 percent on the basis of prior year funding; 37½ percent on the basis of total unemployment (annual average); 12½ percent on the basis of the number of low income adults. In fiscal year 1980 and beyond, for the title II training provisions, the House bill approach will be followed, to wit: 66⅔ percent on the basis of the above factors; and 33⅓ percent on the basis of the number unemployed in areas of substantial unemployment.

For title II–D, the transitional employment opportunities program, the formula will be as included in the original Senate bill, except for a modification proposed by Congressman PERKINS to include a low income adult factor. Thus, the four factors will be divided into four equal parts as follows: 25 percent, total number of unemployed (annual average): 25 percent, excess number of unemployed over 4½ percent (annual average); 25 percent, number unemployed in the areas of substantial unemployment (high 3 consecutive months basis in fiscal year 1979, annual average thereafter); and 25 percent, number of low income adults.

For title VI, the conferees agreed to the provisions of the House formula, which are: 50 percent, total number unemployed (annual average); 25 percent, excess number unemployed over 4½ (annual average); 25 percent, number unemployed in the areas of susbtantial unemployment (high 3 consecutive months basis in fiscal year 1979, annual average thereafter).

The definition of an "Area of Substantial Unemployment," therefore, will be as in the Senate bill, to wit: high consecutive 3 months in fiscal year 1979, annual average thereafter. The only exception to this will be for purposes of title II—parts A, B, and C, (training), where the ASU will be defined on the high 3 consecutive months basis for the life of the bill—4 years. The annual average basis for defining ASU will be used for calculating allocations after fiscal year 1979, therefore, for programs under title II—part D and title VI. Of course, the annual average basis will be used for calculating all other formula factors in the bill—total unemployed, excess unemployed, etc.—beginning with fiscal year 1979 and continuing through 1982.

Mr. President, I am especially gratified that this legislation also incorporates a separate bill embodying authority that I believe to be of great importance in helping to bring about a new era of cooperation between labor and management. This bill, the Labor-Management Cooperation Act of 1978, was adopted unanimously by the Human Resources Committee, accepted by the Senate, and agreed upon by the conferees.

This act amends the National Labor Relations Act (NLRA) to authorize the Federal Mediation and Conciliation Service (FMCS) to encourage and assist joint labor-management cooperative committees established at the plant level and on an area and industry-wide basis. This bill is a modification of an earlier bill, S. 533, which I introduced in the Senate and which was introduced by Representative LUNDINE in the House. That bill was previously reported favorably by the House Banking Committee.

There is a growing recognition that labor-management committees, dozens of which now operate successfully across the country, can bring a new and important dimension to labor-management relations. Such joint committees can do much to enlarge the community of interests between workers and management and assist both in recognizing mutually beneficial solutions to common problems. They can constitute an enormously useful form for addressing problems such as alcoholism and drug abuse, work hazards, obsolescent job skills, and production bottlenecks, and can help to improve communications by establishing a dialog between labor and management.

The Labor-Management Cooperation Act offers a practical framework to involve workers more directly in developing solutions to problems encountered in or affecting their work environment. Genuine worker participation is fundamental to greater utilization of our human resources which must be achieved in the face of rising costs, energy and material shortages, greater foreign competition, and increasing technological sophistication. Improving the quality of working life in this context can mean real advantages to workers and management alike and the U.S. economy as a whole.

Joint labor-management committees can also help to improve the labor-management climate in a particular area and thus contribute to the process of regional economic development. This has been our experience in New York, where the Jamestown Area Labor-Management Committee has been cited as a major factor in the reversal of a decade-long period of economic decline. The Jamestown experience is not an isolated one. The recent Commerce Department funded report of the Academy for Contemporary Problems, "Revitalizing the Northeastern Economy," contains many references to the importance of labor-management committees. In the chapter entitled "Perfecting Northeastern Labor Markets," the authors point out:

> The survey found strong sentiment among business and labor for a regional "umbrella" leadership organization of top labor and business leaders under whose sponsorship, a wide range of cooperative activities in the interest of both parties might be undertaken.

The Federal Mediation and Conciliation Service is in a unique position to administer Federal involvement in such a program, in both the private and public sectors. The FMCS has long and extensive experience in assisting labor-management committees. Equally important, it has in place a network of trained mediators who enjoy the confidence of labor and management representatives across the country. The daily involvement of the Service and its field staff in labor-management negotiations sensitized it both to the importance of protecting the collective bargaining process from encroachment and to the need

for alternatives to collective bargaining for exploring common problems of labor and management.

The Labor-Management Cooperation Act incorporates proper safeguards for the integrity of the collective bargaining process. By its terms assistance to labor-management committees at the plant level is authorized only where employees of that plant are represented by a labor organization and where there is a collective bargaining agreement in effect. Similarly, the FMCS is to provide financial assistance to labor-management committees established on an area or industry-wide basis so long as labor organizations which represent employees of participating employers are included among the participants. Employers whose employees are not represented by a labor organization may also participate in such area or industry-wide labor-management committees.

It is thus the purpose of this act to permit assistance to such committees whose membership is compromised of both organized and unorganized employers. However, in this respect section 8(a)(2) of the National Labor Relations Act must be borne in mind and care must be taken to be sure that no labor-management committee activity will provide any efforts of employers intended to bring about actual domination or control of any labor organization or interfere with any rights protected by the NLRA.

Mr. President, the Comprehensive Employment and Training Act and conference report deserves strong support of all of our colleagues. We have made substantial improvements in the current law to deal with the problems that have plagued this program recently. I believe we will have a vastly improved CETA program targeted on the people and areas of our country that are in greatest need of employment and employability development assistance. CETA will not be a make-work program; CETA will not a job development program. Training, which has always been my biggest interest, will be an integral part of the job development programs that occur in CETA in the next 4 years. I am confident it will work and that this bill will represent a major endeavor in dealing with the scourge of unemployment that is so deeply disturbing to us all.

I commend the conference report to the Senate.

As I say, Mr. President, the fundamental concept of the Senate bill was followed by the conferees. The salient factor was that we would apportion the public service jobs to the unemployment situation, and we continued, therefore, the old target of 20 percent of unemployment until unemployment got to 7 percent. In that case above 7 percent, it was upped to 25 percent of the unemployed above 4 percent.

The only other point was that the view of the Senate was accepted respecting training, which becomes a heavy component of what is done, and for the first time we effectively separated the structurally unemployed, including many youth and minorities, from the cyclically unemployed, which separation is represented in the so-called title VI of the bill.

There are many other very important details in this large bill, but I think I have given the Senate the fundamental thrust of what divided us, and how we compromised.

Mr. BELLMON. Mr. President, will the Senator yield me 1 minute?

The PRESIDING OFFICER. All time on the conference reports has expired.

Mr. JAVITS. I yield the Senator from Oklahoma 1 minute on the bill.

Mr. BELLMON. Mr. President, I have been convinced for sometime that we must redirect CETA away from so-called countercyclical jobs to services for those most in need of employment and training assistance, and I congratulate the conferees on the success they have had in moving in that direction.

As overall unemployment declines, CETA should increasingly serve the structurally unemployed—the hard core, minority youth, and welfare recipients. The bill before us, Mr. President, will largely accomplish that redirection.

When the Senate passed S. 2570, I offered an amendment to tighten eligibility in the CETA program. The tighter eligibility rules the Senate adopted—when my amendment was accepted—are preserved virtually intact in this conference agreement.

The conference report also preserves the hard work of the Human Resources Committee—and the Senate as a whole—in dealing with the issue of fraud and abuse in the CETA program. This bill will require tighter management controls, and impose stiff penalties on those who would operate outside the law and the regulations.

As a result of this bill and the appropriations decisions we are making this week, the CETA program will be more effective than in the past, even though the overall level of CETA public service jobs will be smaller than it has been in the recent past.

Finally, Mr. President, this conference agreement places a high priority on placement in private sector employment for those whom the program serves. We must be concerned about jobs for people—when they leave the CETA program—and we all know that most jobs are in the private sector. This bill will result a much higher emphasis on private sector involvement in CETA and I believe that bodes well for the future.

Again, Mr. President, I want to congratulate the conferees. Their task was not easy, but they have done well. I am pleased to be able to support the CETA reauthorization in this bill.

● Mr. STAFFORD. Mr. President, as a member of the Human Resources Committee, I strongly recommend to the Senate the passage of the conference report on S. 2570, which extends the Comprehensive Employment and Training Act for another 4 years.

The members of the committee and the Senate listened carefully to the criticisms and assessments that were made of CETA and we have acted to improve the program in response to those criticisms. Penalties for fraud have been tightened; the emphasis has been shifted from public service employment to improved training. This will enable participants to advance themselves into permanent employment in the private sector as well as into regular, traditional government jobs.

The managers of the legislation have described it fully. However, I do want to express my great satisfaction over the special emphasis which the new design of CETA gives to the problems of young people.

The scattered programs targeted on youth in the existing CETA have been brought together under one title—title IV—of S. 2570.

I have an author's pride particularly in regard to subpart 2, part A, of title IV. This is the section authorizing Youth Community Conservation and Improvement Projects. The particular beneficiaries of this provision are young persons aged 16 to 19 who are unemployed. All benefit under this provision: the young people who are given work and good training; their communities who benefit from the practical work done to renovate public buildings, improve public lands, provide insulation and other weather protection for the housing of poverty-level citizens; and the taxpayer whose investment in these young people of high school age will be rewarded by the training of good citizens capable of public treasury.

I am glad that my colleagues agreed with me not to place an incomes limitation on the eligibility of participants. Other portions of the youth programs are targeted on the poor. This section I designed to cope with the particular problems of high school dropouts, especially in our more rural communities. This social problem cuts across all economic lines. In rural areas, the income disparities among this group are not likely to be very great anyway.

So, Mr. President, we have tightened, and improved CETA. I recommend it wholeheartedly to my colleagues and, although I am a member of minority, am confident in giving the Senate my assurance that the Committee on Human Resources will be maintaining close oversight throughout the continued life of CETA.●

● Mr. CRANSTON. Mr. President, I am pleased to support the conference report on the Comprehensive Employment and Training Amendments of 1978.

This measure, which is based on a proposal submitted by the administration in February and which I was pleased to cosponsor in the Senate as S. 2570, would revise and reauthorize for 4 fiscal years—through fiscal year 1982—the Comprehensive Employment and Training Act of 1973 (CETA), as amended.

Mr. President, CETA, is an integral part of this Nation's employment strategy. In its first 5 years of operation, it has served literally millions of persons in need of jobs and job-training assistance. This reauthorization measure has been carefully developed and designed to provide for the continuation of this valuable initiative that attempts to meet the employment needs of economically disadvantaged, unemployed, and underemployed individuals through a wide variety of employment and training oppor-

tunities administered primarily by those most familiar with local needs.

GENERAL BACKGROUND

Mr. President, before I discuss particular provisions of the conference agreement now before the Senate, I would like to make some general comments about the measure.

First, and most important, this measure is much tougher and stricter in some respects than the original 1973 amendments; the 1974 amendments, which added the title VI public service jobs program; and the 1976 amendments which expanded the title VI program and added "targeted" public service jobs—a provision which I authored.

Mr. President, new provisions—some of which I will briefly outline in a few moments—will serve to curb some of the abuses that have, unfortunately, occurred in the implementation of the program in the past.

Clearly, Mr. President, the individual success stories made possible as a result of CETA largely outweigh—in human terms—those abuses that may, in some cases, have been distorted out of proportion and may not be as widespread as they appear. But those of us responsible for making the law cannot close our eyes to the abuses and problems that have occurred. The people of California, in approving proposition 1^, have told public officials that fat, fraud, waste, and unresponsiveness in Government must be cut out.

That is precisely what we have tried to do in designing this extension legislation. Certainly, there are a number of provisions in this bill that will not be popular with those who administer and are responsible for local programs. Some provisions in this bill will drastically change the nature of the program, will place restrictions on participation and eligibility that never existed previously, and will set ceilings on wages that never before were limited.

But, Mr. President, I firmly believe that if compassionate people in Government—especially those of us in Congress—are unable or unwilling to cut the fat, fraud, waste, and unresponsiveness, then others who care nothing about the needy or about programs to meet their needs, will rush in to cut the muscle and the good things in Government right along with the bad. There is so much of value in the CETA program that it is imperative that we deal honestly and constructively—as this bill does—with the problems and take action to preserve the integrity, cost-effectiveness, and purpose of CETA: To serve those who need society's help and can benefit from training and employment programs.

Second, Mr. President, we have tried to coordinate in this bill the administration of the program at all levels. CETA has developed rather like a "patch-work quilt." First, there was the Comprehensive Employment and Training Act of 1973. Then, as the Nation moved toward a recession, the Emergency Jobs and Unemployment Assistance Act of 1974. In 1976, as the recession deepened, we enacted the Emergency Jobs Programs Extension Act of 1976. In 1977, because of the new administration's need to examine the program, we extended it for 1 year by enacting the Comprehensive Employment and Training Act of 1977—a simple 1-year extension. Finally, last year, in a major new spirit of commitment to the unemployment problems of our Nation's youth, we had the Youth Employment and Demonstration Projects Act of 1977. After 5 years, the resulting statute is unnecessarily complicated and, in many cases, a duplicative maze of provisions—further complicated by regulations implementing the law—that do little to enhance effective administration of the program at the local level.

What we have tried to do in revising the legislation is to try to make the program more manageable for responsible local officials and those who are involved with CETA at all levels by eliminating unneceessary paperwork and reporting requirements; standardizing criteria for the programs; consolidating and clarifying provisions applicable to the entire act in a new title I; and incorporating new complaint and sanction provisions for prime sponsors. In addition, we have more clearly defined the distinction between services for structurally and cyclically unemployed persons.

These improvements should make the administration of the program more effective, more responsive, and less complicated. In so doing, unnecessary redtape and regulations which are both costly and frustrating for those associated with the CETA program should be reduced.

DESCRIPTION OF BILL

Mr. President, I would like to outline a number of provisions of the bill which I believe are noteworthy.

COMPREHENSIVE EMPLOYMENT AND TRAINING SERVICES

Since all administrative and general provisions have been consolidated into a new title I, programs previously conducted under that title would be conducted under a new title II—comprehensive employment and training services. The valuable initiatives now carried out by prime sponsors such as job counseling, skill training, work experience programs, OJT, and countless others, will now be conducted under title II–B of the act. We have tried to strengthen provisions that would serve more effectively the needs of disabled individuals, older workers, and youths.

A new title II–C—upgrading and retraining—would, for the first time, permit prime sponsors to provide financial assistance to public and private employers for the costs of occupational upgrading programs. This new initiative is designed to serve individuals in entry-level positions or in jobs with little or no opportunity for advancement.

Title II–D is one of the two public service job divisions in the bill. This program of public service employment would serve those individuals who are structurally unemployed, that is, those who are, primarily because of lack of skills and experience, unlikely to be able to compete effectively in the labor market. Jobs under this part would be coupled with appropriate training and supportive services to enhance the future employability of participants.

SPECIAL FEDERAL RESPONSIBILITIES

Mr. President, title III of the bill, special Federal responsibilities, would revise the current title III which authorizes the Secretary to use funds, at his discretion, to meet the employment-related needs of persons who face particular disadvantages in the labor market. The new provisions would retain the authority of the Secretary to conduct special programs for persons with limited English-language proficiency—a provision which I authored in the original 1973 act. In addition, it retains the authority for Native-Americn and migrant and seasonal farmworker programs—two initiatives which are of longstanding concern to me.

DISPLACED HOMEMAKERS

The measure also adds a new authority that I authored in the Senate which will require the Secretary to fund programs which provide employment opportunities and related training and support services for displaced homemakers. The language of the provision is based upon an amendment I introduced to S. 2570—amendment No. 1716 to S. 2570—on March 9, with the cosponsorship of Senators BAYH, RIEGLE, HATHAWAY, ANDERSON, and MCGOVERN. The provisions of my amendment were derived from legislation which had been sponsored by Senator BAYH and 21 others early in the 95th Congress as S. 418, the proposed Displaced Homemaker Act.

Mr. President, in September 1977, the Subcommittee on Employment, Poverty, and Migratory Labor held 2 days of hearings, chaired by Senator RIEGLE, on the needs of displaced homemakers. During those hearings, testimony was presented that showed displaced homemakers—individuals in their middle and older years who have been absent from the labor force and have been working in the home for a substantial number of years—have unique needs and difficulties when they find themselves "displaced" from their family role as a result of the death of a spouse, a divorce, or the disability of the primary wage earner.

These individuals suddenly find themselves thrust into the job market and facing special problems in trying to enter the workforce and become economically self-sufficient. They are often ineligible for social security benefits either, because of age or the 10-year marriage requirement. They are ineligible for Federal welfare, because they are neither aged, disabled, nor have children under 18 years of age. They are ineligible for unemployment insurance, because they were engaged solely in unpaid labor in the home. They are ineligible, in many cases, for jobs targeted for "older workers"—those over 55 years of age—because they fail to meet the income criteria or may be too young.

While the exact number of displaced

homemakers cannot be pinpointed, Mr. President, recent census data shows there are more than 3,164,000 widows, aged 35 to 64 and 2,435,000 divorced women. In the past decade, female-headed households have grown 10 times as fast as two-parent families. Statistical evidence indicates that women are entering the labor force in increasing numbers for basic economic reasons. Women, particularly older women, are often ill-prepared to enter the job market. If they do breach the barriers of age and sex discrimination, they are still likely to be employed at low-level occupations that provide only marginal income. This cycle can be broken only by supplementing the inadequacies of earlier education and training and their lack of recent work experience with counseling, training, and job programs designed to provide better-paying opportunities.

Mr. President, it is clear that these women have skills that can be transferred to the paid-work environment. Providing a means for them to become employed contributes to tax revenues at all levels, may save welfare costs, and addresses a vital community need. But the displaced homemaker needs to gain self-confidence, before she can be prepared for employment. She needs to be shown that her years as a homemaker have produced skills which can be transferred to a paying job. She needs "job-readiness training" as well as job training.

I believe that increased assistance and service to this identifiable segment of the population is needed. The participation of women in CETA has been historically low and it is suspected—although there are no firm statistics to confirm this—that when women are served, they tend to be younger, and consequently easier to place. In addition, it is likely that women are generally placed in jobs or job training slots traditionally held by female workers—such as clerical or secretarial opportunities—rather than developing more nontraditional jobs for these women. The special needs of these displaced homemakers—particularly for identifying and enhancing those skills they have acquired in the home and translating those skills to experience of value in the labor market—require more time and individualized attention than is generally available under programs operated under other titles of CETA.

Mr. President, the Subcommittee on Employment, Poverty, and Migratory Labor heard testimony during the CETA reauthorization hearings from both Arthur Flemming, Chairman of the U.S. Commission on Civil Rights, and Tom Bradley, of the Employment Task Force of the Ad Hoc Coalition of National Organizations Concerned With Older Americans, pointing out the very low levels of service presently being provided under CETA to older workers—particluarly older women. Specifically, Dr. Flemming noted:

> The Comprehensive Employment and Training Act Training and Public Service Employment Programs restrict participation of older persons because these programs rely for their "success" on the public and private employment markets, which often discriminate in employment on the basis of age, and which often maintain compulsory retirement policies which encourage discrimination in employment on the basis of age.

In addition, a study by the Women's Equity Action League on the job-related problems of women over age 40 found that from January to November 1975, out of 14,284 participants under the CETA title I programs, only 3 percent were older workers, either male or female, over the age of 40. The report also found that while 13 percent of those running CETA programs considered older women in a positive way, 73 percent either had no contact with them or described them as people very difficult to place in jobs after training.

Mr. President, the provisions establishing the displaced homemaker program have been developed so as to focus primarily on the employment aspects of the problem and to enhance the employability of those it is designed to serve. However, this does not mean that other, more general training and support services would not be provided. These services are an integral part of making permanent placements of these individuals in meaningful and productive jobs that will substantially improve their lives and livelihoods.

In addition, the program is designed to avoid duplication of existing services and initiatives in the community. I believe these projects can function best if they are a well-integrated component of the larger structure and take maximum advantage of available community resources. Thus, the provision gives the Secretary great flexibility in determining who will run projects—prime sponsors, public agencies, or private nonprofit organizations. In this way, the Secretary can determine—based on the merits of each applicant through a competitive process—what the best structure is for the community being served. I believe the Secretary should consider funding projects run by a mix of entities—experimenting to see which are more successful and applying that experience in making subsequent funding decisions.

However, Mr. President, recent experiences in dealing with the employment problems of displaced homemakers has demonstrated great success through the establishment of displaced homemakers centers, such as the one in Baltimore, Md. The Maryland Center, open since 1976, has served close to 400 persons, 90 percent of whom now have incomes under $6,000 a year. Those who have run this successful program feel that its effectiveness has been due in no small part to the fact that it is a centralized place where the displaced homemaker can obtain a variety of services.

In addition, the experience in my own State of California, largely through the Alliance for Displaced Homemakers, is of particular interest. The first project of the alliance was to work for enactment of California legislation, S.B. 825, the Nation's landmark displaced homemakers bill—which was introduced in the California State Senate on April 10, 1975. It called for setting up one multipurpose center geared to meet the needs of older women who had found all existing programs ineffective and particularly deficient in job placement. The bill called for testing a theory of creating new jobs within communities—jobs that would fill unmet community needs. A provision for a well-women health clinic was added, since preventive care during middle year cuts down the incidence of illnesses often termed chronic in old age.

The California 2-year test program was to be funded for a total of $200,000, a figure based not on experience, since there was no precedent for this innovative legislation, but on the practical "we'll make do" philosophy of these former homemakers who had dealt with tight budgets all their married lives.

S.B. 825 was passed in California by a nearly unanimous decision in each of the committees, by a large majority in the assembly, and unanimously in the full senate. In 121 working days after its introduction, S.B. 825 was signed by Governor Brown on September 25, 1975.

On May 15, 1976, the first center opened on the campus of Mills College in Oakland, Calif. The average age of women served by the center is 52. Workshops such as money management, skills assessment, divorce counseling, assertiveness training, and job hunting are offered.

Women who have found employment through the Mills College program include a divorced woman who is developing a job for herself as a lay advocate guiding persons going through divorce, a twice-widowed woman who has an internship at a gerontology institue, a woman with mechanical skills who is now apprenticed to a printer, and a woman, 65, who is a community worker in the California Department of Social Services.

Since the start of the Mills College program, displaced homemakers legislation has been introduced in 28 State legislatures. However, there are now still only about 10 operating programs throughout the country.

Mr. President, the conference agreement contains a set-aside of 2 percent of title III funds for the establishment of a displaced homemaker program. In addition, Assistant Secretary for Employment and Training Ernest Green, during full committee consideration of the legislation, indicated that the Department plans to make available $5 million in fiscal year 1979 for funding displaced homemaker programs, including some multipurpose centers.

Mr. President, I ask unanimous consent that there be printed in the RECORD at this point the committee transcript of the exchange that occurred between members of the committee and Assistant Secretary Green on May 11.

There being no objection, the transcript was ordered to be printed in the RECORD, as follows:

Assistant Secretary GREEN. Mr. Chairman, the Administration wants to make it known that the Employment Training Administration, in connection with the Women's Bureau, is in the process of setting up a task force and we will make available next year out of discretionary money amounts in the amount of $5 million to run demonstration projects. This would be title III funding. We expect that this will be both demonstration projects as well as offering technical assistance to the private funds activities in funding these programs.

Senator NELSON. You have set it up?

Assistant Secretary GREEN. We have set up a special task force in the Department.

Senator NELSON. What is the function?

Assistant Secretary GREEN. The function is to coordinate the title III programs in this category and monitor them as well as to the members of the prime sponsors.

Senator CRANSTON. What use will the Department make of multipurpose centers?

Assistant Secretary GREEN. We have not selected the programs that will operate. We would expect some of them would request funding and we look forward to supporting them.

Mr. CRANSTON. Mr. President, I want to point out that, although the measure does not set certain age requirement or give priority to individuals over a certain age, the Committee on Human Resources does believe that the needs of older individuals are particularly acute. The committee stated on page 32 of its report—Senate Report No. 95-891—that in implementing the program:

The Secretary should take into account and give special attention to the needs of older women who are displaced homemakers. The Committee did not wish to deny access to any displaced homemaker solely on account of age. However, it is particularly concerned about the needs of all individuals in their middle-years who are experiencing unique difficulties in gaining access to the labor market because of age. In this regard, the Committee expects that, in prescribing regulations pursuant to section 301(b), the Secretary will recognize the special problems which may be associated with age, luck of education or training, household support obligations, and prospects for employment.

Mr. President, I hope also that in addition to the establishment of a displaced homemaker program under title III, this segment of the potential labor force is designated in title I for special emphasis in programs conducted by prime sponsors under all other titles of the act. In this regard, it was our intent that opportunities under title III will supplement, and not be in lieu of, activities to be made available for displaced homemakers by the prime sponsors.

YOUTH PROGRAMS

Mr. President, title IV of CETA as revised by this extension would pull together a number of existing authorities designed to meet the employment needs of youth.

Included in this title are the provisions of the Youth Employment and Demonstration Projects Act of 1977 (Public Law 95-93) enacted last year. At that time, it was designed only as a 1-year program that would give us a base of experience upon which to build an effective program for youth. However, due to a number of factors—including enactment of the measure only last August—the implementation of the new authorities was slower than anticipated and, even though almost 230,000 youths are currently enrolled in programs under the new law, we have extended the program for an additional 4 years with slight modifications. In this way, we will be able to examine the results of experiences and learn from the successes and failures of the program so that the Congress can undertake to develop quality legislation in this area.

Mr. President, I would like to make special note of section 439 of the conference report. This provision represents an amendment which I was pleased to cosponsor in committee with the distinguished junior Senator from California (Mr. HAYAKAWA) and Senator HATCH. It would require the Secretary of Labor to carry out a demonstration program to test, in not more than 10 areas throughout the United States, the efficacy of providing incentives for private industry to establish additional employment opportunities for youths who do not have significant previous employment experience.

The authority will allow the Department of Labor, through the prime sponsor system established by CETA, to test the concept of wage subsidies for youth—an idea which has been largely rejected in recent years as unworkable based on experiences in the early 1960's. However, its value in the significantly different labor market of today has not been fully explored.

The highlights of the provisions are as follows:

First, it is targeted on youths between the ages of 16 through 21 who are economically disadvantaged—with family income less than 70 percent of the BLS lower living standard—about $7,000 nationwide.

Second, the program would be tested in up to 10 areas selected by the Secretary. In selecting the areas and employers to carry out demonstration programs, the Secretary would give priority to urban poverty areas where the State or local government provide for special tax treatment for employers locating or expanding operations in such area, and to employers establishing new facilities in an urban poverty area.

Third, the "bonus," which could be as much as $2,500, would only be paid if:

First, the employer hires at least five eligible youths for not less than 1 year the Secretary, in special circumstances, could allow payment after 9 months;

Second, the employer offers each youth appropriate training, support services, and counseling;

Third, the youth is paid not less than the prevailing wage, the Federal minimum wage, or the State minimum wage, whichever is higher; and

Fourth, the jobs held by youths are in addition to jobs the employer already provides; are not in low-wage industries; provide meaningful training and employment opportunities; and do not result from layoffs of other employees.

Fourth, the "bonus" is paid to the employer only after the employer and employee successfully fulfill the requirements of the program for a year. Thus, if the program does not work, no bonus is paid.

Fifth, the program is to be coordinated with other Federal Government programs providing incentives and/or credits for hiring economically disadvantaged youths and a report is required after 3 years on the results of this program in comparison to these other programs.

Sixth, funding for the program would be from the Secretary's discretionary moneys available under the Youth Employment and Demonstration Projects Act of 1977—which would become part of title IV of CETA as a result of the reauthorization legislation. The Department estimates that about $50 million is available under this discretionary authority, some of which would be made available for this demonstration program.

Mr. President, I believe this is an important new addition to existing authorities in the law to deal with youth unemployment. The unemployment rates for minority youths in inner-city areas, despite declines in rates for national and other subgroup unemployment, are still outrageously high. In the second quarter of 1978, the rate for black youths in poverty pockets was 47.4 percent. Bearing in mind that this figure includes only those who are actually seeking jobs, and not those who have given up looking, the immense proportions of the problem are overwhelming.

This new authority should provide the Congress with additional and important experience on which to base future decisions.

Also included in title IV, Mr. President, is the authority for the Job Corps and summer youth programs, of which I have been a strong supporter.

TITLE VI—PUBLIC SERVICE EMPLOYMENT PROGRAM

Mr. President, title VI is the second part of the bill that deals with public service employment. This title is primarily designed to serve cyclically unemployed persons—those who are out of work as a result of cyclical activity in the economy. These jobs, although still required to be accompanied by appropriate training and supportive services as are those in title II-D, would probably not entail the same degree of such services.

Both titles II-D and VI—unlike current law—are "targeted" in a variety of ways that are designed to insure that services are made available to those most in need and, in so targeting, reduce substitution and abuses in the program. In this regard, Mr. President, I would like to comment on some of the specifics of the targeting provisions of title II-D and VI which are based on provisions I authored in 1976.

Under title II-D, eligibility would be restricted to those individuals who have been unemployed for 15 or more weeks or who are in receipt of public assistance. In addition, the individual's family income could be no greater than 70 percent of the BLS lower living standard

budget adjusted regionally—now about $7,200 nationwide.

Under title VI, eligible individuals would have to have been unemployed 10 out of the last 12 weeks or be in receipt of public assistance. The individual's family income could be no greater than 100 percent of the lower living standard budget.

In addition, Mr. President, the length of an individual's participation in either titles II-D or VI would be limited to 18 months. However, the Secretary is empowered to provide temporary extensions of this time—for up to 12 months—in those areas where unemployment rates exceed 7 percent.

Mr. President, I am hopeful that these expanded targeting provisions will help to deal with the problems of abuse and substitution that have occurred in the past.

The reauthorization legislation will require that at least 50 percent of the jobs provided under title VI be in projects of no more than 18 months duration. Importantly, however, the measure makes provision for the renewal of worthwhile projects that the prime sponsor may, after review, determine are effective and need to be continued.

I should like to make special note, Mr. President, that the Senate was able to prevail in conference with respect to the provisions relating to contributions to retirement funds for CETA participants. Thus, the measure permits a distinction within a job classification between public service employees and regular employees for purposes of the participation in retirement plans and provides that equal treatment for CETA employees shall not be deemed to require contributions to a pension plan.

Furthermore, the measure provides that, effective July 1, 1979, no funds under CETA may be used for a contribution to a retirement plan unless the contribution bears a reasonable relationship to the cost of providing benefits to participants.

This is, I know, a long-awaited resolution of this issue. I am hopeful that, upon enactment, States—like my own State of California—will move promptly to make the necessary modifications in State law in order to comply with this provision.

TITLE VII—PRIVATE SECTOR INITIATIVES

Under a new title VII, Mr. President, the conference measure will add a new authority for an innovative concept designed to develop a cooperative relationship between prime sponsors and the business community through the establishment of private industry councils—PIC's. The PIC's would be established by the prime sponsors and would be composed of local business, industry, labor, and community representatives. This new undertaking is intended to help shift the emphasis in aiding unemployed persons from subsidized public sector jobs to employment in the private sector. The program would encourage private business organizations to take advantage of public funds for hiring and training persons in private sector jobs.

I am generally pleased with the conferee action in this regard. It is imperative that we seek to find ways of creating more jobs in the private sector where five out of every six jobs are located. The ties between CETA and private enterprise must be strengthened, and I believe this title holds great promise for doing so.

My only reservation with respect to this title is the composition of the PIC's. In committee, I offered an amendment to mandate representation of those who are served by this program on the PIC's because I believe that input from them would be important in designing initiatives under this new concept. However, the committee did not accept this mandate but, instead, adopted language that allows representation of persons eligible to participate in activities under the new title. This provision is reflected in the conference agreement.

Additionally, the conference agreement incorporates my amendment that requires the chairpersons, or a designee, of the prime sponsor's planning council to serve as an ex officio, nonvoting member of the PIC and the chairperson, or a designee, of the PIC to serve in the same capacity on the planning council. This is intended to provide for a substantial cross-fertilization between these two entities resulting, I hope, in an effective partnership to develop and carry out successful private sector programs that will enhance the transition of CETA participants into unsubsidized jobs.

Mr. President, because we believe it will be necessary to review the experience of this program prior to 1982, the authority for title VII is only a 2-year authority. I expect to be watching the implementation of this program carefully to see what, if any, adjustments and improvements may be needed, including improvements in the composition of the PIC's.

PAPERWORK AND REPORTING REQUIREMENTS

Mr. President, during the CETA conference, I raised the difficulties posed by a series of provisions dealing with paperwork, generally. As a result of my efforts, the conferees made a number of modifications from a tentative conference decision reached at the outset.

First, rather than having both a requirement that each prime sponsor submit in its annual plan its proposed budget for the program year, a detailed summary of expenditures made during the preceding year, results achieved, and changes made in the annual plan for the program year, plus a requirement that each prime sponsor also include a list of the specific contracts from the previous year with those institutions providing training programs, including information on the rate of job placement for those who have completed such programs, these two provisions have been merged into one requirement.

Second, rather than both requiring from each prime, on an annual basis, a description of the number of handicapped individuals who were served during each of the preceding 2 years, the types of training or employment in which they were placed, and the number of such individuals who were moved into unsubsidized employment, as well as requiring the Secretary in each annual report to include an evaluation of the conduct of and achievements in outreach, training, placement, and advancement practices with respect to handicapped individuals over the past 3 years, the conference measure would require these data on an annual basis from the prime sponsors, without reference to prior years, and that the report of the Secretary would compare only 2 years experience. This eliminates the submission of a lot of duplicative paperwork but still, I believe, allows us to make a clear assessment of where CETA stands with respect to services to handicapped individuals.

Let me digress at this point to make another point about handicapped individuals. At my suggestion, the conference report retains the definition of "handicapped individuals" passed by the Senate. That is, "handicapped individual" means any individual who has a physical or mental disability which for such individual constitutes or results in a substantial handicap to employment.

This is, I believe, significant since the House provision would have added language that would have required that a handicapped individual "can be reasonably expected to benefit, in terms of employability, from services provided pursuant to this act."

Mr. President, I opposed very strongly the additional standard which handicapped individuals would have been required to meet under the House language. As I interpreted that provision, a handicapped individual, in addition to meeting other eligibility requirements, would have been required to demonstrate that he or she would have reasonably been expected to benefit in terms of employability as a result of participation in CETA.

The practical result of such requirement could have been, Mr. President, that CETA's already poor track record with respect to employment of handicapped individuals would worsen. I believe that such an additional standard created another barrier; and handicapped individuals currently have to overcome too many barriers in order to work.

If two similarly situated individuals are applying for the same position—one handicapped and the other able-bodied—under the House provision, it was quite possible that the handicapped individual would not be selected, because for him or her—but not the able-bodied—there would have been a "test" by the prime sponsor that he could reasonably be expected to benefit in terms of employability from the services to be provided.

All CETA participants should be expected to benefit in terms of employability—not just handicapped individuals. That is why I argued so forcefully in favor of the Senate definition.

Third, returning to paperwork requirements, the House-passed version of the CETA bill contained the requirement that no funds provided under this act would be paid to any nongovernmental

organization for the conduct of programs unless it has a written plan that has been reviewed and evaluated by the prime sponsor. The problem here was the impact that this requirement of a written plan would have had on the new title VII programs. I was concerned about what the private sectors' reaction would have been if—in order to participate in activities under title VII—a written plan had to be furnished to the prime sponsor, especially since the PIC must submit a plan to the prime sponsor and both the PIC and the prime must agree to it. I believe that if it is truly our intent to encourage private sector participation under this title, we ought to eliminate Government redtape. The conferees accepted my proposal that programs under title VII and other OJT programs be exempted from the requirement of a written plan and that the Secretary be directed to issue regulations for those programs with a minimum burden on the recipients.

Finally, rather than requiring a report four times a year from the Secretary—in consultation with OMB—on efforts being taken to reduce paperwork and reporting, the conferees agreed with me that this report be submitted only once a year. In addition, the measure gives the Secretary the authority to combine reports the Department is required to make where feasible.

VETERANS PROVISIONS

Mr. President, I would now like to turn to a discussion of the provisions in this conference report that will affect very directly and immediately our Nation's veterans. The measure includes a number of provisions designed to enhance the participation of qualified disabled and Vietnam-era veterans in programs conducted under CETA.

THE PROBLEM

Although the employment picture for many Vietnam-era veterans has brightened from a year ago, there still remains an unacceptably high incidence of structural unemployment and underemployment among members of this group. The continuing problems of disabled and Vietnam-era veterans seeking meaningful jobs and job training opportunities are still evidenced by the high rates of unemployment for young and young minority group veterans—12.0 percent and 23.9 percent in the third quarter of 1978, respectively—substantially higher than the national rate of unemployment of 6.0 percent during the third quarter of 1978. Although statistics are not available from the Bureau of Labor Statistics on disabled veterans, estimates of unemployment rates for severely or catastrophically disabled veterans may range well over 50 percent, according to surveys conducted by various veterans organizations. Unemployment rates for Native-American Vietnam-era veterans are also estimated to be well over 50 percent.

Thus, in continuing recognition of the serious employment problems of these individuals, the conference measure incorporates in CETA provisions to reflect and, in some cases, expand current policy and law with respect to disabled veterans—as defined in section 2011(1) of title 38, United States Code, to be 30-percent service-connected disabled—and Vietnam-era veterans under the age of 35—as defined in section 2011(2)(A) of title 38, United States Code, to be those who served during the Vietnam era, August 5, 1964, through May 7, 1975, and were discharged with other than a dishonorable discharge—with a special emphasis on those who served in the Indochina theater.

DISCUSSION OF SPECIFIC PROVISIONS

Specifically, these provisions include:

A requirement that the prime sponsor's annual, unified employment and training plan include a description of specific services for certain target groups who are experiencing severe handicaps in obtaining employment. The groups include disabled and Vietnam-era veterans. In addition, the annual plan must set forth services to be provided and the performance and placement goals (including such goals as the prime sponsor may establish with respect to any target groups).

A requirement that, with respect to public service jobs under title II and VI, prime sponsors give special consideration to disabled and Vietnam-era veterans in accordance with procedures established by the Secretary, with special emphasis on those Vietnam-era veterans who served in the Indochina theater. Special attention is to be given to the development of jobs which will utilize, to the maximum extent feasible, the skills which veterans acquired while in the military.

In addition, with respect to all public service employment and all job training opportunities under all titles of CETA, the Secretary is directed to take appropriate steps to provide for increased participation of disabled and Vietnam-era veterans, with special emphasis on those who served in the Indochina theater. Such appropriate steps would include "such employment, training, supportive services, technical assistance, and training support for community based veterans programs, and maintenance and expansion of private sector veterans employment and training initiatives as are necessary to serve the unique readjustment, rehabilitation and/or employment needs of veterans".

I believe the objective of increased participation in employment and job training programs supported under the act, can be facilitated by the implementation of the "appropriate steps" provision of the act, and the Secretary should, in consultation with the Deputy Assistant Secretary for Veterans Employment, explore new procedures and initiatives in order to meet the intent of this provision.

With respect to all CETA programs, special efforts by prime sponsors are required to acquaint disabled and Vietnam-era veterans with employment and training opportunities available and to coordinate efforts with activities under chapter 41 of title 38, United States Code, job counseling, training, and placement service for veterans.

The prime sponsors would also be required to provide appropriate arrangements to promote maximum feasible use of apprenticeship and other OJT opportunities under the GI bill provided for in title 38. This also would apply to all activities conducted by prime sponsors under CETA, including those under the new title VII, private sector initiative program. In addition, the prime sponsor's master plan, which is submitted one time, would be required to include a description of how the prime sponsor proposes to utilize OJT and apprenticeship training programs authorized by title 38. In this regard, it is imperative that the Secretary monitor closely the plans submitted by each prime sponsor to insure that congressional intent is served and that prime sponsors are fully aware of and responsive to the increased job opportunities available from this important source.

Mr. President, as stressed by the former Committee on Labor and Public Welfare in its report to accompany H.R. 12987, the Emergency Jobs Program Extension Act of 1976 (S. Rept. No. 94–833), the promotion by both the Department of Labor and prime sponsors of VA apprenticeship and OJT opportunities would be beneficial to and productive for both eligible veterans and prime sponsors. Under the VA–OJT program, an approved employer promises a permanent job to an eligible veteran upon successful completion of the OJT program. During the training program, the employer pays the veteran less than the full wage, while the VA supplements this for up to 24 months with a training allowance paid directly to the veteran, beginning for the first 6 months at $226 a month for a veteran with no dependents. The amount of the VA–OJT benefit is contingent upon the number of the veteran's dependents and the length of time the veteran has been in training.

Mr. President, in this regard, I believe this new measure provides a great opportunity to develop innovative means to serve veterans under CETA. I regard linkages with the VA apprenticeship and OJT training program with training programs developed under the private sector initiative program as particularly promising possibilities for the achievement of increased participation of disabled and Vietnam-era veterans in job training opportunities supported under the act.

The Governor's coordination and special services plan is required to include activities to assist the Secretary in carrying out responsibilities under the mandatory listing/affirmative action provisions of chapter 42 of title 38.

The Secretary is directed to consult and coordinate with the Administrator of Veterans' Affairs in carrying out all of the Department's responsibilities to veterans under CETA, specifically those relating to steps to provide for their increased participation.

Representatives of veterans' organizations are added as permanent members of prime sponsors' planning councils and State employment and training councils. Public members of the National Commission on Employment and Training Policy are required to be broadly representative of veterans, among other groups. In the membership of the VA

Administrator is continued on the Commission.

Mr. President, on each of these three entities, veterans had been added as temporary members by section 305(a)(2) of Public Law 95-93, the Youth Employment and Demonstration Projects Act of 1977. I have been very deeply concerned with the Department's lack of responsiveness in this area. Other than the issuance of regulations on September 30, 1977, to require veteran participation on State and local employment and training councils, no steps have been taken even to determine to what extent prime sponsors have complied. In addition, no arrangements have been made—more than 1 year after enactment of Public Law 95-93—for an invitation to appropriate veterans' representatives to serve on the National Commission, an entity under direct Secretarial supervision. I urge the Department to move rapidly to fulfill its statutory responsibilities under the provisions of the reauthorization legislation.

The Secretary is directed, in consultation and cooperation with the Administrator of Veterans' Affairs and the Secretary of Health, Education, and Welfare, to provide for an outreach and public information program to exercise maximum efforts to develop jobs and job training opportunities for disabled and Vietnam-era veterans, and inform veterans about employment, job training, on-the-job training, and educational opportunities under CETA, under title 38, United States Code, and under other provisions of law. In addition, the Secretary is to inform prime sponsors, Federal contractors and subcontractors, Federal agencies, educational institutions, labor unions, and employers of their statutory responsibilities toward veterans, and provide technical assistance in meeting those responsibilities. This requirement comes verbatim from section 104(b) of Public Law 93-567, the Emergency Jobs and Unemployment Act of 1974. The reauthorization measure, by incorporating this freestanding provision of law into title III of CETA as a special Federal responsibility, gives it, for the first time, a clearly defined source of funding.

Finally, the conference report retains in title IV the requirement that appropriate efforts be made to insure that youths participating in activities under the youth community conservation and improvement projects and youth employment and training programs are those experiencing severe handicaps in obtaining employment, including those who are veterans of military service.

Mr. President, the conference agreement does not contain the provision contained in section 301(d) of current law. In 1973, the Senate-passed version of the CETA legislation (S. 1559) contained an amendment I authored that included as a special responsibility of the Secretary the effective implementation of provisions of title 38, United States Code, regarding veteran's employment representatives and special employment emphasis under Federal contracts. My amendment directed the Secretary to utilize funds available under CETA to carry out fully and effectively his responsibilities under title 38, United States Code.

The conference agreement on that bill accepted the direction to the Secretary that he should carry out fully and effectively his responsibilities under the law, but the joint explanatory statement noted, that the conferees "expect the Secretary to use funds available under other statutes than CETA in carrying out his responsibilities under title 38, United States Code" (S. Report 93-636, p. 62).

Thus, Mr. President, the impact of the prior conference report was to make nugatory a provision which was designed to counter the failure of the Department of Labor at that time to assign one Assistant Veterans' Employment Representative for each 250,000 veterans residing in each State pursuant to section 2003 of title 38, United States Code, and to carry out the special emphasis—which became affirmative action in 1974—and mandatory listing requirements of section 2012 of title 38. In this regard, I note that, as of May 28, 1974, the Department had met its responsibilities under section 2003 and that affirmative action regulations promulgated pursuant to section 2012 became effective in July, 1976.

Therefore, the bill does not continue this provision.

CARTER ADMINISTRATION PROGRAM

Mr. President, a series of initiatives under the CETA authority have been undertaken to fulfill the Carter administration's commitment to address the plight of the jobless disabled and Vietnam-era veterans as a high priority. On January 27, 1977, immediately following his swearing in at the White House, Secretary of Labor Marshall unveiled a three-part program designed to help bring these veterans back into the mainstream of America's economic life.

The Department is currently conducting two parts of this program under the present CETA very broad, title III authority in current law to provide services to meet the needs of persons whom the Secretary determines are in special need: HIRE—help through industry retraining and employment—and DVOP—disabled veteran outreach program. I have been assured by the Department that the authority to continue these programs continues under the provisions of sections 301 and 305 of the conference agreement.

HIRE

Mr. President, the HIRE I program was launched by President Carter—after a delay of almost 6 months—in June 1977 to provide 100,000 private sector job and training opportunities for veterans—specifically disabled and Vietnam-era veterans—and other eligible (disadvantaged) individuals by enlisting the Nation's larger corporations to make jobs available.

There were two parts to the HIRE I program, voluntary and reimbursable. Employers who participate in the voluntary program sign a pledge indicating they will employ individuals eligible for the program at no cost to the Government. In the reimbursable portion of the program, employers receive payments from the Federal Government to cover costs associated with training of hired individuals. HIRE I has been administered as a national office program of the Employment and Training Administration, under a contact with the National Alliance of Businessmen—(NAB)—to spearhead the efforts to elicit private sector participation in the program.

To date, the reimbursable portion of the HIRE I program has met with very limited success. The Congress appropriated $140 million in fiscal year 1978 for the HIRE program to pay for extraordinary costs associated with training eligible individuals. Of that $140 million, only $40 million has been obligated for placements in the HIRE I program. On the basis of the most recent figures available—as of July 15, 1978—107,600 industry HIRE job pledges had been submitted by 842 employers under the reimbursable program. However—as of June 30, 1978—only 2,865 persons had been placed in jobs under the reimbursable HIRE I program, and of that number, only 134 were disabled veterans, and only 771 were Vietnam-era veterans. Under the voluntary HIRE program, out of a total of 62,541 persons placed in jobs, only 793 were disabled veterans, and 44,102 were Vietnam-era veterans.

In an effort to improve HIRE program effectiveness, Mr. President, the Department has made two changes: First, last fall it announced that the initial requirement that companies provide at least 100 jobs to participants was reduced to as few as 15 jobs, and a requirement that companies provide training in more than one geographic area was eliminated. Second, the Department has enlisted CETA prime sponsors in the marketing of the reimbursable through a redesigned HIRE II program. Under this approach, $90 million of current HIRE funds is being made available to CETA prime sponsors for obligation. The guidelines for the program have been significantly modified so as to improve the program's effectiveness in meeting the employment needs of veterans. Importantly, the following changes have been made:

The eligibility criteria are revised to limit the program to jobless veterans and unemployed persons entitled to veterans preference. First priority is given to disabled and Vietnam-era veterans. Two other previously eligible groups (disadvantaged youth and the long-term unemployed) may no longer participate in the program. Moreover, the revised guidelines require referral agencies to actively seek out disabled veterans before referring others, and to give priority to minorities. These adjustments stem from a recent review by Administration officials of services for veterans.

Prime sponsors can now use their Title I methodology to compute reimbursement to HIRE II employers. For primes who elect to use their Title I system, this change eliminates the 6-month limitation on the duration of reimbursable training. It will also simplify administration of the program, and make it more comparable to Title I activities.

The deadline for obligating HIRE II funds has been pushed back to March 31, 1979, from September 30, 1978. The change was made as a result of Congressional action in the appropriations process that provided a 1-year extension of the obligation authority of HIRE II monies.

To ensure sufficient resources for job development, the amount of funds available for administration and services to participants has been raised from 15 to 20 percent

of a prime sponsor's total grant. If a sponsor uses funds for outreach through local veterans organizations, up to 25 percent may be spent for these purposes.

Mr. President, I am very pleased with and fully support the administration's decisions in this regard. I am hopeful that HIRE II will be implemented and monitored in such a way as to provide maximum assistance to veterans.

DVOP

Mr. President, part two of the administration's package—the disabled veteran outreach program (DVOP)—has enjoyed a much greater degree of success. The program now employs in public service jobs 2,000 disabled Vietnam-era veterans who, working in local employment service offices in 100 of the Nation's largest cities, provide outreach and job development placement services to disabled veterans. The projected planned cumulative ES placements through the first quarter of fiscal year 1979 and the achievements actually made by DVOP units are as follows:

	Base plan	DVOP increase	Total plan	Actual
4th quarter fiscal year 1977	35,000	5,000	40,000	41,516
1st quarter fiscal year 1978	8,500	6,000	14,500	14,000
2d quarter fiscal year 1978	17,000	12,500	29,500	36,700
3d quarter fiscal year 1978	26,000	19,500	45,500	.....
4th quarter fiscal year 1978	35,000	27,000	62,000	.....
1st quarter fiscal year 1979	8,500	8,000	16,500	.....
DVOP program total	.....	40,000	.....	.....

Mr. President, 70 of the disabled veterans hired into DVOP positions, have subsequently been hired into permanent State employment security agencies staff positions. Another 110 have obtained permanent, unsubsidized employment. Based on data furnished by the Department, as of August 1977, the average age of DVOP personnel hired was 32.4. The severity of disability of veterans hired, indicates that 55 percent of DVOP staff have disabilities of 30 percent or more. DVOP staff have contributed to the placement of 26,000 disabled veterans into jobs during the first half of 1978. This represents an increase of more than 40 percent over the number of disabled veterans placed by the Employment Service during the same period last year.

Mr. President, although there have been serious problems in monitoring DVOP, I am pleased that Labor Department regional offices are now conducting reviews of all DVOP sites where implementation problems have surfaced. Continuing compliance monitoring should be vigorously undertaken to assure that DVOP personnel are not diverted to nonveteran responsibilities.

The Department had been considering a phasedown of the DVOP program gradually over the next 4 years since it was not intended to be a permanent program. Early this year, I urged the Department not to phase this program back, and the success of the program has prompted the Congress to instruct the Department—in connection with the Labor-HEW Appropriations Act for 1979—and the Department has agreed that the program will be continued at its current level of 2,000 DVOP staff through fiscal year 1979.

PSE PLACEMENTS

Mr. President, as the third portion of his program, the President proposed the provision of increased opportunities for these disabled and young Vietnam-era veterans in public services jobs funded under CETA. The enactment of the Economic Stimulus Appropriation Act (Public Law 95-29) provided funds for an additional 415,000 public service jobs under CETA through fiscal year 1978. The President's proposed 1977 legislation for a 1-year extension of CETA included a provision to require that, in employing individuals to fill these new PSE jobs, a preference be given to certain qualified unemployed disabled and young Vietnam-era veterans, with a proposed national goal that 35 percent of all new CETA PSE hires be these veterans.

However, both Houses of Congress rejected a strict preference concept and the provision eventually enacted last year as section 305 of Public Law 95-93 did not provide a statutory preference. Instead, the provision, which I authored, was designed to provide ample latitude and flexibility—without hamstringing prime sponsors or others involved in the delivery of job and job training opportunities—while at the same time giving the Secretary a clear mandate to serve the needs of these especially hard-hit groups of unemployed veterans. The Secretary was directed to take steps to serve the employment needs of veterans, including providing for individual prime sponsors to develop their own local goals (taking into account the number of eligible veterans in the area served by the prime sponsors and the number of eligible persons in other significant segments) for the placement of such eligible disabled and Vietnam-era veterans in job vacancies in PSE programs.

Although some complaints have been received from prime sponsors regarding their inability to meet a 35-percent goal for disabled and Vietnam-era veterans, it is important to stress that the provisions enacted last year did not accept any particular mandated local goal for Vietnam-era and disabled veterans—35 percent or otherwise—but required prime sponsors to develop their own local goals, based on the needs within the areas they serve. Furthermore, despite the Department's commitment to achieve a 35-percent hiring goal for these two groups of veterans, it failed by more than 27 percentage points to achieve its national goal. Although veterans of all wars—including World War II and Korea—represented 22.6 percent of the enrollments in title II and 24.9 percent of the enrollments in title VI, the rates for disabled and Vietnam-era veterans under the age of 35 represented only 6.4 percent and 7.5 percent of the enrollments in titles II and VI, respectively. For disabled veterans, the rates were 0.8 percent and 0.5 percent, respectively.

IMPLEMENTATION OF 1977 ACT PROVISIONS

Mr. President, specifically, the following represents the sequence of events with respect to implementation of the provision enacted in Public Law 95-93:

First. Following the Department's announcement of the national goal, the Secretary sent a letter in February 1977, to the chief elected officials of the prime sponsors requesting their commitment to assist in achieving a 35-percent national hiring goal for veterans in new PSE jobs.

Second. On May 12, 1977, General Administration Letter (GAL) No. 31-77 was released requesting that State employment security agencies (SESA's) intensify their efforts to locate veterans by screening ES/JS work registration files and to establish locally determined hiring claims records. The memorandum stated in part:

> The thrust . . . is to increase the prime sponsors' level of effort in serving veterans and to establish *locally* determined hiring goals that will achieve the national target of 35 percent. (Emphasis added.)

Third. On May 13, 1977, Field Memorandum (FM) No. 273-77 was issued reemphasizing to Regional Administrators the need to reach the national 35 percent veteran participation goal for newly created public service jobs under titles II and VI of CETA; and urging regional staff to monitor and provide technical assistance to SESA's and prime sponsors to attain this goal.

Mr. President, in keeping with the basic tenet of the entire CETA legislation—that is, self-determination by the prime sponsor of its local needs—nothing in the conference report authorizes the Secretary to establish hiring or participation goals for this particular segment of the labor force. Indeed, section 121(b)(a)(A) specifically precludes the Secretary from establishing such goals. But, I want to stress most strongly, however, that this does not diminish in any way the prime sponsors' responsibilities to serve qualified disabled and Vietnam-era veterans as required under CETA.

RECENT PRESIDENTIAL MESSAGE

Mr. President, on Tuesday, President Carter submitted to the Congress a message on the progress of veterans of the Vietnam era. It describes the actions he will take to respond to the special needs of those who served during the war we seem, too often, too willing to forget. These actions include improvement in the areas of employment opportunities, educational opportunities, other veterans' services and benefits, and military status. A number of items related to issues I have outlined are discussed in this message, including HIRE, DVOP, and veterans participation in CETA.

Mr. President, during the 96th Congress the Senate Veterans' Affairs Committee, which I chair, will be focusing priority attention on this area, and I would like my colleagues to have an opportunity to review this message in full. Mr. President, I ask unanimous consent that the text of President Carter's message be printed at this point in the RECORD.

There being no objection, the message from the President was ordered to be printed in the RECORD, as follows:

To the Congress of the United States:

I am submitting this Message to report on the progress of Veterans of the Vietnam-

era, and to describe the actions I will take to respond to the special problems a number of these Veterans still face.

Veterans of World War I, World War II and Korea have received the recognition and gratitude they deserve. They are honored and remembered as men and women who served their country. This has not always been the case for those who served during the War in Vietnam. In many ways, their service was more painful than in other eras: the selection process was often arbitrary; the war was long and brutal; the changes in warfare and innovations in medicine meant that fewer soldiers were killed than in other wars, but a far greater percentage survived with disabling injuries.

Because the war did not have the full backing of the American public, neither did those who fought in Vietnam. Many civilians came to confuse their view of the war with their view of those who were called upon to fight it. They confused the war with the warrior. Yet I know that all Americans join me in stating that the courage and patriotism of those who served in Vietnam have earned them full measure of honor and respect.

It is a tribute to the caliber of those who served that most Vietnam-era Veterans have already adjusted very successfully to civilian life. Still, in many ways, the effects of the war in Vietnam linger on. We have only begun to understand the full impact of the conflict. As part of healing its wounds, we have recognized our obligation to forget many harsh words and rash acts, and to forgive those who resisted the war. Of even greater importance is our determination to recognize those who did serve and to show our appreciation for the sacrifices they made.

I have directed the Secretary of Defense to honor the memory of all those who fought and died as well as those who are missing in action in Southeast Asia in ceremonies this fall at Arlington Cemetery.

As for those who did return, our review has found their personal and family median incomes are substantially higher than similar-aged non-Veterans, and their unemployment rates have been lowered. For the third quarter of 1978, Vietnam-era Veterans aged 20–34 had a 4.7% unemployment rate as compared to a 6.7% rate for the third quarter of 1977. Although rates vary from month to month, it is fair to say that most Vietnam-era Veterans have moved into the mainstream of economic life. Vietnam-era Veterans are making comparable or better use of their Veteran benefits than Veterans of previous wars. To date, nearly 65% have utilized their GI Bill benefits, which is far greater than under the World War II or Korean programs. We should not fail to recognize the hard work and determination that typify most Vietnam-era Veterans who have been successful in their military to civilian transition.

But for many Veterans—especially minority and disadvantaged Veterans— the transition to civilian life has led to unemployment, poverty and frustrations. The key to making our Veterans' programs successful—and efficient—is to target them carefully on those who continue to need help. By using our resources more skillfully and coordinating our efforts more closely, we can aid those ex-servicemen and women who are most in need of government assistance.

In my written State of the Union message to you last January, I indicated that my Administration would undertake a government-wide review of the status of the Vietnam-era Veteran and the programs designed to serve them. Since that time, the Veterans Administration, the Department of Labor, the Department of Defense, the Department of Justice, the Department of Health, Education, and Welfare, the Community Services Administration, the Council of Economic Advisors, the Office of Management and Budget, and the Domestic Policy Staff have reviewed the status of these ex-servicemen and women and have prepared recommendations for improved government performance. On the basis of that policy review, I have ordered improvements in four areas of Veteran affairs:

Employment opportunities.
Educational opportunities.
Other veterans services and benefits.
Military status.

In order to implement my descisions in these areas and improve delivery of services to veterans, I have established an interagency Veterans Federal Coordinating Committee, composed of representatives of eight agencies, operating under the direction of the Executive Office of the President.

I am also conferring upon the Veterans Administration the status of a Cabinet Agency, for the purpose of attending Cabinet meetings. The Veterans Administration is a large and important part of our government. Its presence at Cabinet meetings will be useful for other departments with overlapping responsibilities, and for the Veterans Administration itself, which will have a stronger voice.

To better understand some of the issues that will continue to confront the Vietnam-era Veteran, I am instituting a survey of public attitudes toward those Veterans. This study will help us identify the real areas of concern, as well as accurately portray the public's overall support of Veterans' benefit programs generally.

I. EMPLOYMENT OPPORTUNITIES

Most Vietnam-era Veterans are now doing better economically than non-veterans of the same age and background. In 1977, Vietnam-era Veterans aged 20–39 had median personal incomes of $12,860 compared to $9,820 for similar-aged non-veterans. When compared by family income, the figures are $15,040 and $12,850 respectively. For Vietnam-era Veterans aged 20–34, the unemployment rate of 7.4% for September one year ago declined to 4.9% in September, 1978. As in all other sectors, unemployment rates for Veterans are substantially lower than they were when this Administration took office. We have hired nearly 98,000 Vietnam-era Veterans in public service jobs as part of the Administration's Economic Stimulus Package. Jobs and training assistance for Veterans became a top domestic priority when the Administration took office; the results are now clearly visible.

But if the overall employment picture for Vietnam-era Veterans is encouraging, the unemployment problems of minority, disabled, and disadvantaged Vietnam-era Veterans are cause for continued concern and attention. Black Vietnam-era Veterans, a significant percentage of whom saw active combat, face unemployment rates of 11.2% for the third quarter of 1978 compared to 15.9% for the third quarter of 1977. For the more seriously disabled Veterans, the unemployment rate is estimated to range as high as 50%. We have made great strides in every area of employment since the beginning of my Administration, but these jobless rates are still far too high. There is a clear need to better coordinate employment and employment assistance programs so that they are targeted on those Veterans most in need.

With that in mind, I have ordered a comprehensive review of the overall system for delivery of employment services to veterans. The review will yield further suggestions for improvement, but I have already initiated action to:

Improve the participation of Veterans in all Comprehensive Employment and Training Act (CETA) programs. We have designed a number of ways of making sure CETA prime sponsors take account of the special needs of Veterans. They include: inspecting grant plans and monitoring local prime sponsor systems to assure consideration of the Vietnam-era Veteran and seeking to have better Veterans representation on prime sponsor councils.

Continue operation of a national Help Through Industry Retraining and Employment (HIRE) program at a $40 million level, and supplement it with a $90 million HIRE II program, paid for with carry-over funds from the original HIRE effort. HIRE I is a national contract program operated through State Employment Services across the country, and through the National Alliance for Business. It hires and trains Veterans, members of Veterans' families eligible for Veterans' preference, and disadvantaged non-veteran youth for jobs in the private sector. HIRE II will decentralize sponsors to contract for and operate it in cooperation with State Employment Security agencies. HIRE II will be available exclusively for Veterans. Participants will also have access to all of the training, public employment and outreach services available through other CETA programs.

Secure from Congress authority to spend in Fiscal 1979 HIRE funds appropriated in 1977. Without this extension the unobligated funds would have reverted to the Treasury.

Continued support will be given for the special outreach programs for Veterans operated by the National Alliance for Business and selected community organizations. One of the most important contributions government can make to Vietnam-era Veterans is to support outreach programs. They extend Veterans services to those who are unaware of the availability of assistance or intimidated by the idea of seeking it. We have extended our outreach efforts through HIRE II program and Veterans organizations. The National Alliance for Business and 13 other private programs funded by the Department of Labor must have continued backing.

maintain current funding levels for the Disabled Veterans Outreach Program (DVOP). DVOP was originally funded as part of the economic stimulus package, but the program deserves to continue at its current level of $30 million. DVOP employs 2,000 disabled Veterans to help find jobs for other disabled Veterans. So far, 26,000 disabled Veterans have found work through the program and it continues to be targeted at those Veterans with the severest employment problems.

improve coordination between Department of Labor and Veterans Administration employment programs. These programs will become more efficient as departmental policy links are clarified by a new high-level joint committee appointed by the Secretary of Labor and the Veterans Administrator. Money-wasting duplication of effort will be ended.

order all Federal agencies to make greater use of the Veterans Readjustment Appointment (VRA) authority to bring Vietnam-era Veterans, especially the disabled, into government service. I have already submitted legislation to liberalize and extend the authority to June 30, 1980. The bill has passed both Houses of Congress and is now in conference.

II. EDUCATIONAL OPPORTUNITIES

Vietnam-era Veterans are in the process of becoming the best educated group of Veterans in our history. Already, 65% of Vietnam-era Veterans have taken advantage of the GI Bill. That compares to a final rate of some 51% for World War II Veterans and 43% for Veterans of the Korean War. The Nation has spent nearly $25 billion on the GI Bill for Vietnam-era Veterans compared with $14 billion for those who served in World War II and $4.5 billion for Veterans of the Korean conflict.

But these readjustment assistance benefits

often have not been utilized by those Vietnam-era Veterans who need them the most. Many members of minority groups and those lacking a high school diploma have not taken full advantage of the GI Bill. For them, outreach efforts must be intensified and eligibility expanded. At present, eligibility for most benefits under the GI Bill generally ends ten years after discharge. Although these provisions are more liberal than for Veterans of previous wars, we will:

Submit legislation to the Congress that would extend eligibility beyond ten years for these Veterans the Veterans Administration defines as in need or educationally disadvantaged.

Continue a VA program called "Operation Boost" designed to seek out Veterans who are unaware of the time limit that is fast approaching for many of them.

III. OTHER VETERANS SERVICES AND BENEFITS

In general, Veterans benefits have been generous for Vietnam-era Veterans, but these and other benefits to which they are entitled need to be targeted better on those who really need them. Among those benefits and services requiring improvement are ones relating to:

Disabled Veterans.

Incarcerated Veterans.

Readjustment counseling and substance abuse treatment.

DISABLED VETERANS

Individuals with service-connected disabilities than Veterans of any other war. Alance from the government. That is particularly true for Vietnam-era Veterans, who suffered a 300% greater loss of lower extremities than Veteransof any other war. Altogether, 512,000 have sustained some kind of disability.

Our vocational rehabilitation programs must reflect our paramount concern for those Veterans who have service-connected disabilities. The current VA program is based on a 1943 model and requires major updating. I will submit legislation to the next Congress that will modernize and improve that program.

READJUSTMENT COUNSELING AND SUBSTANCE ABUSE TREATMENT

The frequent image of the Vietnam Veteran as unbalanced, unstable and drug-dependent is simply not borne out by available information. Most Veterans have adjusted well and the incidence of drug abuse, although greatly increased while in service, has for the most part declined to pre-Vietnam levels or lower. Nevertheless, there is evidence that suggests a significant minority of Vietnam Veterans have experienced problems of readjustment which continue even today.

Vietnam-era Veterans under age 34 have a suicide rate 23% higher than non-Veterans of the same age group. The number of hospitalized Vietnam-era Veterans identified as alcoholics or problem drinkers more than doubled from 13% in 1970 to 31% in 1977. And, although the drug abuse problem has declined, Vietnam-era Veterans account for 39% of all inpatients and 55% of all outpatients being treated by the VA for drug dependence problems.

The government is addressing these concerns, but more must be done:

The Administration has already proposed legislation which would authorize psychological readjustment counseling to Vietnam-era Veterans and their families. The proposal is aimed at those Veterans who are not classified as mentally ill but nevertheless need some kind of counseling. I urge Congress to enact this proposal prior to adjournment.

The Administration also requested legislative authority to contract for halfway houses in the treatment of Vietnam-era Veterans with substance abuse problems. This authority, together with the activation of 20 new VA substance abuse treatment units in this coming fiscal year, should provide needed resources to treat those with continuing alcohol and drug abuse problems.

Finally, more research needs to be done into the problems of Vietnam-era Veterans. I am directing both the Veterans Administration and the National Institute of Mental Health to initiate studies in this area. A major study contracted for by the Veterans Administration to be submitted next year should enable us to better identify the nature and extent of problems being experienced by Vietnam-era Veterans.

INCARCERATED VETERANS

Like Veterans of all wars, a certain percentage of Vietnam-era Veterans end up in prison after returning home. Available data suggest that there are about 29,000 Vietnam-era Veterans in State and Federal prisons. Many of these Veterans received discharges which entitle them to VA benefits. Unfortunately, we lack comprehensive information about imprisoned Veterans.

I have directed the Law Enforcement Assistance Administration (LEAA) to compile accurate data about incarcerated Veterans. I have also asked the LEAA and the Bureau of Prisons to develop an information dissemination program for criminal justice system officials aimed at informing Veterans of the benefits available to them.

IV. MILITARY STATUS

Ninety-seven percent of all Vietnam-era Veterans received discharges under honorable conditions after completing service. It is only fair that those few individuals with discharges under other than honorable conditions be presented with the fullest possible justification for the action taken against them. Because of the serious harm such a discharge can do to a Veteran seeking a responsible place in society, the government must assure that discharge review is readily available to insure fair and humane treatment.

In this connection the Administration will:

Grant assistance to Veterans seeking discharge review. The Department of Defense has agreed to provide indices of discharge review/correction board cases to selective regional offices of the VA.

Submit legislation to modify the provisions of PL 95-196 which automatically barred VA benefits for combat Veterans discharged because of unauthorized absences of 180 days or more.

CONCLUSION

No steps we take can undo all the damage done by the war. There is no legislation that can bring those who died back to life, nor restore arms, legs, eyes to those who lost them in service. What we can do is to acknowledge our debt to those who sacrificed so much when their country asked service of them, and to repay that debt fully, gladly, and with a deep sense of respect.

JIMMY CARTER.

THE WHITE HOUSE, *October 10, 1978.*

Mr. CRANSTON. Mr. President, much success can be achieved by the Secretary of Labor through vigorous implementation, enforcement, and monitoring of compliance, with the consultation and support of the Office of the Deputy Assistant Secretary for Veterans' Employment.

REFORM OF WAGNER-PEYSER ACT

Mr. President, the conference report also includes an amendment I authorized to require the Secretary of Labor to submit a report to the Congress concerning the reform of the Wagner-Peyser Act, together with recommendations for legislation, by February 1, 1979.

The Wagner-Peyser Act and the Federal, State employment service system it established have not been comprehensively examined in the Senate for more than 8 years.

Mr. President, the Committee on Human Resources, in considering this CETA reauthorization legislation, refrained from making changes which might alter the relationship between the CETA prime sponsor system and the employment service. Although we recognized the need for legislation to make appropriate reforms in the law to foster a productive linkage between these two systems, we also felt that the complexity of the issue called for careful study and consideration.

Thus, my amendment is designed to insure that next year, when the committee undertakes consideration of this issue, we will have before us the recommendations and the suggestions of the Secretary for reform.

This report, along with other material that will be considered by the committee, will give us a good base upon which to begin our examination of the system of delivery of an entire spectrum of employment and training services. In this regard, Mr. President, I am pleased to learn that the Department has already begun to explore this area, and I look forward to working on this with them on this issue next year.

CONCLUSION

Mr. President, I would like to take this opportunity to express my deepest appreciation to the distinguished chairman of the Subcommittee on Employment, Poverty, and Migratory Labor (Mr. NELSON), the ranking minority member of the Committee on Human Resources (Mr. JAVITS), the chairman of the Committee on Human Resources (Mr. WILLIAMS), the distinguished Senator from Michigan (Mr. RIEGLE), and my other colleagues on the Human Resources Committee for their efforts in developing and working to enact this important legislation. They and their staffs worked many long and hard hours in putting together what I believe is reasonable and well-designed extension of a valuable program. I would like especially to note the contributions of Scott Ginsburg, Joan Hunziker, Brad Mims, Jackie Washington, and Marianne Benson of Senator NELSON'S subcommittee staff; Jim O'Connell and Diane Kamino of Senator JAVITS' committee staff; Martin Jensen and Tom Lindsey of Senator WILLIAMS' full committee staff; Stephanie Smith of Senator RIEGLE'S staff, and Bobette Polzer for me. In addition, I would like to thank the staff of the Department of Labor who provided technical expertise and assistance in putting this measure together: Dick Johnson, Nik Edes, Sandy Kisla, Jim Marion, and Stu Sirkin. A special thanks is also owed to the members and staff of the House Education and Labor Committee's Equal Opportunity Subcommittee, chaired by my good friend and distinguished fellow Californian, Mr. HAWKINS. It took a great deal of hard work, but I believe we can all be proud of the results.

Mr. President, I fully support the conference agreement on the Comprehensive

Employment and Training Amendments of 1978.●

Mr. DOLE. Mr. President, I am pleased to learn that the conference report on the CETA reauthorization bill included four of my Senate-passed amendments. I believe these amendments will contribute significantly to the improved effectiveness of the CETA program.

Very simply, Mr. President, my amendments will provide that, first, workers who quit private-sector jobs without good cause be ineligible for public service employment under CETA; second, insure representation of community-based organizations on title VII private industry councils; third, insure representation of handicapped individuals on the prime sponsor's planning council; and fourth, insure representation of handicapped individuals on the State employment and training councils.

While I believe all of my amendments will contribute to the efforts in alleviating the serious national problem of unemployment, I want to emphasize the particular importance of my amendment which addresses community-based organization representation of the private industry councils.

The proven effectiveness of community-based organizations clearly indicates that their participation would only serve to aid the efforts of the business community in alleviating a very serious structural unemployment situation. This particular amendment would simply insure the important participation of the private industry councils of community-based organizations, such as Ser-Jobs for Progress, NAACP, OIC, Urban League, and others. These groups, with their experience and expertise in unemployment problem solving in their respective and unique communities can provide critical input to these councils. Their involvement will significantly enhance the effectiveness of the private industry councils.

Mr. President, I want to commend the members of the Joint Conference Committee for their efforts in bringing us legislation which will take major steps toward reducing unemployment in this great country.

The PRESIDING OFFICER. All time having expired, the question is on agreeing to the conference report.

The conference report was agreed to.

Mr. JAVITS. Mr. President, I move to reconsider the vote by which the conference report was agreed to.

Mr. NELSON. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

FULL EMPLOYMENT AND BALANCED GROWTH ACT OF 1978

The Senate continued with the consideration of H.R. 50.

UP AMENDMENT NO. 2105

Mrs. HUMPHREY. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The second assistant legislative clerk read as follows:

The Senator from Minnesota (Mrs. HUMPHREY), for herself and Mr. MUSKIE, proposes an unprinted amendment numbered 2105.

Mrs. HUMPHREY. I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

Amend the amendment in the nature of the substitute offered by Mr. BYRD and Mr. BAKER as follows:

On pages 120 and 120A, strike clause (2) and the last sentence of subsection (b) and all of subsection (c) and insert in lieu thereof the following:

"(2) reducing the rate of inflation, as set forth pursuant to section 3(e) of this Act, to not more than 3 per centum at the earliest possible time: *Provided*, That this objective shall in no way qualify or alter the goals and timetables for the reduction of unemployment or the goal of full employment and shall be pursued in a manner that reinforces rather than conflicts with those goals and timetables. For purposes of this subsection, the first Economic Report shall be the Report issued in the first calendar year after enactment of the Full Employment and Balanced Growth Act of 1978.

"(c)(1) Upon achievement of the 3 and 4 per centum goals specified in subsection (b)(1), each succeeding Economic Report shall have the goal of achieving as soon as practicable and maintaining thereafter full employment and a balanced budget.

"(2) Upon achievement of the 3 per centum goal specified in subsection (b)(2), each succeeding Economic Report shall have the goal of further reducing the rate of inflation: *Provided*, That this objective shall in no way qualify or alter the goals and timetables for the reduction of unemployment or the goal of full employment and shall be pursued in a manner that reinforces rather than conflicts with those goals and timetables."

Mrs. HUMPHREY. Mr. President, this amendment is being offered by myself and the Senator from Maine (Mr. MUSKIE). It establishes an inflation goal of 3 percent at the earliest possible time, and the goal of further reducation of inflation after the 3-percent goal is achieved.

The inclusion of a specific long-term numerical inflation goal as in the Byrd amendment is opposed by the administration, a number of prominent economists, and sponsors and supporters of the bill.

I am opposed to an arbitrary inflation goal that is now simply hung on the Humphrey-Hawkins bill and not accompanied by a comprehensive anti-inflation policy and program that can credibly be approved by Congress as sufficient to reach the goal that is proposed.

Unlike the unemployment goal in this bill, which is accompanied by a detailed strategy for its achievement, and required action to achieve it, the inflation goal is simply proposed as an appendage to the existing bill. I believe that it is incumbent on anyone who would add such a goal to the Humphrey-Hawkins bill to provide the comprehensive program needed for its achievement as part of the provisions of this bill with at least as much specificity as is the case for the unemployment goal.

Such a comprehensive anti-inflation policy should be developed with great care, and an inflation goal consistent with such a program should then be proposed. This requires extensive development, discussion, debate, and consideration by the administration and each House of Congress on its own merit. And, this exact procedure wil be followed under the other provisions included in the Humphrey-Hawkins bill as amended in the House and by the Senate committees.

Frankly, I am afraid that including this arbitrary goal of 3 percent in 1983 will give the impression of a significant action to reduce inflation, when none has, in fact, been taken.

Furthermore, Mr. President, we all know that today inflation is running at a double-digit rate. But we need to consider very carefully any operation of radical surgery to push that rate all the way down to 3 percent in only 5 years. One clear answer is to impose wage and price controls, and that is a policy I reject.

At no time in history, aside from when we were headed for a severe recession, have we ever witnessed a slowing of inflation such as is envisaged by the present version of the bill. At the present time, the only way we can reasonably expect inflation to slow to 3 percent by 1983, is wage and price controls. I view a vote against this amendment as a vote for those controls.

Finally, Mr. President, many of the causes of inflation appear to be beyond the reach of domestic economic policies. By contrast, the unemployed workers whom Humphrey-Hawkins is designed to help are all within our borders. Moreover, over 20 years of experience indicate that policies and programs of the Federal Government can have a direct and positive impact on the problem of unemployment.

But our experience on the prices side is quite different. OPEC pricing decisions on energy supplies, or weather conditions affecting the size of the grain harvest in the Soviet Union or Canada, to use just two examples, can have a tremendous inflationary impact on our economy and one over which we appear to have very little control at present. Furthermore, the Federal Government's experience in dealing with such inflationary pressures in recent years gives us little reason for confidence that we now have an effective approach to preventing inflationary pressures from such sources.

For those reasons, I urge my colleagues to support this amendment.

I yield to the Senator from Maine.

Mr. PROXMIRE. Will the Senator yield to the Senator from Massachusetts?

Mrs. HUMPHREY. Yes. I yield to the Senator from Massachusetts.

Mr. BROOKE. Mr. President, I thank the distinguished Senator from Minnesota for yielding.

PERSONAL PRIVILEGE

Mr. BROOKE. Mr. President, I rise on a matter of personal privilege.

Mr. WEICKER. Mr. President, can we have order?

Mr. SARBANES. Mr. President, I ask

unanimous consent that the Senator from Massachusetts be able to speak to his point of personal privilege without the time being charged on the bill or on the amendment.

The PRESIDING OFFICER. Is there objection?

Mr. STENNIS. May I ask that the Chair maintain conditions here in the Chamber so that the Senator can be heard? I do not know what he will say, but it is an important matter if it is a matter of personal privilege.

The PRESIDING OFFICER. Without objection, the time of the Senator from Massachusetts will not be charged under the amendment or the bill.

Mr. BROOKE. I thank the Senator from Mississippi and the Senator from Maryland.

Mr. President, this is a difficult moment in my life. As my colleagues know, I have, in the last year, been through a very painful and very tragic experience; namely, the dissolution of my family, a divorce which took place in my State of Massachusetts between my wife and me after many years of marriage and after the birth of two daughters.

In the course of the divorce proceedings one of the Boston newspapers brought out certain allegations based upon documents that were filed in the nature of depositions that were not to be entered into court, and were not entered into court, but were to be used by our counsel in an effort to work out an equitable settlement of our real and personal problems.

The media, in addition to that particular newspaper, picked this up, and the country was subjected to almost daily allegations of one sort or another resulting from that tragic divorce.

I immediately wrote a letter to the Senate Ethics Committee and asked the Senate Ethics Committee to make an inquiry to determine under the rules whether I had, one, violated any rule of the Senate, which I love and respect; and, two, whether I had been guilty of any conduct which would be in any way detrimental to the best interests of the U.S. Senate.

Mr. President, I take very seriously my responsibility as a U.S. Senator. I have loved my job and my experience here, the 12 years which I have served.

I wanted the Ethics Committee, which I indeed had a part in forming, in drafting the legislation which established it, and on which I had sat in its prior years, to look into that matter and, hopefully as soon as possible, resolve it.

But in the course of events, further allegations were made as the newspapers began to go back further and further into my personal life and my personal business transactions, many of which had been looked into before by investigative teams of newspapers, by the IRS, and the like.

I said it was a tragic experience. To my colleagues, I say it was a nightmare. I pray to God that none of you will ever have to go through what I have gone through in this last year.

I do not say that to ask for your sympathy because I do not want your sympathy, but I want your understanding as to why I am going to make a certain request tonight.

During the course of the Ethics Committee inquiries, I have never once discussed these matters with any member of that committee. I, myself, was a former attorney general for two terms in the Commonwealth of Massachusetts. I have been a prosecutor. I was also in the private practice of law and in my private practice days have been a defense attorney.

I thought I would never compromise, even though we in the Senate are in a very unique position because we are sitting as peers in judgment upon one another, that I would never in any way say anything to compromise any of the Members whose fortune or misfortune it was to sit on the Ethics Committee.

As time went on, demands were made of my records, voluminous records, all of my bank accounts, all of the stubs, all of the ledgers, any contract into which I had entered. You just cannot believe, and I cannot tell you, the volume of material that I have had to turn over to the Ethics Committee.

The Ethics Committee appointed special counsel, and that special counsel took over the job of collecting this voluminous material.

I employed counsel, because I have always believed that even though you are a lawyer, you should not represent yourself. So I employed very able counsel. Immediately, my counsel told me that the counsel the Ethics Committee had obtained was antagonistic and saw this as an adversary proceeding, rather than one of factfinding. Being the man that I am and believing as I do, I said, "Well, don't prejudge that, just cooperate as fully as you can."

Those have always been my instructions to my counsel. My counsel advised me that the committee was going—or, rather, the counsel that was retained by the committee—was going far beyond the scope of the original inquiry or any of the other allegations that followed.

My advice to them was, "Even though there is no legal basis for their demands of certain documents and records and books and the like, it is my recommendation that you give it to them because I have nothing to hide."

There has never been an allegation, Mr. President, that I ever stole any money from the public, that I ever violated my public trust, that I ever stole any money from my wife or from any individual or anything of that nature whatsoever. There have been no allegations of crime. There have been allegations of poor recordkeeping or erroneous filing of reports with the Secretary of the Senate, and with GAO.

Mr. President, I must confess that I do not keep my own books and my own records. I guess during the course of my service in the U.S. Senate, and even before, I was so involved in the public's service that I just never had time for my own personal matters. My office manager used to prepare the reports, usually in the last minutes, and bring them to me and I would sign them and they would be filed. I really did not know, sometimes, or ever, really, what was in the reports, though I am responsible, and I absolve myself of no responsibility.

During the course of the divorce, there was, through this newspaper, a statement made after a report had been filed with the Senate that reports in the Senate did not jibe, or were in conflict with records that were held and made in the depositions to which I have alluded.

I went before the public at a press conference in Boston and I said that I made a mistake—not in a material sense, but I made a mistake. I asked the public to forgive me for making that mistake.

Then, we went about our work trying to collect the material, going up into the attic where old boxes were from years ago, trying to find materials to turn over to the Ethics Committee.

Apparently, the counsel believed that at one time, because of their differences with my counsel on what was available or should be available to them, believed that there was a delay on our part. Mr. President, I deny that at any time I ever intended, ever wanted to, nor did I ever, in fact, try to delay the work of the Senate Ethics Committee. In fact, it was to my benefit to have the Senate Ethics Committee do its work and do it as promptly as possible.

I was engaged in the early stages in a very difficult primary fight in my own party and it hurt to have this shadow hanging over me. I suffered through it, but I worked it and I won. Now I am engaged in another very tough battle for reelection to the U.S. Senate.

Why do I ask for this special privilege today? Today, at 3:05 I received a call from my office, from the same newspaper, that they have information pertaining to the resignation of special counsel. They knew it and they said to me, "You have 15 minutes within which to make an answer, or we are going to press." Fifteen minutes, Mr. President, to respond to the statements that were made by counsel to the Ethics Committee that resigned and a statement made by the Ethics Committee through its chairman.

I want to read that statement. I ask you to bear with me and I appreciate your listening and your sensitivity to this very personal matter. The counsel's name is Richard J. Wertheimer; the letter was dated October 11, 1978.

Hon. ADLAI E. STEVENSON,
Chairman, U.S. Select Committee on Ethics, Washington, D.C.

DEAR MR. CHAIRMAN: I hereby resign as special counsel to the Senate Ethics Committee in connection with its initial review of matters relating to Senator Edward W. Brooke. The vice chairman of the Ethics Committee has informed the public that the committee has no reason to suspect that Senator Brooke has tried to delay the completion of the initial review. I believe otherwise and have so informed the committee.

The facts which I have placed before the committee demonstrate, in my judgment, that Senator Brooke's representatives in this matter have sought to delay and frustrate the committee's initial review by opposing and delaying the production of documents requested by the committee, by failing to turn over documents requested by the committee, and by altering documents turned over to the committee. I regret that the public has been given an erroneous impression of the facts.

Sincerely,

RICHARD J. WERTEIMER.

Mr. President, I do not think any one of my colleagues fails to understand the significance of what is written in this page that I have read to you. No. 1, as I have said to you, I have not delayed the work of the Senate Ethics Committee. I think there was some legitimate disagreement between my counsel and the committee's counsel as to the scope of the inquiry. But even prior to the resolution of that problem, I directed my counsel to turn over all documents which the committee wanted. And to the best of my knowledge and belief, and I checked on it again before I came into this Chamber this afternoon, every document that was requested by the committee has been turned over with the exception of tapes recently taken by the Boston Globe.

No. 2. The charge of altering documents turned over to the committee—now, I said to you that I have been a former attorney general. But even more, I am a lawyer and a member of the bar, and even more, a Member of the U.S. Senate. Never in my life have I ever altered, given permission to alter, or would I alter any document that would be given to any investigative committee.

Now, I was informed 2 weeks ago when the Boston Globe came down here, and I even had to leave the floor of the Senate, go out here to two reporters, on tape, because that is the kind of country in which we live today, and to testify before them, not under oath, not a court of law, which I did, that there was an error made in listing a loan when it should have been listed as a return on investment.

The newspaper asked me if they could question the young lady who is my office manager, who keeps the records, and I said, "Yes, of course, you can." And they did. They questioned her. I was not present. I do not know exactly what was said.

But at any rate, it was reported to me that she said that she had made an error. She subsequently called my attorney in Boston, not the attorney in Washington who represented me before the committee, told of her experience and said to them, "What should I do? I made an error."

He said to her, "Correct it and initial it." And she did.

But the committee had on file the original document themselves. So it was not a question of trying to conceal or mislead, though she indicated the correction was made, and I said, "Did you date it?" They said, "No." And I have affidavits to this effect, and the committee counsel knew about this when this letter was written to the Ethics Committee.

Now, I am not going to bother you with all the details. You have read more about it than I am sure you wanted to know. I hope I never have to read about any of your personal lives or you have to expose yours as much as I have had to expose mine.

I hope some day our system will be perfected better than this to give protection to those Members who serve in the U.S. Senate.

There have been consistent leaks from that committee. Every time there was a leak, there was a report in the paper back in my State. I have been fighting it day after day, week after week, month after month, and, seemingly, to me, year after year.

Now , I demand that the Senate Ethics Committee immediately hold a meeting and give me an opportunity, together with my counsel, face to face with this counsel who has resigned, Mr. Wertheimer, an opportunity to review everything he said in this letter of resignation.

If there are any documents that have not been provided, I want to know about them and I want to provide them. But I assure you there are none.

And any alterations, if there have been any, I want to know about them, and I assure you there are none.

I want to have that meeting immediately and I think I am entitled to it.

I will go back to Massachusetts and I will run for reelection to the U.S. Senate on my record, of which I am proud, and I am not going to be run out of office by allegations and misstatements and misconceptions. I think the constituency of my State and the people of this Nation are entitled to know the facts, and that is all I want them to know. The facts, and nothing but the facts, and nothing less than the facts.

I am not an irrational man, as my colleagues know. I have never been since I have served in this U.S. Senate. I do not think there is one among you who would differ with that.

I have respected you, as you have respected me, as a man. And when I tell you what I tell you today, I tell it to you as the gospel truth.

All I want is to have this committee to act on this. Whether I serve in the U.S. Senate again or I do not, I am going to live in this country and I want to live with dignity and self-respect. I think I am entitled to do it, and, if I am wrong, then I want to pay the penalty for that wrong. And if I have not done wrong, then I want it to be proved that I am not wrong. That is the American system.

I could have been the worst demagog in this country. I have tried to live and work within this system, and that is the system of fairness and justice to all, and that is all I am asking for.

I did not cry when the press did what they did to me. They went down to St. Martin's and they asked everyone—one member of the press came up and said, "Oh, the people down there like you." I asked if they expected them not to like me.

Whenever they found out some lead led them wrong, it looked like they were sorry they found out they were wrong.

What is happening in the country? Some say it is the result of the Watergate problem. I do not know what it is.

I do not stand for corruption in government. I fought it. No one has any better record in my State, and they know it, as the attorney general of that Commonwealth, for fighting corruption, and never one smear in my whole term of office.

So it is not that question at all.

Where there is wrong, there is wrong. You take your chance. If you commit a wrong, then you pay the price.

But this kind of investigative reporting we are going through today, without even looking at the facts and not even wanting to look at the facts, is wrong. It is not going to only hurt ED BROOKE, it is going to hurt every Member that ever serves in this U.S. Senate or any other legislative body in the country, and it has got to stop.

I am not fighting the press. They have got their job to do. They have done some excellent work.

But I say to you most respectfully, Mr. President, this is a dangerous precedent, and I call it to the attention of my colleagues.

All I ask for, Mr. President, is this meeting, and I want it to be open. I want the public to know what I have done and what I have not done.

As I said, it was a tragic and painful divorce. But I am not going to spend the rest of my life like this, Mr. President, and I do not think that God and the law demands it.

For giving me your attention, I want you to know that I am profoundly grateful.

Mr. BAKER addressed the Chair.

The PRESIDING OFFICER. The Senator from Tennessee.

Mr. BAKER. Mr. President, the duties and the responsibilities of the Senate of the United States are myriad and difficult and complex. But they are never more difficult than when we are dealing with the reputation and standing of one of our Members.

I have been through a lot of that in the course of my career, beginning first with the Ethics Committee proceeding against one of our Members, the late Senator Dodd. I have seen the stress it imposes on the Senate and on its Members. I have seen other inquiries that have been conducted by the Senate, some very well done, and others perhaps not so well done. But, Mr. President, I believe there is an underlying sense of fairness in this body that transcends partisan considerations and requires that simple justice be done to each Member.

I have enormous respect for my colleague from Massachusetts. I listened with care to the outpouring of his anguish and his concern and, finally, his request for his day. I have had the opportunity to visit and confer with the Senator from Massachusetts on occasion because, as he pointed out, he preferred not to speak directly to members of the Ethics Committee for fear there might be some suggestion of the impropriety in that respect. I can vouch for the fact that he has indicated to me that he has tried, and will continue to try, to cooperate in every respect to insure that this inquiry is conducted in an orderly, thorough, and appropriate way.

The distinguished majority leader, and I, under the rules of the Senate, have the obligation to appoint the members of the Ethics Committee. We have chosen, and I believe we have chosen well. I have no authority or jurisdiction beyond the appointment of those Members, except to add the weight of my recommendation to that of other Members when I say that this man, our colleague, is entitled to his opportunity to make his

presentation before that committee or, indeed, before the Senate. I will request that the Ethics Committee accede to his request. He is entitled to that.

I believe in him. I believe that he will make a thorough and complete disclosure of all the relevant facts in this matter, as he has represented to me he has tried to do in the past.

So, Mr. President, while I do not see either the chairman or the vice chairman of the committee on the floor, I am certain by this record or otherwise they will know and hear of my request and take account of it, for whatever it is worth. This is a difficult matter, and I believe it must be dealt with promptly. I am sure it will be dealt with, as the Senate is capable of dealing with these problems, in a proper way.

Mr. RIBICOFF. Mr. President, will the Senator yield?

Mr. BAKER. I yield.

Mr. RIBICOFF. Mr. President, the letter that was written by the distinguished Senator from Massachusetts first came to my attention a short time ago, when the Senator from Massachusetts showed it to me on the floor.

I think the request he makes is a proper one and should be complied with by the Ethics Committee.

The chairman and the vice chairman are not on the floor. Because of the timing and the man's reputation and his future being involved the way it is, I, as one member of the Ethics Committee, would be more than willing to accord the distinguished Senator from Massachusetts that opportunity; and I hope the chairman of the committee will call the committee together accordingly.

Mr. BROOKE. I thank the distinguished Senator from Connecticut, and I thank my distinguished minority leader. I would like to make one more statement.

This is already in the Boston Globe. This is the headline that is already on the street. It could not possibly have been there had there not been a leak to the paper. It is already on the street. It is being read now: "Senator BROOKE's Prober Resigns"—and I do not know what else the story says. I have not had time to read it. But that, obviously, indicates a little of what I am talking about.

I make no charge against a member of that committee, and I do not know the staff of the committee, but obviously it is not secret. It is not one that would protect the rights of an individual.

When I was an attorney general and we had a grand jury, we did everything we could to protect the rights of people, innocent people, people who had not been tried for anything. There were no leaks out of our grand juries, and that is the way it should be in our Ethics Committee. Otherwise, what I am saying to my colleagues is that anybody could make any statement about any one of us, at any time. It would then become the subject of inquiry by the Ethics Committee, and leaks could be put out such as this, and conceivably it could go all over the country.

Some of you have already been victimized by similar circumstances. Need I say more? I think not.

I thank the Chair.

(Mr. HARRY F. BYRD, JR., assumed the Chair.)

Mr. BIDEN. Mr. President, I am not on the Ethics Committee. I am on a committee that does have to deal with issues of some consequence, as we all are, and particularly the Intelligence Committee.

Having dealt with the way in which staff tends to operate around this place on occasion, although we have no direct jurisdiction—the Ethics Committee, I do not believe has any direct jurisdiction over the conduct of staff—I think not only do we have an absolute obligation to comply with Senator BROOKE's request immediately, but also, I think we should consider, regardless of whether or not the allegation made by the staff member is correct, the question of whether or not the ethics of staff, in releasing the letter beforehand, is in fact, in and of itself, reprehensible.

It worries the heck out of me, as a U.S. Senator, as an individual, that we seem to be falling into a situation where we can be tried in the press, we can be tried outside the normal channels of jurisdiction of both the Senate and the courts of law in this counrty, without ever having an opportunity to really make the shot.

I do not know what I would do if today the headline in a newspaper in Delaware said about me what it said about Senator BROOKE in Massachusetts. How do you, in any way, pull all that back?

I trust Senator BROOKE when he says that when he goes before the Ethics Committee—as I am sure we are going to insist he have the opportunity to do—he is going to prove his case. But how do they retract that headline? How do they retract what already has been done? I am not talking about the newspaper. I am talking about this chief counsel.

We lawyers, in most States, submit to an ethics committee. Our ethics have to be looked into, to determine whether or not we should be at the bar. It seems to me that if what transpired is as it appears—that a chief counsel would resign by way of a letter and that letter somehow gets to the press before it gets to the Senator in question and/or to this body—that, in and of itself, is reprehensible action.

It seems to me that all the special counsel we appoint think they are Leon Jaworski. All see themselves as though somehow they are about to be knighted for uncovering great corruption.

It seems to me that there is a need for a little level-headed commonsense, that the staff conduct themselves in a way that is proper. After this is all over, and when Senator BROOKE is exonerated, as he says he will be—and I have no reason to believe otherwise—I hope this body will consider, in the next session, how long a leash the investigative staff should or should not have here, and what obligations they have and do not have.

It is probably out of order for me, as a junior Member, to speak on this question; but I cannot imagine the anguish the Senator from Massachusetts is going through as a consequence of this kind of occurrence. I just hope we give him his day in court, the court we can convene immediately, as long as he wants it, and to say whatever he has to say, and to confront the counsel; because, otherwise, it seems to me that we have developed in this Chamber a new version of the star chamber. I do not think that is what anybody here intends.

Mr. STEVENSON. Mr. President, it was the Senate which created an ethics committee and established the procedures by which that committee exercises and performs its duties. The members of this new committee have done their duty to the Senate, and that duty is not to investigate with halfway measures when evidence of possible impropriety comes to its attention.

So far, in the experience of this infant committee, Members of the Senate have cooperated. They have cooperated fully. They have cooperated for the sake of the integrity of this institution. They have cooperated, also, I believe, because they know that it is in their own best interests to do so.

Mr. President, this committee cannot maintain the integrity of the Senate and it will not maintain the credibility of its reports to the American people by conducting anything less than the inquiries it was mandated to conduct by the rules of this body, and as long as I am its chairman, it will not neglect that duty.

I say to my friends and colleagues that this is not an enviable office. It is not an office I sought. It is an office which I accepted for 2 years, and frankly it is an office which I wished now I had not accepted.

But with it goes a responsibility, and we have tried our best to do our duty. And for as long as we are members of that committee we will continue to do it no matter what toes we step on.

This is a very unpleasant occasion for me because I have the greatest affection for my colleague from Massachusetts. I serve with him on one committee. We have worked well together. We have been friends on that committee. We have cooperated. I have also acquired since I came to this body affection and respect for the Senator from Massachusetts.

Mr. President, I do not rise to in any way criticize the Senator from Massachusetts or to suggest, or imply, that he deserves the criticism of this committee or anyone else. I have not done that. No member of this committee has done that, and the committee at the present time has no intention of doing that, and I hope it never will.

What brings this matter before the Senate is the action of its special counsel for the initial review with respect to certain allegations affecting the Senator from Massachusetts, and what brings me to my feet is no desire or any intention of criticizing that Senator. What brings me to my feet is a duty to defend my committee. I will do so briefly and then I, too, hope the facts will be made public so the public and Members of this body can judge them.

A brief summary of relevant facts are:

As far as I know there have been no leaks from the Ethics Committee, and if anyone has evidence to the contrary, he

should make it available to the Ethics Committee.

The facts are that not all documents requested in the course of this initial review have been turned over as requested to the Ethics Committee.

The facts are, Mr. President, that the distinguished Senator from Massachusetts may not have within his possession and his knowledge the information upon which to base his assertion that there have been no alterations of materials except for the one he mentioned.

Mr. President, every Senator has at any time a right to appear before the Ethics Committee. That right and opportunity was made known to the Senator from Massachusetts on August 3. I regret that my vice chairman is not here, because he shares this responsibility with me and a special responsibility for the members on the other side of the aisle, but on that date the members of the Ethics Committee requested the Senator from New Mexico to make it clear to the Senator from Massachusetts that he had an opportunity any time to appear before this committee, and it was not until tonight that I have received a request for such a meeting since that date.

Mr. President, I emphasize that I make no accusations. I intend to imply none against my friend and my colleague from Massachusetts.

Based on everything that I know about him and feel in my bones about that man he is an honorable man.

What I do propose to do is, first, convene the committee in order to afford the Senator the opportunity which he has just indicated he wants. I will do all in my power to obtain the presence of the resigned counsel and beyond that I will also seek the authority of my committee with which to enter in the CONGRESSIONAL RECORD a summary, a neutral, straight, factual summary and in chronological order of all the efforts by this committee and its staff to obtain information, information which the counsel of this committee twice, supported by the full committee, has requested of the representatives of the Senator. And that summary of all of these events will have, if my committee approves, attached to it the relevant documentation, the letters which went forward seeking documentation and their responses.

This will not be a full recital of the facts, but it will be a large recital of the facts and one upon which I believe the public and the Members can make a fair judgment upon that question raised, not by me, but by the counsel who has recently resigned.

Let me repeat, in conclusion, Mr. President, what he said:

> The facts which I have placed before the committee demonstrate, in my judgment, that Senator BROOKE's representatives in this matter have sought to delay and frustrate the committee's initial review by opposing and delaying the production of documents requested by the committee, by failing to turn over documents requested by the committee, by altering documents turned over to the committee.

Mr. President, the record, if I am permitted to enter it, will, I believe, indicate that that statement by counsel is not without foundation.

Finally I say to my good friend, and to the Members, that statement has nothing to do with him. It refers to his representatives, and in no way is intended to suggest that he has been a party to any delay or any other impropriety.

Mr. BROOKE. Mr. President, if the Senator will yield, certainly this is not the place for us to have an exhaustive hearing on this matter, particularly in the waning days of this Congress, and there is much business important to the Nation which is to be conducted.

I talked with the distinguished chairman of the Ethics Committee prior to my request for a statement of privilege and, at that time, I said to the chairman that at no time had I ever been contacted by counsel, never questioned, and never had had an opportunity to talk to the committee.

At the time I made that statement I believed it to be true. In fact, I still believe it to be the truth because as late as August 3, when he instructed or asked Senator SCHMITT to speak to me, I do recall a conversation with Senator SCHMITT when he said, "Ed, at any time you want to come before us," because that was the time when counsel was debating the question of the scope of authority, I think my remark to him was, "At any time, but please tell me what you want, what issue you want to talk about."

By that time I think there were 9 or 10 allegations where first there was one. You will remember my press conferences where I said there was a lust for blood; that everybody got in on the act, and everybody was making allegations, and even my dear mother was brought into the matter, as you will recall.

So I said at that time—

> Yes, I would like to talk to the committee at any time. But I certainly would like to know, Harrison, what specific item we can talk about, hoping you would take them at least one by one.

The counsel has been interrogating everyone else and has never sought to talk with me. I have never seen him. I would not know him if he walked into the Senate Chamber today. Maybe that is not necessary, but I can tell you that is a fact.

I can give you other evidences of leaks, but I am not complaining about the leaks. I am so accustomed to that now, I do not think there has been anybody more investigated than the Senator from Massachusetts.

If there is anything else that they can find out let them tell me. I would like to know it myself. So I am not complaining about that. Let them continue to do that. That is not my problem. My only problem is I am asking you, and I am grateful that you have agreed, if I can interpret you correctly, Mr. Chairman, if I may have your attention, I take it what you are saying is that you are agreeable to calling the committee and using your influence in having Mr. Wertheimer appear at that committee and giving me an opportunity, together with my counsel and your counsel, to confront him face to face.

It seems to me that if counsel were going to resign he ought to have made a report. Those of us who are lawyers understand that. You do not resign and put out a press statement. You resign and you make a report. I do not see that a report has been made. Maybe a report has been made, I do not know. But, at any rate, I do not want to prolong the Senate.

I also know as a fact that one of my files was secret, which was not to be opened by the committee, and was opened by someone within the jurisdiction of the committee.

I also know that no one knows who opened it, is that not correct, Mr. Chairman?

Mr. STEVENSON. The Senator is correct.

Mr. BROOKE. I did not raise a question about that. I just want the chairman to know that at no time have I tried to fight with the committee. I was the one asking the committee to make this inquiry.

The chairman said there were no leaks. The chairman was not on the floor at the time I made my statement. I have never accused the committee of any leaks. But, as I said today, here we have a headline in the Boston Globe already. When I showed it, it took some time to get down here. It was in there prior to the time that I even got notice from the committee, official notice, of the resignation of special counsel, and his statement, and of the chairman's statement.

So there are leaks. I do not know where they are. I am not making any charge. I certainly know the honorable chairman of the committee and the honorable members of the committee would not indulge in leaking information to the press.

But what I am saying to the chairman most respectfully is that somewhere there must be a leak, based upon that evidence. You could not get a headline printed in Boston that quickly, with telecommunications as they are. It could not have possibly been done; it was humanly impossible to have been done.

All I wanted to know from the Senator from Illinois, and I think he has answered the question, is that he will call a meeting of his committee and let us get this matter resolved. That is all I am asking for, and I am grateful to the Senator from Illinois for what he has said.

Mr. STEVENSON. Mr. President, I am grateful to the Senator for his clarification of what I had understood to be the import of his remarks with respect to leaks. I share his frustration about leaks. This place is hemorrhaging, but I know of no evidence of any leaks within the committee of which I am chairman.

Mr. MATHIAS. Mr. President, will the Senator yield?

Mr. STEVENSON. Let me say there is no report for the obvious reason, which I will not repeat, but is the reason which has been mentioned by special counsel.

Finally, I will say again, and as has been, I believe and earnestly hope, stated to the Senator on earlier occasions, certainly since August 3, yes, of course. He is again invited, and he will be afforded an opportunity at his convenience and as soon as I can assemble the other members, and also obtain the presence of the special counsel, who is now resigned, yes, of course.

Mr. MATHIAS. Mr. President, if the Senator will yield?

Mr. STEVENSON. I yield the floor.

The PRESIDING OFFICER. The Senator from Maryland (Mr. MATHIAS).

Mr. MATHIAS. The distinguished Senator from Illinois, the chairman of the Ethics Committee, and the Senator from Massachusetts have made several references to the role which the vice chairman of the Ethics Committee has played, and from what both of them have said it has been a central role and a very positive role in this matter.

I know it will be matter of great regret to him when this matter came to the floor that he was necessarily absent from the Capitol and from the city. But I am advised that he will be back in the Senate later this afternoon or later in the early evening, so that if a meeting could be arranged even as early as that he would be present, and I think he would be a very necessary party to any such meeting. I think we need to concentrate on the steps ahead of us now, and I am glad, as a member of the committee, to have the assurance of the chairman that that is what we will be doing.

Mr. SARBANES. Mr. President, I suggest the absence of a quorum.

Mr. JAVITS. Mr. President, if the Senator will withhold that, what is the parliamentary situation?

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Minnesota (Mrs. HUMPHREY) to H.R. 50.

Mr. JAVITS. Mr. President, will the Senator yield me 1 minute?

Mrs. HUMPHREY. Yes, I yield to the Senator from New York.

JOINT ECONOMIC COMMITTEE SPECIAL STUDY ON ECONOMIC CHANGE

Mr. JAVITS. Mr. President, I report to my colleagues on the progress of a major project in process of the Joint Economic Committee, on which I am privileged to sit as the ranking minority member. This project, known as the Special Study on Economic Change, will chart for the first time since the TNEC of the 1930's the major changes in our economy and analyze their implications for policymakers. The special study was established by a concurrent resolution in July 1977, and is expected to continue through calendar year 1980—in the interim it will publish several dozen technical papers and summary reports. The resolution states that we are to investigate "past and prospective changes in the United States and world economies and the impact of such changes on the economies of the United States and other nations," and make recommendations for policy.

The study is based upon the premise that in critical watershed periods in our economic history, like the present, we need to reexamine the bases upon which we formulate economic policy to enable us to meet the issues of the times. This is not to say that the laws are often deeply affected by changing political, social and economic values and prevailing modes of thought. More specifically, they are affected by emerging political-economic developments, such as the decline of colonialism, the establishment of an international oil cartel, floating exchange rates and a world-wide persistence of unemployment and inflation.

In addition, there are emerging problems which may not even hit us for a number of years but to which we should be turning our attention now—witness our failure to heed the warnings on imports of oil before 1973. Demographic trends, for example, tell us that our whole system of pensions in the United States may become substantially more expensive through the end of this century and into the 21st century. In the area of raw materials supplies, we may also be setting the stage now for crises in later years which are decades away.

The Special Study on Economic Change has already assigned, or is in the process of negotiating for, approximately 50 technical papers on the subject covered by our mandate. These papers fall into 10 general areas which I shall describe briefly:

First. With regard to human resources and demographics, we are looking into the changing work ethic and changing work attitudes, productivity issues and also the effects of recent labor force changes on our economic future.

Second. With regard to materials and energy, we will be looking at the macroeconomic impact of energy price increases since 1973, supplies of nonenergy materials in the future, and the structure of the needed national energy system.

Third. In the field of research and innovation, we have embarked on an ambitious research agenda which would, among other things, identify where our technology has fallen behind that of our trading competitors and point out how we can improve the process of innovation in our domestic industries.

Fourth. With regard to the important issue of concurrent high inflation and high unemployment, we are looking into the ultimate causes of inflation coupled with high unemployment (stagflation) and how these can be identified and corrected.

Fifth. Another area of the Special Study on Economic Change concerns the impact of Government in the economy. How we are examining such sectors as energy, financial institutions and health care; we are also looking into the role Government regulation may play in the location of industries, which we know has had a dramatic impact on regional growth in this country; and we are taking a close look at the economics of regulatory reform.

Sixth. In the area of Federal finance, we are taking a close and critical look at Government's spending programs and trying to assess whether they are doing the job they are supposed to be doing. In addition, we are looking at the ways in which the effects of fiscal policy may have been diluted because of the changing structure of the budget and the fact that we are a more open economy now than in previous decades.

Seventh. We have contracted for studies on State and local finance which examine the impact of recent changes in the national economy on State and local governments, and which examine in detail the labor and capital investment problems of urban businesses.

Eighth. With regard to private and public pension systems, we are attempting to assess the future economic size of pensions into the 21st century, and to analyze the relationship between private pensions and social security.

Ninth. The international sector is the one which the Special Study on Economic Change has devoted much of its resources, for the international sector has been the focus of the most significant changes in our economy over the past decade. Papers for which we have contracted include an analysis of the competitive position of U.S. industry in international markets, changes in international trade and commodities, changing patterns of international direct investment (including the impact of multinational corporations on investment and trade), and changes in our balance of payments, including the decline of the dollar in international exchange markets.

Tenth. A 10th area on "Discontinuities in Trends" will attempt to assess the social and societal changes and pressures whose impact on economic phenomena is especially pronounced and how these changes might be dealt with.

In addition to this effort, the Joint Economic Committee, itself, has held hearings in 2 of the 10 areas of the Special Study: demographics and inflation coupled with unemployment. At those hearings, lasting 13 days, we heard from 44 experts on such subjects as employment and productivity· the employment problems of black teenagers, illegal aliens and older workers; the very serious phenomenon of our declining rate of productivity; the labor management aspects of this phenomenon; the causes of inflation and the complex interrelationship between growth and inflation; the interactions between inflation and capital formation, technological change and other efforts to increase productivity; and the possible linkages between our tax system and our inflationary economy. A committee print, published last month, contains a useful and interesting summary of those hearings. The SSEC plans hearings in 1979 in the other eight areas.

While we have as much as possible sought out the services of congressional and executive branch agencies, we have also relied on outside contractors where this was essential; the costs associated with such contracting comprise almost half of our present $900,000 budget. The SSEC is fortunate to have been able to secure the services of some of the country's outstanding experts, with extensive academic and governmental experience in their respective specialties.

Over the coming months, as the papers for which we have contracted become finalized, we should begin to see the answers to some of the problems facing us today. I expect that this study will set our sights in the right direction and give us an accurate and up-to-date base on which to form economic policy. Surely we face challenging and difficult times. Unemployment and inflation are too

high, the dollar has suffered greatly in international exchange markets, confidence is impaired, the Federal budget is in trouble; levels of investment in plant and equipment are too low, and work attitudes are not what they should be and the level of productivity in our economy—which is the mainspring of economic growth—has badly deteriorated. The Special Study on Economic Change is aware of these problems and has shaped a study agenda to fit them.

Furthermore, a substantial part of the special study will be devoted to translating the results of the technical papers being written at the present time into integrated analyses and policy options addressed to the Congress. I appreciate the support which my colleagues have given this project by voting for the concurrent resolution, and I hope that the study may continue to enjoy your confidence as we start to publish its results.

ANNUAL REPORT TO THE STATE OF NEW YORK ON THE STATE OF THE UNION

Mr. JAVITS. Mr. President, the 95th Congress, the first Congress in America's third century, is completing its work.

Two major developments dominate the international sphere: the long-awaited agreements resulting from the Camp David Summit respecting the Middle East, and the erosion of the strength of the dollar in the international market.

At home, the Senate made landmark decisions in approving the Panama Canal treaties and the New York City loan guarantees and made progress in the development of a cohesive energy program, while at the same time, grappling with a disturbing and dangerous inflationary spiral and still serious unemployment.

As I have done for the past 30 years, I am reporting to my constituents of the State of New York and to the Nation on my work in the second session of the 95th Congress.

LABOR AND JOBS

WORKERS' COMPENSATION

Our Nation has a commitment to assure that workers will not have to work under conditions that pose hazards to their safety and health. Yet, when preventive efforts fail and the result is disability or death, they are left with a compensation system that has been found by knowledgable representatives of business, labor and insurors to be in general neither adequate nor equitable. The National Workers' Compensation Standards Act of 1978, which I introduced this year, establishes much needed reforms in the State workers' compensation system.

In too many States the maximum benefit a totally disabled worker can receive is below poverty standards. And, too often, workers who have developed cancer or other serious illness as the result of workplace exposure to hazardous substances receive no compensation at all. At least 20 percent of all cancer cases are now believed, by scientific experts, to be occupationally related.

My bill, S. 3060, proposes a novel approach to Federal reform by establishing a set of minimum workers' compensation standards guaranteed to every worker, and at the same time keeps the long-established State system in place. No Federal administration will be required.

The Human Resources Committee on which I am ranking member, conducted 3 days of intensive hearings on this bill, which will be reflected in an improved bill which I will introduce early next year with a view toward prompt Senate consideration.

SEX DISCRIMINATION

S. 995, which I introduced in the Senate, was enacted to prohibit employment discrimination against women on the basis of pregnancy. Under this law, employers will simply be required to treat pregnancy-related disabilities on the same basis as they treat any other disabling condition with regard to leave policies and employee benefits such as medical insurance. My efforts to enact this law were based on my belief that it promotes both family stability and the full opportunity of women to participate in the job market on an equal basis with men.

LABOR LAW REFORM

This year the Human Resources Committee focused its attention on the need to reform the National Labor Relations Act which for more than 40 years has governed the right of workers to organize for the purpose of collectively bargaining with their employers. We found that in recent years some employers were able to take unfair advantage of loopholes to frustrate the ability of the National Labor Relations Board to carry out effectively its mandate to referee the conduct of labor and management under the Act. In the proposed labor law reform bill, which I cosponsored, changes were recommended to bring about more prompt resolution of issues and stronger remedies against both unions and businesses found to have violated existing law.

The bill contained nothing to alter the bargaining or contractual rights of labor or management nor did it give either side any new substantive powers. Yet the adversaries of the trade union movement found it convenient to use the bill to attack the Nation's system of free collective bargaining, misrepresenting its provisions and purposes to generate business opposition. This opposition enabled a minority of Senators to prevent Senate consideration of the bill on its merits before adjournment.

The critical problems of inflation and unemployment cannot be resolved unless the capacities of American labor and management are fully utilized. I counsel both sides to seek greater understanding and cooperation at Federal, State, and local levels and get back to the task of improving the quality of working life for all wage earning men and women.

EMPLOYMENT POLICY

In January 1978 I introduced a three-point omnibus manpower action program, much of which was incorporated in the new CETA law.

Under the new law, New York State should receive a greater proportion of Federal CETA funds than the over $1 billion it received in fiscal year 1978.

My youth employment tax credit bill was cosponsored in the House by Representative CHARLES B. RANGEL and a similar bill was reported favorably by the House Ways and Means Committee and the Senate Finance Committee. As in my own proposal, the bill enacted by Congress and signed into law by the President provides for a tax credit of up to $3,000 for employers who hire unemployed youth. This will be an incentive to involve the private sector—which employs four out of every five voters in our country—more actively in the hiring and training of unemployed youth. I am hopeful that this new law will help improve the transition process of disadvantaged, unemployed youth into productive and meaningful careers in the private sector.

Finally, my proposal to create a special demonstration program to explore possible new approaches to the employment and training of public assistance recipients, youth, veterans, and older workers, particularly in the private sector, was included in the Economic Opportunity Act Amendments of 1978 recently signed into law by President Carter.

I am confident as we look forward to 1979 and the 1st session of the 96th Congress that we have made great strides in relieving the problems of unemployment among those persons and places least able to bear that burden: in engaging the private business sector more fully in addressing the problems of unemployment; and in placing greater emphasis in our Federal manpower programs on job training as the key to employability development, independence, and human dignity.

THE HUMPHREY-HAWKINS BILL

In January of this year I joined with Senator MURIEL HUMPHREY in introducing a revised version of the Full Employment and Balanced Growth Act. While several earlier versions of the bill had been unacceptable to me personally because of their possible inflationary implications, which I felt actually could impede the achievement of full employment, I agreed that the 1978 version could be a basis for an acceptable bill.

This was principally due to the fact that the genesis of the new bill was the 1975 bill the late Senator Hubert Humphrey and I had coauthored to establish an indicative and prospective planning process for formulating national economic goals and coordinating our economic policies.

In the Human Resources Committee I worked to further improve S. 50 and to frame a bill which I believed deserved the affirmative vote of a majority in the Senate. As a principal cosponsor and, indeed, coauthor of the committee reported bill, I sought bipartisan support for the Humphrey-Hawkins bill, and urged my colleagues to consider the bill favorably both as an expression of our commitment to equal employment opportunity for all and because the new planning process is critical to the achievement of full employment and balanced economic growth in our time.

In my judgment, the Humphrey-

Hawkins bill deserves to be enacted by Congress because it will help to focus national attention and national planning on the critical need to achieve full employment. S. 50 is a bill our country can be proud of and is a lasting memorial to one of America's great sons.

ANTIPOVERTY

In 1978 I continued my long personal association and identification with the war on poverty. I am fully aware of the fact that many have despaired that the poverty syndrome can ever be broken fully in our country and that some have even talked of abandoning our commitment to achieving a society of full equality of opportunity for all. I have rejected the counsel of despair and have continued to press for needed improvements in the design and funding arrangements for our Nation's antipoverty programs.

I was a principal cosponsor and coauthor of the Economic Opportunity Act Amendments of 1978 which was passed by Congress in the closing days of the second session. Programs reauthorized in this act include: The local initiative community action programs; the Head Start and Follow Through programs; and the title VII community economic development programs.

In respect of the latter program, New York City boasts of two highly successful Community Development Corporations (CDC), in Bedford-Stuyvesant, Brooklyn and Harlem. The principle behind the CDC program, which the late Bob Kennedy and I coauthored in 1967, is that the poor themselves can organize and mobilize local resources in order to stimulate community economic development by leveraging Federal funds to save, expand or attract private businesses in poverty areas. This principle has been upheld very successfully in our New York CDC's.

In addition, I was instrumental in obtaining agreement on a modification of the existing Federal-local matching arrangement for the community action program, from 60/40 to 80/20, which should relieve the burden which has been placed on local CAP's to raise local funds to satisfy the matching requirement.

Finally, and as I referred to above, I am particularly pleased that the Senate and the House approved my proposal to establish a new special emphasis jobs and training program for poor youth, public assistance recipients, older workers and veterans. It is generally agreed that we have not yet found the answer to severe and endemic unemployment, especially in poverty areas, so we need to design some innovative new approaches to the problem.

LABOR-MANAGEMENT COOPERATION

One of my top priorities for 1978 was to have enacted into law a Federal program to encourage representatives of labor and management to enter into a continuing dialog in a form apart from the normal collective bargaining process. The idea was incorporated in my bill to establish a program to encourage and assist in the formation of joint labor-management cooperative committees, organized on a plant, area or industry-wide basis.

The major provisions of this bill were incorporated in the Senate CETA bill approved on August 25 and were accepted in conference with the House of Representatives.

There has been growing recognition that joint labor-management committees can bring a new and important dimension to labor-management relations. Committees can do much to enlarge the community of interests between workers and management and can be a useful forum for addressing work-related problems.

Joint labor-management committees can also help to stabilize the labor relations climate and structure in a particular area and thus contribute to the process of regional economic development. This has been the experience in Jamestown, N.Y., where the labor-management committee was a major factor in the reversal of a decade-long state of economic decline.

I am very pleased that this vital new initiative has become law and am hopeful it will help to harmonize the relationship between labor and management in the workplace; to improve worker morale; to reduce job tensions; enhance worker participation in enterprise and, thus, to improve the dignity of U.S. workers.

PENSION REFORM

As principal author of the private pension reform law (ERISA), I have been deeply concerned about the act's implementation. On May 1, I introduced the ERISA Improvements Act of 1978 (S. 3017) which contains comprehensive proposals for expanding the pension coverage and protections of American workers and for making the law more effective.

My bill would expand the joint and survivor annuity protection of present law, and would prohibit any decrease of disability benefits paid under a welfare plan because of an increase in social security benefits.

I am very troubled about the adverse effect of inflation on private pensioners who must live on fixed incomes. My bill would require an in-depth study of the feasibility of requiring pension plans to provide cost-of-living adjustments to benefits payable under such plans.

The Labor Subcommittee, of which I am the ranking minority member, held 3 days of hearings on S. 3017 in August. We received testimony from many different interest groups and are optimistic that major ERISA amendments will be enacted into law in 1979.

WELFARE

Despite efforts by myself and other Senators, this Congress did not achieve the comprehensive welfare reform so vital to New Yorkers and the rest of the Nation.

Other aspects of social service legislation were more successful in this session. Congress passed a bill, which I cosponsored, to increase the ceiling on Federal moneys for social services under title XX of the Social Security Act from $2.5 billion to $2.9 billion.

TRANSPORTATION

This year I supported legislation to improve all facets of transportation for New Yorkers. The Surface Transportation Act of 1978, which authorizes funds for highway and mass transit programs, contains an amendment offered by me on the Senate floor to relieve States of the requirement of repaying the Federal match when interstate highways are abandoned. This will save New York State $13 million. It also incorporates a bill, which I cosponsored, to increase substantially Federal funding for bridge repairs.

To encourage alternative modes of transportation, I strongly supported the mass transit portion of the Surface Transportation Act. It includes a new formula for operating subsidies for mass transit, giving increased assistance to the largest urban areas.

In conjunction with other Senators from New England, I took action this year on two pressing problems in rail transportation for New York. The financial stability of the Delaware and Hudson Railroad was of continuing concern. Congress did provide $2.7 million in interim relief, but the issue of viability of the Delaware and Hudson will be a high priority of mine in the next Congress. The Senate did authorize, however, $9 million dollars for the reconstruction of the Poughkeepsie Bridge. Not only will this improve rail service in New York if enacted, but it will also provide much-needed jobs in Poughkeepsie.

Congress this year took an important step in air transportation in passing legislation to decrease Federal regulation of airlines. The measure will increase competition and thereby should improve service and reduce fares. Although some small communities might be affected by service diminutions by the major carriers, I feel the legislation contains sufficient safeguards to insure adequate alternative service.

Congress failed to pass the aircraft noise reduction legislation which I feel was equally as important as the regulatory reform measure. I shall work next year for legislation that would assist the airlines and the airports to reduce noise for the many New Yorkers who are burdened by aircraft noise.

HOUSING

The Housing and Community Development Act of 1978, passed in the closing days of the Congress, contains amendments of mine offered on the Senate floor. One amendment raised the mortgage limits for multifamily apartment buildings built by nonprofit organizations. This will permit these organizations to participate once again in the multifamily housing program, a field restricted to them in recent years because of low mortgage limits.

The Housing Act also contains a number of measures that I cosponsored. Among these are: a substantially increased program for rehabilitation of multifamily rental dwellings occupied by low and moderate income families; a program of supportive services for the frail elderly to permit them to live in a noninstitutional environment; programs for improved management and increased

tenant participation in troubled multifamily housing projects; and moneys for innovative programs for public housing security.

NUTRITION

Nutrition legislation in the second session of this Congress included two important measures that I strongly supported. Funding for the WIC program for women, infants, and young children who are in danger of malnutrition was greatly increased. This program is a vital element in breaking the poverty cycle.

Incentives were added by this Congress to expand the school breakfast program for needy children. New York has been a leader in this important program. This year's legislation will encourage other States to follow suit as well as provide additional moneys for the New York programs.

This year I also worked with participants in the summer lunch program in New York City to improve the administration of the program so that needy children could be more adequately served. Although problems still remain, I am committed to further efforts to solve this difficult situation.

TAXES

U.S. tax policy should reflect people's concern about the effect of inflation and increased social security taxes on their take home pay and business uncertainty about the future investment climate. To meet these concerns I introduced with Senator DANFORTH a comprehensive tax package: first, to offset the effects on individuals of inflation and increased social security taxes over the next 3 years by widening the tax brackets and increasing the standard deduction, personal exemption, and earned income tax credit by 6 percent per year, and second, to increase business investment through a reduction in the corporate rate and increases in the investment tax credit and the acceleration of depreciation. I believe these business cuts are an essential element in making the U.S. economy sufficiently productive to increase jobs for Americans.

The Revenue Act of 1978 contained several provisions that I authored or cosponsored. The reduction of the maximum corporate tax rate from 48 to 46 percent is a modification of the corporate rate reduction of the Danforth-Javits package. The Employee Education Assistance Act, introduced by Senator PACKWOOD and me, will make education paid for by an employer exempt from taxation for an employee. This removes the job-related test that has served as an obstacle to lifelong learning, especially among women, minorities, and those in less-skilled jobs. The act also substantially reduces the taxation of capital gains, a concept that I supported.

AGING

As an original sponsor of the Older Americans Act of 1965, and as a sponsor of every subsequent extension, I was pleased to cosponsor the Comprehensive Older Americans Act Amendments of 1978, which passed the Senate on July 24 of this year. This legislation reauthorizes programs under the Older Americans Act for 3 years, and will substantially improve the broad range of programs serving our older population by consolidating and streamlining the administration of these programs at the Federal, State and area agency level.

MANDATORY RETIREMENT

On April 6 of this year, the President signed into law the Age Discrimination in Employment Act Amendments of 1978. A floor manager of the Senate bill and a participant in the Senate-House conference on these amendments, I was very pleased that Congress raised the mandatory retirement age for private, State and local governmental employees from 65 to 70. I have had a special interest in age discrimination legislation for many years, having introduced my first such bill in 1951 as a Member of the House of Representatives.

EDUCATION

Educational opportunity for all has been a central goal of mine throughout my tenure in Congress. The Federal Government plays a critical role in our progress toward this goal, and this year there was much Federal legislation which affects every sector of education.

The Congress, in 1978, worked on many major pieces of education legislation: first, complete revision of the Elementary and Secondary Education Act; second, expansion of student financial aid for colleges; third, strengthening the education and training aspects of CETA, the largest Federal program to combat unemployment; and fourth, reorganization of the Federal Government's education agencies.

As the ranking minority member of the Human Resources Committee, which deals with education and manpower programs, and a senior member of the Government Affairs Committee, which deals with Government organization I had the opportunity to be a principal author of each of these measures.

The vast Elementary and Secondary Education Act was extended for 5 years and was revised to include a number of my ideas to provide more aid to those urban and rural school systems which educate many low-income children, cut down paperwork and administrative red-tape, and increase the services to children in nonpublic, as well as in public, schools. I sponsored the College Opportunity Act, a major step forward in extending present financial assistance on the college level to middle income families who need help but have not previously been eligible.

CETA, the comprehensive employment bill, includes my amendments to improve linkages between education and work and thereby enhance job prospects for young people. The proposed new Department of Education may give greater emphasis to Federal assistance to education programs.

URBAN SCHOOL AID

The financial plight of New York City is well known, but there are hundreds of urban and rural communities outside of New York whose resources are insufficient to meet the educational needs of their young people.

In order to target Federal aid to those students who are in the greatest need of strengthened educational programs, I sponsored three amendments which direct additional funds to New York and other school districts with the highest numbers and proportions of children from low-income families.

I also revised the impact aid program, which compensates school districts for property taxes lost due to the presence of nontaxable Federal property, to increase the amount of funds for school districts serving children who live in federally supported public housing, and to limit expenditures to districts which do not need this assistance.

NONPUBLIC SCHOOL CHILDREN

I have long been committed to the belief that children in nonpublic schools should receive the same benefits from Federal education programs as do children in public schools, to the extent that this is constitutionally permissible.

Existing programs reflect this belief with many of my provisions to extend services to nonpublic school children. Unfortunately, such children still remain underserved in many instances. To insure that they receive their fair share of services, I sponsored numerous amendments adopted by the Congress in the elementary and secondary education bill.

EDUCATION OF GIFTED AND TALENTED CHILDREN

This year the Congress adopted my suggestions for building upon the program for gifted and talented children which I authored in 1974. These children are one of our most precious yet most neglected resources. The time has come to give new emphasis to their education, and my program as approved would expand and refine the existing State and Federal role in this area.

ADULT EDUCATION

My proposals for expanding basic educational programs for adults were adopted by the Congress this year. I sponsored the Federal adult education program in 1966, and since that time the program has afforded millions of Americans the opportunities to achieve economic and social advancement through its emphasis on improving basic literacy and providing high school equivalency. Although the funding has been less than needed, the program has proven to be highly effective, and is therefore expanded by my amendment to increase its outreach to an even greater number of adults.

I also authored a new provision to help meet the special educational needs of adult immigrants. Thousands of immigrants in New York require language and skill training as well as counseling.

BILINGUAL EDUCATION

Federal aid for programs of bilingual education continues to be a vital factor in the education of large numbers of students whose native or home language is not English. I advocated this year a significant increase in the amount of Federal funds to support demonstration projects which seek the most effective ways of teaching children the language skills they require to participate in the English-speaking classroom.

COLLEGE OPPORTUNITY ACT

To offset the burden of spiraling college tuition costs. I cosponsored the College Opportunity Act passed by the Senate and which I hope will receive House approval (House action was pending at

the time this report went to press). This measure has the strong support of the Carter administration.

Existing programs of Federal aid to college students have focused on the lowest income families, but I recognize that middle income families as well are finding that college costs now surpass the capacities of their pocketbooks. I therefore supported three provisions to broaden the categories of income-eligibility for tuition assistance.

EDUCATION IN CETA

The Comprehensive Employment and Training Act (CETA) is being reshaped this year to reflect my deep concern for improving the educational, training, work-study and guidance aspects of local CETA programs in order to aid the transition to unsubsidized employment for CETA participants. Several major new provisions strengthen the linkages between local and State education agencies and manpower authorities. Funds are to be reserved for the governor to encourage coordination and establish linkages between prime sponsors and educational agencies and institutions. I believe these improvements will foster the kind of cooperation between manpower authorities and education agencies necessary to reduce structural unemployment and provide participants with the opportunity for productive careers.

DEPARTMENT OF EDUCATION

A bill to consolidate many education programs now distributed among several Federal agencies into a single Department of Education passed the Senate this year and is awaiting House action. As a strong advocate of Federal support for education, and of measures which produce meaningful benefits school districts. I supported this bill.

HEALTH

As ranking minority member of the Human Resources Committee and a senior member of the Health Subcommittee, I considered numerous pieces of legislation this past year that addressed issues affecting the cost quality and accessibility of health care services. Disease prevention and health promotion were major themes in many health bills. As we learn more about the importance of the factors which contribute to healthy lives, the Congress is devoting an increasing proportion of health resources to health programs which go beyond the concept of sickness treatment.

I have authored a number of health measures during this session of the Congress, which were enacted into law in the closing weeks of the 95th Congress.

CLINICAL LABS

One of the most important of these bills is S. 705, the Clinical Laboratory Improvement Act (CLIA). CLIA was passed unanimously by the Senate over a year ago and has been awaiting action by the House of Representatives ever since.

The bill contains provisions which require the licensing of all clinical laboratories engaged in medical testing; which establish national standards to improve the quality and performance of these facilities; and which prohibit and penalize fraud and abuse. Every American is entitled to high quality, accurate laboratory testing, for such tests are often the basis for diagnosis and treatment. Because evidence suggests that many of our clinical laboratories fall short of these expectations and standards, I believe this legislation would implement many of the reforms necessary to achieve this important goal.

PRIMARY HEALTH CARE

An important measure I introduced earlier this year attempts to alleviate problems in primary health care, problems which people face in this first contact with health care services. The Primary Health Care Act of 1978—now incorporated into the Health Services Extension and Primary Health Care Act of 1978—contains several provisions directed at improving the quality and availability of primary health care services throughout the country, but particularly in medically underserved areas.

GENETIC DISEASES

The original National Genetic Diseases Act (enacted in 1976) provided for a national program of voluntary screening, testing, counseling, information, and education for all genetic conditions. It is currently estimated that at least 15 million people in our country suffer from genetic-related diseases, that 80 percent of all mental retardation is genetically associated, and that at least 40 percent of all infant deaths stem from genetic factors. I introduced the bill which extends and revises the programs authorized by the National Genetic Diseases Act for 3 years. Enactment of this measure will provide essential services to families who risk or suffer from inherited diseases.

I believe that the need for this legislation is unquestionable, as the overwhelming support for the legislation in the Senate shows, and I intend to introduce the bill once again in the 96th Congress.

In addition, I was a cosponsor of the Health Planning Amendments, S. 2410, to extend and improve the law which assists in carrying out health planning and resources development. The measure was not enacted and will be reintroduced during the next Congress.

VENEREAL DISEASE

Venereal disease is a critical health problem facing a growing number of Americans; it is perhaps the leading health problem among young people. Today it is estimated that there are a total of 10 million cases of venereal disease in this country. Of these, adolescent venereal disease accounts for fully 25 percent; this means that one out of every eight adolescents has venereal disease. To combat this growing problem, I introduced the Venereal Disease Prevention and Control Act Amendments of 1978 which extend and improve existing venereal disease prevention and control programs. The amendments enacted place a major new emphasis on VD education and information, a critically important weapon for fighting this disease.

HYPERTENSION

Until very recently, it was estimated that 23 million Americans have hypertension or high blood pressure; new data suggests, however, that as many as 35 million people are hypertensive. Of these, only 7 million (20 percent) are thought to be adequately treated for this disease.

During this year, I sponsored provisions in S. 2474 which extend for 3 years Federal programs which provide funds to States for programs directed at the screening, diagnosis, detection, prevention, and referral for treatment of hypertension.

NURSE TRAINING

Another major piece of legislation I authored is the Nurse Training Amendments of 1978. This bill extends existing Federal programs in nursing education for 2 years. I will continue to do all that I can to assure appropriate continued Federal support of nursing education programs as long as such funding is warranted.

OTHER LEGISLATION COSPONSORED

In addition, I cosponsored several measures which have also been enacted:

S. 2910, the Adolescent Health, Services, and Pregnancy Prevention and Care Act of 1978. This bill is designed to address the needs of adolescent girls who become pregnant.

S. 2579, the President's Commission for the Protection of Human Subjects of Biomedical and Behavioral Research Act of 1978. This legislation establishes a Presidential Commission charged with the responsibility of reviewing research projects conducted by any Federal agency to assure that human subjects participating in such research projects are adequately protected.

I was also the author of an amendment to the Fiscal Year 1978 Supplemental Appropriations Bill (PL 95-355) which provides funds under section 1625 of the Public Health Service Act for grants to public hospitals. The money would be used to make necessary physical improvements to the hospital in order to remedy safety hazards or to avoid noncompliance with State or voluntary licensure or accreditation standards.

S. 3116, the Disease Prevention and Health Promotion Act of 1978. This bill further promotes the concept of prevention by providing Federal support to State programs in childhood immunization, fluoridation, lead-based paint poisoning prevention, physical fitness, comprehensive public health services, and others.

Two important pieces of legislation did not become law during this session of Congress. Both measures passed the Senate, but were not considered by the House of Representatives due to the crush of legislation in the final days of the legislative session.

NATIONAL HEALTH INSURANCE

I have long supported passage of a national health plan. Because of growing fiscal constraints, I concluded almost 4 years ago that in order to achieve my long-standing goal of universal comprehensive national health plan, we should design a program which phases in different segments of our population over a period of time. Enough time should be allowed to enable Congress

and the administration to monitor closely and control the program, both fiscally and administratively. Consequently, I developed and introduced in both the 94th and 95th Congresses the National Health Insurance for Mothers and Children Act—a bill designed to provide comprehensive health care services to all children up to the age of 18 and to all pregnant women. I selected this segment of the population as a starting point because I believe it represents the wisest investment of our health care dollars in the future health and well-being of the citizens of this country.

Finally, I have become increasingly concerned with the growing problem of divided congressional committee jurisdiction over issues relating to the financing and delivery of health care services. Today there are four major committees in the Congress which share jurisdiction over health issues. This jurisdictional division has led to lengthy, and in my judgment unjustified, delays in the consideration and passage of numerous health measures.

Therefore, I introduced Senate Concurrent Resolution 100—a bill which would establish a Joint House-Senate Committee on National Health Insurance. This committee would combine the jurisdictions of the four major health committees in the House and Senate and would have exclusive jurisdiction over all bills and resolutions relating to the establishment and implementation of a national health insurance program.

REFORM OF FDA'S DRUG REGULATORY PROCESS

The system by which FDA permits medications to be available to the public is one of the most critically important health responsibilities of the Federal Government. Each decision whether or not to make a drug available to the public affects the health and lives of millions of Americans.

As the public becomes more sophisticated about the risks and benefits associated wi'h medications, their confidence in how the agency operates has become diminished.

Early in this Congress, I introduced a major consumer protection bill—the Comprehensive Drug Amendments of 1977 which proposed a major overhaul of FDA's drug regulatory scheme.

In this last session, many of my colleagues and the administration joined me in developing another far-reaching FDA reform bill based in large part on my earlier bill.

Both measures would not only guarantee better decisions for the public health, but would for the first time make sure these decisions would no longer be made secretly. The bills would provide the public an opportunity to participate in this deliberative process.

As with many major and comprehensive reforms of regulatory agencies, it takes time, in hearings and committee sessions, to assure that the proposals are carefully designed and that the desired impact will actually occur. I have spent a significant amount of time refining these proposals in the committee process and will introduce early next session a new bill incorporating many new ideas and proposals, which will achieve the same goals.

HANDICAPPED

Issues facing our Nation's handicapped citizens have long been of paramount importance to me. S. 2600, the Rehabilitation, Comprehensive Services and Developmental Disabilities Amendments of 1978, which passed the Senate on September 21, will greatly expand critical services for the handicapped and developmentally disabled, by providing new programs for severely handicapped individuals, reader services for the blind, interpreter services for the deaf, and a National Institute of Rehabilitation Research. One of the major features of this legislation is of particular relevance to me: an expansion of the State system to protect and advocate the rights of the developmentally disabled established through the bill of rights for the developmentally disabled I authored in 1974.

MEDICAID ASSISTANCE

I also introduced this session S. 2505, a bill which will enable severely disabled persons who are capable of gainful employment to receive medicaid assistance. Employable disabled persons in our country are victims of an intolerable situation: the medicaid program, designed to help people, often places employable severely handicapped individuals instead in a very real "life or death" dilemma which has the effect of requiring them to go on public assistance.

CHILD AND HUMAN DEVELOPMENT
VOLUNTARY FAMILY PLANNING

The Voluntary Family Planning Services, Population Research, and Sudden Infant Death Syndrome Amendments of 1978, which I cosponsored, and which passed the Senate June 7, 1978, will significantly improve federally supported programs of family planning and population research by increasing the opportunity of individuals to receive voluntary family planning services. Perhaps most importantly, it authorizes a new and essential program to provide family planning services to adolescents who wish to avoid unwanted pregnancy.

DOMESTIC VIOLENCE

Domestic violence is a pervasive and increasing problem in our Nation. Such violence is not restricted to any one segment of our society, but affects the whole spectrum of American economic and social life. To help alleviate the horrors of this problem I cosponsored legislation, S. 2759, the Domestic Violence Prevention and Service Act, which was passed by the Senate on August 1.

This bill provides assistance to States and local communities in their efforts to protect and care for victims of domestic violence.

VETERANS

Today's GI bill, unlike the World War II law, does not take into account relative differences among States in educational costs and, as a result, far too few New York veterans take advantage of their GI bill opportunities. To this end, I introduced, with Senator MOYNIHAN, an amendment to S. 2384, the Veterans Pension and Survivors Improvement Act, passed by the Senate July 31, which would remove State matching requirements from the tuition acceleration provisions of the GI Bill Improvement Act of 1977. This amendment would remove a provision in the 1977 legislation that tied veterans' benefits for education to a home State's ability to pay for GI bill benefits. Under that provision, financially-pressed States such as New York would be required to match Federal GI bill assistance with scarce State funds. I firmly believe that my amendment will permit proper Federal assistance to those Vietnam veterans who, through honorable service, have earned GI benefits from a grateful Nation.

EQUAL RIGHTS AMENDMENT

In the last weeks of the Congress, the Senate voted to extend the period of time by which the States could ratify the equal rights amendment. I was a major cosponsor of this resolution and took an active role in informing my colleagues of the legal and constitutional issues involved in such action.

I believe that the long struggle, begun in Seneca Falls, N.Y., well over a century ago must be continued until women have equality under the law.

No one wants to be treated as a stereotype, nor should they. We are a society of individuals—each with our strengths and weaknesses. I believe that the equal rights amendment provides an opportunity for each individual regardless of his or her sex, to be treated as an individual.

FOREIGN RELATIONS

There were a number of historic foreign policy developments in 1978. The momentous breakthrough for peace in the Middle East achieved at the Camp David summit; Senate advice and consent to the ratification of the Panama Canal Treaties; lifting of the Turkish arms embargo; continued strains with the Soviet Union respecting developments in Africa and human rights; progress on Strategic Arms Limitations Talks and numerous other developments affecting U.S. interests throughout the world. As a member of the Senate Foreign Relations Committee I took an active part in the Senate's actions respecting responsibilities in these issues. As a member of the Senate Foreign Relations Committee, I visited Panama in January and I also traveled to Greece and Turkey, Europe and the Middle East to investigate first hand the situations there.

THE MIDDLE EAST

The dramatic peace breakthrough achieved by President Carter, Prime Minister Begin and President Sadat at the Camp David summit was probably the most significant foreign policy development of the year. As a result of Camp David there is a real chance for a lasting peace in the Middle East. I strongly support the agreement and will do everything I can to help establish peace. The decision of the Israeli Knesset to relinquish the Israeli settlements on the Sinai was a most constructive and courageous step in that direction.

Earlier in the year I helped lead the opposition to the Carter administration decision linking the sale of sophisticated military aircraft to Israel to the simul-

taneous sale of weapons to Saudi Arabia and Egypt as a package deal. On the other hand, I helped to obtain $1 billion in security assistance to Israel, and three-quarters of a billion dollars in economic assistance to both Israel and Egypt.

LATIN AMERICA

The major development this year respecting Latin America was the ratification of the Panama Canal treaties. I supported these vital treaties approved by the Senate with a two-thirds majority. With my support the treaties were amended by the Senate to a significant degree to assure that U.S. rights to keep the canal open, neutral, secure and operating (with force if necessary) and to allow U.S. warships expeditious ("head of the line") passage in the event of an emergency. I strongly supported these amendments as a precondition for Senate approval of the basic treaties.

I also supported a United States-Bolivia Prisoner Exchange Treaty—now in force—to bring U.S. citizens in Bolivian jails under terrible conditions to finish their sentences in U.S. institutions—an agreement very similar to that which we have with Canada and Mexico.

GREECE AND TURKEY

I travelled to Greece and Turkey (two important NATO allies) for the Foreign Relations Committee in March to make a first hand inquiry into the disputes between these two allies about the ongoing crisis on Cyprus and the Aegean territorial dispute. My findings led me to continue to support the imposition of an arms embargo against Turkey for its violations of U.S. law respecting the use of U.S. supplied arms on Cyprus. However, a majority of Congress voted to lift the arms embargo through an amendment to the International Security Assistance Act of 1978. I will continue to watch the situation there very closely.

UNITED STATES-U.S.S.R. RELATIONS

Despite its obligation under the Helsinki agreement respecting fundamental human rights—especially the right to emigrate and to reunite families—the U.S.S.R. continued its violations of the Helsinki Agreements by the persecution of Soviet citizens seeking to insure Soviet compliance with the Helsinki Agreement. Prominent Soviet dissenters such as Uri Orlov, Anatoly Shcharansky, Viktoras Petkus, Alexander Ginzburg and others and even a U.S. citizen were the victims of alleged "trials" in the Soviet Union which broadcast to the world blatant Soviet disregard for basic human rights and decency.

An issue of fundamental importance in our relations with the U.S S.R. is strategic arms limitation talks (SALT). I have watched closely the progress of the SALT negotiations, which are expected to be concluded by the end of this year. When an agreement is signed it will be submitted to the Senate and I will give very close scrutiny to the entirety of its provisions to be sure that it protects U.S. security interests and helps to stem the arms race and maintains strategic stability.

ASIA

Especially following my visit to Seoul in December 1977, I have had serious reservations regarding President Carter's plan to withdraw U.S. ground forces from South Korea. North Korea remains hostile, aggressive, and heavily armed. I believe that the presence of U.S. forces constitutes a deterrence to North Korean aggression and thus remains a vital component for peace and stability in northern Asia, including Japan.

Moreover U.S. actions in Korea will affect the perception in Asia of the will of the United States to fulfill its security commitment. Accordingly, I supported an amendment which is now law to insure that the withdrawal of troops from South Korea will not endanger security in the region and will be implemented in consultation with Congress.

I have welcomed the efforts of the past three administrations to make normalization of relations possible with the People's Republic of China; it has been long overdue. However, such "normalization" must not come at the expense of our support for the integrity of the Republic of China on Taiwan with which we have a mutual defense treaty. Accordingly, I cosponsored an amendment to the International Security Assistance Act, to require prior consultation with Congress on any measures which would affect our mutual defense treaty with Taiwan.

AFRICA

Focus on Africa centered on the conflict in Rhodesia where the Smith regime reached agreement with three major black leaders to initiate majority rule in Rhodesia. I coauthored a provision which is now law to lift the U.S. embargo of Rhodesia once fair elections have been held and on condition that a good faith effort is made to reach a negotiated solution to the struggle with the outside black guerrilla forces.

OTHER LEGISLATIVE INITIATIVES

I sponsored an amendment to the International Security Assistance Act of 1978 to require the President to submit annually to Congress a comprehensive plan for all proposed arms sales for each fiscal year. This procedure will enable comprehensive coordinated review of U.S. arms sales abroad by the President and Congress, rather than the ad hoc, disjointed procedure which has been followed until now.

I coauthored legislation to effect comprehensive Federal Government policies and programs to combat international terrorism and to implement rigorous sanctions against countries that support terrorists. This far-reaching legislation made considerable progress through Congress this year, and I will work hard to achieve its enactment in the new Congress in 1979.

DEFENSE

I supported President Carter's veto of the Defense authorization bill which resulted in the exclusion of a fifth nuclear aircraft carrier at a cost of more than $2 billion. Earlier I supported an amendment in the Senate to prevent funding of the expensive F–18 Navy fighter aircraft program which could not adequately perform the fleet defense mission as well as the existing F–14 aircraft. Unfortunately, this amendment was defeated.

I also have worked hard to have stationed at Fort Drum, N.Y., the Second Infantry Division as it is withdrawn from South Korea. This would bring economic benefit to New York State and would help to balance the disproportionate distribution of defense facilities in the Southern States—an imbalance which has aggravated New York's poor financial situation. A decision by President Carter on where to base the Second Infantry Division has been pending since July.

INTERNATIONAL ECONOMY

STATE OF THE WORLD ECONOMY

The two most critical issues facing the international economy today are the sharp decline in the dollar and the need for new markets for the exports of the United States and the other industrialized countries. These two issues are closely related—as long as the industrialized countries focus their exports primarily on each other's markets, their currencies will be unstable, exacerbating their overall political relations.

The rapid and dramatic decline of the dollar's value is not only a problem with international effects but also has harsh consequences for the American people. The falling dollar contributes to higher inflation in the United States, erodes confidence in the future of the country, places extraordinary pressure on our trading partners to erect barriers to U.S. exports, and dampens the international free flow of capital by hampering investment decisions. There is also the danger that the OPEC countries, who are concerned that the dollars they are receiving for their oil are declining in value, will raise the price of oil.

It is critical that the U.S. display strong leadership and take decisive action to curb the dollar's further deterioration. In numerous discussions with President Carter and other world leaders and in speeches on the floor of the Senate, I have urged the swift adoption of a three-part program to deal with:

The short-term problem of increasing the resources available to the United States to intervene adequately in the foreign exchange markets when necessary. By continuing to tighten credit, the Federal Reserve Board can also demonstrate concern for the international position of the dollar.

The medium-term problem by reducing our trade deficit through a vigorous export expansion effort, cutting our oil imports, and dealing aggressively with inflation. We must also take steps to improve U.S. productivity, which is at the root of our declining international competitiveness.

The long-term structural problem facing the world economy by supplementing the present exclusive reliance on the dollar as the key reserve asset by a reliance on a combination of the currencies of the major industrialized countries.

We must also insure that the world's markets are sufficiently large to permit the resultant expansion of trade. This expansion of markets is closely related to continued economic growth in the developing countries of the world. To foster this growth, a coordinated international effort is required to channel adequate levels of capital to the LDC's.

A growth development fund, as I have put forward in S. Res. 441, made up of contributions from the OPEC and OECD countries, would be a mechanism to make available funds to the LDC's for productive investment in rational agriculture, industrial development and trade that take into account the total needs of the international economic system.

U.S. PRODUCTIVITY

I continue to be deeply concerned about the stagnation in productivity that has characterized our country in recent years. In what is a most ominous and insidious development, the United States has fallen from first place to last place in productivity growth among our major international competitors. More importantly, stagnant productivity is one of the principal causes of our deteriorating world trade position, the recurrence of severe inflation in the United States and the erosion in our standard of living. There is no question that the productivity problem in the United States has exacerbated the problems of inflation and unemployment and has set the stage for the resumption of what may now be a new inflationary spiral.

I intend to concentrate my efforts in the 96th Congress on developing significant new legislative initiatives to deal with the problem of stagnant U.S. productivity and hope we will be able to reverse the decline before it is too late.

MAJOR LEGISLATION

Public Law 95–424, the International Development and Food Assistance Act, authorizes appropriations of $1.86 billion for fiscal year 1979 for bilateral assistance, international disaster assistance programs, and voluntary U.S. contributions to international organizations. Two provisions of the act, which I sponsored, provide debt relief to the poorest developing countries—which is an important step toward improving the relationship between the developing and the developed world—and directs AID to emphasize energy conservation in its development activities.

Senate Resolution 440, which was passed by the Senate, calls on the President to undertake discussions with the industrialized countries as a first step toward developing a common approach to the serious problems of the international monetary system. Senate Resolution 441 puts forward the concept of a growth development fund made up of contributions from the OPEC and OECD countries for productive investment in the developing countries.

Public Law 95–268 authorizes the extension of the Overseas Private Investment Corporation. I was instrumental in focusing the legislation on OPIC's central purpose of facilitating investment in the developing countries while insuring that U.S. small business has access to OPIC programs and minimizing the possibility of lost U.S. employment.

Public Law 95–435 authorizes $18 billion for the U.S. contribution to the Witteveen Facility of the International Monetary Fund. I strongly supported Public Law 95–435, which will enable member countries to redress their balance of payments difficulties, thereby increasing the stability of the international economic system.

S. 3077 extends and expands the operating authority of the Export-Import Bank by providing export financing and makes a substantial contribution to our ability to compete in the international marketplace.

OVERSEAS TRIPS

In July, I traveled to Paris to meet with President Giscard d'Estaing of France to discuss matters requiring attention at the Economic Summit in Bonn. In addition I discussed these issues with Japanese Prime Minister Fukuda, British Prime Minister Callaghan, and German Chancellor Schmidt during their visit to the United States in the spring.

TRADE PROBLEMS

I worked for the passage of H.R. 11711, the Trade Adjustment Assistance Act, which improves and expands the operation of adjustment assistance programs for workers and firms whose industries have been adversely affected by imports. This bill corrects many of the serious flaws in the operation of the present adjustment assistance programs.

In response to a sudden and heavy increase in the volume of imported steel coming into the United States from European producers, I urged the Special Trade Representative to undertake serious discussions with our European trading partners in order to prevent the recurrence of such a surge in steel imports. In addition, on numerous occasions I have communicated to Ambassador Strauss and other members of the administration my concern that U.S. exports, of particular interest to New York State producers, have open and fair access to the markets of our trading partners.

INTERNATIONAL BANKING

In August 1966, I introduced legislation to establish Federal regulation over foreign banking corporations doing business in the United States and its territories.

Then, as now, we must have Federal supervision of the foreign banks because of the degree of knowledge and expertise required to evaluate various applications as well as to examine and regulate foreign institutions. Because these activities constitute such a small proportion of the supervisory functions of any State, required State specialization in the international banking field has not been developed.

In August 1978, 12 years later, the International Banking Act of 1978 was cleared by both Houses of Congress and sent to the President for his signature. This new law accomplished the objectives of my original legislation.

ANTITRUST COMMISSION

In June of this year, I was sworn in as one of the 22 members of the National Commission for the Review of U.S. Antitrust Laws and Procedures. Establishment of this Commission by Presidential Executive order was the culmination of a 16-year effort on my part to convene a legal body to review our antitrust laws.

The Commission resulted from legislation I introduced in May 1977 proposing a major examination of U.S. antitrust laws to determine whether the statutes, now more than 80 years old, are fully appropriate to the problems of the contemporary American economy.

As a member of the Commission, I have sought particularly to direct the attention of the Commissioners to the international aspects of antitrust laws as they affect the competitiveness of U.S. exporters in overseas markets where they must compete against foreign firms not subject to the stringencies of U.S. antitrust laws and philosophy.

ENERGY

In 1978 the Congress faced one of its most arduous tasks—the development of a national energy policy. Although passage of the separate provisions of the national energy plan was not accomplished until late in the session, I believe that the outcome will result in both increased production and conservation of our scarce energy resources.

In light of this fact, I supported passage of the energy conservation, utility rate reform, energy tax, and coal conversion portions of the national energy plan, in addition to the natural gas compromise. Passage of these bills will help lead the United States toward energy self-sufficiency at a time when we are still importing over half of our petroleum. A national focus on ways to cut back these oil imports through conservation and increased production was of singular interest this year in Congress.

CONSERVATION AND PRODUCTION

Conservation is an essential ingredient in the energy policy formula for two reasons. First, it will reduce consumption and, therefore, lessen our reliance on foreign imports. Second, it will encourage the development of alternate energy technologies as we look toward a future based on secure and clean energy sources.

Switching from one energy source to another is a costly undertaking, and incentives that will help ease the economic burdens imposed by experimentation with new and innovative technologies, are essential.

Aware of this initial capital investment problem, I was instrumental in helping enact the solar energy tax credits and homeowner's insulation tax credit. The solar tax credits will rebate to consumers who have installed solar energy devices in their homes up to $2,200 based on a percentage formula of investment.

The insulation credits will encourage homeowners to insulate better by rebating 15 percent of any expenses of the costs associated with weatherization, up to a maximum rebate of $300. Both of these tax credits are retroactive to April 1977.

Further, I supported legislation designed to promote the use of solar energy in Federal buildings, and I have cosponsored a bill which will provide guidelines for the establishment of solar access rights. In addition, I was an active supporter of Sun Day, May 3, 1978, a day devoted to the education of the public regarding advances in solar technology.

To lessen our dependency on foreign sources of energy, I have cosponsored legislation that would encourage development of new alternative sources of energy: S. 2400 and S. 2533. The former would establish a National Alcohol Fuels

Commission to fund research on gasohol and other alcohol-based fuels. The latter would require the blending of one percent ethanol with gasoline during a ten year pilot project. Neither of these bills was enacted.

Alcohol fuels, derived from agricultural surpluses, municipal wastes and timber, among other sources, can be easily integrated into our present transportation system with few modifications. Indeed, alcohol fuels have great potential for replacing natural gas and oil for other uses, such as in utility peak turbines.

NUCLEAR

Nuclear energy can provide us with a short-term solution to some of our current energy demands. However, it is important that first we find a solution to the problem of nuclear waste before advocating an energy policy based on atomic energy. At present there is no national management system for the safe disposal of nuclear wastes. As ranking minority member of the Energy Subcommittee of the Governmental Affairs committee, I actively participated in hearings designed to address this issue. These hearings explicitly delineated the national objective of formulating an effective nuclear waste program and addressed the problems facing States which have such nuclear waste repositories.

Also, I was an original cosponsor of the Nuclear Non-Proliferation Act (Public Law 95–241), which was signed into law this year. This legislation represents one of the first attempts to control the proliferation of nuclear materials throughout the world by imposing strict regulations on the sale of nuclear materials.

ENVIRONMENT

In response to the critical health threat posed by disposed hazardous wastes in the Love Canal near Niagara, Falls, I authored an amendment to the HUD-Independent Agencies appropriation bill, H.R. 12936, which provides up to $4 million to New York State for the purposes of detoxifying the Love Canal. The amendment was adopted by Congress and has been signed into law by the President.

During consideration of the Navigation Development Act, I cosponsored an amendment that would have authorized the Federal Government to finance the annual cost of operation and maintenance of the New York State Barge Canal. This canal was financed in its entirety by the citizens of New York in the 19th century. Today it remains as the only major inland waterway system not maintained by the Federal Government.

GOVERNMENTAL AFFAIRS

As a senior member of the Governmental Affairs Committee, I supported passage of S. 2971, the Lobbying Reform Act; H.R. 7700 the Postal Service Amendment Act of 1978; S. 991, the Department of Education Act; House Joint Resolution 554, a constitutional amendment for District of Columbia representation in Congress; and, H.R. 2852, the antirecession and supplemental fiscal assistance legislation.

All of these bills, with the exception of S. 2971 and H.R. 7700, have passed the Senate, although they did not pass the House. The resolution granting District of Columbia residents a right to send voting representatives to Congress passed both Houses and was sent to the 50 States for ratification as an amendment to the U.S. Constitution.

I was also a cosponsor of S. 518, the Federal Employee Part-Time Career Employment Act and S. 517, the Federal Employees Flexible and Compressed Work Schedule Act.

In addition to the above legislation, I introduced S. 3450, the Privacy Act Amendments of 1978. This bill is designed to protect the patient from disclosure of his medical records to unauthorized persons, and would also give patients a right of access to their own records, a right they do not currently have.

CIVIL SERVICE REFORM

As a senior member of the Senate-House conference committee to resolve the differences between the Senate- and House-passed civil service bills, I supported and helped develop the most comprehensive reform of the Federal civil service ever undertaken.

While recognizing the unique contributions of thousands of dedicated and able civil servants, the legislation makes it easier to punish incompetence and to reward hard work, creativity and outstanding performance.

BANKING REORGANIZATION

With Senators RIBICOFF and PROXMIRE, I introduced legislation to consolidate the three Federal bank regulatory agencies into a single Federal Bank Commission. S. 2750 is predicated upon the proposition that the present tripartite structure leads to inconsistent regulation.

The bill would facilitate the achievement of the basic goals of bank regulation, that is, to insure safe and sound banking practices and to encourage competition and innovation within the Nation's banking system.

CRIME AND CRIMINAL JUSTICE

During the second session of the 95th Congress, the Senate passed and sent to the House a major overhaul of the Federal Criminal Code. This bill was the result of an extraordinary legislative process begun in 1966, when Congress established the National Commission on the Reform of the Federal Criminal Laws. I introduced amendments and played an active role in two important areas of reform.

Having testified before the House and Senate Judiciary Committees, I was particularly pleased that the Senate adopted significant revisions of the current law in the areas about which I have expressed concern for years: sentencing reform and marihuana decriminalization.

REFORM ON PENALTIES REGARDING MARIHUANA

Cosponsored by myself, Senators CRANSTON, BROOKE, and NELSON and endorsed by the Carter administration, the marihuana reform bill would reconcile Federal law with the reality of Federal policy that such cases are no longer prosecuted. It would stand for the proposition that laws on this subject should no longer define millions of otherwise law-abiding citizens as criminals.

SENATE ETHICS STATUTE

As a principal cosponsor of S. 555, which was finally enacted into law in 1978, I am pleased to report that it will have a direct and significant impact on Government integrity and accountability. It provides for meaningful public financial disclosure by top Government decisionmakers in all three branches of the Federal Government and for a strengthened mechanism for investigation and prosecution of official corruption.

SUNSET

Sunset legislation has the potential of significantly improving the Federal Government's performance. My purpose has been to assure that the final version of sunset legislation will achieve the goals intended without producing unanticipated difficulties. The present version of sunset meets this purpose, and is awaiting final Senate action.

EXPLOSIVES TAGGING

As part of comprehensive antiterrorism legislation introduced by Senator RIBICOFF and myself, I have proposed a broad program to deal with the increasingly serious problem of criminal and terrorist misuse of explosives.

NATURAL RESOURCES AND RECREATION

I cosponsored the Urban Recreation and Recovery Act for 1978. All people, including those living in cities, desire conveniently located recreation areas. The Senate approved legislation I copsonsored that would aid in the funding and establishment of parks that are close to where the majority of the people live.

NEW YORK STATE

FEDERAL GRANTS

I took a leading role in obtaining urban development action grant funds for New York State. When the rate of UDAG contracts was slowed to a crawl at the Department of Housing and Urban Development because of inadequate staffing, I telephoned HUD Secretary Patricia Harris to urge immediate action on New York State contracts and the elimination of the UDAG backlog. Secretary Harris responded quickly to my request and the UDAG money began to flow from HUD.

AIR SERVICE

The cut back of air service to upstate New York has also caused me deep concern and I have worked with community leaders, the airlines, the Civil Aeronautics Board and the Federal Aviation Administration to find ways to provide adequate air service so necessary to the economic health of upstate New York.

HOUSING

Adequate housing continues to be one of my major concerns. When the Department of Housing and Urban Development allocated only 120 section 8 rental subsidy units for use by the Farmers Home Administration in rural New York, I was successful in obtaining an additional 100 units from HUD, along with a promise from Secretary Harris to provide a satisfactory level of assistance in fiscal year 1979.

ECONOMIC DEVELOPMENT

Federal assistance for economic development is essential in New York State,

both to retain present industry and attract new employers. I have worked closely and successfully in this area with a number of organizations, especially the Erie County Industrial Development Agency, the Technical Assistance Center at the State University in Plattsburgh, the Black River-St. Lawrence Development District, and the Mohawk Valley Economic Development District.

When funds allocated for trade adjustment assistance from the Economic Development Administration (EDA) ran out midway through the fiscal year, I persuaded EDA to transfer money from another category to keep the extremely important trade adjustment loans coming. These loans are made to firms which have been adversely affected by unfair foreign competition and have been vital in saving many New York State businesses and thousands of jobs.

URBAN POLICY

Earlier this year I introduced legislation to establish an Urban Service Corps in the Action Agency. This proposal was designed to encourage urban residents, particularly older and younger individuals together, to take part in volunteer efforts to halt and reverse the decline of social services and the deterioration of their own neighborhoods.

I was encouraged by the great successes of the Citizens Committee for New York, which I had caused to come into being, and which had inspired thousands of New Yorkers to volunteer to help maintain the quality of life in their city. I have continued to maintain that an active spirit of citizen voluntarism exists in our cities and that people are ready to step forward and do what they can.

I am pleased that my proposal was approved unanimously by the Human Resources Committee, and has been included in the Domestic Volunteer Service Act Amendments of 1978 which was approved by the Senate on July 21.

NATIONAL BANK FOR CAPITAL CONSERVATION

Along with Senator GEORGE MCGOVERN, I recently introduced a proposal to establish a new, special purpose Federal lending facility—a National Bank for Capital Conservation—to extend loans to cities to assist them in the preservation of their necessary physical resources.

FEDERAL FUNDS FOR NEW YORK

I have vigorously pursued those actions necessary to increase the Federal Government's responsiveness to tax burdens facing New Yorkers and all Americans, as well as to promoting effective and efficient use of Federal funds.

During 1978, the Congress developed the Federal budget for fiscal year 1979. I am pleased to note that this budget reduces the proposed Federal deficit in fiscal 1979 by approximately $45 billion below the President's original request. This accomplishment is further enhanced by the fact that this same budget allows for more than adequate funding for necessary and important Federal activities. This is particularly true for Federal funding that meets directly the needs of New York citizens.

NEW YORK CITY CONCERNS

New York City's financial plight has been at the forefront of my concerns this year. I believe that my efforts were pivotal in persuading Congress that the city must have long-term financing if it was to put itself on a solid footing and to avoid thereafter a need for returning to the Federal Government. The New York City Loan Guarantee Act of 1978 authorized up to $1.65 billion in Federal loan guarantees for New York City. It was a key element in securing support for State and pension fund authorities, as well as city financial institutions in order to complete the $4.5 billion financial package which the city will need for the next 4 years. With the passage of this bill, the city now has the opportunity to attain financial viability and to be again the great national and world metropolis which is its true character and role. The regeneration of New York City has been and will continue to be my high priority.

NEW YORK CITY HOUSING

Battery Park City will be a new town—in town and will offer balanced residential and commercial community which will stem the exodus of businesses from lower Manhattan. It will provide an attractive place to live within walking distance of the 450,000 jobs in lower Manhattan.

I contacted Secretary of HUD Patricia Harris and urged her to authorize a Federal Housing Administration mortgage insurance commitment for the first 1,642 housing units of Battery Park City. This authorization was obtained, and in September, Battery Park City was the subject of favorable action by the New York City Board of Estimate, enabling construction to begin in October.

Renovation of New York City's aged housing stock is of prime importance to the maintenance of the city's overall vitality. I urged the Department of Housing and Urban Development to approve New York City's application for housing rehabilitation funds under the neighborhood strategy areas program. Ten neighborhoods were designated eligible for this assistance.

NEW YORK CITY CRIME

Crime remains one of New York City's greatest problems. I was pleased to be instrumental in obtaining $4,076,701 in funding from the Law Enforcement Assistance Administration for 18 community anticrime programs located in every borough of New York City.

NEW YORK CITY HANDICAPPED

I have a deep commitment to the disabled. In New York City 275,000 handicapped people live below the poverty level. At my urging the Legal Services Corporation awarded $270,616 to the Handicapped Persons Legal Support Unit of Community Action for Legal Services, to establish a special staff, in accessible premises, to provide legal services to this heretofore underserved group.

CASEWORK

Helping people with their problems in order to make their lives a little easier has always been for me one of the great satisfactions of public service. I therefore take pride in the fact that my offices assisted more than 15,000 citizens with the problems they were having in their dealings with Federal agencies.

[*In percent*]

HEW, social security, medicare and medicaid, State social services	40
Visa and immigration	22
Military and veterans	21
Miscellaneous, post office, civil service SBA, etc	17

This year I intend to have an outreach program so that each one of my constituents will be aware that these services are available in all my offices.

CONCLUSION

The 95th Congress accomplished much, but much remains to be done. Complex problems do not lend themselves to easy solution, as the energy legislation, tax reform, environmental issues, and myriad welfare legislation readily attest. But there have been substantial accomplishments: the approval of New York City loan guarantees and the Panama Canal treaties; and the extension of the deadline for the equal rights amendments and others.

The 96th Congress will face many of the same issues. Our paramount concern will be to insure that the purchasing power of each American's take-home pay is not eroded by inflation. We will address this concern on a variety of fronts.

The next Congress will have to balance the priorities of demand for Government services against the necessity to reduce the cost of Government. While our economy demands increased amounts of available capital with which to increase productivity, important Government programs also require funding. The 96th Congress will be facing these hard decisions.

New York, America's Empire State for so many aspects of our culture and development, remains my primary concern. With your help, I will continue to seek more effective ways to serve you.

I thank my colleague.

FULL EMPLOYMENT AND BALANCED GROWTH ACT OF 1978

The Senate continued with the consideration of H.R. 50.

The PRESIDING OFFICER. The Chair recognizes the Senator from Minnesota.

Mrs. HUMPHREY. Mr. President, I have a letter from a number of distinguished economists on the subject of inflation and the effect of the Humphrey-Hawkins bill. I would like to read a paragraph from that letter:

> The Senate Banking Committee added a provision which sets the goal 0 percent inflation by 1983. Others have proposed a goal of 3 percent inflation by 1983. We are convinced that such specific numerical inflation goals with these deadlines would be illusory and ineffective weapons against inflation and would actually tend to be counter-productive.
>
> We submit that empirical evidence in the modern American economy and the current condition of the economy make it clear that the goal of 0 is impractical and unattainable.

The names on this letter are Gardner Ackley, who is a former chairman of the Presidents' Council of Economic Advisers; Robert Eisner; Walter Heller, also a former chairman of the Presi-

dent's Council of Economic Advisers; Leon Keyserling, a former chairman of the President's Council of Economic Advisers; Charles Killingsworth; Lawrence Klein; Robert Nathan; Arthur M. Okun; James Tobin; and Lester C. Thurow.

Mr. President, I ask unanimous consent that the letter in its entirety be printed in the RECORD.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

SEPTEMBER 18, 1978.

We are very much interested in the contents of S. 50, the Humphrey-Hawkins "Full Employment and Balanced Growth Act of 1978". This legislation would establish a process of economic policy coordination, goals for the reduction of unemployment, a new process and tools to combat inflation, and a framework for a focused and flexible attack on joblessness. We are especially concerned about the provisions related to overcoming inflation, and want to share our views about these issues.

Humphrey-Hawkins includes major anti-inflation provisions far stronger than current law or policy. It declares the purpose of attaining price stability as rapidly as feasible. More specifically, the bill requires that the President set forth each year, in his Economic Reports, annual numerical goals for prices for that year and for the next year. In addition, the bill provides an annual process for the appropriate Committees of the Congress and the Congress as a whole to review the numerical goals and timetables set by the President and modify them. The bill also sets forth a number of specific policies to be initiated by the President to combat inflation.

The Senate Banking Committee added a provision which sets the goal at 0% inflation by 1983. Others have proposed a goal of 3% inflation by 1983. We are convinced that such specific numerical inflation goals with these deadlines would be illusory and ineffective weapons against inflation and would actually tend to be counter-productive.

We submit that empirical evidence in the modern American economy and the current condition of the economy make it clear that the goal of 0 is impractical and unattainable. An empty promise on so vital an issue would impair the credibility of government. Significantly, the bill does not set the goal of zero unemployment; it sets the goal of 4 percent unemployment overall and 3 percent for adults within 5 years, which we believe to be obtainable. Apart from the unreality of this goal, many economists believe that a moderately rising price level over the years is more conducive to optimum economic performance, constructive price-making by our system of business enterprise, collective bargaining and wise adjustment of price trends to changing conditions both in the United States and overseas, than an absolutely stable price level.

Even if an absolutely stable price level maintained over the years had some elements of advantage, its attainment would require a degree of Government intervention in the market economy antithetical to the felt and expressed views of industry and labor, the American people and their government. It would require destructive attempts to substitute through universal and massive direct controls a straight-jacketed economy, in lieu of the preservation of the market economy to which we attach high value.

We believe the proposed inflation goal of 3% by 1983 is undesirable on substantially similar grounds. This proposal has been already rejected by the House and is strongly opposed by the Carter Administration, Chairman of the Council of Economic Advisers, Charles Schultze, Inflation Advisor Robert Strauss, as well as the National Association of Manufacturers, the AFL–CIO and a broad group of other organizations.

A specific inflation goal with a specific timetable could set up in the public mind a trade-off between efforts to combat inflation and reduce joblessness. It could provide an excuse to suspend efforts to reach full employment, even the causes of inflation have little or nothing to do with employment policies. A specific inflation goal with the 1983 timetable would encourage policies based on the simplistic and fallacious concept of a direct trade-off between inflation and unemployment. High unemployment and lost productivity contribute to inflation. We also know that a targeted attack on structural unemployment—a central feature of Humphrey-Hawkins—poses few risks of inflation by itself.

Combatting inflation will require sensible monetary and fiscal policies, specific actions to stem cost and price pressures in many sectors of the economy, and at least some good luck. The job will not be enhanced by establishing unrealistic and inflexible inflation goals and timetables. A far better course is the process of policy coordination, and annual inflation targets already contained in this legislation.

A similar goal for reducing to 20% by 1983 the ratio of federal outlays to Gross National Product has been included by the Banking Committee. For many of the same reasons, we urge the Senate to reject this specific proposal. Such a provision may deny the federal government the tools necessary to combat recession and may undermine the process established by the Congressional Budget Act of 1974.

The addition of these specific numerical goals and timetables to the Humphrey-Hawkins Bill may have some superficial political appeal. However, these proposals do not make economic sense. By their specificity, their unreality, and their inflexibility, they will make the development of rational and effective economic policies more difficult.

Sincerely,

Gardner Ackley, Henry Carter Adams University Professor of Political Economics, University of Michigan; Former Chairman, President's Council of Economic Advisers (1964–1968); Former Member, President's Council of Economic Advisers (1962–1964).

Robert Eisner, William R. Kennan Professor of Economics, Northwestern University.

Walter W. Heller, Regents Professor of Economics, University of Minnesota; Former Chairman, President's Council of Economic Advisers (1961–1964); Past President, American Economic Association (1974).

Robert Nathan, President, Robert Nathan and Associates; Chairman, Planning Committee, War Production Board (1942–1943).

Arthur M. Okun, Senior Fellow, Brookings Institution; Former Chairman, President's Council of Economic Advisers (1964–1969).

Leon Keyserling, President, Conference on Economic Progress; Former Chairman, President's Council of Economic Advisers (1949–1953); Former Member, President's Council of Economic Advisers (1946–1949).

Charles Killingsworth, University Professor, Michigan State University; Chairman, National Council on Manpower Policy.

Lawrence Klein, Benjamin Franklin Professor, University of Pennsylvania; Past President, American Economic Association (1975).

James Tobin, Professor of Economics, Yale University; Former Member, President's Council of Economic Advisers (1961–1962); Past President, American Economic Association (1971).

Lester C. Thurow, Professor of Economics and Management, Massachusetts Institute of Technology.

Mrs. HUMPHREY. Mr. President, I yield to the Senator from Maine.

Mr. MUSKIE. Mr. President, I am proud to join Senator HUMPHREY in sponsoring this amendment. We have had long years of association together in joint ventures, one of which, in 1968, I shall never forget; and I shall never forget the economic numbers that the economy was favored with in that year.

The unemployment rate was around 3.5 percent, and the inflation rate was about 4.5 percent; and we faced criticism wherever we campaigned that that was not good enough. I suspect all of us would glady exchange today's numbers for those numbers of 1968. But in any case, that is a bit of nostalgia, and I think our fellow Senator is right. That is what prompted me to join her in this amendment.

As I understand the pending bill, it will mandate that we achieve 3 percent unemployment by 1983 and 0 percent inflation by 1988. No one in this Chamber would disagree with those as objectives and goals. Moreover, we wish we could enjoy either one of them, as of last week, or last year, or 5 years ago.

But the question of achieving that rate of inflation and setting it as a goal are two separate things. Senator HUMPHREY'S amendment reads in part as follows:

Reduction the rate of inflation, as set forth pursuant to section 3(e) of this Act, to not more than 3 per centum at the earliest possible time: *Provided*, That this objective shall in no way qualify or alter the goals and timetables for the reduction of unemployment or the goal of full employment and shall be pursued in a manner that reinforces rather than conflicts with those goals and timetables. For purposes of this subsection, the first Economic Report shall be the Report issued in the first calendar year after enactment of the Full Employment and Balanced Growth Act of 1978.

Upon achievement of the 3 and 4 per centum goals specified in subsection (b)(1), each succeeding Economic Report shall have the goal of achieving as soon as practicable and maintaining thereafter full employment and a balanced budget.

Upon achievement of the 3 per centum goal specified in subsection (b)(2), each succeeding Economic Report shall have the goal of further reducing the rate of inflation: *Provided*, That this objective shall in no way qualify or alter the goals and timetables for the reduction of unemployment or the goal of full employment and shall be pursued in a manner that reinforces rather than conflicts with those goals and timetables."

Mr. President, I think the debate we had earlier on the Proxmire amendment, which undertook to establish the Government's outlay share of the gross national product, highlights the difficulty of achieving particular inflation goals in particular years. It was repeated over and over again in support of the Proxmire amendment that all he was shooting for was something that the Senate Budget Committee had already established as a goal in the Budget Committee's report on the Second Concurrent Budget Resolution, and that was true: that for 1983, we had established the goal of an outlay GNP share of 19.9 percent.

If that is a valid target for 1983, what did that projection show for potential unemployment in that year? It showed unemployment at 4.5 percent, following the underlying economic plan of the

budget resolution—4.5 percent in 1983, not the 4 percent that we are talking about in Humphrey-Hawkins for 1981, but 4.5 percent in 1983.

What did those projections say about inflation? Inflation—that is, the rate of change of the Consumer Price Index—in 1983 would be 5.9 percent. Not 0 percent, not 3 percent, but 5.9 percent.

Those three figures, Mr. President, have indentified the difficulties of achieving the maximum with respect to unemployment, inflation, and the government share of the GNP in accordance with pre-established goals.

The Proxmire amendment was argued in terms of the outlay share of the GNP, and this report was cited as authority for the reasonableness of that goal. Yet here we are, faced with a target in the bill of 3 percent unemployment in 1983, when this same report, following the moderate economic plan which established 19.9 percent goal for the outlay share of GNP, tells us that 5.9 percent inflation is the best we can expect to achieve in 1983.

With those kinds of interrelationships, Mr. President, what sense does it make for us, in 1978, to say that at one and the same time, in one and the same year, we are going to get 19.9 percent outlay GNP, we are going to get 4 percent unemployment or better, and we are going to get 3 percent inflation or better, when sensible economic projections tell us that is not possible?

To me, this demonstrates the difficulty and the irrationality of trying at this point to tie dates, unemployment rates, and inflation rates.

The Humphrey-Muskie amendment establishes 3 percent as a desirable goal at the earliest possible date, and we all prayerfully hope for it; we all certainly will prayerfully work for it. Why can we not do it more simply than that? Well, because not all the factors influencing the inflation rate are under our control or even under the Government's control. Budget deficits are an influence, depending upon the state of the economy. We are achieving that point in the expansion when continued Government deficits are a definite threat of inflation.

So we do have the obligation of undertaking to control budget deficits. I think the record this year demonstrates that we have done remarkably well considering the pessimism with which many of us approached that challenge. We must do better. The Budget Committee is committed to doing better. But to try to pick the year and the date at one and the same time to meet all three of these goals is unrealistic in the extreme.

Mr. President, it is particularly difficult to set and achieve inflation goals because inflation is affected by many factors over which we have no control.

OPEC is one example. What will OPEC do with prices? We know they quadrupled energy prices 4 years ago. We know they have considered raising prices still more in the intervening period. We know that the declining value of the dollar is undoubtedly an incentive for them either to base their prices on other currencies than the dollar or to raise their prices. So OPEC action on oil prices is a key factor in the inflation outlook that we cannot predict or control.

Farm prices are another example. We have learned over the last 4 or 5 years the effect that farm prices have on the rate of inflation.

Weather, both here and in other parts of the globe, affects crops which in turn have a major impact on inflation. Yet, weather is another factor over which we have no control.

To pretend to the American people that we can pass a law today that will achieve 3 percent inflation by 1983 and zero percent inflation by 1988 is to hold out expectations that we have no basis for believing. Maybe for dreaming, but not for believing that we can achieve these rates by that date.

The committee projections that I have already discussed indicate that inflation will slow to a rate below 6 percent, but the best that we can expect by 1983 is 5.9 percent. That is not the goal we would like to achieve. It may not be a sufficiently ambitious goal. But it is a realistic goal.

Right now, no one knows—no one knows—how we could reach a 3-percent goal without, of course, having a deep and long depression. A good goal for the present is to get inflation below 6 percent and to keep it below 6 percent as we move toward our unemployment goal.

I have often been asked, because I am chairman of the Budget Committee and I am supposed to have all the answers, "Senator, why can we not do better than 6 percent?"

Well, the economists tell me, and I have to depend upon economists—theoretically, I am a lawyer, but I have forgotten how to be a good lawyer again, and I am not sure that I am even a good Senator——

Mr. SARBANES. If the Senator will yield, I will not speak of him as a lawyer, althought I have no doubt he is first-rate in that area but clearly the Senator is extraordinarily able as a U.S. Senator.

Mr. MUSKIE. I thank the Senator.

What I have heard from the economists about inflation is this, that for the last 2 or 3 years at least we have had what they refer to as underlying inflation. That underlying inflation comes from the inclination of people, all people, to recover the income they lost to last year's inflation. Everybody wants to do that, whether he or she is a social security beneficiary, a Senator trying to live on a Senator's salary in high-cost Washington, or lower middle income people back home in my State working in the textile mills and shoe factories. Everybody would like to recover the loss attributable to last year's inflation. In many cases they are able to recover that loss because their income is indexed. Social security benefits are indexed; other Government programs are indexed. But even with respect to programs that are not indexed, people still, in labor-management contracts or in the prices they set for their goods, try to recover last year's loss of income attributable to erosion.

The net effect of all of that effort, which is almost universal, is a guarantee, almost a guarantee, of 6 to 6.5 percent inflation even if we have ample crops, even if OPEC does not increase energy prices, even if there is not some sudden surge of price increases due to some unanticipated event. We have been getting 6 to 6.5 percent inflation that nobody, no economist who has come before our committee, has an answer to.

If we tell people that their attempt to recover last year's loss attributable to inflation in itself contributes to inflation, they are aghast. "How can it possibly be inflationary for me to recover what I lost to inflation last year?" Yet the fact is if all of us recovered what we lost to inflation last year, this year's inflation would be running at a minimum of 6 to 6.5 percent. That is what we call underlying inflation, and it is a serious problem.

Then when you have special circumstances coming in, like food prices this year, then inflation begins to jump above the underlying inflation. We are up to 6, 7, 8, and there are those who say we are close to double-digit inflation again because of unexpected events which have triggered higher inflationary pressures.

Well, with that kind of a situation, we have an enormous problem. It may well be that the President, as he develops wage-price guidelines, will find a way to get each of us in on the fight against inflation. It may be that we may have to get wage and price controls.

I was a price administrator in the Korean war for 1½ years; controls worked for a short time. But inevitably after controls end there is another surge of inflation. We may need that kind of a shock. I am not advocating it. But to get to 3 percent inflation by 1983, and putting that as a national goal against which we must balance these others, could well be counterproductive, as I see it.

So I think it is much wiser to adopt the Humphrey formulation in which we definitely set 3 percent or better inflation as a national goal and not pick the exact date, but try to pick the earliest date possible. That gives us flexibility in our budget process. It gives us flexibility in the Senate when we want to influence monetary policy, or whatever, to get an earlier result. We can do that. But to try to put these kinds of figures into these kinds of specific dates I think is really to raise expectation beyond what is realistic.

The difference between myself and my good friend from Wisconsin really seems to be a matter of means rather than objectives. I never challenge his motivation on means. I know he has his own reasons for his position.

I guess it is about time I yielded so he could give us his reasons.

Mr. PROXMIRE. I thank my good friend from Maine.

Mr. President, I yield myself such time as I may require. I shall not take very long in this.

Mr. President, this amendment, instead of providing that we shall reach a 3 percent inflation goal by 1983, says we shall reach the 3 percent inflation goal at the earliest possible time.

Meaning when? It means not in 1983. Does it mean 1993, the year 2000, 100

years from now? It does not mean anything. It is like saying I intend to take off 10 pounds, but when? I am going to stop smoking, but I am not going to tell you when I am going to do it.

If you have a goal without a timetable, it has absolutely no meaning whatsoever; it is just like rhetoric. You might as well say we are going to try to hold down prices, but we will not tell you how much.

To show the effect of this amendment, I challenge the supporters of this bill to apply the same language to what the Senator from Maine suggested—unemployment. Let us make the unemployment goal 4 percent but not set the date. Can you imagine the reaction of labor and the coalition to that? They would be outraged. They would think it was the worst betrayal they ever heard of. And they would be right, because it would not mean anything. A 4-percent goal sometime out in the distant future, whenever we get around to it, would be something that they cannot possibly support.

Mr. HATCH. Will the Senator yield on that point?

Mr. PROXMIRE. I shall in just a minute.

What is wrong with a 3-percent goal by 1983? The Senator from Maine has made a very strong case that economists say you cannot achieve it. I think those economists simply have not looked at the figures. The fact is that in every year from 1959 to 1967, we were below 3 percent inflation. Were those years of recession? They were the years of the longest continuing expansion and growth this economy has ever had—ever had. Continuous.

What was unemployment during that period? It declined consistently.

Was it below 4 percent? You bet it was.

In 1964, it was 3.8 percent. In 1965, 3.6 percent. In 1966, it was 3.5 percent.

So here we had growth, which we want to achieve, we had inflation below 3 percent, we had unemployment below 4 percent. What we are asking is simply to be able to work toward that historical record we have already achieved.

Mr. President, this is an issue which is overwhelmingly supported by the American people. Every poll—every poll, whether it is Gallup, Harris, your own questionnaire—indicates that the majority of the people feel the most important question facing this country today is not unemployment, which has been improving, but inflation. People are deeply worried about inflation. The latest poll says the majority of the American people feel that is the most important. George Meany, 3 weeks ago, said inflation was the most important economic problem facing this country today.

Mr. President, if we adopt this amendment, will it hurt our progress toward achieving the unemployment goal? I have worked this out and I have talked to Leon Keyserling, who is the author of the Employment Act of 1946. He agrees that the tradeoff is taken care of here.

We provide that policies and programs for reducing the rate in inflation share be designed so as not to impede achievement of the goals and timetables for the reduction of unemployment. The goal of full employment shall be pursued in a manner that reinforces rather than conflicts with those goals.

Mr. President, we have provided here that the priorities shall be for unemployment to be reduced first. That is what we provide in the bill. But we also provide that there shall be a numerical goal that the President of the United States has to meet when he recommends policies to the Congress, that Congress has to meet when we adopt policies to reduce unemployment.

Mr. President, for all that has been said about how we are doing well, this is one area where we are doing very poorly indeed. We have reduced unemployment somewhat. We have had a reasonable growth in this country in the last few years. But inflation is a raging, serious problem. What we have done so far has not begun to meet the seriousness of the inflation that we suffer. We obviously need to adopt policies that will do so.

Mr. President, the Senator from Utah wanted me to yield.

Mr. HATCH. Yes, I did.

Mr. PROXMIRE. Does he want me to yield time or yield for a question?

Mr. HATCH. Perhaps the Senator will yield some time, and I shall take some time on this and make some points to follow up on his statement.

Mr. PROXMIRE. I yield 5 minutes.

Mr. HATCH. I am very grateful to the distinguished Senator from Wisconsin.

Mr. President, I am very concerned with this amendment, because literally, this amendment, if it is voted up, takes away one of the most important aspects of the work that has been done for the last 3½ days—I might add work that I have put an awful lot of time and sweat and pain into.

If we stop and think about it, if it is only right to do away with the timetables on inflation which put some balance into this bill, then why do we not do away with the timetables on unemployment and those goals? Why do we not be fair both ways? Because everybody knows that that is what this bill is involved with.

There are some of us who want the bill to work, but work realistically. I, for one, want there to be a vote on this bill. There are too many people who deserve to have a vote, who are anguished over this bill, and who feel that it will do them some good—and it may, especially if we keep the spirit of what we have been working on the last few days.

I do not see how we can with this amendment. I am not sure that I can see how we can if we do not keep this provision in this bill.

The vote on the other amendment has taken away the limitation cn Federal spending as a percentage of gross national product. I am willing to abide by the will of the Senate with regard to that, even though I am tremendously disappointed that that has been taken away because I think it is a very realistic and fine amendment and approach to this bill.

Last evening, I talked with almost every important person who wants this bill and some today, and not one said they could not live with this provision in this leadership amendment. In fact, they all said they could live with that. They all complained to me about the limitation on spending as a percentage of gross national product because they felt if that were allowed in this bill, that would be used against certain programs they would like to have next year or the year after, or sometime in the future.

But not one said they could not live with this provision as it is stated in toto in the leadership amendment which has, as I said before, taken an awful lot of sweat and pain and work by the people to whom I pay tribute, those who did sweat and pain and work on this. What little I can contribute, I did my best to contribute.

If we are going to just treat cavalierly the concept that we should have inflation goals in this bill, which has been a bottom-line approach to this whole debate, to this whole consideration of having a time limit on this agreement, then I think it is wrong. I think we ought to well think it through.

I do not want to take any more time. I am just terribly disappointed with this amendment under the circumstances. I ask my colleagues to honor the work that a number of us did in putting this amendment in this leadership amendment. That is all I can ask for. I hope that my colleagues on the floor will recognize what we have tried to do and that they will give us some credit for doing it by voting this amendment down and then retaining, thereby retaining, the language that has taken so much effort and so much compromise on the part of all of us to obtain.

The PRESIDING OFFICER (Mr. HODGES). The Senator's time has expired.

Mr. HATCH. I yield the Senator from Indiana 10 minutes.

Mr. LUGAR. I thank the distinguished Senator.

Mr. President, let me review for just a moment what some of us hope might come from this act and why we believe that it might be important.

I stress the word "might" because there are three elements that are very important as the President takes a look at our economy. They include jobs for every American who wants to work. They include Federal spending. They include inflation.

My colleagues will note we have knocked out the Federal spending limitation with what some of us believe are simply bland assurances. Although we have been specific on jobs, we can only hope for the best with regard to Federal spending.

As the distinguished Senator from Wisconsin has pointed out, of all the elements in the Humphrey-Hawkins bill, Federal spending is the one over which we do have control and it has been the one in which this Congress has not exercised the control that it should. We all bear responsibility for that and the American people want us to cut it out.

They want spending limited, and they are sending that message loud and clear.

Our colleague from New York (Mr. MOYNIHAN) pointed out so well this

morning when he said, "proposition 13 is a debate on how much of the wealth in this country ought to be utilized by Government as opposed to private individuals who are trying to make choices for themselves."

The public is voting for us as individuals, not for us as public servants to spend more.

Yes, even in this body today, we have said we know proposition 13 is out there somewhere, but we do not recognize it in a central act of economic planning which we are prescribing for the Nation, for the President, for ourselves. So be it. But we come now to the third element, and that is inflation.

The distinguished Senator from Maine has said it well. Economists are baffled about inflation. They are not certain how we can control it.

In fact, the distinguished Senator from Minnesota has listed the distinguished economists who are uncer'ain whether zero inflation is possible. Some would say 3 percent inflation might be very difficult.

But I would simply say to my colleagues that the gist of this bill must say clearly to working Americans that if we have jobs for all people, we had better make certain the wages they earn are worth something.

What a cruel hoax, to have a full-employment bill and to give the impression that somehow a job in an economy in which inflation runs at 10 percent annually, compounded forever, somehow is going to work out to economic success, stability, and happiness for those individuals. That is nonsense.

Some will say, and I would be among them, that the goal of 3 percent inflation may very well be impossible. It may very well be that not only would the permission given the President to alter the goal be necessary, it may almost be a fact of life as time goes on.

One redeeming feature of the American scene is the demographics, which means simply that young people coming into the economy in coming years will be fewer in number, and perhaps the whole situation will do well to solve itself, if we do not bungle it in Government.

It is conceivable that the private economy, without harassment by Government, might employ individuals and bring a lower standard of unemployment. But inflation is not going to cure itself that easily.

We have as a central focus in front of us today, whether we are serious, truly serious, in government about inflation.

It is so easy to say that rising expectations of inflation fuel inflation. It is easy to say the OPEC nations must have been responsible, that bankers do not know what to do, that someone seeing 10-percent inflation will ask for an 11-percent raise. All these things are true and are totally to the mark on what we are trying to take a look at here, and also to anything that can be done by the Federal Government to contribute to the demise of inflation.

What we are saying is, "Not very much," as a matter of fact. But we are saying that we anticipate it is going to be the same old stuff. It is going on and on. Therefore, rather than clutter up a bill on economic planning with inflation, let us have a pious sentiment that full employment ought to come about in the country and hope that will happen. This bill suggests that we do not even make certain that happens in a particular year, because we admit that if we cannot control our own spending, and cannot attack inflation, it is very unlikely we shall do much about employment, either.

Either this bill means something, or it is a hoax, and I would say we are coming down to the bottom line on this amendment.

If this body is unable or unwilling to set a goal on inflation that is equally as rigorous as on jobs, in my judgment, this bill will not make a whole lot of difference to anybody, and that is a sad comment.

It has been made already by many Americans, a shell of a bill, a hoax.

Some of us have tried to turn it into a bill that means something, and it could mean something if we said that 3-percent inflation by 1983 and zero by 1988 shall be our goal, in the same way we say zero unemployment shall be our goal by 1983 with 3 percent in frictional unemployment.

That is a parallel course.

Both may be unattainable, but both are dreams worth pursuing.

I trust the chairman of the Budget Committee, the distinguished Senator from Maine, because he does have, with the distinguished Senator from Oklahoma, a track record of 4 years of maybe doing better than the guideline earlier in this draft on spending.

Maybe we must rely upon that track record, which is a strong one. But the track record on inflation——

Mr. MUSKIE. Will the Senator yield?

Mr. LUGAR. I am happy to.

Mr. MUSKIE. It is a little ironic my track record is held up as a promise for the future, yet my own evaluation of that track record is not accepted as worth very much.

I just have not found it possible, and the committee report to which I referred indicated it is not possible, to set a specific date for all these goals that ought to be achieved at one and the same time. It just is not possible.

I can juggle one ball in the air, and maybe if I am rested I can juggle two, but when you give me three, they all fall to the ground.

I guess, in a sense, I prefer to rest on the budget process to achieve what we need to achieve. We all know that we need to get down to 4 percent or 4½ percent unemployment, or better, if we can. We need to get down to 3 percent or better inflation. We need to get Government spending down to 20 percent, or even 19 percent. We all know that.

I think, frankly, that together, and it had to be together, we have made remarkable progress, especially this year. I was disappointed before this year, somewhat. But we have made remarkable progress.

If we are to set some goals, I would like, to the extent possible, to make it sufficiently realistic so that we do not raise expectations beyond what we, ourselves, believe can be achieved.

I am not sure how far apart the Senator and I are; but with respect to the difficulty of achieving all this, I think he and I are probably looking at the same goals.

I just wanted to make those observations. I am not an ideologue in this whole field at all.

I am sorry if I have used up too much of the Senator's time.

Mr. LUGAR. Mr. President, will the Senator yield me 3 minutes?

Mr. PROXMIRE. I yield 3 minutes to the Senator.

Mr. LUGAR. Mr. President, I appreciate the comments of the distinguished Senator from Maine. I suspect that we are not all that far apart in our analysis.

However, the difficulty with this bill is that it mandates that we set goals. Maybe it is difficult to do so in one area; maybe more difficult and compounded by trying to do two or three at the same time. I do not deny that.

We have knocked out at least one category, so we are left with two.

I suggest that while we are setting goals and national ideals—and I tried to insist upon this in the debate we have had among some colleagues this week—to set a goal of even 3-percent inflation as ideal would be unfortunate, in my judgment. It means we are consigning the people to a so-called rolling inflation, at a low level, but still there for the rest of our lifetime; that we feel we are resigned to the fact that that is the best we can do.

I think we have to aim for zero inflation for real value in buying power. It is a very difficult thing to do. I believe that, under some circumstances, 3-percent unemployment is going to be very difficult—and possibly impossible, too.

The idealism of this act is that we are committed formally to try beyond the normal dialog that each of us would have about our economic difficulties.

My support of this legislation is based upon the thought that, in several ways that are fundamental, we shall try. I appreciate the politics of the situation, external, and internal. Some who feel that this bill is an unemployment bill feel that the intrusion of the Federal spending item or of the inflation item is unwarranted; that if we want to deal with these matters, we should try another bill, at another time.

The virtue of this bill, it seems to me, is that we are determined to say that there are relationships between employment and inflation and spending; that a President must look at all three of those, and many more, and at the same time must make a decision in national planning by looking at them at the same time.

To look at them piecemeal—the budget one day, jobs another, inflation on another occasion—will not do. It may be that a President, using this bill, will still go piecemeal, and maybe Congress will go willynilly in many directions. But if there is virtue in this bill, it comes in the discipline of looking at these issues at the same time, having ideals for each of these categories, and having a parallel,

as I see it, of zero unemployment, plus the frictional factor as it may be, and the ideal of zero inflation down the pike, with all the qualifiers that the legislation gives us.

I appreciate the Senator yielding, and I yield the floor.

Mr. RIEGLE. Mr. President, will the Senator from Minnesota yield 5 minutes to me in support of the amendment?

Mrs. HUMPHREY. I yield to the Senator from Michigan.

Mr. RIEGLE. I thank the Senator for yielding.

Mr. President, I support the amendment of our distinguished colleague from Minnesota.

I think the goal of achieving a 4-percent unemployment rate in 5 years is a reasonable goal that we can achieve.

I think we have mapped out here the machinery we need to have to do it.

Much as I want to be able to see us achieve a minimum level of inflation—3 percent in 5 years, or even lower than that—I see that in a different category, in terms of our ability to control the variables that compose inflation.

As we well know, a lot of the inflation we have experienced in the last 5 years and are experiencing today has come from the OPEC monopoly pricing of oil. The cost of energy, the administered price increases we have been absorbing, not just for energy directly but also in transportation costs, fertilizer costs, and so forth, still are haunting us. We have found that those are costs and administered inflation that we have not been able to get hold of.

That is just one example. It is the largest, but there are many others we can look at, which indicate to us that a large part of the inflation problem is a worldwide problem which extends beyond our shores, and is not something we can control as readily as I think we can control the task of finding enough jobs for the people in this country.

The question of a 3-percent inflation goal in 5 years is one thing. I hope we can get there. Perhaps we can get there sooner. I would be happy if we could get their sooner.

I do question the practicality of the next step, endeavoring to go to a zero percent level in steps beyond that, in inflation—not the desirability of it, but whether or not, in practical terms, it is something we realistically can hope to accomplish.

It should be noted that those of us who have argued for a target for unemployment have at no time suggested a zero unemployment level. That is not practically achievable, not just because of people in transition, but because you never will be able to have a perfect answer, hard as we might strive to get there.

We have tried to aim for realistic targets over realistic timeframes. To talk about a zero level at a fixed point in time whether for inflation or unemployment is not realistic and probably is misleading to people, in suggesting that it is something that can be done.

It is important to note that in this bill we have some very important and strong anti-inflation provisions, far stronger than we have in current law or earlier.

First, we require the President to set annual numerical goals for prices in his economic report for that year and the following year.

Second, we devote a full section of this bill, section 109, to spelling out anti-inflation measures. This section sets forth a number of specific policies to combat inflation that can be initiated by the President.

I believe that one additional point is important to stress, and it is this: I hope that by putting in a fixed inflation target at a fixed point in time, the sponsors of that approach are not implicitly saying that they are willing to accept whatever it takes to get that job done. I hope, for example, they are not saying that price and wage controls or a full-blown managed economy, in terms of Federal intervention—if that is what it would take to achieve that goal—is something they would agree to, even as a last resort. I would question whether they intend that, and I would have reservations about that.

I do not want to see massive governmental intervention in this area, and I think it can be avoided.

If we lock ourselves in, ahead of time, to a fixed result at a fixed time, on something that is only partially within our control and within our own borders, we face the prospect of having to apply medicine we are not prepared to take.

For these reasons, among others, I support the amendment sponsored by the Senator from Minnesota and the Senator from Maine.

Before yielding, I want to acknowledge the tremendous leadership that Senator MURIEL HUMPHREY has given to this effort today and all the days leading up to today, to allow us to be at the point we are, coming down the home stretch on this vital legislation. I think she, more than any other person in the Chamber, has been the driving force in bringing this issue to a conclusion—and I hope to a successful conclusion. I applaud that leadership and acknowledge it at this time.

The PRESIDING OFFICER. Who yields time?

Mr. PROXMIRE. Mr. President, I yield 5 minutes to the distinguished majority leader.

The PRESIDING OFFICER. The Senator from West Virginia.

Mr. PROXMIRE. Mr. President, I am managing the bill and I am opposing the amendment, so I ask unanimous consent that the time may come out of the bill, not out of the time on the amendment.

Mr. SARBANES. Mr. President, Mrs. HUMPHREY asked me to manage the time for her on the amendment. I yield 5 minutes of her time on the amendment to the Senator from West Virginia.

Mr. ROBERT C. BYRD Mr. President, I support the amendment of the distinguished Senator from Minnesota, Mrs. HUMPHREY, because I am concerned that the Humphrey-Hawkins bill as currently drafted may not adequately address the problem of inflation.

First, I am not at all convinced that the achievement of zero percent inflation by 1988 or 3 percent inflation by 1983 is realistic. Too many of the inflationary pressures in our society derive from worldwide economic forces over which we have little if any control over the short run.

Second, I question whether the achievement of zero percent inflation would be sound economically. Many economists maintain that an absolutely stable price level could prove to be counterproductive in that it may not allow for adjustment in prices to reflect changing economic conditions.

For these reasons, I believe that the amendment regarding inflation offered by Senator HUMPHREY should receive the support of the Senate. While it places the responsibility on the Congress and the administration of working to achieve a reduction in inflation, it also recognizes that economic conditions may affect the actual timetable. Accordingly, the amendment specifies a numerical target of 3 percent inflation to be achieved at the earliest date possible.

Mr. President, we should not lose sight that even without a numerical inflation target the Humphrey-Hawkins bill is tough on inflation. It does not call for lowering the rate of joblessness without regard to inflation. It establishes the commitment of the Federal Government to curtailing inflation and achieving full employment. Toward these ends, it establishes that the means to achieve low rates of unemployment and inflation should be mutually reenforcing.

Mr. President, I ask unanimous consent that a letter signed by some of our Nation's leading economists on the points I mentioned be printed in the RECORD at this point. They submit "that empirical evidence in the modern American economy and the current condition of the economy make it clear that the goal of zero is impractical and unattainable." I urge support of the Humphrey amendment.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

SEPTEMBER 18, 1978.

We are very much interested in the contents of S. 50, the Humphrey-Hawkins "Full Employment and Balanced Growth Act of 1978". This legislation would establish a process of economic policy coordination, goals for the reduction of unemployment, a new process and tools to combat inflation, and a framework for a focused and flexible attack on joblessness. We are especially concerned about the provisions related to overcoming inflation, and want to share our views about these issues.

Humphrey-Hawkins includes major anti-inflation provisions far stronger than current law or policy. It declares the purpose of attaining price stability as rapidly as feasible. More specifically, the bill requires that the President set forth each year, in his Economic Reports, annual numerical goals for prices for that year and for the next year. In addition, the bill provides an annual process for the appropriate Committees of the Congress and the Congress as a whole to review the numerical goals and timetables set by the President and modify them. The bill also sets forth a number of specific policies to be initiated by the President to combat inflation.

The Senate Banking Committee added a provision which sets the goal 0 percent inflation by 1983. Others have proposed a goal of 3 percent inflation by 1983. We are convinced that such specific numerical inflation goals with these deadlines would be illusory and ineffective weapons against inflation and would actually tend to be counterproductive.

We submit that impirical evidence in the modern American economy and the current condition of the economy make it clear that the goal of 0 is impractical and unattainable. An empty promise on so vital an issue would impair the credibility of government. Significantly, the bill does not set the goal of zero unemployment; it sets the goal of 4 percent unemployment overall and 3 percent for adults within 5 years, which we believe to be obtainable. Apart from the unreality of this goal, many economists believe that a moderately rising price level over the years is more conducive to optimum economic performance, constructive price-making by our system of business enterprise, collective bargaining and wise adjustment of price trends to changing conditionals both in the United States and overseas, than an absolutely stable price level.

Even if an absolutely stable price level maintained over the years had some elements of advantage, its attainment would require a degree of Government intervention in the market economy antithetical to the felt and expressed views of industry and labor, the American people and their government. It would require destructive attempts to substitute through universal and massive direct controls a strait-jacketed economy, in lieu of the preservation of the market economy to which we attach high value.

We believe the proposed inflation goal of 3 percent by 1983 is undesirable on substantially similar grounds. This proposal has been already rejected by the House and is strongly opposed by the Carter Administration, Chairman of the Council of Economic Advisers, Charles Schultze, Inflation Advisor Robert Strauss, as well as the National Association of Manufacturers, the AFL–CIO and a broad group of other organizations.

A specific inflation goal with a specific timetable could set up in the public mind a trade-off between efforts to combat inflation and reduce joblessness. It could provide an excuse to suspend efforts to reach full employment, even the causes of inflation have little or nothing to do with employment policies. A specific inflation goal with the 1983 timetable would encourage policies based on the simplistic and fallacious concept of a direct trade-off between inflation and unemployment. High unemployment and lost productivity contribute to inflation. We also know that a targeted attack on structural unemployment—a central feature of Humphrey-Hawkins—poses few risks of inflation by itself.

Combatting inflation will require sensible monetary and fiscal policies, specific actions to stem cost and price pressures in many sectors of the economy, and at least some good luck. The job will not be enhanced by establishing unrealistic and inflexible inflation goals and timetables. A far better course is the process of policy coordination, and annual inflation targets already contained in this legislation.

A similar goal for reducing to 20 percent by 1983 the ratio of federal outlays to Gross National Product has been included by the Banking Committee. For many of the same reasons, we urge the Senate to reject this specific proposal. Such a provision may deny the federal government the tools necessary to combat recession and may undermine the process established by the Congressional Budget Act of 1974.

The addition of these specific numerical goals and timetables to the Humphrey-Hawkins Bill may have some superficial political appeal. However, these proposals do not make economic sense. By their specificity, their unreality, and their inflexibility, they will make the development of rational and effective economic policies more difficult.

Sincerely,

Gardner Ackley, Henry Carter Adams University Professor of Political Economics, University of Michigan; Former Chairman, President's Council of Economic Advisers (1964–1968), Former Member, President's Council of Economic Advisers (1962–1964).

Robert Eisner, William R. Kennan Professor of Economics, Northwestern University.

James Tobin, Professor of Economics, Yale University; Former Member, President's Council of Economic Advisers (1961–1962), Past President, American Economic Association (1971).

Lester C. Thurow, Professor of Economics and Management, Massachusetts Institute of Technology.

Mr. PROXMIRE. Mr. President, the Senator from Kansas wanted time on this amendment.

How much time does the Senator from Kansas want?

Mr. DOLE. Ten minutes or so.

Mr. PROXMIRE. I yield 10 minutes to the Senator from Kansas.

The PRESIDING OFFICER. The Senator from Kansas is recognized.

Mr. DOLE. Mr. President, no doubt about it. This is the key amendment. What happens on this amendment may decide what happens with reference to the legislation before us.

Mr. President, I wonder if we may have order?

The PRESIDING OFFICER (Mr. McGOVERN). Will the Senate be in order so that the Senator from Kansas may be heard?

Mr. DOLE. It is not so much the Senator from Kansas wants to be heard.

I think this is a very important amendment for those who strongly support the Humphrey-Hawkins legislation and those who oppose it. I do not know of anyone who is against bringing down inflation. But we are being asked to adopt some language that does not mean anything.

For some reason, even though the polls show that 78 percent of the American people are concerned about inflation, we do not want to address the problem of inflation. I do not understand it. I do not believe anyone is really opposed to what we have in the bill. We spent a long time trying to work it out, and it would seem to me that we have the authority for the President to change the timetables—it is provided in the amendment; it is provided in the compromise. We recognize the difficulty of fixing stated goals, but if there are those who are not concerned about inflation, I would like to know who they are.

We are talking about realistic goals on unemployment. Some may not think they are realistic. I suggest that we have tried to be realistic in our efforts to at least address the problem of inflation.

It does not really matter how much time we spend trying to work it out. It would seem to me if we want the Humphrey-Hawkins bill to survive then we should at least consider what we have been working on the last 3 days.

Maybe it is possible to have it both ways. We had a choice, some of us who opposed parts of the original provision. We could have had it our way. No doubt about it. We could have had it our way.

But it was our feeling that we should try to work it out. We did not have to work it out. Time was on our side. And everyone knew that time was on our side. It also seemed to me that commonsense was on our side.

The Banking Committee adopted inflation goals. Someone suggested "We cannot make it zero." So the distinguished Senator from Indiana devised a formula, again a goal, to make it possible by 1988. That may not be realistic. So we provided a little escape valve. It is all right there in the amendment.

Maybe we should read the amendment before we rush to judgment. It says:

(b) The medium-term goals in the first three Economic Reports and, subject to the provisions of subsection (d), in each Economic Report thereafter shall include (as part of the five-year goals in each Economic Report) interim numerical goals for—

(1) reducing the rate of unemployment, as set forth pursuant to section 3(d) of this Act, to not more than 3 per centum among individuals aged twenty and over and 4 per centum among individuals aged sixteen and over within a period not extending beyond the fifth calendar year after the first such Economic Report; and

Now, is that unrealistic? I assume there are some who think it is unrealistic. So that is fine. Let us try to do it. That is the goal we should try to achieve. People are out of work.

Subparagraph 2(b)(2), reducing the rate of inflation:

(2) reducing the rate of inflation, as set forth pursuant to section 3(e) of this Act, to not more than 3 per centum within a period not extending beyond the fifth calendar year after the first such Economic Report: *Provided*, That policies and

The primary emphasis again is on unemployment. We all understand the emphasis of the Humphrey-Hawkins bill.

We also suggest that:

For purpose of this subsection, the first Economic Report shall be the Report issued in the first calendar year after enactment of the Full Employment And Balanced Growth Act of 1978.

But we go even further. We say:

(2) Upon achievement of the 3 per centum goal specified in subsection (b)(2),

That is the inflation goal:

each succeeding Economic Report shall have the goal of achieving by 1988 a rate of inflation of zero per centum: *Provided*, That policies and programs for reducing the rate of inflation shall be designed so as not to impede achievement of the goals and timetables specified in clause (1) of this subsection for the reduction of unemployment.

Again the emphasis is on reducing unemployment, which is really what the Humphrey-Hawkins bill is all about.

Then we go even further in subparagraph (d). We say:

In the second Economic Report after enactment of the Full Employment and Balanced Growth Act of 1978, the President shall review the numerical goals and timetables for the reduction of unemployment and inflation, and the goal of balancing the Federal budget; report to the Congress on the degree of progress being made, the programs and policies being used, and any obstacles to achieving such goals and timetables; and, if necessary, propose corrective economic measures toward achievement of such goals and timetables: *Provided*, That beginning with the second Report and in any subsequent Reports, if the President finds it necessary,

And this is the important part:

The President may recommend modification of the timetable or timetables for the achievement of the goals provided for in subsection (b) . . .

And again that addresses unemployment and inflation.

So it just seems to me—and then we go on and repeat it in the subparagraph (e):

Provided, That, if the President finds it necessary, the President may, under the authority provided in subsection (d),

And so on.

I think we have left all the loopholes we should have to leave.

I certainly, as I said this morning in the meeting of the Senate, have nothing but the highest regard for the distinguished Senator from Minnesota, and I had nothing but the highest regard for our late friend, Hubert Humphrey. I have heard Senator Humphrey stand on this floor and make speech after speech on the evils of inflation. What it was doing to the American people and those on fixed incomes, primarily the poor, because he was a champion of the poor and he understood what devastated the poor in this country was inflation.

It seems to me we do a disservice to everyone who supports this legislation. I cannot believe we have reached a point where we say we cannot change or cannot cross a "t" or dot an "i" because somebody might object, it may not fit somebody's pattern.

Well, I hope that we will have a chance, as I said earlier this morning, to rally behind this legislation. I hope there is going to be broad bipartisan support on passage, if we get to final passage, and I suggest we are going to get to final passage very quickly tonight if this amendment is defeated.

Certainly I would not construe that as any indication of lack of dedication on the part of the sponsor of the amendment. But it does seem to me we have our responsibility, and our responsibility is to address the problem today, next year, 1983, 1988. But I am not certain how many will be in this body who are here today. Maybe we are unrealistic. Maybe 3 or 4 percent unemployment is unrealistic. I am not certain that the American people are so concerned about all the charts and figures we throw out. They would like to see inflation stopped, and they would like to see some action by the Congress of the United States.

The Senator from Utah and the distinguished Senator from Indiana suggested that a lot of people who violently oppose this legislation, ought to read it again, because we are addressing balanced budgets and inflation and parity for farmers and other matters that I think make it a very balanced piece of legislation. One we can stand up as Republicans and say very loudly that we supported the Humphrey-Hawkins bill. So what? It is not a partisan measure. It bears the name of two outstanding Democrats, a former Member of this body, and a present Member of the House of Representatives.

We are proud of that. We are not hiding from that as Republicans. We can also stand up and tell those who may be critical, "Read it."

The PRESIDING OFFICER. The Senator's 10 minutes have expired.

Mr. PROXMIRE. I yield 2 more minutes.

Mr. DOLE. "Read it, look at the inflation provision. If you are concerned about agriculture, look at the parity provisions."

It seems to me that we put together a pretty good package. The first round was won by those who did not want the percentage of the GNP, and they were successful. I cannot say—in fact, I can say I am glad they were successful because they kept it alive.

Then we fought over one word "may" or "shall."

It is not a very big battle but we did it anyway.

I just suggest this is the critical one. I do not know of anyone, whether it is Mr. HAWKINS or whether it is Leon Keyserling or anybody, who really opposes the language in the compromise or so-called compromise.

I just hope that after this amendment has been considered and voted upon—and I hope it is defeated—I say that in a very positive sense because I would like to make one more statement tonight just before passage indicating strong support, and urging my colleagues on this side of the aisle to vote for it. I think not that that would persuade anybody, but at least I would have my vote.

Mr. MUSKIE. Mr. President, would the Senator yield?

Mr. DOLE. Yes.

Mr. MUSKIE. I listened with great care to what the Senator had to say. I simply want to compliment him for his attitude and for the commitment he makes to his views on this bill. We may disagree about particular provisions in this case, but I am impressed by what he has had to say, and I compliment him.

Mr. DOLE. I thank the Senator.

Several Senators addressed the Chair.

Mr. SARBANES. Mr. President, I yield myself 2 minutes.

The PRESIDING OFFICER. The Senator from Maryland is recognized.

Mr. SARBANES. I appreciate the comments which the Senator from Kansas and the Senator from Indiana have made but I disagree with them very strongly concerning the substance of this amendment.

I strongly support the amendment of the distinguished Senator from Minnesota, Mrs. HUMPHREY, who has done so much to move this legislation forward. I commend her for the outstanding work she has done which reflects the long-standing Humphrey commitment to full employment for all Americans.

I think taking an inflation rate of 3 percent, which I am very anxious to get to and tying it to a set time period, a fixed year, as the language that is in the pending substitute would do, raises a couple of dangers. One is that the fixed date will become a pressure or constraint for moving toward wage-price control measures, even though there are provisions elsewhere in this bill specifically prohibiting that. However, the fixed date creates a pressure for such control policies and I am frank to say I think that is a mistake. I do not favor those kinds of wage-price control policies except in the most extreme emergencies.

Second, I think the problem of inflation is going to be brought under control by a gradual deceleration over a period of time, and that we can probably plan how to do that and how to achieve it better if we are not within the specific time constraint we are placed in when we have a date specified in the legislation.

Now, some say we specify a date on the unemployment; but we really have had more experience with policies that deal with unemployment and moving the unemployment rate down than we have had with policies designed to move inflation downward; and, as the very distinguished Senator from Minnesota (Mrs. HUMPHREY) pointed out in her very thoughtful statement following the introduction of this amendment, we do not really have an anti-inflation program set in place for moving us down toward this level on a fixed schedule.

The Senator from Maine pointed out his work in the Budget Committee, which deals with this matter, and it seems to me that the language for accomplishing these inflation goals at the earliest practicable time provides us an incentive without placing us within an artificial constraint. We realize the issue that is being put is one that requires the careful attention of the Members of the Senate, but I would hope that upon reflection they will support the amendment by the Senator from Minnesota and the Senator from Maine.

Mr. President, I think we probably are prepared to go to a vote at this point.

Mr. NELSON. Mr. President, will my colleague yield?

Mr. PROXMIRE. Yes; I am happy to yield to my colleague from Wisconsin.

Mr. NELSON. How much time is available?

Mr. PROXMIRE. We have plenty of time.

Mr. NELSON. Five minutes?

Mr. PROXMIRE. Mr. President, I yield 5 minutes to my colleague from Wisconsin.

The PRESIDING OFFICER. The Senator from Wisconsin is recognized for 5 minutes.

Mr. NELSON. Mr. President, I rise to speak against the pending amendment.

I understand the strong feelings on both sides, and I am not in any way qualified—nor is anyone else, I guess, that I know of—to be an arbiter of what words mean, or words in association with each other, or phrases. The reason that people frequently end up having very strong feelings on different sides of an issue, which appears on its face to read very simply, is because they interpret what it means differently from persons on the other side. That goes on all the time. There is a great deal of subjectivity in the interpretation of what any phrase means.

Now, I understand the feelings of those—and I have discussed this with my very good friends, of whom I have many in the labor movement—who are strongly against the 3-percent inflation goal to be reached by 1983. The President would have the authority, when we arrive at 1983, if the inflation goal has not been achieved, not to change the goal, but to advise the country and Congress that the goal cannot be achieved in 1983, as had been hoped. The President could then propose to move the goal 2 years or 3 years forward.

I can understand how some people looking at the inflation goal, and based upon past history, feel that the only way low inflation will be achieved is by having a great big labor surplus. So it is felt that the only way low inflation will be accomplished is at the expense of labor. I guess this has been the historical pattern.

However, a very fine economist of national renown, and a great friend of labor, very carefully drafted the language so as to make clear that the goal of low unemployment takes precedence over any other goal in the bill. Everybody that has been associated with this on both sides of the aisle, the Republicans and the Democrats, including the Senator from Indiana (Mr. LUGAR) who spoke on it the other day in our conference, have all agreed that the unemployment goal takes precedence over any other goal, and that we tell the President, "You do not—you do not—adopt any policy that puts the inflation goal ahead of the unemployment goal."

Now, who can complain about that? As I said to my friends who are advocates of the bill, and have been my greatest supporters, and I would not be here without them, "How would you like to go to your membership, and say to them, 'Would you like to have zero inflation and zero unemployment?' "

Everyone would vote for it. They would all vote for it. My constituents would all vote for it. I would vote for it; we all would vote for it.

Well, what is the quarrel about? Well, it is a question of semantics. I am not saying they would not interpret it differently from me; they certainly would. And there are Members on the other side who interpret it differently from those on this side. That is all very understandable.

But I have looked at it very hard, backward and forward, and my constituency is on the other side of this issue. Those who have always supported me are on the other side. I just think that my interpretation of it is the correct one, and they think their interpretation is the correct one.

Given what I feel about the inflation goal, I honestly think the bill is better with it. You cannot go to your constituents, put a referendum on the ballot, and say "Let us have zero inflation and zero percent unemployment"—if you did that, you could not get 1 percent of the people to vote against it. So why not say it?

Some people say you should not say it because you cannot achieve it.

The PRESIDING OFFICER. The Senator's time has expired.

Mr. PROXMIRE. I yield the Senator 2 more minutes.

Mr. MUSKIE. Mr. President, will the Senator yield one moment to me?

Mr. NELSON. Whose side is the Senator from Maine on?

Mr. MUSKIE. The Senator knows which side I am on.

Mr. NELSON. Well, then, I will not yield.

I yield to the Senator for a question.

Mr. MUSKIE. The Senator from Maine's reservations about this bill include the Senator from Wisconsin. I mean I was persuaded by the Senator from Wisconsin that it could be tailored to a realistic approach to the problems we are trying to address. I must say I am not particularly persuaded by the Senator's argument now, because he earlier had persuaded me otherwise.

Mr. NELSON. Well, this is a different day, I must say to the Senator from Maine. I do not recall what the Senator is referring to.

But what I say about this is that the goals are what we all want to achieve; why not have them in there?

Senator PROXMIRE has produced a chart which I am sure he discussed; I had to be off the floor for some other matters and did not hear the earlier part of the debate. For years, a good many years, 8 or 9 or 10, during the 2-year period from 1949 to 1970, we had 2 percent and less than 2 percent inflation, with lower unemployment than we have now, and better growth than we have now.

If we could do it then—10 years ago 2.8 percent inflation, 4.9 percent unemployment; in 1965, 1.7 percent inflation, 3.6 percent unemployment, and almost 6 percent growth, 5.9 percent—why can we not do it now?

The PRESIDING OFFICER. The Senator's time has expired.

Mr. NELSON. May I have 2 more minutes?

Mr. PROXMIRE. I yield.

The PRESIDING OFFICER (Mr. MCGOVERN). The Senator is making a great speech.

Mr. NELSON. That is what we ought to aspire to, given the careful language of the bill, and I repeat, otherwise I would not support it. The language of the bill makes it clear that the unemployment goal takes precedence over any other goal in here. So if at any time it appears that it is necessary to do something about unemployment and sacrifice some of the inflation goals, that is what happens, not vice versa.

So I am going to hope that this amendment will not prevail. I think that it is a good one, and I think again, as I said earlier this morning on the gross national product limitation, I thought it jeopardized the bill's support. We agreed on these three amendments, however, that we would live with whoever won or lost; we would lay it out, and we would vote. But one constituency out there in Wisconsin was unlikely, in my judgment, to support the bill at all if the GNP number limitation was in the bill, and I am happy it did not get in there.

I think this one should get in there. I think it helps the bill, and I hope the amendment will not be adopted.

I thank my colleague from Wisconsin.

Mr. PROXMIRE. Mr. President, I will be very brief. I know Senators are prepared to vote, but I would like to close by pointing out that if Senators would simply read the amendment in the bill, and realize what the Humphrey amendment would knock out, they would vote "no" on this amendment.

The statements in this letter on the bill are so reasonable, they are so consistent with the objectives of organized labor. I am going to read it.

I am going to read it. The trouble is that so many of these things people vote on by guess, because somebody else does, or because there is pressure from some group. They do not read what is before us. What does it say?

(2)—Reducing the rate of inflation, as set forth pursuant to section 3(e) of this Act, to not more than 3 per centum within a period not extending beyond the fifth calendar year after the first such Economic Report: *Provided*, That policies and programs for reducing the rate of inflation shall be designated so as not to impede achievement of the goals and timetables specified in clause (1) of this subsection for the reduction of unemployment.

What is wrong with that? That is what you knock out if you vote "aye" on the pending amendment. What is in the bill is not only fair to those who believe inflation is a big issue, the fundamental issue, the primary issue before us, but it is also fair to those who believe that unemployment should be the primary purpose of the bill. It preserves that. I have not talked to anyone, a Senator or a representative of labor, who has listened to that who will not agree that is the case. They always change the subject after we point that out. What do they want? We are saying that unemployment shall be, No. 1 that the policies to achieve our inflation goals shall be such as not to impede progress toward reducing unemployment.

Now, Mr. President, I think we also ought to recognize what has gone on. Before the first vote we had, when we were talking about limiting spending, it was saying that, "If you pass that amendment and put that in the bill and put a lid on spending, you kill the bill, because the supporters of the bill in the

House will not vote for it. They will take it down. They will be opposed to it. There is no way you will get the bill passed."

What have we done? We killed that. That was my amendment but we killed it. What was before the ad hoc committee, and I was a member of that committee and I sat through virtually every session, was that we ought to get a balance in this bill, and for a while we all agreed that we ought to have provisions making both subordinate to unemployment as our principal goal. The Senate has spoken and the Senate has knocked out the limitation on spending.

I submit if you also knock out the inflation goal, then you will have a possibility, and a very strong possibility, that you will not get any Humphrey-Hawkins bill at all. That was told us on the other one and that could happen this time because there are Senators here, and I respect their right and they have every right to do so, who have not one amendment or two amendments but hundreds of amendments, and even though this is a unanimous-consent agreement they can talk, a lot longer than on cloture. There is no limit to the number of germane amendments that I could design and others could design to delay.

Maybe they will not do that. If they do that, what do you have? You have a situation of killing, bypassing, this amendment that knocks out for any effective meaning the inflation goal. You have a bill that will make the business community, the small business community and the big business community, really angry, and they would have reason to be angry. They would feel that this bill is a one-sided bill that places no limitation on spending in the first place and that says, "We will not even put an inflation goal in the bill."

So, Mr. President, I do hope that Senators will consider what we are offering here. I do think we are being very fair. As has been pointed out over and over again by Senator DOLE and others, the labor people when they looked at this, when they came to our meetings, they said they could live with this. The principal author in the House, GUS HAWKINS, said they could live with this. They recognize the trade-off is eliminated here.

Under these circumstances I do hope the Senators will vote no on the pending amendment and give us an opportunity to have the balanced bill.

Mr. MUSKIE. Will the Senator yield?

Mrs. HUMPHREY. I yield.

Mr. MUSKIE. Mr. President, I have heard this amendment read twice, and I know what it says, and I am still opposed to it. There are two justifications that the Senator offers: One, that it really is not as rigid as I would make it out to be.

Well, if it is not, my answer is the same as my answer to his first amendment, that we do not need it. If it really does not tie us down in 1983 to 3 percent and in 1988 to 0 percent, if that is all just a lot of rhetoric that we can dream about, why put it in here? I think it is in here because it is intended to tie our hands.

The other reason why it is in here is that there is the possibility that we will be faced with a lot of amendments to the bill unless we defeat this amendment. I do not know anything about that. I was not part of this ad hoc group. I had no expectation to be drawn into this debate this afternoon. I had no amendments prepared. As a matter of fact, I thought it was a bad bill when it was introduced years ago. My effort this afternoon has been to try to improve it so that we would have a viable, flexible, economic policy that would serve the objectives of unemployment, reduction in inflation, and reduction in the Government share of GNP. Those are my goals and have been for 4 years as chairman of the Budget Committee.

So much of this debate implies that we have done nothing about those things. Well, I challenge that. I challenge that vehemently. I said this afternoon that the budget process is on the same track that the advocates of this bill and the opponents of these amendments say they are on.

I do not take a back seat to their commitment whatsoever. All I am saying to the Senate is that I have been exposed to the making of economic policy long enough to know that you cannot write it into law several years in advance with targets that you are mandated to meet. If you are not mandated to meet them, what have you done? What have you done? Except to raise expectations beyond what is realistic.

I am for legislative compromise. I have been engaged in it for 25 years.

Mr. PROXMIRE. Will the Senator yield?

Mr. MUSKIE. I did not ask the Senator from Wisconsin to yield and I am going to finish my thought. It will not take 30 seconds to finish what is on my mind.

I have listened to this all afternoon, and I have heard it said of me all the time that if I offer this amendment I am not against inflation. Well, who cut the deficit by $22 billion since January? Who cut outlays by $12.7 billion since January? Who cut budget authority $12.5 billion since January? The distinguished chairman of the Appropriations Committee and the Budget Committee.

I reject the assertion that by offering this amendment I am not for controlling inflation.

To suggest that the only way to control inflation is to vote for this piece of rhetoric which on the one hand the sponsors and supporters say means something and on the other hand they say it does not mean anything if you cannot meet it.

To what extent are we prepared to fool ourselves? If we do not believe what we are writing here, what are we bothering with it for?

Mr. President, I strongly support the amendment of my good friend and old associate, Senator HUMPHREY, and I hope the Senate will join me in doing so.

Mr. PROXMIRE. Is the Senator from Minnesota ready to yield back her time?

Mrs. HUMPHREY. I yield back——

Mr. JAVITS. May I ask the Senator not to yield back?

The PRESIDING OFFICER (PAUL G. HATFIELD). Who yields time?

Mr. JAVITS. Mr. President, I yield myself 5 minutes on the bill.

Mr. President, it is probably very well known that this is an extremely difficult vote, especially for me. I am comanager of the bill, and I am very proud to be a comanager of this particular bill. I have not been so honored for a long time.

I suppose I was as close to Hubert Humphrey as a friend as any Member on the Republican side could be. I know this was one of the most dearly held objectives in his life.

The basis of this bill is the planning bill which he and I introduced. Finally, as it is now before us, it has gotten down to just about that planning bill and nothing else.

I am fairly competent in this field of domestic and international economics. I am no economist but I have lived with it most of my life, and I know a good deal about it. I would be the first to say that these goals of 3 percent and zero—especially the latter—with all respect, make no sense at all. You may get to the 3, even though I doubt that. We have had an endemic rate of inflation here of 2 percent for many years, long before we got hot about the inflation problem. And even in 10 years, and I agree with Senator LUGAR, it is a very long time, a decade, I doubt that you will get that one through the Senate.

I doubt that we are going to be able to get down to 2 percent. But, Mr. President, these are goals and I am not going to redebate what Senator MUSKIE, I think, feels so strongly about, and very properly: That is, what is the real meaning of the effort to divide this particular provision from the policies and programs and goals and timetables which relate to reducing the rate of unemployment? It is being made very clear that nothing should be done about inflation which will impede the unemployment goal. I understand that, he understands that.

I am faced with a somewhat different problem and I think the Senate is faced with it. That is why I am willing to speak. I hesitated for some while as to whether I would speak at all. I would be less than honest with myself and with the Senate if I did not tell you that, having looked into this situation very thoroughly, it is my belief that there will be no Humphrey-Hawkins bill in this Congress if these provisions are not in this bill. I agree that it is unrealistic and I could make the case worse for myself by referring to the fact that when we reported out the bill in the Committee on Human Resources and thereafter, I said a lot of things about the fact that inflation goals did not belong in this particular bill, which was directed toward unemployment and employment goals, not inflation goals.

But, Mr. President, I have learned around here the very hard way for many years, especially when you are managing a bill, that if you believe in the bill, you may have to take some bitter pills in order to get the bill made into law. Mr. President, I shall not play-act with the Senate. It is my belief, and I have really checked it out thoroughly, that there will be no Humphrey-Hawkins bill in this Congress if this amendment succeeds. Somehow, somewhere, it is going

to slip on a banana peel and not be with us when the President gets the bills on his desk to sign.

For that reason, because I am a manager of the bill, because I think I believe in Hubert Humphrey as much as anybody here, I believe that this does not spoil basically—I will not even say substantially. It is not good, I shall not pretend it is. It is not very good. It is a very unhappy one for me. But I believe I must vote to keep the provision in the bill for the reasons which I have stated. Let every other Member consult his own conscience. I have consulted mine and that is my decision.

Mr. PROXMIRE. So the Senator would vote "no"——

Mr. DANFORTH. Will the Senator from New York yield to me for 1 minute for the purpose of asking him a question?

Mr. JAVITS. Surely.

Mr. DANFORTH. Does not the bill in its present form, with fixed percentages for both unemployment rates and rates of inflation, and very low percentages for both at the same time—does that not. in effect, mandate a policy of wage and price controls? Is not the only way to achieve these two percentage goals to do them artificially?

My view is that maybe the amendment is the way to go, given the fixed percentages on unemployment, because unless we say, "Well, we shall do the best we can on inflation," to go along on these very rigid percentage goals on both tracks at the same time, that there is only one conceivable way to accomplish that, and that is through wage and price controls.

Mr. JAVITS. I yield myself another 20 minutes on this bill, Mr. President.

I cannot answer that question in the affirmative for the following reasons: In the first place, there are no rigid levels in this bill. Everything is goals, and there are lots of reasons and they are stated in the bill, why the goals may or may not be attained. But one thing stands out in the bill, which is the makeweight factor with me and why I said what I did. That is that the first and preeminent goal is the unemployment goal. That, to me, is the key to the bill.

Does it lead to wage and price controls necessarily? My answer to that would be no, for this reason: remember this is a rifle shot at unemployment. The unemployment situation is that we have had endemic unemployment since about early 1974, which is composed 50 to 50 of structural unemployment and cyclical unemployment. I believe that, insofar as the unemployment goal is concerned, we can make such progress—and remember, we just put through a CETA conference report tonight—on structural unemployment as to meet or come very close to meeting—and that is all we can hope for in all these things—that goal without wage and price controls.

That does not mean that I am as leery of wage and price controls as many other people. They have been imposed, they have had their problems, they have dammed up adjustment, but they have worked, even when Nixon imposed them, when we really needed them. If we really needed them, I would be for it. But I do not think that necessarily, this bill, with these built-in goals—not rigidities, because it does not have those rigidities—leads to that result.

So my answer is in the negative.

Mr. PROXMIRE. Mr. President, I am ready to yield back my time if the Senator from Minnesota is ready to yield back her time.

Mrs. HUMPHREY. I yield back my time. I ask for the yeas and nays on this.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second. The yeas and nays were ordered.

All time having been yielded back, the question is on agreeing to the amendment. The yeas and nays have been ordered. The clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. EASTLAND. Mr. President, I have a pair with the senior Senator from Massachusetts (Mr. KENNEDY). If he were present and voting, he would vote "yea." If I were permitted to vote, I would vote "no." I withhold my vote.

Mr. MELCHER (after having voted in the negative). Mr. President, on this vote I have a pair with the distinguished Senator from Colorado (Mr. HASKELL). If he were present and voting, he would vote "yea." If I were at liberty to vote, I would vote "no." I withdraw my vote.

Mr. CRANSTON. I announce that the Senator from Alabama (Mrs. ALLEN), the Senator from Colorado (Mr. HASKELL), the Senator from Kentucky (Mr. HUDDLESTON), the Senator from Massachusetts (Mr. KENNEDY), the Senator from Alabama (Mr. SPARKMAN), and the Senator from Illinois (Mr. STEVENSON) are necessarily absent.

Mr. STEVENS. I announce that the Senator from New Mexico (Mr. DOMENICI), the Senator from Idaho (Mr. MCCLURE), the Senator from New Mexico (Mr. SCHMITT), the Senator from Virginia (Mr. SCOTT), the Senator from Texas (Mr. TOWER), and the Senator from North Dakota (Mr. YOUNG) are necessarily absent.

I further announce that, if present and voting, the Senator from New Mexico (Mr. SCHMITT) would vote "nay."

The PRESIDING OFFICER. Is there any Senator in the Chamber who has not voted and wishes to vote?

Have all Senators voted?

The result was announced—yeas 41, nays 45, as follows:

[Rollcall Vote No. 493 Leg.]

So the amendment (UP No. 2105) was rejected.

Mr. EAGLETON. Mr. President——

The PRESIDING OFFICER. The Senator from Missouri.

Mr. EAGLETON. Mr. President, am I recognized in my own right?

The PRESIDING OFFICER. The Senator from Missouri.

Mr. EAGLETON. Mr. President, not all of us have had the benefit of hearing the full debate on perhaps one of the most important bills in this session of Congress. We are all assigned to other duties——

The PRESIDING OFFICER. Who yields time to the Senator from Missouri?

Mr. JAVITS. I yield the Senator 5 minutes.

The PRESIDING OFFICER. The Senator from Missouri is recognized for 5 minutes.

Mr. EAGLETON. We all have a multiplicity of duties and other assignments, conference committees, and the like. But there is no bill——

Mr. ROBERT C. BYRD. Mr. President, is there not time on debatable motions?

The PRESIDING OFFICER. No motion has been made.

Mr. EAGLETON. Mr. President, I move to reconsider the vote.

Mr. PROXMIRE. I move to lay that motion on the table.

Mr. EAGLETON. I move to reconsider the vote, and I wish to speak on my motion. I voted in the negative, and I move to reconsider the vote.

We are in the closing days of this session. A multiplicity of issues are still before us. But there is no issue, Mr. President, that is more important to the economic well-being and the economic viability of this country than the issue of unemployment.

To some it may be an abstract case. To some, who are safely secure in their own livelihood, safely secure in their jobs, where their tenure and longevity are such that they have no particular problem—to an individual so safe and so secure, the question of unemployment is an abstract concept. Maybe to those who are safe in their employment, there are other economic issues that are paramount in their minds.

We all are the products of our own environment. We all view life in terms of how things relate to us and to our fami-

But to millions of other people, Mr. President, who are jobless and—for all practical purposes as they face the fu-

ture will remain jobless—there is no issue that is more transcendent, no issue that is more important than the question of employment. What Humphrey-Hawkins seeks to do, at least as I read it is to cause us, as a nation, to put our eyes in better focus; to direct our attention to those things that will make life not only better for those who are doing reasonably well, but to make life better for those who are not partaking in the bounty and the assets of life.

I know that some say this bill is a mere symbol. But, Mr. President, this country was built on a few things that were mere symbols.

The notion of the Declaration of Independence was a symbol. It was a symbol for which many brilliant and courageous people gave their lives, because they believed that its symbol was a pretty important one—freedom.

Later in the history of this country, after the Constitution was adopted there was another symbol called the Bill of Rights, the first 10 amendments to the Constitution. I daresay that, back in the time when those constitutional amendments were emerging from Congress, as they had to under our system, there were those who said, "Why are we talking about such abstractions as freedom of speech, freedom of the press, freedom of religion, the right to be immune from unreasonable search and seizure?" All of these treasured symbols have made life in the the United States that which it is, and made life in this country as we want it to be.

I am not, in a moment of instant dramatization, trying to equate Humphrey-Hawkins with the Constitution or the Bill of Rights. But I am trying to suggest, by historical analogy, that symbols are very important. It is sometimes true that a symbol says more about a person, or a body politic, than the substance of some profound piece of legislation.

Mr. HART. May we have order so we can hear the Senator?

The PRESIDING OFFICER. Will the Senator please suspend? There will be order in the Chamber.

Mr. EAGLETON. So it is that Humphrey-Hawkins is a symbol. It was detoothed, if that be a legitimate ad hoc verb. It was detoothed many months ago. The operational sections of the original Humphrey-Hawkins bill were removed. Quite frankly, to be as candid as I can with my colleagues, I thought it was right to take out some of those "triggers" which mandated action on the part of the Government because I, like many Members of this body, was very impressed with the testimony of then private citizen Brookings Institution Economist Charles Schultze.

When he testified before, I believe, Senator Humphrey's committee—I believe he was presiding over the Joint Economic Committee, Charles Schultze, now no longer private citizen Charles Schultze, but Chairman of the Board of the Council of Economic Advisers of the President—Charles Schultze, testified that the original version of Humphrey-Hawkins was by its inherent interworking mechanism inflationary and grievously so.

Some say it was the testimony of Mr. Schultze, being identified as "a liberal economist" that did more to defang, in the opinion of those who opposed the bill, the original version of Humphrey-Hawkins than the testimony of any other witness.

But something remains of Humphrey-Hawkins, Mr. President, something that maybe is just as meaningful as the trigger mechanisms and the targets that were originally placed in the bill. What remains, Mr. President, of Humphrey-Hawkins is a ray of hope, a ray of hope for many Americans who have fallen by the wayside. My home city, Mr. President, is St. Louis, Mo.

The PRESIDING OFFICER. The time of the Senator from Missouri has expired.

Mr. PROXMIRE addressed the Chair.

Mr. EAGLETON. Mr. President, I have the floor. I ask unanimous consent that I have an additional 10 minutes to at least complete my train of thought with respect to the position that I have taken on Humphrey-Hawkins.

Mr. PROXMIRE. Mr. President, reserving the right to object, we have had a very extensive debate and the hour is late. I understand I am in charge of the time against the motion. I will be happy to yield back my time or yield part of my time to him but I do think we should get a vote as soon as possible.

Mr. EAGLETON. I think 10 minutes is almost as soon as humanly possible. I ask the indulgence of my colleagues.

Several Senators addressed the Chair.

Mr. EAGLETON. Mr. President, what is the parliamentary situation? When I am recognized to speak on my motion to reconsider, do I not have the floor?

The PRESIDING OFFICER. The Senator had 7½ minutes which had expired.

Mr. EAGLETON. Under the unanimous consent agreement, if we are operating under one, and I take it we are, a parliamentary inquiry: Was it specified in that unanimous consent that on a motion to reconsider there was a 15-minute, or a 7½-minute, or some kind of time limit with respect to a motion to reconsider?

The PRESIDING OFFICER. Any debatable motion had a 15-minute limit that was divided.

Mr. BAKER. Regular order, Mr. President.

Mr. EAGLETON. Time was to be equally divided.

The PRESIDING OFFICER. The Senator is correct.

Mr. EAGLETON. I see.

The PRESIDING OFFICER. The Senator from Wisconsin has 7½ minutes.

Mr. PROXMIRE. Mr. President, I am not going to speak on this. I think Senators would like to vote. However, I say to the Senator from Missouri—I want to be fair with him—how about 5 minutes?

Mr. EAGLETON. I will take 5 minutes. That is fair.

Mr. PROXMIRE. I will give the Senator 5 minutes. I yield the Senator 5 minutes.

The PRESIDING OFFICER. The Senator from Missouri is recognized for 5 minutes.

Mr. EAGLETON. I shall constrain myself to the 5 minutes.

As I was saying, Mr. President, before the time limit expired—and I thank my colleagues, Senator PROXMIRE, and others, for their graciousness in this respect—I come from a city called St. Louis, Mo. In 1910, Mr. President, St. Louis was the seventh largest city in the United States with a population of close to a million people. Today I do not know where we rank. We are way below 20th. Our population is below 600,000.

Half of the population of St. Louis City now, Mr. President, is black. From Martin Luther King Avenue North is a solid black area in St. Louis, and if you drive through that area, Mr. President, you see the lack of hope, the lack of opportunity, the lack of employment that is indigenous to half of what used to be a thriving metropolitan area. Then cross the river to East St. Louis, Ill., and know that there are old men and women, middle-aged men and women, young men and women, who, under the current scheme of things, will perhaps never be able to attain gainful employment. With the miracles of medical science, the youngsters probably will live to the age of 80 or 85, so great is that genius of medical science. You tell the people of North St. Louis, Mo., and of East St. Louis, Ill., that Humphrey-Hawkins does not mean anything. You tell them that it is an irrelevancy whether this Congress passes it or not. You tell them that this Congress does not care or is not mightily concerned about whether people are employed or not. You tell them those things, Mr. President, and you are taking from them the last tiny ray of hope that may be theirs for the rest of their lives.

This bill may not create one new job; but if we do not proceed with this bill, and if this Congress adjourns without final action on Humphrey-Hawkins, you will have snuffed out for all practical purposes the lives of many young citizens in those two cities. This is the ray of hope. To defeat this bill is the implicit recognition that, in what is called, sometimes I think mistakenly, the greatest deliberative body on Earth, the 100 solons—as some of the journalists say—do not give much of a blank about people who are not employed.

I do not know what will be the result on the amendment before us and on the vote to reconsider. I know there are good friends of mine who voted both ways on this motion. But this issue is so central to the question of whether we truly believe that unemployment is the No. 1 disease on this country; that 6 percent unemployment—and we give President Carter and others great credit for bringing it down roughly to that figure—is not good enough; that a country that can do all of the great things that we do economically, industrially, commercially, agriculturally, can still have the indigenous unemployment in St. Louis, in New York, in Cleveland, in Buffalo, and

in Los Angeles; that cities of this country in which joblessness is an inherited and inherent way of life are to be accepted.

Mr. ABOUREZK. Mr. President, can we have order?

The PRESIDING OFFICER (Mr. HODGES). The Senator will withhold a moment. The Senate is not in order.

Mr. EAGLETON. For us not to act on this bill——

The PRESIDING OFFICER. Will the Senator withhold for a moment. The Senate is not in order and the Senator from Missouri is entitled to be heard.

Mr. EAGLETON. For us not to act on this bill, or for us to dilute the major focus of this bill—a focus on unemployment—I think would be a great disservice to those in our society who definitely and desperately need help.

The PRESIDING OFFICER. The Senator's time has expired.

Mr. DOLE. Mr. President, I ask for the yeas and nays on the motion to reconsider.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second?

The yeas and nays were ordered.

Mr. PROXMIRE. Mr. President, I yield whatever time I have remaining.

The PRESIDING OFFICER. The question is on agreeing to the motion to reconsider the vote by which the amendment was rejected. The yeas and nays have been ordered, and the clerk will call the roll.

The legislative clerk called the roll.

Mr. DANFORTH (when his name was called). Mr. President, on this vote I have a pair with the distinguished Senator from North Dakota (Mr. YOUNG). If he were present and voting, he would vote "nay." If I were at liberty to vote, I would vote "yea." Therefore, I withhold my vote.

Mr. EASTLAND (when his name was called). Mr. President, on this vote I have a pair with the distinguished Senator from Massachusetts (Mr. KENNEDY). If he were not unavoidably absent, he would vote "yea." If I were permitted to vote, I would vote "nay." Therefore, I withhold my vote.

Mr. CRANSTON. I announce that the Senator from Alabama (Mrs. ALLEN), the Senator from Colorado (Mr. HASKELL), the Senator from Kentucky (Mr. HUDDLESTON), the Senator from Massachusetts (Mr. KENNEDY), the Senator from Louisiana (Mr. LONG), and the Senator from Maryland (Mr. SARBANES) are necessarily absent.

Mr. STEVENS. I announce that the Senator from New Mexico (Mr. DOMENICI), the Senator from Idaho (Mr. MCCLURE), the Senator from New Mexico (Mr. SCHMITT), the Senator from Virginia (Mr. SCOTT), the Senator from Texas (Mr. TOWER), the Senator from Wyoming (Mr. WALLOP), and the Senator from North Dakota (Mr. YOUNG) are necessarily absent.

The PRESIDING OFFICER (Mr. FORD). Have all Senators in the Chamber voted?

The result was announced—yeas 39, nays 46, as follows:

[Rollcall Vote No. 494 Leg.]

YEAS—39

Abourezk	Eagleton	Metzenbaum

So the motion to reconsider was rejected.

The PRESIDING OFFICER. The Senator from Virginia.

Will the Senator suspend?

Will Senators please take their seats? The Senate will come to order. Clear the well. The Senate will please come to order so that we might proceed. The Chair would like to recognize the distinguished Senator from Virginia if the Senate will come to order.

Will Senators please clear the aisles? The Senator from Virginia.

AMENDMENT NO. 4528

(Purpose: To revise the basis for calculating the unemployment rate for the purposes of this legislation)

Mr. HARRY F. BYRD, JR. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The second assistant legislative clerk read as follows:

The Senator from Virginia (Mr. HARRY F. BYRD, JR.) proposes on amendment numbered 4528:

On page 65, line 8, after "Labor" strike the punctuation, replace it with a comma and insert "reduce by not counting as unemployed those unemployed less than five weeks.".

The PRESIDING OFFICER. There is 1 hour on this amendment to be equally divided.

Mr. HARRY F. BYRD, JR. Mr. President, I yield myself 15 minutes. Could we have order?

The PRESIDING OFFICER. Will the Senator suspend? Will Senators please clear the aisles? If Senators have discussions, please retire to the cloakrooms. The Chair will not allow the Senate to proceed until we have order.

The Senator from Virginia.

Mr. HARRY F. BYRD, JR. Mr. President, first let me say I think it is very unfortunate that legislation of this magnitude has been brought up so late in this session. I realize the great pressure from the White House to push this legislation. I realize the pressure from the national labor union leaders. I note that even the Republican leadership of the Senate joined in bringing this legislation before the Senate.

In noting the situation which exists in the Senate tonight, I plan to discuss this amendment, but plan to withdraw it. I have seen enough of the attitude of the Senate to know that no amendment of any substance is going to be added to this bill.

The amendment which I have now called up is designed to put the Humphrey-Hawkins bill on a realistic basis.

Quite simply, it alters the method of computing the unemployment rate for the purposes of this legislation. In calculating the rate of unemployment, persons who have been out of work for less than 5 weeks would not be counted.

Mr. STENNIS. Mr. President, I insist on order. There is no excuse for all these people walking around, cutting off the speaker. We cannot hear.

The PRESIDING OFFICER. The Senator is absolutely correct. The Chair has been endeavoring to get order in the Senate. Apparently, when all Senators leave we will have order.

Mr. HARRY F. BYRD, JR. Under the terms of the legislation as it now stands, the President is directed to orient a vast array of Government policies toward the achievement within 5 years of an unemployment rate of 4 percent for the total civilian labor force and 3 percent for that portion of the labor force aged 20 and over.

To see what that target means, I believe that we must first put it into historical context. Let us look at what has happened in the area of unemployment in the United States since the Depression of the 1930's.

During the 38-year span since 1940, unemployment in the civilian labor force has undergone many fluctuations. It stood at 14.6 percent in 1940, when the effects of the depression were still being felt and wartime production had not geared up. The following year it dropped to 9.9 percent, then to 4.7 percent in 1942.

It was not until 1943, at the very peak of World War II, that unemployment fell below 4 percent. The rate for that year was 1.9 percent. The rate remained very low for the rest of the war and stayed below 4 percent through 1948 as pent-up wartime demand stimulated civilian production and absorbed the returning veterans into the work force.

In 1949 and 1950, the unemployment rates were 5.9 and 5.3 percent, respectively.

Then came the Korean war, and another mobilization effort pushed unemployment down to the 3 percent range for 1951 through 1953.

From 1954 through 1965, the unem-

ployment rate did not once drop to 4 percent.

It was not until 1966, with yet another war being fought, that the United States experienced unemployment of less than 4 percent. The rates for 1966 through 1969 were 3.5 and 3.8 percent.

But in 1970, with the Vietnam war still in progress, unemployment reached 4.9 percent and has not again fallen to the level of 4 percent.

Looking over these data for the past 38 years, we see that our Nation has not known unemployment of 4 percent or less in a single normal peacetime year, except for the post-World War II expansion. Every decline in the rate to 4 percent or less has been associated with a war.

It seems to me extremely unwise to direct the President to achieve a wartime level of unemployment in time of peace—and thereby hold out a promise to the American people which I sincerely believe cannot be kept.

But the historical view of unemployment is not the only context in which we must consider what we are attempting to do in this legislation.

A second context in which we must look at the pending legislation is that of the total state of the economy.

In that regard, I believe there is near-universal agreement, among economists and laymen alike, that our No. 1 economic problem is inflation. Even George Meany will agree to that. We are hovering in the double-digit inflation range right now, and we dare not undertake policies which would worsen that situation or, indeed, weaken our chances to bring the inflation rate sharply downward.

Now what would be the effect of all-out pursuit of a 4-percent unemployment rate upon inflation?

Many economists of widely differing persuasions warn that the targets in the Humphrey-Hawkins bill would be highly inflationary.

Rather than cite these economists, let me quote instead from a strong advocate of the Humphrey-Hawkins bill, Secretary of Labor F. Ray Marshall. Secretary Marshall wrote this in a message accompanying the employment and training report of the President for 1978.

> The Humphrey-Hawkins bill will commit us to the goal of a 4-percent unemployment rate in 1983. Experts agree that this rate is unattainable without adding to inflation unless the structure of the labor market is changed. However, there is little agreement over the magnitude of the change needed and over the effectiveness of various proposals to bring about those changes.
>
> In particular, there is disagreement over the rate of unemployment at which inflationary pressures can be expected to emerge in labor markets in the absence of structural improvements. Current estimates range between 5 and 6 percent.

The Secretary goes on to say that he expects a lower rate to be attainable by 1983, without further inflation, but he admits this is a personal estimate.

The point is that Mr. Marshall concedes that, under present conditions, inflation will worsen at an unemployment rate somewhere between 5 and 6 percent, without structural improvements.

I realize that the proponents of Humphrey-Hawkins will say that this is what the bill is all about: that it will produce the "structural improvements" needed to generate full employment without inflation.

But I submit that so long as the bill is geared to the total unemployment rate for the entire civilian labor force, it is not truly targeted at structural unemployment.

I agree with the proponents of this legislation that we need to frame policies to reduce structural unemployment. But I maintain that this bill, as written, is the wrong instrument to achieve that goal.

I believe that economists agree that we do not really have a satisfactory statistical measure of structural unemployment. But I think we can safely say that the kind of unemployment which we want to reduce, when we are talking in terms of structural improvements, is characteristically unemployment of considerable duration.

It is not the office worker who quits one job, gambling on getting a better one by devoting a few weeks to a full-time job hunt.

It is not the teenage son of a suburban family looking for money to buy gasoline for his new automobile.

It is not chronic job-shifters who always affords himself or herself a few weeks on unemployment compensation between positions.

These persons are not unemployed by virtue of the structure of the economy. Even some persons who are fired are not structurally unemployed in the true sense; because they have marketable skills they are not out of work for any great period.

One of the great obstacles which we face in framing economic policies to deal with the unemployment problem is the enormous variations in circumstances which are masked by the overall unemployment statistics.

That national unemployment rate, to which the Humphrey-Hawkins bill is geared, records equally the unemployment of the most casual job-hunter and the debt-ridden, desperate worker who has spent long months trying to save himself and his family from financial ruin.

All unemployment is not equal.

The Bureau of Labor Statistics in the Department of Labor, the source of our data on unemployment, recognizes that its array of statistical measures does not constitute an estimate of economic hardship. Recently, it undertook an effort to supplement its usual compilations, and it came up with a highly significant finding:

In the first quarter of 1976, the Bureau found, nearly 60 percent of the total number of unemployed persons lived in families where at least one other person was employed.

Of course, we cannot say that everyone who is a member of a family with a breadwinner escapes all hardship. But there is a vast difference between the household with no earned income and one with at least one person on the job.

Certainly, it is startling to learn that more than half of our unemployment is accounted for by members of families which include employed workers.

We need more refined statistical measures to frame more intelligent policies in this field. But in the meantime, we must make do with what we have.

On the basis of information that is available, it seems to me that the area upon which we should focus is long-term unemployment. This is now recorded regularly: The Bureau of Labor Statistics breaks down the unemployed into those out of work less than 5 weeks, 5 to 6 weeks, 7 to 10 weeks, 11 to 14 weeks, 15 to 26 weeks, and 27 weeks and over. So the figures on length of unemployment are available now. No new statistics need be collected to establish these measures.

I believe that it would be wise to focus on those with truly long terms of unemployment—say 15 weeks or more—but I have chosen only to eliminate from the measure used in this legislation those out of work for less than 5 weeks. Indeed, that, I think, is a relatively short period of time.

The rate of unemployment for those out of work 5 weeks or more at the present time is in the neighborhood of 3 percent, and has been there for some time. Thus, my amendment would make unnecessary any vast policy changes at the present time.

In framing policies to deal with the future, to avoid the calamitous unemployment levels that we experienced in 1975, the President thus would be directed to focus attention on the long-term rate, namely, the unemployed of a duration of greater than 5 weeks. He would be encouraged to undertake sound, long-range measures that will encourage solid economic growth and avoid the wild fluctuations which we have experienced in the all too recent past.

During consideration of H.R. 50 in the House, Congressman PIKE of New York offered an amendment far more drastic than the one I am proposing to the Senate. The Pike amendment would have excluded from computation of the unemployment rate those unemployed less than 4 weeks, plus strikers, those not actively seeking full-time work and those who left their last jobs.

Congressman PIKE's amendment was defeated by a margin of only 204 to 199—just five votes.

Mr. President, as I said in the beginning of my remarks, I realize that the Senate is not in any mood to accept any fundamental change in the legislation before the Senate tonight.

This legislation is before the Senate just 24 hours before the Senate will adjourn.

I shall vote against the Humphrey-Hawkins bill when the vote comes at a later hour. The bill before the Senate now is either cosmetic—and if it is cosmetic, it will deliberately mislead many segments of our population. If, on the other hand, it is not cosmetic, if, on the other hand, the actions envisioned by the pending legislation are put into effect, then it will be highly inflationary.

Inflation, incidentally, is the cruelest tax of all, hitting hardest those on fixed

income and those in the lower economic brackets.

I regret to see a bill like this being considered by the Senate, one which, in my judgment, will mislead many of our fellow citizens throughout our Nation. It is not going to do the job unless vast sums of American tax dollars are spent to accomplish what the legislation envisions.

I think people are cynical enough about Government right now. I think one of the great problems in our country today is the cynicism on the part of the American people toward Government. We need more confidence in Government, not less.

But I am convinced that a bill such as we are considering now will mislead many of our fellow citizens, and thus will be doing a disservice in that respect. The attitude of the Senate is, let's put something in lawbooks—good or bad—just so it is called Humphrey-Hawkins.

The PRESIDING OFFICER. The Senator's 15 minutes which he yielded to himself have expired.

The Senator has an additional 5 minutes.

Mr. HARRY F. BYRD, JR. Mr. President, much has been said about this being a private sector bill. Well, to some extent there is accuracy in that. To a considerable extent, there is not.

It does use language to say that the private sector shall be utilized first. But then it goes on with a long list of public sector activities that will be encouraged and permitted under this legislation.

I was much impressed with the first vote taken today on this bill. The Senate refused to accept the Proxmire amendment, which would put a limitation on Federal spending as a percentage of gross national product. The majority of the Senators who voted that proposal down knew what they were doing, because this bill is going to be a very expensive bill for the American taxpayer, or else it is going to be purely a cosmetic bill and helpful to no one—except, perhaps, the politicians and the labor union leaders.

Mr. President, I will withdraw the amendment which I have presented, although I think that it would make the bill a more realistic piece of legislation were it adopted.

Mr. President, I ask unanimous consent that I may have printed in the RECORD at this point a compilation of the many programs in the Humphrey-Hawkins bill before the Senate tonight dealing with the public sector and the potential for great cost to the American taxpayer.

There being no objection, the compilation was ordered to be printed in the RECORD, as follows:

HUMPHREY-HAWKINS BILL: PUBLIC SECTOR MENTIONED IN ROBERT C. BYRD-BAKER VERSION

PUBLIC SECTOR

Expansion of public employment through means other than CETA public service jobs.

Expansion of public service jobs under CETA.

(Note: the above 2 items listed as lower priority than private sector expansion.)

Secretary of Labor to take "such action as practicable" to achieve employment goals.

Secretary of Labor to make studies and develop information toward eliminating unemployment differentials.

One hundred percent parity for farmers.

Programs for urban areas.

Programs for health care, education and training, child care, human services, housing.

Policies concerning federal aid to state and local governments, "especially for public investment and unemployment-related costs."

"National defense and other needed international programs."

Attention to federal contracts, grants and procurement, and military base closing, and their impact on regions, urban-rural-suburban areas, "with particular attention to meeting the needs of labor surplus areas."

Government information system to monitor inflationary trends and threats.

Programs to alleviate shortages of goods, services, labor and capital.

Establishment of stockpiles of agricultural commodities and other critical materials.

Advisory boards, (including regional boards) may be established by President.

POSSIBLE COUNTERCYCLICAL PROGRAMS

Accelerated public works.

Public service employment.

State and local grant programs.

Skill training in public sector.

Unemployment insurance programs.

Federal programs targeted on labor surplus areas.

Augmentation of training programs.

Youth employment programs.

Community development programs.

Regional and structural employment policies.

Counseling, training and support activities under CETA.

"Reservoirs" of public employment and private nonprofit employment projects for those otherwise unemployable.

Mr. STENNIS. Would the Senator yield me 2 minutes, if he has it left?

Mr. HARRY F. BYRD, JR. I yield 5 minutes to the Senator from Mississippi.

Mr. STENNIS. I thank the Senator.

Mr. President, I want to commend the Senator from Virginia for the work he has put into this speech, for the bringing of the facts that he portrays, and the logic that he presents.

I certainly want, and I am willing with my vote, to try to make some contribution to the conditions that we are faced with here in connection with unemployment.

No one could be indifferent to this problem. But I think it is going to continue at varying degrees in spite of what can be done, until a better plan can be adopted. It is not a passing matter, I mean.

But I just do not see where we can be satisfied with a program that is less than demanding, rather severe and meaningful requirements of those that are going to have these jobs.

In many places, the present jobs are a joke. I have supported, of course, some of those many billions of dollars that we have in the present plan for the unemployed. I think the whole problem will fail of solution until we follow a systematic year-to-year, permanent training of our youth, with the teaching that goes along with it, that it is their duty as a citizen not only to learn a skill, but to earn his own living and take pride in it. More than that, we must let them know they will be expected to earn their own way. That is the proper rule in the American system. Also, that is the only rule to happiness, as I see it.

I think we have failed in that respect during the last few years.

So, going along with unemployment, I would have a real, meaningful program of this kind. We did it once in the Depression, to a degree, the CCC camps they were called then, instilled into those youngsters' minds a concept that is not the concept they are getting now, that they be expected to work, expected to earn their own way, and they are going to be given a chance to train, just as much training and just as good a job as they will put the effort into it, and receive the rewards themselves, and live the American way.

I would also support rather liberal payments to industry to pay them a sizable part of that training. In industry, that is where the jobs are. Industry creates the jobs. They have the machinery; they have the know-how; they have the system; they have the management.

Government does not do those things and can hardly be successful in operating industry.

I think, and this is a mature thought, in my case, because I have seen this thing grow over the years, that we must have a system somewhere in the neighborhood of what I have outlined. This would include extensive training for jobs among the unemployed both youths and adults, and also temporary jobs for unemployed. Some kind of effort, some kind of return, must be required for the wages paid.

It is easy to say those things, and I do not say them in criticism of this plan. But I am just, regretfully, saying I do not believe this plan and the meager requirements in it, have the support of the people. They have to pay the taxes to support the plan and they expect some return. They have enough of sheer waste.

When we meet these points of the plan, we will be on our way.

Again I thank the Senator and think he made a real contribution.

Mr. HARRY F. BYRD, JR. I thank the Senator from Mississippi.

(There was a disturbance in the gallery.)

The PRESIDING OFFICER (Mr. FORD). The galleries will be in order. The Senator will suspend.

The galleries will be in order.

The Senator will suspend until the Sergeant at Arms has restored order in the gallery.

The Senator may proceed.

Mr. HARRY F. BYRD, JR. Mr. President, how much time do I have remaining?

The PRESIDING OFFICER. The Senator has 5 minutes remaining.

Mr. HARRY F. BYRD, JR. I yield myself 1 minute.

Mr. President, there is no individual in the entire Congress who is indifferent to unemployment. It is a terrible problem for those who have faced and are facing unemployment. It is one of the great problems of our country. That is why I regret that this bill was brought up in the last hours of this session, as it has been brought up.

I am convinced in my own mind that the Humphrey-Hawkins proposal now before the Senate is either cosmetic or inflationary, and it is a piece of legislation that I cannot support.

The PRESIDING OFFICER. Without objection, the amendment of the Senator from Virginia is withdrawn.

Are there further amendments?

UP AMENDMENT NO. 2106

(Purpose: To include Americans of Hispanic origin in all regular reports and publications by the Bureau of Labor Statistics containing labor force data)

Mr. DOLE. Mr. President, I send an unprinted amendment to the desk for myself and the distinguished Senator from New Mexico (Mr. SCHMITT).

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from Kansas (Mr. DOLE), for himself and Mr. SCHMITT, proposes an unprinted amendment numbered 2106.

Mr. DOLE. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

At the appropriate place in the substitute, insert the following:

"To promote further the achievement of full employment under this Act, and in furtherance of the policies, programs, and priorities thereof, all regular reports and publications by the Bureau of Labor Statistics and by all other Federal agencies containing estimated rates of unemployment and other characteristics of the labor force or subpopulations thereof (which reports and publications have previously included statistics distinguishing among racial groups) shall by January 1, 1983, report such statistics for persons of Hispanic origin in any case in which the population being described includes 50,000 or more persons of Hispanic origin. State and local agencies which publish such reports and publications are urged to comply with the provisions of the preceding sentence.".

The PRESIDING OFFICER. There are 30 minutes on the amendment, 15 minutes to a side.

Mr. DOLE. Mr. President, I will take about 3 or 4 minutes. I will explain the amendment quickly, and I will withdraw the amendment.

Mr. President, the amendment I am proposing to the so-called Humphrey-Hawkins Full Employment Act addresses a long-time Hispanic concern over the inadequacies of past and current statistics on unemployment and other characteristics of the Hispanic labor force.

CONSTITUTIONAL MANDATE

Mr. President, full and complete enumeration of the population of the United States is a constitutionally mandated process whereby political representation in Congress is distributed. In addition, census data are used to calculate the allocation of almost $15 billion annually to State and local governments for Federal assistance programs, to insure equal employment opportunities and to protect voting rights.

Racial and ethnic data collected by various agencies are essential tools with which to combat discrimination and monitor affirmative action programs to remedy past discrimination. The collection and analysis of this data is the most effective and accurate means of measuring Federal program impact on minority beneficiaries and for assuring that equal employment opportunity policies are working effectively. With regard to programs on Federal assistance in general, data on race and ethnic origin of persons eligible for, applying for, or receiving Federal assistance are fundamental tools for measuring the extent of equitable distribution of benefits.

THE U.S. COMMISSION ON CIVIL SERVICE RIGHTS REPORT

The U.S. Commission on Civil Rights recently charged the U.S. Department of Labor was negligent in complying with Public Law 94–311. This law, enacted in June 1976, recognized that the Federal departments within the executive branch were ignoring the need for adequate information about the Hispanic population. Moreover, the law mandates each Federal department to increase its data collection activities regarding the Hispanics. In its report to the President, the Civil Rights Commission points out that the Department of Labor's efforts to comply with Public Law 94–311 could be greatly improved. It has been more than 2 years since the enactment of this law and most of the Department's efforts are still in the planning stages and it is not known when it will publish the expanded data called for in its plans. Also, it does not plan to publish Hispanic unemployment data monthly, as it does for blacks and whites. Instead, it plans to publish separate Hispanic unemployment data for only a very few States and no local areas with a large Hispanic population. Mr. President, my amendment would change this. My amendment would require that all regular reports and publications by the Bureau of Labor Statistics and all other Federal agencies which report estimated rates of unemployment and other such characteristics of the labor force include statistics for persons of Hispanic origin in any case in which the population being described includes 50,000 or more persons of Hispanic origin.

REASONABLE TIME FOR IMPLEMENTATION

Mr. President, my amendment calls for a January 1, 1983, deadline. I wish to make clear that I have taken into consideration the time needed by the Bureau of Labor Statistics, after the 1980 census, to gear up for the inclusion of Hispanics in the general reporting of labor statistics. Mr. President, only by defining the American of Hispanic origin or descent labor data can we expect to include Americans of Hispanic origin or descent to benefit from this full employment and balanced growth policy statement. Mr. President, only by defining the Spanish-origin population to the greatest degree of accuracy possible can we assure that Government programs adequately serve the second largest minority in the United States.

I believe that my amendment would serve as a vehicle for amelioraitng the critical unemployment in the Hispanic community.

Mr. President, I know that there are some who have reluctance to accept the amendment or to extend the debate tonight. The amendment would correct an inadequacy in the current labor work force statistics. It would expand and build on Public Law 94–311, signed by the President in June of 1976.

It could address a matter of deep concern to all Americans of Hispanic origin or descent.

I understand the concern, and I understand the lateness of the hour. I will only say this: It would not require the quarterly and annual reports of labor statistics, currently done for whites and blacks, until June 1, 1983. The 1983 date takes into consideration the time needed by the Government with respect to the 1980 census.

I hope that sometime early next year I might enlist the help of some of my colleagues from States with Hispanic population, and perhaps we can address this matter of concern to them. It does not cost anything. It does mean a great deal to them. I hope that early next year we might address the problem.

Mr. HART. Will the Senator yield?

Mr. DOLE. I yield.

Mr. HART. Mr. President, I congratulate the Senator from Kansas for his concern here. I think it is a real and genuine concern, and he deserves our support in this effort. I would like to work with him in the future.

Mr. DOLE. I thank my colleague.

FULL PARITY FOR FARMERS AND THE HUMPHREY-HAWKINS BILL

Mr. DOLE. Mr. President, included in the Humphrey-Hawkins bill are national priority policies and programs required for full employment and balanced growth.

The bill says that to contribute to the achievement of the goals under the Full Employment and Balanced Growth Act of 1978, the President's budget for each fiscal year beginning after the date of enactment of the Full Employment and Balanced Growth Act of 1978 shall include priority policies and programs, which may include consideration of several items, one of which is the development of a comprehensive national agricultural policy.

At my suggestion, language was added to the bill to make full parity income for farmers a part of any national agricultural policy. I believe any such policy should assure farm and ranch income at full parity levels.

My addition to the bill said the agricultural policy should include a goal to assure, "farm and ranch income at full parity levels that will improve opportunities for farm families, encourage production, provide for essential capital investment in farming, and provide for farm product prices at full parity in the marketplace."

This means that when the President sets his policies, both in operating the Federal Government and how it affects the private sector of the economy, he will take into consideration reaching the goal of full parity at the same time as we reach the goal of 4 percent unemployment.

What this means is that we will give

farmers an opportunity to have a better income. Right now when we look at farm incomes around 65 percent of parity, this is the lowest we have seen farm income since 1933 when we were in the worst part of the depression. Full parity is not an unattainable goal at all, because in 1973 we did reach full parity. In fact, 106 percent of parity in August of 1973.

Mr. President, we have seen during this session of Congress people in the American agriculture movement here on the farm strike in the Halls of Congress, I have talked to hundreds of them and they have told me they have gone into most senatorial offices.

I have said to them that the problem is that there are not enough people in Congress from the rural part of the country. They report that some Senators say, "we are for parity."

I say we will give them an opportunity to vote for full parity in this legislation. This legislation is setting economic goals for the country at large, and we ought to be setting agricultural goals if unemployment goals are set.

I suggest we look at some of the Federal policies that are made, policies of increasing production of palm oil in foreign countries in competition with soybean farmers. The President ought to take that into consideration and not support that competition.

Let us look at the importation of live beef to the American market, coming in from Canada. That was not counted in the beef quota last year and it had a detrimental effect on the price of beef in this country. The beef industry has been down for years. The President and the Congress will have to take a look at that and govern accordingly so farmers will secure full parity in the marketplace.

There are policies that are made in the use of insecticides and pesticides which enable farmers to raise more for the needs of the people not only of this country, but all over the world. Are we going to deny the use of those chemicals insofar as they are not proven to be unhealthy to human beings, in the protection of agricultural products? These are the policy decisions that will have to be made in light of adding full parity for farmers to this bill.

Mr. President, I believe policy decisions made by the President and the Congress should plan for improved farm income reaching full parity in the marketplace.

Mr. President, I said about 3 hours earlier that I would have the opportunity to say in the last minute that I think we should vote for this bill. I am proud to say now that we should vote for the Humphrey-Hawkins bill.

I believe it is a tribute to our late friend, Senator Humphrey, and certainly to the present Senator HUMPHREY, to have this opportunity.

We have had our battle this afternoon. We win some and lose some, and I learned in 1976 that it is a lot more fun to win.

I believe that we have a good document. It is not perfect. Neither side received all it wanted. It is the result of compromise and a lot of work by some Members who perhaps even now may not be able to vote for the bill. I hope every Republican will vote for the bill. It is not partisan. We are proud of the name it bears—Humphrey-Hawkins.

I thank all those Senators who worked on the ad hoc committee to obtain a bill that could be passed. Senators LUGAR, NELSON, PROXMIRE, RIEGLE, SARBANES, HATCH, HUMPHREY, WILLIAMS, CRANSTON, KENNEDY, PERCY, BAKER, BYRD of West Virginia, all participated in the discussions. Their cooperation was essential to the bill that was presented here today.

We have had give and take, and changes have been made—only goals, yes, we understand. We understand the first priority is employment. It has to be the first priority. We understand that jobs are the first priority. But I think we should address—and we did address—the question of spending, the question of inflation, the problem of agriculture, and other problems that have been raised by my colleague on the floor.

So, as my last words to those in the business community who have not read the bill, I say they should read it. They might find that they like it. Those in the labor force who are opposed to perhaps one amendment should read it very carefully; because we made it very clear in the inflation amendment that it was secondary to meeting certain obligations in unemployment, trying to help the unemployment picture.

We also gave the President the time to change certain timetables in the legislation.

So it is a good, sound piece of legislation. It addresses the problems we have all across America—Republicans, Democrats, Independents, blacks, whites, Hispanics.

What may have been an impossible dream for Mrs. Humphrey a few days ago is now about to be a reality. I hope she is not offended by the fact that some of us disagreed with the amendment she offered. We felt very strongly about it, and we voted against her with our fingers crossed. We wanted to win, and we did prevail. I am not certain that we won, but we did prevail. I hope that in that competitive time we have not in any way diminished the importance of this legislation.

Mr. LUGAR. Mr. President, will the Senator yield me time on his amendment?

Mr. DOLE. I withdraw the amendment.

The PRESIDING OFFICER (Mr. BIDEN). The amendment is withdrawn.

Mr. PROXMIRE. Mr. President, I yield the Senator 2 minutes on the bill.

Mr. LUGAR. Mr. President, I appreciate this moment, in what I presume and hope is the conclusion of the debate, to encourage Republicans to vote for the Humphrey-Hawkins bill.

I simply want to pay tribute to many who have worked on this effort and whose good faith—at least in terms of all the conversations that preceded this debate—were very instrumental in my feeling that this is an important piece of legislation. We have done a reasonably good job in trying to make certain that it is constructive.

I am very grateful that Senators took time to think through the three objectives, have debated them well, and now I hope we move on to implementation.

We have a responsibility in Congress as will the President to make this work.

Those of us who have through the discipline of taking a look at what is in Humphrey-Hawkins and have come to learn more of it, appreciate the process and what it can mean for this country.

I pay special tribute to the manager of the bill on our side, the distinguished Senator from New York, whose eloquent statement prior to the last vote I am certain was an important factor in the success of the legislation; likewise, to both the Senators from Wisconsin whose faithful consideration of all of the conversations, arrangements, agreements we have had were certainly instrumental in bringing about my support.

I thank the Chair.

Mr. JAVITS. Mr. President, I yield 7 minutes to the Senator from Illinois (Mr. PERCY).

The PRESIDING OFFICER. The Senator from Illinois.

Mr. PERCY. Mr. President, I thank my distinguished colleague.

Mr President, I do rise in support of the Humphrey-Hawkins legislation, as amended. I join my distinguished colleague from Indiana urging Republicans to be for this bill.

Neither Government economic planning for the private sector nor an endless stream of make-work public service jobs have a place in our economy.

Mr. PROXMIRE. Mr. President, will the Senator yield to let us have the yeas and nays on passage?

Mr. JAVITS. The yeas and nays, Mr. President.

Mr. PROXMIRE. Mr. President, I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second?

There is a sufficient second.

The yeas and nays were ordered.

Mr. PERCY. Mr. President, therefore I opposed from the beginning the original version of the Full Employment and Balanced Growth Act and pointed out to my distinguished colleagues who were supporting that version why I opposed it, why I felt it was impractical, why I felt it would never be adopted by this Congress.

But I do believe in the importance of establishing goals for ourselves as a Nation. I believe also that the new Humphrey-Hawkins bill will provide a useful and effective framework of economic policy goals within which policy decisions can be made by the President, Congress, business and labor working together.

Therefore, I am pleased to support this bill and was proud to serve on the coalition that helped shape the final version of the bill.

Working with Senators JAVITS, DOLE, LUGAR, HATCH, NELSON, PROXMIRE, WILLIAMS, SARBANES, CRANSTON, HUMPHREY, and KENNEDY, and occasionally with others, and with the support and help of Senator BAKER and Senator ROBERT C. BYRD, I think that this effort has been a noble one. Every single Senator could,

of course, not endorse every feature and provision of it. Many of us had other provisions we might have liked to have seen in it, and certainly the bill has not made everyone happy; even the original supporters of the Humphrey-Hawkins concept are unhappy about certain phases of this bill.

However, I do believe very strongly that this bill as it now stands is as effective a compromise as can be worked out and implemented in this Congress.

As a businessman for 25 years, I have never once begun a new year without first working with my fellow officers and directors to develop a plan and a set of goals for the immediate year.

In my 12 years in the Senate, my staff and I have continued this procedure. In those 12 years, a good deal of my time has been spent in trying to bring this and other sound business practices into the Federal Government. The Budget Reform Act, now law, sunset, the Government Accountability Act, and the Regulatory Reform Act, are good examples of congressional efforts to provide a commonsense framework for policy decisions. All have now been adopted by the Senate.

Certainly, I know that there has been legitimate and honest concern about whether there is too much planning and whether there should be planning in the Federal Government. But I would say that any organization the Senator from Illinois has worked with, whether it be a charitable organization, whether it be a philanthropic organization, whether it be universities, whether it be corporations, they all plan ahead. They have looked back from whence they have come. They have planned for the present and they have looked and thought into the future. There is no reason why the Federal Government should not do the same thing.

The Humphrey-Hawkins bill, can perform valuable functions in the area of economic policy planning and the coordination of all Government machinery related to economic policy. It builds on the foundation provided by the Employment Act of 1946, the last major statement of economic policy written into law in this country. In 32 years, however, our economic tools, our aspirations for ourselves and our families, and our capabilities as a nation have increased. The Employment Act must be modernized to reflect these changes and our present deep concerns about inflation and taxes that are a disincentive rather than providing an incentive for adequate capital formation to back up necessary growth of private sector jobs.

I am absolutely committed to reducing unemployment in this country, particularly among minority youth, as so many of my colleagues have eloquently expressed during the course of the day.

The continuing high jobless rate among people in this group is tragic and alarming. But inflation has surpassed unemployment as our nation's number one problem. Both have taken their toll on the American people in recent years, particularly those on the bottom rung of the economic ladder. Both problems must be dealt with at once.

The cost of full employment need not be inflationary and the price of fighting inflation need not be unemployment.

We can and must make a firm national commitment to fight both. Unemployment is a problem in itself, as well as a symptom of a broader economic malaise. Incorporating an anti-inflation commitment into this bill broadens our ability to respond to a whole range of factors which affect unemployment.

The central thrust of this bill is and remains unemployment.

Unemployment can be reduced without aggravating inflation.

Unemployment can be reduced without aggravating inflation, if we increase productivity, eliminate costly and unnecessary Government regulations, and expand the amount of private sector capital available to business for the creation of new jobs. I am pleased to see that all three of these concerns—but particularly the latter—will now be part of the Humphrey-Hawkins bill.

And I was very appreciative of the coalition for accepting the insertions that I have made into the bill dealing with the formation of capital necessary to create private sector jobs. After all, it was Hubert Humphrey and I cosponsored with him as the principal Republican cosponsor the Investment Policy Act of 1977. It was Hubert Humphrey who had the genius to see that private capital formation was essential to create the 9 out of 10, 7 out of 8, or whatever it may be, private sector jobs that must be created to combat unemployment.

I believe that at least 80 percent of new jobs in our economy should be in the private sector. Therefore, although there had been a capital formation provision in the bill, I believed that our commitment to the expansion of private investment capital should be strengthened to emphasize even more the primary importance and desirability of private sector employment. I am delighted that this bill now incorporates such a strong commitment. I would add here that the investment policy language in the bill is taken from language drafted by Hubert Humphrey himself and introduced as a bill, the Investment Policy Act, by Senator HUMPHREY and myself in the last two Congresses. It is a fitting tribute to Hubert that this has been incorporated into the one bill closest to his heart.

Passage of the Humphrey-Hawkins bill is an important step toward marshalling the resources of the Federal Government in the fight against unemployment and inflation. And on behalf of a more stable economy.

I cannot conclude my remarks, Mr. President, without a reference to my friend Ralph Metcalfe, our recently deceased congressional colleague from Illinois, whose funeral I will be attending tomorrow. As a member of the Black Caucus, and as a human being sensitive to the needs of others—particularly the unemployed—he was an active supporter of the bill.

A few months before his death, he made this statement about the bill:

> Achieving a state of equality for all Americans requires a transition from a movement for equal rights for an oppressed minority to a movement for economic and social justice for Blacks, minorities, and all the poor. The economic issues that form the present agenda for racial progress are less dramatic than the struggle for the right to sit at a lunch counter or the struggle for the right of every citizen to vote. The brutality is less visible when Black teenagers cannot find work than the brutality when a civil rights marcher is set upon by dogs. You and I know that the damage is just as real.
>
> The economic agenda requires a continuing, all-out, unrelenting policy for full employment in this country. I can proudly say that I co-sponsored the Humphrey-Hawkins Full Employment and Balanced Growth Bill, which passed the House this year.

Earlier today I mentioned the human tragedy we all witnessed during the depression, many of us with members of our own family, our own fathers who week after week, month after month, were unable to find employment. What this did to the human soul was just impossible to describe. What we are saying is this is a symbol of hope for the future; that the full force and might of our entire economy is going to be put to work on this problem.

Mr. President, I am proud to follow in Ralph Metcalfe's footsteps as a supporter of this legislation.

It is a wonderful tribute to him, and to our beloved friend Hubert Humphrey. My vote for this bill is my personal tribute to them as well as an expression of my support for the principles in the bill.

Mr. JAVITS. I yield a minute to the Senator from Utah.

Mr. HATCH. I thank the Senator from New York.

Mr. President, if ever there was a time begging for a thoroughgoing reconsideration of both the theory and practice of economic policymaking, this is it. If results mean anything, then the philosophy and economic policymaking which have prevailed since the 1960's have been a national disaster. We have achieved what during the Eisenhower years, for example, was thought unachievable—we have brought about through clever Federal economic manipulation both high rates of inflation and high rates of unemployment. These have been accompanied by other fruits of Federal policymaking: Specifically, a national productivity slowdown; subpar gains in real wages; and a sharp drop in the international exchange value of the dollar. Economically, we have become a poorer and weaker nation.

If the legislation we are asked to consider, H.R. 50 as adopted and modified by the Senate really represents a departure from this masochistic trend in Federal economic policymaking, I would be among the first to welcome it. I believe we need drastic change, and I would certainly support and do all that I physically could to promote a bill promising to return us to sounder economic principles. But this legislation, this Humphrey-Hawkins bill, to the extent that it is based on the belief that we have now accumulated the wisdom to create a wholly new framework for economic policymaking which, we may confidently expect, will lead to better results in the future, it merely substitutes a new illusion for the old.

Actually, H.R. 50 is not quite either of

these two alternatives. It has relatively little to say about the substance of economic policy, and that little is not very new. The suggestions for policies to be considered in improving the state of the economy are mainly reworked versions of policies that have been tried, without much success, during the past decade.

This point is not raised with the intention of urging that a large new substantive economic content should be added to the proposed legislation. We clearly are not ready for that. Events have given all of us an extensive and valuable economic education during the past decade. But it has been mainly education of a negative kind. We have learned a lot about economic programs and policies that do not work and that is hardly a firm basis for establishing in law a bold new program for the conduct of economic affairs.

The bill is devoted mainly to establishing new intragovernmental procedures for the development of economic policy. These new procedures are elaborate and, one has to say, cumbersome. Some doubt is justified that this is the way to get to the heart of the economic problems that plague us.

Intellectual modesty is appropriate for all of us, in and out of Government, who are concerned with the formulation of economic policy. The events of recent years have given us so much to be modest about. I wish that evidence of such modesty were more visible but, in any case, modesty is not a satisfactory base for radical revision of our fundamental legislative guide to the development of economic policy.

The objection may be raised that, like it or not, since existing procedures for policy development have not achieved the desired result, we have no choice but to develop a brand new approach to the problem. But present law—the Employment Act of 1946—allows plenty of leeway for shifts in the approach to policy formulation as conditions change and experience accumulates. It is the proposed new legislation, H.R. 50, that threatens to lock us into a new rigidity.

Perhaps the most serious danger involved in H.R. 50 is not that it offers so much in the way of fundamental change in how Government carries out its economic responsibilities but that on its fact at least, it does so little to change the unsuccessful practices of the past. Somehow the public has obtained the opposite impression—high hopes have been built up that this legislation will usher in a new economic era in which all problems will be solved. It is widely described in the press as "landmark legislation." Since these expectations are bound to be disappointed, the end result could be severe damage to the national morale, constant pressure for more extremist policies, and further deterioration of the econmy.

For these, and other reasons which will be explained in what follows, I must urge that Congress not enact legislation of this character. I hope it will be clear that my opposition is not based on a generalized aversion to innovations in governmental policy. To the contrary, new departures from the practices which have prevailed in recent years are desperately needed. But it is not the limitations of the Employment Act of 1946 which has impeded us in finding and adopting new approaches. It is H.R. 50 and related bills which would create a new orthodoxy and solidify an elaborate set of policy-making procedures that will further impede the search for new directions.

MULTIPLE ECONOMIC GOALS IN H.R. 50

In its general statement of national economic goals H.R. 50 takes a somewhat broader view than the original Employment Act of 1946. This is neither objectionable nor surprising, since the 1946 act was rather narrowly focused on fears of a return to the special conditions prevailing in the decade of subpar economic performance preceding World War II. Our problems in the 1970's have turned out to be less severe, but more diverse and just as intractable.

Where the original act simply directed Government to "promote maximum employment, production and purchasing power," H.R. 50 would change "maximum employment" to "full employment" and add as additional goals "real income, balanced growth, adequate productivity growth, proper attention to national priority needs and reasonably stable prices." At other points, H.R. 50 calls for: "better management, increased efficiency, and attention to long-range as well as short-range problems" in the policies and programs of government; and "high rates of capital formation." A number of other goals are scattered through the text of H.R. 50.

There is little in this list of general goals that can be regarded as exceptionable, in the sense that anyone would find attainment of any of these as undesirable. A minor quibble can be raised regarding inclusion of "balanced growth," which seems to have become a popular cliché with no clearly defined meaning.

The major question posed by the goals set forth in H. R. 50 is why anyone should think it necessary or helpful to set them down in legislative language. These have been the de facto if not the de jure aims of national economic policy for many years. Any of our recent President's would surely have been happy to go down in history as the man who finally reconciled low levels of unemployment with low levels of inflation, with or without a legislative directive for doing so.

Enactment into law of these general goals might make sense if at lease one of the following two conditions prevailed:

First. The economic means for attaining these goals were well understood and generally agreed upon, and all that had been lacking was a will on the part of government for undertaking the job.

Second. A breakthrough in economic wisdom had suddenly occurred which made attainable what was previously unattainable.

Neither of these conditions holds.

PROCEDURAL REQUIREMENTS

Having described general economic goals, H.R. 50 turns over to the President the problem of how to achieve them. At least, it is left up to him to take the first step in converting the general goals into numerical targets and program proposals.

I wonder what is gained by such a legislative directive to the President. Any President who was confident that he knew how to attain all the good things mentioned in the Act would hardly keep his knowledge concealed. The only real effect of the requirement is to compel a President who does not know how to reach the Act's goals nevertheless to propose a program for doing so.

As things stand, the annual economic reports of the President, and of his Council of Economic Advisers, do almost invariably discuss the subjects listed in H.R. 50 as goals and to the extent feasible, suggests ways of dealing with them.

Numerical projections for future years are made of the major indicators of economic performance and, since these are in accord with what the President hopes to achieve by the programs he has recommended, they are, in a realistic sense, targets. These procedures are well established by custom and the fact that they are less formal than those required in H.R. 50 is an advantage rather than the reverse.

The procedures within Congress, as established in H.R. 50 are complex and multilayered. The President's report is to be forwarded to all the standing committees of both Houses, which are to report on their reactions to it to the Joint Economic Committee. The members of the Joint Committee from the Senate, and those from the House, are then, separately, each to recommend a concurrent resolution on the subject to their own branch of Congress. The House and the Senate, separately, is each to consider and act on its own version of the concurrent resolution. The whole process is to culminate in a conference report reconciling the two versions of the concurrent resolution, and both Houses will have to act on it. All this is to be done every year.

In this legislation Congress would be imposing an enormous body of additional work upon itself. Perhaps Congress is willing to assume that burden, but the real question is what kind of economic policy would emerge. If a camel is a horse designed by a committee, what kind of monstrosity would this multilayered operation produce?

THE 3 TO 4 PERCENT UNEMPLOYMENT TARGET

For the most part, H.R. 50 leaves to the President the conversion of its general goals into specific numerical targets and programs. The notable exception is the setting forth in the act itself of numerical targets for reduction of the unemployment rate: The President is required to set this unemployment objective at 3 percent for adults and 4 percent for the civilian labor force as a whole, in or before the fifth calendar year after the first Presidential report under the act.

True, the President may recommend modifications in these numerical goals, beginning with his third economic report after enactment, and Congress may then "* * * take such action as it sees fit." But any such modification would surely

be a traumatic political event, especially since the 3 to 4 percent goal would have been allowed to stand for a period of more than 3 and possibly almost 4 years. After that length of time the public would surely regard modification of the employment goal as betrayal of a promise.

One can, of course, take the attitude that all the act commands is the setting of targets; it does not command that the targets be attained, or impose any penalties for failure to do so. I trust, however, that Members of Congress will not take any such cynical attitude toward their legislative responsibilities. There is little point, and grave danger, in enacting into the law of the land an unemployment target if it is virtually impossible of attainment, or possible of attainment only under unacceptable conditions of inflation.

It is not clear what, if any, analytical basis exists for the choice of 3 to 4 percent as the unemployment goal—instead of, say, 2 to 3 percent or 4 to 5 percent. Have the authors of this bill simply seized upon figures which look good in print, have a tradition of acceptability, and seem to have become popular in public discussion?

A further complication arises from the fact that a national commission, established by Congress, is now at work considering the need for a revision of the concepts and methodology used in computing the unemployment and manpower statistics. Their assignment is a wide one and it will be surprising if they do not recommend important changes. We are quite likely to find, sometime in the future, the 3 or 4 percent measures of unemployment have an entirely different significance than they have at present.

Leaving that complication aside, it does not appear that 4 percent unemployment in the civilian labor force is a realistic goal for noninflationary unemployment, or that it ever was during the past quarter century. In the 1955–57 period unemployment did get down to the neighborhood of 4 percent, but only to the accompaniment of an accelerating inflation, which, however, now appears as a minor inflationary incident in the light of subsequent experience. In the late 1960's unemployment held below 4 percent for a period of 4 years—during which the inflation rate accelerated alarmingly. Since then, unemployment has never got even close to 4 percent. It did get, briefly and barely, below 5 percent in 1973—the onset of double-digit inflation.

Progressively, over the entire period since the Korean war, demographic trends—and other developments—have been against us in efforts to reconcile 4 percent unemployment—total-labor force—with reasonable price stability. Our prospects for attaining the numerical objectives of S. 50 have reached the vanishing point.

THE RELATION BETWEEN UNEMPLOYMENT AND INFLATION

Crude conceptions of a calculable trade-off between unemployment and inflation, prevalent a decade or so ago, are now in disfavor but they did much damage while they lasted. Toleration for inflation, as a means of holding unemployment down, has been a losing game and we have wound up losing ground in both respects. It is not that Government officials, consciously and explicitly, advocated accepting inflation as the price to pay for high employment, but there was a tendency to take all the risks on one side.

Hopefully, that era is now over, but it would be a mistake to assume there is no connection whatever between unemployment rates and inflation rates. A deeper penetration of the subject now indicates that there is such a relationship, but that it functions rather as a limitation on what can be achieved by economic policy, than as an option which gives us scope for policy choices.

The connection between the unemployment rate and the inflation rate is more subtle than had previously been supposed. We cannot simply read off a chart, with reasonable accuracy, what particular rate of inflation we must tolerate in order to achieve a specified unemployment rate. The relationship is between the acceleration in the rate of inflation, and the level of the unemployment rate. In other words, once unemployment is pushed and maintained below some trigger rate, the inflation begins to become more rapid each year than the year before.

This is, of course, precisely in accord with our experience of recent years. It also puts an entirely different face on the matter. Toleration of inflation as a means of lowering unemployment can no longer be regarded as a practical option for policymakers. Although opinions may differ as to what rate of inflation is tolerable as the price to pay for lower unemployment, an inflation which is allowed to grow continuously more rapid must eventually exceed anyone's limit of toleration.

What is the trigger rate of unemployment that sets off an accelerating inflation? Although the experts have approached the question in widely differing ways, there is a surprising degree of consensus in their findings. The "safe" rate of unemployment—the lowest rate which does not set off an accelerating inflation—lies in the range of 5.5 to 6.0 percent. Later in this speech I intend to discuss in greater detail the research that has led to this stunning discovery.

In this light, the 4 percent unemployment goal—total civilian labor force—set forth in this bill is entirely unrealistic. In fact, with unemployment at 6 percent last month, we are already at the upper edge of the zone of inflationary tightness in the labor market.

I do not mean to imply that the 5.5 to 6 percent "safe" range of unemployment is an unalterable limitation imposed on us for all time. In fact, it is clear that the noninflationary rate of unemployment has changed by about 2 percentage points over the past quarter century—unfortunately in the wrong direction. It is reasonable to hope that in the future we will be able, both through more favorable demographic trends and through deliberate action, to reconcile a substantially lower rate of unemployment with reasonable price stability than is now possible. But the changes in underlying conditions necessary for that to happen occur slowly and the time required must be measured in decades rather than years.

In principle, an effort to create and maintain unemployment rates as low as those set in H.R. 50 would set off an accelerating inflation that would finally become astronomical. I do not, however, think that things will work out precisely that way. My expectation is that, in the foreseeable future, we are not likely to get either the 3 to 4 percent unemployment stated in the act or the astronomical inflation a persistent effort to achieve them would bring. Rather we are likely, if this act is passed, to see a repetition of the stop-go economic policies of the past dozen years—with both inflation and unemployment getting progressively worse with each turn of the cycle. Surely, our painfully acquired economic experience since the mid-1950's should have taught us to do better than that.

STRUCTURAL ECONOMIC POLICIES

In H.R. 50 there is a heavy emphasis on "structural" economic policies. This is to be welcomed as a healthy shift from the previous emphasis on aggregate-demand management as the key to creating and maintaining prosperity. If ever we are to create conditions in which unemployment levels substantially below the present limitation of 5.5 to 6 percent are feasible, sustainable, and compatible with price stability, it will be through changes in the structure of society and the labor market.

In the act, and in common parlance, the term "structural" has taken on a broad meaning, referring to all aspects of economic policy except the management of aggregate demand. Perhaps our academic brethren can refine the semantics for us but, for present purposes, I accept this broad interpretation.

There is, however, danger that we may be encouraged to expect too much too soon from this new attention to structural factors. There are limitations on what government, in a free society, can do to influence the underlying social structure we have to deal with. Demographic trends must largely be taken as given. Basic attitudes, which affect employability, change in ways that are only dimly understood and which usually surprise us when they occur.

Government can, presumably, make a contribution to the improvement of basic education and practical skills, although there is little on the record which encourages us to believe that we know how to do this on any large scale. In any case, the results of even successful efforts of this nature are likely to be achieved on a time scale to be measured in generations rather than years.

H.R. 50 outlines a number of employment programs, governmental, and/or governmentally financed. There is not much that is basically new in these programs although new vocabulary and new administrative procedures are introduced.

Clearly these programs are meant to be

a means for improving the employability of individuals, rather than to be a major ongoing form of job creation. There is substantial danger that they might become the latter, but leaving that aside there is a more basic problem with such governmental efforts. Too much government assistance to an individual is likely to detract from, rather than add to, his employability. It is an entirely different thing to hold a job because of a general government policy which asserts that it is desirable that we should have one, than to hold a job because a specific employer needs us and finds we are worth what we cost. The individual himself knows that and prospective future employers know it.

The act directs that the reservoir jobs created under it shall be "useful and productive." This forthright declaration is welcome but—is there any adequate test of usefulness and productivity outside the free market place?

The conclusion has to be that, while employment programs of the type described in title II of H.R. 50 should continue to be experimented with, great caution should be exercised if they are not to be counterproductive in our effort to achieve a better reconciliation between high employment and price stability. Whatever they may eventually contribute to the goals of H.R. 50, they cannot have much impact over the timescale contemplated therein.

A PERSPECTIVE ON ECONOMIC ACTIVISM

Since H.R. 50 is a major reopening of the fundamental legal guide to economic policymaking, a broad-gage comment may be appropriate. The whole spirit of this legislative proposal is that government should "take charge" of the economy and so direct it that it will achieve the goals government chooses to set for it. In other words, it is a call for continued and intensified government activism in the economic field.

History has provided those of us who are empirically minded with, in effect, a controlled experiment on the effects of economic activism. The quarter-century since the Korean war divides itself rather neatly into two periods: the "limited-role-for-government period," extending from 1953 to 1964; and the "intense-economic-activism" period of 1964 to the present.

The year 1964 is a natural breaking point between the two eras. It was the year of the war against poverty, and the Gulf of Tonkin resolution which started us on our guns-and-butter approach to Vietnam war financing. Above all, it was the year of the new economics—the belief that management of aggregate demand through fiscal and monetary policy was the means of steering the economy along a steady course between recession and inflation. You will remember the chorus of self-congratulation in 1964 to the effect that "We now know how to manage a modern economy." As events cast doubt on this confident assertion, the aggregate-demand approach was supplemented by an abortive "guidepost" policy in the 1960's, and a near disastrous experiment with wage-price controls in the early 1970's. The fundamentals of demand management were nevertheless preserved throughout this interval. Hardly a year goes by without a new call for economic stimulation. The proposal of new forms of "incomes policy" has become a year-round pastime. It has been an era of constant new initiatives in economic policy.

By contrast, the period from the Korean war to 1964 was one in which relatively little happened in new governmental initiatives. The philosophy and practice of that time envisioned a much more limited economic role for government.

This makes it natural to compare economic performance in the two eras. The results are striking. In the period 1953–64 the unemployment rate was lower, consumer prices increased at a 1.4 percent annual rate, economic output grew 3.2 percent a year, and productivity increased 3.1 percent a year. During the intense economic activist period from 1964 to the present the unemployment rate has averaged 5.8 percent a year, consumer prices have grown 5 percent annually, economic output has grown only 2.8 percent annually, and productivity has been cut in half. By practically every significant economic criterion, performance in the limited-role-for-government period was markedly superior to performance in the intense economic-activist period.

Thus, it is hard facts rather than ideological prejudice which leads me to question the desirability of a high degree of government involvement in economic affairs. We have more to fear from excessive government attention than from government neglect. The Humphrey-Hawkins approach is based on the assumption that more—government—involvement is better, while experience keeps proving the opposite. Changes should be made in the basis for ongoing formulation of national economic policy, but H.R. 50 does both too much and too little in that respect. It offers the public false hopes which will surely lead to disappointment, confusion, contention and governmental hyperactivism. It is far better to leave changes in our methods for economic policy to a natural development, and the prospects are now excellent that this will lead to better results in the future.

Earlier I said that analysis by some of the Nation's most respected economists and by the Council of Economic Advisers indicates that the bill's unemployment goal is achievable only at the cost of severe inflationary consequences. Since this conclusion casts doubts on our ability to achieve the goals of Humphrey-Hawkins I would like to review their analysis and findings.

All the studies I will review are attempts to determine the noninflationary rate of unemployment (NIRU). NIRU is defined as a critical rate of unemployment such that, as long as unemployment does not fall below it, inflation can be expected to decelerate; if unemployment does not fall below it, inflation can established by the Government. If the unemployment rate equals this level there will be no change in the inflation rate. In other words, NIRU is the "lowest rate of unemployment attainable, under the existing institutional structure, that will not result in accelerated inflation."

Another employment concept that should be mentioned is the full-employment/unemployment rate. This is simply the target rate of unemployment that is established by the Government. If the Humphrey-Hawkins bill becomes law, it will set a full-employment/unemployment rate of 4 percent, which is far below the NIRU. This, as indicated in the NIRU definition above, means that attempts to achieve the full employment goal will lead to accelerating inflation.

It should be made clear at this point that this does not mean that the pursuit of an unemployment goal below the noninflationary rate should be given up as an aim of policy. Specific programs directed toward the structure of the labor market may indeed prove useful in reducing the unemployment rate consistent with nonaccelerating inflation. These programs may improve the mobility of the labor force or possibly increase the educational level or productivity of workers. These programs, however, may take many years to perfect and it may be perhaps, decades before their employment impact is realized. Thus, the utility of these programs for reducing unemployment in the short period provided in the Humphrey-Hawkins legislation is severely limited. Recourse to aggregate demand policies or inefficient make-work programs, however, will only reduce unemployment below the critical NIRU level at the cost of accelerating inflation.

Conscientious research reveals that NIRU changes over time and that 1957 was the last year in which the 4 percent full-employment unemployment rate established by Humphrey-Hawkins was compatible with NIRU. More precisely, NIRU has increased every year since 1957. Research indicates that this constant increase is attributable to such demographic factors as changes in the composition of the labor force and to such legal provisions as changes in the minimum wage level and changes in welfare and unemployment benefits. Practically all attempts to measure NIRU place it in the 5.5 to 6.0 percent range.

As mentioned above many factors have been cited as contributors to the constantly increasing NIRU and several methodologies have been employed in an attempt to measure NIRU. It is noteworthy that all these endeavors have come up with parallel estimates of NIRU. Mention should be made here of the factors that have increased NIRU and the various methodologies used by researchers to estimate it.

The dominant cause of an ever rising noninflationary unemployment rate is the changing composition of the labor force due to an influx of women and young workers. The proportion of women in the labor force has increased from 31 percent in 1956 to 42 percent in March 1978. This is reflected in a rise in their participation rate from 37 to 49 percent. The proportion of young workers—16 to 24 years old—has increased from 17 percent in 1956 to 23 percent in March 1978. Women and young workers tend to have higher unemployment rates as they

enter, leave, and reenter the labor force and shift between jobs. The higher participation rates and unemployment rates of these groups makes for a higher overall unemployment rate. Estimates of the impact of women and young workers on NIRU have ranged from 0.5 to 1 percent.

Changes in the cost of being unemployed have also impacted on the NIRU. The cost of being unemployed is the difference between the market wage rate and transfer payments, that is, food stamps, in-kind transfers, unemployment compensation, and welfare payments received by the unemployed. Evidence indicates transfer payments have been increasing relative to market wages in the last 10 years. As the cost of being unemployed declines the incentive or urgency to find work declines. The unemployed stay jobless longer and the unemployment rate rises. Estimates are that this factor has increased NIRU by 0.3 to 0.5 percentage points.

In 1972, Congress required mothers receiving welfare who were able to work to register for employment. This swelled the unemployment rolls and added an estimated 0.2 percentage points in NIRU.

Finally, the ever higher minimum wages have also increased NIRU. Employers are less inclined to hire young and marginally skilled workers whose productivity is not sufficient to make them attractive as employees at the higher minimum wage. The increased minimum wage, in addition to the greater coverage of the minimum wage laws, has added an estimated 0.7 percentage points to NIRU since 1956.

The above are the major demographic and legal factors that are cited as reasons for the rising noninflationary rate of unemployment. All told these factors have added approximately 2 percentage points to NIRU. Other factors, such as, increased manpower programs have reduced NIRU by 0.2 percentage points. The net change then, is an addition of about 1.8 percentage points to NIRU.

Most researchers agree that the 1956 unemployment rate of 4.1 percent was the NIRU of the time. If the 1.8 percentage point increase in the full employment rate is added to the 1956 NIRU we find that the present NIRU is almost 6 percent.

Three distinctive methodologies have been utilized in an attempt to estimate a current NIRU. These methodologies are outlined below.

One scheme that has been used is basically the same as that which was outlined above. This procedure attempts to determine the NIRU at some point in time, usually 1956, and then calculate how much this "base" figure has increased over time in order to arrive at a current NIRU. The 1956 unemployment rate is usually chosen as the "base" figure because the period 1955 through 1959 seems to illustrate a classical example of NIRU. In this period the Nation experienced accelerating inflation as the unemployment rate fell towards 4.1 percent; as the unemployment rate leveled off at about 4.1 percent the Nation experienced no change in the inflation rate; and in subsequent years as the unemployment rate rose above the critical 4.1 percent rate, inflation decelerated. Hence, most researchers adopt an unemployment rate of 4.1 to 4.3 percent as the 1956 NIRU.

The demographic and legal factors listed above that have increased the unemployment rate since 1956 are then added to the base figure of 4.1 percent to get an updated NIRU of almost 6 percent.

The Council of Economic Advisers has made a similar calculation and arrived at a comparable estimate of NIRU:

> Using available data on labor force composition and unemployment rates, and adjusting for the increased proportion of young persons in the labor force and for the increase in their unemployment rate relative to adults, the CEA has estimated that the NIRU equivalent to 4 percent in 1955 is now 4.9 percent.

Furthermore the CEA stated:

> The effects of many of the other factors which are believed to influence NIRU are much more difficult to quantify, but it is likely that they have raised NIRU even higher than the current estimate, perhaps closer to 5.5 percent.

Finally, the CEA said:

> The current benchmark estimates incorporate only the effects for which evidence is substantial. As further evidence becomes available the current estimate of NIRU might be even further refined.

To summarize then, several economic researchers using distinct methodologies have come to very similar conclusions concerning a noninflationary rate of unemployment. All have found this value to lie in the 5.5- to 6-percent range. The conclusion that should be drawn from this is obvious.

Attempts to achieve a full employment goal which is almost 2 percentage points below NIRU will touch off an accelerating inflation that will have a devastating impact on the entire economy. Given our present economic wisdom, the goals of 4 percent unemployment and reasonable price stability are clearly incompatible and should be rejected.

Mr. President, in my judgment this bill will not work because of its fatal flaws and that is the reason for my opposition. I will admit that the leadership substitute, which the ad hoc negotiating group of Senators so diligently put together, represents an improvement over the Human Resources Committee version of its House counterpart. The substitute, which I was privileged to have a vote in shaping, is a far more balanced and fair approach to our national problems of unemployment and inflation and lends greater credibility to the concepts envisioned by Senator Humphrey and Congressman HAWKINS. Despite these improvements which I have every reason to believe the House will accept, it is a bill which holds out promises and hopes for millions which can never be realized.

I ask unanimous consent that a recent Washington Post editorial denouncing this bill be printed now at the conclusion of my remarks.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

HUMPHREY-HAWKINS, AGAIN

The Humphrey-Hawkins bill, which sets a firm target of a 4 percent unemployment rate, to be attained by 1983, provides a nice illustration of the political dilemma that will dog President Carter over the next couple of years. As he tries to lead the country toward fiscal rigor and a lower inflation rate, he cannot help treading painfully on his party's traditional inclinations and sensitivities.

Any sustained drive to get unemployment down to 4 percent would be wildly inflationary. Mr. Carter understands that point perfectly, and he responds by dancing back and forth around it. On some days he describes the fight against inflation as his top priority, and on other days he renews his endorsement of Humphrey-Hawkins. This performance feeds the accusation that the administration has not established any clear and comprehensible direction in its economic policies.

The bill is being pushed mainly by the Congressional Black Caucus in response to a genuine and grievous social malaise. Unemployment rates among blacks run generally about twice as high as among whites, and the rates for blacks in their teens run around 40 per cent. Black politicians believe that the only effective strategy is to force unemployment for the whole country so low that the rates for blacks will necessarily be drawn into the tolerable ranges.

Unfortunately, it won't work. The unemployment rate in August was 5.9 percent. If it were to fall much below 5.5 per cent, it would begin to generate a great surge of wage inflation. Why? Because employers will bid against each other for skilled manpower before they will hire the unskilled. Unemployment in this country today is not a simple matter of not enough jobs. It is, above all, the threshold difficulty of entering, or reentering, a sophisticated and demanding economy.

The inflationary implications of the bill have brought it to a standstill in the Senate. It now exists there in three versions. One, reported by the Banking Committee, adds a requirement that, as unemployment descends, the inflation rate must also be brought to zero by 1983. There you have the dilemma. If the bill is passed in the House version, in deference to the Black Caucus and Democratic Party tradition, it threatens to undercut the new and urgent necessity to reduce inflation. If the bill is passed with the zero-inflation requirement, it becomes merely absurd. The chance of a zero rate of inflation within five years is as remote as, unfortunately, a 4 percent unemployment rate.

In either case, Congress would try to establish goals by legislation that are obviously unattainable in reality. Humphrey-Hawkins is a bad bill for a fundamental reason: The U.S. government ought not make promises that it cannot keep, and that it knows it cannot keep.

Mr. PROXMIRE. Mr. President, I yield such time as she may require to the distinguished Senator from Minnesota, the author of the bill who has done such a fine job.

Mrs. HUMPHREY. Mr. President, I want to thank the distinguished Senators on both sides for their cooperation, their long hours of hard work, tough decisions which were made, and which take a long time, and a lot of consideration for the people at home, for their political feelings on both sides. I know what it takes.

It was a hard workout for me and for a good many of the others. I know now what it is to truly work as a Senator who can be involved in something that you care a great deal about. But at long last we worked out a compromise so that we now have, I feel, a Humphrey-Hawkins bill on the floor of the Senate.

I am always sorry that I get so emotional about these things. I have to apol-

ogize to my fellow Senators for this because it is a late hour. I do not ever mean to do that but it happens now and then.

I also want to thank the majority leader and the majority whip, especially, for their invaluable help in working with me and then encouraging all of us to sit down and come to a workable solution.

I thank the minority leader for his special help in all of this background work.

I also thank the leaders and the full membership of the groups of the coalition for this bill to obtain full employment. Without their support and cooperation, we would not be where we are today. Seven years have gone into the formation of the Humphrey-Hawkins bill as it now comes before us. The House of Representatives passed H.R. 50 on March 16. The vote was 257 to 152. It so happened that I was on the floor of the House at the time when that vote was taken and the bill was passed. It was one of the most exciting things and thrilling, satisfying, and meaningful events in this eventful year for me.

It was I felt a very emotional time for a good many of the Congressmen and it certainly was one for me.

As a result of that I have been working ever since in helping to create and pull together a workable, good bill that we could all feel proud of when we passed it here in the Senate.

Mr. President, the Full Employment and Balanced Growth Act of 1978 is one of the most important pieces of legislation the Senate will act on this year. I believe it should occupy this position because it makes the goal of achieving full employment with price stability, the permanent centerpiece of national economic policy.

Mr. President, there has been much debate about what this bill does. For the convenience of my colleagues. I would like to briefly review what it will accomplish.

The bill would affirm in law, for the first time, the right of every American willing and able to work, to useful employment paying decent wages.

It would commit the Federal Government to the goal of reducing overall unemployment to 4 percent—3 percent for workers 20 years old and older—within 5 years following enactment and to further reduce unemployment thereafter.

It requires the President to annually propose to Congress the short and medium-term employment, production, productivity, and real income goals, together with the comprehensive, coordinated fiscal, and monetary policy and program mix, aimed at achieving these objectives within the framework of the 5-year unemployment goal of the bill.

This legislation would require the Federal Reserve to report annually its intended monetary policy for the years ahead and estimate its impact on the numerical economic goals presented by the President.

It places first emphasis on creating and sustaining the kind of economic climate that will promote maximum activity and job opportunities in the private sector. And it states a clear prohibition against interference with private business activity.

The Full Employment and Balanced Growth Act would recognize in law a fundamental reality of our economy today; namely, that unemployment and inflation feed upon each other and that, as a result, methods must be used to reach our goals that reinforce their achievement and do not sacrifice progress on one in the name of achieving the other.

Finally, the bill would require that the Federal Budget be directed toward the achievement of the economic goals provided under the bill and be fully supportive of these goals.

Mr. President, the heart of the Humphrey-Hawkins bill can be summed up in the following question: Do we continue to stumble from recession to recession and accept the appalling burden such circumstances impose on millions of Americans, or do we embark on the coordinated effort prescribed in the bill and use its goals to define the direction in which we must move and the progress we make in doing so?

As challenging as they are, I believe the goals set forth in the bill can be reached. The real question, I believe, is whether the Government of this Nation has the will and the courage to make the effort. If the Senate passes this legislation, it will have gone a long way toward answering that question in the affirmative, and in charting a new course of full employment, full utilization of all our resources, and reasonably stable prices for America for decades to come.

I have two quotes from a speech that Hubert gave on the Hubert Humphrey-Hawkins bill. It is hard to say it without having "Hubert" in there first.

I just do want to say that one of the reasons, the main reason I think, one of the main reasons, at least, that I accepted my position when it was offered to me as a Senator, was to carry on the work that Hubert had done to obtain this ideal of his that he had worked so hard for over the years. His quote is:

> Can we ask several million of our fellow citizens to stand quietly in line year after year without hope or even the knowledge that their government will do whatever it takes to satisfy their fundamental human right to a means of earning their livelihood? Can we ask a permanent underclass of unemployed Americans to bear the heavy burden of our nation's economic failures?
>
> The Humphrey-Hawkins bill is a first step, but an indispensable one, toward an era of full employment, steady economic growth and reasonable price stability. It is no panacea. It is no miracle cure. With it, national economic policy will be required to be directed toward achieving specific, measurable economic goals. Without it, we are likely to continue to flounder, bounding from recession to slow growth and back to recession again, with all of the tragic waste that such a future holds for all Americans.

I thank the Senate very much. I yield to the Senator from West Virginia.

Mr. ROBERT C. BYRD. Mr. President, first let me congratulate Senator HUMPHREY on the very moving and excellent speech that she has made. It may very well be her last speech in this body, by her own choice. We regret that she chose not to run to retain the seat which she has so effectively and so graciously held.

All of us revered Hubert Humphrey and all of us realize that he will continue to be thought of as one of the truly great Senators of all time. But Senator MURIEL HUMPHREY has filled that spot in a very special way. She has been most gracious in her work with other Senators, extremely cooperative with the leadership of the Senate, and always untiring and delightful to work with. She ought to be given tremendous credit for this bill which is about to pass the Senate. The bill would not have been brought up, in my judgment, if it had not been for Senator MURIEL HUMPHREY.

The amendment which she offered earlier this afternoon, and which almost carried—it lost by a tie vote—would not have received as many votes if it had not been offered by Senator MURIEL HUMPHREY. I am glad that she has had this opportunity to see the bill which carries the name of Hubert Humphrey, and now, with her continuing noble effort carries her name as well, come to this stage of soon-to-be-passed in the Senate. It is a great tribute to her and to her dedication and unswerving devotion, not only to her late husband but to the cause which both he and she have served. In her own right, she has ably served as a U.S. Senator, and the Senate will never be the same without a HUMPHREY.

It will never be the same without Hubert Humphrey, and it will never be the same without MURIEL HUMPHREY. She has continued to remind us of Hubert Humphrey, as she has continued to speak for the ideals which he fought for so long and so effectively during his lifetime.

If I may, just let me close by saying to MURIEL:

> You may break, you may shatter
> The vase, if you will,
> But the scent of the roses
> Will hang round it still.

We will not forget you.

Mr. JAVITS. Mr. President, I yield myself such time as I may use, just to join in the beautiful tribute of the majority leader to Mrs. HUMPHREY.

I think we all knew Hubert so well that one can almost see his beaming countenance tonight as we stand on the threshold of voting the Hubert Humphrey-Augustus Hawkins bill. I know how he felt about it; it was literally the consummation of everything he desired.

I say to MURIEL, I hope you will not be dismayed by the loss of that amendment. Let us never miss the forest for the trees. What is behind us when we pass this bill, and it passes the House, is signed by the President, and becomes law is much more important than that matter of inflation, for this reason—and now I speak to you in the same kind of spirit in which your husband would have spoken to you: The struggle in this country has been between inflation and unemployment. Which comes first, the chicken or the egg? What is in this bill is the affirmation that the human consideration of employment comes first. Even that part of the bill which you do not like and which I do not like contains that paramountcy for the human equation first; and may I say in all fairness to my col-

leagues who labored so hard to consummate this arrangement which results in tonight's passage, Senator HATCH, who gave it everything he had, Senator LUGAR, Senator PERCY, and the majority and minority leaders: I am sure that none of them misunderstood what the passage of this bill means. They knew it and they accepted it, notwithstanding their deep feelings about Government expenditures, inflation, and so forth.

This is accepted as the paramount goal, and I know of no monument that Hubert Humphrey would have preferred to this victory. So, I feel this is truly a night to be remembered, in his memory and in his name.

UP AMENDMENT NO. 2107

Mr. PROXMIRE. Mr. President, I send a technical amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Wisconsin (Mr. PROXMIRE) proposes an unprinted amendment numbered 2107:

On page 125, strike line 2.

Mr. PROXMIRE. Mr. President, I might just explain that all this amendment does is delete an excess line from unprinted amendment No. 2101. I have cleared it with the minority manager, and it is technical.

The PRESIDING OFFICER. Without objection, the amendment is agreed to.

UP AMENDMENT NO. 2108

Mr. PROXMIRE. Mr. President, I send to the desk another technical amendment. This is the last amendment I have.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Wisconsin (Mr. PROXMIRE) proposes an unprinted amendment numbered 2108:

On page 145, insert "equipment" before the period at the end of section 207(a)(2).

Mr. PROXMIRE. Mr. President, this amendment simply puts into the amendment (UP No. 2101) a word which was inadvertently omitted. I have cleared this with the minority.

The PRESIDING OFFICER. Without objection, the amendment is agreed to.

Mr. PROXMIRE. Mr. President, I am prepared for third reading.

Mr. CRANSTON. Mr. President——

Mr. PROXMIRE. Could we have third reading, if the Senator will permit?

Mr. JAVITS. Mr. President, before we have third reading, I just wanted to add to the names of those Senators on the other side who participated in this matter in a very honored way the name of the Senator from Kansas (Mr. DOLE).

● Mr. BAKER. Mr. President, I wish to reiterate my admiration and thanks for the extraordinary job done by the ad hoc committee of Senators from both parties who fashioned the pending leadership compromise on the so-called Humphrey-Hawkins bill. I believe that this proposal represents the essence of legislative compromise, and I am pleased that such an agreement could be reached.

No one wishes to deny the right of every able-bodied American to have a job. The original intent of the Humphrey-Hawkins bill was to guarantee that right. It established the Federal Government as the employer of last resort for those unable to find work in the private sector.

The problem with that proposal was not the goal of full employment, to which we all aspire, but rather the manner in which the bill's sponsors sought to achieve it. In the midst of ever-increasing demands upon the Federal budget, and growing resentment of the burden of taxation upon Americans, we simply cannot afford the cost of providing the public-sector jobs required to employ all of those out of work. The expense of such a commitment on the part of the Government would further increase the already excessive budget and lead directly to increased inflation.

For that reason, Mr. President, it makes very little sense to me to pursue the goal of full employment in the absence of a goal to reduce inflation. A high rate of inflation would not only minimize the benefits of employment for those put to work, but would have a seriously adverse effect upon those already employed and now staggering under a heavy tax burden. Thus, I consider it more appropriate for the debate on Humphrey-Hawkins to include the dual consideration of employment and inflation.

The virtues of this compromise are several. They include the establishment of a goal of 3 percent unemployment for those over 20 years of age, and 4 percent for those under 20. Also, it includes a goal of 3 percent inflation by 1983, and 0 percent by 1988. The bill also establishes the goal of a balanced budget and a limitation of Federal expenditures to 20 percent of the Gross National Product by 1981. These are goals which can and must be pursued simulaneously.

This bill does not authorize the creation of any jobs, but rather establishes goals for the U.S. Government. I support this compromise not only because of the goals affecting both employment and inflation, but also because it states a clear preference for employment in the private sector.

Last year, over 4 million jobs were created in the private sector as a result of the continuation of our economic recovery. All of our best efforts here in Washington cannot compare to the capacity of the private sector to generate new jobs in an expanding economy. That is why it is in the best interest of the employed and unemployed alike that we pursue policies as a government which will contribute to an expanding, uninflationary economy.

Even in an expanding economy, however, there are those whom businesses are reluctant to employ for a variety of reasons. That is why I have long supported, and have on several occasions introduced, proposals designed to provide important incentives to private-sector employers to hire the hard-to-employ. Now that the Senate has passed a targeted employment tax credit as part of the Revenue Act of 1978, I believe that it is essential that appropriate steps be taken to guarantee the success of that and other proposals aimed at reducing structural unemployment.

In that regard, I proposed that a National Employment Conference be held in Washington at the earliest possible time. The purpose of that conference would be to bring together leaders of business—small and large—labor, Government, and all other interested parties in an effort to discuss employment in general, and structural employment in particular. I am pleased that this proposal was included as part of the leadership compromise, because I am convinced that it will afford an excellent opportunity for those involved in the creation of jobs to discuss that subject and give special attention to the use of targeted tax credits, wage vouchers, and other incentives to private-sector business.

I hope that this proposal will become law; but, if not, I urge the President to hold a National Employment Conference of the nature I have described.

In summary, Mr. President, I am pleased to cosponsor the leadership compromise as a balanced and fiscally responsible effort to deal with the twin problems of inflation and unemployment. I hope it is adopted and I urge my colleagues to support it.●

● Mr. BAYH. Mr. President, I rise in support of the Humphrey-Hawkins Full Employment Bill. Not only do I support this very important piece of legislation, but I am proud to be one of the original cosponsors. As this Congress moves toward adjournment, I think there could be no greater final tribute to the 95th Congress than the passage of the Humphrey-Hawkins Full Employment Bill. Passage of this legislation would indicate to all Americans that this Congress is willing to take on the real hard issue of unemployment and do something about that serious problem.

Mr. President, this legislation is important because it addresses a problem that our country has been struggling with for years. There is nothing that is less acceptable to the American people than unemployment. It is a basic tenet of our capitalist system that all our citizens have a right to a job. It is not acceptable for many of our citizens to go month after month and oftentimes, year after year, without a job. That is why this bill is probably one of the most important pieces of legislation that this Congress will have acted upon during this session.

Let me stress the fact that this is not, in and of itself, a jobs bill. To the contrary, it is a bill which establishes a mechanism by which to measure and control unemployment within the economic sector. It would commit the Federal Government to the goal of reducing the overall unemployment to 4 percent. In order to reach the 4 percent unemployment level, this bill would require the President to annually propose to Congress the short and medium term unemployment production and real income goals, together with the comprehensive, coordinated fiscal and monetary policy and program mix aimed at

achieving the objectives of the bill within the 5 year framework. Furthermore, S. 50 would require that the Federal Reserve Board report annually its intended monetary policy for the 5-year period and estimate its impact on the numerical economic goals presented by the President.

One of the more important aspects of this bill is that it recognizes the importance of the private sector in achieving a 4 percent unemployment level. Specifically, it would place primary emphasis on creating and sustaining an economic climate conducive to promoting maximum activity and job opportunities in the private sector, and prohibits against interference with private business activities. The Humphrey-Hawkins full employment bill would temporarily utilize the existing public works, employment and job training programs to fill the gap between private sector employment and establish employment targets until the time when the private sector can effectively deal with this problem.

I think it is important to note that this bill does leave the President with considerable flexibility in meeting his goals. In the event of unforeseen circumstances, the President would be allowed to propose modifications in the 5-year employment goal. Let us hope that such modifications will not be necessary. But just in case they are, the President will have the flexibility to deal with them.

Mr. President, one of the major concerns of the opponents of this bill is its effects on inflation. And I might add that this is a legitimate concern shared by all Americans. It does no good for us to pass legislation creating jobs for Americans, if inflation creates a situation in which our citizens' earned dollars will not buy a decent meal for their families. In fact, Mr. President, I think we should always be cognizant of the effects of any major piece of legislation in inflation. But even with our concern for that ever-present nemesis, inflation, we must not lose track of the ethical and moral responsibility we have to assure all Americans a decent living. It seems to me Mr. President, that as a means to create jobs, targeted employment programs would not be as inflationary as would some broad fiscal and monetary policies. As a matter of fact, such jobs programs could be designed to be counterinflationary by putting people to work producing goods in short supply or training people in skills where shortages exist.

In response to the criticism that this bill is no more effective than the original 1946 Employment Act and therefore is not necessary, let me point out three specific differences. The first one is that this bill sets specific, measurable economic goals. Second, it requires that the national economic policy be directed toward these goals. And finally, it changes the way the Federal Government makes economic policy so that full employment will be central and continuing concern of the President and the Congress.

So in conclusion, Mr. President, let me assure my colleagues that from its inception the thrust of Humphrey-Hawkins has never been to create government-paid job, but rather to establish procedures for insuring that all Federal economic decisions are coordinated for the purpose of achieving full employment, I hope my colleagues will agree that we owe at least that much to the thousands of Americans who unfortunately find themselves without work in the most prosperous country the world has ever known.●

● Mr. DANFORTH. Mr. President, the latest unemployment rates for the United States show that the country is now experiencing 5.8 percent unemployment. Thankfully, Missouri is more fortunate. There the statewide unemployment rate is 5.2 percent. Still, these figures mask the hardship borne by the people of St. Louis, where the unemployment rate is known to be at least 6.7 percent. These figures say nothing of the unemployment experienced in Washington and Crawford Counties, Mo., where 15.2 percent and 13.7 percent of the workforce, respectively, is unemployed. They do injustice to the people of Wayne County where unemployment is 13.2 percent, of Bollinger County where unemployment is 10.2 percent, of Oregon, Ripley, Pemiscot, Dunklin, St. Francois, Morgan, and Petits Counties, where unemployment stands at 7 percent or worse. Finally, as all of my colleagues are well aware, however much we may rejoice at the recent decline in the national unemployment rate, we cannot deny the serious, pervasive, and persistent problem of teenage unemployment—estimated at 15 percent nationally—34 percent for black teenagers. An entire generation of young people is growing up with little or no job experience whatsoever. This is a serious social problem—and it is not going to go away by itself.

Anyone who has walked the streets of north St. Louis, and who has talked with the people who live there, and visited them in their homes and churches, as I have, cannot help but be moved by the terrible poverty that afflicts that city. No one who knows my State, and knows how its industries have been victimized by unfair trade policies, and has visited the small towns devastated by plant closings, and has talked with the people who live in those towns, as I have, can come away from that experience without a renewed appreciation for what it means to be unemployed in one of the most prosperous nations in the world. Finally, no one who lives in rural Missouri, as I do, can ignore what is perhaps the single most ignored social problem plaguing this country: rural poverty, poverty which exists not so much because there are no jobs, but rather because, in fact, there is no work.

There is another serious economic problem, however, in which the entire Nation shares. That, of course, is the problem of inflation—now estimated at 8 percent. Inflation hurts us all, but most of all it hurts consumers, farmers, small businessmen, and people on fixed incomes. It drives up rents. It evaporates life savings. And, whereas the person who is unemployed knows that somehow, somewhere, he can find work if he only strives hard enough, trains hard enough, wants it bad enough, the small businessman, the farmer, the pensioner knows just as well that there is nothing he can do by himself—nothing—to turn back the tide of inflation.

Mr. President, 5.8 percent unemployment is too much. Eight percent inflation is too much. And it is because I am firmly convinced that this Government must set itself to the primary task of addressing these serious economic problems that I have decided to vote for the Humphrey-Hawkins bill.

I have not been considered a supporter of the Humphrey Hawkins bill. When it was first introduced by the late Senator from Minnesota, I opposed it—for many reasons, chief among them its reliance upon the Government as an employer of last resort. When it was reworked in consultation with the White House and reintroduced, reworked again by the House, and again by the Senate Committee on Human Resources, and again by the Senate Committee on Banking—I remained skeptical. Quite frankly, I am skeptical whenever Congress makes promises to the American people. The American people have heard an awful lot of promises in the last quarter century and, in my opinion, they are more than a little tired of it—and with good reason. But, the promises made by this bill—promises to work toward the goals of full employment and price stability—are promises we can keep.

I am not one of those persons who believes that there is no role for the Government to play in formulating and directing the economic policies of this country. Indeed, throughout the debate on the Tax Reform Act I tried to emphasize—again and again—and again—that the tax laws of this country can and should be used to encourage production, investment, and capital formation, to develop job opportunities in the private sector for the hard-core unemployed, for welfare recipients, and for disabled persons. I have been deeply involved in the effort to develop a fair trade policy for this country—a policy which assures markets for American exports and protects American business and American jobs from exploitation by cheap and unfairly traded imports. I have been deeply involved as well in the debate over the regulatory policies of this country, in the effort to expand new business opportunities—and opportunities for jobs—by easing the regulations which now strangle American industry. I have also been involved in the effort to stem inflation by cutting back on Government spending, by trimming budgets and abandoning unnecessary spending programs.

So when someone asks me if I have an idea how this country can deal with the problem of inflation—and how this country can deal with the problem of unemployment—my answer, of course, is that I do have some ideas on solutions for these problems. The solutions I would propose differ, I am certain, from those which some of my colleagues might suggest. I doubt for example, that I will ever be persuaded that the best way to get people back to work is for the Government to hire them. Some of my colleagues will certainly disagree with me on that score. But that is to be expected.

The point is that these issues deserve debate. I submit that is why we are here—to put together, as best we can, an economic program that gets people back to work, that assures some semblance of price stability, and allows real opportunities for increased productivity, increased investment, and increased growth in the gross national product. I want that debate.

The Humphrey-Hawkins bill gives us the opportunity to have that debate. It creates no jobs. It authorizes no spending programs. It merely creates a framework for debating the important issues of unemployment and inflation—issues which are now addressed, when addressed, in a haphazard, piecemeal fashion that defies coordination. Where it makes any recommendation at all it places emphasis where it should be placed, in my opinion, on creating jobs in the private sector. This makes sense to me.

But just as important as the debate which will be generated by the Humphrey-Hawkins bill is the fact that this bill commits this Nation to the goal of achieving full employment and price stability. These are worthy goals. As one Senator with a deep interest in the economic future of this country, I support these goals. And for the sake of the people throughout my State who are out of work, and the people throughout my State who have seen their savings diminished and their paychecks ravaged by inflation, I promise here and now that I will work as hard as I know how to achieve these goals.●

● Mr. MARK O. HATFIELD. Mr. President, first of all, I would like to commend the Senators of the ad hoc committee for their diligent efforts in reaching a compromise on the Humphrey-Hawkins bill. Indeed, what we have before us today is a compromise measure, a symbol of the original Humphrey-Hawkins bill as first introduced in 1974. There have been many modifications and revisions made in the past 4 years to arrive at this 11th hour legislation.

While I recognize that this is a shadow of the original bill, I have deep concern for its consequences. My concern is an outgrowth of the expansion of the Federal Government I have witnessed in my 12 years with this body. We all recognize that this is a shell of the original text, but will this be the first step along the expansionist Humphrey-Hawkins road? Will the sponsors of this legislation return next year or the year following with revisions designed to replace some of the provisions removed from the original bill?

We all know that the growth of the Federal Government is cellular. Starting with a small program or budget, Federal programs have a tendency to grow to gargantuan proportions. Once they have started, we seem to be powerless or unwilling to check their growth. It is for precisely that reason that I strongly supported the "sunset" legislation approved earlier this week. Every day I get complaints from my constituents about the massiveness of the Federal Government. I challenge the proponents of this legislation to be honest with themselves and with the American public about their future intentions to expand upon the provision of this compromise bill.

By the same token, the Nation's unemployed are being led to believe that this is a bill that will employ all Americans. Mention "Humphrey-Hawkins" to the unemployed and the immediate response is that this bill guarantees a job for every American. That objective was embodied in the 1974 legislation, but we are told today that we are working with a bill that is a symbol.

Its provisions have been gutted, amended or deleted so that it bears a faint resemblance to the bill that is envisioned by the Nation's unemployed. Are we being honest with the Nation's youth and minority populations when we speak of this bill? If we are not, we are deceiving them. We are participating in a cruel hoax and we will soon encounter their dismay and disillusionment.

I also have a great concern for the burden that the Humphrey-Hawkins bill will place on the world's renewable and nonrenewable resources. As can be seen in the two present primary sources of energy, oil and natural gas, the United States is facing a period of additional imports from foreign sources. Oil imports presently compose approximately 50 percent of the Nation's total petroleum use. Approximately 70 percent of the natural gas in my region of the country is imported from Canada. The world is growing, both in population and energy needs, and these factors will place a greater stress on these resources which the United States has become accustomed to enjoying.

Heating up the American economy for the purpose of creating jobs will require additional natural resources, resources which are not readily available within the borders of this country or the cost of which is considered prohibitive by many Americans. This bill needs to take into account U.S. dependence on foreign sources of energy, worldwide demands, leadtime for development, the inflationary impacts of obtaining the resources required to meet the needs of the economy or the environmental impacts of increased production.

The Senate has taken many commendable steps this session to encourage development of renewable and nonrenewable resources. With the Natural Gas Policy Act the Senate created the environment for development in the natural gas field to meet the Nation's future natural gas needs. Development of these resources at an economical level is several years away.

Efforts are being made to pass tax credit measures to encourage development of oil reserves. However, these reserves are not easily obtained and are going to have high costs of extraction. Nuclear fusion energy contributes about 10 percent of the Nation's energy needs, but leadtime for nuclear fusion reaction development is at least 8 to 10 years. Nuclear fission is not expected to be viable commercially until the 21st century and renewables, such as solar or geothermal, are also several years away from commercial application.

The Northwest is also tremendously blessed with some of the country's finest yielding forests. The beauty of these forests is breathtaking, but could be threatened by this measure. These forests are presently being managed and reforestation is constantly occurring, but there is a lead time involved in the growth of a tree. I stress again, we cannot take these resources for granted.

There is now every indication that in a few decades this country will be facing serious shortages in many resources that up until now have been taken for granted. The cost of energy will continue to rise either to import energy from foreign sources or make new sources competitive with our traditional sources of fossil energy. A policy of rapid development would leave the economy of this Nation wide open to the economic consequences of such unpredictable factors as another oil embargo, wars, the weather or the formation of cartels for other scarce resources. We have seen the impact of such aberrations in the economy as an oil embargo and the ensuing double digit inflation. This is a prospect that is considered unacceptable and undesirable by all Americans.

As can be seen, we are faced with the challenge of finite resources as we tackle the problems of unemployment, inflation or our future energy needs. The handling of any one of these problems cannot be dealt with in a vacuum. The Nation is facing a great challenge of how to manage these natural resources, without raping the forests, ravaging the rangelands or dotting the countryside with oil derricks. There is a need to combat the problem of unemployment, but the Nation must break with traditional 5-year approaches and look beyond the scope of this bill.

Therefore, I encourage my colleagues to take a serious look at the bill before us today. Consider its implications for the world's renewable and nonrenewable resources, and the vulnerability of the American economy to an unexpected event, such as the 1973 oil embargo. Consider as well, the perceptions of the public and the potential for expansion of the bill before us today. Are we dealing with a symbol or the first step toward reconstructing the original bill as introduced in 1974? If it is a symbol, then we are playing a cruel hoax on the Nation's unemployed who are being led to believe that this is the original 1974 version. If it is not, then we are taking the first step on the Humphrey-Hawkins road toward expanded government. I ask my colleagues to consider these questions.●

● Mr. WILLIAMS. Mr. President, we have traveled a long and difficult and extremely controversial road in reaching this point in the consideration of the Full Employment and Balanced Growth Act of 1978.

Along the way, we as a Nation endured the worst recession in 40 years—a recession that leached the structure of our economy and cut deeply into the vitality of the American labor force.

But it also demonstrated the great and determined spirt of the people to see their way through the worst of times.

And, paradoxically, those dark days in 1975 and 1976 shed new light not only on our economic problems, domestically and in the world, but on serious weaknesses in our system for alleviating joblessness and protecting working Americans against its painful results.

We were unprepared to deal with the gathering storm, because we had no comprehensive, integrated framework for spotting economic problems in advance and dealing with them in the broad context of Federal economic policy.

Today, as we consider this important legislation, we must not forget the human suffering that was felt in so many families during those dark days, and the lessons we learned should be borne fully in mind today.

We saw that joblessness itself could generate significant inflationary pressures. We confirmed that underutilized plant capacity generates inflationary pressures, as well. We proved that broad, unselective Federal efforts to constrain inflation had the effect not only of cooling overheated segments of the economy, but also of squelching those segments that were already struggling for air.

We demonstrated that high unemployment and high inflation can occur at the same time with a double-barreled impact, hopefully laying to rest forevermore the notion that the way to fight inflation is to permit some level of unemployment.

And we saw so clearly that public income support programs, which can deal with even very high unemployment for short periods of time, are woefully insufficient to provide jobless workers the financial protection they need for more than a few months.

Those are some of the most vivid lessons we learned. There are literally thousands of others. We learned too late.

Not so with our great friend Hubert Humphrey and our distinguished colleague in the House of Representatives, Congressman AUGUSTUS HAWKINS.

Their foresight, their intimate understanding of cross currents in the economy, and their compassionate grasp of the personal tragedies that joblessness imposes gave birth to the Humphrey-Hawkins bill.

They and their proposed legislation were dedicated to the simple proposition that every American who is able, willing, and seeking to work must have the opportunity to do so in a meaningful job at fair compensation.

They were of the conviction that no humane society can sacrifice jobless workers and their families in a headlong effort to control inflation or solve any other domestic problem, however severe.

They believed that the private sector of the economy must be revitalized, so that it is able to assume a larger and growing share of the responsibility for strong economic health.

They continuously advised us that, unless the Federal Government gets its economic policies in order—following a single guidepost and developing a concrete plan for its own participation in the economy—the private sector would never obtain the clear background it needs for gaging its own plans from year to year.

They recognized that inflation and unemployment were not mainly the result of a massive dislocation in the economy, but of an accumulation of relatively small problems and bottlenecks that cannot be resolved effectively unless they are attacked directly and in a targeted way.

And they knew, as I am sure we all know, that a concrete, comprehensive, complete picture of the Federal Governments plans is impossible, unless the Congress, the States, the private sector, and the people all join in partnerhip with the President and his administration in making those plans.

I came to share those beliefs with Hubert Humphrey and GUS HAWKINS, and that is why I joined with them as a principal sponsor of the Full Employment and Balanced Growth Act of 1976 when it was introduced in March of that year.

Since then, this vital legislation has been honed and improved and readied for consideration by the Senate.

It reached the Calendar of the House of Representatives in September of 1976 upon the recommendation of the Committee on Education and Labor. That version of the bill was introduced in the 95th Congress, and the Committee on Human Resources, which I have the privilege to chair, began to work on it.

Late in 1977, an improved and streamlined version of the bill was endorsed by President Carter, after extensive negotiations with Senator Humphrey and Congressman HAWKINS.

As a cosponsor of this version, I was gratified that it was endorsed and recommended for passage by the Human Resources Committee on May 3 of this year.

The bill then moved to the Committee on Banking, Housing, and Urban Affairs, of which I am a member, and I had the opportunity on that committee to share in making further improvements in the legislation, although I opposed some elements of the Banking Committee's bill.

Mr. President, at this juncture, I believe it would be important for me to point out that, in three respects, I was strongly opposed to the Banking Committee's version. So that you may understand the objections I had and the reasons for them, I ask unanimous consent that my supplemental views, in which I was joined by the Senator from California (Mr. CRANSTON) and the Senator from Maryland (Mr. SARBANES), be printed in the RECORD at the conclusion of my remarks.

The PRESIDING OFFICER. Without objection, it is so ordered.

(See exhibit I.)

Mr. WILLIAMS. Today, the Senate has before it a further refined version of the Humphrey-Hawkins bill. It is a version that merges the best features of the legislation as reported by my committee and the Banking Committee, with a single exception. I refer to the provision in the pending Byrd-Baker substitute for an inflexible 3-percent inflation-rate goal to be achieved by 1983.

The Senate, in its debate, has resolved this issue, and I am willing to accept the outcome, although I do so without enthusiasm.

Over the past 4 days, I have worked with a contingent of proponents and opponents of H.R. 50 to forge the compromise that is before us. The negotiations have been blunt and forthright, but they have been productive.

We could not be here now, under a unanimous consent agreement to consider this bill, if it were not for the willingness of all Senators involved in the negotiation to produce legislation that would be acceptable to a majority of our colleagues.

We have done that, and I wish to thank those Senators who participated with us in this effort, particularly Senators NELSON, CRANSTON, PROXMIRE, and HATCH, who worked so hard to bring about the agreement.

And I wish to make known my gratitude to the distinguished majority and minority leaders for providing the momentum and the initiative for bringing us to this point.

My expressions of gratitude would not be complete without taking special note of the monumental contributions that Dr. Leon Keyserling has made, in an effort that dates back over 40 years of distinguished public service, to develop the legislation.

As a former Chairman of the Council of Economic Advisers under President Truman, Leon Keyserling espoused the principles that under this bill.

His expertise in economics, his meticulous research, and his astounding capacity for seeing beyond the horizon in all directions at once have inspired us in our efforts to draft this legislation.

I feel—as I know he feels—that we should write it into law.

Whatever the final outcome of our debate today, Dr. Keyserling would say that the Congress has come to the brink of enactment of the most important, useful, and far-reaching economic legislation in more than a generation.

The bill is not perfect, nor without some provisions that I and others do not like, but in the spirit of fair compromise, which is a hallmark of the congressional process, we have a bill which I believe all Senators can find consistent with their own best judgments and finest sentiments.

To delay or defeat its passage now would waste 4 years of laborious effort. It would provide another important indiciation that our institutions are too cumbersome to meet vitally urgent problems adequately and promptly.

The problem of mass unemployment is not behind us. It still looms before us.

And because it does, it is absolutely vital that we establish now, without delay, a national commitment to drive unemployment down to no more than 4 percent over the next 5 years.

This commitment is so fundamentally important because so many economic policymakers have come to accept too easily the ominous and unfortunate notion that we must live with high levels of unemployment for the indefinite future.

To define full employment as 6 percent—or even 5.5 or 5 percent—is a confession of either national failure or national insensitivity.

We are not an insensitive people in our concerns for the plight of jobless and disadvantaged Americans. Neither are we willing to acknowledge failure in our efforts to provide every American, in justice, the chance to earn his way.

Plateaus of 8 percent, or 7 percent, or even the 6 percent level have devastating social and personal consequences, particularly among those who are least able to bear the deprivation.

In the employment and training report of the President for 1978, Secretary of Labor Ray Marshall described the impact of cyclical economic swings on minority groups and young workers:

The problem of cyclical swings in the economy has been compounded by the extreme uneveness that has always characterized unemployment in the United States. Minority groups and young workers suffer disproportionately higher rates of unemployment than does the workforce in general. Unemployment and underemployment are particularly high in a large number of depressed urban and rural communities. For these groups in our society and people who live in the affected localities, lack of adequate job opportunities has a permanent, structural character that persists in good times and bad.

And since the Second World War, each recession has gouged the topsoil of our labor base and left in its place a sediment of unemployment, idleness, and underproduction. The problem Secretary Marshall described has been growing steadily worse, and its ramifications for our economic life have become greater. During the last recession this Nation failed to realize up to a full third of its current plant capacity, and today, over 40 months into the recovery, we are still producing well short of our total capacity.

When he introduced the Full Employment and Balanced Growth Act of 1976, in March 1976, Senator Hubert Humphrey expressed his deep concern for the pattern of our economic underdevelopment:

Six recessions have beset the Nation's economy since the end of World War II. In each case, the response of Government consisted of scattering "emergency" band-aids when effective curative and preventive economic medicine was needed. Taken as a whole, these recessions display a frightening trend toward deeper troughs and shallower recoveries.

Unemployment reached a high of 7.9 percent in October 1949 and a low of 2.5 percent 28 months later.

It peaked at 6.1 percent in December 1954 and bottomed out at 3.7 percent 19 months later.

In July 1958 joblessness went up to 7.5 percent and was reduced to 4.8 percent during a period of equal length.

An unemployment high of 7.1 percent was reached in May 1961 and a low of 3.4 percent 33 months later.

In August 1971 joblessness reached a high of 6.1 percent and went down to 4.7 percent 26 months later.

Unemployment rose to a postdepression record high of 9 percent in May 1975 and has dropped to only 6.3 percent 32 months later.

Mr. President, underlying that regressive course is the grinding pattern of stagnation that crosses the heart of our cities and extends to our rural areas. These social consequences, however, bear not only upon those who suffer directly from joblessness. The Nation as a whole bears a staggering loss. Had this Nation been able to match the productive levels of our Western and Japanese allies between 1956 and 1976, we could have realized an additional $3.8 trillion in GNP, and an additional $750 billion in tax revenues. In 1976, our entire GNP was $1.76 trillion—so it appears that we have thrown away 1 year on national product in each of the last two decades. Translated into per capita loss, that amounts to $800 a year for every American.

Despite the widespread acknowledgement that, as a Nation engaged in a world economy, we must do better, the question of whether and in what ways the Federal Government should promote the full use of our national resources has remained a subject of bitter controversy. The full employment standard to which the proponents of S. 50 would adhere defines our national potential as judicious use and development of vital resources by a fully developed and skilled labor force employing a given level of technology.

To put the essence of full employment most simply, when people willing, able, and seeking to work are able to contribute to the economy, the benefits of their full contribution accrue to the entire Nation.

This reasoning is the basis for S. 50's statutory mandate of 3-percent adult unemployment and 4-percent overall unemployment by 1983—unemployment levels chosen with great care based upon decades of experience with interpretations of full employment, and based upon the achievability of these goals.

Interests opposed to an economic policy based upon full employment advertise a belief that full employment invites wholesale Federal intervention into the private economy. They also hold that the reduction of unemployment to 4 percent would raise the Federal budget deficit and result in greater inflation.

Mr. President, the Full Employment and Balanced Growth Act of 1978 is no reckless mandate to reach the statutory employment goals at any cost. This legislation mandates policies, and not programs. It sets forth a framework for coordinating policy with a coherent and a reliable system.

I can assure my colleagues that nothing proposed in H.R. 50 contemplates or could trigger the sweeping changes in labor-management relations to undermine the vitality of an untrammeled private economy. H.R. 50 recognizes the economic primacy of the private sector, and where it requires discipline, it requires it of the Federal Government in the effort to abet, promote, and encourage private sector development and employment. No program designed to establish full employment could long endure that failed to recognize the mutual needs and interests of both labor and management.

The design of H.R. 50 may serve to illustrate what the bill seeks to accomplish. The bill is divided into three major titles. Title I establishes pathways to full employment on a 5-year timetable. The central guiding principle of these pathways is the establishment of 3-percent adult and 4-percent overall levels of unemployment by 1983. Pathways may be modified to account for basic national priorities that deserve careful scrutiny in developing a final consensus on what our economic goals should be. Balancing the Federal budget, establishing appropriate international economic policies, reducing untenably high rates of unemployment among disadvantaged groups in our population, exploring structural policies that reduce unemployment and promote price stability all become permanent components of our full-employment pursuit.

Title II of the legislation categorizes current structural programs for beginning the march toward full employment. This title heavily emphasizes the need to identify obstacles to full labor and resource utilization and to respond to these in direct and targeted fashion. Macroeconomic policies and monetary policies, because they are incapable of bringing us to full employment alone, must be supplemented with such structural programs.

In debating this legislation, we have heard it said that the Federal Government should not make promises it can not keep, and that the statutory goals mandated by this bill are unachievable. We are told that we have too many problems and too many obstacles to overcome, both on the domestic and international fronts, to seriously think of returning to levels of unemployment traditionally associated with full employment.

Mr. President, title II of this legislation requires the President to get down to the specifics of our problems. He must look not only at the Federal budget, but at labor market problems that exist throughout the country. He must review the impact of Government action and regulation upon the private sector, and consider the side effects.

Far from a massive intrusion into the private marketplace, title II represents the commitment of the Federal Government to discipline itself with respect to the private sector—and it invites the greatest degree of cooperation from business that business may wish to give. Breaking supply bottlenecks, improving trade balances, upgrading the skills of the labor force and expanding the pool of labor most valuable to private enterprise are strategies for new business opportunities rather than greater control by the Government.

Thus, title II is a checklist to serve the framework of the legislation. It is a checklist to be debated and considered. It mandates no programs or authorizations, and can serve as a benchmark against which future programs may be regarded and measured.

Title III of S. 50 establishes congressional review of pathways first recommended in the President's Economic Re-

port, and tied into the President's budget. As the Congress considers the first concurrent budget resolution, it will determine the economic and structural policies for establishing a pathway to full employment. Title III also would set forward a means by which Congress could modify the 5-year pathways it previously prescribed. In other words, the Congress does not lock itself into any course of action. The constraint of a full employment goal, therefore, would simply require the Congress to determine the year in which, given a new policy mix, the statutory unemployment goals could be achieved.

As with any framework for a policy system, this legislation creates a set of expectations and agendas for policymakers. The most important expectation is that the Federal Government will actively pursue full use of our resources and labor ptoential in a manner consistent with the development of a strong private economy. The effort would be based upon targeted, coordinated, and comprehensive structural policies. And upon a commitment to solving our problems without negative side effects for business and for people. Clearly, this commonsense approach contains nothing that is radically new, and much that is long overdue with respect to the performance of the Federal Government.

Mr. President, for the past 21 months, the Carter administration has recommended, adopted, and pursued policies and programs for the rapid reduction of unemployment. The administration has placed special emphasis on the structurally unemployed. Provision for expanded training and skill development has been a high priority for the President. Since the President took office 20 months ago, unemployment has been reduced by 2 million, with employment growing by over 6 million.

The Committee on Human Resources, to which the Senate has entrusted responsibility for employment policy, has endorsed the initiatives and moved them into effect.

The efforts of the Carter administration to establish full employment demonstrate that progress can be made in areas of great difficulty. Labor market problems are not insoluble, and in the development of job-ladder opportunities, the foundation of a just social and economic system is laid. The reduction of unemployment has served as a guidepost for policy, and the President has fashioned his response to inflation, international trade problems and currency instabilities in a manner that does not sacrifice jobs or the long range strength of the economy.

There is no single course that will assure the achievement of the unemployment goal, and the administration should be credited for developing innovative and often far-reaching proposals. Unfortunately, neither the President nor the Congress has found a way to shortcut the full gestation period that consideration of these proposals require. In judging the administration's full employment strategy, I would caution my colleagues to bear in mind the timelag between program development, congressional consideration and agency implementation.

On November 14, 1977, Mr. Carter fully endorsed the revised version of the Humphrey-Hawkins bill negotiated with Senator Humphrey and Congressman HAWKINS. On numerous occasions thereafter, the President reaffirmed his commitment to this bill, while pursuing many of the policies and programs recommended in it. Therefor, any inference that the administration has turned its attention from its commitment to full employment is unwarranted. The President, in seeking policies to curb inflation, bolster the sagging dollar abroad, and insure adequate energy supplies in the future, has consistently maintained that none of these policies can be pursued at the cost of higher unemployment.

Mr. President, leading economists have told us that to achieve the unemployment goals of this legislation, we must substantially reduce the differentials in the rates of unemployment experienced by minority and nonminority groups as well as among adults, youth and women.

The Congressional Budget Office and the Department of Labor concurs that macroeconomic policies alone cannot reduce unemployment to levels targeted for 1983 without inflaming inflation. Assistant Seretary of Labor, Arnold Packer, testified before the House Committee on the Budget on March 22, 1978 and reported on the administration's use of structural employment programs:

Before I go on to the question of whether the Administration's structural employment programs are adequate to reduce the overall unemployment rate the rest of the way to the 4 percent goal (from 4.75% unemployment via macroeconomics) I would like to draw attention to several aspects of the unemployment rate chart. Even at 4.75% overall unemployment, the rate for nonwhite adults are more than double those for whites. The rate for nonwhite male teenagers is about double the rate for white male teenagers. The unemployment rate for nonwhite female teenagers is much more than double that of white female teenagers.

Now, suppose for a moment that we had programs in place which could reduce these rates to 1.5 times the corresponding white rates. Our analysis indicates the impact of this on the overall unemployment rate would reduce the unemployment rate from 4.75% to just over 4.3%. A program to halve the differential between white men and women would reduce unemployment by another two-tenths to 4.1%. This illustrates the kind of reduction in historical unemployment rate differentials that effective structural programs may make.

In summary, the Administration's current proposals appear sufficient to generate the required number of jobs to allow us to achieve the Humphrey-Hawkins goal. But while structural employment programs are necessary, they alone are not sufficient to achieve the Humphrey-Hawkins goal. We also require a macroeconomic policy which will maintain the 4.5 to 5 percent economic growth rate required to get us to 4.75% unemployment, a solution to the undocumented worker problem, and a solution to the problem of inadequate economic growth in the international economy. If we can solve these problems, we are confident that the structural programs already proposed can achieve the goals set forth in the Humphrey-Hawkins bill.

From the response to the Humphrey-Hawkins bill of minority groups, church groups, groups representing youth and women, it is obvious that they regard this analysis as true, and as a basis for hope. This is not a hope based upon the perception that the Government will hand out jobs as an alternate form of relief—they look to the Federal Government as a conduit for access to permanent, gainful employment. Training, counseling, placement, and work experience must ready the disadvantaged to compete in the labor market for jobs in the private sector where possible, and in regular public employment where possible.

Martin Luther King, Jr. saw the struggle for minority unemployment as perhaps the highest stage of attainment in the development of civil rights. He knew that jobs represented economic freedom for his people, and that without that freedom, the hard-won civil rights gains between 1964 and 1968 would be reduced to paper. "What is the use of sitting at a lunch counter and ordering a sandwich," he used to say, "if you don't have a job so that you can afford to pay for it?"

The struggle for full employment is a continuing struggle for equality, and perhaps that is why it makes some people uncomfortable. Dependency, feelings of inferiority among the unemployed, deprive us all of the political and economic contributions of our fellow citizens. Full employment is a means by which we, as a nation, can seek to break the cycle of dependency that has burdened sectors and groups in our population. Full employment can only be achieved, in other words, by structural programs that directly impact upon pockets of group unemployment.

I share the sentiments expressed by my colleague, Senator NELSON, who observed that it would be well not to look back 10 years from now at a wasteland of deterioration, and ask ourselves why we failed to act when the need was so clear.

EXHIBIT 1

SUPPLEMENTAL VIEWS OF SENATORS HARRISON A. WILLIAMS, JR., ALAN CRANSTON, AND PAUL S. SARBANES

The Committee on Banking, Housing and Urban Affairs, in reporting its version of S. 50, the Full Employment and Balanced Growth Act of 1978, has improved the legislation in certain respects, but in others, the committee has recommended amendments that would evacuate much of the strength and promise of the original bill.

The basic design of S. 50, as introduced by Senator Muriel Humphrey on February 23, 1978 has been endorsed by President Carter, by the House Committee on Education and Labor, by the House of Representatives, and by the Senate Committee on Human Resources.

That design, however, would be significantly altered by certain Banking Committee amendments that would compromise the commitment and undermine the essential principles of the original legislation.

Those essential principles are aptly stated in the text of the bill, particularly in section 2 (General Findings) and section 102 (Declaration of Policy).

THE FULL EMPLOYMENT COMMITMENT

Foremost among them, of course, is the establishment "as a national goal the fulfill-

ment of the right to full opportunities for useful paid employment at fair rates of compensation of all individuals able, willing, and seeking to work."

This national commitment to full employment is buttressed by a commitment "to use all practicable means" to create and maintain conditions that promote "full production, increased real income, balanced growth, adequate productivity growth, proper attention to national priorities and reasonably price stability . . ."

STRENGTHENING THE CORNERSTONE

The design of S. 50 was prompted by the deficiencies in the Employment Act of 1946 which, as the report of the Banking Committee notes, has been the cornerstone of economic policymaking in the United States for the last 32 years. Since its enactment, however, the Employment Act has not been substantively amended. Its inadequacies have not been addressed despite the persistently demonstrated need for a systematic national effort and commitment to pursue a full employment economy.

The most significant weakness of the Employment Act, in our view, is its lack of focus, direction, or compulsion to confront and resolve economic problems. The general and diffuse language of the act extolls the virtues of "maximum employment, production and purchasing power," but does not make a "full" commitment to these objectives. It contains no central, singular guidepost by which the various segments of the economy may gauge whether and ask what pace they are marching toward a common destination.

The 1946 act suffers also from the lack of anything more than incidental devices for coordinating the thousands of economic-impact decisions that are made throughout the Federal Government each month. It created a Council of Economic Advisers in the executive branch and required the Council to submit a report each year. And it created a Joint Economic Committee in the Congress and required it to review and comment on the Council's report each year. But it provided no substantial linkages either between the executive and legislative branches or among the many policy formulating institutions within the Congress. Its coordinating mandate to the Congress consists mainly of an instruction to the Joint Economic Committee to scout around for ways to interrelate the annual economic report with fiscal, monetary, and programmatic policies for addressing structural blockages and weaknesses in the economy.

S. 50, as reported by the Human Resources Committee, seeks to correct the significant deficiencies in the 1946 act. The bill would elevate our national commitment from "maximum" to "full" employment, production, and purchasing power, and it would add balanced growth, increased productivity, national priority concerns, and price stability to the list of major, general objectives of Federal economic policy.

Most important, however, S. 50 as originally designed would make full employment the paramount objective of Federal economic policy through the establishment of quantified goals and a specific timetable for the reduction of unemployment. This provision would establish the single, central guidepost and focal point—lacking in the Employment Act of 1946—for the effective coordination of the myriad of Federal economic decisions.

COMPROMISING THE PARAMOUNT OBJECTIVE

It is in regard to this paramount objective that our colleagues on the Banking Committee have made their most serious errors, inserting provisions that fragment and weaken the "magnetic north" provided in the original bill and establishing two additional guideposts at different points on the compass.

Our most strenuous disagreement is with the Banking Committee's proposed mandate to pursue an unrealistic goal of zero percent inflation within 5 years. With this amendment, adopted by an 8 to 7 vote, the committee has converted the commitment of the original bill from "full employment with reasonable price stability" to one of full employment or reasonable price stability.

The second provision of the Banking Committee's version to which we object is the mandate to reduce Federal outlays to no more than 20 percent of the gross national product by 1983.

Achieving control over inflation and the rate of Federal outlays are constructive objectives with which we concur in principle. Our concern, however, is based upon the fact that the Banking Committee would elevate them to essentially coequal status with the unemployment goal by assigning them a specific numerical value and requiring them to be met on a specific timetable. With three legislated goals to pursue, often in necessarily conflicting directions, policymakers throughout the Federal establishment would be free to choose the guidepost they wish to follow. Too often and too easily, the paramount commitment to reducing unemployment would be suspended and the hope of jobless Americans for rewarding employment would be traded off whenever inflation increased or Federal outlays rose.

Our third major concern is an amendment that would permit the President, in the first Economic Report following enactment of S. 50, to modify the unemployment goal or timetable, or both. This provision virtually invites immediate modification of the bill's basic commitment to unemployed Americans, casting justified doubt on the determination of Congress to fulfill the promise of this historic legislation. This weakening provision is especially damaging when combined with the Banking Committee's recommendation that the President's alteration of the goal becomes effective unless both Houses of the Congress disapprove it. President Carter has endorsed the original provisions which would not permit him to revise the unemployment goal until the third Economic Report following enactment, and we greatly prefer this alternative.

CONSEQUENCES OF AN INFLATION-RATE GOAL

We share with our Banking Committee colleagues a deep and profound concern about inflation and a determination to bring it under control. But we believe it to be unwise and unnecessary to enact the committee's proposed mandate to achieve a zero-percent inflation rate within 5 years. We oppose this unrealistic and inflexible provision for the following reasons:

1. Inflation, unlike unemployment, does not yield readily to domestic policy remedies. Inflation is much more the product of external events in the international economy which are often beyond our reach altogether.

2. A zero-percent goal is virtually unachievable on any timetable. Historically, zero inflation has not been achieved, even during periods of relatively full employment, since 1929. The credibility of this legislation and, indeed, of the Congress in considering it rests upon the achievability of the goals it welds into law. A 2-percent reduction in the inflation rate confounds the current state of the art.

3. Reaching and maintaining a stable price level at zero over the years inevitably would require a degree of government intervention in private market decisions that is fundamentally antithetical to the views of business, labor, and the American people. Moreover, it would permanently shackle the economy to levels of real growth that would stifle incentive and fall far short of our national potential.

4. Reduced inflation is a natural byproduct of a full employment economy. With negligible unemployment and full production, budget outlays for transfer payments shrink, government revenues rise in step with accelerated economic activity, supply markets expand, unit labor costs decline, and competition from increased demand prompts prices to stabilize or recede.

5. A legislated inflation-rate goal of any number, enacted in whatever style, would be readily regarded as a wage and price standard. Individual price and wage decisions in the private sector would be measured against this statutory standard, constituting an ad hoc but powerful instrument for asserting government control over private businesses, even in the absence of formal wage and price controls which are prohibited by the bill. In contrast, the legislated unemployment-reduction goal cannot be applied practicably to individual employers; it is applicable only to the economy in the aggregate.

6. Because of the extreme difficulties in enforcing a specific inflation-rate goal and the mandate to do so within a set time period, fiscal and monetary policy would resort almost certainly to broad, macroeconomic, unselective measures that apply restraint not only where it is needed, but also where it is not, damaging declining sectors of the economy that are struggling for survival.

7. Resort to macroeconomic devices to constrain inflation by constricting aggregate demand is incredibly costly and damaging. For every 1-percent reduction in inflation through this means, 2.5 million jobs, $100 billion of annual production are lost, according to the Council on Wage and Price Stability. In addition, $320 billion in annual tax revenues are lost, discouraging efforts to reduce tax rates.

8. The bill, without the Banking Committee amendment, would require the President to set annual inflation targets and to establish inflation goals over a 5-year period. This flexible, year-by-year approach would avoid the other pitfalls of a legislated specific inflation rate with a specific timetable.

9. The bill, without the Banking Committee amendment, contains a strong anti-inflation commitment and specific tools for combating inflation, including potential remedies for structural weaknesses and blockages as they appear. The President would be required to propose comprehensive policies and specific programs each year to deal with inflation and to reach the annual goals. And he would be required to consider the specific anti-inflation measures spelled out in the legislation. These provisions are more comprehensive than in any previous legislation except during time of war, and they fill a complete void in the Employment Act of 1946.

CONSEQUENCES OF A SPECIFIC FEDERAL OUTLAYS GOAL

The Banking Committee's recommendation for a fixed numerical goal for Federal outlays, as a share of gross national product, is also unwise and unnecessary in our view.

A reduction in the proportion of Federal outlays to 20 percent or less would be another natural byproduct of a fully employed economy. Historically, Federal outlays have remained below 20 percent of GNP in peacetime. Even during the peak of the Vietnam war in the last half of the 1960's, Federal outlays averaged just over 20 percent of GNP.

The proportion rose markedly only as a result of the recessions of 1971–72 and 1975–78, during which unemployment compensation outlays nearly tripled to almost $20 billion in 1976, and other transfer payments increased to provide income maintenance and health, housing, and food assistance to the jobless and the poor. It reached its peak

of about 23 percent in fiscal year 1978 and is expected to decline to near 22 percent in fiscal year 1979. President Carter has already proposed further reduction to 21 percent or less by fiscal year 1981.

Enactment of such an inflexible standard with a fixed timetable for achievement would arbitrarily interfere with short-term policies that hold promise of long-run payoffs, and it would intrude upon the responsibilities of the Congress, particularly the Budget and Appropriations Committees, to set fiscal policy under the Budget Control Act of 1974.

Finally, this provision would offer economic policymakers another excuse for suspending the unemployment-reduction goal and for steering the economy in the wrong direction.

THE MAJOR ELEMENTS OF S. 50

The Banking Committee amendments that we find objectionable in this legislation arise from a profound and legitimate concern over serious contemporary economic problems. A host of them still confront us, requiring unrelenting attention and determined efforts to resolve them.

Far from ignoring or slighting these serious problems, S. 50 as reported by the Committee on Human Resources provides a new and comprehensive framework for addressing them. When the mechanics of the bill are combined with its essential principles, a clear picture emerges of the economic policy formulation system as originally designed, as approved by the House of Representatives, and as endorsed by the Senate Human Resources Committee. From this perspective, the bill has a sensible and practical relationship among its major elements:

1. To serve as the "magnetic north," the bill provides an explicit, permanent but flexible, numerical goal for reducing the rate of unemployment to 4 percent total, 3 percent adult, within 5 years. The singularity of this guidepost as the only national goal with a specific numerical value and timetable is indispensable to the coherent system that would be established by the bill.

2. To serve as periodic checkpoints on our course, the bill requires annual numerical goals for employment, unemployment, production, real income, productivity, and prices to be proposed by the President and considered by the Congress in the context of the Federal budget each year for the ensuing 5-year period.

3. To insure safe passage, the bill requires that we be fully alert and give full attention to general objectives of overwhelming importance, including national priority needs, balanced growth, detection and correction of structural weaknesses and blockages in the economy, and such other vital objectives as balancing the Federal budget and correcting deficiencies in our international trade accounts.

The bill also would establish a systematic method of collecting the views of State and local governments, representatives of the private sector, and members of the general public; integrating those views with the President's annual economic goals and proposals as contained in his Economic Report and his annual budget; developing a congressional consensus on policy alternatives; and coordinating that consensus with fiscal and programmatic decisions that are made annually by the Congress.

This system would be a vast improvement in the manner in which the Federal Government plans its participation in the economy, providing all of the other sectors of the economy with a more reliable background against which to make their own plans.

THE CENTRAL ISSUE FOR THE SENATE

The nucleus of the issue that a bare majority of the Banking Committee membership has put before the Senate is: Should the Congress establish a national commitment to pursue full employment with reasonable price stability through a comprehensive policy development system that is guided by a single, central principle? Or should we establish a system with several conflicting guideposts that allow a choice of directions to fragment our efforts and permit the essential full employment goal to be sidetracked to deal with other economic problems?

We greatly prefer the former course and urge the Members of Senate to join us in support of it. S. 50 has been honed through 4 years of intensive, open debate and discussion to provide the tools that we do not now have for coordinating economic policy. The times will test our ability to use those tools in formulating new solutions and in measuring their results. We urge the enactment of S. 50 without damaging amendments so that we may be fully equipped to pursue a full employment goal.●

Mr. MATSUNAGA. Mr. President, unemployment poses a great adverse impact on our national economy. In hearings before the House Banking, Currency, and Housing Committee, testimony indicated that each 1 percent of unemployment creates a loss of more than $16 billion in Federal revenues and another $4 billion expended in unemployment compensation. In addition, unemployment has a devastating social effect. For example, many of Hawaii's young people are presently being forced to leave the Islands, because of the lack of jobs. Furthermore, thousands of Americans, including many minority members are frustrated and despondent over the inability to find meaningful employment. Also, a continually rising crime rate is clearly linked to unemployment.

For these reasons, I joined as a cosponsor of S. 50, the Humphrey-Hawkins full employment and balanced growth bill of 1978. Under this bill, the Congress would place the responsibility on the Federal Government to use all practical means, including anti-inflation devices, to promote full employment, production, and purchasing power.

Since the initial introduction of the bill in the 93d Congress, the measure has been substantially revised. However, the modified bill retains the major policy and goal commitments to full employment and stable growth. It also provides a flexible process for the President and the Congress to pursue these goals.

The most essential provisions establish an annual review among the executive branch, the Congress, the Federal Reserve Board, and Citizens Advisory Groups, of fiscal and monetary policies. The President would annually submit an economic report to the Congress. The report would include consideration of short as well as medium termed policies, program, numerical employment, production, and real income goals. For the first time there would be a comprehensive review and coherent program to reduce overall unemployment.

Pursuant to the bill, the Congress could authorize specific structural programs to reduce unemployment among ethnic minorities, women, and young people in relation to the overall rate of unemployment as soon as practicable.

I remember vividly the deep compassion the late Senator Hubert Humphrey had for people, especially the downtrodden—those desperate for honest work but unsuccessful in finding a job. Hubert Humphrey truly felt for these people and he strongly believed that we as a Nation should have an established policy to provide full employment for our citizens. Hubert was a warm, sensitive, kind man with lofty ideals.

I ascribe to his ideals—ideals embodied in this bill. I urge my colleagues to put these ideals into law and establish them as our national policy, and a living memorial to the late Hubert Horatio Humphrey.

Mr. THURMOND. Mr. President, I am pleased that I can support this particular version of the Humphrey-Hawkins bill, that is, the leadership substitute of the Full Employment and Balanced Act of 1978.

Mr. President, first of all I want to say that I would like nothing better than to see unemployment of 3 percent or less throughout this country. However, I have long been concerned with setting unrealistic goals of unemployment if a crippling level of inflation and a multibillion-dollar deficit follows it.

Mr. President, this so-called leadership substitute to the bill, which is essentially the Banking Committee version, in my belief, is a measure that attempts to address the serious problem of unemployment in our country from a fiscal and monetary policy perspective.

Mr. President, to pretend that we can reach 3-percent unemployment now, next year, or in the near future is to grossly ignore the realities of this issue. This employment goal is to be achieved by declaring that everyone has a right to employment at fair rates of compensation.

Mr. President, I do not believe that our unemployment problem can be solved by declaring on open ended commitment on the Federal budget and the American taxpayer.

I, for one, want to note that Congress, Republicans in particular, are often accused of being insensitive to the problems of the disadvantaged when considerations of the budget and of Government finances are concerned. Mr. President, this is simply not true. Between those who raise these factors and those who dismiss them exists a difference of method and theory, not a difference of compassion and concern.

Mr. President, to ignore the inevitable economic relations between employment, inflation, budget deficits, and Government activity, in pursuit of a simple objective, is to invite, if not insure, failure to achieve and sustain the full employment objective.

It is because of these concerns that I have decided to support this bill. I believe this bill will insure the long needed attention our unemployment situation deserves, with certain key provisions that will also insure a check on inflation and Federal spending.

Mr. President, I want to commend those Senators who worked very hard to bring this "compromise" before the Senate. It is because of the bipartisan effort

and good-faith negotiation of responsibility resolve the differences that we will undoubtedly witness the passage of this bill tonight.

Mr. President, I urge the adoption of the bill.

The PRESIDING OFFICER. The question is on the engrossment of the amendments and the third reading of the bill.

The amendments were ordered to be engrossed, and the bill to be read a third time.

The bill was read the third time.

Mr. PROXMIRE. Mr. President, I ask unanimous consent that I may yield to the Senator from Utah (Mr. GARN) 1 minute, without losing my right to the floor.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. GARN. Mr. President, in spite of all the talk otherwise, the current form of the Humphrey-Hawkins bill is not an empty gesture in symbolism. It is neither meaningless nor void of harmful effect. I fail to believe that anyone is going to build the frame of a house 1 day without coming back later to complete and fill out the structure. What we have been able to take out of the bill this time around future Congresses will come back and put back in on the grounds of what has already been passed. This bill will be the excuse for putting back in all of the noxious parts that we have so far succeeded in taking out.

Some would contend that all of the teeth have been taken out of the bill. What we are creating, though, is a mouth, and just a little down the road, when the President is not able to achieve the unemployment goals, Congressmen are going to be clamoring to put the teeth back in. And this bill will be used as the precedent. They will be saying that we have passed this Humphrey-Hawkins bill, claiming to provide full employment, and the goals are not being achieved. We need to do this, this, and this, and need those and these spending programs so that the pledges of the Government to the American people do not become meaningless.

We saw this happen with the Clean Air Act; we saw it with the Clean Water Act. The income tax was a flat 2 percent when it was enacted. Now its one of the most confusing, convoluted leviathans of this Government, filled with incentives, disincentives, inequities, overequities—and no one in the Government knows what else. Each year we talk of tax reform, and no one knows even where to begin. Candidates even campaign on solving the Nation's problems, and one of the problems that they list is the problem of income taxes, and that is something that the Government created, when it was just a simple measure, a flat 2 percent. And what the Congress does not add to toothless measures, the courts often find a way of adding for us.

This bill is letting another camel slip his nose under the tent; I suggest that we step on his nose before he gets in any further. It is crowded enough already in here.

There is more to it than just precedent that is noxious in this bill. The bill begins to erode the authority of the Banking Committee. Already consideration of the bill has seen conflicts between the Banking and the Human Resources Committees, over questions of overall economic policy, which has generally been the major concern of the Banking Committee. With this bill that jurisdiction will be blurred.

Not just the Banking Committee has been threatened, but the bill has also lead to attempted raids on the authority of the Budget Committees and the integrity of the budget-making process. Throughout the consideration of this bill there have been jurisdictional squabbles affecting the Budget Committees and the Joint Economic Committee.

Perhaps worst of all, the bill in its very spirit advocates Government economic planning, and it does this in an insidious way: its wording takes it for granted that general national economic planning is a good and desirable thing and intimates that the lack of such planning is the cause of the Nation's economic woes. Maybe we should listen to some of the Soviet economists; they would tell us that just the opposite—too much government economic planning—is causing the problems in the Soviet economy. And here we have a bill establishing 5-year economic plans. Does that sound familiar?

This bill is loaded with irony. It is ironic that just as the Soviets are moving away from national planning the Congress of the United States of America is adopting a measure that will move us closer to it. It is ironic that just as general unemployment is decreasing and action is needed to aid the private sector expand and provide jobs for the structurally unemployed, the Congress is considering passing a measure that will lead to the expansion of Government. It is ironic that while inflation is increasing and threatening to achieve a double-digit level the Congress is considering passing a bill that will threaten spurring inflation even more, inflation goal or no inflation goal. I cannot believe that anyone, labor, business, anyone can be better off for long in that environment.

What is perhaps most ironic of all is that the Congress is even considering this bill, and considering passing it. We are legislators, not soothsayers. We are supposed to pass laws, not pass the buck. Humphrey-Hawkins, like Marie Antoinette, says, "Let them eat cake"—but leaves it up to the President to discover the recipe and bake it, even while the Congress is destroying the oven.

The bill is, indeed, a cruel hoax. It is a hoax upon those whom it claims to help, and it is a hoax to assert that the bill will be ultimately innocuous.

Mr. PROXMIRE. I ask unanimous consent to yield to the Senator from California (Mr. CRANSTON) without losing my right to the floor.

Mr. CRANSTON. I thank the Senator.

Mr. President, I wish to join in the outpouring of admiration for MURIEL HUMPHREY and for Hubert Humphrey. It has been a very great privilege to work on this measure, first with Hubert and now with MURIEL. All of us have, I know, great and profound feelings of love and respect for MURIEL and the way she has carried on Hubert's work in this Chamber.

I also want to thank all the others who have worked so hard, and in particular to express gratitude for my opportunity to work with GUS HAWKINS of my own State of California on this measure over a long period of time.

Mr. BELLMON. Mr. President, will the Senator yield me 1 minute?

Mr. PROXMIRE. I yield 1 minute to the Senator from Oklahoma (Mr. BELLMON) under the same conditions.

Mr. BELLMON. Mr. President, no one wants to vote against something called the Full Employment and Balanced Growth Act of 1978, but this bill, the so-called Humphrey-Hawkins bill, has undergone more changes than the National Visitors Center. It is a bill whose consequences are open to an unusual amount of conjecture. At best, it might be merely an unnecessary bill whose time has passed, while at worst it could be a budgetary, economic, and bureaucratic snafu.

Conceived in the aftermath of our Nation's worst postwar recession, the bill looks best in that context. It was designed to confront the urgent problems that then beset us and basically prescribed three things: calling to the attention of Congress our most serious economic ills, making general recommendations regarding possible policy alternatives, and establishing a procedure for assessing and coordinating Federal priorities, policies, and programs relating to those economic ills.

However, over 2 years have passed since then, and the Humphrey-Hawkins bill has proved unnecessary.

Neither the Congress nor the President needed this legislation to call attention to the disastrous state of the economy—the alarming unemployment and inflation figures themselves were sufficient to accomplish that task.

Likewise, neither the Congress nor the President needed the recommendations in this legislation to formulate effective policies and programs to aid the economy. Countercyclical efforts undertaken in the past 3 years have helped bring the unemployment rate down from its 9.1 percent peak in May 1975, to the current level of 5.9 percent, an improvement of over 33 percent. Even since March 1976, when Senator Humphrey and Representative HAWKINS first introduced this bill, the unemployment rate has dropped 1.6 points, while an incredible 8 million jobs have been created. The number of jobholders is now at an all-time high, and this has been done without the guidance of any national economic planning.

Recognizing that our goals have not yet been fully achieved—that 6 percent unemployment is not satisfactory—Congress has responded to the changing nature of the unemployment problem by establishing programs to aid those people out of work due to structural inadequacies in our system, as well as those unemployed due to cyclical factors. The following is a sampling of the Federal programs currently in effect that are

working to assist the structurally unemployed:

First. Training programs, including classroom training, on-the-job training, work experience, and so forth, under title I of CETA;

Second. Public service employment, under titles II and VI of CETA;

Third. Job Corps;

Fourth. Young Adult Conservation Corps;

Fifth. Summer program for economically disadvantaged youth;

Sixth. Other youth programs under CETA;

Seventh. National office contract programs, under title III of CETA, including NABS JOBS, migrant programs, programs for Native Americans, ex-offenders programs, etc.;

Eighth. Supported work (demonstration project to employ welfare recipients in the private sector);

Ninth. Work incentive program (WIN);

Tenth. Vocational education;

Eleventh. Vocational rehabilitation;

Twelfth. Older workers employment programs, under title IX of the Older Americans Act.

Thirteenth. Employment and training programs operated under grants from the Community Services Administration;

Fourteenth. Local public works (countercyclical) which are supposed to be labor intensive, focused on areas with high unemployment, and are supposed to give preference to hiring residents of the areas in which the projects are located;

Fifteenth. Community block grant program administered by the Economic Development Administration are supposed to have as a goal the generation of net increases in job opportunities for the residents of the areas in which the projects are located;

Sixteenth. Training, employment, day care, and other social service programs under title XX of the Social Security Act are frequently justified in terms of the necessity for such services if the hard-core unemployed are to go to work;

Seventeenth. The labor exchange operated by State employment security agencies;

Eighteenth. Adult basic education; and

Nineteenth. Basic education opportunity grants, supplemental grants, and federally guaranteed student loans, designed to allow children from poor families to attend even the most expensive trade schools, colleges, and universities.

In addition, as evidence of the growing commitment of Congress to achieve full employment, the counterstructural portion of CETA was recently expanded from a $2 billion level for fiscal year 1978 to a $5 billion level for fiscal year 1979.

Finally, Congress did not need this legislation to develop an effective procedure for setting short- and medium-term economic goals and coordinating Federal policies, programs, and priorities. The congressional budget process, still new when this bill was first introduced, has matured to a degree that the sponsors of this bill could scarcely have foreseen. Though still adjusting to sophisticated innovations, it has facilitated the formulation of rational fiscal policy and has provided an effective means of fostering economic growth and stability.

This legislation, however, is not merely obsolete. It also holds the potential for causing several serious problems, possibly reversing some of the very gains which I have just described.

One possible consequence could very well be a shift of authority to initiate policies and programs from the Congress to the President. Title II of this bill empowers the President to implement several programs and to take various actions that can now be undertaken only with specific authorizations from the Congress.

Furthermore, considerable confusion could result from conflicting economic goals and other provisions which affect the relationships between Congress, the President, and the Federal Reserve Board, which might needlessly impair the formulation of Federal economic policy.

Last, but far from least, is the possible result that I find most troubling. Mr. President, I believe that adoption of this bill could very well be this country's first step toward centralized economic planning.

Without overdramatizing this point, I would merely like to remind my colleagues that the unprecedented economic success of the United States has been attributable to the principle of the freedom of the individual.

In our economy, each person is free—and at the same time, inevitably driven—to act in his or her own "enlightened self-interest." Through this system, we have far outstripped those nations that subscribe to a system where the State alone dictates the goals and the means to achieve them.

Clearly the United States does not want to start down the path which has led countries with centrally planned economies to shortages, low productivity, and economic chaos.

Congress has already demonstrated its ability and willingness to deal with such difficult problems as structural unemployment. The recognition and analysis of such problems requires far better understanding and far more tightly designed goals than these broadly described in this bill.

A good example can be found in the attention Congress has devoted to solving youth, and especially minority youth, unemployment.

Need I remind my colleagues of the many substantive programs and policies that this Congress has enacted to combat unemployment, many of which I enumerated only a few minutes ago? Some of these are brandnew. Most are still being developed, and all are constantly being revised and improved.

Mr. President, the Congress has done a great deal in the past few years to establish meaningful opportunities for the unemployed—young and old, skilled and unskilled, poor and not-so-poor. Obviously, there is more that we can and should do. Perhaps we need more programs, or perhaps we merely need to make greater efforts to educate potential beneficiaries about the opportunities that already exist.

But one thing is certain, Mr. President, we should not enact a piece of legislation that only detracts from our truly noteworthy achievements, the kind of achievements that we as public servants can look upon with pride and a rare feeling of satisfaction.

Mr. President, I will vote against this bill. I urge my colleagues to do so as well.

Mr. PROXMIRE. Mr. President, I will be very brief. I do not know if Senators know this, but this is the only major bill I have seen since I have been in the Senate when there was no opening statement. That was because there were so many managers that no one prepared one.

I would like to say what the bill does. In the first place, this bill is not symbolic. People have said this is symbolic. Not at all. Anyone who says this is a symbol will wake up with a surprise. There are definite requirements in this bill that will change the face of the economic policies in this country dramatically. For the first time in our history we have a specific numerical employment goal, 4 percent; we have a time to reach that goal, within 5 years.

In the second place, we give unemployment a clear priority. It has a priority over inflation; it has a priority over any other economic policy in this country.

In the third place, Mr. President, we have an anti-inflation goal for the first time. We have never had that before. It is a specific goal of reducing the rule of inflation to 3 percent within 5 years, and to zero in 10 years. This is something new.

Mr. President, for the first time we provide coordination of monetary and fiscal policy. Here is how we do it: We require the Federal Reserve Board to make a report twice a year to the Banking Committees. In the report the Federal Reserve would explain the relationship of their monetary policy to the objectives of the Employment Act and to the short-term goals in the President's Economic Report and of this bill we are passing now. We have never done that before. It is a profound change. For the first time we are going to have monetary policy and fiscal policy coordination.

Let me just say, Mr. President, in conclusion, that in addition to that, we have not only numerical goals for unemployment and inflation, but every year the President must come down with annual goals for each of the next 5 years for employment and unemployment growth, numerical goals for growth, for productivity, for production, for real income and for prices. The President of the United States has never been required to do that. In very few cases have they done that specifically.

Furthermore, Mr. President, we require the President to take into consideration in setting his goals international trade and international payments. That has never been required. It is a profound and great change.

Mr. President, as the Senator from Kansas reminds us, we also for the first

time have an expression of determination to give the farmer parity in the marketplace, which he richly deserves.

Now let me say in conclusion, Mr. President, that I would agree wholeheartedly that if only our departed colleague, Senator Hubert Humphrey, could be here he would be elated, and nobody could be more elated than Senator Humphrey. I think he was about the most vital, funny, charming, marvelous human being that I can recall. How he would have enjoyed this moment, and how proud he would have been of his remarkable wife, MURIEL, and the splendid job she has done for him.

I think all of us, whether we agreed or disagreed with Senator Humphrey, loved him and loved him dearly. I am positive, as Senator JAVITS has said, that there is no action we could take for which he would be more grateful and for which he would be more proud than passing the Humphrey-Hawkins bill, on which he felt so deeply.

Mr. JAVITS. Mr. President, I yield myself such time as I may require to conclude the debate. I shall be very brief.

Mr. President, just for the information of my colleague, there is an opening statement which I gave on October 10 in the opening of the debate. It does lay out the details of the bill.

There is one added point, and I will not at all repeat: this is the first time the Congress will have been committed to planning, national planning, of an indicative character. That is the real big thing that Hubert did. He and I joined in the Balanced Growth and Economic Planning Act of May 1975, which was the beginning of what we now have.

That is critical because every major enterprise in the world worthy of the name looks down the road 5 to 10 years. We have never done it. Now we begin. It is a very auspicious time for our country which will save us many of the pitfalls like, for example, the pitfall into which we have fallen on energy.

So, Mr. President, I hope very much the Senate will now resoundingly approve this act.

Mr. GOLDWATER. Will the Senator yield for 1 minute?

Mr. JAVITS. I yield.

Mr. GOLDWATER. Mr. President, I will cast my vote against this bill. There is nothing new about this concept. I remember debating this 50 years ago in college. I am afraid that it cannot work without the complete domination of the Federal Government over the enterprise sector. It may not at first, but there is no way we can achieve the employment goals that we are seeking, as worthy as they are. One, we do not even know what unemployment is yet. We get so many false figures out of the Department of Labor that we do not know what we are confronted with.

Inflation at the rate we are talking about is normal, but we are not going to reach it without the full cooperation of the Congress, and I see no indication by this Congress that we are ever going to reach it.

I hate to make this statement, but I am afraid this is probably the most dangerous piece of legislation ever passed by the Congress against the free enterprise system, and I will resist it.

Mr. JAVITS. Mr. President, I want to say a word about Senator NELSON, the occupant of the chair, Senator WILLIAMS, Senator PROXMIRE, Senator BROOKE and his committee, and the staffs of both committees, to thank them for superhuman effort, great endurance, and patience in respect of this bill.

Mr. ROBERT C. BYRD. Mr. President, I want to add my commendation to the Senator from Wisconsin (Mr. PROXMIRE), to the Senator from Wisconsin (Mr. NELSON), to the Senator from New York (Mr. JAVITS), to the Senator from Massachusetts (Mr. BROOKE), and to the Senator from New Jersey (Mr. WILLIAMS) for the leadership they have all demonstrated in bringing this bill to its present status.

I also want to compliment those who have so very ably presented their opposing views. They did it well and they made a great contribution in helping to shape and mold the bill to its present form.

To both sides, my congratulations.

Mr. NELSON. Will the Senator yield?

Mr. PROXMIRE. I yield 1 minute.

Mr. NELSON. I just wanted to say that in these negotiations over quite a long period of time, I think everybody was conscientious in their objective. On the Republican side Senators JAVITS, LUGAR, HATCH, PERCY, and DOLE were there every single day with an attitude of attempting to work out something so that we could pass a bill.

I want to say that I enjoyed working with them. Their interest and cooperation made it possible to have a bill. I think this is an historic event. As an old, old friend of Hubert Humphrey since 1948, I believe, when I first met him, I want to say that this is a wonderful night in his memory.

I commend Senator HUMPHREY for her participation in this. I believe this is a major and important step forward.

Mr. PROXMIRE. I yield 1 minute to the Senator from Delaware.

Mr. BIDEN. I will only take 30 seconds. I will cast my vote against this bill, but I want to make clear that the reason is totally different from the reason stated by the Senator from Arizona.

I do not think Government ought to make promises it cannot keep. I do not know how we can keep the promises made in this bill. That is the reason I am going to vote against the bill.

Mr. PROXMIRE. Mr. President, I yield back the remainder of my time.

Mr. JAVITS. Mr. President, I yield back the remainder of my time.

The PRESIDING OFFICER. All time has been yielded back. The bill having been read the third time, the question is, Shall it pass? The yeas and nays have been ordered. The clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. CRANSTON. I announce that the Senator from Alabama (Mrs. ALLEN), the Senator from Colorado (Mr. HASKELL), the Senator from Kentucky (Mr. HUDDLESTON), the Senator from Massachusetts (Mr. KENNEDY), and the Senator from Alabama (Mr. SPARKMAN) are necessarily absent.

Mr. STEVENS. I announce that the Senator from New Mexico (Mr. DOMENICI), the Senator from Idaho (Mr. MCCLURE), the Senator from New Mexico (Mr. SCHMITT), the Senator from Virginia (Mr. SCOTT), the Senator from Texas (Mr. TOWER), and the Senator from North Dakota (Mr. YOUNG) are necessarily absent.

The PRESIDING OFFICER (Mr. SARBANES). Are there any Members of the Senate who have not voted and desire to vote?

The result was announced—yeas 70, nays 19, as follows:

[Rollcall Vote No. 495 Leg.]

YEAS—70

Abourezk	Gravel	Morgan
Anderson	Griffin	Moynihan
Baker	Hart	Muskie
Bayh	Hatfield, Paul G.	Nelson

NOT VOTING—11

Allen	Kennedy	Sparkman
Domenici	McClure	Tower
Haskell	Schmitt	Young
Huddleston	Scott	

So the bill (H.R. 50), as amended, was passed.

Mr. PROXMIRE. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. JAVITS. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. ROBERT C. BYRD addressed the Chair.

The PRESIDING OFFICE. The Senator from West Virginia.

Will the Senator suspend momentarily until we get a little order in the Chamber, please?

Will Members please take seats and clear the aisles? Members will please clear the aisles.

The Senator from West Virginia.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the Humphrey-Hawkins bill as passed by the Senate today be printed in the RECORD.

The PRESIDING OFFICER. Without objection, it is so ordered.

SECTION 1. This Act and the following table of contents may be cited as the "Full Employment and Balanced Growth Act of 1978".

TABLE OF CONTENTS

Sec. 1. Short title; table of contents.
Sec. 2. General findings.
Sec. 3. Report.
Sec. 4. National Employment Conference.
TITLE I—ESTABLISHMENT OF GOALS AND GENERAL ECONOMIC POLICIES
Sec. 101. Statement of purpose.
Sec. 102. Declaration of policy.
Sec. 103. Economic Report of the President and short-term economic goals and policies.
Sec. 104. Full employment and balance growth; medium-term economic goals and policies.
Sec. 105. Provisions applicable to short-term and medium-term goals.
Sec. 106. National priority policies and programs required for full employment and balanced growth.
Sec. 107. The Presidents' budget.
Sec. 108. Monetary policy.
Sec. 109. Overcoming inflation.
Sec. 110. Council of Economic Advisers.
Sec. 111. Advisory Board or Boards.
TITLE II—STRUCTURAL POLICIES AND PROGRAMS, INCLUDING TREATMENT OF RESOURCE RESTRAINTS
Sec. 201. Statement of purpose.
Sec. 202. Countercyclical employment policies.
Sec. 203. Coordination with State and local government and private sector economic activity.
Sec. 204. Regional and structural employment policies.
Sec. 205. Youth employment policies.
Sec. 206. Job training, counseling, and reservoirs of employment projects.
Sec. 207. Capital formation—private and public.
TITLE III—POLICIES AND PROCEDURES FOR CONGRESSIONAL REVIEW
Sec. 301. Statement of purpose.
Sec. 302. Committee review.
Sec. 303. Review of Economic Report as part of the Budget process.
Sec. 304. Modification of time table for achieving unemployment goals.
Sec. 305. Exercise of rulemaking powers.
TITLE IV—GENERAL PROVISIONS
Sec. 401. Nondiscrimination.
Sec. 402. Labor standards.

GENERAL FINDINGS

SEC. 2. (a) The Congress finds that the Nation has suffered substantial unemployment and underemployment, idleness of other productive resources, high rates of inflation, and inadequate productivity growth, over prolonged periods of time, imposing numerous economic and social costs on the Nation. Such costs include the following:

(1) The Nation is deprived of the full supply of goods and services, the full utilization of labor and capital resources, and the related increases in economic well-being that would occur under conditions of genuine full employment, production, and real income, balanced growth, a balanced Federal budget, and the effective control of inflation.

(2) The output of goods and services is insufficient to meet pressing national priorities.

(3) Workers are deprived of the job security, income, skill development, and productivity necessary to maintain and advance their standards of living.

(4) Business and industry are deprived of the production, sales, capital flow, and productivity necessary to maintain adequate profits, undertake new investment, create jobs, compete internationally, and contribute to meeting society's economic needs. These problems are especially acute for smaller businesses. Variations in the business cycle and low-level operations of the economy are far more damaging to smaller businesses than to larger business concerns because smaller businesses have fewer available resources, and less access to resources, to withstand nationwide economic adversity. A decline in small business enterprises contributes to unemployment by reducing employment opportunities and contributes to inflation by reducing competition.

(5) Unemployment exposes many families to social, psychological, and physiological costs, including disruption of family life, loss of individual dignity and self-respect, and the aggravation of physical and psychological illnesses, alcoholism and drug abuse, crime, and social conflicts.

(6) Federal, State, and local government budgets are undermined by deficits due to shortfalls in tax revenues and in increases in expenditures for unemployment compensation, public assistance, and other recession-related services in the areas of criminal justice, alcoholism and drug abuse, and physical and mental health.

(b) The Congress further finds that:

(1) High unemployment may contribute to inflation by diminishing labor training and skills, underutilizing capital resources, reducing the rate of productivity advance, increasing unit labor costs, and reducing the general supply of goods and services.

(2) Aggregate monetary and fiscal policies alone have been unable to achieve full employment and production, increased real income, balanced growth, a balanced Federal budget, adequate productivity growth, proper attention to national priorities, achievement of an improved trade balance, and reasonable price stability, and therefore must be supplemented by other measures designed to serve these ends.

(3) Attainment of these objectives should be facilitated by setting explicit short-term and medium-term economic goals, and by improved coordination among the President, the Congress, and the Board of Governors of the Federal Reserve System.

(4) Increasing job opportunities and full employment would greatly contribute to the elimination of discrimination based upon sex, age, race, color, religion, national origin, handicap, or other improper factors.

(c) The Congress further finds that an effective policy to promote full employment and production, increased real income, balanced growth, a balanced Federal budget, adequate productivity growth, proper attention to national priorities, achievement of an improved trade balance, and reasonable price stability should (1) be based on the development of explicit economic goals and policies involving the President, the Congress, and the Board of Governors of the Federal Reserve System, with maximum reliance on the resources and ingenuity of the private sector of the economy, (2) include programs specifically designed to reduce high unemployment due to recessions, and to reduce structural unemployment within regional areas and among particular labor force groups, and (3) give proper attention to the role of increased exports and improvement in the international competitiveness of agriculture, business, and industry in providing productive employment opportunities and achieving an improved trade balance.

(d) The Congress further finds that full employment and production, increased real income, balanced growth, a balanced Federal budget, adequate productivity growth, proper attention to national priorities, achievement of an improved trade balance through increased exports and improvement in the international competitiveness of agriculture, business, and industry, and reasonable price stability are important national requirements and will promote the economic security and well-being of all citizens of the Nation.

(e) The Congress further finds that the United States is part of an interdependent world trading and monetary system and that attainment of the requirements specified in subsection (d) is dependent upon policies promoting a free and fair international trading system and a sound and stable international monetary system.

REPORT

SEC. 3. Not later than one year after the date of enactment of this Act, the Committee on Human Resources of the Senate and the Committee on Education and Labor of the House of Representatives each shall conduct a study and submit a report, including findings and recommendations, to the Committee on Rules and Administration of the Senate and the Committee on Rules of the House, respectively, on the subject of establishing a full employment goal in connection with the provisions of this Act.

NATIONAL EMPLOYMENT CONFERENCE

SEC. 4. (a) A national Employment Conference may be convened in the District of Columbia within a reasonable period of time after the date of enactment of the Full Employment and Balanced Growth Act of 1978. Responsibility for the organization and implementation of this conference shall rest with the President or the appropriate department or agency of the Federal Government, and the conference shall bring together leaders of small and larger business, labor, government, and all other interested parties.

(b) The subject of the conference shall be employment, with particular attention to structural unemployment and the plight of disadvantaged youth. The conference shall also focus on issues such as implementation of adequate and effective incentives for private sector employers to hire the hard-core unemployed. Special attention shall be given to the creation of jobs through the use of targeted employment tax credits, wage vouchers, and other incentives to private sector businesses.

TITLE I—ESTABLISHMENT OF GOALS AND GENERAL ECONOMIC POLICIES

STATEMENT OF PURPOSE

SEC. 101. It is the purpose of this title—

(1) to declare the general policies of this Act;

(2) to provide an open process under which economic goals and policies are proposed, reviewed, and established;

(3) to provide for yearly review of national economic policies to ensure their consistency with these goals to the maximum extent possible; and

(4) to strengthen and supplement the purposes and policies of the Employment Act of 1946.

DECLARATION OF POLICY

SEC. 102. Section 2 of the Employment Act of 1946 is amended to read as follows:

"SEC. 2. (a) The Congress hereby declares that it is the continuing policy and responsibility of the Federal Government to use all practicable means, consistent with its needs and obligations and other essential national policies, and with the assistance and cooperation of both small and larger businesses, agriculture, labor, and State and local governments, to coordinate and utilize all its plans, functions, and resources for the purpose of creating and maintaining, in a manner calculated to foster and promote free competitive enterprise and the general welfare, conditions which promote useful employment opportunities, including self-employment, for those able, willing, and seeking to work, and promote full employment and production, increased real income, balanced growth, a balanced Federal budget, adequate productivity growth, proper attention to national priorities, achievement of an improved trade balance through increased exports and improvement in the international competitiveness of agriculture, business, and industry, and reasonable price stability as provided in section 5(b) of this Act.

"(b) The Congress further declares and establishes as a national goal the fulfillment of the right to full opportunities for useful paid employment at fair rates of compensation of all individuals able, willing, and seeking to work.

"(c) The Congress further declares that inflation is a major national problem requiring improved government policies relating to food, energy, improved and coordinated fiscal and monetary management, the reform of outmoded rules and regulations of the Federal Government, the correction of structural defects in the economy that prevent or seriously impede competition in private markets, and other measures to reduce the rate of inflation.

"(d) The Congress further declares that it is the purpose of the Full Employment and Balanced Growth Act of 1978 to improve the coordination and integration of the policies and programs of the Federal Government toward achievement of the objectives of such Act through better management, increased efficiency, and attention to long-range as well as short-range problems and to balancing the Federal budget.

"(e) The Congress further declares that, although it is the purpose under the Full Employment and Balanced Growth Act of 1978 to seek diligently and to encourage the voluntary cooperation of the private sector in helping to achieve the objectives of such Act, no provisions of such Act or this Act shall be used, with respect to any portion of the private sector of the economy, to provide for Federal Government control of production, employment, allocation of resources, or wages and prices, except to the extent authorized under other Federal laws.

"(f) The Congress further declares that it is the purpose of the Full Employment and Balanced Growth Act of 1978 to maximize and place primary emphasis upon the expansion of private employment, and all programs and policies under such Act shall be in accord with such purpose. Toward this end, the effort to expand jobs to the full employment level shall be in this order of priority to the extent consistent with balanced growth—

"(1) expansion of conventional private jobs through improved use of general economic and structural policies, including measures to encourage private sector investment and capital formation;

"(2) expansion of private employment through Federal assistance in connection with the priority programs in such Act;

"(3) expansion of public employment other than through the provisions of section 206 of such Act; and

"(4) when recommended by the President under section 206 of such Act and subject to the limitations in such section, the creation of employment through the methods set forth in such section.

"(g) The Congress further declares that trade deficits are a major national problem requiring a strong national export policy including improved Government policies relating to the promotion, facilitation, and financing of commercial and agricultural exports, Government policies designed to reduce foreign barriers to exports through international negotiation and agreement, Federal support for research, development, and diffusion of new technologies to promote innovation in agriculture, business, and industry, the elimination or modification of Government rules or regulations that burden or disadvantage exports and the national and international competitiveness of agriculture, business, and industry, the reexamination of antitrust laws and policies when necessary to enable agriculture, business, and industry to meet foreign competition in the United States and abroad, and the achievement of a free and fair international trading system and a sound and stable international monetary order.

"(h) The Congress further declares that it is the purpose of the Full Employment and Balanced Growth Act of 1978 to acheive a balanced Federal budget consistent with the achievement of the medium-term goals specified in section 4.

"(i) The Congress further declares that it is the continuing policy and responsibility of the Federal Government, in cooperation with State and local governments, to use all practical means consistent with other essential considerations of national policy to provide sufficient incentives to assure meeting the investment needs of private enterprise, including the needs of small and medium sized businesses, in order to increase the production of goods, the provision of services, employment, the opportunity for profit, the payment of taxes, and to reduce and control inflation. To the extent it is reasonably possible to do so, private enterprise investments in depressed urban and rural areas should be promoted to reduce the high levels of unemployment that exist there.".

ECONOMIC REPORT OF THE PRESIDENT AND SHORT-TERM ECONOMIC GOALS AND POLICIES

SEC. 103. (a) The heading preceding section 3 and section 3(a) of the Employment Act of 1946 are amended to read as follows:

"(j) The Congress further declares that it is the purpose of the Full Employment and Balanced Growth Act of 1978 to rely principally on the private sector for expansion of economic activity and creation of new jobs for a growing labor force. Toward this end, it is the purpose of this Act to encourage the adoption of fiscal policies that would establish the share of the gross national product accounted for by Federal outlays at the lowest level consistent with national needs and priorities.

"ECONOMIC REPORT OF THE PRESIDENT AND SHORT-TERM ECONOMIC GOALS AND POLICIES

"SEC. 3. (a) The President shall transmit to the Congress during the first twenty days of each regular session, with copies transmitted to the Governor of each State and to other appropriate State and local officials, an economic report (hereinafter in this Act referred to as the 'Economic Report') together with the annual report of the Council of Economic Advisers submitted in accord with section 11(c) of this Act, setting forth—

"(1) the current and foreseeable trends in the levels of employment, unemployment, production, capital formation, real income, Federal budget outlays and receipts, productivity, international trade and payments, and prices, and a review and analysis of recent domestic and international developments affecting economic trends in the Nation;

"(2)(A) annual numerical goals for employment and unemployment, production, real income, productivity, and prices for the calendar year in which the Economic Report is transmitted and for the following calendar year, designated as short-term goals, which shall be consistent with achieving as rapidly as feasible the goals of full employment and production, increased real income, balanced growth, fiscal policies that would establish the share of an expanding gross national product accounted for by Federal outlays at the lowest level consistent with national needs and priorities, a balanced Federal budget, adequate productivity, growth, price stability, achievement of an improved trade balance, and proper attention to national priorities; and

"(B) annual numerical goals as specified in subparagraph (A) for the three successive calendar years, designated as medium term goals;

"(3) employment objectives for certain significant subgroups of the labor force, including youth, women, minorities, handicapped persons, veterans, and middle-aged and older persons; and

"(4) a program for carrying out the policy declared in section 2, together with such recommendations for legislation as the President may deem necessary or desirable.".

(b) Section 3 of the Employment Act of 1946 is amended by adding the following:

"(d) For the purposes of the Full Employment and Balanced Growth Act of 1978, the percentage rate of unemployment as a percentage of the civilian labor force as set forth by the Bureau of Labor Statistics in the Department of Labor as computed under the procedures in effect as of the date of enactment of this Act.

"(e) For the purpose of the Full Employment and Balanced Growth Act of 1978, the terms 'inflation', 'prices', and 'reasonable price stability' refer to the rate of change or level of the consumer price index as set forth by the Bureau of Labor Statistics, United States Department of Labor."

FULL EMPLOYMENT AND BALANCED GROWTH: MEDIUM-TERM ECONOMIC GOALS AND POLICIES

SEC. 104. The Employment Act of 1946 is amended by redesignating sections 4 and 5 as sections 10 and 11, respectively, and by inserting a new section 4 as follows:

"FULL EMPLOYMENT AND BALANCED GROWTH: MEDIUM-TERM ECONOMIC GOALS AND POLICIES

"SEC. 4. (a) In each Economic Report after enactment of the Full Employment and Balanced Growth Act of 1978, the President shall incorporate (as part of the five-year numerical goals in each Economic Report) medium-term annual numerical goals specified in section 3(a)(2)(B), and in each President's Budget submitted immediately prior thereto, the President shall incorporate the programs and policies the President deems necessary to achieve such medium-term goals and a balanced Federal budget and to achieve reasonable price stability as rapidly as feasible as provided for in section 5(b) of this Act.

"(b) The medium-term goals in the first three Economic Reports and, subject to the provisions of subsection (d), in each Economic Report thereafter shall include (as part of the five-year goals in each Economic Report) interim numerical goals for—

"(1) reducing the rate of employment, as set forth pursuant to section 3(d) of this Act, to not more than 3 per centum among individuals aged twenty and over and 4 per centum among individuals aged sixteen and over within a period not extending beyond the fifth calendar year after the first such Economic Report; and

"(2) reducing the rate of inflation, as set forth pursuant to section 3(e) of this Act, to not more than 3 per centum within a period not extending beyond the fifth calendar year after the first such Economic Report: *Provided*, That policies and programs for reducing the rate of inflation shall be designed so as not to impede achievement of the goals and timetables specified in clause (1) of this subsection for the reduction of unemployment. For purposes of this subsection, the first Economic Report shall be the Report isued in the first calendar year after enactment of the Full Employment and Balanced Growth Act of 1978.

"(c)(1) Upon achievement of the 3 and 4 per centum goals specified in subsection (b)(1), each succeeding Economic Report shall have the goal of achieving as soon as practicable and maintaining thereafter full employment and a balanced budget;

"(2) Upon achievement of the 3 per centum goal specified in subsection (b)(2), each succeeding Economic Report shall have the goal of achieving by 1988 a rate of inflation of zero per centum: *Provided*, That policies and programs for reducing the rate of inflation shall be designed so as not to impede achievement of the goals and timetables

specified in clause (1) of this subsection for the reduction of unemployment.

"(d) In the second Economic Report after enactment of the Full Employment and Balanced Growth Act of 1978, the President shall review the numerical goals and timetables for the reduction of unemployment and inflation, and the goal of balancing the Federal budget; report to the Congress on the degree of progress being made, the programs and policies being used, and any obstacles to achieving such goals and timetables; and, if necessary, propose corrective economic measures toward achievement of such goals and timetables: *Provided*, That beginning with the second Report and in any subsequent Reports, if the President finds it necessary, the President may recommend modification of the timetable or timetables for the achievement of the goals provided for in subsection (b) and the annual numerical goals to make them consistent with the modified timetable or timetables, and the Congress may take such action as it deems appropriate consistent with title III of the Full Employment and Balanced Growth Act of 1978.

"(e) If, after achievement of the 3 and 4 per centum goals specified in subsection (b), the unemployment rate for a year as set forth pursuant to section 3(d) of this Act is more than 3 per centum among individuals aged twenty and over or more than 4 per centum among individuals aged sixteen and over, the next Economic Report after such rate is set forth and each succeeding Economic Report shall include (as part of the five-year goals in each Economic Report) the interim numerical goal of reducing unemployment to not more than the levels specified in subsection (b)(1) as soon as practicable but not later than the fifth calendar year after the first such Economic Report, counting as the first calendar year the year in which such Economic Report is issued: *Provided*, That, if the President finds it necessary, the President may, under the authority provided in subsection (d), recommend modification of the timetable provided for in this subsection for the reduction of unemployment, and for the purposes of section 304 of the Full Employment and Balanced Growth Act of 1978, such recommendation by the President shall be treated as a recommendation made under subsection (d) of this section.

"(f)(1) In taking action to reduce unemployment in accord with the numerical goals and timetable established under section (b), every effort shall be made to reduce those differences between the rates of unemployment among youth, women minorities, handicapped persons, veterans, middle-aged and older persons and other labor force groups and the overall rate of unemployment which are caused by any improper factors with the ultimate objective of removing such differentials to the extent possible.

"(2) Insofar as the differences specified in the preceding paragraph are due to lack of training and skills, occupational practices, and other relevant factors, the Secretary of Labor shall—

"(A) take such action as practicable to achieve the objectives of this subsection;

"(B) make studies, develop information, and make recommendations toward remedying these differences in rates of unemployment, and include these in the annual Employment and Training Report of the President required under section 705(a) of the Comprehensive Employment and Training Act of 1973 (hereinafter in this Act referred to as 'CETA'); and

"(C) make recommendations, as deemed necessary, to the Congress related to the objectives of this paragraph.

"(g)(1) The term 'middle-aged and older persons' as used in this section includes any individual forty-five years of age or older.

"(2) For purposes of this subsection, the term 'veteran' shall mean the same as defined in section 2011(1) or (2)(A) of title 38, United States Code.

PROVISIONS APPLICABLE TO SHORT-TERM AND MEDIUM-TERM GOALS

SEC. 105. The Employment Act of 1946 is amended by adding a new section 5 as follows:

PROVISIONS APPLICABLE TO SHORT-TERM AND MEDIUM-TERM GOALS
